st week. He was held in \$500 bail. As reported in THE JEWELERS' CIRCULAR—WEEKLY, recently, Starr, it was claimed, was detected in holding up money belonging to the firm while making a transaction with a customer. He ran to the back of the store and seized a bottle of acid from a watchmaker's bench, from which he allowed a portion. The ambulance was called and the young man taken to the hospital and treated. He was released from the hospital last week. Some of the firm's money, it is claimed, was held back by Starr in making cash sales, but the larger portion, it is said, was taken when he failed to deposit sums with which he was sent to the bank. He said his mother lived in Lisawatyrod, Russia. He talked incoherently about his mother needing \$300 which he returned to Russia.

L. P. Kadison, of Fera & Kadison, New York, sails to-day on the *Lusitania* for Europe.

The Board of United States General Appraisers upheld, Monday, a claim filed by the H. H. Tamman Curio Co. regarding the classification of semi-precious stones. It appears that the stones were cut for jewelry purposes, but were not set. The importers protested against the classification of the articles as manufactures of jewelry at 50 per cent., and claimed that the duty should be at the rate of 10 per cent., as semi-precious stones, cut. General Appraiser Sharretts, who writes the decision for the board, upholds the contention of the importers.

Edward Goldstein, of Goldstein Bros., 9 Ave. A, reports that he had a unique experience last Wednesday with a man who he believes was intent on stealing some jewelry. The man came to Goldstein Bros. first about two months ago, and, claiming to be deaf and dumb, made motions to the jeweler which indicated a desire to purchase a gold ring. A tray of rings was placed in front of the customer, and Mr. Goldstein says that he detected the fellow trying to palm one of them. The man soon was joined by another man and both soon went away. Last Wednesday the same customer visited his store again and by signs made the jeweler understand that he wished to buy a scarf pin. Mr. Goldstein recognized him at once and refused to show him any jewelry. The jeweler stepped from behind his counter and took the man by the coat lapel, indicating to him that he was to get out of the store. To dispel distrust the man held out a roll containing \$12 toward the jeweler, who took it. The man then went down the street, but would not return to get his money, evidently fearing that he would be arrested. He has not as yet returned, and Mr. Goldstein still has the money in an envelope in his safe awaiting his return. The jeweler described his visitor as being of medium height, with a round, full face and florid complexion. He was smooth-shaven and fairly well dressed. He had dark hair and eyes and showed a front tooth crowned with gold.

Boston.

Employees of D. C. Percival & Co. enjoyed a yachting trip, Saturday, as the guests of Lawrence Percival. The outing included a sail off the north shore and a dinner at Marblehead.

Jewelers in town last week included A. R. Campbell, Morrisville, Vt.; F. P. Fisk, Epping, N. H.; J. A. Merrill, of J. A. Merrill & Co., Portland Me.; L. E. Briggs, Vineyard Haven, and D. J. Sullivan, New Bedford, Mass.

E. R. Snow, general manager of the E. Howard Watch Co., stated that there had been no advance in the price of the Howard product and that no increase is contemplated. The company, he said, is doing a large and successful business.

Two strangers entered the jewelry store of Lazarus Davis at 1247 Tremont St., Roxbury, about 1.30 P.M. Sept. 20 and asked if they could examine some gold signet rings. Mr. Davis produced a tray containing a dozen rings. The men snatched the rings and ran from the store, turning into a side street, and from thence to the tracks of the N. Y., N. H. & H. Railroad. When last seen they were heading towards the city proper. The police are investigating the theft.

Sixty-five members of the Boston Jewelers' Club enjoyed an outing, Tuesday, Sept. 21, at Ferncroft Inn, Middleton. The party started from Hotel Somerset at 4 p. m. in automobiles, and made the trip by a circuitous route in order to take advantage of the north shore's boulevards and attractive scenery. The programme included a dinner and an informal entertainment. The affair was in charge of the executive committee, which includes James S. Blake, F. S. Sherry and H. W. Patterson, and the secretary, F. E. Chick.

Walter Llewelyn Shepard, treasurer of the Shepard Mfg. Co., Melrose, was married, Wednesday of last week, to Miss Gertrude Lawson, daughter of John H. Lawson, and the favorite niece of Thomas W. Lawson, the financier. The ceremony was performed at the residence of Rev. Burke F. Leavitt, in Belmont. The party accompanying the bride and bridegroom included the bride's father, Mrs. Shepard, the bridegroom's mother, Miss Bessie Shepard, Miss Dorothy Lawson and Miss Beatrice Pike, of Concord, N. H. The ceremony was followed by a dinner at the Parker House, Boston. After a few weeks at Bar Harbor they will go to the bridegroom's summer home at Little John's Island, Me., and later occupy their permanent home at 26 Henry Ave., Melrose.

There was a large gathering at the second complimentary banquet given by the Waltham Watch Co. to its volunteer fire brigade at A. O. U. W. hall, Waltham, Saturday evening, Sept. 18. Foreman H. C. Eaton, of the engineering department, presided. At the head table was General Superintendent Burckes, Assistant Superintendent Gleason Wood, Assistant Superintendent E. C. Richardson, Captain E. T. Jewett, of the volunteer fire brigade, and his lieutenants, Messrs. Condrin, Jackson and Williams, together with these city officials: Fire Chief George I. Johnson, Superintendent of Wires John Pownall,

Assistant Chief Edward H. Bull, Assistant Engineer Strauch and ex-Fire Chief Freeman Hodgdon. Speeches were made by the guests, who spoke of the value of the factory fire brigade and praised its efficiency.

The jewel presented to Benjamin W. Rowell of Lynn by the Imperial Council of the Mystic Shrine in recognition of his services as imperial recorder was supplied by the firm of Kettell & Blake. The top of the jewel is a scimeter, the hilt studded with diamonds, garnets, rubies and emeralds, from which is pendant a medallion, having in the center a portrait of Recorder Rowell, surrounded by 60 emeralds. In a circle outside of this are these words in emeralds: "Benjamin W. Rowell, Imperial Recorder, 1894-1910." Attached to the medallion is a mother-of-pearl crescent, embordered with gold, on the top of which is the head of a female sphinx cut in sardonyx, having a headdress of gold with garnets in the center. Depending from the crescent is a star, the center piece being a 3½ carat diamond. On the reverse side of the medallion is an appropriate inscription.

A. S. Martin has been appointed foreman of the new matching department of the Waltham Watch Co.'s factory, which was formerly a part of the finishing department. Among those who were shown through the factory, recently, were Guy H. Wyman, of Yarmouth, N. S.; T. Jousse, of La Chuto, Canada; D. H. La Porte, of Lowell; Ella W. Perry, of Cambridge; Harry C. Gadsley, of Mansfield, O.; Mr. and Mrs. A. R. Rovelstad, of Elgin, Ill.; Rev. William H. Dyas, of Waltham; Charles R. Dyas and A. Douglass Dyas, of Parrsboro, N. S. A. E. Benoit has resigned his position at the factory to engage in the jewelry business at Bedford, Ore. The bowling league has perfected its organization. Three more teams have entered, the jewel assembling, balance and adjusting, making 12 teams in all. The first match will be played Oct. 4, and there will be rolling every night except Saturday.

Washington, D. C.

Segal & Alpher, 307 17th St., N. W., have been succeeded by Alpher & Kur.

H. D. Feast & Co., 1213 F St., have incorporated, with an authorized capital stock of \$10,000, paid in.

According to announcement made recently work is to be rushed upon the proposed five-story structure to be built at 1207 G St., with the view of having it completed and ready for occupancy by the middle of December. A. L. Bissell, jeweler, at 1117 G St., has secured a nine-year lease upon the building and will occupy all five floors of it. His store will be enlarged and he expects to have it open for business by Jan. 1, 1910.

James Robinson, a negro, 21 years old, was arrested some time ago at Louisville, Ky., where he was charged by detectives with having taken two gold watches from the jewelry store of Jac. Gordy, 724 W. Market St. It was believed that he entered the store when the proprietor was in the rear, grabbed the watches and then escaped.

"Multi-Silver Fortified Back"

Showing silver plating on front of spoon

IN addition to our extraordinary standard plating we put a "Multi-Silver" plating on the entire back of every spoon and fork—the place wear-resistance is most necessary:

As our *Multi-Silver* plating is accomplished in one operation, by a new patented process which we control exclusively, we get the extra fortification at but a trifle more than the cost of the additional silver:

Our goods have a *standard price and profit for the dealer*, because we take advantage of every invention to make them better:

Send your orders *now* for Fall delivery.

Providence.

TRADE CONDITIONS.

The manufacturing jewelry industry of this city is showing a gradual improvement and has now attained within a few points of what it was during 1908 which was admittedly one of the best years the trade has experienced since the Civil War, when money was spent freely by all classes. The various stone merchants report that their business is already ahead of 1906, and that the recovery from the depression during 1908 is here to stay. Diamonds—brown, yellow and white, and jet and imperfect stones—have doubled in price since then. The manufacturing jewelers say the business is back to 95 per cent. of normal. Formerly they mean the largest year, and that during 1907. The jewelers on the whole look for a much more prosperous year and a more active trade than they have had for years, owing to the recent tariff bill, over the passage of which they are much elated. Many of the shops are now working overtime and this applies to gold and silver workers alike.

Frederick Mayer, of the Bruhl Bros. & Sons Co., of this city, was in Chicago, last week.

Carpenter & Wood, enamellers, will remove, Oct. 1, from 38 Friendship St. to 14 Under St.

Mr. and Mrs. James R. Doolittle are returning from a trip to Norfolk and Old Point Comfort, Va.

David F. Sherwood has discharged a chattel mortgage of \$1,000 against Frederick B. Wood, 199 Eddy St.

Spacious offices are being partitioned off from the large salesrooms of the Brownell Machinery Co., 13 Eddy St.

Bradley A. Graffam and family have returned from their Summer home at Bristol Neck, on Narragansett Bay.

Harry Brown has placed attachments on various parcels of land in this city belonging to John Nelson for \$200.

The Gorham Mfg. Co. has been awarded a contract to make the award medals for the Alaska-Yukon exposition.

The Lyons Mfg. Co., of this city, has removed its Chicago office from 565 E. 45th St. to 1111 Heyworth building.

Martha O. Nickerson has been appointed clerk of the Municipal Court as administratrix of the estate of Browning B. Nickerson.

Hedwig P. Bens has been appointed clerk of the Municipal Court as the executrix of the estate of her husband, William Bens.

A quarterly dividend of 1½ per cent. on the preferred capital stock of the Gorham Mfg. Co. has been declared, payable Oct. 1.

Hoffman S. Dorchester, an old-time manufacturing jeweler, and wife have issued invitations for their daughter's wedding, Oct. 2.

Mr. and Mrs. William H. Thurber have returned from their Summer home at Bristol and opened their town house on Waterman St.

Horace F. Carpenter is enjoying an extended pleasure trip through the south. He was a visitor at the Natural Bridge, Va., the past week.

A dividend on the capital stock of the Nicholson File Co. has been declared, payable to stockholders of record to Sept. 25 on Sept. 30.

B. Riddell has given a chattel mortgage to Hirsch Bloom, New York, on all the stock in the department store, 420 Westminster St., for \$500.

Frederick B. Luther, of William H. Luther & Son, has presented the Pawtucket

Motor Boat Club with a float and fixtures for their boat landing.

Horace M. Peck, manager of the Manufacturing Jewelers' Board of Trade, was in New York, last week, on business connected with that association.

At the 11th annual meeting of the Anawan Club, Wednesday, Edward B. Hough was elected vice-president and director, and Everett L. Spencer secretary.

Jacob Goldman, of Horwitz & Goldman, successors to Goldman & Co., of Pittsburg, Pa., was in this city, the past week, placing orders with the manufacturers.

Samuel H. Brower has returned from a successful trip to the Pacific coast with the E. L. Spencer Co.'s line. He included Portland and Seattle in his trip.

Edward L. Mulcahey, superintendent of the C. Sydney Smith & Co.'s shop, has been chosen to fill a vacancy in the Providence School Committee from the Seventh Ward.

The Vernerbeck & Clase Co. has taken an entire floor of the new addition to the Doran building on Chestnut St., which materially increases the floor space of its shop.

The W. H. Holt Mfg. Co., 7 Eddy St., has given a chattel mortgage of \$18,500 to James Keenan, New York, covering stock, machinery and other personal property at that location.

Robert E. Budlong, of the S. K. Merrill Co., who has been a member of the East Providence school committee for the past six years, has announced that he is not a candidate for re-election.

The last race of the season in the 18-foot class, on Saturday, gave Harvey J. Flint's *Bat* a clean-cut, well-deserved victory over her rivals in one of the prettiest yacht races sailed during the entire Summer.

Rothschild & Levy have taken one floor of the new section of the Doran building on Chestnut St., this city, and will shortly remove from their present location in the Bates & Bacon building, Attleboro.

Frank T. Pearce was one of the few members of the 33rd degree of the Ancient and Accepted Scottish Rites Masonry from Rhode Island who attended the 97th annual convention at Boston, last Tuesday evening.

The petition of Nathan Nelson that Raphael Silverstein, or some other suitable person, be appointed the guardian of the person and estate of John Nelson will be heard in the Municipal Court, Oct. 5, at 9 A.M.

Rudolph G. Schutz, traveling representative of the Improved Seamless Wire Co., of this city, has just returned from an extended stay in Europe, during which he visited Hungary, Germany and Switzerland.

Among the heaviest taxpayers of East Providence, according to the assessment just announced, are: Robert E. Budlong, \$12,000; Edward T. George, \$14,000; Anson D. Manning, \$9,750; Edgar B. Wood, estate, \$5,000.

At the annual meeting of the Eighth Ward Republican Club, of this city, on Wednesday evening, Edward N. Cook was elected one of the vice-presidents and Emery J. San Souci was appointed on an important committee.

A. S. Vernerbeck and John Shepard, Jr.,

were members of the team representing Rhode Island in the interstate golf match with the Massachusetts team, played at the links of the Wannamoisett Golf Club, on Saturday afternoon.

Ernest T. Mathewson has severed his connection with the Standard Machinery Co. to accept a similar position with John W. Cole. He will make a specialty of calling on the manufacturing jewelers for orders on jewelry machinery.

The United Brush Co., Pawtucket, having been declared bankrupt, a meeting of the creditors has been called for Sept. 30, at 10 o'clock, in the office of Nathan W. Littlefield, referee, room 47, 87 Weybosset St., to prove claims and appoint a trustee.

At 12:30 o'clock Saturday afternoon special cars left the corner of Chestnut and Friendship Sts. with the employes of the E. L. Spencer Co., who went to the Pomham Club for their annual outing. It was a jolly party and an enjoyable time was had by all those present.

The co-partnership heretofore existing between George Eberhard and Robert J. Jimmerson, under the firm name of Eberhard & Jimmerson, 9 Calender St., has been dissolved by mutual consent, and the business will be conducted by George Eberhard, Mr. Jimmerson retiring.

James Peacock, of Peacock, Stone & Markham, of this city, accompanied by his son, John Peacock, were in Chicago, last week, attending to business of the firm. They were guests of J. W. Stoneburger, western representative of the firm, who has just returned from the far west.

Frank A. Fanning, 18 years old, was arrested, Saturday evening, by Inspector Monahan, of the headquarters squad, and Detective Goldowsky, on a charge of stealing seven gold rings, valued at \$17.50, from the Ostby & Barton Co. He was locked up at the Central Station and will be given a trial next week.

Several improvements are to be made to the Enterprise building on Eddy St., whereby it will be made up to date in every respect. One of the most important improvements will be the equipping of the building with electric power in place of steam. Several manufacturing jewelry establishments are located in this building.

A double wedding, in which the brides were sisters, took place at Riverside, Wednesday afternoon, when Miss Grace Lucretia Hudson was married to Clifford Eaton Norris, and Miss Ethel Marion Hudson was married to Frank Wentworth Kingsford. The brides are the daughters of Theodore C. Hudson, jeweler, of this city.

The E. C. Bliss Mfg. Co., of this city, is making 1,000,000 official souvenirs for the Hudson-Fulton celebration. These are on a rush order, and the production is at the rate of 100,000 per day. They are in the form of fobs, of shield shape, bearing on the one side busts of Henry Hudson and Robert Fulton, and on the other the *Half Moon* and the *Clermont* in relief.

William H. Richardson, treasurer of Flint, Blood & Co., is slowly regaining the use of his eyesight, and it is expected that he will fully recover. At the midsummer outing of the New England Manufacturing Jewelers and Silversmiths' Association at

Workshop Notes

for Jewelers and Watchmakers

Cloth :: Postpaid, \$2.50

Published by
The Jewelers' Circular Pub. Co.
11 John St., New York

Ed's Point he was suddenly stricken with business while at the dinner table, and had to be assisted to his home. He has since been under the care of a specialist.

Among the individuals, firms and corporations taxed for \$25,000 or more property in Pawtucket, according to the last assessment, just announced, are the following: Callender, McAusland & Troup Co., \$520; George B. Champlin, \$54,640; Mrs. H. Fuller, \$122,760; George H. Miller & Son Co., \$25,000; Arnold C. Mosler, \$10,000; Shartenberg & Robinson, \$100; United Wire & Supply Co., \$13,000.

The shop of Alfred Vester & Sons, manufacturers of metal ornaments and jewel findings, on the second floor of the under building, on Calender and Sabin streets, was considerably damaged by fire and explosion, Tuesday night, Sept. 21. The blaze was fortunately discovered before it had gained much headway, but the firemen worked for an hour or more before they were able to extinguish it. The cause of the fire is unknown.

Among the foreign importations received through the Providence Customs House, last week, were the following: From Bremen, one package of silverware and 11 packages of imitation precious stones; from Hamburg, seven packages of jewelry; from Liverpool, one package of manufactures of metal; from Naples, one package of manufactures of marble; from Southampton, two packages of scientific instruments, one package of imitation precious stones and one package of jewelry.

Ground was broken, on Monday, for the erection of a three-story factory building, 100 feet in length and 35 feet in width, in addition to the building now occupied by George N. Steere Co., at Pawtucket. The two buildings will be connected by a bridge, and when completed the entire plant will afford about three times the present floor space. Mr. Steere left, Sept. 27, on a trip west as far as Chicago, where he expects to meet Frank T. Barton, who is returning from a successful trip to the Pacific coast.

At a meeting of the general committee of the business men and manufacturers of this city having in charge the visit of the Japanese commissioners to this city, in October, Mayor Fletcher volunteered to go to New York and make a personal effort to have their stay in this city prolonged to a whole day. Mayor Fletcher, Harry Cutler, Frederick W. Aldred and Walter Callender were reported as being on the reception committee, and Henry D. Sharpe, John F. Lawton and N. B. Barton as members of the trade and commerce committee that has been appointed.

A very dainty little folder, entitled "About a New Bracelet," is being sent out by Henry Birks & Sons, Montreal, Can. The folder consists essentially of a cover made of a brownish hue inside of which is pasted on—on one side only—a straw-colored circular embellished by watermarks of a brownish hue, and printed in black. A reproduction of the bracelet advertised is pasted on the front cover.

Attleboro.

Harry Hull is home from a western trip for Barden & Hull.

Charles Crane is making a western trip in the interests of the Bliss Bros. Co.

J. L. Sweet will soon start on a pleasure trip that will extend around the world.

Samuel M. Einstein registered, the past week, a new Everett-Mitzger touring car.

Frank Mossberg witnessed the Hudson-Fulton celebration at New York, last week.

The jewelry design classes at the Y. M. C. A. will open for the Winter session Oct. 19.

The Reed & Barton Co., Taunton, have found it necessary to run several of the departments overtime.

Freeman, Daughaday & Co., Sturdy Bros. and the Sturdy Mfg. Co., of Chartley, are all working overtime.

S. O. Bigney attended the reception given to Dr. Cook, the discoverer of the North Pole, at New York, last week.

Edward A. Sweeney, a member of the county committee, has received word that the county convention will be held in Taunton, Oct. 8.

The suit of the Cornell & Andrews Smelting Co. against the Boston & Providence Railroad Co. is scheduled to be heard at Taunton this month.

Rothschild & Levy have decided to remove their plant to Providence. They have been located on the top floor of the Bates and Bacon building, on County St.

Thomas E. McCaffrey, who is interested in a number of local firms, was elected a delegate to the representative convention by the Democrats at their caucus last week.

Roger T. Wilson, with D. S. Spaulding, Mansfield, was married, last week, to Miss Annie Swanton, of Attleboro, who for some time has been bookkeeper for C. D. Lyons & Co., Mansfield.

Last week an unknown man relieved a number of the residents of Hebronville of a little of their cash by representing himself to be a manufacturing jeweler located at 220 Main St., Attleboro. He was looking, he said, for help, and when he found a person who was willing to go to work he made them put up a dollar security so as to be sure they would be on hand when wanted. By this method he obtained quite a little money before he disappeared.

The employes of the Finberg Mfg. Co. were entertained, last Wednesday evening, in the new addition which has been recently built to the Finberg shop on Park St. The affair was given by the firm and was thoroughly enjoyed by the gathering. An entertainment was enjoyed and then the guests present sat down to a banquet. Lawrence McNally and Joseph Finberg had the general supervision of the affair, and the decorations were in charge of Joseph Reynolds, Herman Wyatt and Slade Lake.

A suit for \$2,000 damages has been brought in the Circuit Court, Kansas City, Mo., against P. S. Harris and J. E. Goar, of the Harris-Goar Mfg. Co., of that place, by Onell Munden, 14 years of age, who alleges that his picture was used by the concern as an advertisement without his consent. The plaintiff being a minor the suit is brought in the name of his mother.

Lancaster, Pa.

Charles Watson has gone to Tucson, Ariz., for the benefit of his health, having been greatly benefited during last Winter's residence at that place.

John J. Bowman and W. W. Appel attended the Hudson-Fulton centennial celebration at the home of the inventor, in Fulton township, Lancaster County.

G. William Reisner has received an order for 50 gold, silver and bronze medals, which are to be distributed as prizes to the winners in the inter-county athletic meet that was held on Labor Day, at Calumet, Mich.

Word was received here, last week, from St. Paul of the death, a few days prior, of August Coulman, who removed to that city a number of years ago from Lancaster County. He had a reputation as a skillful engraver.

A pair of sharpers were taken into custody, last week, by the police for selling cheap jewelry, which they represented as a good quality. They were released on promising to leave the city, and they lost no time in going away.

A grandfather's clock made in 1798 in Wurtemberg, Germany, was sold, last week, to a Philadelphia party in the sale of the effects of the late Josiah Clements, a few miles from Manheim. The works are wood and the case inlaid with woods. The price paid was \$135.

William George, Reading, Pa., has entered the local technical school as a student in engraving. C. H. Hoxworth, Allentown, Pa., a student of the school, has gone home for his vacation. George H. Thomas, of Kittanning, Pa., has returned to the school from a month's visit to his home.

John J. and Charles E. Bowman, of Ezra F. Bowman's Sons, visited Philadelphia last week, making the trip by automobile. The first named was a guest at the recent Strauss-Proyer wedding, this city. A. W. Proyer, manager of the Non-Retailing Co., was also a guest, the bride being his niece.

A show window of S. Kurtz Zook's jewelry store last week contained an exhibit of unusual interest, a Robert Fulton display, so called because it consisted of watches of the period contemporaneous with Fulton's steamboat. They were of immense size, in strong contrast with the latest style of thin watches exhibited with them.

The following jewelers, recently, visited Lancaster: C. E. Hinkle, Ephrata; H. Frank Maurer, Strasburg; Jacob Esch, Intercourse; David Frynger, Leola; John M. Shookers, Elizabethtown; W. J. Frazer, Lincoln; George Hepp and H. R. Wertz, Lititz; N. W. Pinkerton, Manheim; J. Harry Senseny, New Holland; Paul N. Mecklin, Baltimore, Md.; C. J. Prentice, Pittsburg; A. L. McKenzie, Columbus, O.; David O. Cookman, Rochester.

W. H. Diefenbach, Dushore, Pa., has resumed business after having been confined to his home by illness for several days.

E. G. Sites, Bellefontaine, O., was painfully burned while recently making repairs to a gasoline supply tank connected with his automobile.

THERE are established prices at which all jewelers sell Illinois movements. There are established prices at which they buy them. These are the movements of standard value—the prices don't fluctuate and the quality does not vary.

We suggest the advisability of dealers anticipating their requirements, not because we expect to raise prices, but because there is going to be a greater shortage of Illinois movements this Fall than ever before in the history of our company.

W. Hoyt, St. Louis, Mo., stopped over
here, last week, on his way east.

ames W. Clark is back from a visit to
his native town of Haddam, Mass.

V. S. Tompers is back in Chicago rep-
resenting C. H. Eden Co. in the west.

Max L. Silverberg, diamond dealer, has
returned from Europe with his family.

M. Bigwood and wife, Terre Haute,
Ind., spent a few days here, last week.

ee Wechter, with L. A. Eppenstein &
Sons, has returned from the Pacific coast.

Messrs. Simpson and Gebhart, Flandreau,
Dak., were in this market, last week.

L. S. Hayes, Norfolk, Nebr., stopped over
here, last week, on his way to New York.

Wm. Arnold, Ann Arbor, Mich., was
here, last week, on a visit to his relatives.

A. Hirsch was confined to his home for
a few days, last week, slightly indisposed.

Al. Kolker, with the Juergens & Ander-
son Co., came in from Denver, last week.

Mr. Cook, of the Cook Jewelry Co., Fay-
etteville, Ark., was here, last week, buying
stock.

F. T. Barton, representing the Fontneau
Cook Co., has returned from the Pacific
coast.

F. E. Hyatt, with the Philadelphia Watch
Case Co., visited the middle western cities,
last week.

H. W. Hedge, with the New York Stand-
ard Watch Co., is on an eastern trip to
New York.

Edward Baumgarten, of M. F. Barger &

Co., has returned from a three-months'
western trip.

Jac Rosenberg, with Kristian Falkenberg,
Walla Walla, Wash., is here spending a
few weeks' vacation.

A baby boy was born, last week, in the
family of Jacob Franks, president of the
Rockford Watch Co.

J. T. Brayton, Chicago manager of the
Julius King Optical Co., is in New York
for a three-weeks' stay.

Weiss & Weiss, who failed in the whole-
sale jewelry business here, are now running
a saloon on the West Side.

James Coy, with the Webb C. Ball Watch
Co., will make his maiden trip to the Pacific
coast, the latter part of October.

Specht, McNeff & Co. will remove, Oct.
1, from the Chicago Savings Bank build-
ing to room 1109 Heyworth building.

The family of Paul N. Lackritz, retail
jeweler of Milwaukee Ave., was recently
increased by the advent of a baby girl.

Leary & Penfold, Providence, R. I., have
opened an office in room 401 Heyworth
building, in charge of Geo. C. Mendell.

J. J. Sommer & Co., North Attleboro,
Mass., have opened an office in the Colum-
bus building, in charge of E. T. Sommer.

Louis Gordon, formerly employed by S.
Lazarus & Co., has opened a new jewelry
store on W. Madison St., near Kedzie Ave.

Wm. Mueller has resigned his position
with S. K. Huston and is now visiting the
city trade in the interests of F. H. Noble
& Co.

M. C. Eppenstein, of the Illinois Watch
Case Co., has almost recovered from his
recent illness and is much improved in
health.

Chas. A. Bachman, formerly at Gilman,
Ill., and now at 63rd St. and Stewart Ave.,
is taking a course in engraving from A.
Wehde.

Mr. Nelson, of Dunbar & Nelson, North
Yakima, Wash., was here, last week, with
his bride, having been married recently in
Wisconsin.

C. W. Morris, formerly representing
Benj. Allen & Co. in Oklahoma, has been
engaged by Bach & Co. to represent them
in this city.

B. Meyerowitz, of Meyerowitz Bros.,
New York, is now in Chicago submitting
the latest importations of his firm to the
local trade.

Messrs. Ostermyer and Trunk were here,
last week, buying the opening stock for
their new jewelry store recently opened in

Springfield, Ill. Chas. A. Trunk was for-
merly in business at Winona, Ill.

Jacob Bunn, president of the Illinois
Watch Co., stopped over here, last week,
on his way to the Hudson-Fulton celebra-
tion in New York.

Geo. Southick, representing Payton &
Kelly Co., passed through here, last week,
on his way home from the coast, accom-
panied by his wife.

M. G. Evans, traveler for Norris, Alister
& Co., sprained his left ankle while in Kal-
amazoo recently, and has been laid up for
repairs for a few days.

J. D. Mosely, retail jeweler at Clarion,
Pa., stopped over in this city, last week,
on his way east, where he will visit his mother,
who resides in Massachusetts.

L. H. Schafer and F. C. Strang, of L.
H. Schafer & Co., have returned from a
business trip to the principal cities of Mich-
igan, Ohio, Indiana and Kentucky, and re-
port excellent business.

Announcement of the death of Addison
Woodhull, of Mount & Woodhull, caused
a great shock to the trade here. The of-
fice of Charles A. Garlick, representing the
firm here, was closed on Friday.

L. Brick, jewelry auctioneer, has sold out
the stock of Guy M. La Pierre, leading
jeweler of Niles, Mich. Mr. La Pierre in-
tends to open up in a larger town which
offers a broader field for his business.

The houseboat of Larry Edwards was
turned into a clubhouse, last Sunday, the
occasion being the annual regatta of the
McHenry Power-Boat Club. Mr. Edwards
donated a silver loving cup as one of the
prizes.

The first Fall monthly meeting of the
Chicago Jewelers' Association took place,
last Tuesday, in the Columbus building.
The matter of increasing the association's
efficiency by widening its plan and scope
was deferred until January.

Wm. K. Sandberg & Co. had Harry Feld-
man arrested, last week, charging him with
receiving \$600 worth of diamonds under
false pretenses. The case was dismissed on
the ground that Sandberg & Co. had re-
course through a civil action only.

A. W. Levy, formerly with Byron L.
Strasburger & Co. and lately in the man-
ufacturing jewelry business, is again a resi-
dent of Chicago and will represent the
diamond house of Louis Strasburger's Son
& Co. on the road in western territory.

Harry Sachs has sold out his interest in
"Lorios," at 90 State St., and has leased

She just can't make her eyes behave. Our goods dazzle.

St. Louis, Mo.

he store at 94 State St., where he will open a jewelry store about Oct. 1 under the name of Sachs' Novelty Shop. Mr. Sachs has no connection with any jewelry store except his own.

Edward Bauman, of the Bauman Loan Co., died at his residence, 3558 Grand Boulevard, on Sept. 19, aged 62 years and eight months, and was buried on Sept. 21, interment being at Rosehill Cemetery. Deceased is survived by a widow, two daughters and four sons.

The Regnier & Shoup Crockery Co., St. Joseph, Mo., one of the largest crockery and silverware houses in the west, is adding a large jewelry department to the business. Charles A. Shoup, of the firm, was here, last week, looking over the lines of manufacturers' representatives.

"Joe" Mazer, McAlester, Okla., whom Mack Hurlbut christened "Joseph McAlester" was a visitor here, last week. Mr. Mazer left on Friday night to visit some relatives in Detroit. He is the president of the Oklahoma Retail Jewelers' Association and 1st vice-president of the A. N. R. J. A.

One evening, last week, while Simeon Francis McLaughlin was sailing down the Calumet River in his motor-boat *Spunk* he collided with a revenue cutter and was fined \$1.98 for having his port light in the dining room. International complications were at one time imminent, as S. Francis is a native of Dubuque, Ia.

Wholesale houses represented here, last week, were: Alex. M. Thanhauser, with Wolfsheim & Sachs, New York; G. P. Altenberg, president Icy Hot Bottle Co., Cincinnati, O.; Ed. Skinner, with Geiger & Bauer, New York; J. De Mariano, New York; "Si" Pickering, with H. Z. & H. Oppenheimer, New York; Mr. Thaler, of L. Fitzehe & Co., Newark, N. J.

Theo. Schisgall, the New York clock importer, was here, last week, and appointed Henry Paulson & Co. his selling agents for Chicago and middle western territory. Paulson & Co., in their show room on Wabash Ave., will carry a complete line of cuckoo, chime, alarm, 400-day, novelty and window-display clocks, with an American guarantee. Mr. Schisgall intends to visit Chicago frequently.

Last Spring, the R. Wallace & Sons Mfg. Co. received the order for the silverware, both flat ware and hollow ware, for the Hotel La Salle, of this city, which is said to be the largest fireproof hotel under one roof in the world. There are more than 20,000 pieces in the silverware equipment, and the job of filling the order on time was an enormous one. Every piece of hollow ware is mounted with the crest of the hotel, and the name Hotel La Salle appears on every piece of flat ware.

A man named Evans, alias "Ryan," alias "Larkin," who was arrested, 10 weeks ago, charged with stealing an \$85 diamond ring from Turner Bros., retail jewelers at 831 W. Madison St., was sentenced to Joliet penitentiary, last week, to serve an indeterminate sentence of from one to 10 years. This crook worked with two women confederates, who would enter a jewelry store with him and select a moderately priced ring, paying a \$1 deposit on it. While the salesman was writing the receipt Evans would "switch" a white stone for the best

ring he could lay his hands on. Turner Bros. recovered their property, as did Edward Alberti, retail jeweler at 900 Milwaukee Ave., who had the same trick played on him by the same trio. Alberti lost a diamond ring valued at \$100.

A meeting of the executive officers of the Illinois Retail Jewelers' Association was held here, last week. Those present were: President F. A. Marean, Secretary Geo. B. Elbe, Treasurer Paul Lackritz, Directors Tom Brown, Quincy; Frank Smith, Pontiac; Richard Wieting, Peoria. After routine business was effected the committee voted to hold the next annual convention at Springfield, May 16-17-18, provided that date did not interfere with other State convention dates. The matter is not final, however, and action was deferred until the next executive meeting, in February.

Among the out-of-town retail jewelers here, last week, were: C. H. Trask, Galesburg; Tom Brown, Quincy; Richard Wieting, Peoria; F. G. Marean, Belvidere; Frank Smith, Pontiac; Louis Ratzesberger, Milford; Mr. Barrett, Freeport; L. J. Keis, Quincy; A. Sturgell, Tuscola; E. Bengston, Freeport; A. E. Rush, Macomb; J. V. Knapp, Rushville; Lorenz Holland Cullom; Andrew Anderson, Rankin; R. E. Winter, Highwood; John G. Brehm, R. P. Kiep, Louis A. Libermann, Joliet; Geo. H. Chapman, Galesburg; R. E. Lincoln, Plano; Otto M. Scheidt, Lockport; F. E. Carlson, Kewanee, Ill.; Mr. Bransford, of Bransford & Andrews, Union City, Tenn.; C. B. Connoll, Waldo, Wis.; John H. Gorman, Medford, Wis.; John E. Campbell, Highmore, S. Dak.; Edward Fassnacht, Peru, Ind.; Walter Mellor, Michigan City, Ind.; Geo. A. Young, Moberly, Mo.; C. T. Howe, Louisville, Ky.; E. O. Collins, Franklin, Ind.; W. A. Scheddell, Crown Point, Ind.; S. C. Nofzinger, Swanton, O.; E. L. Fischer, Reeseville, Wis.; J. Raubert, Ligonier, Ind.; A. T. Scattergood, Sturgis, Mich.; Gustav Schleuder, Austin, Minn.; August Krautheim, Muskegon, Mich.; J. S. Coffman, with E. J. Hervey, Grand Rapids, Mich.

Toledo.

J. G. Boutelle, who for several years has conducted a souvenir post card and jewelry store at 111 Summit St., has moved to the Empire Arcade on St. Clair St., where he will devote almost his exclusive attention to the jewelry business.

William S. McCaw, who for the past year and a half has occupied space with the Merrill & Broer Co., has leased a commodious room at 317 Smith & Baker building, where he will continue his business as before, but on a larger scale. Mr. McCaw carries a full line of jewelers' tools and also does wholesale watch and jewelry repairing. For four years prior to starting in business for himself he was watchmaker for Louis Commlossy. His present removal is made necessary by reason of increasing business and also of a need of the room he occupied by the Merrill & Broer Co.

Lyn. Thomas, Wilmington, Del., has returned home from his annual purchasing trip to New York. He made the trip in his automobile, accompanied by his wife.

Indianapolis.

E. M. Craft has returned after a month's sojourn at Atlantic City.

Carl Walk, of Julius C. Walk & Son, is home from a buying trip to New York.

C. M. Collins, who has been in business in West Michigan St. for some time, has sold out to William Davis.

The Crescent team of the Indianapolis Bowling League has elected Horace Comstock vice-president for the coming season.

Leopold Markowitz, secretary of I. Grohs Jewelry Co., left, last week, for Texas on his annual six weeks' holiday trip. He will cover the southwestern territory during that time.

Among Indiana delegates to the national convention of the Loyal Order of Moose, held at St. Paul, Minn., last week, was I. Grohs, of I. Grohs Jewelry Co.

Charles Mayer, of Charles Mayer & Co., has been made chairman of a committee of local automobile owners that will give an amateur sociability automobile run, Oct. 2 and 3.

Frank H. Johnson, Oaktown, has just purchased a 22-grain pearl of fine luster, the purchase price being \$1,000. The pearl was found in the Wabash River, near Carlisle, by E. E. Brown, a pearl fisher.

Albert R. Gray, of Gray, Gribben & Gray, is showing several photographs of the fish he caught while at Long Lake, Mich., this month. The pictures will be placed on display in the store of Gray, Gribben & Gray.

Moe Amdur, of Amdur Bros., jewelers and pawnbrokers, was shot and seriously injured in his store, one day last week. He was inspecting a revolver which he had been assured was not loaded, when the weapon was suddenly discharged, the bullet entering his hand.

Out-of-town jewelers in this city, last week, included: J. A. Oswald, secretary of the Indiana Retail Jewelers' Association, Crawfordsville; G. W. Clemens, Greenwood; S. B. Merrick, Plainfield; August Anderson, North Salem; Aaron Pursel, Noblesville, and John W. Hudson, Fortville.

The store of Traugott Bros., 417-425 W. Washington St., was robbed of about \$300 worth of jewelry, last Wednesday night. Entrance was gained by burglars, who climbed on the roof and crawled through a skylight. Iron bars placed to guard the skylight were bent, and a rope was lowered to the floor. The burglars then left through a rear door after taking fobs, tie pins, cuff buttons, etc.

Suit has been filed in the Circuit Court by Mrs. Hilda Davey, of Richmond, to recover \$1,500 worth of jewelry from Emil Mantel, a local jeweler and pawnbroker. She states that she intrusted the jewelry to a man to be placed in an Indianapolis safety deposit vault. Later she found the jewelry had been pawned and was given the tickets, but when she attempted to redeem it, found the time had expired. The jewelry consists of four diamond rings, a diamond bracelet, an emerald pin and a ruby pin.

H. E. Vogler, junior member of the firm of W. T. Vogler & Son, Winston-Salem, N. C., was a recent purchaser in New York, where he went to select holiday stock.

1809—1909

100 Years—City of St. Louis

1844—1909

A cordial invitation is extended the Trade in general, to make our Offices their headquarters during Centennial Week.

L. Bauman Jewelry Company

ESTABLISHED 1844

CENTURY BUILDING

ST. LOUIS, MO.

St. Louis.

E. G. Tucker, Pender, Nebr., was here, last week, doing his Fall buying.

W. T. Hooper has moved his store from Craigwood, Ark., to Campbell, Mo.

John Douglas, a jeweler in Onawa, Ia., is in the city replenishing his Fall stock, last week.

Mr. and Mrs. Z. B. Robbins are back from a 10 days' trip to Chicago in their automobile.

The interior of the establishment of the Louis Clock & Silverware Co. is being decorated.

Otto Buder, S. Broadway, has brought his family back from their Summer home in Elsie, Ill.

J. M. Price, a watchmaker, formerly of Pueblo, Colo., has taken a position with W. Lindsay.

B. B. Combs, optician for T. L. Combs Co., has decided to take a short rest from his arduous duties.

Joseph J. Mazer, McAlester, Okla., spent part of last week here, and left Thursday night for New York.

C. M. Daniels, Roswell, N. Mex., was here during the week making purchases, accompanied by his wife.

W. Haberman, located in the Holland building, returned, Thursday, from a business trip out of the city.

Benjamin Rice, Tulsa, Okla., stopped here, Wednesday, on his way back home from a trip to New York.

C. L. Shook, of the Shook Mfg. Co., will start in a couple of days on his Fall trip throughout the northwest.

Samuel Hotchner, of A. Hotchner & Son, will take a trip through Illinois, and as far as Chicago, next week.

Fred Brodegaard & Co. have installed an optical department in their new store under the supervision of C. W. Nelson.

J. Hubel, a diamond setter, formerly of New York, has been added to the force of the Maritz-Kober Jewelry Mfg. Co.

H. W. Mark, of the St. Louis Clock & Silverware Co., has gone to housekeeping with his bride at 3122A Keokuk St.

Louis Dubuque, of the R. Loewenstein Jewelry Co., has returned from a week's sojourn in Chicago and Rockford, Ill.

J. Reed, manager of the Elliott Jewelry Co., returned, Saturday, from a 10 days' trip to Denver and Colorado Springs.

Herman Mauch furnished the prize cups that were awarded at the Kings Lake clay pigeon shoot, last Saturday and Sunday.

Omaha has, for a week past, been engaged in a street car strike. General business has been interrupted and much inconvenience caused.

J. A. Michelson, until recently of Grand Island, Nebr., has accepted a position with E. I. Jones, watchmaker for the trade, at 308 Brown block.

Jacob L. Jacobson, formerly located in the Arlington block, has recently moved his shop to the top floor of the Douglas block, 16th and Dodge St.

Vincent J. Gorly, of Grimm & Gorly, 1510 Cass Ave., returned on Thursday from Chicago, where he had been for four days, buying a Christmas line of goods.

J. H. Hasenritter, Herrmann, Mo., was in St. Louis, last week, visiting his wife,

who has been a patient at the Deaconess Hospital.

M. H. Cox, of the Hoyt Jewelry Co., is in from a three months' trip through Texas and New Mexico. He will stay in the city until Oct. 1.

Ralph Loewenstein, of the R. Loewenstein Jewelry Co., will leave, next week, on a business trip through Arkansas, Tennessee and Oklahoma.

J. J. Gaffner came to St. Louis from St. Jacobs, Ill., Wednesday, to meet his wife, who was returning home from a Summer sojourn at Ottumwa, Ia.

W. H. Replogle, jeweler in Shenandoah, Ia., was in Omaha, last week, visiting friends and at the same time looking over the stocks for Fall goods.

Joseph B. Moore, of the Elliott Jewelry Co., returned from a two months' business trip through Kansas and Colorado. He will stay in town for a while.

J. A. Johnson, Glenwood, Ia., was in the city early last week, ordering his Fall stock. Geo. Frater, Louisville, Nebr., was here yesterday on the same errand.

H. Eiesle, who is an assayer and who has for several years been located in the Arlington block, 1513 Dodge St., recently moved to room 303, Neville block.

A. W. Long, of Tower & Long, returned, last week, from a month's trip through Arkansas. W. E. Tower is now on a short trip through northern Missouri.

W. D. Strahl has sold his business at Judsonia, Ark., and has gone to the State of Washington. He will open a store there as soon as he is located.

Mr. and Mrs. M. L. Kile, Creighton, Nebr., were in the city, last week, on their way to Excelsior Springs, Mo., where Mr. Kile will spend some time resting.

M. F. Denman, Stuttgart, Ark., has written to the St. Louis Clock & Silverware Co. asking that hotel reservations be made for him for St. Louis Centennial week.

Frank Pfeiffer, J. F. Pfeiffer & Son, Parsons, Kans., who was in St. Louis, during the past week, making purchases, was accompanied on the trip to St. Louis by his wife.

S. E. Bamber, secretary of the Hess & Culbertson Jewelry Co., is in St. Joseph, Mo., attending a meeting of the Grand Masonic Lodge. He will return to St. Louis Oct. 1.

A. J. Dahlin, watchmaker for Gustafson & Hendrickson, has gone to Denver and Colorado Springs on a pleasure trip. Mr. Dahlin will probably be away from the city about 10 days.

Fred Brodegaard & Co. have announced that they have discontinued their store at 109 N. 16th St., and that in the future their entire stock will be shown at the new store, 115 S. 16th St.

Joseph M. Ebeling, the new president of the Retail Jewelers' Association of St. Louis, expects to call a meeting of the association early in October after the Centennial celebration.

Julius Newman and W. F. Wilmes, of the Aller-Wilmes-Newman Jewelry Co., came in and spent Sunday at home, but returned Monday to Missouri and Kansas territory, respectively.

F. W. Hoyt, president of the Hoyt Jewelry Co., returned from a trip through west-

ern Missouri and Kansas, and left, Sunday, for New York, where he expected to spend a week making purchases.

The Barnes-Smith Mercantile Co. has removed from the Equitable building to the Wright building, at 8th and Pine Sts. Removal was necessitated by the approaching demolition of the Equitable building.

John Albright was in the city during the past week, returning from a European trip to his home in David City, Nebr. Mr. Albright was accompanied by his daughter, who has been a nurse at the M. E. Hospital in Omaha.

J. H. Booth, Alton, Ill., whose store was recently burned, now occupies temporary quarters until his new store building is ready for occupancy. He was in St. Louis during the week ordering fixtures for the new store.

S. R. Curtis, heretofore in business at Newbern, Tenn., has opened a store at Wynne, Ark. He will continue his Newbern store, which will be in charge of an assistant. For the present, at least, Mr. Curtis will give his personal attention to the new store.

Charles Westermeyer, of the Maritz-Kober Jewelry Co., has the sympathy of his many friends, owing to the death of his wife, who died, Sunday, from complications following the birth of a child. She was only 19 years old. The child, a boy, is doing well.

In the bankruptcy proceeding against Edward A. Gotsch, formerly in business on West Olive St., pending before Referee in Bankruptcy Coles, the appraisers have filed their report, and the trustee has filed his report of exempt property and his inventory. The assets are few.

The new North St. Louis Bank & Trust Co., in which Joseph and Louis Ebeling are interested, will occupy temporary quarters in a building owned by Joseph M. Ebeling, at Grand Ave. and Hebert St., until a building can be put up for the permanent occupancy of the company.

Extensive alterations of the interior of the store of the F. W. Drost Jewelry Co., 7th and Locust Sts., are being made. When they are completed the cut glass, clocks and plated ware will have more room and will be exhibited to better advantage, and there will be a larger and more convenient entrance on the 7th St. side of the store.

Henry Estinghausen, president of the Attleboro Jewelry Co., has returned from a business and pleasure trip to Alaska. He visited all the important places in Alaska. He had a good trip, but says Alaska is not a promising field for fine jewelry. The taste there runs more to nugget jewelry. He will stay in St. Louis a month and will leave for Florida and Cuba, where he will spend the Winter.

The fire which destroyed the store of G. W. Cameron, Popular Bluff, Mo., was the indirect means of giving that town another jewelry store. Mr. Cameron bought out the store and stock of J. H. Perkins, and now L. A. Tromby, who was employed in the Perkins store, and Mr. Clark, who was employed in the Cameron store, are going to start a store of their own under the name of Tromby & Clark. Mr. Perkins was in St. Louis during the week.

J. Bolland, president of the Juo. Bolland

Fox Manufacturing Co.

176 Madison Street, = = CHICAGO

ry Co., has returned from New York Atlantic City. At New York he made extensive purchases. At Atlantic City he spent a few days with his wife and daughter and son. The son, John Bolland, Jr., accompanied him back to St. Louis, and having completed his course at Culver College last term, he has started in at the University of Missouri. Mrs. Bolland and Miss Bolland will not be in St. Louis for a while longer.

Even massive solid silver cups to be used as prizes in the invitation golf tournament to take place during Centennial week have been manufactured by the Meyer-Richards Silver Co., and are being engraved. Each of the St. Louis golf clubs contributed one of the cups. The firm has also made four large solid silver cups to be awarded in the boat race, which is to be one of the other features of Centennial week. The handsome prizes were obtained by D. P. Richards.

Corporation papers have been granted to the newly organized Gutfreund-Kemper Jewelry Co. The certificate filed in the office of the St. Louis Recorder of Deeds shows that Joseph I. Gutfreund holds 100 shares, Clara F. Kemper 95 shares and Millie Gutfreund five shares. The company is to deal in jewelry and opticians' supplies. The total stock, fully paid, is \$20,000. Robert Reeves, with whom Mr. Kemper was associated in the Reeves-Kemper Co., will not be in St. Louis for a while before deciding on his future business course.

The announcement that Grimm & Gorly, jewelers and florists, 1510 Cass Ave., have leased the building at 702 Washington Ave. for three years has led to the supposition that the jewelry store would be moved to a new location. Vincent J. Gorly, manager of the jewelry branch of the business, has announced to-day that the business on Cass Ave. will be continued as it is, and that the downtown building will be used only as a branch flower store. The Washington Ave. building will be remodeled and will be occupied early in October.

R. O. Bolt, manager of the Mermod, Jaccard & King Jewelry Co., will have the center of the stage at the opening of the Centennial celebration, next Sunday afternoon. The first event of the week is to be a religious demonstration at the Coliseum, at which a chorus of 10,000 Sunday-school children will sing. Mr. Bolt will lead the chorus, which will be the largest ever conducted by any man in the west, if not in the entire country. Mr. Bolt is now actively directing the rehearsals. He has had large experience in the direction of large choruses.

Claud Wheeler, Columbia, Mo., president of the Missouri Association of Retail Jewelers and secretary of the National Association, was in St. Louis, Thursday, making extensive purchases of optical supplies to stock an enlarged optical department at his store, which is to be in charge of Herman Kilberger, formerly with an eastern house. Mr. Wheeler has had a balcony constructed in his store, and the optical department will be on it. Heretofore he has carried only a small line of optical goods. Hereafter his line will be as complete as can be found in any store.

Goodman King, president of the Mermod, Jaccard & King Jewelry Co., just back from

his annual trip to Europe, is enthusiastic over the business outlook and convinced that there is soon to be a return to as great prosperity as the country has ever known. "The imports this year will undoubtedly exceed all former years," said he. "This, with the fact that stocks and bonds are now commanding the highest of prices, indicates that prosperity has already returned." Mr. King visited Amsterdam, Paris, London, Berlin, Dresden, Florence, Carlsbad and all the marts and made heavy purchases of gems and jewelry and art goods. He hurried his return somewhat in order to be here for the centennial celebration.

The following out of town jewelers were in this city during the past week: S. O. Harwell, Litchfield, Ill.; Joseph J. Mazer, McAlester, Okla.; C. S. Scanlin, Indianapolis, Ind.; C. W. Evans, San Antonio, Tex.; Jacob Easton, Antlers, Okla.; C. M. Daniels, Roswell, N. Mex.; J. J. Gaffner, St. Jacobs, Ill.; S. Francis Duenweg, Mo.; Enno Dick, New Baden, Ill.; W. R. Sheldrup, Pierce City, Mo.; J. R. Booth, Alton, Ill.; W. Westphal, St. Charles, Mo.; Mr. Hiegelman and Mr. Nussbaum, composing the firm of Hiegelman & Nussbaum, Hugo, Okla.; John Clark, of the Kruger Jewelry Co., Paris, Tex.; George A. Young, Moberly, Mo.; Frank Pfeiffer, J. F. Pfeiffer & Son, Parsons, Kans.; C. F. Gardner, Sorento, Ill.

Joseph M. Ebeling and Edward C. Zerweck, president and secretary of the Retail Jewelers' Association, attended a meeting at the Mercantile Club, at which the arrangements were completed for the "Get-Together" business men's banquet that is to be given Saturday, Oct. 9, at the close of Centennial week. The object of the banquet is to bring all the different civic and business organizations together and engender a spirit which will make for the more rapid progress of the city. It will be given in the arena of the Coliseum. A number of prominent jewelers will attend. Invitations have been sent to 10,000 persons. Mr. Ebeling, who has engaged a box for the evening is on the committee of the North St. Louis Business Men's Association, which is making arrangements for the participation of the association in the Civic League celebration, to be held at Fair Ground in connection with the Centennial celebration.

The Alvin Realty Co., composed of members of the L. Bauman Jewelry Co., will erect a six-story building, to occupy a half block and bounded by Morgan, High and Linden Sts., with a frontage of 140 feet on High St. and 80 feet on Linden St. and Moran St., at a cost of \$150,000. Plans are being prepared and work will begin early next year. It is to be either of slow combustion or steel construction. There will be six stores on the first floor, and the upper floors will be fitted up as lofts for wholesale or light manufacturing purposes. Leases have been closed for a good part of the space. There will be handsome exterior in brick and terra cotta, with ornamental cornice work. The site has been bought by piecemeal by the Baumans, whose confidence in the locality, from an investment point of view, has been confirmed by the selection of the neighborhood by the Illinois Traction system for a terminus.

Meyer Bauman is president of the company, and Alvin Bauman, treasurer. It is not the intention of the L. Bauman Jewelry Co. to remove from the present location in the Century building at 9th and Olive Sts.

Kansas City.

H. H. Kelly, Erie, Kans., has sold out his business to E. C. Six.

A. C. Hahn, 408 E. 12th St., is entertaining a brother from Ottawa, Kans.

The Greene Jewelry Co. has added Julius Gordon, jeweler, to its working force.

The Franklin Jewelry Co. is now installed in its up-to-date quarters at 17 W. 9th St.

The Harris-Goar Mfg. Co. has leased the entire third floor of the Boley building, 12th and Walnut Sts.

W. J. Holt, Stillwater, Okla., was in this city last week, having brought his mother's body here for burial in Kansas City, Kans.

E. O. Sill, recently a student at the Kansas City Polytechnic Institute, has accepted a position as watchmaker with Cohn Bros., Eufaula, Okla.

The Hassig Jewelry Co. has recently received an order for four high-priest Masonic jewels. This company has been working nights to get out its orders.

The following jewelers were in town, last week: V. W. Kirman, Edgerton, Kans.; W. C. Spear, Mt. Vernon, Mo.; H. O. Harrison and wife, Wichita, Kans.; W. E. Lacey, Moran, Kans.; S. A. Douglas, Stillwater, Okla.; J. O. Van Voorhies, Osawatimie, Kans.; Walter Sperling, Seneca, Kans.; A. W. Holmes, Bonner Springs, Kans.; A. Manifold, Beloit, Kans.; H. E. Turek, Ellinwood, Kans.; Mr. Harris, Noesho, Mo.; A. Rosenfield, Leavenworth, Kans.; W. A. Harrison, Clifton, Ariz.; C. A. Wolf, Topeka, Kans.

Minneapolis and St. Paul.

Mr. Wilkinson, formerly watchmaker for the R. G. Winter Jewelry Co., Minneapolis, has taken a position with Kirchner & Renich.

Among the out-of-town jewelers in Minneapolis and St. Paul, during the past week, were: L. J. Hunter, Tracy, Minn.; Peter Gaalas, Stillwater, Minn.; B. K. Maxfield, Northville, S. Dak., and J. P. Madsen, Luck, Wis.

Aaron Johnson, of the Aaron Johnson Jewelry Mfg. Co., Minneapolis, has been named trustee for the bankrupt stock of Mrs. Edna M. Schulz, of the same place. A sale was made of the stock to the Osakis Drug Co., of Osakis, Minn., for \$100, that being the best bid. The assets are so small that the payments to creditors will be nominal, if there is anything left after the bankruptcy expenses are defrayed.

The death of John A. Johnson, Governor of Minnesota, which occurred Sept. 21, resulted in a general observation of the funeral services Sept. 23. Some stores suspended business for an hour, between 2 and 3 p. m., and the railroads and street car systems stopped all cars for five minutes, beginning at 3 o'clock. The funeral cortege started from St. Paul for his former home at St. Peter, Minn., at 10.30 a. m., and a number of retail stores in different lines in St. Paul, including jewelers, remained closed until 10 a. m.

Los Angeles.

H. M. Stevens, with H. F. Wallace, is now enjoying a short vacation.

E. E. Fite, formerly with F. E. Lenhart, Pomona, has started in business for himself in that city.

G. B. Crisp, of the material department of the E. W. Reynolds Co., is taking a week's vacation.

Mr. and Mrs. R. Van Buren, Ontario, were in this city a few days ago buying goods for the coming holiday trade.

Louis Berger, for many years manager of the T. B. Clark jewelry store in this city, has been in San Francisco for several weeks past.

R. H. Gilmore, of Gilmore & Lee, recently returned from a trip to neighboring towns and soon started out again to make a tour of southern California.

Dr. George A. Collins, Samuel Friedman, Robert Mitchell and Ed Sandstrom, with J. Wiesenberger, have just returned from a yachting trip to Catalina Island.

Mr. and Mrs. S. M. Pawder, Denver, Col., are visiting at the home of M. Hammerslaek, of J. Wiesenberger's sales force. Mrs. Pawder and Mrs. Hammerslaek are sisters.

W. A. Wheeler, chief salesman in the office of H. F. Wallace, has returned from a two weeks' outing with his wife at Camp Baldy, a mountain resort about 50 miles from this city.

Out-of-town jewelers who visited Los Angeles recently include: A. R. Moon, Escondido; O. D. Collins, Needles; E. A. Wynn, Azusa; T. M. Gillenwaters, Azusa, and J. L. White, Barstow.

E. W. Reynolds, of the E. W. Reynolds Co., has found it necessary on account of the growth of business in the company's clock department to remodel that department and to install new wall cases, etc.

George G. Koeberle, head watchmaker for Donovan & Seamans Co., has been taking a week's vacation, spending most of his time taking automobile trips through the surrounding country. H. C. Lybye is taking Mr. Koeberle's place during his absence.

A. Fink & Co. are executing an order for a \$1,500 bracelet of handsome design. It will contain a three-carat perfect Wesselton crystal, with 22 smaller diamonds, all set in platinum. The design, which was made by the company, is an especially attractive one.

Frank J. Ernst was convicted in the United States Court here of counterfeiting \$5 gold pieces. Arthur Care, head of the material department of the E. W. Reynolds Co., who sold him a melting outfit, was one of the witnesses for the prosecution.

F. M. Barr, accused of having passed a number of fictitious checks in this city, was arrested in Ashland, Ore., and brought back to this city a few days ago. J. Wiesenberger, jeweler at 453 S. Broadway, was one of Barr's victims, having accepted a check for \$500.

G. L. Penniman, manufacturers' agent, with offices at 342 S. Broadway, has returned from a three months' business trip covering the entire Pacific Coast. He went as far east as Denver and Texas. He reports business conditions generally very encouraging. The farmers in nearly all sec-

tions have had good crops and their prosperity has stimulated that of others. Everybody is confident of continued improvement.

R. H. Schwarzkopf, who returned recently from an extended trip over the coast, has opened a new office for himself and his associate, H. A. Curry, adjoining the room heretofore occupied by Messrs. Schwarzkopf and Penniman, at 342 S. Broadway. Mr. Curry, who returned with Mr. Schwarzkopf, is also at home at present.

A local paper says: "John L. Whitney has received from a prospector named Youmans in Death Valley surface outcroppings of what are asserted to be genuine fire opal, and an attempt will be made to locate the ledge. The find was made in a lime formation, in which particles closely resembling the Hungarian or Austrian opals were imbedded. There was no sign of any ledge, but the small globular pieces polish like the opal."

Milwaukee.

E. H. Warnke & Co. have increased their working force.

Perry L. Hatch, connected with the Lockhart jewelry store at Kenosha, Wis., was married recently to Miss Blanche Shaver, Oconomowoc, Wis.

Among the out-of-town jewelers in Milwaukee last week were: E. L. Fischer, Reeseville; John Braun, Two Rivers; F. H. Coburn, East Troy; W. T. Stetson, Lake Mills, and William F. Notbohm, Oconomowoc.

Jewelers at Menasha, Wis., are interested in the movement under way there for the purchase of a city clock to be placed in the tower of St. Mary's Church. The sum of \$200 has already been subscribed for the purpose and it is expected that merchants and public-spirited citizens will subscribe the additional \$400 required.

Because he was selling clocks at New London, Wis., without a license, A. G. Gorch was arrested and is in the county jail until his case comes up for trial. Jewelers did not approve of Gorch's methods of peddling timepieces about the city and the authorities looked the matter up and found that he was without the necessary license.

It has developed that Allen Beaumont, a boy burglar recently arrested at Madison, Wis., on the charge of looting several residences in that city, has been burglarizing jewelry establishments about the State. A few days after Beaumont's arrest, H. Toms, a well known jeweler at Richland Center, Wis., arrived in the city and identified about \$70 worth of jewelry found upon Beaumont as having been taken from his store.

The new Jewelers' Mutual Fire Insurance Co. of Wisconsin lacks only \$300,000 of reaching the record attained the first year by the Wisconsin Hardware Dealers' Insurance Co., a figure which has been surpassed by but few mutual companies in the first year of their existence. Secretary Franklin Thomson has formed the "Boosters' Club," which is being made up of those jewelers who are taking out policies with the new company and pushing its interests, and indications are that the idea will result in even more rapid advances being made by the company.

San Francisco.

J. Donally, with Sproehle & Co., was a recent visitor here.

Chas. L. Staib, a diamond setter, has located at 133 Geary St.

R. Bernhardt, with Brown & Miller, back from a northern trip.

Ferd. Heiduska has taken quarters in the Whitney building, at 133 Geary St.

George Lewis, secretary of Shreve & Co. is back from a trip to New York.

Julius Young recently returned from trip through the San Joaquin Valley.

W. A. Brown, of Carter, Howe & Co. was here, last week, visiting the trade.

Mr. Spaulding, with the lines of Alls-Bros., called on the local trade, recently.

On Sept. 15, J. B. Whitney celebrated his 66th birthday, which was the occasion of many felicitations.

J. Monaseh, known to the trade as expert diamond appraiser, has accepted position with J. B. Cohn & Co., now new quarters at 14 Eddy St.

On Sept. 24 bids were opened for the furnishing of electric programme clocks in the 14 new city schools that will soon be ready for occupancy. The contract is expected to amount to about \$5,000.

The announcement is made that Arthur Elston, who has been with Mayer & Weisenhenk, of late, has decided to begin business for himself. Mr. Elston was formerly with Rothschild & Hadenfeldt for a long time.

The new store of Radke & Co. is not entirely completed as yet, but workmen will be finished this week. The store is a large one and is far ahead of any that has been occupied by this firm in the past. The arrangement is the same as has always been the Radke rule, large wall cases around the walls for silverware and cut glass, with large hollow display case in the center for the smaller articles. There is considerable building in the immediate vicinity that will probably interfere slightly with business for some time, but the neighboring structure will be completed and occupied before the holiday season sets in earnest.

Practically all wholesale firms have located in permanent downtown quarters, almost all are in buildings far superior to the ones destroyed by the great fire. The removal of Radke & Co. from the Van Ness Ave. district during the present week at the opening of their new store at 219-2 Post St. leaves but one firm of any size on Van Ness Ave., i. e., the Baldwin Jewel Co., which is making every effort to have building on Kearny St. finished at earliest possible moment. When the great business firms commenced to locate on Van Ness Ave. about three years ago very few imagined that in three years' time business would be back downtown again, a fact from five to 10 years was the time named for the restoration of the downtown district to a shape where retail business could be carried on again. One or two jewelry firms erected large buildings, and through rental space have realized quite handsome returns on their investment. Van Ness Ave., however, as a retail district is now practically a thing of the past, and while a few shops may be located there to secure the neighborhood trade, it is claimed that its usefulness as a shopping district has passed.

This machine has all the good points of the ordinary double end buffing lathe without any of the well known faults. It is very compact in design, simple and strong. It is

"The Lathe You Will Eventually Use"

Either end can be instantly started or stopped independent of the other. No waiting by one operator while the other is changing his polishing wheel. Can you imagine what a time saver a device like this would be to you? The bearings and all work-

ing parts are protected by dust-proof casings. Ends of spindles are detachable and can be furnished in any length or form, making it possible to use the same machine for all classes of work. Just to show you how invaluable this machine is, we want you to have it on

ement geared to and operable by said spring, means for locking the power spring to hold the same inert, a trip wheel geared to and driven by an element of the clock mechanism, an adjustable presser bar movable around the arbor of the trip wheel and adapted to be set at various positions to act on said wheel, a knob on the trip wheel which co-operates with said presser bar acting to lift said wheel in the direction of length of its arbor, and means actuated by the shifting of the trip wheel acting to unlock the power spring and permit the latter to move the switch element.

DESIGNS.

90,257. HANDLE FOR SPOONS, FORKS AND SIMILAR ARTICLES. GEORGE P. ITTIG, Bridgeport, Conn., assignor to the E. H. H.

Smith Silver Co., Bridgeport, Conn. Filed June 29, 1909. Serial No. 505,089. Term of patent 14 years.

90,258. PLAQUE. JAMES FREDERICK THOMAS, Philadelphia, Pa., assignor to J. E. Caldwell & Co., Philadelphia, Pa. Filed July 16,

1909. Serial No. 508,069. Term of patent 3 1/2 years.

PATENTS PUBLISHED SEPT. 29, 1909.

934,429. BALANCE-STAFF-PIVOT-TRUING DEVICE. DENNIS L. DAVIES, Nelson, Nbr. Filed July 1, 1907. Serial No. 381,789.

A truing device having a cut away top portion to form a resting place for the flat end of a steel taper and a projecting front having a conical

opening therein adapted to receive the bent pivot of a balance staff for truing the same.

934,692. MICROMETER-GAGE. HENRY S. PLANT, Boston, Mass. Filed May 27, 1908. Serial No. 435,234.

A micrometer gage comprising a member having a pin receiving socket or recess therein, a distance pin mounted in said socket or recess for longitudinal movement therein, said member and pin being adapted to contact with portions whose dis-

tance apart is to be measured, means to move said pin longitudinally and a gage manipulating handle having a length exceeding that of said member and independent of said pin moving means and having means to limit the movement of said pin.

934,730. MICROMETER-GAGE. FERNANDO O.

JAQUES, Cranston, R. I., assignor to the Central Tool Co. Filed May 19, 1908. Serial No. 433,656

In a micrometer gage, the combination with the barrel and the measuring sleeve, of a reading

device is axially mounted upon the barrel within the measuring sleeve.

934,952. METHOD OF MAKING LINK FABRIC. FELIX VIANO, Lexington, Mass., assignor to the Columbia Jewelry Co., North Cambridge, Mas. Filed Oct. 31, 1908. Serial No. 460,445.

The method of making flexible link fabric which consists in positioning in parallelism a plurality of rows of overlapping closed links; rotatively

threading the coils of a spiral into the links of two adjacent rows, to connect the same, and forming the coils of the connecting spiral into separate, closed links.

934,913. CLOCK. EDWARD F. HERSCHDE, Cincinnati, O. Filed Oct. 26, 1907. Serial No. 399,264.

In a clock the combination of a minute shaft for the minute hand, a minute gear rigidly mounted on said shaft, an hour shaft for the hour hand, an hour gear rigidly mounted thereon and a stroke controlling mechanism mounted on said hour shaft, an auxiliary shaft, a pinion rigidly

mounted thereon and meshing with said minute gear, a second pinion meshing with said hour gear and mounted friction tight on said auxiliary shaft so that the minute shaft will transmit rotation to the hour shaft but the hour shaft will not transmit rotation to the minute shaft.

(ABRIDGMENTS OF SPECIFICATIONS, 1908, FROM THE Illustrated Official Journal.)

ISSUE OF SEPT. 8 1909

10,409. CHAINS. W. ORTLIEB, Stuttgart, Germany. May 13.

Chains mainly for ornamental use are made by cutting slices *b* from a tube *a* of any section to form the links, and joining these together by

ring, loops or chain links *d* formed by the same method as the links *b* and split as shown in Fig. 4.

10,626. CLOCKS. A. ANDERS, Charlottenburg, Germany, May 15. (Date applied for under Section 91 of Patents, etc., Act, 1907, Sept. 11, 1907.)

Electric Clocks; Striking Mechanism.—The invention consists chiefly in providing mechanism for the going and striking trains of ordinary clocks. The going and striking trains A, B are driven by pawls 12, 13, on arms 9, 10, which are connected by links 7, 8, to weighted driving-levers 3, 4, pivoted at *p*, these levers being raised into the operative position by a weighted arm 22 on the armature 2 of an electromagnet 1. The

circuit of the electromagnet is closed as follows: The levers as they descend rotate the armature by bearing on a roller on the weighted arm 22, a concentric loose disk 14, Fig. 4, rotating with the armature when an arm 16 on the armature engages a pin 33 on the disk. The rotation of the disk and armature continues until the bent end of a lever 15 escapes behind a projection 21 on the disk when the disk is thrown forwards by the action of a spring 15a, forcing a contact-pin 20 between contact-springs 18, 19, Fig. 5, and closing the circuit of the electromagnet. The armature is now rotated, thereby throwing up the weighted driving-levers and returning the disk 14 by the engagement of the arm 16 with the projection 21, and withdrawing the pin 20 and breaking the circuit of the electromagnet, the lever 15 again resting on the projection 21. The striking-mechanism may be adapted to strike one or several blows for each raising of the driving-lever 4. To prevent the circuit of the electromagnet from being closed by the jerking of the lever 4 as each blow is struck, this lever is arranged to work over a brake spring 36, Fig. 3, covered with canvas, etc. The formation of permanent poles is prevented by a commutator ar-

ment which reverses the direction of the current through the electromagnet. An insulated disk 25, Fig. 6, carries two contact-pieces forming contact rings 26, 27 on one side and segments 28, 29 on the other, these contacts being rotated by the engagement of a pawl on the armature with a contact 32 on the disk, and being constantly in contact with pairs of fixed contacts 30, 31. The driving-shocks, etc., the driving-levers 3, 4 are connected with a stretched cord, the tension of which may be adjusted.

127. CLOCKS. A. ANDERS, Charlottenburg, Germany May 15. (Date applied for under Section 91, of Patents etc., Act, 1907, March 28.) (Patent of addition to No. 10,626, A.D. 1908.)
Electric Clocks; Striking Mechanism.—In the driving-mechanism for going and striking

as described in Specification No. 10,626, 1908, the arm 20 is arranged to carry an insulating-piece *i*, which is normally held between contacts 18, 19, and is withdrawn to permit closure of the circuit of the electromagnet when a wedge piece *k* on the arm 20 enters a notch 21 in the disk 14 under the action of a spring *f*. The disk 14 is rotated by the engagement of the driver 16 with pins 17, 35, the driver being controlled by the weighted driving-levers as described in the above-mentioned specification.

645. NEEDLE, CIGARETTE AND LIKE CASES. E. JOHNSON, Glasgow. May 16.
Case for needles, visiting-cards, cigarettes, etc., is provided with a pivoted cover B of translucent or other material. In the form shown in Fig. 1, which is intended for needles, the case A metal may be of skeleton form and may contain a paper sheath *a*¹, Fig. 4. This sheath may be padded to receive the needles and may slide in position along grooves formed in the sides of the metal frame. The cover B, which is se-

closed pivotally at *b* by eyeletting, etc., is of U-shaped section, as shown, and may be turned to the right or left to expose the contents. In a cigarette case, Fig. 6, a false bottom C of curved section is provided, and helps to prevent the crushing of the case when clinching the eyelets, etc. In a card case, Fig. 5, may have a skeleton metal frame A with U-shaped sides and bottom.

Applications filed Aug. 23 to 28.

Special Morgan Cup Presented by C. C. Stillman.

THE sterling silver prize illustrated herewith is the Special Morgan Cup presented by C. C. Stillman for the brood mare with foal conforming most truly to the ancient Morgan type exhibited at the Vermont State Fair during the years 1909, 1910 and 1911.

The trophy is gold lined and weighs 66 ounces. It has a height of 11¼ inches. The base is round and somewhat coneshaped. On this base appears the inscription, "Special Morgan Cup presented C. C. Stillman for the brood mare with foal conforming most truly to the ancient Morgan type." The handles of the cup are double curved, and at the top is leafwork in raised effect from which spring two horses' heads modeled in noble style.

On the face of the cup is a place to engrave the winner of each year's contest. The cup, which is a unique piece of the silversmith's art, was supplied by the Metcalf Co., 2 W. 39th St., New York.

An unsuccessful attempt was made to break into the retail jewelry establishment of Theodore M. Fisher, Auburn, N. Y., a short time ago. The burglar was frightened away before completing his plans and nothing was taken.

“Have
You
 the
 Elgin
 with
 the
 49
 Dial?”

“H AVE you the Elgin with the 49 Dial?”
 Such a question will soon mean money to you, because it’s one that’s going to be asked everywhere and often.

Back of it is the demand that is being created for the new Railroad Elgin through the medium of advertising in Railroad magazines telling of this innovation among watches.

This watch is making a strong appeal to railroad men and others because of its readable dial. The hands are large, the figures big and plain, the dial either of white enamel or silver finished metal. This latter is the *only* metal dial with hard *inlaid enamel figures*. It catches the faintest glimmer and is easily legible in dim light, besides being proof against the chemical action of cleaning fluids.

This new Railroad Elgin is the thinnest and most compact 18 size movement made, and is cased at the factory.

Don’t wait until you see two or three prospective customers go elsewhere before you lay in a stock, but write now, RIGHT NOW, for prices and terms. Your jobber can give you full particulars. Or write direct to the Company.

Be ready when the demand is made for the Railroad Elgin with the “49 silver” or “49 enamel” dial.

These are the four grades and established retail prices as advertised :

THE HOROLOGICAL REVIEW

The Adjustment of Watches.

Written expressly for The Jewelers' Circular-Weekly by H. Reinecke.

(Continued from issue of Sept. 15.)

The adjustment of watches to isochronism we have first to do with the simulating hairspring. The outer end of such a spring is pinned into a fixed stud and the other end into the collet. To get sufficient freedom of the spring around the stud we should make the latter as small as possible for a substantial attachment of the inner coil of the balance spring by means of a pin, at the same time giving sufficient room for the freedom of a theoretical curve by breaking out sufficient coils of the spring, without reducing the necessary number of coils of the entire spring. A collet in most watches is a small circle turned to fit the balance staff very tight, and to split it in order to give a certain amount of spring.

Another form of collet, used in some foreign watches, is a circle of steel, hardened and tempered, made to accurately fit the staff, which has two flat sides filed upon it, making it oblong. Such a collet goes on more tight and is not liable to become damaged. It also allows the balance spring to be centered more easily. The flat balance springs are coiled in small copper barrels, in which they are hardened and tempered. The closeness of the coils depends upon how many are coiled up together. Thus, if the springs are coiled up and hardened together, such springs are generally close enough for flat or Breguet springs.

Hairsprings for factory use are all made in this country and cannot be excelled by foreign articles. For repairing and adjusting foreign watches, large assortments of springs are imported and have to be kept on hand by the watch repairer and adjuster. Hairsprings which have not been hardened and tempered are not much used at present, except they are non-magnetic springs.

To select a new hairspring by the repairer a number of beats of a watch in an hour must first be known. Most watches have an 18,000 train—that is, they make that number of beats in one hour. It will be noted that in all trains at the present time the fourth wheel makes one revolution per minute, and when the fourth wheel has 10 teeth as many teeth as the escape pinion leaves, the train is an 18,000 one; when the fourth wheel has 12 teeth, the train is a 16,200 one; when

the fourth wheel has 14 teeth, the train has 14,400 beats per hour.

In counting vibrations, when fitting hairsprings, double vibrations only are counted. Thus, each time that the balance comes to one side it counts for one. In this way an 18,000 train counts 75 in half a minute, a 16,000 train counts 67 and a 14,400 train counts 60.

Then pick out a spring that is a little too large in diameter to lie in the regulator pins of the index. Lay the spring on the balance and press the collet down on a little beeswax to temporarily hold it in place. Hold the outer end of the balance spring when so fastened in the tweezers, and let the balance hang down with the tower pivot of the staff on a watch glass. With a turn of the tweezers and the thumb of the hand set the balance vibrating about half a turn each way. Then hold it steady and it will vibrate more or less for a minute. The vibration may be counted for about 30 seconds. The vibrations can be counted to see if it is anywhere near what is wanted.

If the balance moves too slowly, select a stronger spring; if too fast, a weaker one, and try again. The spring should be held in the tweezers until the exact point is reached, at which it will have to be pinned in the stud. Thus, if the spring is two coils too large to go into the regulator pins it must be counted while held two coils from the end.

Finally, select one which counts one double beat slow in half a minute. Lay this spring on a convex watch glass on white paper and, with the open eye of a sewing needle, as stated by me in a former article, break out from the eye of the inner coil of the spring sufficient until ample room has been made for the collet, that the spring should be free from it, when it has been pinned to by an end of an elbow formed of a part of the inner coil. But this elbow must be bent with a pegwood in a rounding and graceful angle. From this elbow the curve should be bent in such manner that it will meet the regular spiral form about one-eighth of a coil from the elbow.

If the spring diverges too boldly from the collet its action will not be good. To pin the spring in its collet, put the collet on a

broach and insert the end of the spring with the tweezers. File a fine brass pin and file a flat side upon it, making it D shaped. Insert a small piece of the spring into the hole to fit the pin, cut it off, leaving a small projection to it and pin the elbow into the hole. Before proceeding in this manner, the hole in the collet should be opened so as to form a right angle with central hole of the collet.

Another way of proceeding to pin the spring to the collet is to get a small plate of brass, tap a hole in its center and fasten the collet by a screw. The advantage of this plan is that the surface of the plate serves to show at once if the spring lies in the proper plane.

The collet may now be put on an arbor and the arbor rotated in the turns to ascertain if the spring is true. In setting the spring, it must only be touched close to the eye. When this is right and the spring is true both ways, the spring may then be pinned to the stud. This should not be done till the stud has been broached in the proper direction.

The pinning in the stud should, however, be only done temporarily and the spring should not be broken off too short, as the lengthening of the spring may become necessary, partly for trueing and partly for the adjustment with the collet attachment and other adjustments in regard to the position of the index, etc.

The regulator or curb pins should be made of brass, never of steel, and put far enough apart to admit the spring without binding. They should be brightly polished, and no longer than necessary. After the watch has been brought to time, by changing the weight of the balance, if necessary, the watch should be tried, lying flat and hanging for 24 hours in each position. If it loses in the long vibrations, the spring should be shortened; if it loses in the short vibrations, the spring should be let out a little, changing again the weight of the balance to accommodate the position of the index.

In making adjustment on the balance spring for position adjustments the pin fastening the spring to the stud should be permanently pushed in, leaving a good projection for withdrawing it again when such becomes absolutely necessary.

(To be continued.)

Herbert Herrick, of the Sancton Herrick Co., Oldtown, Me., has resumed his business duties after a brief sojourn in New Hampshire and the western part of Massachusetts.

Waltham Watches

The history of the WALTHAM WATCH COMPANY is the history of watch manufacturing in America. More than half a century ago this Company introduced a new principle in the construction of watch movements, and has ever since applied the most advanced methods, producing always the best watches in the world. THE WALTHAM WATCH COMPANY has built within its own walls the marvelous machinery employed in making the 16,000,000 WALTHAM watch movements now in use.

Waltham Watch Company

Waltham, Massachusetts

Pendulum with Electric Impulse and Minute Contact.

A GERMAN inventor, for purposes of research, has occupied himself with a clock having an electrical impulse and minute contact, more fully described herein, with the idea of employing it for the operation of secondary clocks, his chief object being to produce something that had previously existed. The first illustration shows the entire pendulum clockwork, mounted according to plan, as with the pendulum at rest.

At the upper end of the pendulum rod the

FIG. 1.

minute contact contrivance, according to the *Leipziger Uhrmacher Zeitung*, is arranged as follows: The verge wheel S, with 45 ratchet teeth, is disposed between two flat rods, the pendulum being calculated for three-fourths of a second oscillation. The lever A that engages the teeth of the verge wheel pushes it one tooth ahead at each swing of the pendulum to the right. The catch D, attached to the pendulum rod, prevents any backward motion of the verge wheel. When the wheel moves forward the pin F, at each minute interval, comes in contact with the knee-piece H' of the lever H, pivoted at G, and during a left swing of the pendulum pushes the contact spring, located on the lever, from the insulated piece P to the contact surface K, thereby closing the circuit. On the return swing of

the pendulum the spring slips back to P and the current is again interrupted. Owing to the intense friction during the contact, the latter is very certain and effective; while it exists the current passes from the battery B, by way of Z, G, H, K and K', to the secondary clock N, and thence returns by way of L to B.

For the operation of the pendulum the Hipp system is employed. The tongue W is affixed in an easily movable manner to the contact spring M, standing vertical before the pendulum and attached at T. During the oscillations of the pendulum it slips over the piece U attached to the pendulum rod, and which is provided with notches. If the oscillations of the pendulum are shortened until there is danger that the lever A mentioned previously will not pro-

FIG. 2.

pel the verge wheel any further, then, after accurate adjustment of the tongue W, it will remain after the pendulum has swung to the left, at rest on the piece W, drops, on the return swing of the pendulum, into one of the notches, and thereby lifts up the spring M, which presses against the contact piece, thereby closing the circuit. During the further swing of the pendulum to the central position the tongue W is again set free, and the contact spring, when the current has again been interrupted, drops again onto the screw O.

While the circuit is interrupted the armature C, located at the bottom of the pendulum rod, is attracted by the pair of magnets and thereby receives a fresh impulse. The current in the meantime passes from B, by way of Z, T, M and R, to the electro magnet E, and thence returns, by way of L' and L, to B.

With the co-operation of the lower electrical operation a failure of the upper contact arrangement is impossible.

Postscript of the Constructors.—I desire to allay in advance any doubts that may arise on the part of horologists, and would state that in the production of this clockwork I was not aiming at the production of a masterpiece, but to produce an exhibition piece. This purpose it fulfills in the most complete manner, to which also the circumstance contributes that the contact processes can be very readily observed and

the choice of a three-fourths seconds pendulum was so far favorable in that it oscillates more actively than a seconds pendulum.

For the general public electric apparatus of this character is more interesting than is usually believed. In order to render the operation of the secondary clock as readily visible as possible, I have located the skeleton-like works behind a glass plate that serves as a dial, which affords a full view of the works. (See Fig. 2.)

To prevent, where stronger currents are employed, the occurrence of injurious sparks, the pendulum rod can be separated below the verge wheel by means of an insulating piece, and between the pendulum suspension and L a conducting connection with a suitable resistance could be placed. Then during the meeting (before and also after the contact) of the pin F with H' the extra current would pass from B, by way of Z, G, H, H', F, verge wheel, pendulum rod and pendulum spring, and thence by way of the interposed resistance back by way of L to B.

The magnetic power required to operate the pendulum, which need only be small, may, in the case of more powerful currents, be weakened and at the same time regulated by interposing in front of the electromagnet E, in the conductor, a suitable resistance.

Moreover, the above-described minute-contact arrangement may also be employed for the operation of alternating current clocks if a suitable device is placed behind the verge wheel, and the latter, where a seconds pendulum is used, is equipped with 60 teeth. Then the wheel must carry two oppositely placed pins, one on each side. By this means, after each minute, the closing of the circuit occurs alternately—now in front of and then behind the wheel. Of course, in the case of the alternating current the proper means of switching must be provided.

Over 100 Years Old and Still Ticking.

WITH the name of its maker, dead these hundred years, written in his own hand across its face, a tall old corner clock stands in the library of the home of George B. Yandes, 122 E. Michigan St., Indianapolis, Ind., ticking away the time as it did in the days before Indiana was a State, and while Indianapolis was yet a little frontier settlement of a few log cabins. The clock, which has been in the family of Mr. Yandes for 85 years, and which was hammered and carved out by the hand of August Hoft, a clockmaker of Lancaster, Pa., perhaps a quarter of a century before, is well preserved; and, although none of the wheels or other pieces of mechanism have ever been replaced, it keeps time almost as accurately as it did when Andrew Jackson was President of the United States.

The works of the clock were brought west over the mountains and a cabinet of cherry was made for them by Caleb Scudder, the first cabinet maker to settle in Indianapolis. The signature of Hoft is legible, and seems to be indelible by time.

The business of the late S. M. Baker, Roann, Ind., has been closed.

A New Eight-Day Watch.

A PROMINENT manufacturer of watches at La-Chaux-de-Fonds has recently patented an eight-day watch which has been patented in many countries and presents several features of particular interest.

In order to clearly explain the special arrangements of this piece, we have reproduced the drawings of the patent, as shown in Figs. 1 and 2, from *Revue Internationale d'Horlogerie*. The original plan of the

FIG. 1.

has been altered so as to make the watch more attractive. The watch is made in different sizes.

The illustration shows that the *grande moyenne*, or great wheel, is not used as a power wheel, as in ordinary watches, but is essentially employed as a change wheel. For this purpose it is freely disposed on the arbor of the motion work, and its diameter is unusually large.

The *grande moyenne*, or great wheel, meshes by means of an appropriate heel with the third wheel, while on the arbor of the latter, extended to the back of the

FIG. 2.

mechanism, there is a special wheel meshing with the center wheel.

The center wheel is also arranged at the back of the mechanism on a tube applied to the extended arbor of the motion work, through which it is connected by friction by means of a plate spring, so as to prevent any play between the teeth of the wheels and insure an exact hand setting.

In the example given the transmission proportions are laid down in such a manner, and the watch is so regulated, that the barrel performs one revolution every 48 hours, while the *grande moyenne*, or great wheel, turns once every four hours, the center wheel every hour, the third wheel every five minutes, and the seconds wheel every minute.

The spring must, of course, be set accordingly, but this arrangement permits

the construction of an eight-day watch without increasing the usual dimensions of the works.

It may be remarked that in consequence the train of the watch does not carry any supplementary wheels, called *roues huitaines*, as found in all eight-day watches, and that the barrel, being of normal size, does not extend beyond the center of the works. Therefore, there is no disproportion in the functions of the train, and these elements essentially contribute to the good regulating results obtained from the first to the last day of going.

It may be even said that these arrangements of the train, combined with a highly finished lever escapement, are capable of attaining a regulation with rate certificate, and this is a feature which the manufacturer intends soon to work out. (Fig. 1.)

Lastly, says the above-named contemporary, the eight-day watch of this make has the conspicuous advantage of being more attractive and elegant in appearance, without taking into account that the examination of the movement is also much more interesting than that of watches with large

FIG. 3.

FIG. 4.

FIG. 5.

barrels, whose massive appearance is far from pleasing to the eye. (Fig. 2.)

Figs. 4 and 5 show a watch of 19 lignes and the same in a standing case. The watch has several other applications of a similar nature, and the movements are also made to fit American cases.

No Clocks to Disturb the Prayerful.

HEREAFTER no clock will be allowed in the Methodist churches of Ohio, according to a dispatch to the *New York Sun*. This was one of the weighty matters decided to-day by the Conference at Jackson, O. It was adopted upon the recommendations of Bishop Thomas B. Neely, who said that he found clocks an attraction which continuously disturbed his congregations and himself. "You will never know what 'quiet blessedness' is until you get rid of them," said the Bishop. "People continually turn around to see what time it is, and you, as ministers, naturally follow their gaze and cut short your sermons." Then the resolution was read and adopted.

S. I. Eichelbarger, formerly of Marietta, O., where he was employed by L. L. Peddinghaus, moved recently to Union City, Ind., to engage in business on his own account.

The Marine Clocks of France.

THE term "marine clock" was first adopted in France for the use of the navy, and these timepieces were so denominated with the exception of a period about 1775, when, being of reduced size, they were designated "longitude clocks," or "marine watches," until about 1815, when the term "chronometer" was definitely adopted.

At the outset Ferdinand Berthoud was appointed the official horologist, and was charged both with the construction and the repair of the instruments, as well as the housing and protection of those not in use. His compensation was fixed at 3,000 livres, which was independent of the allowance of 3,000 livres accorded by the king. He also received an additional sum for the care of the instruments until 1783, when they were deposited in the gallery of the Louvre.

In 1784 Pierre Louis Berthoud, his son, became an official assistant, with an allowance of 1,000 livres. The official title afterwards passed to this son. After the death of the latter it was continued in the family

until the appointment of Louis Antoine Breguet in 1816.

In 1832 the arrangements were changed, and the furnishing of chronometers was opened to public competition. The need, however, of an experienced official horologist for full supervision was felt, and in 1873 legal provision was made for this purpose and has been continued.

H. F. Hinson has been found guilty on the charge of stealing a diamond-set bracelet, which was shipped by Alfred H. Smith & Co. to the Greenleaf & Crosby Co.'s branch store at Miami, Fla. He was an express messenger at the time the bracelet was lost, Jan. 26 last, while in transit. Detectives arrested Hinson on March 19 as the guilty party, and he was held for trial. The bracelet was traced from New York to the Union Station in Jacksonville, Fla., where Hinson checked out the freight. The bracelet was found at the house of Hinson, and three of the removed diamonds from the bracelet were found in his possession. They had been set in finger rings, and his wife gave another diamond-set ring to the detectives when the house was searched. Hinson said he found the diamonds in Savannah a year previous, and also that he found them on the street near the Union Depot.

RING OUT THE OLD—RING IN THE NEW

Why travel in the same old rut the balance of your natural life, and buy the same antiquated styles of Nickel Alarm Clocks your grandfather used to buy, just because some manufacturers have not thought it necessary to produce new designs in Nickel Alarms, as they do in other clocks?

We have some new ones, superior to anything heretofore made, and to introduce them and put a set into the hands of every jeweler, we will, on receipt of \$6.00, deliver east of the Rocky Mountains, express prepaid, one sample of each, consisting of eight clocks as described.

Don't fail to avail yourself of this opportunity to see a complete line of up-to-date alarm clocks

See coupon at bottom of page.

"Standard," "The Rattler," "Long Alarm," "Alternator," "Di-Alternator," "Siren," "Vibrator" and "Rotator." Yours truly,

Name..... Address.....

The "Monastery"

We constructed the "Monastery" works with a view of competing with a weight movement against inferior spring works. Our success has been great. The weight "Monastery" construction, chain wind, is of such excellent quality in every respect and offered at such a reasonable figure that it is out of question to-day to offer any hall clock above \$50.00, with long pendulum spring works.

A genuine Grandfather clock has always a weight movement. And we will state that any chiming Hall clock made up with a cheap spring movement can never be satisfactory. The bummer blow is too weak to get the tone out of good bells; only thin, light bells can be used with the little blow of the hammer; every day the spring gets weaker and the chiming slower; it even ceases after 5 or 6 days. Besides, in such cheap affairs the dial works are not suitable for quarter chiming. The combination makes a very poor clock. Not so with the "MONASTERY," which are heavy, powerful brass works, with solid steel pinions and built as a good weight chiming movement should be constructed.

The illustrated model is a fine piece of furniture, fit for any residence, and can be obtained with three combinations of striking:

1. With five 1 1/4" tubular bells, made and tuned by Mr. R. H. Mayland (Westminster chimes); list.....\$180.00
2. With five rodgongs, also Westminster chimes; a feature in this combination is that the hour is struck on 4 gongs which, being tuned in a chord, produce a sound which is the nearest imitation of the distant resonance of a big tower bell; list... 151.00
3. Hour and half strike on 4 rodgongs, tuned in a chord; list..... 104.00

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

North Pole Jewelry Now in Order.

Odd Concepts Suggested by the Recently Reported Discovery.

SO-CALLED North Pole jewelry, jewelry of the northern lights, and iceberg trinkets are in demand, and no doubt will be in demand for some time yet. The North Pole jewelry is not the only article of commerce that has been called for by the fad-loving public. It became the fashion

South Pole jewelry fad or the flying-machine ornamentation, just as there are certain jewels appropriate for the automobile races and the tennis grounds. The jeweler keeps up with the times. Of course, he has to manufacture and put on the market what is desired. If the people got a coal craze jewelry would be made from bits of the black diamond taken from the coal mines, same as the run the Japanese had some years ago on finger, head, foot and nose devices, in which highly polished, selected gems of common coal were set.

The North Pole jewelry has to be appropriately adorned with poles, icebergs, polar bears, seal effects, musk oxen figures, etc. The ornamentation as well as the base work is commonly of white material. A white metal, representing the white ice, snow or grizzly bear fur, is required. When there are imitations of the colored northern lights applied, then hues of different character are obtained with colored glass. All the tints of the rainbow may be worked into some of the elaborate designs of this order. The bulk of the work involves the use of the pole on some portion of the ornament.

The North Pole jewelry, without the pole, would hardly prove a seller. Hence, in the illustrations are exhibited a few models on which imitations of the pole are given according to the ideas of the designers or the wishes of the buyers. Fig. 1 is a ring, to which is adjusted the representation of the pole as shown. A charm is shown in Fig. 2, on which the lettering designates the pole. Then, again, some of the ornaments are made to supply the requirements of the many newly organized Peary and Cook clubs.

These organizations are in process of forming in every city and town, and the interest promises to last. The president of the newly formed club almost immediately decides upon placing an order for the proper pattern of pin, charm, badge or plate for the members. Ladies' clubs have been formed with the same object in view, and hat pin or other pin of frozen north jeweled badges are ordered. Therefore, some of the ice-character designs are like the one in Fig. 3, bearing the words, "North Pole Club."

to have show window decorations containing exhibits of north poles and home decorations in the den and hall of the same order as soon as the discovery of the pole was announced to the world. North Pole garments, North Pole shoes, North Pole plays, North Pole stories and North Pole soda and confectionery are noticed on every hand.

The North Pole fashion will, of course, die out in time, and then it may be the

of wooden framework covered with white cloth projects up as the North Pole party. Then the wooden frame of the ar is decorated with the North Pole jewelry. North Pole ornaments of all kinds are distributed about. The scene will be quite like if some imitation snow and ice introduced.

For the Man With the Grouch.

By PAUL J. BARRET, in *Sheldon's Business Philosopher.*)

VERY frequently the man who sells things—the man who works for somebody else—is bound to bump into slights, gentlemanly treatment on the part of possible customers, or to suffer because of the slights or errors of the company he is working for.

In the work of every man there are days when everything goes wrong; when customers seem to be more than ordinarily gruff and indifferent; commission checks erroneously made out and not up to expectations; and, in addition, a letter from a home office department employe who wasn't feeling so right himself.

Now, what should we really do on such occasions? Should we scowl, fight back and seek to get revenge?

In the first place, the largest share of the world's good things come to the man who holds himself in perfect poise within. Don't think about your "bad treatment." The more you think about it the more you will get stirred up. Your thoughts will act like so many excited bees. Make up your mind that your main purpose is to win success, no matter what your "line" may be. Consider the gruff actions of those with whom you come in contact too insignificant to destroy your mental equilibrium. Remember that the only way to break down a sneer is with a smile and with patient argument. When you start out in the morning with bright sunshiny thoughts, you are sure to come back a conqueror at night. If a man wounds your pride don't go "down and out." Forget it! You are building manhood in doing so.

It is not my intention to offer excuses for the clerk who makes errors in figuring commission checks, nor to apologize for the fellow who writes a letter that makes you mad all over. But I dare say that in any reputable concern there has never been a just claim on the part of one of its salesman that has not been adjusted.

As for the man who writes the untactful letter, I can only add he probably started the day with his mind filled with clouds rather than sunshine. To fight back is only to lower our average. To override our prejudices is to be real men who are sure to win out, no matter what our chosen fields may be.

The retail jewelry establishment of George Hudson, Winfield, Kans., was the scene of a burglary, one night recently, when burglars made off with \$200 worth of miscellaneous jewelry and silverware, and afterwards stole a horse and buggy in which to make good their escape.

A Thriving Establishment of Findlay, O.

THE retail store of O. B. Marvin & Co., Findlay, O., is illustrated this week. The establishment is located in the center of the city, directly opposite the County Building, and in the leading hotel building of Findlay. The business was started in the Fall of 1891, when the concern occupied only 20 feet of floor space in the quarters of a drug store. Enterprise, hard work and vigorous advertising, however, caused the business to grow rapidly, with the result that the drug store disappeared and the

Good Advantage Taken of the Vogue of a Popular Song.

EDWARD R. ROEHM, 16 John R. St., Detroit, Mich., has taken advantage of the vogue of a popular song by issuing a number of small blotters bearing on one side a cartoon of a college lad holding in his left hand a large scroll containing this inscription:

"To the tune of 'I WISH I HAD A GIRL.'
 "Gee, I wish that I had a badge
 Like Edward R. Roehm's are,
 SEG DAB MHEOR REKAM he is,
 And in Detroit, 16 John R.,

INTERIOR VIEW OF THE STORE OF O. B. MARVIN & CO., FINDLAY, O.

jewelry store enlarged, so that the concern now has a store 60 feet deep and 20 feet wide. There is a work room in each window in front of the store.

The fixtures and furnishings are of modern design. There are three large wall cases on each side of the store, each being equipped with plate glass mirrors and shelves on nickel adjusted brackets. The show cases in the center are trimmed with mahogany, and are mostly glass, no woodwork at all being used around the top.

In the rear is a storeroom and part of the store, 14 by 14 feet. The rear partition, also of mahogany, has four large mirrors, two on each side of the safe, which is four feet wide and six feet high. The optical department is six by 14 feet. The ceiling is of steel, painted pure white. The walls are covered with burlap and are frescoed in a light pea-green color, their attractiveness being enhanced by well-arranged panels.

The show windows are three feet deep, six feet wide in front and eight feet wide on the inside. Each window contains a white enameled panel with a mirror measuring three by three feet, at the bottom. In the window there is a false ceiling with two strong Tungsten lamps. Twenty Tungsten lamps are used on the ceiling and on the walls in the store proper. The floor is covered with linoleum. Everything is exceptionally well systematized, and the whole establishment bespeaks industry and good business management.

Then how classy I would be,
 When all must have the best you see
 I guess I'll have to get one—
 Gee! I wish I had a badge."

Although the writers of the song may not agree with him in regard to the rhythm or meter, the idea is a good one, and will undoubtedly attract attention. What is ostensibly the name of a Greek fraternity or three Greek words is really "Maker Roehm badges," spelled backwards. The advertiser believes that human curiosity will be sufficiently aroused to endeavor to determine the meaning of these seemingly mysterious words. On the right of the scroll is a skull adorned with a college cap and embellished by a smaller scroll bearing these same words. Mr. Roehm's little scheme has in it that element of human interest which is particularly well adapted to the class of persons which he proposes to reach.

Always the greatest and holiest among us will be our servants—those who do their stunt efficiently.

Don't damn the fellow who hands you a lemon. You really do not have to take it, you know.

The world is a mighty small thing, it is true, but it is big enough to give many Big Things space enough in which to move about and get lost.

It is cheaper and more effective to build a fence around a muck-hole than to hire men with lanterns to pull out those blind folks who fall in—*Business Philosopher.*

The Futility from a Business Standpoint of "Envelope Stuffing"

By E. L. WILLIS, in *Trade Journal Advertiser*.

THE fondness that idle people or those leading uneventful lives have for the mail carrier's visits was well noted years ago in those advertisements which read something like this, "Do you want to get lots of mail? Send us your name and that of a friend and we will see that you get plenty of interesting letters from all parts of the country. No CHARGE." The answers to these ads were probably innumerable. For to those who have but rare visits from the representatives of the postal department there is a wondrous charm in receiving mail.

Perhaps it is partially due to this tendency in human nature that there has grown up a practice that is almost a vice—envelope stuffing. The word "stuffing" is used advisedly and shows in what contempt this practice is held. A man is said to stuff himself with food when he gorges indiscriminately, without taste, and without any heed to his needs or capacity.

Just so envelopes are being stuffed with extraneous matter and frequently without any heed to the capacity of the recipient to assimilate what is sent him, without any eye to the probability of his paying any attention to the printed matter.

Concerns that are addicted to envelope stuffing, stuff everything, whereas usually firms that do not stuff everything, stuff nothing.

Something might be said for the practice of sending out printed matter in the same envelope with invoices, statements, etc. There is something impersonal about these documents. They are an extract from the books and do not partake very strongly of the nature of the direct message.

Letters, on the other hand, are to all intents and purposes the personal talk of the man who writes them to the man who receives them. That this personal talk should be encumbered and confused by the injection of little or much impertinent matter smacks strongly of bad breeding.

Let it be clearly understood, of course, that an envelope stuffer is necessarily something that has nothing to do with the subject matter of the letter itself. If you are writing a man about your machine and send him a leaflet showing cuts of that machine, the leaflet is really a part of the letter and cannot be regarded as an envelope stuffer. If you are writing the dealer about your line of men's clothing and enclose him a style sheet, here again the printed matter is pertinent to the written.

A defense can easily be made of the practice of sending out a single small piece of printed matter with all letters. The main basis for the defense would be on the ground of utility, in that there is some chance of the single piece of printed matter being read. When this small item has to do with some special offer its utility is even more manifest.

But there is a sore temptation to make the two-cent stamp perform all the work that the government will permit. It is curious to note how a firm when once it is inoculated with the virus of envelope stuffing will become more and more subject to the ravages of that fell disease. A man who has kept his correspondence free from the intrusive stuffers will in a weak moment, actuated thereto by the practice of other people, introduce a single unobnoxious leaflet.

He finds that no violent protest comes to him from his customers or prospects, and he is tempted to add another little something. And so he goes on, deeper and deeper, until he is so deep in the practice that he may even go the length of paying extra postage in order to have his letters obscured and lowered in tone through being accompanied by a varied assortment of printed matter of all shapes, qualities and tenors.

Now, it might be well to think of the fate that printed matter of this sort usually meets. It is not uncommon for envelopes to be sent out that contain in addition to the letter itself five different pieces of printed matter. These are nearly always folded in such a way that when the addressee opens the envelope, six objects meet his view. He wants the letter and so he goes through the whole mass with growing impatience until he gets what he seeks. There are no statistics on the subject, but it is probably a safe estimate to say that 999 men out of every 1,000 throw the whole mass of printed matter into the wastepaper basket.

What effect has the receipt of this stuff upon the customer or prospect? If it be a customer, his thought is probably that the man who wrote the letter is taking a mean opportunity to do his advertising by "dodgers." They are little more than dodgers—the sort of thing used by "Cheap Johns" in small towns.

A customer has the feeling usually that he is entitled to personal treatment from the concern to which he gives his orders. He feels that he has passed the stage where the impersonal address con-

tained in printed leaflets should be made him. In this day of close competition the least little detail of business operation may sway a customer from one house to another. Goods are much the same, price considered, and it is, therefore, the firm with the nicest, most carefully devised method of operation that is the most successful.

The envelope stuffer that is pretty or cute is useful to the addressee is its own defense, only it probably would have more effect if it were not sent out together with a letter on a routine business topic. A good thing should go by itself so that its attention may be riveted upon it.

One of the troubles with this class of advertising is its sameness. Compare all the stuffers you get in the course of a week and you will probably find they are all drearily alike. I must pause here to say there is no difference between circulars and what are called "envelope stuffers" or "fillers." A circular does not pretend to be anything else. It usually goes out under a one-cent stamp; it does not expect to do much good and its fate is not a matter of much consequence.

The stuffer always accompanies a letter and that is what makes it so pernicious. It is an effort to slip under the guard a man puts up against circulars; it comes under a two-cent stamp and to get at the letter the man is frequently compelled at least to look at the accompanying printed matter.

It is a form of advertising that is more honored in the breach than in the observance, and, as has already been intimated, whatever little effect these fillers might have, they lose by being to a large extent the same as all other fillers.

You will find a yellow leaflet, three or two, a printed postal card, a dodger bad printed on poor stock, a little booklet containing testimonials, and probably, as a gift, a blotter calendar for the month before last and, of course, there is the letter too.

It has frequently occurred to the writer that an envelope stuffer to be anything but a waste of money and more likely to annoy the recipient than do the sender any good must be novel or beautiful. There are many things that can be used in this way that will answer either of these requirements, and it is just as well, for it is an irritating practice at the best and should be left for the fly-by-night mail-order house that appeal to a class of people who will devour all the printed matter that is addressed to them.

The envelope stuffer that contains the note of personal courtesy has its good place as strengthening the tie between the manufacturer or wholesaler and his patron. For instance, the sending of a seasonable greeting about Christmas time frequently leaves a very good taste all around. Other seasons of the year, such as Easter and Thanksgiving, can easily be signalized in this way. Of course, here the whole effect will be destroyed if in addition to the business letter and the card or other token of greeting, additional printed matter is put into the envelope. The letter and the card are all that the envelope should be called upon to carry.

An ingenious acquaintance of mine, I

printing machinery business, for a time as an envelope stuffer a half-tone portrait of himself. I have never heard of one else adopting this apparently vain form of publicity, but it has some points I recommend it that other forms of stuffs certainly do not possess.

In the first place, any portrait, even that of a total stranger, has a certain human interest. The old-time family album was unmitigated bore largely because there was so much of it, and when you were called upon to admire a family group consisting of your best girl's Montana uncle, and cousins, who were altogether unknown to you, you wished that Duleinea's parents had been brotherless and sisterless.

But a single photograph brought to your notice in a place where you are not bothered with other photographs, has a significance alike from its novelty and human touch. This interest is undeniably heightened when the counterfeit presentment is of a man with whom you have had business dealings. It might easily be held that such a picture gives a personal aspect to the impersonal business relations.

The retailer sees in the flesh only the wedding representative. He has an inevitable curiosity as to the personality and physical appearance of the owner or head of the concern. This curiosity is to some extent gratified by seeing a picture of "the an highest up."

It is also extremely likely that a picture will not, at least, not immediately, be worn away. Most of us recoil a little from destroying the picture of a human being. To do so seems somehow to offer an indignity to the whole human family. This may seem delving a little into psychology and to be a far cry from envelope stuffing. Nevertheless, what they call psychology lies at the root of men's relations to one another and some of the best minds of the civilized world are now striving to get at the psychological rules, which, when discovered, will make of advertising the exact science which it now is not.

My friend's experience, so far as he could gather data, was that his photograph had a good advertising effect. His salesmen were sold by quite a number of people, jocularly, that they had had a visit from the "boss," from which he drew the fair conclusion that they had remembered the photograph.

He discontinued the sending out of this photograph because his list was exhausted. One rather amusing complication of this scheme of his was that before he could stop him, the mailing clerk, with the stupidity characteristic of his ilk, had sent out in a number of instances several photographs to the same person.

On the whole, the truth probably is that little good is to be gained from the use of envelope stuffers. The sanest and most successful concerns are the most chary in their employment of this method of advertising. A letter is a personal, direct communication and should not be asked to support a lot of impersonal, extraneous printed matter. Printed matter has its well established place in the realm of publicity, but it should have a sufficiently clear message to be worth sending out to stand or fall by its own merits.

res Tea Set Presented to the Metropolitan Museum of Art, New York.

CLUDED in the list of recent accessions at the Metropolitan Museum of New York, is a Sèvres porcelain tea set, the gift of Mrs. George Clinton Genêt, in memory of Edward Charles Genêt, an illustration of which appears below.

In speaking about the gift the *Bulletin* of the Museum in a recent issue says:

"In ceramics, thanks to Mrs. George Clinton Genêt, the European section has been greatly enriched by the gift of a remarkable tea set of old Sèvres. The pieces, in number, are of the purest soft paste,

the service was sent to Citizen Genêt by Madame Campan."

Cut, Engraved and Decorated Glass Lines of the Present Season Show Many Novelties.

A VISIT to the New York glass district at this season of the year affords an excellent opportunity to the jeweler who carries cut and decorated glass ware as an adjunct to his lines to see some of the latest ideas in glass ware. New creations in cuttings and patterns and the revival of old styles in cutting with new adaptations are being shown by many houses that excel anything yet offered.

as "Kalana" ware, makes a most acceptable display. This glass is shown in stem ware, vases, fancy pieces such as almond dishes, sherbets, etc. The pattern is traced by hand, and after being treated to the acid bath the fine detail which makes the glass so attractive is added. The designs are floral, and include pansy, lily, poppy, geranium, etc., on which the stamens and leaves and other detail of the flowers are most lifelike. Some pieces, mostly large, are shown with a combination of cutting and etching, but this combination is not used extensively.

Rock crystal ware, which appeals to the most discriminating tastes, has steadily in-

SÈVRES TEA SET, 1776-1780. GIFT TO THE METROPOLITAN MUSEUM OF ART. IN MEMORY OF EDWARD CHARLES GENÊT.

and consist of a teapot, sugar bowl and cream pitcher, together with nine most representative cups and saucers. Decorated in the richest yet most tasteful manner at the hands of some of the most famous painters and gilders of the day, they range in date from the year 1776 to 1780, one of the best and most prolific periods of the factory.

"The porcelain is given by Mrs. Genêt as a memorial to Edmond Charles Genêt, known as 'Citizen Genêt,' the French diplomatist and brother to Madame Campan, first lady of the bedchamber to Marie Antoinette. Genêt was appointed minister to the United States in 1793, and after his official duties were ended settled in the State of New York.

"The tea set was purchased by Madame Campan and her two sisters, who presented it to their mother. After the mother's death

At the salesrooms of C. Dorflinger & Son, for instance, a new line of cut glass in miter and fine diamond cutting is now on display. The cutting is shown to good advantage on a salad bowl, where it runs in radiated lines from the bottom of the dish while about the top is a band of fine diamond work. Honeycomb cutting in new adaptations is shown in a line just received which is attracting considerable attention. This peculiarly attractive style of glass decoration appeals to many because of its distinctive character. One piece shown, a salad bowl, has a scalloped and notched edge from which the dainty honeycomb effect continues until at the base a pattern design surrounded by clear glass is used in contrast to the body cutting. Variations of the old strawberry cutting is shown in pleasing effect.

The new offering in etched glass, known

increased in popularity in the last 10 years until to-day it holds a place of its own with the trade and public. The patterns are not cut deep enough to show light refraction, but the beauty lies in the delicate and the intricate designs. The finest pieces are cut on a copper wheel and are of special beauty. While cut glass is always popular those who can afford it are turning more and more to the rock crystal ware, the more generally used cut glass.

Among the firms showing fine assortments of all kinds of cut crystal are C. Dorflinger & Son, 36 Murray St.; Pairpoint Corporation, 38 Murray St.; J. D. Bergen Co., 38 Murray St., and Bawo & Dotter, 26 Barclay St.

To beautify your store for the holiday season of 1909 and 1910. A new set of fixtures will bring that increased business. Our "Quarter of a Century" experience "is yours for the asking."

Write us to-day for copy of our new loose leaflet catalogue and let us quote you prices.

The Proof of the Pudding

The proof of ability in any line consists in doing the things that others have failed in doing.

This we have done repeatedly, and can furnish the proof.

We sold \$20,300 in one sale where another auctioneer had thrown up his hands after selling only \$3,000.

In another sale we sold three times as much as the combined sales of two other auctioneers, and realized much better prices.

We have repeatedly taken dead sales—the result of the work of incompetent auctioneers—put new life and vim into them, and closed out the stock at a profit.

However, it is not the large amount of goods sold that counts so much as the net results in the profit and loss account—the small amount of new goods used, compared to the percentage of your goods, and your dead stock in particular, that are disposed of, and that larger and more important question of the after effects of your auction sale upon your customers, and, consequently, upon your future trade.

We believe we have solved the problem of how to conduct an auction sale so it will be to your profit, in both dollars and cents, and in the building up and permanency of your regular business.

We will furnish you evidence that sales, at this time of the year, when regular business is dull, can be made as profitable as during the seasons when regular business is booming.

We would be pleased to talk with you about it.

MITCHELL & TILLOTSON

Jewelers' Auctioneers

35 Maiden Lane - - - - NEW YORK

Our Weakness and Our Strength.

J. S. CALLISON, Dexter, Ia., before the convention of the Iowa Retail Jewelers' Association.

NEED not tell you that I am proud to have the honor of being placed on the programme of the Iowa Retail Jewelers' Association, and, brother jewelers, I appeal to you to put your hearts and souls in the work more than you have ever done before, so as to strengthen the efforts of our splendid corps of officers to make the undertaking they have so bravely undertaken.

We of Iowa are fully 10 per cent. of the organized membership of jewelers, while the total number of the jewelers in the State is less than a 22d part of the number of jewelers in the United States. In other words, if all the jewelers affiliated organizations were to stand up in a row, every 10th man would be an Iowan. You see, gentlemen, we have comported with the scriptures in this respect; we have given one-tenth and more. In the number of years devoted to association work we will also compare favorably, having been organized in February of the same year in which our present national body was formed.

The Iowa idea has been "the greatest good to the greatest number," and our association is imbued with the spirit of equality and fair play. Since the day we were organized, we have not ceased to grow, and the men who were present on that stormy day in February are still loyal supporters of the cause and are prominently pushing the work along. Since our organization we have not had one little jar in our management. Everything has gone smoothly and harmony has reigned so supremely that there has not even been a surface ripple. I shall not attempt to say there have been no mistakes made, but if there have, they have been "passed up" as mistakes and no account taken of them.

While the course of the Iowa Association has not been that of ultra-conservatism, it has gone in for reforms with both eyes open. In all questions of burning interest, and I use the word "burning" advisedly, the Iowa boys have been found in the hottest of the battle, with never a fear as to the cost thereafter. Where others more timid hesitate to venture, the Iowa boys have forced their way into the thickest of the fray and carried to a most successful conclusion some of the fiercest engagements yet waged in association work.

There is a question now being agitated all over the country, and resolutions passed in its favor, upon which there will probably be a stand taken by the Iowa association, and I am particularly anxious that we follow this through to its logical sequence before taking any definite stand. I refer to the fixed price system—a scheme whereby every buttonhole will be cut the same size regardless of the size of the button. In other words, a committee will confer together and conclude that every man shall be so tall, and if he does not measure up to the required standard, the committee will shove a chip under his boot heels and raise him to the proper dimensions, and should he be too tall, his head will most likely be sandpapered down

until he meets the committee's approbation. Now, this may be all right, if you were dealing with fools or angels, but you will run against a different proposition when you attempt to corral the actions of men. But some one says, "we have the fixed price." Yes, that is true; we have the fixed price on certain lines, but suppose you apply it to every line, and (if it is to become the panacea that some would have us believe) it should be applied to every line. Then there would be a committee to set the price on every blooming thing on earth, and carrying this to its ultimate conclusion would make ninnyes of us all. However, there is another view of this matter that should receive our serious consideration.

How many of you started in business in a very humble way, with only a very small stock of the commoner staples? Suppose that you had been tied down to sell at a certain price? Why would a man patronize you when he was compelled to pay you just as much as the big corner store uptown, where there is an endless variety of styles and grades to pick from. If it once became known that the price was the same everywhere the consumer would naturally favor the store where the largest stock was shown. Another thing I have noticed about the fixed price scheme—it offers a nice little prize for dishonesty. The price would be fixed for the scrupulous and honest dealer, so that the unscrupulous man could steal his trade away from him.

Gentlemen, I prefer to have my customers understand that the prices I mark on my goods are the values that I place on them, and that if any man cuts my price I can go him one better and cut it again if I so choose. In other words, I would prefer that the people have confidence enough in my ability and sense of justice not to call in a tribunal to tell me what I am to get for a Kremetz collar button. I will tell you what kind of a fixed price system the champions of this commercial dream are really clamoring for. It is a fixed price on what they have to sell, and an unfixed price on what they have to buy—Well, I guess so—they want to buy as cheaply as possible. Now, I trust that you will pardon me for digressing from my subject, as this more nearly answers to "our weakness." We are always willing to have the other fellow fixed, so that he cannot get at us, but we want the road open so that we can take a stab at him whenever occasion arises.

I trust that this convention shall not go on record on this matter without the fullest and freest discussion, for it is only by open discussion of all these questions that we may be able to arrive at a proper conclusion. We should never be so narrow as to wish to place our business under more favorable conditions than we would have other lines adopt, for should our system prove beneficial, why would not others emulate our example by adopting the self-same system, which would in a great measure thwart our plans? A fixed price system generally adopted for all lines, could not help but act in restraint of trade, which is "un-American and unconstitutional," as it limits the right of the citizen.

When it comes to theories we are all strong, but when it comes to getting down

to actual conditions and meeting them and grappling with them we are all reminded of our weakness. However, there is one thing we are always safe in tying up with, and that is any system that makes it better and easier for us as dealers and yet works no real hardship on either the community in general or to our associates in business. The fact that we should demand of the jobber that he should not sell our customers, or the further fact that we refuse to sell the lines of goods sold to department stores and mail-order houses is nothing more than fair play and a square deal, and the American people as a whole will stand by this proposition. If we stick to this proposition we will find that we will gain in strength each succeeding year. But when you undertake to put a system in practice among a bunch of men where every mother's son of them thinks, and act as though it would be a good thing for the other fellow, and would like to see it put in practice for his special benefit to control and govern his actions, then you are up against a hard proposition. When our associations were first formed these doctrines or trade principles were looked upon as very radical in many places, but now you hear them being proclaimed by some of the most skeptical. There is a marked change of sentiment along this line.

Now, gentlemen, I am going to call your attention to one of our greatest weaknesses. You have no doubt wondered many a time, when you have received the secretary's notice of your delinquency, what on earth was the use of parting with your three big round dollars years after year when there was nothing being done. You have called to mind this trade evil and that trade evil which should have been remedied, and you claim conditions still remain very much as in former times before the days of associations. And you have said, "What is the use anyway; the whole scheme will fall of its own weight, and we will drop back into the old rut and not be able to tell in a few short years that there ever was such a thing as a State or national association of retail jewelers."

Well, now, what do you think of a man who is always preaching his own funeral? Don't you believe he deserves to die? You know something of the power of suggestion, don't you? Well, let me make a suggestion. If you would hold yourself out at arm's length and take a few swift kicks at yourself, it might arouse you sufficiently to see some of the reasons why you are complaining. When you received the programme this year I have no doubt that you made unfavorable comment on the growth of the Iowa association and the movement in general. You, no doubt, said to yourself, "Is this the size of it?" But you never stopped to think why the little book had shrunken in size. Well, I will tell you. This represents the value we, as members, have placed upon the work. It has been shorn of all commercial patronage. Its feathers have been taken off, and if it looks like a picked screech owl, you, and you, and you are at fault.

I want to relate to you a little incident. A short time ago I enrolled a national certificate in the presence of a member of the National Milliners' Association, and the

2 and 4 MAIDEN LANE, NEW YORK

701 Market Street San Francisco

at once, overawed by the flash of the seal and general appearance of extravagance, exclaimed that it must be quite expensive to belong to an association that issued such elaborate diplomas. Then I hurried to me that we not only issue one or two of these splendid articles, and I showed my chest out to its fullest extent and replied: "It would cost you \$3 to belong to our association, if you could buy it." Imagine, if you please, my chagrin and surprise when I learned that it would cost \$5 to belong to the National Milliners' Association, and it does not issue a certificate. "Well," I inquired, "what do you get for your money?" "Oh," she replied, "we have a splendid banquet and royal entertainment when we attend the meetings."

Now, gentlemen, I have no doubt but that some of you almost hesitated to attend a meeting because the programme was embellished sufficiently with features of entertainment, and I will venture that there are a lot of fellows that remained at home and are saving their money to attend a circus. But in the name of common sense how do you expect your committee to provide all those things when you have to pay for them? How do you expect they shall secure all the reforms you are clamoring for when they are compelled to wait until the postage stamps before they send out a circular letter asking you to pay for your last year's dues? You know that for every member of our association your secretary must pay over to the national treasury \$1 to keep in force your national certificate, and that of the \$3 paid in there only remains \$2 with which to carry on all the association's interests. Of this it takes quite a percentage for collecting dues, quite a percentage for renewal cards and postage. Then there is some expense for stenographer, carfare and other minor details.

Gentlemen, I sometimes think we are a bunch of "tightwads," if you will pardon the expression. But we are not nearly so economical as some other associations. A few of the affiliated associations collect only \$2 as annual dues. Now, what kind of "blowouts" do you think they can have on that basis? And over in New York, where a dollar lasts no longer than the proverbial snowball, they were organizing a great big State association last Winter, and they were placing their dues at \$1 per year. Can you imagine what they could do with the money? Yes, sir, they were organizing on the mammoth sum of \$1 per year, and had it not been for Mr. Archibald, our national president, pulling them up to \$2, that would have been the price of a membership in the New York association.

Now, gentlemen, since your earliest remembrances you have been reminded that it is "money that makes the mare go," and if you want bigger results in the line of reforms, if you want this thing done and that thing done, if you want to see the Iowa association "do things" as they never have done them, then vote to raise the annual dues to \$5 until all the reforms are accomplished. Then if the money cannot be profitably spent toward advancing your interests, reduce the assessment.

Your officers have needed funds since the beginning to carry on a campaign for membership. Do you know what a new mem-

ber costs on the average? Well, if you are a new one this year do not flatter yourself that the association is spending much of your first year's dues on entertainment, for it likely took the whole amount to cover the cost of inducing you to come in with us. Now, I want to tell you a secret: we have but one State association in which the dues are \$5 per year, and that is one of our youngest; but I want to tell you the members are proud of the distinction, and, if I do not miss my guess, that association will be one of the liveliest propositions with which we will have to reckon in the next few years. But, you say, if the dues are so high it will keep fellows all out. There is where you are mistaken. The higher price appeals to a man, and he thinks he is getting a better article. If you pay out a dollar you only expect a dollar's worth, and you know that the man who gets the least for his money is the man who is continually buying something cheap. Now, fellows, this is one of the weakest of our weak points, and I appeal to your better judgment if I am not correct.

Famous Gold and Silver Treasures of the Rheims Cathedral.

THE aerial tournament at Rheims has since more brought that historic old city to public notice. For many, many years the kings of France were crowned at Rheims, and it is therefore not surprising that the cathedral of Rheims contains a rich treasure of goldsmiths' work. The oldest piece, which dates from the 12th century, is the chalice of St. Remigius, which was carried to Paris in 1791, but afterwards restored to the treasure of the cathedral.

The most famous object, perhaps, is the reliquary of the vessel of holy oil, containing the supposedly inexhaustible holy oil, which, according to the legend, was brought from heaven by a dove, at the prayer of St. Remigius, for the baptism of Clovis. This oil was in use until the time of the Revolution. In 1793 reliquary and flask were destroyed with a hammer in the square in front of the cathedral, but some of the pieces were saved and put together again. Strangely enough, some of the oil was also saved, and is still preserved in a jeweled flask.

In this cathedral is also the ship, or nef, of St. Ursula, the hull of which is made of a single carnelian. In the ship are 11 virgins, five made of silver and six of enameled gold. The reliquaries of the Holy Thorn and of the Holy Grave, and a cross of mountain crystal, formerly belonged to the Cardinal of Lorraine.

Three Cubans were taken into custody in Tampa, Fla., about a week ago, accused of looting several retail jewelry stores. A visit to the house where the prisoners boarded revealed several articles of value, among them a lady's silver purse, a gold locket and a penknife in its original box and wrapper. Besides these, several articles of jewelry, varying in value, were found. The men had in their possession, when arrested, several other trinkets. Only one of the prisoners is able to speak English, all having recently come from Cuba.

SERVICE PLATES OF LIMOGES CHINA

INCLUDED in the exhibit of French china at the New York salesrooms of Wm. Guerin & Co., 33 Park Pl., is a carefully selected assortment of service plates in the latest designs. Among these are plates with deep blue borders overlaid with gold effect pattern designs. One plate has a heavy border within which is a band of gold enclosing a circlet of deep purple, on which is a pattern design in scattered leaf effect. Another plate shows a band of gold in scalloped design. At the shoulder is a heavy circlet of gold, while the center of the plate is free of decorative effect. Plates with circlets of acid gold in varying widths are also shown, together with a large collection of other patterns.

NEW SUBJECTS IN AMPHORA WARE

AMPHORA ware has won a place in many up-to-date jewelry establishments, and because of the artistic value of the various objects has met with much approval. This pottery is reminiscent of the days of glory in old Greece and Rome. The amphora ware on exhibition at the salesrooms of Geo. Borgfeldt & Co., 48 W. 4th St., New York, who are the sole agents in the United States and Canada, contains many modern counterparts of the amphoræ of the ancients, dating back to 2000 B. C. The modern amphora ware is made in Austria, and the display includes designs in bas-relief, reproducing Millet's famous masterpieces typifying French peasants at labor in the fields. A variety of vases are also shown embellished with fruit and flowers. Aside from the vase forms, the line includes reproductions from life, showing children in frolic, women with baskets and bundles of faggots and animals in motion.

NEW ART BRONZES

"THE Quartz Miners," by Lovis Potter, is the name given a small bronze group on exhibition at the Fifth Ave. salesrooms of the Gorham Co., New York. The work shows one man seated on a ledge of rock holding a drill while his companion is standing over him with an upraised hammer, about to strike the drill. The group is mounted on an irregular base and is a most attractive bit of work. "Diogenes" looking for an honest man, is the subject of another bronze production seen at the same salesrooms. The venerable figure is shown in the characteristic attitude, holding in one outstretched hand a lantern, while the other hand grasps a staff.

WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page.]
No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2339.—**Miscellaneous.**—*Give me the answer to the following questions. What is the best test for silver? How do you tell what the quality is? (2) What is the difference between the quality of coin silver and sterling? (3) What is the formula for a "green gold finish"? I have a dead one for Roman and rose gold, but do not get a green gold finish.* R. L. L.

ANSWER:—(1) *Test for Silver*—If articles be touched with a mixture of equal parts of bichromate of potassium and pure nitric acid of 1.35 specific gravity, and a black stain is produced, it is an indication of silvering. To recognize light silvered articles, apply a 1.5 per cent. solution of sulphite of soda. After allowing the drop to act for 10 minutes, rinse it off with water. Upon silver articles a full, round, steel-gray spot is produced. Other white metals and alloys, with the exception of amalgamated copper, do not show this phenomenon. All that ever appears is a ring at the edge of the drop. Amalgamated copper is more quickly colored and acquires a more dead black color than silver. The test is so sensitive that the original color of the article shows through it. Test water for silver consists of 16 parts of chromic acid and 32 parts of distilled water; keep the fluid in a well-stopped glass bottle. Dip the article into the surface of the article to be tested. By detaching or rinsing off the matter with water it will be shown whether the article is silver or silvered. With silver the touch becomes blood-red, the coloration being more or less intense according to the fineness of the silver. The touch of silvered German silver, tin composition, etc., is not decomposed by the test water, the touch appearing in its original color or with a dull gray tint. (2) *Coin and Sterling Silver*—Sterling silver consists of fine silver, five ounces, 11 pennyweights; fine copper, nine pennyweights. Standard coin silver consists of silver, 18 pennyweights; copper, one pennyweight and 12 grains. Common silver consists of silver, one ounce; copper, 17 pennyweights; nickel, 13 pennyweights. (3) *Green Gold Finish*—A very good method of making a dark green gold solution is to obtain an alloy of green gold, then make up the solution with the aid of a porous cell. Prepare about one gallon of cyanide solution, so that it will stand about three degrees Baume, and warm the solution. A porous cell is filled with part of the cyanide solution, but should be strengthened by adding a little more cyanide and placing in the solution. Leave the top of the cell above the liquid free and connect with the negative pole. Connect the gold

piece with the positive. Take a piece of iron and, with the copper wire, connect with the negative pole and hang the iron in the cell, turning on a strong electric current which will absorb the gold necessary for the solution. An anode of the same gold may be used, which should produce the desired shade. Green gold is an alloy of 19 parts of pure gold and five parts of pure silver. This mixture will make an alloy very effective for foliated designs. Other proportions are 20 parts of pure gold with either $1\frac{1}{2}$ or $6\frac{2}{3}$ parts of silver, according to the shade desired. Green gold is composed of nine grains of fine gold, 11 grains of fine silver and four grains of copper, which, when alloyed, will represent one pennyweight of nine-karat gold. Green gold may also be composed of 19 grains of fine gold and five grains of pure silver, which will form an alloy of a beautiful green shade. It will represent one pennyweight of 19-karat gold.

QUESTION No. 2340.—**Magnetizing of Steel Tools.**—*How can I prevent the magnetizing of steel tools during the repairing of electric clocks?* C. B.

ANSWER:—It is impossible to protect the tools used in repairing portions of magnetized steel, according to the *Deutsche Uhrmacher Zeitung*. The lathe alone can be used without danger, as its working parts rotate, and magnetism cannot be induced owing to the constant change of pole. When other tools have to be used, such as pliers, pincers, screw-drivers, etc., the oldest that can be obtained are taken, as there is rarely much on these that can be spoiled. These tools are afterwards kept carefully apart from the others. Small articles, such as tweezers, screw-drivers for watches, etc., can be safely and rapidly demagnetized by holding them by one end and knocking the other end for a few minutes at rapid intervals on a hard substance. The magnetism disappears completely in consequence of the blows.

QUESTION No. 2341.—**Steel Color on Copper.**—*We are manufacturing novelties out of tomback and alpaka metals, and desire to color them to resemble steel. Kindly give us a formula for doing this.* S. & C.

ANSWER:—To give tomback, alpaka or any copper-nickel alloy a steel finish, polish the articles in the usual way, then clean in a potash solution and highly scratch-brush. Make a solution in proportion of two pints of distilled or rain water to six ounces nitrate of copper and one-fourth ounce nitrate of silver. Immerse the article in

this and let dry slowly. Then heat gradually with gas or alcohol flame. The article will first turn to a green, then gradually turn to a dark color resembling steel. The pieces may be relieved by brushing to a dead or lively appearance.

QUESTION No. 2342.—**Artistic Ornamental Enamels.**—*Kindly give me the ingredients of artistic ornamental enamels which can be used on white enamel.* A. O.

ANSWER:—The following are the ingredients of several enamel colors: *Transparent Red*—Melt together 65 parts Cassius gold-purple, 3,000 parts crystal glass, 400 parts borax. *Transparent Blue*—34 parts crystal glass, six parts borax, four parts oxide of cobalt. *Dark Blue*—30 parts crystal glass, six parts borax, four parts oxide of cobalt, four parts bone charcoal, two parts arsenic acid. *Violet*—30 parts crystal glass, four parts borax, four parts manganese, 1.2 parts oxide of cobalt. *Transparent Green*—80 parts crystal glass, four parts oxide of copper, two parts borax. *Dark Green*—30 parts crystal glass, eight parts borax, four parts oxide of copper, four parts bone charcoal, two parts arsenic acid. *Black*—30 parts crystal glass, eight parts borax, four parts oxide of copper, three parts oxide of iron, four parts oxide of cobalt, four parts oxide of manganese. *White*—30 parts of crystal glass, six parts oxide of tin, six parts borax, two parts arsenic acid. The colored enamel, powdered as fine as possible, is applied by means of a brush with oil of lavender to the already fused on white enamel and then heated just to the melting point. For certain purposes the colored enamels may be applied without the white foundation.

The Hall-Marking of Watches.

THERE is an impression abroad, says the *London Watchmaker*, that it is not necessary to hall-mark enameled or enameled and jeweled watches. This is utterly erroneous. All watches, no matter how decorated, must pass through the British assay offices, and those who take any risks will have a heavier bill to pay than they had anticipated.

Our object in making this statement is to warn the retailer who would assuredly be the victim in the case of the Worshipful Company of Goldsmiths taking the matter up.

Hardness of Iridium.

IN some experiments carried out by W. O. Heraeus, the platinum manufacturer of Hanau, Germany, in 1891, iridium, when pure, has about the same hardness as steel hardened and drawn to a blue temper.—*The Brass World*.

A clock which, it is claimed, has ticked off the hours for nearly 200 years is owned by Mrs. Daniel Stevens, Reynolds Bridge, Conn. The old timepiece is seven feet high, has a solid black walnut case and movement of cherry wood. There are no marks on the clock to enable one to identify the maker. It has been in the Stevens family for 150 years.

SEND FOR A COPY OF OUR NEW CATALOG JUST OUT

is the Handsomest Jewelry Catalog Ever Issued and Will Meet the Demands of the Most Critical. If You Contemplate Issuing Catalogs This Season, Now is the Time to Place Your Order. This is an Opportunity You Cannot Afford to Miss.

PROMINENT JEWELERS WHO WILL SEND OUT OUR CATALOGS THIS FALL:

STORE OF SWITZER BROS., MT. CLEMENS, MICH.

HERE IS PROOF THAT OUR CATALOGS BRING RESULTS

Mt. CLEMENS, Mich., March 13, 1909.

THE ARNSTINE BROS. CO.,
Cleveland, O.

Dear Sirs:—We are well pleased with the results obtained through the use of your catalog this year. We have used them for four years and each year has shown us a very satisfactory increase in business.

We expect to use them in our two stores the coming year, having just purchased the R. H. Brabb Jewelry Store at Ypsilanti, Mich.

Very truly yours,

SWITZER BROS.

The Catalogs sent out by this firm since 1904 were made by The Arnstine Bros. Company

TRENTON, Mo., Feb. 11, 1909.

THE ARNSTINE BROS. CO.,
Cleveland, O.

Gentlemen:—Replying to yours of the 8th inst., regarding the benefits derived from the use of your Catalogs during the past year, we are pleased to say that they have become such an important feature in our business that we hardly see how we could do business without them.

It not only advertises our business in the Rural Districts, and brings customers from miles around, but we have on our books customers in ten different States, former residents of Trenton to whom we mailed our Catalogs, receiving numerous mail orders from them.

We have used your Catalogs for five years and cannot recommend them too highly as a "trade builder."

Very respectfully yours,

THE RANGE JEWELRY CO.

The Catalogs sent out by this firm since 1904 were made by The Arnstine Bros. Company

STORE OF THE RANGE JEWELRY COMPANY, TRENTON, MO.

We are represented in every State in the Union. If you contemplate using Catalogs, and will notify us, we will have our representative call on you and explain our proposition.

IMPROVED BEZEL AND WHEEL CHUCK No. 26

CUT IS FULL SIZE.

Larger capacity for holding work and improved construction. Will hold wheels or plates from 3 mm. to 52 mm. Bezels, rings, watch cases, etc., from 13 to 62 mm. State name and size of lathe when ordering.

Price, Each, \$9.00

SCREW DRIVER No. 112 With Special Clamp and Two Blades

Use the screw driver like an ordinary one until the screw is partly extracted. Then press the sliding clamp down; this is so made that it engages the head of the screw and holds it until it is desired to put it back again, when it automatically disengages itself, and the driver sends the screw clear home. Particularly useful with stud screws.

Our illustration shows the clamp drawn back, which permits the driver to be used like any ordinary spectacle screw driver. The other illustration shows screw held in the clamp ready to be placed in the mounting.

Price, \$1. 0

REFLECTING LOUPES Made in 2, 2½ and 3-inch Foci

"THE NEW 'MODEL' LOUPE"
A NEW REFLECTING EYE-GLASS OF MERIT

PATENTED APRIL 17th 1906

WORTH MORE THAN TEN TIMES THE PRICE, FOR ESCAPEMENT-WORK ALONE.

PRICE 85¢ SINGLE, 2-2½-3" FOCUS.

For inspection between the plates of a watch movement, or any recess from which light is excluded, these loupes are an absolute necessity. They have been greatly improved in construction, the mirrors now being optically ground concave, which causes them to reflect powerful rays of light at the necessary point.

Single Lens - - - - - Each, 85c.
Double Lens, very powerful - - - - - " \$1.50

For Sale by all Jobbers in the United States and Canada.

ROLLER REMOVER No. 60 (Patented)

A thoroughly efficient and quick acting remover. The work is always plainly in sight. The roller is held in the grooved jaws of the tool. The adjustable head which holds the screw is quickly brought into position over the staff and the most obtinate roller will instantly yield to the gradual pressure of the screw.

Nickel Plated, Each, \$1.50

CROWN CHUCK No. 50

For enlarging or cutting deeper crowns of watch cases. A movable plug in the stem regulates the depth required for various sizes. Four caps of various sizes are supplied with each to hold crowns from small to large. Stem fits in No. 50 wire chuck.

Price, Each, \$1.50

SPECTACLE AND EYEGLASS SETTING-UP PAD No. 1

This pad consists of a circular piece of rubber not too soft to hold when a convex surface is laid upon it, thus preventing any possible breakage. It has a metal rim with two bent arms which hold the straps of the eyeglass or spectacle, and keeps them in place while the screw is driven home.

Instructions for Using the Setting-Up Pad No. 1

Put the lens in the straps of mounting. Then put the lens in the holder by letting the two prongs come on each side of the stud, pushing the lens in place between the thumb and forefinger of the left hand. Draw the lens up in the strap by pressing the thumb of the right hand against the end of the lens, and with the forefinger and middle finger of the right hand press against the rim of the holder on each side of the two prongs. Place spectacle in holder in the same way. Then screw the lens by turning the screw home. Will hold any strap of rimless spectacle or eyeglasses.

Our illustration shows "So-Easy" Eyeglass Mounting on Pad. We show this one in particular as it is one of the most difficult ones to assemble.

Price, Each, 50 cents

THE REASON WHY

We are able to handle orders for Mesh Bags in any size quantities is because after long years of experimenting—on what seemed to others an impossibility—we have at last succeeded in making a machine to produce mesh.

The advantages to you are many, of which a few are: a perfectly smooth strong mesh, finer than can be produced by hand for double our price—prompt deliveries—and a guarantee that your Holiday orders will be taken care of. Your experience will supply many others.

W. & D. Bags are offered by Leading Jobbers.

Since 1850

61 PECK STREET

PROVIDENCE, R. I.

IN 1844 Col. Andrew Dennison, seated on a cobbler's bench, cut the forms for the first Jewelers' Cardboard Boxes made in America. Such was the inception of the Dennison Manufacturing Company.

The new edition of Dennison's Jewelers' Catalogue, now being distributed, gives an idea of the immensity of the present-day Dennison plant and reflects the remarkable advance made by us in the Art of Manufacturing Jewelers' Cardboard Boxes, Cases, Trays, and Findings.

This book is regarded by leading Jewelers as an almost indispensable adjunct to the successful conduct of business. It is consulted by them as a work of reference, for each and every item listed is the Jewelers' Standard of Comparison.

The task of distributing the 1909-10 issue of Dennison's Jewelers' Catalogue is one that requires your co-operation. We wish to reach every Jeweler in the country. If you have not already received a copy you will confer a favor upon us by requesting one. We will take pleasure in forwarding promptly.

SILVERSMITHS TO THE AMERICAN PEOPLE

THE LAUREL

TRADE MARK
STERLING 1899

¶ The **LAUREL** pattern is now ready for delivery in the dozen, with the fancy pieces in process.

¶ Made on the popular **MARTHA WASHINGTON** shape.

¶ Decorated with a dainty **LAUREL** wreath, cut with the delicacy of hand engraving.

¶ Finished in light, medium and heavy weights at a very moderate price.

¶ In manufacturing "**THE LAUREL**," every care has been exercised as to design, die work and finish—it is in every sense a Pattern of Class—but on account of slenderness of outline, proper distribution of weight, the most perfect factory and manufacturing facilities, it will be offered at the price of the cheap "ordinary" patterns now on the market.

¶ This is another **Smith Pattern**, designed to remain permanently in demand.

CHILD'S SET IN STERLING SILVER

THIS has been called the "Children's Age." Even in Art and Literature they claim and receive the very best that can be provided. For this reason in designing the Child's Set here shown the Whiting Company have taken pains to produce one concerning the high artistic value of which there can be no question. The exquisite modelling of these figures will be found as attractive to the mature adult as the story they tell is delightful to the childish minds of the little ones.

Wallace Sterling

A New
Toilet Ware
Pattern
of
Distinct
Importance

*The pattern is
No. 6500, plain — and
No. 6500B, engraved*

A combined spirit of simplicity and refinement is embodied in this design, brought about by the long, slim shape, the thin edges, and the delicate engraving. There is no question of the exquisite feeling displayed in this simple engraved figure, but the pieces look quite as well plain—there's very little choice, if any.

*Send for our new Sterling Catalogue, showing our
Fall line, and including this toiletware*

STERLING NOVELTIES

THE REED & BARTON FACTORIES

have so long been famous for flatware, tea ware and the larger pieces of hollowware, some of the trade scarcely appreciate the fact that a very large and prolific department has been devoted for a number of years to the making of small, attractive and immensely salable pieces of sterling hollowware.

These pieces really come under the head of novelties. They are popular-priced and afford the jeweler quick and attractive profit. They fill the great demand for wedding and holiday gifts which are inexpensive but choice.

Cut out this list, mark the articles you can sell and let us send you illustrations and prices. Do it now so as to have a complete stock for the Wedding and Gift Seasons.

Silver Plate that Sells

For over half a century the word ROGERS applied to plated ware has been deservedly synonymous with the highest art of the designer, and the most careful and finished workmanship of the artisan, but dominating all else

DURABILITY IN THE SERVICE OF THE CONSUMER.

To add still further prestige to the high standard of the ROGERS name comes our announcement of the succession of *the sectional process* of plating over the common method of a uniform silver deposit on articles of flatware.

The coating of silver on flatware articles invariably wears through at the points marked XII on the above illustrations because the quantity of silver deposited has not heretofore been adjusted proportionately to the wear the Spoons and Forks receive.

OUR SECTIONAL PROCESS

of plating, deposits on these exposed points a triple quantity of silver, thereby more than doubling the service obtained by the old method of uniform plating. We are thus enabled to guarantee that plated ware of our manufacture will bear

50% MORE SILVER

than standard plate and will outwear any and all other brands of silver-plated ware.

Card Jewelry Line

consisting of medium priced

10K. Solid Gold Brooches, Scarf Pins,
Baby Pins, Handy Pins, Ear
Screws, Pendants, etc.

These goods are sold through the jobbing trade at very attractive figures. An examination and comparison will at once prove them to be ready sellers and profit makers in the stock of any jobber.

New patterns have been brought to a point of especial distinction, and all bear our mark of quality and reliability

It is our earnest desire to establish the same reputation for Finish, Originality, Quality and Reliability for this CARD JEWELRY LINE as is borne by our ring lines.

Samples will be cheerfully sent to jobbers and we heartily commend this line for a profitable business in 1909.

OSTBY & BARTON COMPANY

NEW YORK : 9-13 Maiden Lane.

PROVIDENCE, R. I.

CHICAGO : 103 State Street.

THE pinnacle of Fame is difficult to reach, and many fall by the wayside. Plain statement of facts is better than vain boasting.

We could not reach the Pole, but we believe we have reached the highest point in artistic design and excellence of finish in our line of silverware.

Our achievement has been won like the Arctic Explorer's—by persistent effort and long experience.

Our policy of selling to the Retail Jeweler exclusively has won the victory.

Rockford Silver Plate Company

ROCKFORD, ILLINOIS

The Leading Silverware Manufacturers of the West

Stand by those who stand by you

NOTHING BUT STERLING!

ROGER WILLIAMS SILVER CO. are manufacturers of high grade sterling ware only. We are the house that is always busy. Our goods are of original design; we do not wait for our competitors to originate for us. We manufacture no light weight or trashy goods, as we cater exclusively to the legitimate jeweler.

A complete line of samples is carried both at our New York Salesroom and at the Factory, Providence, R. I.

The Legitimate Trade is cordially invited to call and see for themselves. We furnish exclusive pieces, no matter how large or how small.

Our "IMPERIAL" flatware pattern should not be overlooked by any jeweler. It is an assured success. Its pleasing, attractive and graceful lines appeal to all tastes. Place a small order of this pattern in your stock and watch the results. It stands out from all other patterns, being an entirely new departure from all other flatware designs.

A full line will be carried in stock after October 1. Our toiletware line in the Bead, Plain and Engraved patterns, is unsurpassed in weight, workmanship and design.

We advise the trade to place their orders early to insure prompt delivery as present indications show that we shall be unable to fill orders received after November 1 as promptly as now.

Write or phone us for catalogue and attractive prices. Better; visit our salesroom or factory and see for yourselves.

THE
CORONET
BRAID

JET
HAIR PINS
CORRECT

THE CORONET BRAID, one of the most graceful of all coiffures, is a revival. It encircled the heads of former beauties, just as it does with the belles of to-day. Loop Hair Pins were inseparable from this style of head dress. Fashionable women wore from four to eight of these hair pins. The pendulum has swung back once more. The old Coronet Braid is now the "latest style." It was foreseen here. The revival calls for correct Loop Hair Pins of Jet. They are here provided in many artistic variations. Priced to retail from 75c. to \$5.00 per pair.

D. Lisner & Co. *Creating Importers of* *Jewelry Novelties*
One-Forty Fifth Avenue, cor. 19th St., NEW YORK

Of Interest to the Jeweler

THERE are several thousand teachers of Domestic Economics in this country. These women will tell you that our coal stoves are crude and costly, that much of the work in the kitchen is only useless drudgery. What every woman knows is that something is wrong about housework. Thousands of women prefer to do their own work, and are eager to learn how to keep a house with less trouble, less monotonous, wearisome labor; with more comfort, more leisure and more pleasure for their families.

New Housekeeping begins by using a Sternau Alcohol-Stove. One gill of alcohol is more than enough to prepare a lunch for three persons, and the expense does not exceed one and a half cents a person.

Write for further information.

Sternau Alcohol-Stoves like Chafing-Dishes, Fancy Teakettles, Coffee-Machines, etc., appeal to the jewelry trade.

For you to distribute, we will furnish without charge handsomely printed books with your name and address thereon. Full particulars and Catalogue No. 23 on request.

SCIENTIFIC RECONSTRUCTED WHITE SAPPHIRE

A stone of value—"The Diamond's Neighbor." The nearest likeness to a diamond ever marketed. Has a wonderful brilliancy, very highly polished, and will retain its brilliancy. Stone is hard and wearing qualities are lasting. Beware of imitation Reconstructed White Sapphires, which are of little or no value.

These are the genuine
Price per Carat, Finest Selected Reconstructed White Sapphires \$1.75
Price per Carat, Second Grade Reconstructed White Sapphires 1.45

SCIENTIFIC RECONSTRUCTED RUBIES

These Reconstructed Rubies are absolutely as hard and have the same beautiful appearance as the Genuine Oriental Rubies. They are the scientific production of small particles of Genuine Rubies fused under intense heat through an electrical process and purified through a chemical process.

When ordering, kindly state sizes desired, the same as when ordering precious stones, as 1/4 carat, 1/2 carat, etc., as per gauge shown above.

These Genuine Reconstructed Rubies, per Carat, \$1.10

Genuine Reconstructed Rubies, second grade, per Carat, \$0.65

JEWELRY OF DISTINCTION

ENAMEL BARPINS are among the best sellers this Fall THE "EDGEWOOD" pin has been pronounced the best pin of its kind on the American Market.

RETAILERS should use this pin for the following reasons:

- The GOLD is fourteen karat.
- The WORKMANSHIP is perfect.
- The DESIGN is patented.
- The PEARLS are selected Oriental Baroques.
- The PRICE is moderate.
- The PIN will not be imitated in inferior goods.
- The ENAMEL can be furnished in eight colors.

We sell direct to the retail trade.

Nut Picks and Cracks

These articles are all constructed of steel, handsomely chased with beautiful design, and heavily plated in Nickel or Silver, making them always look bright and fresh. They are well made in every respect and intended for practical use.

Being pioneers in the Nut Pick and Crack business, our long experience enables us to offer a class of goods which in workmanship, design and finish is far superior to anything on the market.

These goods are put up in neat Pasteboard Boxes, White Wood, Cherry, Bird's-eye, Leatherette, Cloth and Satin Lined Cases.

Catalogue No. R, showing these goods in sets, mailed on application.

Waterman's Ideal Fountain Pen

is one of the successful lines of general use that has been maintained at the top notch of quality and increasingly sold by Jewelers. The result of every Waterman's Ideal purchased is a permanently satisfied customer (or the manufacturers want to know why), and a good margin of profit for the dealer. The space required for display is small. The line is interesting and attractive, and the show cases supplied provide a convenient and useful fixture. Every fountain pen demand or whim can be fulfilled from the complete and comprehensive line of Waterman's Ideals. We are glad to offer suggestions and aid dealers when and where desired, for the most satisfactory and profitable conduct of this department.

The President Taft Cup.

THE trophy shown on the front cover of the current issue is known as the "Taft Cup," so called because it was offered under the auspices of the President of the United States by the Eastern Yacht Club and was designed by Gustave Rogers, Marblehead, Mass. It is a large sterling punch cup measuring 24 inches across the handles, standing about 10¹/₂ inches high and weighing 300 ounces. The ornaments—two female heads and two eagles—modeled by Louis Potter, the New York

eagles are partly oxidized a peculiar gray-blue, which brings out the modeling and reliefs, but is not obtrusive. The prominent idea is to imitate the old-time appearance, both in color as well as in richness and massiveness.

Besides the Taft cup, Mr. Rogers was awarded the order for the trophy of the Eastern Yacht Club's commodore, weighing as much as the Taft cup. It is an interesting piece of modeling, showing a gargoyles fish carrying a bowl, and stands 20 inches high. Mr. Rogers' practical experience in silversmithing and in gold work, gained in

A Golden Pestle Weighing Six and One-half Pounds Which Sold for Twelve Francs.

SOME months ago Mr. Jacques, an Armenian merchant, passing through Paris, went to a Paris antiquary on the Victor Massé St., Amiel Soliman, and asked him, among other things, to purchase a heavy pestle of copper, of undoubted Turkish origin, and ancient. Mr. Soliman bought the pestle for the sum of 12 francs.

Since then he had several opportunities to sell this pestle at a slight advance, which he regarded as unprofitable. Latterly he

ANOTHER VIEW OF THE PRESIDENT TAFT CUP FOR GERMAN-AMERICAN YACHT RACES, OFF MARBLEHEAD, MASS.

sculptor, were cast very skilfully by Chemgros, the French caster, in Newark, N. J.

The bowl was raised by hand in Boston by Richard Dimes, an Englishman by birth, but long a resident in this country, and his son-in-law, J. W. Buckley. Their work is particularly to be praised, for the soldering of the four heavy castings to the relatively thin metal of the bowl was naturally not an easy task. There is not the slightest evidence of falling in or buckling; the inside of the bowl is perfect.

Each of the eagles carries the coat-of-arms of the competing nation—on one side the German, on the other the American. The finish of the piece is dull except the upper three inches or so of the bowl, where it is burnished bright. The handles and the

France and Italy, gives him the happy faculty of making his designs from the viewpoint of the silversmith's requirements, so they can be carried out without complaint. He is a great believer in keeping his workmen contented and in good temper; he says his success is attributable less to fortunate design and more to getting the best there is in the workman.

The Taft cup was won by the *Joyette*, owned by Commodore Childs, of New York. It was exhibited last week in a window at 364 Fifth Ave., New York, where it attracted much attention.

The Snider-Umstead Co., Durham, N. C., has been incorporated with a capital stock of \$100,000.

noted with surprise that while all his copper articles became dirty and tarnished the pestle purchased from M. Jacques alone retained a resplendent brightness. Finally impressed with a strange suspicion he took it to one of his friends, a jeweler, who having tested it, found it was fine gold.

This coppered pestle bought for 12 francs with worth more than 10,000 francs, its weight being 3 3-10 kilogrammes.

The honest antiquary, not knowing the address of the seller, who, moreover, was evidently ignorant of the value of the pestle, took it to the commissary of police.

It is supposed that it was cast, a long time before, by thieves or brigands, who conceived the idea of by this means hiding the proceeds of their robberies.

REPOUSSÉ WORK AND CHASING

ILLUSTRATED AND DEMONSTRATED BY AN EXPERIENCED ARTISAN

(Continued from the issue of Sept. 1.)

THIS spread-out end of the stem piece fits onto a collar about three-eighths inch wide, which in its turn is fitted over the top of the foot. This collar should be made of a strip of 10-gauge metal three-eighths inch wide, and after accurately fitting it over the top of the foot the lower edge of the collar can be pierced to the outline shown in the sketch, or any other simple decorative edging that may suggest itself, avoiding extremely sharp and spiky projections if possible. Although in this case they would be soldered down and so would not catch or tear, as would be the case if they were free—i.e., unattached to the background—they nevertheless give a feeling of weakness. It should be remembered in using this type of decoration—the same applies to the enrichment of moldings and borders—that however simple and primitive the unit, yet when used as a repeating pattern it can look extremely well and decorative and effective. A good example of the value of repetition in this type of design may be found in the collection of Anglo-Saxon jewelry in the British Museum. Some of the brooches found in recent years are particularly noteworthy for the richness of their decorative effect produced by a repetition and arrangement of units of quite rudimentary simplicity. Over the upper edge of the collar a half-round wire about one-twelfth inch wide should be slipped, allowing it to project half over the edge, thus forming a step into which the spread-out end of the lower stem-piece can be fitted. One-half inch below this another half-round wire can be soldered, and the space between can be either further enriched with a series of beads or possibly small lozenge shapes, or a very fine twist wire might be soldered in the angle between the half-round wires and the collar, thus reducing the space between the wires to one-sixteenth inch, which would then, of course, be left plain to look well. Inside the collar a square wire should be soldered corresponding in position to the lower half-round wire on the outside, against which the top of the foot would butt, and the collar can then be soldered on the lower end of the stem-piece.

On the other end of the stem-piece, which fits into the bottom of the boss, a small collar, similar to the one just discussed, can be fitted, but it should be rather narrower and made of thinner metal, about seven or eight gauge. The collar should be turned up on the small side, and after soldering it should be stretched carefully with a planishing hammer on a mandrel until it slips down over the stem-piece sufficiently for this to project about one-sixteenth inch. It should then be slipped off again, and a square wire about one-sixteenth inch thick should be soldered round flush with the top edge. For the sake of appearance the two outside corners of this wire can be slightly taken off, but it must not be filed into a half-round wire, as the object of this wire

is to give a strong bearing for the boss to rest on, and so make a good joint when soldered. Further down the collar a small half-round wire can be soldered about one-thirty-second inch away from the bottom edge. This will make a neat little molding when the collar is slipped into position on the stem-piece and soldered on.

The opening in the bottom of the boss should be filed out very accurately, so that

A—SECTION THROUGH COMPLETE CANDLESTICK SHOWING CONSTRUCTION.
B—METHOD OF SCREWING AND FITTING TOGETHER; THE MAIN PARTS ARE SHOWN SEPARATED WITH THE SCREW PASSING THROUGH.

the end of the stem-piece pushes in as tightly as possible, as otherwise there will be great difficulty in soldering the two pieces together soundly afterwards. If by any chance the hole has become too large it is quite a simple matter to pass a flat punch through the opening at the other end of the boss, and with this as a support, the opening can be drawn together with a small planishing or collet hammer. It is advisable to roughly cut out these openings before soldering the two cups forming the boss together, as they are more easily cut out then, and it also makes the tying together of the two parts before soldering a simpler matter, but before doing so it is necessary to strike two or three concentric circles about one-sixteenth inch apart as a guide when enlarging these, as, of course, there is no longer any center when once these pieces have been cut away.

The upper stem-piece is like the lower one, also a little tapered, but rather narrower, so that when in position on the top

of the boss it gives the appearance of simply being a continuation of the lower one, carried right through the boss as it were. This tapering of the stem-piece considerably helps the general line of the candlestick, as in this way a continuous spread is obtained from below the grease-pan, thus giving a very strong and sturdy appearance. The two collars to be slipped over the top and bottom of this upper stem-piece should be in keeping with those on the lower one, but they need not be absolutely identically alike. If anything, they should be kept rather lighter in appearance. The lower collar should be slipped on far enough to allow the stem-piece to project and be fitted into the boss in the same way as the lower

stem-piece. The upper collar on the other should come flush with the top edge of the stem-piece, in order to provide a good bearing surface for the grease-pan immediately above it.

The grease-pan should be shaped out of a $3\frac{3}{8}$ -inch circle of metal, using rather stouter metal than has been used for the other parts so far, as there will be more wear here from continual clearing. The grease-pan, as will be seen from the sketch, is quite a shallow one and can be domed up almost entirely with a round blocking hammer on a wooden block, only doming up the center and leaving a flat band about five-eighths inch all round. Then when roughly shaped, it can be annealed and carefully planished on a steel tool. The rim should be strengthened with wires or moldings, as the thin edge of the steel metal, besides making an unpleasant finish, is always more liable to be bruised or put out of shape. One of the simplest ways of strengthening the rim is to solder either a

Reconstructed White Sapphires

are or half-round wire on either side of the rim, keeping both of them about one-half to one inch inside the extreme edge. This looks very well seen edgewise, and immensely strengthens the rim, besides being simple to do, there being only one wire on each side. When two or three wires are used to make a little molding, the work comes much more difficult, as they look untidy if not soldered absolutely parallel with one another. It is somewhat easier when all the wires are touching one another, when once the inner circle of wire has been accurately soldered on, it is a comparatively easy matter to butt the others one against each other, using small iron clips or cotter pins to hold them down.

The nozzle of the candlestick can be either raised in one piece—that is, without seam, or a ferrule can be turned up from a strip of metal, soldered, and after planing, a slightly domed bottom can be soldered on. The nozzle should be made to fit the stock size of candle. For a candlestick of this size candles one inch thick would be about right. The edge of the nozzle can be strengthened by having a half-round wire soldered round. Immediately below this wire a band of ornament can be inserted, using a simple repeating pattern. This looks equally well when the nozzle is empty or holding a candle. Underneath the nozzle a ferrule about three-eighths inch long and just wide enough to push tightly to the upper stem-piece has to be soldered. Over this ferrule a small collar about one-eighth inch wide should be slipped in order to separate the nozzle from the grease-pan, as this always looks better than when the nozzle fits flush without any break between the two. After soldering the collar and the grease-pan on, the projecting part of the ferrule can be pushed down tightly into the upper stem-piece and the whole soundly soldered.

In the event of its being desired to keep the various parts separate and screw them together instead of soldering them together into one piece, several slight modifications in the way of fitting will have to be made. For purposes of cleaning it is advisable, though not absolutely necessary, to keep the nozzle and grease-pan separate, as it is rather difficult to clean the center of the grease-pan with the nozzle fixed above it. The other two pieces to be kept separate are the two stem-pieces with the boss between, and the foot, thus making four distinct pieces to be screwed together.

Into the top of the foot on to which the lower stem-piece fits, a thick plate of metal about 16-gauge has to be soldered, and a similar one has to be soldered into the top of the upper stem-piece. The ferrule soldered underneath the nozzle—before referred to—can be done away with, only soldering a little collar to separate nozzle and grease-pan on. The two plates soldered into the top of the upper stem-piece and the foot should next have holes cut in them sufficiently large to allow a one-quarter inch thick wire to pass through. A length of one-quarter inch wire has next to be soldered on to the nozzle long enough to project about one-quarter inch beyond the plate soldered into the top of the foot when the whole candlestick is fitted together. The end of this wire can then be

screw-tapped, and a nut fitted to it. As, however, the various parts are circular, they would still be inclined to turn on one another even if screwed together tightly. It is therefore necessary to key them together to such an extent as to make this impossible. This can be done by cutting a hole about three-eighths inch deep and one-sixteenth inch wide into the end of the wire which is to be soldered on to the nozzle. Into this slot a piece of plate metal can be fitted, leaving it just wide enough to project about one-sixteenth inch on either side of the wire. Then if two slots are fitted on either side of the holes in the grease-pan and the plates in the stem-pieces and foot, through which the wire pass, it would do away with any movement whatsoever when the whole is screwed together tightly. A similar piece has to be let into the wire at the other end. This has to be very carefully fitted, as the projecting piece on either side must not come beyond the plate soldered into the foot, leaving a clear one-quarter inch of screw for the nut, as, of course, the nut must screw tightly down on the plate in order to make the whole candlestick perfectly rigid.

Candlesticks should on no account be lacquered after being polished, as from the very nature of their use they require constant cleaning, and after once the lacquer has been worn off in parts the whole surface becomes very patchy.

(To be continued.)

Nicaraguan National Exposition.

IN transmitting the official announcements of the Nicaraguan National Exposition to be held at Leon, commencing Jan. 2, 1910, in commemoration of that city's tri-centennial, Consul José de Olivares writes from Managua:

"Much interest is being manifested in this exposition, both by the government and the general public, the enterprise being the first of its nature that has ever been undertaken in this republic. It will embrace 10 sections, as follows:

(1) Mechanical industries, which comprise: Clothing, ceramics, shoes, tanneries, printing, binding, saddlery and harness, foundry, hardware, carpentry, cabinet work, textiles, etc. (2) Agriculture and its products. (3) Chemical industries in general: Sugars, rum, wines, oils, varnishes, etc. (4) Mining and its products. (5) Fine arts and its adjuncts: Painting, sculpture, architecture, photography, engraving, gold and silver work, music, etc. (6) Woman's arts: Embroidery, hand weaving, artificial flowers, etc. (7) Live stock industry: Horses, swine, poultry, etc. (8) Forestry: Specimens of wood in crude state, sawed and polished, rosin, specimens of rubber, vegetable wax, fibers, vines, etc. (9) Pedagogy and educational apparatus. (10) Retrospective arts: Idols, vases, urns, arms, etc.

Several thousand dollars have been allotted for prizes for literary and musical compositions, paintings, and for various other contests. It may be added that Leon is a city of 45,000 inhabitants (the largest in the republic) and on the railway from Corinto, on the Pacific Coast.

W. S. W. Blake, for three years located in N. C. Jackwitz's drug store, at Kenmare, N. Dak., has moved to Grand Forks, N. Dak., where he has formed a partnership in the jewelry business.

Golden Key Made by an Alaska Jeweler

A NOVEL product of jeweler's work in precious metal comes from Alaska in the form of a golden key that was presented to the members of the Nile Temple, Seattle, on their pilgrimage to Nome, Alaska, Aug. 1 to 5. The key was made by A. J. Mueller, a jeweler of Nome, and was presented by Mr. Mueller and Otto W. Olsen and Chas. L. Johnson, two mine operators who donated the gold which came from their own mines.

The key, which is about $6\frac{3}{4}$ inches long and weighs six ounces, has the insignia of

GOLDEN KEY MADE BY AN ALASKA JEWELER.

the Mystic Shrine at the handle and the inscription appears on the part which fits in the lock. The Egyptian face is in oxidized gold, the leaves of green gold and the lily between them of red gold. The scimitar blade and other bright parts are satin finished, while the handle, the body and the other parts of the key are of rough virgin gold made of assorted sized nuggets.

The inscription on the ward reads "Pilgrimage of Nile Temple to Nome, Alaska," and on the reverse side "Presented by Scottish Rite Club to the Nile Temple of Seattle, Wash., Aug. 1st, 1909." On the three edges are the names of the donors, Messrs. Mueller, Olson and Johnson.

H. Princen, Minnesota, Minn., has turned over his interest in the jewelry business of H. Princen & Son to his son, August. H. Princen contemplates moving to Europe.

Annual Report on the Production of Precious Stones.

Text of the United States Geological Survey's Advance Pamphlet on Gems and Gem Minerals for 1908. Compiled by Douglas B. Sterrett.

(Continued from issue of Sept. 29.)

DIAMOND. UNITED STATES.

Arkansas.—A pamphlet issued by the Arkansas Diamond Co., Little Rock, containing the statements of the original investors, the mining engineer and the geologist of the company will prove of interest to many people. An article giving an account of the discovery, developments and possibilities of the deposit has been written also by the company's mining engineer, John T. Fuller.¹ Fuller calls attention to the fact that the term "blue ground" is a misnomer and is little understood by the average prospector. The "blue" refers to the bluish-green color of the unweathered peridotite encountered below the zone of yellow weathered material at the surface. On exposure to weather the "blue," which is really the form of rock, disintegrates to a grayish or yellowish-green friable mass which is properly a "ground." The peridotite of the Arkansas Diamond Co. mine is essentially similar to that of the South African diamond mines. In the peridotite in the latter mines variation in appearance, not only in different mines but often in different parts of the same mine, is not expected that a close comparison between samples can be made. The occurrence of the Arkansas peridotite in the form of a pipe, the manner in which it weathers, the presence of unaltered nodules called "hardibank," and of minerals commonly found associated with diamonds are points of similarity.

Over half of the area of the peridotite outcrop the rock has weathered to depths varying from 20 to 60 feet, so that it will require but a minimum of blasting to mine. The material that can be thus removed is estimated at 1,500,000 cubic yards. In the work of testing the deposit a yield of diamonds was promising and amounted to 540 stones, of which 505 weighed together 217 carats. Three cut stones were found to be brilliant and were valued at from \$60 to \$175 per carat, with an average value of \$104 per carat. A parcel of rough unsorted stones from the mine will easily worth \$10 per carat. The only way to obtain a true idea of the value or possibilities of such a deposit is to wash at least 50,000 cubic yards of rock with the proper type of washing machines. Small test runs on certain parts of the peridotite outcrop indicate at least a content of 21 carat per load of 16 cubic feet. The possibilities of cheap mining in Arkansas are great, since there is an abundant supply of water and timber near by and coal should be obtained at reasonable rates.

Mr. Stiff, of the Stiff Jewelry Co., Little Rock, Ark., reports that over 700 diamonds have been found up to July 1, 1909.

According to reports the Ozark Diamond Mining Co., Little Rock, has taken up the Mauney property, covering eight acres of the peridotite outcrop adjoining the land of the Arkansas Diamond Co., and is engaged in prospecting it. A number of diamonds are reported to have been found.

The discovery of a new peridotite deposit in Arkansas has been described by A. H. Purdue.² This deposit is located a little over two and a half miles northeast of the original area and three miles east of east of Murfreesboro. It was discovered by M. N. Burgess, Murfreesboro. The peridotite outcrops on the north slope of a hill whose top is covered with 10 to 12 feet of "plateau gravel" cemented into conglomerate. The gravel débris covers portions of the hill slopes and, along with the depth of soil and vegetation on the latter, renders it difficult to determine the boundaries of the peridotite. The peridotite covers at least two and a half to three acres of land, though the actual area may be found to be still greater.

From microscopic examination this peridotite appears to be identical with that of the original area described by Kunz and Washington.³ The rock weathers readily, and on the outcrop has dis-

integrated into soil and boulders up to the size of a man's fist. The soil is green, brown and yellow, according to stages of oxidation. Rather hard fragments of peridotite thrown out of pits go to pieces after a few days' exposure. The formations cut by the peridotite are referred most probably to Cretaceous age, and the peridotite is probably synchronous with the peridotite of the original area. In the original area more resistant portions of the peridotite have withstood weathering and have formed knobs and elevations extending in a northeast-southwest direction. The new area lies in this same general line.

This new peridotite area has been taken up by the American Diamond Mining Co., and prospecting work has been started. Reece Lamb, vice-president of the company, reports that seven diamonds have been found, along with several garnets and numerous quartz crystals.

California.—The United States Diamond Mining Co. has continued prospecting work on its property near Oroville. According to reports the shaft is 180 feet deep, and several small diamonds and chips have been found. As yet no authentic report of these finds has been received at the Survey.

Kentucky. Press reports indicate continued prospecting in the peridotite areas of Elliott County, Ky., during 1908. Reports state that two diamonds have been found, though details and official confirmation of these discoveries have not been received.

SOUTH AFRICA.

Griqualand West.—The 20th annual report of the De Beers Consolidated Mines¹ shows a large decrease in the number of loads of "blue" raised and washed and in the quantity and value of diamonds obtained. The total production of blue ground at all the mines—De Beers, Kimberley, Wessleton, Bultfontein and Dutoitspan—was 5,497,782 loads of 16 cubic feet, as against 9,010,686 loads in 1907, and the total quantity washed was 4,965,323 loads in 1908 as against 6,626,291 loads in 1907. The stock of blue on the floors was increased from 9,391,603 loads in 1907 to 9,955,123 loads in 1908. The number of carats of diamonds won from all the mines and from the tailings and débris was 2,177,191, as compared with 2,619,872 carats in 1907. The number of carats of diamonds won per 100 loads remained the same as in 1907 in the De Beers and Kimberley and Bultfontein mines, and showed a slight decrease in the Wessleton and Dutoitspan mines. The average cost of mining and depositing the blue was lowered in the De Beers, Kimberley and Wessleton mines and slightly increased in the Bultfontein and Dutoitspan. The cost of washing and winning the diamonds was materially lowered in all the mines. The value of the diamonds produced, calculated on the basis of diamonds sold, was £3,354,524, as compared with £6,452,597 in 1907. Owing to the severe depression in the diamond market, the output of diamonds was not all sold, and those disposed of brought a slightly lower price than in 1907. The amount distributed in dividends during 1908 was £800,000, as against £2,550,000 in 1907. The payment of this amount in dividends was much to the company's credit, considering the general depressed condition of the diamond market and the fact that no diamonds were sold during the last five months of the year. By closing the De Beers and Dutoitspan mines and reducing the scale of the work at the others the operations were reduced step by step to about 35 per cent. of what they were during 1907. This accomplished the purpose of maintaining the price of diamonds, especially those of better grade, though the increased output of the Premier mine made this difficult. Attention is called to the fact that about 30 per cent. by weight of the parcels of diamonds sold by the company contains 70 per cent. of the values.

A new diamond field was proclaimed at Harrisdale, 14 miles from Kimberley, on July 16, 1908,² and the best prospects were hastily taken up. This

diamond deposit consists of alluvial gravel wash, running from four inches to three feet in thickness. Water is scarce and has to be pumped from Vaal River, seven miles off, and then carried five miles by donkeys. The ground was prospected by a few men before the field was opened, and £20,000 worth of diamonds were reported as won in six weeks. The diamonds are of excellent quality and average about £8 per carat.

Transvaal.—The production of diamonds in the Transvaal¹ during the fiscal year 1908 amounted to 2,184,490 carats, valued at £1,879,551, an increase of 639,154 carats in quantity and a decrease of £323,960 in value, as compared with 1907. The production came principally from the Premier mine, though 11 other companies and the alluvial diggings at Christiana contributed a small portion. The production from the alluvial diggings amounted to 1,337 carats, valued at £4,617. The production at the Premier mine² for the year ended Oct. 31, 1908, amounted to 2,078,825 carats, an increase of 188,838 carats over 1907. The value of the output was £1,536,719, or 14s. 9d. per carat. The prices received were lower than in previous years, due in part to the poor market for diamonds and in part to a slight deterioration of the quality of the output. The contract with the Diamond Buying Syndicate has been broken, but the company has established sales offices in London, and the price of diamonds is not to be lowered indiscriminately.

Orange River Colony.³—The production of diamonds in the Orange River Colony during the fiscal year ending June 30, 1908, is given by Burnett Adams as 505,452 carats, valued at £1,069,942, as compared with 398,700 carats, valued at £1,222,202, in 1907. The yield in carats per 100 loads washed was 10.38 in 1908 as compared with 10.19 in 1907. The average price per carat fell from 60s. 6½d. to 42s. 1d. through the unstable condition of the diamond market. The production came principally from the Jaegersfontein, Koffyfontein, Voorspoed and Roberts Victor mines, with a smaller part from prospecting and developing work at the Ebenezer, Lace and Monastery mines. The yield from the Vaal River alluvial diggings amounted to 5,447 carats, valued at £18,217, or 66s. 10½d. per carat. The largest diamond found in the alluvial diggings during the year weighed 59¼ carats and was valued at £385. That the prospects of the Roberts Victor mine are good is shown by the declaration of a 25 per cent. dividend⁴ in March, 1909. The projection of an intrusion of non-diamond-bearing ground into the diamond-bearing area was found to be local and offered no serious drawback to the operations of the mine. The Lace diamond mine has been purchased by the Crown Diamond Mining & Exploration Co.⁵ and is expected to be actively worked under the new management.

German Southwest Africa.—Considerable interest has arisen from the discovery of a new diamond field in German Southwest Africa during 1908.⁶ The diamond deposit occurs in a belt about one mile wide and stretching in an arc from Luderitz Bay southward 30 miles to Elizabeth Bay. The diamonds occur in a coarse sand associated with agates and the more valuable forms of quartz. They are generally in fairly perfect octahedral crystals ranging from one-fifth to three-fourths of a carat in weight. No large stones are found. The quality of the stones is good and the color generally pure white, though some have a yellow shade.⁷

Consul Thomas H. Norton, Chemnitz,⁸ reports that up to Dec. 31, 1908, about 40,000 carats of diamonds had been found, whose estimated value was \$269,000. It is the policy of the German Government to hold a monopoly over these diamond deposits and to regulate development in such a way as to assure proper protection of mining interests and to prevent uneconomic methods of exploitation. All of the diamonds are to be cut in Germany, and it is estimated that the wages paid for the work will amount to \$500,000 annually at the present rate of production of the field. The diamonds are to be taxed at such a rate that the miners will secure about one-half

Special Announcement to Large Diamond Buyers

THIS is to inform the trade that I have opened a factory and office for the cutting of diamonds at 120-126 Walker St. (junction of Canal St.), New York, under the management of Jos. Polak, formerly connected with S. L. Van Wezel. This cutting establishment has capacity for the employment of fifty diamond cutters and polishers, working on my own rough importations exclusively, is equipped with the most modern machinery and is now in full operation.

profit. Mining consists in simple sieving, sifting and picking out of diamonds. Almost no capital for machinery has been required so far as the work is done by natives with white overalls.

The extent of the diamond field is being found to be greater than at first thought. Diamonds are being found along the coast to the south about 150 miles from Luderitz Bay and 75 miles from Orange River.¹ That the deposits have been found from alluvial deposits is thought probable, and Orange River is pointed out as a possible original source.

SOUTH AMERICA.

Brazil.—The geology of the diamond-bearing lands of Bahia—Chapada Diamantina, as a portion of it is called—has been described by J. Branner.² This region lies northwest of Bahia to the south and southeast of Rio Sao Francisco. It is comparatively little known. Two railroads approach but do not penetrate this area, and travel must be accomplished with mules. The region is semi-arid and the climate hot, though the highlands. Much of the country is covered with mangrove forests, a tough, scrubby growth of timber. The country is fairly well watered along the streams, though subject to droughts away from the coast.

The following is an outline of the geology with probable ages of the formations: Along the coast to the north of the city of Bahia is a series of Cretaceous and Tertiary strata resting on pre-Cambrian schists, gneisses and granites. The latter extend from the sedimentaries along the coast inland to the highlands and form a nearly level plain with a few scattered hills and peaks over it. The Serra de Jacobina is the first mountain range in the highlands, and is composed of the conglomerates, shales, schists and quartzites of the Minas series, 1,000 meters thick, and of Cambrian age. The bedding of this series strikes nearly north with the range and dips steeply to the east and is vertical. The crystalline rocks also appear to the west of the Jacobina range. To the west of this is the great Tombador range, composed of 400 meters of nearly horizontal Cambrian sandstones and quartzites resting directly on the crystallines. The edges of these beds of the Tombador formation, which dip gently westward, form great walls or scarps on the east. The Tombador beds can be traced northward toward Rio Sao Francisco, where they cap the flat-topped mountains or form the monoclinical ridges of that region. Above the Tombador beds are the Jacupe flints, about 100 meters thick. Above these are 500 meters of the Caboclo formation, of Devonian age, composed of gray, red, yellow, black and cream-colored shales. The upper part of this formation is in contrast with the overlying false-bedded pinkish sandstones, conglomerates and quartzites of the Lavras series, of Carboniferous age. This series carries the diamonds and is about 700 meters thick. The Lavras series is overlain by 350 meters of red Triassic sandstones, very like the Triassic sandstones of New Jersey and Connecticut. These have been called the Estancia red beds. The last series exposed is the Salitre limestones and marbles, about 300 meters thick and of Jurassic age.

Diamonds and carbonados are found together in this region, and their mining constitutes an important industry of Bahia. The source of the diamonds and carbonados has been pretty definitely traced to the Lavras series, though Dr. Branner has never seen one in place in these rocks. The streams and river gravels have been found richest in diamonds where they flow through or over large areas of the Lavras beds. No eruptive rocks occur in the Lavras beds which could possibly give rise to all the diamonds and carbonados of the region. Areas of serpentine have been found in the crystalline rocks that underlie the sedimentary rocks. It is possible the diamonds originated in peridotite in these crystalline rocks, and were later washed out and deposited with the Lavras beds.

The most productive area has been that between Sincoro on the south and Morro do Chapeo on the north. Whether this is due to a particular richness of the beds in this area or to the favorable supply of water, or to both, is not known. Mining methods used have been crude, practically all work being done by hand. The possibilities of mechanical apparatus, especially dredges, should be tested. In the stream beds and places where the

natives have been able to work there is but little virgin gravel left. In swamp and marsh lands along the river not accessible to the natives it is probable rich deposits still exist and could be worked with dredges. Dredges must operate under difficulties in this region, however, as transportation facilities are poor and repair shops and factories a long way off.

British Guiana.—The exports of diamonds from British Guiana during the calendar year 1908 amounted to 4,968 carats,¹ valued at \$40,872, as against 2,220 carats, valued at \$17,550, in 1907. The shipments between Jan. 1 and May 12, 1909, amounted to 1,095 carats,² valued at \$7,350. A new deposit of diamonds was discovered near the Dukwarri Cataract, about 115 miles from the mouth of Cuyuna River.³ Two parcels of stones weighed 138 carats, showing that the diamonds of this deposit are small in size, as are those from the other deposits of British Guiana.

INDIA.

The production of diamonds in India during 1908 amounted to 140.75 carats, valued at £940,⁴ against 628 carats, valued at £2,784⁵ in 1907. These figures represent the production in the States of Panna, Charkhari and Ajaigarh, in central India. A few diamonds are reported found in the Anantapus district of the Anadras Presidency, though no statistics have been obtained.

AUSTRALIA.

New South Wales.⁶—The production of diamonds in New South Wales during 1907 amounted to 2,539 carats, valued at £2,056, a decrease of 288 carats in quantity and of £64 in value from 1906. The average size of the diamonds was small, though one fine white stone was found at Copeton that weighed 3¾ carats and was sold locally for £17. The greater part of the output came from the vicinity of Copeton, in the Tingha division.

The discovery of a volcanic breccia or agglomerate at Snodgrass, 20 miles west of Delegate, led to the prospecting for diamonds in that region. The rock resembles the diamond matrix in the pipes of the mines of South Africa and contains rounded eclogite lumps as in those mines. The rock occurs at the contact between granite and Silurian slates and sandstones. No diamonds have yet been found.

DIAMOND INDUSTRY.

The crisis which the diamond industry of the world recently faced is past and the conditions are fast becoming normal. With the exception of a five per cent. increase in the price of the rough diamonds from the Wesselton mine, the price of rough diamonds has remained practically stationary.⁷ The increase in price of high-grade rough diamonds is taken as an indication of a growing demand for these and a decided betterment of the industry. The value of the rough diamonds has fluctuated but little, although an increase in the price of polished stones⁸ of as much as 15 per cent. in three months is reported. Dispatches from the foreign diamond markets, as Amsterdam and Antwerp, report the presence of large American buyers as a good sign of a revival of the diamond trade.

The imports of diamonds and other precious stones into the United States has again returned to nearly the normal amounts, and is strong indication of the general betterment of industrial conditions. Nearly the usual number of diamond cutters have returned to work in the United States, and it is to be hoped that this industry will increase with the change effected in labor conditions.

Cullinan Diamond.—A noteworthy event in the diamond world during 1908 was the successful cutting and polishing of the great Cullinan diamond, and the presentation of the same to the King and Queen of England on Nov. 21.⁹ The diamond weighed about 3,025 carats and was cut

into 9 large stones and a number of smaller ones.¹ These gems were (1) a pendalogue or drop brilliant, weighing 516¼ carats, dimensions, 2.322 inches long and 1.791 inches broad; (2) a square brilliant, weighing 309 3/16 carats, 1.771 inches long by 1.594 inches broad; (3) a pendalogue, weighing 92 carats; (4) a square brilliant, weighing 62 carats; (5) a heart-shaped brilliant, weighing 18¾ carats; (6) a marquise brilliant, weighing 11¼ carats; (7) a marquise brilliant, weighing 8 9/16 carats; (8) a square brilliant, weighing 6¾ carats; (9) a pendalogue, weighing 4 7/32 carats; (10) 96 brilliants, weighing 7¾ carats; (11) a quantity of unpolished "ends" weighing 9 carats.

The first and second of these are larger than any cut diamond in the world. Even the Kohinoor diamond, weighing 102¾ carats, is less than half the size of the smaller one of the two large Cullinan stones. All the polished gems from the Cullinan are without flaw and of remarkable brilliancy and luster. In place of the normal 58 facets on a brilliant, the largest stone has 77 facets and the second 66 facets, which add greatly to the beauty of the gems.

Origin of Diamonds.—In a paper read before the Geological Society of South Africa,² F. W. Voit discusses the nature and origin of kimberlite and its relation to the diamonds found with it in South Africa. Dr. Voit prefers to call kimberlite an agglomerate rather than a breccia. From the abundance of pyroxene and other minerals besides olivine and a suspicion of the presence of feldspar in some cases, the rock is evidently not a peridotite, but might more appropriately be called porphyritic pyroxenite. In places it is difficult to determine whether a rock is kimberlite or diabase, and chemically there is a transition from the one to the other. In many places diamonds are found where it would be difficult to explain their presence otherwise than as having weathered out of the diabase beds forming the surface rocks on some of the plateau regions. The so-called boulders of eclogite found at some of the mines described by Dr. Bonney can very readily be explained as segregations in the magma or as inclusions with edges and corners dissolved off by the action of the kimberlite magma. The brecciation evident in portions of the kimberlite bodies could readily have taken place during the extensive serpentinization the latter have undergone with consequent large increase of volume by hydration. The same agency may have caused the breaking of some of the diamonds, though this phenomenon is also readily explained in other ways.

EPIDOTE.

J. D. Endicott, of Canon City, Colo., has had a quantity of compact epidote cut "en cabochon" with pleasing results, for use in scarf-pins, cuff buttons, etc. This epidote is found in the unconsolidated drift material two miles south of Canon City. The drift has been deposited in terraces and beds over former table-lands and slopes south of Arkansas River. The epidote is found as pebbles associated with cobbles and pebbles of granite, quartz porphyry, trap, pegmatite, cyanite rock, jasper, chert, iron ores, chalcodite, quartz, etc. Pebbles of granite and diorite have a similar variety of epidote in streaks and irregular patches through them, indicating the probable source of the gem material. Only the very fine-grained compact variety of epidote furnishes good gems. The greater part is too coarse-grained and brittle for cutting. The colors range from light pistache or yellowish green to dark olive-green. Occasionally a bright-red patch of jasper is included in the epidote, giving somewhat the effect of bloodstone. The epidote is hard, and if sufficiently compact takes a beautiful polish. It has found favor in the local markets in Colorado and should be received elsewhere.

Pennsylvania Jewelers Take Stand Against Jobbers Selling at Retail.

PHILADELPHIA, Pa., Oct. 2.—The following letter has been sent to-day to the jobbers and wholesalers throughout this city by the State of Pennsylvania by the Executive Committee of the Pennsylvania Retail Jewelers' Association, which is composed of J. P. Archibald, H. F. Seltzer and Charles H. Hambly. It is signed by them and by the president of the association, Ira Garman:

PHILADELPHIA, Oct. 2, 1909.
Gentlemen—At a meeting of the Pennsylvania Retail Jewelers' Association held recently, among other matters discussed, the subject of retailing jobbers was brought up, and the consensus of opinion was that this is one of the greatest abuses existing to-day in the jewelry trade. The matter was referred to the executive committee, which was instructed to communicate with the jobbers of our State asking them to discontinue the present practice of retailing and to confine their business in future to the legitimate retail jeweler.

Jobbers must have the support and trade of the retail jeweler or they cannot exist; consequently, they endeavor to sell the retailers as much of their stock as they will buy. Considering their attitude in this direction, they are inconsistent in their treatment of the retail jeweler. Retailers generally concede the right of the jobbers to exist, and firmly believe their interests are best served by the manufacturer, jobber and retailer each confining his efforts to the proper field.

Through association work the jewelers outside of our city are becoming familiar with the fact that they can do more or less retailing. They do not approve of it, and if this practice is continued it is going to mean that those jobbers who come forward and state to the legitimate retail jeweler that in future they will positively sell no goods except to them will have the patronage of the jewelers throughout our entire State. In conformity with our instructions, we beg to submit this request for your thoughtful consideration, with the hope you will recognize the justice of it and will co-operate with us to the end that the rights and interests of each be recognized and preserved.

We would thank you to give this matter your immediate attention, and let us have your reply at your earliest possible convenience, that we may make our report to the association at our next meeting. Very cordially yours,
The Executive Committee of the Pennsylvania Retail Jewelers' Association.
(Signed) IRA D. GARMAN, President.

Receiver Appointed for William Feintuch, Providence, in Bankruptcy Proceedings Begun by Creditors.

PROVIDENCE, R. I., Oct. 2.—Creditors have petitioned the United States District Court for the district of Rhode Island for an adjudication of William Feintuch, doing a manufacturing jewelry business as William Feintuch & Co., as a bankrupt. Judge Arthur L. Brown has cited Feintuch to appear and show cause why he should not be adjudged a bankrupt and has appointed Edward H. Ziegler as temporary receiver.

Mr. Feintuch has been conducting business at 234 Chestnut St. The petitioning creditors are all of this city and include Amelia Feintuch, who claims to be a creditor for \$800, and Charles Silverman and Bertha Esser, creditors each for small amounts. Concealment of property with intent to hinder, delay and defraud creditors is alleged in the petition.

It is understood that when the United States marshal visited Mr. Feintuch's place of business he was unable to locate Mr. Feintuch, who, it was stated, had left the city for parts unknown. An attachment has

also been made on the plant by Edward D. Bassett, who holds a note against Feintuch for \$1,800.

President of Amsterdam Diamond Co., Buffalo, N. Y., Charged with Conducting a Lottery.

BUFFALO, N. Y., Oct. 4.—Joseph H. Miller, of 587 Ashland Ave., president of the Amsterdam Diamond Co., is under arrest here. He is charged with using the mails for fraudulent purposes and running a lottery. Miller has offices in the Palace Arcade. The arrest was made by United States Marshal Doty, of Buffalo.

It is said that the Amsterdam concern issued contracts in which it was stipulated that it would furnish diamonds after the contracts were paid in full, or the purchaser could have the choice of receiving annual dividends of the concern. United States Attorney O'Brian, of Buffalo, who is prosecuting the case, alleges that the company for a time lived up to the contract, but failed to do so after business decreased. Mr. O'Brian claims that the concern took in more than \$500,000, but he does not know how much was paid out. The advertisements of the company, which has been in Buffalo for the past four years, were answered by thousands of persons. It is said that all of the business was carried on outside of New York State.

Mr. Miller pleaded not guilty when arraigned before United States Commissioner Keating. His attorney is Charles M. Harrington. Assistant United States Attorney James O. Moore represented the Government at the hearing. The defendant, who is out on \$4,000 bail, will have a hearing on Oct. 18. Postal Inspector Griggs has been working on the case for some time.

Negro Accused of Substituting Cheap Ring for Valuable Jewel, Sent to Prison for Six Months.

A colored man, who is known to the police in this city as Francis Rolland, whose portrait is No. 3645 in the Rogues' Gallery, was sentenced to six months on Blackwell's Island by Judge Mayo, in the Court of Special Sessions, New York, Friday. Last week the man went to the store of Wm. H. Enhaus & Son, 31 John St., New York, and while there was detected in trying to substitute a cheap imitation ring containing a red stone for a ring valued at about \$18.

The man first called at the store and selected a stone which he desired to have mounted. He later returned, and while waiting for the work to be done asked to be shown a tray of rings. Behind the counter at which the man was examining the rings is the watchmaker's bench, on which is a mirror. As the customer was examining the rings the watchmaker followed his movements in the glass and noted that he substituted for one of the rings a cheap imitation. Detective-Lieutenants Monahan and Summers were summoned and the ring was found in the man's possession. He was taken to police headquarters and held in \$500 bail for trial in Special Sessions, Friday. He said his name is Herbert Hechman, 25 years old and a native of France. The police records show that he had previously served a prison term at one time as an inmate of the House of Refuge.

In view of the fact that the prisoner is now serving only six months, it behooves the jewelry trade to keep him in mind and beware of future visits. The man is described as being of medium height, having the appearance of a Mexican negro, with dark hair and dark eyes.

New Jersey Retail Jewelers' Association Holds Its Semi-Annual Meeting at Trenton.

TRENTON, N. J., Oct. 1.—The New Jersey Retail Jewelers' Association held its initial meeting, since the organization of the society six months ago, last Wednesday evening at the Trenton House, this city. Several new members were elected to the association and other business transacted. This meeting being a semi-annual gathering, a large part of the business of the association was left until the annual meeting, which will be held April 13, 1910.

A discussion of plans for the annual meeting was a feature of the session, at which Frederick Rowe presided.

The officers of the association are: President, Frederick Rowe; first vice-president, H. L. Rickey; second vice-president, John Harris; third vice-president, Otto Raggenkamp, of Elizabeth; fourth vice-president, Louis Phliger; treasurer, I. D. Lyon, of Morristown; secretary, George E. Fort.

A recent dispatch from London, England, stated that negotiations were recently concluded whereby a European syndicate takes control of the 16 best gem mines in Ceylon, the objects being to make a market for the gems and bring them to a proper standard and market value. The mines up to the present have been under the management of natives.

WE INVITE COMPARISON

Consider all the points that go to make up a perfect **Scientific Stone** and let your sound judgment pick the best that's offered.

There is a difference.

Long continued experiments on Scientific Stones have brought results, giving our products the distinction which we take pride in pointing out.

It is the absolute purity of the material, its closest approach to the natural gem that, in combination with the highest skill of the cutter, yields the fine quality we claim for **OUR SCIENTIFIC PRODUCTS**—their **UNIFORMITY** of shade and form, **CORRECTNESS** of size and **BRILLIANCY** of finish.

In building up the reputation our Scientific Stones enjoy throughout the country we were guided by a policy aiming to produce an article that would become popular, not by reason of its cheapness, but on account of its intrinsic qualities. Hence—**THE SUPERIORITY OF OUR SCIENTIFIC STONES.**

**Jewelers of Boston, Mass., Suffer Many
During Robberies—Thieves Escape.**

BOSTON, Mass., Oct. 1.—The police have been in a crusade against the snatch thieves who seem to have selected South End and Roxbury jewelry stores as their particular objects of plunder. Within a fortnight four robberies have been reported, and in two of these arrests have been made.

It has already been told in this correspondence how a tray of rings was stolen from the store of Lazarus Davis, 1247 Mount St., Roxbury, Sept. 21, by two young men. The police arrested James Greeley, 21 years old, giving his address as 14 Newton St., charged with assault on the person unknown.

Last Sunday morning, when Greeley had been taken into custody, the police got the information that Greeley was concerned in the robbery at Davis' store and sent for Mr. Davis to see if he could identify him. Mr. Davis declined, and, according to the police, said that Greeley was one of the men.

Greeley's case was continued for trial.

While Mr. Davis was at Station 10 a word came to the police that somebody had broken the window of Mr. Davis' store and was removing articles. A squad of policemen started on the run and soon reached the Davis store, which is but a short distance from the police station. There they found a young man who gave the name of Francis Kenney and his age 23 years. Kenney would not say where he lived. He was taken into court next day and bound over for the Grand Jury on a charge of breaking and entering.

About 3 P. M., Wednesday, two men entered the store of Abraham Lewis, 1915 Washington St., Roxbury, and requested the proprietor to show them some rings. No sooner had Mr. Lewis set before them a tray containing 36 rings and valued at \$60 than one of the two grabbed it and ran, closely followed by his companion. Lewis gave chase, shouting "Stop thief!" The street was crowded at the time, and before the much-surprised passers-by realized what was happening the thieves managed to make their escape with all of the rings.

According to the description given the police, one of the men was about 18 years old, five feet seven inches tall, weight about 20 pounds, smooth face, and wore dark clothes and a derby hat. The other was about 19 years old, five feet four inches tall, light complexion, and wore a blue suit and blue cap.

The fourth robbery occurred to-day. About 2 o'clock two men walked into the jewelry store of Bernard Kuhn, 284 Tremont St., corner of Hollis St., South End. Mr. Kuhn tells the circumstances as follows:

"These two asked to see some rings. I took out a tray of signet rings, which they examined carefully for a moment. Then one of the men went to the door and called a third and older man, who, after examining the rings, requested that I should show them some more.

"I had hardly turned to the case to get a second tray before the oldest man grabbed the first tray and dashed for the street. In his haste he upset the tray. It contained 24 rings, all but six being thrown to the floor. I ran to the door and shouted "Stop

thief!" but the three men dashed up Tremont St. to the corner of Pleasant St. and were soon out of my sight. Any of the 100 or more spectators could have stopped the thieves, but they made no effort to do so.

"I gathered from the floor 18 of the rings that had fallen out and figured up my loss as about \$18, as the rings were not expensive."

The oldest of the three men appeared to be the leader. He is 30 years old, weighs about 130 pounds and stands five feet five inches. His face is brown from exposure and he has light hair and a fair complexion.

The youngest of the trio is about 17 years old, weighs not more than 100 pounds and is about four feet six inches in height. The third man is about 25 years old, weighs about 130 pounds, and is five feet four inches in height. All three were dressed in shabby suits of gray material.

Despite the discrepancies in the descriptions furnished them, the police are of the opinion that the same men committed the thefts at Lewis' and Kuhn's.

Death of Jesse L. Browne.

PHILADELPHIA, Pa., Oct. 1.—The jewelry trade in this city and throughout the south learned with deep regret, last week, of the sudden death of Jesse L. Browne, southern representative for M. Sickles & Sons, who, as briefly noted in the last issue of THE JEWELERS' CIRCULAR—WEEKLY, died at his home in Richmond, Va., Sunday, Sept. 26, of blood poisoning. Mr. Browne's death was a severe shock to his many friends, who had always regarded him as having a robust constitution.

Mr. Browne had long been connected with the trade; he was the representative for several years of Henry Freund & Bro., New York, later engaging in business for himself. After some years he accepted a position with M. Sickles & Sons, identifying himself with the southern territory, a position he retained until the time of his death.

Deceased was highly esteemed by all with whom he came in contact. He was 31 years of age and is survived by his widow.

A negro was arrested recently, after a chase, accused of entering the store of C. A. Wolf, Topeka, Kan., and stealing \$500 worth of stock. Entrance to the store was gained through a window in the rear of the building.

**Involuntary Petition in Bankruptcy
Filed Against E. A. Niehaus.**

ST. LOUIS, Mo., Oct. 4.—An involuntary petition for adjudication in bankruptcy was filed in the United States District Court by Grant, Carroll & Kennedy, attorneys for the Eisenstadt Mfg. Co., the St. Louis Clock & Silverware Co. and Heintz Bros., Buffalo, N. Y., against Ernst A. Niehaus, 2026 Franklin Ave. An order to show cause was made and a subpoena was issued, made returnable Oct. 13. The subpoena was served and the marshal's return of service filed. The Eisenstadt company filed suit against Mr. Niehaus two weeks ago for \$315.03, alleged to be due on notes and account.

Mr. Niehaus has been in business for himself about five years. Before that he was associated with his brother Frank, on Market St. Frank obtained a divorce from his wife, who afterward was married to Ernst. The latter is a nephew of F. H. Niehaus, Sr., of 1302 Franklin Ave., the oldest St. Louis jeweler.

Mr. Niehaus was well regarded for his ability and industry, and his principal difficulty has been lack of capital.

**Morris Siegel, East St. Louis, Ill., Files
Voluntary Petition in Bankruptcy.**

ST. LOUIS, Mo., Oct. 4.—Local creditors of Morris Siegel, East St. Louis, have been notified by Walter J. Grant, referee in bankruptcy, that Sept. 23, in the District Court of the United States for the Eastern District of Illinois, Mr. Siegel was adjudicated bankrupt. The first meeting of his creditors was scheduled to be held in the office of Referee Grant, at his office in the Plaut building, Danville, Ill., Oct. 5.

A few months ago Mr. Siegel proposed to his creditors a settlement on the basis of 25 per cent. cash and 15 per cent. out of collections. The creditors agreed to this. The 25 per cent. was paid, but not the 15 per cent. The bankruptcy adjudication is due to a voluntary petition filed by Mr. Siegel.

**Prosperous Condition of the Jagersfontein
Diamond Co. Due to Present
Market.**

A special cable dispatch from Kimberley, Sept. 29, stated that the chairman of the Jagersfontein Diamond Co., presiding at a meeting that day, congratulated the shareholders on the improvement in the market. He said the demand had grown again to its former extent and was likely to continue. The improvement had been specially noticeable, he said, since July.

The De Beers and Jagersfontein companies, which had exhausted their monetary reserves to prevent a crisis, have now recovered their financial equilibrium, and would be able to increase their mining operations by the end of 1909, said the speaker.

The United States Sixth Circuit Court of Appeals recently decided a case involving the infringement of a trade-mark in which the court held the title to both parties to the suit to be defective at the time of its origin by reason of the fact that the marks involved were infringements upon a previous mark of another company which had been abandoned by the original owner.

Reigning Jewelry Fashions Noted in Paris.

Dainty Novelties in Gold, Silver, Gems and Watches Now in Demand Among the People of Taste in France's Capital.

PARIS, Sept. 26.—With the increased popularity of the tailored suit the jewelers are endeavoring to produce styles suitable for wear with mannish garments. Hence the "lappel watch," severely plain, and so arranged that it may be pinned to the lappel reverses of a coat and always in evidence.

It has replaced the utilitarian bracelet and the watch once deemed the inseparable companion of the shopper or tourist or automobilist. The lappel watch is of brushed gold or gun metal and sometimes, it rarely, enamel-rimmed. It is a compact little affair, about as large as half a dollar and of thick convex form, the dial being set in the center and very small. To those of short sight the numerals are an objection. The dial is set up high from the base, which is at least an inch in thickness. These little affairs are compact and lacking in the fancy attributes of the ordinary feminine timepiece. They are firmly attached to the coat with a pin, and there is less likelihood of loss than with the watch secured by a fancy brooch or a chain liable to catch when descending from an automobile or railroad carriage.

There are day pendants, dubbed "neglige" pendants, which also have a certain affinity for the plain tailored suit. These are usually fashioned of tarnished gold or blackened silver and set with dull stones, such as amazonite, lapis, jade, the precious quartzes, with also *cabochons* of amethysts, baroque pearls or turquoise matrix, the latter often engraved with a sentence from the Koran. Ancient mummy beads and necklaces are faithfully reproduced, and look well with coat and skirt suits. The mannish girl fastens her collar with gold or stone-studded links her cuffs submitting also to the masculine idea. Cuff and collar buttons in enamel, imitating striped percale, are stylish. When the tailored blouse is of linen or percale the studs match the collar and cuff links. The pendant suspended by a gold or silver chain is heavy and substantial. Sometimes the *sautoir* is replaced by a half-inch black moire ribbon adorned at intervals with ornaments of gold or silver. Women of sporting proclivities have also arrogated to themselves the old-time ribbon fob or one composed of wide chain links, to which is attached an antique cornelian or bloodstone intaglio or a finely graven cameo. For such ornaments some cabalistic charm is often substituted, or the horsy woman affects a golden harness buckle and pendant stirrups on the broad moire ribbon fob, which is attached by a golden hook to the belt.

Some of the best model makers are employing ornaments of moyen-age fashion on dress corsages. These are usually composed of gilt and imitation gems, but would be most effective in semi-precious stones and old silver in perforated antique designs or in tarnished gold. There are round and oblong plaques, almost assuming the proportions of a breastplate; also very ornate medieval girdles hugging the waist-line and of metal and gems. There are entire bodice

trimmings consisting of a fine gold network with, at each intersection, a dazzling simili gem. Showy clasps hold sashes and draperies, reproduced from old Roman, Etruscan and Byzantine forms. This craze of the moment might open a vast field to the artistic jeweler.

The elbow sleeve, again coming to the front, is another boon to the workers in the precious metals, as with them the bracelet is once more in evidence. Most of them are of delicate workmanship, sometimes a mere thread of brilliants or colored stones from three to five worn together, while others consist of oblong plaques of enamel or golden links set with stones, among which the semi-precious varieties are in favor.

As the hair is worn low, classic jeweled bands hold the bandeaux in place. An ornament consisting of two bands an inch and a half wide of purposely rude workmanship is of open-work gold wire set with sunken dull emeralds. There is an ornament just over the forehead and one at each ear, consisting of a lustreless emerald plaque set in dead gold. It was signed Lalique.

The barrette has undergone a change, and is now of large proportions. It is of pierced metal gem-studded, or of real or imitation tortoise-shell as long as the hand and three inches wide. It holds the low Greek coil in place, or is secured beneath the *chichis* or puffs. Combs come to match and are rather wide than high.

There is a fast developing taste for Oriental jewels in large and showy designs, whose colorings harmonize so admirably with the rich Persian and Chinese embroideries into which turquoise beads are often introduced. There are golden plaques, very large and flat and picked out in semi-precious stones, embodying a verse from some sacred book. They are also of triangular shape set with a great boss of carnelian, chrysochryse, turquoise or opal matrix surrounded with dull gold. There are bracelets and rings of gold or silver, amulets for luck-bringing, also of rich red amber. Great oval beads of clouded amber separated by smaller ones of jade or turquoise. Cabalistic rings of slender gold wire, set with a pear-shaped gold-graven turquoise. There are also barbaric necklaces consisting of many looped chains in varying lengths, studded with dull *cabochons* and coral and which fall from neck to waist. A new style of ring is a narrow golden hoop, each end standing curved and upright and enclosing a great opal or pearl.

Long pear-shaped pearl earrings, perfectly matched as to size, consist of one black and one dazzlingly white pearl, pendant from solitaire diamonds. This is rather a bizarre fancy, noticed lately in the ears of a Russian princess.

Animal and insect shapes abound, a pretty corsage brooch revealing a bat with outspread wings in platinum, the veins emphasized by tiny brilliants. A cat's head was of black enamel diamond-incrusted, with nose and tongue of pale rose coral and ruby

eyes. A greyhound as long as one's finger had a blanket of rich blue enamel jewel-incrusted. A butterfly in rubies and pearls was set on the top of a golden diadem.

Very attractive is a not too small watch of the clearest *cristal de roche* the convex plaques enclosed in a delicately etched rim of gold. Through the transparent material can be seen the movements.

Many of the ancient watches of the picturesque Louis XV. period are reproduced. One seen in the window of a well known jeweler of the rue de la Paix was quite large and enameled with a *genre scene*, a beauty in hoops and farthingale. The chatelaine was as long as the hand and consisted of circular disks, each with a painted head. It is probable that with the impulse toward the modes of the Louis XV and XVI periods, that watches of this fashion will return to favor, for they would fittingly complete a toilet suggestive of that century.

Moss agate is coming into fashion, made up in the form of rather small brooches with pink or pale gray backgrounds, the mossy markings looking like a delicate gray etching. They are plainly mounted and look well as Dutch collar pins.

Modern but extremely artistic is a corsage ornament as long as the hand in the form of a yellow lily in opaque enamel rising from a pale green calyx, while the indentations of the petals were outlined with tiny brilliants. A bud was formed of a large baroque pearl, the sunken parts diamond-besprinkled, while the long ribbon-like leaves were of pale green enamel. Gray enamel picked out in a design with small diamonds is one of the color fancies of the moment. Designs for pendants are also carried out in other colors, the links of the neck chain of the same hue. There are plaques in triangular half circles or crescent shapes, copied from old Greek designs and materialized in brilliant-toned, translucent enamels or in flambé colors, often with some classic head or figure. A new idea in a necklace shows a flat chain of platinum in Greek key pattern reaching to each side of the neck, and met by several strands of twisted seed pearls. The unobtrusive pendant was of diamonds in a floral device.

The craze for matching is illustrated in men's scarf pins, men of fashion carefully assorting their scarf pins to their neckties. The vast choice in inexpensive fancy stones, precious quartzes and enamels makes this possible without an inordinate outlay of money. However, a quaintly-shaped baroque pearl may be safely worn with every color, and obviates an assortment of tie pins. Frenchmen are affecting pins of flat, pierced gold, illustrating one of La Fontaine's or Æsop's fables, while others prefer the quaint Benjamin Rabier comic animals for the same usage.

Canes are most elaborate, entire ones of translucent rhinoceros hide, while others show Egyptian heads of carven or engraved silver or gilded crooks.

Animals, mostly elephants, cats and rabbits, are of carved ivory, rock-crystal, crocodolite, sardonyx or jade, and hang pendant from a gentleman's fob. Gamahe talismans are curious; these stones are found in some parts of France, and are considered to possess talismanic virtues. On the surface are natural designs in the shape

animals, human faces and flowers, looking as if etched.

White aquamarines are much employed by the jewelers, an example shown being an enormous stone as limpid and almost as brilliant as a diamond, cut like a brilliant and enclosed in a platinum setting. Effective is a string of pearls separated by oblong diamond barettes.

There is every device for the automobile, among the most recent a useful folding table of mahogany, the slender legs folding beneath the body. It is provided with the necessary toilet utensils of plated silver or aluminum and can be set up when the auto is at a standstill. An afternoon tea table also of mahogany furnished with everything necessary for the compounding of the select beverage. On the top are ranged the silver tea and coffee pot, with sugar bowl and cream jug; also four tiny glasses for liqueur. On the bottom shelf are the egg-shell, tea and coffee cups, the spoons of quaint Georgian pattern, with also a silver lemon-squeezer and a squat bottle for rum. Vases of brilliant *Gré Flambe* are much liked, imparting a bright note of color in an apartment. They are etched in forest scenes in shadowy black effects, also in Oriental designs, with palm trees and camels and Arabs with floating burnous. Another device for holding flowers is a big white elephant of porcelain supporting on its broad back a square basket, the top provided with a gilt wire network, into which the blossoms are stuck.

Convenient for lovers of good coffee are silver drippers to be placed on the table, the coffee percolating in the cup beneath, so that each person has a freshly made cup of coffee. There are individual teacup stands of silver, containing a cup and saucer and a small rum or cognac glass.

A superb toilet set shows a mirror framed in mother-of-pearl and gilt with gilded pillars for supports. A couple of drawers beneath are of pearl and contain trifles, such as gloves, kerchiefs and laces. To match is a puff box, glove and handkerchief boxes, perfume stands and other accessories in iridescent pearl in hexagon shape with gold mounts. Another idea shows a gilded fence, in the center the crystal etched powder receptacle, while grouped about it are glass perfume bottles, each securely held by the fence.

Curious are fetiches consisting of an elephant in jade, with carven and jeweled housings of gold or silver swinging by a large jade ring depending from a silver chain. They may be worn as ornaments or, if preferred, can be encased in a small, upright, satin-lined receptacle of morocco.

Menus and name card holders are of gilt or silver with a dog, cat or rabbit, back of which the card is placed. These figures are *en silhouette*.

COUNTESS DE MONTAIGU.

George Chandler, Lewiston, Me., has purchased the business of O. F. Hall, at that place.

Wm. J. Eisenhardt, owner of the Florence Silver Plate Co., 530 N. Gay St., Baltimore, Md., has purchased the lot at 110 W. Lombard St., which has a frontage of 27 feet and a depth of 80 feet. It is understood that a building will be erected there, to be used as a warehouse.

Members of the Florida State Optical Society Meet at Jacksonville.

JACKSONVILLE, Fla., Sept. 29. An interesting address was delivered by President D. M. Boney, of the Florida State Optical Society, before that body in convention at the Windsor Hotel, this city. In this address Dr. Boney congratulated the public generally upon the enactment of legislation that will put the optical faker to rout, and called upon the people to aid the society in its important work in this regard.

Following are the names of some of the opticians who attended: H. E. Lough, Tampa; R. Goldstein, Tampa; G. W. Stokes, Jacksonville; R. T. Radford, Lake City; W. M. Marcus, Jacksonville; O. W. Maynard, Miami; Major J. Gumbinger, Jacksonville; E. W. Frazee, Arcadia; B. M. Moody, Lake City; L. C. Coles, Gainesville; Dr. D. M. Boney, Ocala; N. H. Clark, Daytona; T. G. Yates, Pensacola; B. S. Rowell, Live Oak; M. R. Campbell, Key West; P. G. White, Kissimee, and others.

Many applications were made to the examining board, of which Dr. Boney is president and Dr. Lough secretary and treasurer, for licenses to practice in Florida. The diplomas of reputable colleges are being recognized, but others are forced to stand a rigid examination. As a result quite a number will undoubtedly be refused licenses.

The society, it is understood, is considering the advisability of prosecuting quite a number of men who have been engaged in selling spectacles when they held no diplomas and were in no wise equipped for the difficult work of fitting glasses.

At to-day's session many subjects will come before the society. It is likely that the uncompleted business will be finished with the next meeting place fixed and the odds and ends closed up for the year.

This year there will be no election of officers, they remaining the same as last year.

Death of William James Eddy.

FRANKLIN, N. H., Sept. 29.—William James Eddy died at his home on Franklin St. yesterday of tuberculosis, following an illness of seven years. He was born in Enfield, the son of the late James O. Eddy and Christiana (Smith) Eddy. He was 44 years old, and had made Franklin his home for more than 40 years.

Deceased was a jeweler and optician, and had had stores in West Burke, Vt.; Bradford, Vt., and Woodsville. He belonged to the Odd Fellows at Bradford and the New England Order of Protection at North Adams, Mass.

Mr. Eddy leaves a widow and one brother, Charles L. Eddy, of Franklin. The funeral will take place to-morrow afternoon at 2 o'clock at the house.

J. C. Hadler, Wichita, Kans., has purchased the store of W. Howe, 110 E. Douglas Ave., in the same place. Mr. Hadler now conducts two stores in Wichita.

A. Lepper, Berkley, Cal., deported to the police that while he was in the rear of his store one morning about a week ago, some one entered and made off with five cheap watches which had been displayed in his show window. Thus far no clue has been obtained of the thief.

F. A. Ward has opened a store at Newman, Cal.

C. H. Hartman recently opened a store at Hanover, Pa.

J. E. White has opened a repairing establishment in Shreveport, La.

J. J. Skaug has opened a store at 428 Central Ave., Minneapolis, Minn.

I. G. Dillon has opened an office at 505 Chestnut St., Philadelphia, Pa.

Arthur Gleason is making arrangements to open a store in Newaygo, Mich.

A new retail store was recently opened by Farr & Smith, at Turlock, Cal.

J. Newstate has begun business on Woodburn Ave., Walnut Hills, Cincinnati, O.

J. T. Clarke has started in the enameling business at 77 Page St., Providence, R. I.

George Johantgen will shortly commence business at 36 S. 5th St., Minneapolis, Minn.

L. P. Sandberg is a new jeweler in Minneapolis, Minn. The store is located at 2706 E. 25th St.

Chas. W. Penn has opened a store in Centuria, Mo. Mr. Penn was for several years with Geo. A. Young, Moberly, Mo.

E. E. Fite, formerly watchmaker for F. E. Lenhart, Pomona, Cal., has engaged in business on his own account at that place.

The Royal Jewelry & Optical Co. is the name of a new concern at 302 Fulton St., Peoria, Ill. Herbert Greenhood is manager.

Hamilton J. Sapp recently began in business in Eastman, Ga. He will carry a complete line of jewelry, clocks, silverware, etc.

J. D. Martin will shortly open a jewelry store at Sylvester, Ga. Mr. Martin was formerly connected with the Martin-Miller Co.

F. W. Ruggles has engaged in the jewelry business in the Jewelers' building, Boston, Mass. He was formerly with Robbins, Appleton & Co.

Bishop Bros. have started in the manufacturing jewelry business at 151 Pine St., Providence, R. I., and will make a general line of electroplated ware.

The Buffalo Lens Co. has been incorporated with a capital stock of \$5,000 at Buffalo, N. Y. The incorporators are: Herman and Helena Silbert, Buffalo, and I. Q. Vetter, Rochester, N. Y.

The Standard Jewelry Enamel Co. is the name of a new concern in South Windsor, Conn. The firm will do a general wholesale and retail jewelry and novelty business. The incorporators are: R. M. Grant, L. L. Brewer and J. J. Quinn.

The Western Optical Co., of Salt Lake City, Utah, has filed articles of incorporation with a capital of \$10,000. The officers are: President, H. O. Jenson; vice-president, A. G. Gowans; secretary and treasurer, C. R. Murchison. The business will be managed by C. W. Fehr.

Special Order Work

Special order work is profitable if proper material is at hand to carry out the ideas and wishes of critical customers.

In addition to our large stock of American and European cut precious and so-called semi-precious stones, we carry an assortment of rough gems from which we can readily cut odd sizes and shapes and so fill practically almost any order.

The ownership of American gem mines and a large modern lapidary shop place us in a unique position to serve the trade.

Upon request we will send a list of the stones we cut and carry in stock.

Handsome Ostensorium Made by a Baltimore Firm.

THE cut reproduced herewith is that of a very beautiful ostensorium just completed by Jenkins & Jenkins, Baltimore, Md., which has been on exhibition in their show windows. It is one of the most carefully

figure and the rays being as elaborately finished as the front.

The ostensorium, which measures 30 inches from the top of the cross to the bottom of the base, is for the convent at Emmitsburg, and is to be presented by a prominent woman of Baltimore, who will not divulge her name, in the memory of

Importations of Swiss Watches Being Held Up Until They Are Marked in Conformity with the New Tariff Laws.

Two consignments of Swiss watches which are not marked in conformity with the provisions of the new tariff act were held up, yesterday, by customs officials. This is only one of a number of cases of omission of the proper markings on watches and watch movements which have been reported by the Appraiser to the Collector. In one case the importer decided to export the goods rather than have them marked here. Another importer arranged to have an engraver in this city put the necessary inscription on the movements. In another case no action had been taken up to yesterday morning, but it was expected that some arrangement would be reached during the day.

The new Payne-Aldrich act provides that all watch and clock dials, whether attached to movements or not, shall have indelibly painted or printed thereon the country of origin, and that all watch movements shall have the name of the manufacturer and country of manufacture cut, engraved or die-sunk conspicuously and indelibly on the plate of the movement and inside the case, respectively. The law also provides that the movement shall also have marked the number of jewels and adjustments, said number to be expressed both in words and in Arabic numerals. This rule is imperative, and the Government officials must enforce it according to the reading.

Shipments of watch movements which did not conform with the law have arrived since Sept. 2. The first consignment did not meet the requirements, and rather than have the markings made here the goods were exported.

In another case a Swiss manufacturer sent by mistake some watch movements to a New York firm which, on examination, it was found were made before the passage of the new act. These goods were turned over to a Maiden Lane engraver to be properly marked.

It was said at the Customs House that importations of Swiss watches and movements would be allowed to enter this country if properly marked after being received here. It is said, however, that it is much more expensive to have the marking done here than it would be to have it done in the factory abroad, and in the case of cheap watches the expense of marking them here is too much to make it worth while to keep them.

One shipment which is being held up bears the trade mark of an American firm on the dial. Before this lot is admitted it was said that the importer will be obliged to have the word "Swiss" painted on the dial and engraved on the movements the name of the manufacturer and the number of jewels and adjustments.

Mrs. C. M. Vosbury will continue the business of the late E. D. Vosbury at 20 Court St., Binghamton, N. Y., under the old name. An auction sale was conducted in the last month and the old stock sold out. Fred P. Carter, the manager, is in New York this week buying new stock.

HANDSOME OSTENSORIUM MADE BY A BALTIMORE, MD., FIRM.

executed pieces designed and made by that firm for some time, taking three months, and cost, exclusive of the 27 large diamonds, \$1,500.

Both the pedestal and figure are solid cast silver, while the emblematic designs on the pedestal are in gold, consisting of the cross, wheat, pelican, lamb and the sacred heart and the cluster of grapes. The rays above the figure are 15 inches across and surround a circle of wheat heads, grapes and leaves, all in gold. The 27 large diamonds surround the host in the center. The figure standing on the pedestal is that of St. Michael, with sword and shield delicately chased. An unusual feature is the workmanship in the back, both the wings of the

her sister. Besides the ostensorium, Jenkins & Jenkins have made six ciboriums for the same customer, to be given to churches as memorials.

J. Hyman, formerly a member of the firm of Hyman & Seligman, retail jewelers, Syracuse, N. Y., has sold out his interest in the firm and will start in the jobbing business in this city, Jan. 1, 1910. The new firm name of the concern with which Mr. Hyman was connected is Seligman & Katz. Mr. Seligman is a brother of the late Paul Seligman, and will continue the business as partner with Mr. Katz, who has taken Mr. Hyman's share in the business of the concern.

TRADE CONDITIONS.

Business continues to show improvement and manufacturers, with few exceptions, report good orders daily. Many of the salesmen leaving for trips through the west and mid-west of a busy Fall are increasing. Several manufacturing plants have commenced to run even and others are expected to follow suit in a short time. Calls for experienced help are prominent and the want columns of the daily papers and good workmen are idle. Collections are reported as being fairly prompt and on the whole the situation is satisfactory.

George M. Baker was in New York, last week.

I. Clarke has started in the enamel business at 77 Page St.

Mr. and Mrs. A. T. Wall left Sunday for a week's stay in New York.

Mr. and Mrs. Edward D. Wilcox and family have returned from Barbour's rights.

Mr. and Mrs. William P. Otis and family returned last Friday from a Summer's stay at River View.

Frank W. Bloomer was a visitor in New York the past week, combining business with pleasure.

Mr. and Mrs. Henry A. Kirby moved last week, from their Summer home at Warwick Neck.

Mr. and Mrs. I. W. Lederer have been visiting in New York during the Hudson-Fulton celebration.

J. Parker Ford, of Ford & Carpenter, of this city, was a visitor to the trade in New York the past week.

George A. Scheutz was in the Ohio Valley the past week in the interest of the How & Westcott Co.

G. S. Melville is meeting with good success in showing D. Wilcox & Co.'s line through the middle west.

W. R. Barber, of this city, assignor to George W. Dover, has been granted a patent on an envelope opener.

Harris Fellman, Woonsocket, visited New York, last week, where he witnessed the Hudson-Fulton celebration.

W. G. Ellis, with P. W. Ellis & Co., Toronto, was a caller upon the manufacturers in this vicinity the past week.

Englehart C. Ostby and daughter, Miss Helen Ostby, are on an automobile trip to Saratoga and Lake Champlain.

George Southwick has returned from a successful trip to the Pacific Coast for Payson & Kelley Co., of this city.

Fales & Co., stone setters, are now located at 119 Pine St., where they make a specialty of repairing antique jewelry.

The Tilden-Thurber Co. is receiving some good orders from Chester W. Kelly, who is in the west for that concern.

Horace Remington and Albert E. Remington, of Horace Remington & Sons, were visitors in New York the past week.

The C. P. Henry Novelty Co. has been granted permission to erect a one-story wooden storage building on Early St.

George C. Mendell is in charge of an office room opened by Leary & Penfold, of this city, at 401 Heyworth building, Chicago.

Kraigenow & Naumann are now settled in new quarters at 117 Point St., having removed the past week from 25 Calender St.

E. C. Bliss, of the E. C. Bliss Mfg. Co.,

was one of the witnesses of the Hudson-Fulton celebration in New York the past week.

Ex-Representative John F. O'Connell has announced that he is not a candidate for re-nomination this year, owing to business duties.

Mayor Henry Fletcher was one of the speakers at the big Knights of Pythias demonstration at Infantry Hall last Thursday evening.

Col. and Mrs. Arthur H. Watson and daughter, Miss Anna Watson, were at the Waldorf-Astoria, New York, during the past week.

Mr. and Mrs. Erling C. Ostby, who have been spending the Summer at Warwick Neck, came to the city for the Winter season, Monday.

Bishop Bros. have started in the manufacturing jewelry business at 151 Pine St., and will introduce a general line of electroplated goods.

Harry Sachs, of Sachs Novelty Store, Chicago, has been in town the past week placing orders with the manufacturers of white stone goods.

Mr. and Mrs. Meyer Harzberg, of this city, were among those who saw the opening of the Hudson-Fulton celebration at New York, last week.

Mr. and Mrs. William N. Manchester have closed their home at Buttonwoods and are enjoying an automobile trip in the wilds of Maine and New Hampshire.

Joseph G. Doran has gone on an extended western trip for two or three months, during which he will visit the Pacific Coast in the interests of James C. Doran & Sons.

The Standard Enameling & Plating Co., H. Arabian, manager, is extending its business by furnishing enamel colors to jewelers who do their own enamel work.

Rothschild & Levy, who are removing from the Bacon building, Attleboro, to the Doran building, Chestnut St., this city, began getting in their machinery the first of the month.

C. Fred Munroe has gone on a trip, through Canada, and the middle west in the interests of George M. Baker. He has just returned from a trip to New York and vicinity.

The members of the Employes' Beneficial Association of Silverman Bros., manufacturing jewelry establishment, held a well attended and successful ball in Fay's Hall the other evening.

Among the debutantes this Winter will be Miss Constance Wall, daughter of A. Tingley Wall, of A. T. Wall & Co., and Miss Helen Ostby, daughter of Englehart C. Ostby, of the Ostby & Barton Co.

Herbert A. Crowell, manager for the Manufacturers' Refining Co., 45 Claverick St., has complained to the police that some one stole two magnets valued at \$3 each from the shop of the concern on Monday.

G. A. Jewett's orders from the recent western trip have given Hamilton & Hamilton, Jr.'s, establishment plenty to do for some time to come. A. V. Hammersberg is making a trip through Indiana for this house.

A building permit was granted the past week to John G. Lundgren, for the erection of a two-story brick building on Dudley St., to be used as a manufactory. It will

be 26 feet high and 48 by 100 feet on the ground.

Miss Daisy Erb, a well-known worker in the arts and crafts in jewelry, arrived on Friday as the week-end guest of the Misses Le Garde, on her way to her home in Washington, D. C., from a season in Maine and Canada.

Horace E. Remington, secretary of Horace Remington & Sons, and wife have sent out cards for a reception on Saturday evening, Oct. 9, from 8 to 10 o'clock, at their home on Adelaide Ave., in observance of their 10th wedding anniversary.

North Pole jewelry and novelties is the latest offering of the T. W. Lind Co., findings manufacturers, of this city. These include "Cook bears," "Peary seals," reindeers, snowshoes, sledges, Eskimos and similar articles suggestive of the Arctic.

At the annual Fall exhibition of the Rhode Island Horticultural Society Wednesday and Thursday evening Herr Prest, of 1925 Westminster St., made a handsome showing of cactus dahlias, which he raises for a pastime. He was awarded several prizes.

A copper medal about the size of an old-fashioned cent has been brought out by P. A. Willenin, designer, diemaker and tool-maker at 95 Pine St., as an advertising medium. On one side is shown a polar bear on a cake of ice, carrying off the North Pole, with his card on the other side.

The pawnbroker and usury laws, stipulating what rates of interest shall be charged both on secured and unsecured loans, went into effect on Friday. The laws were passed at the January sessions of the 1909 General Assembly, and were specially framed to reduce the evil of usury to a minimum.

Silverman Bros. have taken the larger part of the floor of the annex to the Doran building on Chestnut St., which forms a continuation of the floor now occupied by them. Their factory is running overtime to keep pace with their numerous orders. With increased facilities they expect to considerably extend their business.

Among the foreign importations received through the Providence Custom House the past week were the following: From Bremen, nine packages of imitation precious stones and two of jewelry; from Hamburg, nine packages of crockery; from London, one package of gold leaf; from Liverpool, nine packages manufactures of metal; from Southampton, one package of jewelry.

Frederick W. Aldred, with the B. H. Gladding Co., has returned from a nine weeks' trip through the Great Lakes and the west. He was a delegate to the National Irrigation Congress at Spokane and the National Conservation Congress at Seattle, visiting the Rainier National Park, many places on the Pacific Coast and all intervening cities of note, either going or coming.

Samuel Holt, Jr., who has a shop in the Favis building, 23 Aborn St., has made a complaint to the police of the First Precinct that his place of business was entered some time between Friday forenoon and Saturday night, and considerable booty stolen. Among the property taken was 200 gross of white stones, valued at \$70; 25 gross of colored stones, valued at \$12.50; three

den back combs, valued at \$14, and an antique clock, valued at \$30. It is thought the entrance was gained by means of false keys.

John Penhall has placed an attachment of \$25 on the plant of Hellar & Grant, manufacturers of electroplated goods, who recently started in business at 111 Point St. A suit has been brought to recover for services as traveling salesman. It is understood that when the deputy-sheriff went to the place of business to levy the attachment he found very little of value to satisfy the claim.

As a result of the Republican caucuses in this city, last week, the following jewelers were chosen as party leaders: Members of the Executive Committee, Ward 1, Fred D. Carr; Ward 5, Frederick S. Waite and Frank P. Eddy; Ward 6, Ernest Rueckert; Ward 7, Arthur W. Barrus. Members of the School Committee, Ward 7, Edward I. Mulchahey. Delegates to State convention to nominate general officers, Ward 5, Harry Cutler, Lester C. Belcher and Frank P. Eddy; Ward 7, Frank T. Pearce and Rudolph Sandeman; Ward 8, Emery J. San Souci; Ward 9, John M. Buffington. Delegates to City Assembly convention, Ward 2, Edward B.rough; Ward 5, Harold E. Norberg. Delegates to city Mayoralty convention, Ward 1, Henry D. Sharpe and Harold W. Crosby; Ward 6, George H. Grant and Edward A. Truelove.

North Attleboro.

Albert Totten has returned from Nova Scotia.

Arthur Chace left Saturday evening for New York.

Harry Peckham enjoyed a fishing trip, last week, at the Cape.

Percy Ball designer for Frank M. Whiting & Co., has accepted the Socialist party nomination for Representative.

The Chicago office of J. J. Sommer & Co., which has just been opened, has been placed in charge of Edward Sommer.

The relief association, which was recently established at the W. G. Clark & Co.'s factory, is rapidly increasing its membership.

A. Bingswanger, buyer for the Siegel, Cooper Co., Chicago, was in town last Friday placing orders with the local manufacturers.

Word was received, last week, of the death of Percy Bishop, who for many years was employed at the factory of F. M. Whiting & Co.

At a meeting of the Men's Club of the Universalist Church, last week, Frank Cutler and Harry Fisher were honored with places on the governing board.

Matthew Johnson, a local jeweler, succeeded in finding Carl Morse, a Wrentham lad of four years, who became lost. The boy passed two nights and two days in a meadow swamp without food or water. He was in good condition when found by Mr. Johnson. Over 250 people joined in the two days' hunt for the lad.

Charles H. Randall, for many years book-keeper for the H. F. Barrows Co., has returned from an extended visit to Cape Cod. Henry Clay Kip, New York representative for the same firm, was married, last week,

to Mattie Lya, daughter of Mr. and Mrs. Charles MacNaughton. They are enjoying a trip to Old Point Comfort, Va.

Albert R. White 2d, of Taunton, announces that he will conduct a trustee sale of the bankrupt estate of the Miller, Fuller & Whiting Co., Oct. 12. All the machinery, small tools, jewelry, samples, sample cases and office furniture now in the building of the company will be sold at a public auction by Auctioneer John T. Sharkey, of Taunton. The sale will be in the afternoon at 2 o'clock.

Walter Duncan is home from a successful trip for C. Ray Randall & Co. Oscar Hornig returned last week from New York State, where he traveled in the interests of the Codding & Heilborn Co. W. C. Sherman returned from a western trip in the interests of the Estate of O. M. Draper. William F. Metcalf, of the Plainville Stock Co., arrived home after a trip in the interests of his firm. Donald Le Stage has returned from a trip through the west for the H. D. Merritt Co.

Attleboro.

Frank J. Ruggles is home from a trip in the interest of W. E. Richards & Co.

Fred Greene has taken a position as New York representative for the Allison Mfg. Co.

Col. S. O. Bigney was in New York, last week, and attended the Hudson-Fulton celebration.

David L. Lowe, manager of the D. F. Briggs Co., has returned from a two weeks' trip in Virginia.

H. S. Noyes, salesman for Bates & Bacon, has just returned from a successful trip to the Pacific coast.

John M. Fisher presided at a rally of the Prohibition party held in North Attleboro, last Friday evening.

The artesian well at the new Leach & Garner factory is now completed and is furnishing the plant with an excellent flow of water.

The electroplating and coloring establishment of Kelly Bros., County St., has undergone many improvements during the past month.

Walter J. Newman, formerly with the Horton, Angell Co., met with a bad accident, last week, in Taunton. He dislocated his elbow and broke his arm.

The committee in charge of a new town hall and of which Joseph L. Sweet is chairman will meet in a few days, so that they may report at a special town meeting, which will soon be held.

A new concern which will be known as the Globe Jewelry Co. has begun business on Railroad St. The business will be managed by Otto Newhouse, who is well known in the Attleboros.

P. A. Randall, former Attleboro correspondent for THE JEWELERS' CIRCULAR—WEEKLY, has accepted the position of managing editor of the Fall River Herald. Mr. Randall has the best wishes of a host of friends in the Attleboros for success in his new position.

A fire which for a few minutes threatened the business section of the town broke out, last week, in a factory building on Railroad Ave., leased by the Frank Mossberg Co. The blaze was discovered on the second

floor of the building. Prompt work by the fire department kept the loss down to a few hundred dollars. The cause of the blaze is as yet unknown.

P. Nerney, treasurer of the Bay State Optical Co., has filed the following corporation report: Machinery, \$30,551; cash and discounts receivable, \$52,221; manufactures and merchandise, \$30,366; furniture and fixtures, \$2,468; treasury stock, \$19,178; total, \$134,784. Capital, \$60,000; accounts payable, \$6,152; floating debt, \$17,000; surplus, \$51,632; total, \$134,784.

Monday, work was started on the new main building of the Y. M. C. A. The building was made possible by the generous gift of Mrs. William C. Tappan. The building will cost \$60,000 and will be known as the William C. Tappan Memorial Young Men's Christian Association. Before his death William C. Tappan was one of the most prominent jewelers of the town, and this gift is a fitting memorial in his honor.

Announcement is made of a change in the personnel of one of Attleboro's progressive concerns, W. H. Saart & Co. The holdings of George J. Kelley and Lydia D. Peck have been purchased by William H. Saart, A. A. McRae and Charles P. Keeler. Mr. Saart had previously a large interest in the concern and Messrs. McRae and Keeler are well-known jewelry manufacturers. The resignations of Mr. Kelley as a director and treasurer and Miss Peck as secretary and director have been accepted. The company has elected the following officers: William H. Saart, president; C. P. Keeler, treasurer and clerk; C. P. Keeler, W. H. Saart and A. A. McRae, directors.

Toledo.

J. George Kapp, the Summit St. jeweler, has again entered the political arena and has been appointed chairman of the Lucas County Republican Campaign Committee. Mr. Kapp has already signified his intention of accepting.

The Thompson-Hudson Co. will open a department store in this city about Nov. 10. A feature of the store will be the jewelry department in charge of W. R. Ford. It will be furnished in elaborate style, and will include every facility for handling the business.

Gustave A. C. Manz, a manufacturing jeweler of New York, has been named defendant in a suit brought by his wife in the local courts for alimony, but not for divorce. In a cross petition and answer to the petition filed some days ago by his wife, Mr. Manz to-day made some allegations against his wife, who now resides here. Manz accuses a former Austrian army officer and a Hungarian musician of breaking up his home.

Displayed in the show window in the store of the Whelan-Aehle-Blutcherison Jewelry Co., St. Louis, Mo., is an attractive piece of pyrogravure measuring about 20 inches by 16 inches. It is a copy of Cabanel's well-known painting "Catastrophe of Ammon and Tammon." It is an artistic example of high class wood burning and was executed by M. S. Mahtez, head of the concern's watchmaking department. It has been pronounced one of the finest pieces of its kind ever seen.

GORHAM SILVER

¶ The Gorham Company are gratified to announce that they have made every preparation for coping with what bids fair to prove an unusually busy holiday season.

¶ They are enabled to offer to the trade a selection of appropriate goods hitherto unexampled either as to variety of style or individuality of design.

¶ It must, however, be remembered that, though every endeavor will be made to fill all orders promptly and satisfactorily, the interests of all concerned are best served if these orders be placed as early as possible.

A Warning Against Impostors. FOR some time past this office has been in receipt of complaints from various parts of the country which indicate that swindlers, claiming to represent THE JEWELERS' CIRCULAR-WEEKLY, have solicited subscriptions and collected the money therefor from a number of members of the trade. We therefore warn the trade generally to be careful in giving subscriptions or making any payment to any one but a duly accredited agent of this company. All of our subscription canvassers have proper credentials, which will cheerfully be produced upon demand, and we request every one who is solicited by a man who cannot produce credentials to notify this office immediately.

Members of the trade are also warned to refrain from lending money to any one on the strength of his claim that he is connected with THE JEWELERS' CIRCULAR-WEEKLY or its publishers.

The Legality of the Fixed Selling Price.

As well as merchants in other trades who advocate the fixed selling price on standard articles cannot but feel pleased with the present attitude of the courts generally on the question of the right of a manufacturer to fix a selling price for his own goods and to refuse to sell to those who will not keep up to the contract of which this fixed selling price is a part. In the cases that have come up in the last few years relating to a selling price fixed by a manufacturer of his own goods (and not to an agreement between one or more manufacturers to maintain a fixed selling price), the contract covering the price has been held valid no matter how big the manufacturer's business may be. As was noted in THE JEWELERS' CIRCULAR-WEEKLY some time ago, the New York Court of Appeals held that a corporation had the same right as an individual in this regard even in the case at issue, where it was alleged that the corporation's product was so important a part of the trade of the dealer that to go without that product practically meant to go out of business.

A more recent case has gone even further in upholding the attempt to maintain a fixed selling price by not only holding the contract legal but also holding that the retail dealer purchasing goods from a manufacturer under a contract fixed price at which he was to sell can be restrained by an injunction from selling these articles at a lower price no matter from what source he might then or hereafter obtain the articles. In this particular case, which came before a court of the State of Washington, the articles in question were of a proprietary character, with a trademark that was widely advertised and well known to the public, and the chief ground on which the decision rested was that the cutting of the price by the defendant caused other dealers to refuse to buy or handle the article in question, this resulting in the plaintiff losing many sales and practically destroying the effect of his advertising and destroying the confidence of the public in the worth of the article.

Paying results always follow a well managed advertising campaign.

Whether the Washington court's decision will hold or not as a precedent in future litigation remains to be seen, but there is little doubt that the justice of the fixed selling price is being realized more and more both by the courts and the public, and even by the press.

One of the important metropolitan daily papers said editorially recently: "Restraining competition among those dealing with the particular article of commerce by fixing a uniform price at which it may be sold has obvious advantages for the manufacturer and for the trade as a whole, and if the price is a fair one there seems to be no reason why it should not be maintained. The manufacturer can undoubtedly refuse to sell to any dealer who refuses to contract to charge the regular price. If the selling contract is alike for all, and one or several dealers violate it, it is unfair to those who honorably abide by it and may be a serious injury to the business of the manufacturer by restricting his sales as a whole."

In trade circles the subject will be even more strenuously indorsed in the future than in the past, and we doubt not but little by little the courts will look more and more favorably upon the manufacturer and dealer who seeks to maintain a just and standard price and less and less favorably upon the price cutter who fosters cutthroat competition from which nobody benefits in the end.

One point, however, is always to be borne in mind; that though the right of an individual or corporation to sell to whom he or it pleases, at his or its own terms, is pretty well sustained in law, this does not apply to any agreement between a number of manufacturers to regulate their combined product or establish a uniform price; for what the individual may do for himself he often may not be able to do with others, particularly if in any way there can be shown a conspiracy in restraint of trade.

Gem Importations During September.

ANY idea that members of the trade may have had that the large gem importations in the early part of the year came about solely because of the danger of a raise in the tariff, and not by the conditions of the gem market, has been dissipated by the amount of the importations since the tariff went into effect. Notwithstanding the large value of these importations during July and August, more gems were brought into this country during September than during the corresponding month of any previous year recorded by the Government. The total gem importations last month ex-

PROVIDENCE, R. I.
85 SPRAGUE STREET

NEW YORK OFFICE
9-11-13 MAIDEN LANE

ceeded those of September, 1908, by \$1, 000 and beat the record for September in 1905 by a good margin.

According to the report made by Appraiser at New York, the value of gems which passed through the Custom House at this port last month was \$3,341.74, of which the cut precious stones amounted to \$2,652,340.63, and uncut \$666,001.11. While the amount of rough brought in was not unusually large, value of the cut precious stones and pearls exceeded the record figures of September 1905, by over \$410,000 and exceeded figures in the same month of last year over \$900,000. If these figures indicate that the gem trade is enjoying greatest prosperity in its history, it is to understand what they do mean.

How the figures of last month compare with those of September in previous years may be seen in the following table:

Sept.	Cut.	Uncut.	Total
1909.....	\$2,652,340	\$666,001	\$3,318,341
1908.....	1,731,098	181,304	1,912,402
1907.....	1,679,428	799,169	2,478,597
1906.....	1,796,911	748,846	2,545,757
1905.....	2,240,987	1,000,892	3,241,879
1904.....	1,018,053	1,174,550	2,192,603
1903.....	1,099,860	862,524	1,962,384
1902.....	1,235,051	818,473	2,053,524
1901.....	978,611	384,545	1,363,156
1900.....	754,930	202,799	957,729
1899.....	1,123,628	325,916	1,449,544
1898.....	858,601	257,884	1,116,485
1897.....	852,476	219,510	1,071,986
1896.....	57,673	88,447	146,120

Pacific Northwest.

During the absence of J. H. Tawney store, at Sandy, Ore., was entered by burglars.

August Melsness has opened a new store at Enumclaw, Wash., in quarters adjoining the postoffice.

The John G. Barr Co., Salem, Ore., which recently moved into the Cathlamet Linn building there, is now celebrating 25th anniversary of its business career.

Jewelers' Gold Bars Withdrawn and changed at New York.

Week Ended Oct. 2, 1909.

Gold bars exchanged for gold coin..... \$594,908
Gold bars paid depositors..... 30,251

Total..... \$625,159
Of this the gold bars exchanged for gold coin are reported as follows:

Sept. 27.....	\$81,550
" 28.....	132,710
" 29.....	212,540
Oct. 1.....	121,920
" 2.....	40,230

Total.....\$594,908

Henry Berry, chief designer for the Derby Silver Co., Derby, for over a quarter of a century, dropped dead, Wednesday afternoon, at his home in South Bend, Ind. Berry was born in Manchester, England, but came to this country when quite young. He came to Shelton about 30 years ago, entering the employ of the Derby Silver Co. as chief designer, which position he held ever since. Mr. Berry was the oldest employe of the Derby Silver Co. in point of continuous service. He was a most capable man in his line, as not only had he an artistic nature and perception necessary for the work, but also a keen, practical knowledge of the business in all its phases.

New York Notes.

The firm of Blitz & Abel, 19 Maiden Lane, has been succeeded by Abel & Barlett.

Herman Levy sailed Wednesday on the *Victoria* to visit the diamond market of Europe.

Irving Lederer, of the S. & B. Lederer Co., returned last week, from a vacation spent in Europe.

Mr. and Mrs. A. S. Van Wezel sailed from Rotterdam last Saturday on the Rotterdam, for this city.

H. W. Hedges, Chicago manager for the New York Standard Watch Co., is on a business trip to this city.

J. F. Brayton, Chicago manager for the Julius King Optical Co. in that city, is spending a vacation in town.

A. W. Levy has been engaged to represent Louis Strasburger's Son & Co., 170 Broadway, in the western territory.

Barden & Hull, Attleboro, Mass., manufacturers, have engaged the services of Mr. Copeland, who will represent them in this city.

Sam Newman, of B. Hyman & Co., 2 Maiden Lane, has just returned from a successful trip and expects to start out again shortly.

Henry Freund, of Henry Freund & Bros., returned last week, Wednesday, from a trip on the road and started out again last Saturday.

The Jewelers Board of Trade reports that a first dividend of 15 per cent. has been sent out in the matter of F. Runkel, Oshkosh, Wis.

William Penfold, of Leary & Penfold, started for a trip through New York State yesterday. The firm recently opened a Chicago office.

L. H. Jerger, Thomasville, Ga., was among the out-of-town visitors at the office of THE JEWELERS' CIRCULAR-WEEKLY during the week.

M. B. Rosenback, of Wm. I. Rosenfeld, 1 Maiden Lane, returns this week from the diamond markets of Europe, on the *Kronprinzessin Cecilie*.

R. L. & M. Friedlander, 30 Maiden Lane, have installed new electric lighting throughout their store, which greatly adds to its appearance.

Woodbury Melcher, of Scofield, Melcher & Scofield, Plainville, Mass., was in town last week, and spent some time at the local offices of the concern.

Wm. Naigles, of Wm. Naigles & Co., 71 Nassau St., sailed Tuesday of last week, on the *Kaiser Wilhelm der Grosse*, for London and the Continent.

The business formerly conducted under the style of the Estate of Louis Rubin, 352 E. Houston St. is being continued under the name of Mrs. Amalia Rubin.

Michael Dreicer, of Dreicer & Co., took title last week, to an American basement dwelling house at 1046 Fifth Ave., which he bought from Mrs. Emma D. Thaw.

The Hudson-Fulton aquatic sports trophy cups, made by the Mauser Mfg. Co., 208 Fifth Ave., have been on exhibition during the celebration at the Fifth Ave. salesrooms of the concern.

On exhibition at the Broadway store of the L. E. Waterman Co. is a letter written

by Robert Fulton to one David Cook, Pittsburg Pa., which attracts the attention of the passers-by.

Among the exhibitors at the business show which was held in Madison Square Garden from Sept. 25 to Oct. 2, was the firm of Sanford & Bennet, who displayed fountain pens. The booth was in charge of Miss M. Murray.

W. R. Ford, jewelry buyer for The Thompson-Hudson Co., Toledo, O., called at the offices of THE JEWELERS' CIRCULAR-WEEKLY, Monday. He has been in the east buying goods for some time past. The firm will begin business about Nov. 10.

Sam J. Hart, manager of the Hart Jewelry Co., New Orleans, La., returned from this city, Saturday, to his home, after spending a month in the east purchasing goods for the opening of the new store. The firm has been established since 1845.

According to the reports of the daily papers last week a New York law firm has been engaged to bring a test case against the government for alleged undue severity on the part of inspectors in searching the persons of incoming passengers on a transatlantic liner.

Following the death of Addison W. Woodhull, it is announced by Mount & Woodhull that the business will be continued without any change whatsoever, under the management of the following officers: Gilbert T. Woodhull, president; Wm. J. McQuillan, vice-president and secretary; Daniel E. Woodhull, treasurer.

The Board of United States General Appraisers in a decision handed down last week upheld the protest of Lebolt & Co., and others on the assessment of duty on coral and onyx, cut cameo, and intended for use as settings for jewelry. The claim of a duty at 10 per cent., under paragraph 435, was sustained and the Collector's decision reversed.

The firm of Samuel Brand & Sons has been incorporated under the laws of the State of New York to manufacture jewelry and to deal in diamonds, stones, watches, jewelry, novelties, etc., with a capital of \$20,000. The incorporators are: John C. Hoenninger, of New York; Andrew C. Troy and Wm. N. Lewis, of Brooklyn.

Among the out-of-town jewelers who were in the city, last week, to see the Hudson-Fulton celebration were: Jos. Mazer, McAlester, Okla.; Benj. Ash, Binghamton, N. Y.; David Hillerson, Philadelphia, Pa.; C. S. Hayes, Norfolk, Nebr.; Benj. Friedlander, of J. Boasberg, Buffalo, N. Y.; Jacob Bunn, president of the Illinois Watch Case Co.; John E. Tweedy, of Cheever-Tweedy & Co., North Attleboro, Mass.

The Board of United States General Appraisers in a decision handed down last week denies the protest of The Barber Jewelry Co. against the assessment of duty in New York on imitation precious stones composed of paste, which the collector returned for duty at 20 per cent. ad valorem, under paragraph 435. The importers claim the merchandise to be dutiable as precious stones at 10 per cent. The protest was overruled.

The Board of the United States General Appraisers handed down two decisions last week on protests of Albert Lorsch & Co. On one a rate of 10 per cent. was granted

on certain precious stones intended for use as settings for jewelry and not as articles of utility, as claimed by the government. Imitation precious stones composed of paste, were held properly dutiable at 20 per cent. Imitation pearl beads strung, composed in chief value of wax, were held dutiable at 25 per cent., the rate claimed by the importers.

The protest of A. B. Closson, Jr., Co., on the assessment of duty at the port of Cincinnati, on drilled corals, cut, but not set or strung, except for transportation purposes, came up before the Board of United States General Appraisers last week and in a decision handed down by Appraiser Sharretts it was held that the goods in question are commercially known as precious stones and are designed exclusively for settings in jewelry. The claim of a duty of 10 per cent. was sustained and the assessment of a 50 per cent. duty by the collector, under paragraph 115, reversed.

Through his attorney, C. A. Smith, Topeka, Kans., has notified the Jewelers Security Alliance that he is claiming the reward of \$100 offered for the arrest and conviction of the burglar who robbed the jewelry store of C. A. Wolf, of that city, on Sept. 20. A young negro is being held on the charge. He was caught in the Union Railroad yards a few hours after the robbery occurred by Mr. Smith, who is a night patrolman. When apprehended the negro had a suspicious-looking box under his arm and which it is claimed contained a quantity of high-priced watches and a quantity of jewelry which was missing from the store which had been robbed.

Among the out-of-town jewelers in the Maiden Lane district during the week were: J. S. Hardy, Lowville, N. Y.; Jay Jackson, Pine Plains, N. Y.; Rodgers & Krull, Louisville, Ky.; C. C. Mussina, Williamsport, Pa.; C. J. Monson, New Haven, Conn.; Jos. J. Schuster, Cleveland, O.; F. B. Howard, Rutland, Vt.; L. F. Poor of Poor Bros., North Adams, Mass.; Jos. C. Musgrove, Nassau, N. P.; M. L. Richter, Madison, Ga.; Chas. Wendell of J. Wendell & Son, Oswego, N. Y.; H. W. Curtis, Knoxville, Tenn.; E. T. Chase of J. E. Caldwell & Co., Philadelphia, Pa.; F. A. Bixby, Ironton, O.; W. C. Hawley of Davis & Hawley Co., Bridgeport, Conn.

The Jewelers Security Alliance has received a report from J. S. Jensen & Sons, Salt Lake City, Utah, to the effect that their store was recently broken into. The thieves gained entrance by way of a rear transom and then broke the lock on the show window. They did not obtain any jewelry of value, but got two watches in the watchmaker's drawer before the burglar alarm rang and frightened them away. They did not touch the safe. As soon as the robbery was discovered it was found that one of the thieves had cut himself on a piece of broken glass. This is the second time within six months that a robbery has occurred at this store; the first time a tray containing a quantity of valuable jewelry was taken.

Elinore Beattie, who is accused of the larceny of a considerable quantity of silverware and jewelry from the Gorham

New York Notes.

(Continued from page 91.)

was brought back from London by Capt. Bernard Flood, of the District Attorney's office, on Sunday, on the White Star liner *Baltic*. It is alleged that Miss Attie obtained silverware and jewelry falsely representing herself in using the name of Mrs. Margaret Sterns, a customer of that firm. She was taken to the Tombs prisoner to be detained until District Attorney Jerome could arraign her on one of the several complaints of grand larceny. Miss Beattie has been fighting extradition for some time past. As reported in the columns of this journal at the time, the woman was identified from a caricature made of her by one of the employes of the Graham Co., and it was by the use of this drawing that she was captured.

Isidor Adler has moved his place of business from 260 W. 121st St. to 50 Bleecker St., Newark, N. J.

The silver service for the battleship *Minnesota* was presented Monday to Commander Sims, in whose custody as the representative of the Navy Department the service was intrusted, by Miss Rose M. Schaller. The service consists of 56 pieces.

A local auctioneer will soon begin for the purchasers a sale of a stock of diamond, pearl and precious stone jewelry recently acquired of Joseph Frankel's Sons. The stock is the balance of goods purchased by Joseph Frankel's Sons of Gattle, Ettinger & Hammel, and will consist of about \$500,000 worth of jewelry.

Harry Canfield, secretary and treasurer of the Roy Watch Case Co., 21 Maiden Lane, died at 2 A. M. yesterday of typhoid pneumonia. Mr. Canfield was 40 years of age and has been connected with the concern for the past 12 years. He leaves a widow and one daughter. The deceased was a member of the Seventh Regiment and of the Crescent Athletic Club.

James Edward Hardenbergh, employed as cashier of the S. F. Myers Co., 49 Maiden Lane, died Saturday after a long illness at his home, 92 Decatur St., Brooklyn. He had been in the employ of the S. F. Myers Co. for 22 years, and was highly regarded. He had been a resident of Brooklyn for 55 years. Mr. Hardenbergh was born in Ulster County, this State, and came to the metropolis when a youth. He was a member for some time of Company B of the 23d Regiment, National Guard, and belonged to the Ex-Members Association of that company, the Central Presbyterian Church and United States Council, National Provident Union. He is survived by his widow, Margarette Alston, and a daughter, Miss Edna Hardenbergh. Funeral services were held Monday night, with Dr. DeWitt Snyder officiating. The burial was at Bound Brook, N. J.

The funeral of Wm. F. Hoffman, for over 20 years an employe of R., L. & M. Friedlander, was held Tuesday of last week at Carlstadt, N. J., and was largely attended. He committed suicide by shooting himself through the heart. The cause of the act has not been explained. Mr. Hoffman was in charge of the material department for R., L. & M. Friedlander, at

the time of his death. He was 52 years old. He also conducted a retail business at Carlstadt, N. J. He was an expert fencer and a lover of athletic sports. He was a member of the Carlstadt Turn Verein at the time of his death, one of the foremost members of the Concordia Society, whose new hall was his hobby and for the welfare of which he worked incessantly. As an Odd Fellow he ranked high, holding various offices at different times, and proving himself a devotee of the order in every respect. He is survived by a widow and three daughters.

News Gleanings.

Ed. Werder, Charles City, Ia., has improved the interior of his store.

Oscar Olson, Northwood, N. Dak., is now located in a new store, on Main St.

J. C. Condon, Opelika, Ala., recently started on a trip to New York to purchase his Fall stock.

George H. Smith, Puyallup, Wash., has completed plans to move his stock to the new Stevenson brick building, on S. Meridian St.

Merle E. Garmoe, employed as jeweler in E. A. Marsh's store, Grinnell, Ia., was married recently at Cedar Rapids, Ia., to Miss Marie E. Henderson.

Fountain pens, jewelry and cheap watches, valued at \$200, were stolen recently, by burglars from the jewelry store of H. Gamenthaler, Cass Lake, Minn.

Mrs. W. S. Lindsey has moved from Carselton, N. Dak., and joined her husband in Mott, N. Dak., where he has recently engaged in the jewelry business.

F. C. Stone, who formerly practiced as an optometrist in Warren, Pa., has again located in that city and opened offices at 202 Main St., in the second floor of the Merz block.

P. L. Camden, who has been managing the branch jewelry store of A. J. Rankin & Co., Roanoke, Va., at White Sulphur Springs, has closed out that place for the Winter and returned home.

The Alabama Jewelry Co., Greenville, Ala., was dissolved, recently, Henry E. Brown purchasing the business and Charles T. Blaum retiring. Mr. Brown assumes all debts and will collect the accounts of the old firm.

The F. C. Bennett Co., retail jewelers at 3 N. Main St., Gloversville, N. Y., is closing out its stock at auction and giving presents to the women attending the sale. Mr. Bennett is interested in the Standard Jewelry Case Co., Buffalo, and he will hereafter devote his entire attention to it.

A report from E. Las Vegas, N. Mex., recently stated that a local resident while digging a well on his claim in Quay County discovered a genuine diamond in a bucket of earth that was brought up. The stone, it is reported, was sent to a St. Louis jeweler, who pronounced it a fair quality gem worth about \$500. No verification of the report, however, has since been received.

The ladies who are with the Japanese Commission are wearing brooches made by a Cleveland girl. Miss Mildred Watkins, who is a graduate of the Cleveland School of Art, was visiting in Portland when the commission was in that city. Miss Watkins

designed and made six brooches of different pattern and presented them to the Japanese ladies. The brooches are of gold and silver and are set with various precious stones. Miss Watkins has won several awards of merit at both the St. Louis and Seattle expositions.

The final meeting of the creditors of Jeweler George B. Smith will be held before Bankruptcy Referee Atwell, Watertown, N. Y., Oct. 18, at 10 o'clock. Some of Smith's stock, store fixtures, etc., will be sold then, as a number of bids have been received by the trustee. The accounts of the trustee will be passed upon and the final dividend declared. The suit brought by Charles A. Phelps, Smith's trustee, against Samuel Silverman was argued in the Appellate Division, last week. The appeal was by Silverman, and the suit involved possession of some of Smith's stock.

A meeting of the executive committee of the New York State Retail Jewelers' Association will be held some time this month, probably at Syracuse. President Evans will send out the call this week. It is expected that action of some kind will be taken on the demands sent out by the association to the jobbers that they quit the retail business and not compete with the retailers. President Evans stated to-day that he has received many letters following the publication of the letter in THE JEWELERS' CIRCULAR—WEEKLY recently. The membership of the association is steadily increasing.

Robert W. Little, jeweler, of Cumberland, Md., is the Prohibition Party's candidate for State Secretary. Mr. Little, who is 50 years old, learned his trade with his father, the late Samuel T. Little, and has been manager of the jewelry business founded by him, since the death of his father in 1882. He has served as county chairman of the Prohibition Party for some time and is now a member of the County Executive Committee. A clever cartoon sketch of Mr. Little seated on a "water wagon" marked "Bound for Annapolis" appeared in the Cumberland *Evening Times* on Saturday last.

Canada Notes.

B. J. Marquette, Prescott, Ont., has assigned to C. D. Row.

C. C. Harman, Winnipeg manager for Henry Birks & Sons, has returned home from a business trip to New York, Montreal, and the eastern townships. Trade prospects are reported to be encouraging.

Caron Bros., of Montreal, have made a neatly designed silver badge for the members of the Royal Architectural Institute of Canada, who are holding their second annual assembly in Toronto this week. The design for the badge was drawn by Alcide Chausse.

An artistic set of telegraph instruments has been completed by Henry Birks & Sons, Ltd., Montreal, to be used by his Majesty, King Edward, by direct cable communication from Buckingham Palace, London, in opening the Royal Edward Institute, a fine new building which has been put up on Belmont Park, Montreal, for the study and prevention and cure of tuberculosis. The instruments are made of Cobalt silver, mounted on bird's-eye maple, while the handles are Labradorite

Philadelphia.

Wine, diamond setter, 133 S. 7th St., removed to 117 S. 8th St.

Ernest Alley, Millville, N. J., has purchased a new home in Millville.

P. White, with a party of friends, departed, last week, to the Trenton Fair.

Alfred Moyer, of the Non-Retailing Co., Lancaster, Pa., was a visitor during the week.

Joseph Nillson, of the Hoover & Smith Co., attended a conclave in Boston, recently.

Joseph B. Bechtel, 725 Sansom St., has returned on his Fall trip along the Lehigh Valley.

I. F. Barrows, representing the Bay State Optical Co., was a recent visitor to this city.

N. Bogdanoff, member of the firm of Bogdanoff & Goldstein, was quietly married, last week.

G. Dillon, a former jeweler of Wheeling, W. Va., has opened an office at 505 Chestnut St.

Irving Lederer, with the S. & B. Lederer Co., Providence, R. I., was a local visitor during the week.

John McKenna, formerly with Wana-maker's jewelry department, has accepted a position with L. P. White.

Robert Leusch, 2113 N. Front St., is disposing of his stock and fixtures prior to his retirement from business.

C. H. Hartman was a visitor, last week, enquiring for his new store, which he has recently opened in Hanover, Pa.

H. Garman, Coatesville, Pa., was the guest, last week, of John H. Converse at a dinner given by him at the Union League.

Frank Hurlburt, of the firm of H. O. Hurlburt & Sons, will leave, next week, on a pleasure trip through Scranton and Honesdale.

James R. Stewart has removed from 2055 South St. to larger quarters at 2111 South St., where an optical section has been added.

H. McIlvaine, formerly with T. F. Brennan, Chester, Pa., has accepted a position with C. R. Smith & Son, 18th and Market Sts.

George Long, of the registry department of J. E. Caldwell & Co., who has been ill for the past three months, will report for business this week.

The engagement has been announced of Miss Alice Adler, a popular young lady of Baltimore, to Nathan Simon, of the firm of A. Simon & Sons, this city.

An entrance was forced to the jewelry store of Jacob Schaerle, 1244 Poplar St., by thieves, last Wednesday morning, and a number of clocks were stolen.

Walter B. Taylor, watchmaker for G. M. Harrington, Harrington, Del., has resigned his position and is now connected with H. E. Hemenway, Granville, N. Y.

Lewis Brenninger and Max Goldsmith have designed the solid gold emblems that are manufactured exclusively by H. O. Hurlburt & Sons for the trade only.

William Brand, with M. Sickles & Sons, spent the week-end in New York, attending the Hudson-Fulton celebration. Mr. Brand was accompanied by his wife and son.

Sidney Albin, for 15 years watchmaker for Riggs & Bro., 310 Market St., died, Sept. 30, following an operation performed at the Presbyterian Hospital. The deceased was 45 years of age.

William Norton has returned from Cape May, where he assisted Joseph K. Hand during the Summer season. Mr. Norton is busy looking after his own interests in West Philadelphia.

A. G. Lee and W. C. Cook, of the E. Howard Watch Co., were recent visitors here. Mr. Cook, who is an old Philadelphian, was formerly associated with the Keystone Watch Case Co.

R. C. Wilde, agent for the Meriden Cutlery Co. and the Hartford Sterling Co., was a recent visitor and reports a much improved condition of business throughout the State.

Mr. Atkins, representing the New England Watch Co., was seen in the trade during the week. His friends will be glad to know that he has entirely recovered from his attack of nervous prostration.

An oil painting of the river front of New Castle, Del., which was on exhibition in a window of J. E. Caldwell & Co., attracted unusual interest this week. The painting was executed by C. W. Schreyler for I. Layton Register. The latter was the first president of the Sons of Delaware.

Louis Blum was arrested in Atlantic City, last Wednesday, by Detectives Cameron and Brown of the Central Office staff, charged with embezzling \$300 from the Illinois concern whose representative he was in Philadelphia. The detectives stated that the young man admitted taking the money, but declared he had made arrangements to pay his employers every cent they were entitled to.

The following jewelers were visitors to this city during the week: T. C. Kremer, Phoenixville, Pa.; M. E. Hunter, Beverly, N. J.; L. S. Caldwell, Wildwood, N. J.; T. Brennan, Chester, Pa.; H. S. Kratz, Souderton, Pa.; D. H. Krause, North Wales, Pa.; E. K. Bean, Lansdale, Pa.; H. B. McFarlan, East Downingtown, Pa.; C. C. Mussina, Williamsport, Pa.; J. E. Webb and Howard Fitzsimmons, West Chester, Pa.; H. Garman, Coatesville, Pa.; L. L. Bickings, Norristown, Pa., and A. M. Kendall, Millville, N. J.

Raymond A. Cullen, 17 years old, who has been missing for a week, was arrested at his home, 231 N. 52d St., by Detectives Tucker and Timlin, charged with the larceny of jewelry valued at \$3,000 from the store of J. A. Lehman, 223½ S. Broad St., where he had been employed. Young Cullen had been at the Lehman store about 10 days when he mysteriously disappeared. It was then discovered that a number of valuable pieces of jewelry had been stolen. A search was made for Cullen, but he could not be found and a warrant was sworn out for his arrest. The police said that Cullen acknowledged his guilt to them, but could not account for his actions. He said he had not made any efforts to dispose of the jewelry.

In a suggestion to hold a monster exhibition of articles offered by local jobbers, it is proposed to utilize the City Hall courtyard, covered with canvas, as a central location for the show. D. V. Brown, a

member of the board of directors of the Merchants' and Travelers' Association, is the father of this idea. Mr. Brown's plan is for the smaller industries, which would cover the jobbers and small manufacturers. The larger ones could come in if they desired, but they would not be featured as they are at the Bourse, where large machines are in operation and where everything is done to attract attention to the large concerns. "To do this," said Mr. Brown, "would take too much room. The exhibition would include and would make a special feature of the watchmaker, the jeweler, the optical man, the clothier and shoemaker, and all such trades. We would hold it in the Spring or Fall—around Nov. 1, or, if we cannot get ready by that time this year, in April or May."

Lancaster, Pa.

John J. Bowman, of Ezra F. Bowman's Sons, was recently elected a director of the Lancaster Gun Club.

Isaac Kreuger has gone to Boston to visit his parents, and from that city he will go to New York for a week.

Parke S. Lindsay, of the Hamilton Watch Co.'s factory, and Miss Edna Simon, until recently also employed there, were married, Sept. 30.

Herbert Shiffer, late with John Shookers, Elizabethtown, Pa., has started business for himself in the Woolworth building, and will work for the trade.

Albert T. Heberling, a Parkersburg, Pa., jeweler, visited Lancaster, last week, as did George A. Silvers, Louisville, Ky., and Reuben Faegley, of Mt. Joy, Pa.

A letter received, last Thursday, from Denver, Colo., states that Walter McKinney, who went there several months ago for his health, is in a critical condition.

Oliver Mentzer, foreman for Ezra F. Bowman's Sons, was first-prize winner at the big reception held on the evening of Sept. 29 by Conestoga Council, Royal Arcanum.

A. W. Moyer, manager of the Non-Retailing Co., visited Philadelphia, last week, and he and T. Wilson Dubbs formed one of a large party of Lancaster business men who visited Benson-on-the-Susquehanna during the week.

George Augustus Gollatz, with G. M. Wallace, Huntington, W. Va., was married, Sept. 28, to Miss Florida Gladys Rohrer, of this city. The groom formerly resided in Lancaster, where he was watchmaker for several local firms.

Webb C. Ball, Cleveland, O., who is general time inspector over 125,000 miles of railroad, embracing 50 roads, was the guest, last week, of Charles D. Rood, president of the Hamilton Watch Co. After the departure of his guest Mr. Rood went to New York for a few days' visit.

The police, last week, arrested a man giving the name of Jacob Collins on suspicion of having stolen a lot of silver spoons, and other tableware, which he offered at very low prices. As no evidence against him could be found, he was discharged, but was warned to leave Lancaster at once.

J. J. Rammer has sold his business at Sheboygan Falls, Wis., to Charles C. Meier.

RESULTS ARE WHAT COUNT

STOCK ORDERS

In no other market will you find a more attractive and complete line of ready-to-deliver goods. Stocks are always new and up-to-date, for they move lively in Chicago. Stocks are always large for the same reason. The demand centers here and we are always prepared. No better selection of Diamonds and Precious Stones is shown anywhere. Novelties and seasonable goods are shown here simultaneously with New York, London and Paris. Chicago stocks, prices and service should attract your orders.

REPAIRS

No job too small, no job too large—none too difficult for Chicago shops. The equipment, skilled workmen and facilities are here. Despatch is usually an important factor in repair work—and it gives Chicago all the advantage. Diamond setting, matching, jewelry and watch case repairing, enameling, coloring, soldering, sizing, jointing, engraving, polishing, stringing, ferrule work for pipes and canes, re-plating, etc., etc. Send the jobs here for quick action and profit. Antiques repaired, renewed, etc.

SPECIAL WORK

Our manufacturing facilities are unsurpassed. Fine gold, silver and platinum work made to order. Cluster work and special design orders executed promptly in the best possible manner and at prices which favor Chicago as your market. In lodge jewels, emblems, buttons, pins, etc., we lead the world. Send in the rough ideas of your customers for special work and let us send you accurate, detailed designs with estimates that will permit you to get the order against any competitor.

On the opposite page you will find the names of some thirty Manufacturing Jewelers of Chicago—make a choice from this list and send in your jobs and orders. All of these firms and companies are members of The Manufacturing Jewelers Association of Chicago; also of the Chicago Association of Commerce—a double guarantee of reliability and commercial standing. They are all competitors for your business, but stand shoulder to shoulder for Chicago, and invite your inquiries and favors.

SPECIAL ORDER WORK ALWAYS RECEIVES OUR BEST ATTENTION

Son will make their home in Oak Park. The trade here was surprised, last week, receiving notices to the effect that Geo. Shaw, of Geo. V. Shaw & Son, Savauna, had left for parts unknown. The firm had \$6,900 for merchandise and \$5,000 to a bank. The estimated assets are being \$2,500 and \$3,500.

Among the out-of-town retail jewelers last week were: M. A. Hagen, Fargo, N. Dak.; Wm. D. Roeder, Dwight, Ill.; M. Werner, Deerfield, Wis.; Harry K. Fites, Ellettsville, Ind.; John W. Burkitt, Arlington Heights, Ill.; H. O. Duncan, Oktaha, Okla.; Mr. Anderson, of Nelson & Anderson, Neenah, Wis.; Chas. H. Blanchaine, Ellettsville, Ind.; J. G. Davenport, Battle Creek, Mich.; Charles Ham, Frankfort, Ind.; W. Ricketts, Charleston, Ill.; Mr. Moe, Ellettsville, Ind.; E. F. Wooding & Strain, Gregory, S. Dak.; S. R. Livergood, Mason City, Ia.; S. Record, Cambridge, Ill.; Cline Sims, Harlan, Ia.; Geo. M. Wherritt, Mount Carroll, Ill.; J. N. Martinek, Travers City, Mich.; H. L. Chase, Cedar Falls, Ia.; C. Steck, Washington, Ia.; E. B. Lewis, Ellettsville, Ind.; H. F. Kemmer, Kankakee, Ill.; B. Wartell, Ellettsville, Ind.; H. Heston, Ill.; Indianapolis, Ind.

Cincinnati.

Joseph Mehmert is making a business trip through northern Ohio and Michigan.

Lee Loeb, of Herman & Loeb, and wife are spending 10 days at Martinsville, Ind.

Ferd Phillips, of Richter & Phillips, and wife are enjoying a stay at Martinsville, Ind.

J. Newstate has opened a new retail jewelry store on Woodburn Ave., Walnut Hills.

Bingaman & Co. are arranging to improve their store with new fixtures and cases.

Max H. Loebnitz, of the Dueber-Hampden companies, called on the trade here, last week.

Michael Plaut, of A. & J. Plaut, and his wife have returned from their wedding trip in the east.

Eli Gutmann, of L. Gutmann & Sons, has left for the south on a combined business and pleasure trip.

Jacob Dorst, of the Dorst Co., and his wife are home from a very enjoyable sojourn at the Lakes.

Joseph S. Voss and Louis Voss, of Joseph S. Voss & Sons, leave, this week, on business trips south and north.

J. D. Jensen, of Jensen, Herzer & Jeck, Nashville, Tenn., was here, last week, arranging for fixtures for the new store which the firm is fitting up.

R. Frankle, Louisville, Ky., is now associated with Wallenstein, Mayer & Co. as a traveling salesman, and makes his initial trip, this week, in the west.

R. J. Satterthwait, Charleston, W. Va., was here, recently, buying goods for his new store on Capitol St., having moved from his old location on Kanawha St.

Edwin De Voss, Wilmington, O., is enlarging and also remodeling his store, putting in new cases and stock, which will

make his store one of the handsomest in that section when completed.

H. H. Irwin, who has been a representative of the Dennison Mfg. Co. in Philadelphia, Pa., will in the future represent the company in Kentucky. Mr. Irwin has not yet selected his headquarters.

Louis F. Hummel, Emery Arcade, feeling the great need of additional space, is having a handsome balcony placed in the rear of his store, where his office will hereafter be located, thus giving the desired space for displaying of stock.

The local Retail Jewelers' Association met in the Sinton Hotel, recently, to perfect a plan of campaign to advertise this city through circular letters as the jewelry center of the west. The campaign will be started shortly by the expenditure of several thousands of dollars in this way.

Klein Bros., Cincinnati's new jobbing firm, have engaged the services, as traveling salesman, of A. A. Spiegel, formerly of A. A. Spiegel & Co., and W. H. Modrick, formerly with the Shepard Mfg. Co. The former will have southern territory and the latter Indiana, Illinois, Ohio and part of Michigan.

Reitenour & Schmitt, Union City, Ind., have dissolved partnership. Mr. Schmitt has sold out his interest to his partner and will engage in the manufacturing of automobile frames. Mr. Reitenour, with Mr. Echelberger, formerly watchmaker for Mr. Piddmghaus, Marietta, O., will continue the business.

Out-of-town jewelers here the past week, buying stock, included: J. W. Shirley and wife, Bloomfield, Ky.; Frank B. Cary, Lebanon, O.; Fred Saul, G. W. Meyer and wife, and G. S. McCabe, with E. H. Mozley, Chattanooga, Tenn.; H. Joseph, Mattoon, Ill.; S. M. Whitehead, Middlesboro, Ky.; Miss Reickel, Cynthiana, Ky.; U. L. Jennings, Watertown, Tenn.; George Haendel, Piqua, O.; R. D. Washington, Russel, Ky.; T. J. Horstman, Havana, Ill.; A. L. Wade, Bradford, O.; W. H. Keller, Corydon, Ind., and E. Israel, Harrison, O.

Jensen, Herzer & Jeck, located at 402 Union St., Nashville, Tenn., are now arranging to open a new store, which promises to be one of the handsomest in the entire country. They have leased for a term of years the double storehouse at 602 and 604 Church St., in Nashville, and will occupy the entire three floors and basement. The lease will begin Jan. 1, 1911. Mr. Jensen has been traveling through the western States inspecting similar establishments in that section. Mr. Jeck has been in the east for the same purpose, and Mr. Herzer has been on the same business in the north. They have in this way obtained the ideas of those most experienced in the arrangement and fittings of a modern jewelry store. Architects are now at work on plans carrying out their ideas. The store will be finished in white marble and mahogany with tile floors and plate glass throughout. The first floor will be occupied by the retail sales department, and on the second floor will be handsome art rooms. All of the manufacturing will be done on the third floor. The firm has realized for some time that their present quarters were entirely inadequate. The new store will furnish ample space for all desired purposes.

Cleveland.

John Rich, Painesville, was in town, this week, with his uncle, visiting friends.

Fred Kennard made his first appearance in the rôle of the proud father, Sept. 25.

W. E. Butcher has gone to Hamilton, Ont., to enter the employ of Norman Ellis.

W. H. Durham will spend a week in Huron, O., before returning to his home in Homer, Ont.

U. R. Sigler has been confined to his home for two weeks, but has now practically recovered.

W. B. Wingate returned from his fishing trip with photographs to prove that he is a first-class nimrod.

A. G. Shanabarger has sold out his optical business, and is now with the firm of Shanabarger & Murray.

John Hueter, who has been located on Wade Park Ave. for a number of years, is attempting to sell out his business.

The stock of the Art Novelty Shop, which was placed in the hands of a receiver recently, has been sold in bulk to the May Co.

Mr. and Mrs. A. T. Hubbard received numerous silver gifts from friends and employees of the store on the occasion of their recent 25th wedding anniversary.

S. Y. Ball is one of the committee on arrangements of the retail merchants' board for the trip to Pittsburg, Oct. 8. The board will see the first game of the world's championship baseball series.

N. M. Wiegand, who is located at the corner of Wade Park and Addison Road, takes a great deal of pride in his store and show windows. He has just added an optical department that harmonizes well with the rest of the outfit.

H. W. Arnstine hurried home from his trip to California to greet an eight and a half pound son that arrived Sept. 28. Mr. Arnstine says that conditions in the west are better than they are here, and that he looks for a big business in that section of the country.

The wholesale merchants' board of the Chamber of Commerce, of which all the wholesale jewelers are members, will hold their annual meeting, Oct. 7. Plans for the coming year will be discussed and a committee appointed to select routes for the trade excursion trips.

The party of distinguished Japanese business men who compose the commission that is visiting this country in the interests of better trade relations were tendered a banquet by the Chamber of Commerce, Monday evening, Oct. 4. A number of the prominent jewelers were present.

Out-of-town buyers here this week were: D. Leonheiser, Huron; H. H. Brainard, Medina; C. E. Lousman, South Lorain; C. H. Dexheimer, Bedford; W. P. Seward, Rushsylvania; B. Mosley, Willoughby; L. A. Poole, Mansfield; Wm. Landgrave, La Rue; Robt. Miller, Lorain; G. F. Elgin, Kent; R. R. Moore, Cuyahoga Falls; J. W. Helfrich, Carrollton; G. H. Dickinson, Geneva; John Rich, Painesville, and L. A. Ott, Mansfield.

A. W. Pierce, Ord, Nebr., has sold out to C. D. Remal. Mr. Pierce will devote his attention to the music trade in the future.

Diamonds

A Parrot Talks

but his tongue is not harnessed to his brain. We do not talk just to make statements, but because we have the best values and the lowest prices on diamonds.

We want the jewelers who are confident of their judgment to order diamonds from us on approval.

We have a graded stock of ten different qualities of diamonds, and with our special cutting contract we have no trouble to keep it complete. Every stone is examined by experts and selected for its merits, particular attention being paid to color, cut and finish.

Write for our booklet with prices of diamonds; you can save money. Every sale of our diamonds will bring you a handsome profit and enable you to give your customer a bargain.

Send us your orders. Compare the goods; there will be no further arguments; we have the best values and the lowest prices.

A. G. Becken Co.
136 WABASH AVE. CHICAGO

St. Louis.

A. Fassett, of Weiss & Fassett, left Friday night, for Indiana on a business trip.

Mr. Miller, of the Smith's Credit Jewelry Co., has returned from a stay of two weeks in Wisconsin.

W. Grimm & Gorley and the St. Louis Brass Co. will have floats in the industrial parade, Thursday.

Mrs. Hasenritter, wife of J. H. Hasenrider, Hermann, Mo., is critically ill in a St. Louis hospital.

V. E. Denham, Princeton, Ind., will arrive Wednesday, and spend the rest of the week in St. Louis.

The Mermod, Jaccard & King Jewelry Co. will send up a balloon in the advertising balloon race, Monday.

W. C. Ludwig, Globe-Democrat building, has returned from a two weeks' fishing trip on the Meramec River.

S. E. Friede, of the Quaker City Glass Co., has returned from an extended trip through Texas and the southwest.

F. W. Hoyt, president of the Hoyt Jewelry Co., returned, Wednesday night, from New York, where he made purchases.

Otto Kurtzeborn, of A. Kurtzeborn & Sons, has returned from Beaver Dam, Ill., where he and his family spent two weeks.

Clarence D. Henry, for a long time with the Mermod, Jaccard & King Jewelry Co., is now with the Hess & Culbertson Jewelry Co.

Ralph Lowenstein, of the Joseph Lowenstein Jewelry Co., will return, the first of the week, from a trip through Kentucky and Tennessee.

Mrs. Petter, mother of George Petter, president of the Petter Jewelry Co., Hannibal, Mo., died, a few days ago, at her home in Paducah, Ky.

Mr. Clark and Mr. Tromley, composing the new firm of Clark & Tromley, Poplar Bluff, Mo., were here during the week, purchasing stock.

Russell Stone has resigned his position with Anderson Blanton, Paris, Mo., to take a position with the Kelly-Vawter Jewelry Co., Marshall, Mo.

David Feist, who travels out of St. Louis for Ingomar Goldsmith & Co., has returned from a trip to the Pacific Coast. He left on the trip in July.

Theodore Eagle, 23 S. Broadway, has returned from a three weeks' trip up the Mississippi River, on which he was accompanied by his family.

The Fisher Jewelry Co. filed suit in Justice Spaulding's court against E. V. McClure and J. C. McClure on a note for \$20. The case will be heard, Oct. 15.

S. E. Bamber, secretary of the Hess & Culbertson Jewelry Co., has returned from St. Joseph, Mo., where he attended a meeting of the Grand Lodge of Masons.

Glinnis Stolle has resigned his position with H. P. Sutton, McCook, Nebr., to go with C. A. Leach, in the same city. He has bought an interest in the business of Mr. Leach.

J. H. Cummings, St. Louis Clock & Silverware Co., came in, Thursday, from northeast Missouri for the Centennial, and A. Widdicomb arrived, Saturday, from northern Illinois.

Joseph B. Moore, of the Elliott Jewelry Co., is getting ready to go out on his second Fall trip through Missouri, Nebraska, Colorado and Kansas. He will be gone several weeks.

A large solid silver challenge trophy cup donated by the St. Louis Power Boat Association, to be competed for during the Centennial, is on exhibition in the window of the F. W. Drost Jewelry Co.

Edward Netzheimer, of the Maritz Kober Jewelry Mfg. Co., has gone to the Black River in Arkansas on a fishing trip. Samuel Kober will return to the city the first of the week on account of the Centennial.

Henry Tas, son of Louis Tas, diamond merchant of Amsterdam, was in St. Louis, last week, visiting friends and calling on the trade. It was his first trip to this city. He leaves, Saturday night, for Cincinnati.

T. J. Ellis, Jonesboro, Ark., who has been traveling in the west for several months, passed through St. Louis, last week, on his way home, accompanied by his wife and child, who have been with him on the trip.

James Miller tried to sell a watch at a jewelry store in Belleville, and was arrested and held for the police at Mt. Carmel, Ill., where he was wanted to answer to the charge of stealing the timepiece from J. Rocca.

No arrests have been made in connection with the assault and attempted robbery at the store of Wash. Volker, 3028 Easton Ave., over a week ago. The description of the two men is so meager that arrests are unlikely.

E. H. Meier, of the St. Louis Clock & Silverware Co., has come in from the south by way of Evansville, Ind., and will remain until after the Centennial. He will then leave for a trip through Arkansas and Louisiana.

George L. Weber, Jr., and J. C. Morefield have been made joint managers of Loftis Bros. & Co., Carleton building. Mr. Morefield began with the company when the St. Louis branch was first opened in 1894. He started in as credit man.

The Smith's Credit Jewelry Co. has filed suit in Justice Spaulding's court against Benj. Barnett & Co. for \$82.50. The same company has filed a replevin suit in the same court against Mrs. M. McClathery. The amount involved in the latter suit is \$52.50.

W. E. Barker, vice-president of the Hoyt Jewelry Co., left, Tuesday night, for New York, to meet and welcome Melms' Pilgrims, the English soccer football team, who are to make a tour of the United States and play in St. Louis, Oct. 16, 17 and 18.

Weiss & Fassett, diamond merchants, have just issued a very complete calculation table for diamonds, and they are being sent to the customers of the firm. It is a booklet of 74 pages and enables computations to be quickly made on diamonds ranging from \$1 a carat to \$250 a carat.

A cross designed by Mrs. Hudson E. Bridge and manufactured by the Whelan-Aehle-Hutchison Jewelry Co. is used as an illustration of a capable article on "Jewels Antique and Modern," by Mrs. Elizabeth Beverly James, in the Centennial number of the *American Woman's Review*. Mrs.

James was formerly advertising manager of both the Whelan-Aehle-Hutchison Co. and the Hess & Culbertson Jewelry Co.

The solid silver cups manufactured by the Maschmeyer-Richards Silver Co., offered by the Centennial Association for invitation gold tournament to be held at the Glen Echo Club, Oct. 5 to 8, are on exhibition in the corner show window of the William Barr Dry Goods Co., 6th and Olive Sts.

Joseph Ebeling and E. C. Zerweck attended a meeting, Saturday night, at the Mercantile Club of the Get-Together banquet committee, and reported that there would be a large attendance of jewelers at the banquet. Mr. Ebeling, Mr. Zerweck and Meyer Bauman have purchased boxes for the evening.

Travelers for William Weidlich & Bro., who have come in for the Centennial, are: H. F. Hines, from Kansas City; H. D. Wachholder, from Texas; Herman Nechling, from Missouri; William Goeggle, from Illinois. They will all remain through the week to entertain their customers who come to the Centennial.

A certificate of incorporation of the H. C. Grawe Jewelry Co. has been filed in the office of the St. Louis Recorder of Deeds. The capital stock is \$20,000. The company was incorporated some time ago on account of the illness of H. C. Grawe and to facilitate the continuance of the business in the event of his death, but the certificate has only now been filed. The incorporators are the immediate members of Mr. Grawe's family.

Clarence Heyman, of the L. Bauman Jewelry Co., has returned from a trip through Arkansas, which he took for F. J. Bross, who was laid up by an injury to his ankle. Mr. Bross has now so far recovered that he will be able to go out on a trip next week through Illinois and Missouri. Mark Eiseman, southern representative, is in for a few days. Morris Bauman has come in from the west and Charles Stange from Illinois for the Centennial.

Out-of-town jewelers in St. Louis during the past week were: E. L. Bersche, Columbia, Ill.; W. B. Kerns, Bunceton, Mo.; B. Massie, Granite City, Ill.; George A. Young, Moberly, Mo.; Joseph Major, McAlester, Okla.; C. B. Johnson, Okolona, Miss.; O. L. Davis, New Madrid, Mo.; J. C. Vines, Bessemer, Ala.; C. W. Beardslay, Litchfield, Ill.; Clark & Tromley, Poplar Bluff, Mo.; Michael Miesch, Muscogee, Okla.; E. H. Goulding, Alton; A. Y. Boswell, Tulsa, Okla.

St. Louis now has a great white way, and to Goodman King, president of the Mermod, Jaccard & King Jewelry Co., belongs much of the credit—more than to any other one man or several men. Work done by the lighting committee of the City Improvement Association, of which Mr. King is chairman, resulted in the turning on of lights, Saturday night, which transformed Broadway into a most brilliantly lighted thoroughfare. The plan carried out was for the property owners to pay \$3 a front foot for installing electrolights and the tenants to pay \$3 a front foot per year for maintenance.

The celebration of the centennial of the city's incorporation began Sunday, Oct. 3, and will continue a week. Jewelers have

20 YEARS IN BUSINESS

READ !!

We guarantee you against loss; your reputation remains the same after we finish. We never misrepresent the quality, and you can always depend on us to fill our engagements. We will make your sale and **POSITIVELY GUARANTEE** that our **NEW SYSTEM** will produce the required results. Wire or write for date.

We will sell your goods and get prices for them even if they have been in your stock for 25 years.

After we conduct a sale for you, your methods of doing business will receive a new impetus. We will put **NEW LIFE** into your store.

A \$40,000 SALE

To My Brother Jewelers:

My sale, which was conducted by H. E. Glendore & Co., was one of the most pleasant surprises of my business career, surpassing all my expectations. Yours, A. KAEMPFER, 146 W. Madison St., Chicago.

A \$7,000 SALE

I moved to Amarillo, Texas, and opened there Dec. 15, 1907. Mr. Glendore made my sale the following month (January), opening sale Jan. 11, 1908, selling over \$7,000 and averaging 5 per cent. profit, under the most difficult circumstances. Many thanks to him. E. I. PITTMAN & SON.

My sale made in February, 1908, by H. E. Glendore, was in every way satisfactory. My guarantee with them was for them to get me 80 cents on the dollar. But they made my stock bring me dollar for dollar, above expenses. H. L. MORRISON, Pittsburg, Kans.

Mr. Glendore made a fine sale for us under the most difficult circumstances. We found him to be honorable and upright and cheerfully recommend him.

C. W. GHOLSON & CO., Henderson, N. C.

I think Mr. Glendore can get out of a jewelry stock all that it is worth. You cannot make a mistake in securing him.

W. W. AKENHEAD, Lake Village, Ark.

Should you succeed in getting Mr. Glendore's services, I know your sale will be a success.

W. M. WARREN, Paducah, Ky.

Mr. Glendore made the *only successful sale* that was ever made for me.

A. J. KLIMEK, Thief River Falls, Minn.

Mr. Glendore is one of the best you can get. He is a gentleman. He will not do you or leave you in a hole. He gets the prices without any misrepresentations.

N. ROITMAN, 511 Olive St., St. Louis, Mo.

I can truthfully recommend H. E. Glendore as one of the most capable auctioneers. His ability to get the crowds and hold them is marvelous. I can truthfully say that only the personality of the man made the sale a success under the conditions.

H. Y. WEBB, Greensboro, Ala.

Enclose an addressed and stamped envelope to above references for an assured answer.

ten an active part in the preparations. The Retail Jewelers' Association joined actively in the arrangements for the "Get-together" banquet of civic and commercial organizations, to be one of the features of the week. The actual work was done by a committee composed of President Joseph Ebeling, Secretary E. C. Zerweck, Herman Buch, F. W. Drosten and E. H. Kortrup. Invitations were sent to all the members of the association to attend the banquet. Jewelry houses rank well with other places of business in the profuseness of their decorations.

Jewelers have a conspicuous part in the various events of Centennial Week. Joseph Ebeling is associate chairman and E. C. Zerweck associate secretary of the Get-together banquet. Goodman King has been appointed host for Mayor Emil W. Parno of Greene, Ia., for the week. George J. Ross, L. C. Ebeling and Elsworth L. Bauman will be aides to Col. E. J. Spencer in the educational, historical and military parade, Friday. Theodore Ebeling is on the press and publicity committee for the St. Louis Day dedication of Fairground, Saturday. Otto Buder will be in the industrial parade, Thursday, as a member of the house of delegates. Fred W. Drosten, Jr., is on the committee in charge of the welcome mass-meeting, Monday night, at the Coliseum. Fred Drosten will be an aide to the grand marshal in the industrial parade, Thursday. Otto Buder and Vincent J. Borly will be on the reception committee of the ball of all nations, Thursday night.

Pacific Coast Notes.

E. D. Charters, formerly of Los Banos, has located at Sebastopol, Cal.

Farr & Smith have opened a retail jewelry establishment at Turlock, Cal.

M. J. Kaliher, Whittier, Cal., was married, recently, to Charlotte S. McCormick, of that place.

W. B. Williams has moved into the new Hanlin building, on Pasadena Ave., Highland Park, Cal.

A new store has just been opened at Newman, Cal., by F. A. Ward, who has been a traveling jeweler for some time.

E. E. Fite, who has been acting as watchmaker for F. E. Lenhart, Pomona, Cal., has decided to go into business there for himself.

Carl G. Strouck, formerly of Boulder, Colo., has opened a store at 112 E. 4th St., Santa Ana. He is an expert engraver and will make a specialty of that line of work.

The jewelry repairing shop of W. S. Bracktie, 945 Broadway, Oakland, Cal., was entered by thieves, recently, while the proprietor was at lunch and articles worth \$100 were taken.

J. F. Reed, who has been occupying a store at 1420½ 3d St., Santa Monica, Cal., moved, Oct. 1, to 1442 3d St. New furnishings will be installed and a larger stock carried in the new quarters.

The jewelers of Redlands, who have been keeping their stores open until very late, on Saturday evenings, have come to an agreement, and hereafter will close at 9 P.M. Saturdays and at 6 P.M. on other evenings.

Articles of incorporation have been filed

at San Jose, Cal., by Field, Walton & Co., who are now conducting a jewelry and curio business at that place. The company is incorporated for \$20,000, and the interested parties are Robert S. Field, C. H. Walton and F. A. Smith. The store is located at 19 S. 1st St.

A jewelry manufacturing plant is being planned for Tucson, Ariz., and will be in operation shortly. The establishment will be conducted in connection with the business of Greenwald & Adams, Tucson, and will be under the immediate direction of J. E. Walker, who came from Norfolk, Va., a short time ago. At Norfolk Mr. Walker has been operating a plant of his own and is a man of much experience in manufacturing lines.

Los Angeles.

Almon G. Stone, 330 S. Broadway, is exhibiting in his window a magnificent black opal.

Ralph Himmelschein, with S. Meyer & Co., was married Sept. 29, to Miss Sadie Friedmann.

Ed. Turner, traveling salesman for the E. W. Reynolds Co., has gone on a trip through Arizona.

Harry M. Seamans, of H. F. Wallace's office force, has returned from a pleasant vacation spent at Ocean Park.

A. E. Baranger, traveling salesman for H. F. Wallace, who recently returned from a long trip on the road, has started out again.

George F. Hambright, of Hambright & Walsh, has gone on a business trip through the north, expecting to be gone five or six weeks.

E. F. Whittemore, watchmaker with the J. C. Fleming Co., has completed a course in optometry at the Los Angeles Optical College.

The workmen installing the fixtures in S. B. Bailey's store are much behind in their work, but Mr. Bailey expects to have everything complete in a short time.

The jobbers of this city received invitations from the jewelers of Santa Ana to be their guests at the annual Orange County Carnival of Products, held in that city.

B. W. Rowell, head watchmaker for E. Gerson, suffered a sudden and severe affliction a few days ago in the loss of his wife, who died after a serious surgical operation.

L. W. Clark, watchmaker with W. M. Kinney, 607 S. Spring St., has returned to his place in the store after having been laid up in consequence of a severe cut in his right hand.

J. J. Kemp, formerly with the Pacific Gem Co., when that company did a retail business on Spring St., has returned to this city and taken a position with H. B. Crouch, on S. Broadway.

Word has been received here of the death of W. C. Cheney, of Pocatello, Idaho. Mr. Cheney was formerly watchmaker for Almon G. Stone, of this city. His death was the result of consumption.

Joseph Rittigstein, who returned recently from his wedding trip, opened his new store at 540 S. Broadway, Oct. 1. He has a very neat and convenient place of business. The location is but a short distance

from that formerly occupied by Brock & Feagans.

H. H. Hooper, for many years a jeweler in Whittier, 15 miles from this city, died here a few days ago. He had sold his business some time since on account of failing health and came to Los Angeles.

Arthur Turner has returned from his first trip for the E. W. Reynolds Co., through the north. The trip was very successful from a business point of view, and he reports a very good feeling generally among retail jewelers.

John Koke, formerly of Grand Rapids, Mich., who has been chief salesman for Field & Walton in this city for some months past, was married at Riverside, Sept. 23, to Miss Nettie Pauline Ghysels, Grand Rapids. He has just returned from his honeymoon and is again at his place in Field & Walton's.

Out-of-town jewelers in Los Angeles recently include: J. O. White, Barstow; D. A. Houk, Long Beach; F. H. Guernsey, Glendale; E. B. Smith, Santa Ana; C. P. Kryhl, Santa Ana. Mr. Kryhl came to the city to buy cups as trophies to be awarded at the Orange County Carnival of Products.

S. Nordlinger & Sons, who for many years have been among the foremost jewelers of this city, have just concluded negotiations by which they secure a new location. They will move some time next year to 629 S. Broadway, where the Unique Theater is now located. By the terms of their lease they are to have a basement and first and second stories of a new building to be erected on the premises. This location is about two blocks further south than that of Brock & Feagans, and marks another step in the advance of business toward the southwest in this city.

Minneapolis and St. Paul.

Mrs. Fuller, Waterville, Minn., bought an opening stock in the Twin Cities during the past week.

Peder Uldin, watchmaker for John D. Bodfors, Minneapolis, is in the hospital, threatened with appendicitis.

Frank Hankinson, watchmaker for the Gittelsohn Jewelry Co., Minneapolis, has resigned, and Mr. Hilker succeeds him.

Miss Louise Diacon, daughter of the late Lucian Diacon, Chaska, Minn., will take a course in watchmaking in Minneapolis.

It is understood that a jewelry store will be located in the new Hotel Radisson, on 7th St., between Hennepin and Nicollet Aves., Minneapolis, which will be completed within a short time.

Among the out-of-town jewelers who were in the Twin Cities during the past week were: Misses Bertha and Louise Diacon, Chaska, Minn.; J. R. Krueger, North Branch, Minn.; W. S. Davis, Stewartville, Minn.; F. H. Parker, Lake Mills, Ia.

Johantgen & Kohl, 303 Nicollet Ave., Minneapolis, have dissolved partnership, George Johantgen retiring and Philip M. Kohl continuing the business at the old stand. Mr. Johantgen will engage in the same business for himself, with quarters at 36 S. 5th St., on the second floor. He expects to be able to open for business about Oct. 15.

Kansas City.

C. M. Kramer, with J. R. Mercer, has just returned from his vacation.

B. Fricke, of the material department of the Meyer Jewelry Co., is on a short hunting trip to Kansas.

Ed. Reinholdt, in charge of the receiving department of the Meyer Jewelry Co., has just returned from a trip east.

Frank White, son of Charles White, Guthrie, Okla., was in the city, last week, stopping off on his way home from Omaha.

Walter Sperling, Seneca, Kans., was in this city, last week, having but recently returned from a pleasure trip to the Pacific coast.

Frank Reinholdt, who has been with the Meyer Jewelry Co. for the past 15 years, has resigned. His brother, who comes from Honolulu, H. I., will take his place.

E. H. Wardell, Nowata, Okla., will move into his new jewelry store, this week, with a complete new line of fixtures. He is said to have one of the finest stores in the State.

All nearby salesmen of the Edwards & Sloane Jewelry Co. have been called in for the Carnival week, and will assist in entertaining customers who come in to see the sights.

Thomas Thompson, who has just returned from a stay of six months in Europe, has taken a position in the watchmaking department of the Meyer Jewelry Co., as have also Messrs. Taylor and Cahn.

L. E. Garnett, Chanute, Kans., was in Kansas City, last week, regarding patented articles which he is about to begin manufacturing at that point. One is for watchmakers and the other is a lock switch for railroads.

There is an inclination on the part of the public to associate the manufacturing firm of Porter & Wiser Jewelry Co. with the retail establishment of H. Porter, located on Walnut St., between 7th and 8th Sts. These are different firms, neither having any connection nor relation with the other.

The Edwards & Sloane Jewelry Co. has added considerably to its floor space, taking in the room to the south and removing the partition, thus dropping the material department back into the new room and making the main display room much larger. The display space for both cut glass and clocks will be increased.

Martin Johnson, Independence, Kans., who has just returned from a trip around the world, started with Jack London on his yacht, the *Suark*, and after two years of adventure on that vessel is home again, and fully satisfied to settle down to quiet life in the jewelry store of his father in Independence, Kans. He reached this city the latter part of last week, meeting his father, J. A. Johnson, here, and they made the balance of the trip together.

The following jewelers called on the trade, during the past week: J. H. Whiteside, Liberty, Mo.; John Morrison, of Morrison Bros., Olathe, Kans.; J. A. Haecker, Tipton, Kans.; E. B. Van Ness, Mound City, Kans.; Mrs. F. Smith, Billings, Okla.; M. W. J. Holt, Stillwater, Okla.; M. B. Gordon, Braymer, Mo.; J. E. Smith, Rolf, Okla.; Mr. Miller of Miller & Cash, Sapulpa, Okla.; Carl Rieker, Emporia, Kans.; Orville Shrack, of W. H. Shrack & Son,

Pratt, Kans.; Lute Potts, Potts Jewelry Co., Marceline, Mo.; W. E. Lacey, Moran, Kans.; C. J. Keil, Clinton, Mo.; L. E. DeLanty, Parkville, Mo.; W. N. Kirkman, Edgerton, Mo.; G. H. Church, Oak Grove, Mo.; C. E. Tieman, California, Mo.; J. E. Inglis, Higginsville, Mo.; Mr. Sellers, with B. F. Rhodes, Minneapolis, Kans.; H. M. Schnatterly, Kinsley, Kans.; A. W. Holmes, Bonner Springs, Kans.; M. F. Kohler, Parsons, Kans.; Richard Miller, McPherson, Kans.; J. A. Reuling and wife, Wymore, Nebr.; N. Jordan, Windsor, Mo.; A. Rosenfield, Leavenworth, Kans.

Indianapolis.

W. J. Hoffman, of Hoffman & Lauer, has been ill for several days.

Charles W. Lauer, Sr., of Charles W. Lauer & Co., was in Chicago, last week, on business.

Mr. and Mrs. Henry A. Winn have returned from an extensive trip to North Dakota and Denver, Colo. Mr. Winn was called to North Dakota on business.

I. Grohs, of the I. Grohs Jewelry Co., is home from St. Paul, Minn., where he attended a convention. He is spending several days in the house before resuming his Fall trips.

Jefferson H. Reed, who has spent several months at his country home in Brown County, returned to this city, last week. During the Summer Mr. Reed built a seven-room house.

Lester Sector, of Krauss & Sector, has purchased five pieces of property at the corner of College Ave. and 27th St., the consideration being \$25,000. Mr. Sector purchased the property as an investment.

As chairman of the committee on arrangements, Charles Mayer, of Charles Mayer & Co., accompanied an automobile owners' reliability run to Mudlavia Springs and return, last Saturday and Sunday.

Daniel Beauchamp, who has been employed by his brother, Samuel Beauchamp, at Fairmount, has taken a position with Hoffman & Lauer, in this city. Samuel Beauchamp has sold out to Luther Davis.

Enrique C. Miller, of the Baldwin-Miller Co., returned, last week, from a trip abroad, accompanied by his son, Roy, who has gone to Princeton University. Mrs. Miller and Miss Miller will remain in Europe several weeks.

A number of jewelers at Columbus have joined the newly organized Columbus Retail Merchants' Association, which will be affiliated with the Indiana Retail Merchants' Association, of which Ralph Clark, Anderson, is president.

J. D. Day, jeweler and watchmaker, employed by Henry C. Schergens, celebrated the 10th anniversary of his marriage at his home, Monday evening, Oct. 4. A number of his friends in the jewelry trade were among the guests.

Harry M. Slaughter, formerly with Chris. Bernloehr & Bro., has taken a position with George S. Kern as watchmaker. Mr. Slaughter first contemplated engaging in business in an Indiana town, but later decided to remain in this city.

M. C. Lang, formerly of New York, has purchased the manufacturing jewelry business of E. B. Johns, and will continue it at

the old quarters, 45-46 Claypool building. The quarters are to be enlarged and improved immediately, and the force will be increased.

Out-of-town retail jewelers who visited the trade, last week, were: George Ganne Seymour; Clyde Porter, Tipton; John V. Hudson, Fortville; G. C. De Camp, Shilley; E. O. Collins, Franklin; A. S. Or Greenfield; Mr. Robbins, Cooper & Robbins Mooresville; I. H. Barnes, Greenfield, and A. H. Pauley, Bloomington.

Merchants of Massachusetts Ave. observed their annual Fall opening, last week. The thoroughfare, which has grown to be a lively retail center during the last two years, was attractively decorated and illuminated. Among the retail jewelers participating in the opening week were Lon L. Mauzy, Dyer Bros., Amdur Bros., L. Kiefer & Son, and the Fidelity Watch Co. Charles Hill and Queena Nelson, both colored, are being held by the local police pending an investigation. They were arrested after they had attempted to dispose of considerable jewelry at local pawnshops. When arrested they had a large quantity of jewelry and diamonds valued at hundreds of dollars, and also pawn checks from a number of eastern cities. They were well dressed and unable to give a satisfactory account of themselves. They are held under bonds of \$1,000 each.

Omaha.

Fred. Brodegaard & Co. have installed a large burglar-proof safe in their new store.

Mrs. Hare, formerly with Albert Edholm has accepted a position with T. L. Comb & Co.

Mr. Scott, with Albert Edholm, has gone out in the State for a few days on a business trip.

Mr. Wilson, Atchison, Nebr., was in this city, last week, looking over the stocks for Fall goods.

W. F. Kourtlaug, formerly with C. A. Williams & Co., is now with the jewelry department of the Bennett Co.

H. P. Dean, an engraver for the trade has recently installed very attractive cases in his shop in the Brown block.

Jaquemin & Co., Council Bluffs, Ia., have closed their extended auction sale and have moved their store to 411 W. Broadway.

O. J. Dahlin, watchmaker with Gustafson & Hendrickson, has just returned from a vacation trip, which included Denver and other Colorado points.

T. L. Combs & Co. are in the midst of a discount sale by which they hope to reduce their present stock, in view of the elaborated alterations which are pending.

N. P. Frandsen, a member of the jobbing firm of C. A. Williams & Co., has returned from a combined business and pleasure trip including, in particular, Washington, Oregon and California.

While working on the electric light fixtures in the store of Albert Edholm last week, an electrician dropped his hammer on a large plate glass show case. The latter was wrecked, but fortunately no damage was done to the goods with the exception of scratches and dents.

Walter Job has bought out the business of Fred C. Fritz, Scranton, Pa.

The following traveling representatives visited the trade in Lancaster, Pa., recently: C. B. Hagler, Hagstoz & Son; W. H. Chadderton, Jewels Bros. Mfg. Co.; D. G. Stites, Igen & Wakefield Co.; Oscar H. Hornig, Codding & Heilborn

Traveling representatives in Los Angeles, Cal., recently included: A. W. Van Ness, H. C. Van Ness & Co.; A. S. Riley, Mandeville, Carrow & Co.; H. New, Hammel, Riglander & Co.; Louis R. F. Simmons Co.; H. S. Sparrow, Stern & Co.

Among the traveling salesmen who, recently, visited the Buffalo, N. Y., jewelry trade, were: C. Schneider, Edward Todd & Co.; Charles Dougherty, Osmers-Dougherty Co.; Henry C. Woods, Dominick & Hafl; J. Curtis, Meriden Silver Plate Co.

Among the manufacturers and wholesale firm representatives in Chicago, last week, were: Percy Deas, Frank W. Smith Co.; Mort Adler, Chas. Miller Sons; M. Hirsch, Leon Hirsch; Abel King, Emrich, King & Schorsch; C. Norwood Perley, Riley & Bro.; Harry C. Ulmer, Kryptok Sales Co. The following traveling representatives called on the trade in Kansas City, Mo., during the past week: Wm. Lamb, Geo. H. Fuller & Son Co.; Abel King, Emrich, King & Schorsch; Henry H. Jacobson, Jacobson Bros.; N. Shiman, Shiman Bros. & Co.; Walter S. Strauss, Jacob Strauss & Sons; Charles P. Crane, Bliss Bros. Co.; G. W. Bleeker, Martin-Copeland Co.

Traveling representatives in Boston, Mass., last week, included: V. S. Burgessor, Krenentz & Co.; Frederick Lapham, Carter Howe & Co.; Stanley Lynch, W. B. Kerr Co.; L. F. Clark, Cory, Clark & Noon; Harry Higham, Alling & Co.; E. E. Allsopp, Wordley, Allsopp & Bliss Co.; V. J. Harber, Enos Richardson & Son; Stephen P. Kent, Kent & Woodland; John Curran, A. J. Ledges & Co.; R. W. Simpson, Jr., Riker Bros.

Traveling representatives of jewelry houses in St. Louis, Mo., during the past week, were: C. T. Smith, Reed & Barton; H. R. Shirley, T. B. Clark & Co.; C. M. Davis, Depasse Mfg. Co.; E. P. Staunton, Gorham Co.; A. Fraser, Rochester Cut Glass Co.; Charles E. Lobjner, Hayes Bros. Co.; G. W. Bleeker, Martin-Copeland Co.; A. H. Cohn, Herald Novelty Co.; L. J. Fox, Gustave Fox Co.; A. J. Casse, John R. Keim; Henry H. Jacobson, Jacobson Bros.; C. B. Bartlett, Whiting Mfg. Co.; R. M. Sawyer, Shafer & Douglas; B. Heise, Langfeld Bros. & Co.; R. C. Read, Barrows Chain Co.; Fred A. Bullock, Horton-Angell Co.; Lee Powell, S. O. Bigney & Co.; W. H. Alger, North American Watch Co.; Mr. Joseph, M. B. & H. H. Joseph; D. Riddell, Adolph Strauss & Co.; Kossuth Marx Jewelry Co.

The traveling representatives who have called upon the trade in Omaha, Nebr., last week, were: Albert B. Randall, Codding & Heilborn Co.; C. Williams, Louis W. Hrabka; Rudolph Bruening, Schrader-Wittstein Co.; W. S. Noon, Cory, Clark & Noon; Thomas H. Ryland, American Watch Case Co.; E. P. Stantors, Gorham Co.; John O. Slemmons, J. B. Bowden & Co.; F. L. Pettee, Waterbury Clock Co.; Mr. Jenayer, Mauser Mfg. Co.; Mr. Singleton, Adams & Singleton; J. Percy Wrayton, Durand & Co.; E. Denike, Champenois & Co.; Thos. E. Rogers, Riker Bros.; Percy C. Burnham, Enos, Richardson & Co.; Henry Hoffa, Hodenpyl & Walker; M. Weintraub, Lindol Mfg. Co.; Julius L. Mayer, Mauser Mfg. Co.; W. E. Kennedy, Suplee-Reeve-Whiting Co.; R. H. Stevens, Mabie, Todd & Co.; T. L. Lyons, Lyons Gem Co.; K. R. Irwin, C. G. Alford & Co.; Sol. H. Veit, Henry Froeblich & Co.; Henry H. Jacobson, Jacobson Bros.

Traveling representatives who called on the Cincinnati, O., trade, during the past week, included: C. A. Holbrook, Sloan & Co.; H. R. Blackman, Mandeville, Carrow & Crane; George W. Beardsley, Allsopp & Allsopp; Mr. Harris, H. J. Harris & Co.; J. R. Payne, Meriden Cutlery Co.; Lewis

P. Cook, S. Sternau & Co.; C. N. Perley, Perley & Bro.; George H. Thomas, Powell & Co.; J. P. Fagan, Unger Bros.; W. H. Osborne, R. Wallace & Sons Mfg. Co.; R. L. Seeley, La Pierre Mfg. Co.; E. P. Staunton, Gorham Co.; H. B. Bliss, B. M. Shanley, Jr., Co.; Mr. Sweetser, Sweetser Co.; Emil Pick, Hammel, Riglander & Co.; George Curten, H. Le Fort; William Stevens, Bay State Optical Co.; Mr. Frank, Buffalo Jewelry Case Co.; Joe Rifkin, L. Heller & Sons; Mr. Boss, Boss & Baldwin; Dan Chisholm, Bugbee & Niles Co.; Mr. Turtleott, Waite, Thresher Co.; Milton Goldberg, J. J. White & Co.; Louis Goldberg, J. Solinger & Co.; Walter M. Hodges, Will & Baumer Co.; Mark Perl, Wagner Comb Mfg. Co.; Alfred Nathan, Henry Baschkopf; Lee Powell, S. O. Bigney & Co.; C. B. Bartlett, Whiting Mfg. Co.; George H. Thomas, Scharling & Co.; W. J. Miller, Seth Thomas Clock Co.; H. W. Sherrill, Sinnock & Sherrill.

Connecticut.

F. A. Wallace, of R. Wallace & Sons Mfg. Co., Wallingford, accompanied by several friends, attended the Hudson-Fulton celebration in New York, on Thursday.

James Masterton, with Clark & True, Middletown, was in Hartford, on Wednesday, attending the meeting of the Connecticut Association of Opticians, which was held at that place.

Albert L. Sessions, accompanied by Mrs. Sessions, is at present on a trip to the Pacific coast. The couple will visit Seattle and other places along the coast and then pay a visit to the Yellowstone National Park.

Miscellaneous merchandise, including cheap watches, was stolen by burglars, on Wednesday night, from the general store of Torkelson Bros. & Co., East Hampton. Access to the store was gained by breaking the glass in a rear window.

Edmund Warren, for the past 25 years engaged in the silverplating business, on Cannon St., Bridgeport, died suddenly, last week, at his home, 186 Cortlandt Hill. The deceased, who was 62 years old, was a member of the Odd Fellows and of the Algonquin Club.

The Standard Jewelry Enamel Co., South Windsor, has filed a certificate of incorporation, with a capital of \$50,000, to engage in the jewelry and novelty business. The incorporators are: R. M. Grant, South Windsor; L. L. Brewer, East Hartford, and J. J. Quinn, Hartford.

The funeral of Walter W. Roberts was held, on the evening of Sept. 28, at the home of his son-in-law, L. J. Mueller, in New Britain. The pallbearers had all been selected by the deceased before his death. They included W. J. Rawlings, G. H. Dyson, Edgar H. Smith, E. Parker, W. P. Chaloner and C. Mueller, all of whom formerly worked with Mr. Roberts at the jewelry trade.

The annual meeting and dinner of the Connecticut Pawn Brokers' Association was held at Long's Hotel, in Hartford, on Wednesday evening, many of those in attendance being jewelers. The officers elected for the ensuing year are: President, L. S. Knoek, Hartford; secretary, I. Schmed, New Haven; treasurer, S. Capasso, New Haven. These also make up the executive committee. The association was organized five years ago.

Howard Nesbit, brother of Evelyn Nesbit Thaw, was arrested in New Haven, Sept. 29, by Detective Sergeant J. G. Dennehy on a technical charge of idleness. It is al-

leged that Nesbit, who, when taken into custody, gave the name of R. E. Campbell, had been attempting to dispose of "phony" diamonds to jewelers and pawnbrokers in New Haven. According to a dispatch from New Haven, cheap rings were found in Nesbit's trunk, which had been left at the railroad station.

San Francisco.

TRADE CONDITIONS.

Big crops and general prosperity of the State has resulted in making money plentiful, and as people have been spending cautiously for the past two years the present season should show a turn for the better. It is also pointed out that the season in San Francisco will be considerably longer than is usually the case, owing to the Portola festival that commences Oct. 19 and which is expected to draw large crowds to this city. Preparations are being made for the greatest throng that ever assembled here and jewelers believe that a great deal of good will result from the celebration. The effect of the Portola celebration will be to increase the length of the regular holiday season by at least a couple of weeks, for many visitors will remain here that long.

J. B. Williams, Susanville, Cal., was here purchasing Fall stock, last week.

Charles Hanni, with Sussfeld, Lorsch & Co., New York, was a recent visitor here.

J. A. Hillinger, of R. J. Hillinger & Co., of Chicago, has been here visiting the local trade.

George C. Wilkins, Red Bluff, Cal., was here visiting the wholesale establishments, recently.

Karl Brandt, a diamond merchant of South Africa, is in this city at the present time.

H. New, with Hammel, Riglander & Co., New York, called on the San Francisco trade, recently.

Ben and Leo Nordman, of Nordman Bros., are expected from England in time to join in the Portola Festival.

Leon Myers, of the firm of R. & L. Myers, is now out on the road and will be gone for some weeks. He recently returned from an outing.

The friends of Max Baruth, of the traveling staff of R. & L. Myers, will be interested in learning that he will soon be married to Miss Etta Rush, of Sacramento, Cal.

Out-of-town jewelers here during the past week included: L. A. Peck, Gilroy; J. E. Smith, Turlock; T. White, Vallejo; Chas. Warfield, Chicago, and C. J. Klein, Santa Cruz.

Edmond Warren, for 25 years head of the silver-plating business of Edmond Warren & Co., Bridgeport, died suddenly of heart disease recently. The deceased was 62 years of age and is survived by a widow and two sons.

The Keystone Jewelry Co. is making extensive improvements in its store on Market St. in anticipation of the holiday season, and the addition of the balcony now in course of construction will add considerable room for stock.

On Sept. 22, F. G. Arnold, a well-known jeweler of San Francisco, was married in Los Angeles to Miss Mabel Wiles. The wedding was attended by a number of the friends of the groom from San Francisco. The happy pair have returned to San Francisco and will later make an eastern trip.

THE OPTICAL REVIEW

Special Serial Articles Published Only in This Magazine

Technique in Optometry.

By Prof. G. A. ROGERS, Chicago, Ill., one of the foremost authorities on the practice and theory of Optics and Optometry, contributes an especially valuable series of articles in this department which gives him the widest possible scope for communicating to our readers the results of his many years of study and experience. The series is especially adapted to be of practical use to the optometrist in his every day work.

Prisms in Ocular Practice.

By JOHN C. EBERHARDT, Dayton, Ohio, is a series of articles based on actual cases in his practice. Each article is complete in itself. We have received many letters from optometrists in all parts of the country who have declared that his articles now appearing are among the most valuable serial contributions to the literature of optometry. Mr. EBERHARDT was formerly President of the American Association of Opticians, and is among the foremost in the profession.

Physical Optics.

In theoretical optics and their bearing on optometry, we have secured the exclusive articles of the leading contributors to this branch of work. These writers are noted scientific men, members of the faculties of two great universities, who have especially devoted themselves to the study of optics as bearing upon the growing profession of optometry.

HOWARD D. MINCHIN, Ph.D., Professor of Physics of the University of Rochester, Rochester, N. Y., is providing a most admirable contribution to the literature of physical optics. His articles will continue to appear regularly each month.

For the benefit of optometrists who may have little or no knowledge of trigonometry, a clear and easily comprehended series of lectures dealing with the science are being written by Dr. MINCHIN, of the University of Rochester, Rochester, N. Y., and appear monthly.

Mathematical Optics.

Prof. CHARLES SHEARD, of the Department of Physics of the State University, Columbus, Ohio, is contributing a brilliant series of articles on the mathematical phases of optics which should be familiar to all optometrists.

Mechanical Optics.

JOHN E. MEYER, New York, N. Y., is recognized as an authority on the mechanical phases of optics. His articles on the "Grind-stone" have attracted much attention and this series which will continue, is certainly the best which have yet appeared on this subject.

Other Features.

These are only a few of the features but numerous other authorities on optics and optometry will add their contributions from time to time. In fact, every important contribution to the literature of optics and optometry will be found in the columns of THE OPTICAL REVIEW. Nothing that is worth while is omitted.

News.

Our news reports are acknowledged to be the most comprehensive of any that are published in the optical field. All the meetings and conventions of optical societies, and work of the various State Boards of Optometry are promptly chronicled, while the technical papers read at meetings are published fully and promptly.

In order to keep abreast with the progress of optics and optometry you must read THE OPTICAL REVIEW.

Pittsburg.

TRADE CONDITIONS.

The last trace of the recent business depression disappeared in Greater Pittsburg. With but few exceptions all mills and factories are working to their full capacity. Labor is reported scarce, production of the United States Steel Corporation is now on the basis of over 12,000,000 tons a year, as compared with 10,000,000 in 1907, which was the banner year in the steel industry. Creating a splendid holiday trade, nearly all the well established retail merchants have been doing some heavy buying to take care of the extended business. Wedding present sales also have been good, those making purchases for October are having made them early. Many of the local stores have begun to increase their force of salesmen. Collections are improving and dealers are optimistic now than they have been at any time during the last two years.

J. Prentice, of this city, was a recent special visitor at Lancaster, Pa.

J. Alexander Hardy, who has been in the city buying Fall and holiday goods, has returned to Pittsburg.

J. A. Macintosh, according to the police, confessed to stealing jewelry valued at \$100 from the store of C. H. Franklin, Amherst, Pa.

Mrs. Lida Z. Wattles has been appointed administratrix of the estate of her husband, Wesley W. Wattles, formerly identified with the Hardy & Hayes Co., and who died few weeks ago.

Herman, William and Arthur Hoffman, sons of William Hoffman, Sr., of Heeren Bros. & Co., returned, last week, from Europe, where they had been for several months. They stopped over in New York for a few days to attend the Hudson-Fulton festivities.

Among the out-of-town jewelers in Pittsburg, last week, were: J. D. Thorn, Toronto; A. F. Stauver, Wheeling; C. L. Snyder and L. S. Swan, New Castle; B. E. Brown, Monocssen; H. R. Brown, Donora; F. H. Hayes, Washington; Mrs. A. Katzenmeyer, Burgettstown.

J. D. Schein, the South Side jeweler, has just finished the erection of a three-story building in Carson St., into which he moved last week. The second and third floors contain suites of flats, and Mr. Schein and his family occupy one of them. Mr. Schein is one of the progressive merchants of the South Side.

One of the handsome silver cups won at the recent races at Bonwits Island, and which was one of the largest ever made for a similar event, was made and designed by the Cowell & Hubbard Co., Cleveland, O. Local jewelers sold a large number of the cups because of the interest taken in the amateur contests.

The explosion at the Ferguson building, last week, caused a great deal of excitement among the jewelers in that vicinity and gave rise to a report that the store of James H. Matthews & Sons' jewelry house in Wood St., near Third Ave., was in danger. This concern is not a jewelry house, although some of the papers had it so listed. The building was badly damaged as a result of 600 feet of moving picture film exploding.

The Jewelers' Duckpin Bowling League opened its third season, Monday night of last week, at the Davis alleys, six clubs contesting. The August Loch team showed up in splendid style, defeating the Diamonds, composed of members of the whole-

sale trade, three out of four games. The Wattles team took all four games from the Roberts team, and the Ferhydens pulled three out of four from the Vilsacks. The clubs will roll every Monday night throughout the season.

Max Zeisel, 1406 Wylie Ave., is having more trouble. This time he is charged with receiving stolen goods. Zeisel's recent misfortunes have been previously noted in THE JEWELERS' CIRCULAR-WEEKLY. He has been robbed, duped and "buncoed" out of money by going on other people's bonds. The Wylie Ave. jeweler's present difficulty was the outcome of the arrest of a negro by the name of King Davis, who is said to have been mixed up in a number of robberies throughout the city. Davis made a confession to the police admitting his guilt and telling where he had disposed of his loot. As a result of his statement a watch valued at \$100, and stolen from Samuel Kraus, was found in Zeisel's store. Zeisel claims he bought the watch from the negro in good faith and had no idea it was stolen.

Boston.

M. Myers has returned from an extensive and very successful trip through the west.

J. S. Martin has resumed his duties at D. C. Percival & Co.'s establishment after several weeks' illness.

Thomas Addison, of Addison Bros., Chelsea, has gone on a hunting and fishing trip to Cape Smallpoint, Me.

F. H. Smith, with Kettell & Blake, is ill at his home in Roxbury, suffering from a severe attack of neuritis.

Treasurer O'Hara, of the O'Hara Waltham Dial Co., with Mrs. O'Hara, is soon to leave on an extended European trip on which he will combine business and pleasure.

F. W. Ruggles, for 18 years with Robbins, Appleton & Co., has severed his connection with that firm and has established himself at room 63, Jewelers' building, where he will deal in watches, clocks, diamonds, jewelry, silverware, etc.

The following Boston jewelers, members of the Ancient and Honorable Artillery Company, are with that organization, which is this week holding its Fall field day in Milwaukee: Sergt. Elmer E. Knight and Privates Edward Hardy, George E. Homer and A. S. Hirshberg.

Among the jewelers in town, last week, were: Joseph W. Beverly, South Berwick, Me.; M. P. Foss, Pittsfield, N. H.; James Wain, Lawrence; George Andrews, the Hill Co., J. H. Conner and Frank Olin, Lynn; J. H. Jacques, Haverhill; L. R. Hapgood, Orange, and Ernest Welch, Westboro.

S. Howard Wright, formerly of St. Albans, Vt., and now employed as a salesman by a wholesale jewelry house here, was married, Sept. 29, at Waltham, to Mildred Elizabeth Greene, of that city. The bride is a daughter of the late Leonard Greene, at one time a foreman in the Waltham Watch Co.'s factory.

An indictment was returned by the Federal Grand Jury, last Friday, Oct. 1, against John L. Nudd, who is charged on six counts with using the mails in a scheme to defraud. Nudd, it will be remembered, conducted a school of engraving in the Old South building. Witnesses who ap-

peared against him in the hearing for the United States Commissioner testified that Nudd said he would teach them engraving in six months and furnish them with positions paying a weekly salary of \$25.

Ernest L. Paulman, a watchmaker at 1585 Washington St., was arrested, Wednesday afternoon of last week, on the charge of having received stolen property. He was arraigned, Friday, and held in \$300 bail for trial, Thursday, Oct. 7. The police claim that a man named Fred Cassell, or Bailey, who is awaiting the action of the Grand Jury on charges of forgery and larceny, he having, it is alleged, stolen a gold watch worth \$75 from Mrs. E. Cutter King, 292 Newbury St., sold the watch to Paulman.

The October meeting of the New England Watchmakers' Club will be held Tuesday evening of next week, Oct. 12, in room 11, Engineering building "B," Massachusetts Institute of Technology, Boylston St. The principal guest and speaker will be Charles T. Higginbotham, consulting superintendent of the South Bend Watch Co. Mr. Higginbotham's address will be of great value to watchmakers, and he expects to have a working model of the lever escapement to illustrate certain points of his talk. The lecture is open to all who are interested, whether club members or not.

C. F. Pettingill, a well-known Quincy, Mass., jeweler, has, with Mrs. Pettingill, returned from a hunting trip in the Maine woods, having had his headquarters at Rangeley. Not only did Mr. Pettingill find his outing a most enjoyable one, but made a record for himself as a fisherman, he succeeding in landing a salmon weighing 10 pounds and eight ounces. The *Maine Woods and Maine Sportsman*, published at Phillips, Me., speaks with enthusiasm of Mr. Pettingill's feat, and declares the salmon in question to be "the big fish of 1909."

Bernard Alexander, who, until his retirement five years ago, was a well known optician, died, Tuesday of last week, at his home in Dorchester. He was born in Posen, Germany, 73 years ago, and as a lad learned the trade. He was a comparatively young man when he came to Boston and established himself in the profession which he successfully followed until he gave up active duties to live at his home at 99 Wheatland Ave., Dorchester. His death was sudden, caused by lung trouble. He belonged to the Knights of Pythias, Red Men, Odd Fellows and Order of Brith Abraham. He leaves a widow and 14 children. The funeral took place Wednesday.

Among those who recently inspected the Waltham Watch Co.'s plant were: Frank Reynolds, Hartford, Conn.; John J. McLellan, West Haven, Conn.; Theodore Peterson, Providence; J. B. Pierce, Butte, Mont.; W. I. Graffam, Portland, Me.; E. W. Barter, Colorado Springs; H. L. Williams, Rochester, N. Y.; Cortland Myers, Jr., Cambridge; William H. Eaton, Pawtucket, R. I., and B. L. Thurston, Johannesburg, South Africa. Frank E. Thompson, of the machine department, has had unusual success as a grower of dahlias, producing 140 varieties at a flower show at his place in Waltham. Miss Agnes Brierton, of the punch department, was married, last week, to James Flanagan, of Watertown.

Newark.

There is a general call for help all through the trade here.

Schuler Bros. are now located in the Schlossstein building.

Mr. Kraus, of the Steeber, Kraus Co., was in town, Saturday, and returned to the road immediately.

Herman C. Schwartz, of the Charles C. Wientge Co., is touring New York State, Pennsylvania and Ohio.

George W. Starkweather, of the William F. Renziehausen Co., refiners, started, on Monday, for his Fall Canadian trip.

John F. Schrink & Son, who have been located for some weeks in their new building, at Mulberry and Emmet Sts., report business fair.

John Conover, a jeweler of this city, and family have leased the Struble residence, on Price Ave., Branchville, for a Winter home and will occupy it soon.

The J. E. Mergott Co., making metal goods, has decided to construct a frame-pooling room near the factory on Jelfie Ave. It will be used temporarily pending the construction of a larger structure.

E. A. Guenther has resigned from Kohn & Co., his resignation taking effect on October 1. Mr. Guenther goes into business for himself in Brooklyn. His place on the road will be taken by George W. Martin.

Many of the Newark factories have been seriously interfered with by the absence of employes at the Hudson-Fulton celebration. In some cases the places were forced to close afternoons while the young men and women employes went to enjoy the festivities.

Newark had the honor of not only supplying all the souvenir badges for the Hudson-Fulton celebration, but also of refining the silver that made them. The badges were furnished by the Whitehead & Hoag Co. and the silver supplied by the W. F. Renziehausen Co.

John M. Kiefer, a jeweler, has been the subject of investigation by the lunacy commission here. It is charged by his wife that he is insane, while his brother, Andrew O. Kiefer, who manufactures jewelry at 61 Arlington St., alleges that he is of sound mind, and that his wife's charges are based on selfish motives. Kiefer has already been confined in an insane asylum. The hearing will be continued this week.

Mueller & New, jewelers, at New Brunswick, N. J., have opened their new and handsome store, at 357 George St., opposite the New Brunswick Trust Co. The building, on which work was commenced last April, is of brick and three stories high, and the façade presents an exceedingly artistic and attractive appearance. The entire lower floor, 20x80 feet, is to be occupied by Mueller & New, and will provide double the space of their previous quarters.

S. W. Granbery, of the J. A. & S. W. Granbery Co., was an aide in the military parade at the Hudson-Fulton celebration, last Thursday. Mr. Granbery won the race for cruising boats with his *Irene II.*, last Thursday, in the aquatic events, under the direction of the New York Motor Boat Association. The boat went 20 miles in 1 hour 50 minutes and 29 seconds. Mr. Granbery has won quite a reputation as a

yachtsman, having recently captured a prize in a race around Staten Island in the *Irene II.*

The police are searching for two men who recently entered the jewelry store of H. R. Meyers, 427 Grove St., Jersey City, and attempted to hold him up. According to the story told to the police by Mr. Meyers, one of the men first asked if he would exchange American for foreign money. Mr. Meyers replied that he wasn't in that business. The man then took a revolver from his pocket and, pointing it at Meyers' head, commanded him to throw up his hands. Instead of obeying, Meyers rushed to the room in the rear of his store to get his revolver. When he returned to the store the men had disappeared. Mr. Meyers then hurried to the Second Precinct station and reported the attempted hold-up.

Buffalo, N. Y.

Herman Boasberg is on a business trip in New York.

The Seneca Loan & Jewelry Co. is making alterations in its store at 84 Seneca St.

Abram Green, a watchmaker, of Youngstown, O., is seriously ill at Niagara Falls, suffering from acute indigestion.

Handsome silver cups given as prizes at the Welland County fair were recently exhibited in Mrs. James Tuckey's jewelry store, in Welland, Ont.

The Buffalo Lens Co. has been incorporated with a capital of \$5,000. The directors are Herman and Helena Silbert, Buffalo, and I. Q. Vetter, Rochester.

According to a report from Westfield, N. Y., E. H. Overton has bought the Chautauqua jewelry store, having secured the jewelry concession at that famous resort for 1910.

The final meeting of creditors in the matter of Nelson A. Soggs, deceased, a Niagara Falls jeweler, was adjourned to Oct. 9 at a session of bankruptcy court in Lockport recently.

Among the customers who recently visited the Buffalo jewelry market were: W. E. Longmate, Elmira; F. D. Kelsey, East Aurora; R. J. Tarc, North Collins; Mrs. J. C. Denniston, Dansville; C. L. Kerr, Silver Springs; George Engel, Springville, and A. J. Tullian, Alpena, Mich.

The picture of Albert Zilliox, Buffalo jeweler, recently appeared in a Buffalo newspaper in connection with a story on the coming carnival to be held by the merchants of William St. Mr. Zilliox is a member of the finance committee, which will play a prominent part in the celebration.

M. A. Wander, a well known jeweler, who was formerly in business in this city, has been appointed outside representative of the clock and silverware department of King & Eisele. He is taking the place of Samuel Goldberg, who resigned to engage in business. That firm, which recently sent out their 1909-1910 catalogue to the trade, is making extensive alterations in its building to keep pace with the rapidly increasing business.

An old suit case containing a bar of silver on which were stamped the words "Dodge Mfg. Co., Mishawaka, Ind." was recently found in a ditch on Koons Ave.,

in this city, and detectives are trying to locate the owner. The case also contains counterfeit quarters and half dollars. It is an established fact here that the India firm undoubtedly was not aware that its silver had fallen into the hands of counterfeiters. A bar of lead and several plaster-of-paris molds were also in the suit case. Secret service men are trying to find the owners of the outfit. A considerable amount of counterfeit coins has been circulated in Buffalo lately.

An indictment was recently returned at Batavia, N. Y., against Lottie Blazak, alias Kugler, alias Fisher, of Buffalo, who was charged with grand larceny in the second degree. She was accused of attempting to steal two diamond rings from the jewelry store of Charles Bradley & Co., Batavia. The prisoner at first pleaded not guilty, but later pleaded guilty. Justice Emery then suspended sentence on the prisoner and paroled her in charge of Mrs. Mix, police matron, and Mrs. Garrett, wife of a Batavia sheriff. Not long ago the defendant made a statement in which she declared that two men named Bevac and Schultz were implicated with her in the attempted robbery. The fact that the court took no cognizance of her statement indicated that these men were fully exonerated in connection with the case.

The meeting of the Buffalo Optometric Society at the Lafayette Hotel, last Friday night, was a pronounced success. Practically all the leading members of the organization were present. A tempting menu and appropriate speeches were among the features. A spirit of good fellowship prevailed, and the committee in charge of the event, E. G. Wiseman, J. P. Simcox, E. V. Syrcer, L. W. Aldridge, W. W. Hammond and J. Hansen, were delighted with the attendance and the success of the programme. Among the speakers of the evening were Prof. H. D. Minchin, of Rochester University, who spoke on "The Human Eye; What It Should Do; Why It Sometimes Fails to Do It; the Reason and the Remedy." Among the other speakers were Edward E. Arrington, president of the Optical Society of the State of New York.

Jireh Kinney, who has kept a jewelry store at 92 Seneca St. for the past 37 years, recently returned to his place of business after an absence of four weeks caused by illness. W. M. Wickham has charge of the store when the proprietor was on the sick list. Mr. Kinney intends to retire from business soon. His home is in East Aurora. Although he has been at his Seneca St. address for a long period, Mr. Kinney thought when he first went there, in 1870, he would stay only about six months, and planned to move nearly every year since he opened the place. He started in the jewelry business in Providence in 1855, and he was in Pawtucket when the Civil War broke out. He entered the service in the 1st Rhode Island Infantry, April 17, 1861, and later served in the 3d Massachusetts Infantry, and still later in the 23d Unattached Co. He came to Buffalo on the day that President Lincoln was assassinated and worked for Daniel B. Castle, who had a jewelry store at that time in the Mansion House. He later worked as a jeweler for Thomas Dickinson.

5,028. DUST-PROOF SLEEVE FOR STEM WINDING WATCHES. FREDERICK J. HUGHES, Watford, Ont., Canada, assignor to C. A. Class, Walford, Canada. Filed May 9, 1908. Serial No. 431,968.

A dust-proof sleeve for stem-winding watches, comprising an outer section in which an opening is formed in a circular groove or recess is formed, and an inner section provided with a cover in which a circular threaded opening is formed, and the body of said inner section fitted to and adapted to be inserted in said annular recess or groove in said outer section, in combination with a stem provided

with a screw thread on its outer face, and the screw thread on said outer face of said stem fits into and adapted to engage with said screw threaded socket in said cover to secure said inner section of said dust-proof sleeve to said stem.

935,085. WATCH-POCKET FOR VESTS. LEWIS B. AVERY, Bridgewater, Mich. Filed Feb. 10, 1909. Serial No. 477,231.

In a vest, the combination of a watch-pocket having openings at its bottom with the inner por-

tion of the vest having a slit or opening *q r* near the lower edge *E F* of the vest, to facilitate the removal of dirt that would pass through the bottom of the pocket to the said lower edge.

935,122. CUFF-BUTTON. EUGENE W. MOREHOUSE, Providence, R. I., assignor to B. A. Ballou & Co., Providence, R. I. Filed April 8, 1909. Serial No. 488,680.

In a cuff-button, the combination of a post having a T-shaped end; two tubular bearings

mounted on the extremities of the T-shaped end in alignment with each other, and a button head provided with a rolled-over edge, which edge is

adapted to overlap and clamp said two tubular bearings.

935,312. TIME RECORDER. CLINTON E. LARRABEE, Binghamton, N. Y., assignor to the International Time Recording Co., New York. Filed Sept. 10, 1908. Serial No. 452,122.

In a time-recorder, the combination of a record receiver adjustable with respect to the impression

point, a locating member adjustable independently of said receiver, for shifting the receiver to a position determined by the adjustment of said member; and time-controlled mechanism for adjusting the locating member.

935,472. SAFETY MATCH-BOX. JOSEPH DEMAINE and WILLIAM H. DEMAINE, Ashworth, Ont., Canada. Filed March 30, 1909. Serial No. 486,675.

A receptacle having an open top and its face provided with an offset cut away portion adjacent its top, a closure for the top, a partition within the receptacle, an offset member upon the top projecting within one of the compartments provided by the partition, said partition having its

faces adjacent its front provided with serrations, integrally formed resilient fingers also provided with serrations upon the sides of the receptacle, a substantially U-shaped door for the offset cut away portion of the receptacle, a resilient catch between the offset door and the closure of the receptacle, elliptical springs within each of the compartments adapted to exert a forward pressure to force the matches within the receptacle toward the front wall of the receptacle, and means for retracting the springs.

DESIGN.

40,279. CLUTCH FOR SCARF-PINS AND BROOCHES. CHARLES P. GOLDSMITH, New

York, a signor to Charles P. Goldsmith & Co., New York. Filed May 22, 1907. Serial No. 375,177. Term of patent 7 years.

TRADE-MARKS REGISTERED SEPT. 28, 1909

75,352. CLOCKS. BAWO & DOTTER, New York. Filed June 5, 1909. Serial No. 42,861. Published July 27, 1909.

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1908, FROM The Illustrated Official Journal.)

ISSUE OF SEPT. 15, 1909

10,746. JEWELRY, ETC., FASTENINGS. A. E. E. KEATING, Harringay, London. May 18.

Relates to fastenings for safety-pins, rings, brooches, etc., comprising interlocking parts secured by a sliding sheath. One member *c* has a

notch *b*, which engages with a ridge *g* inside the slotted tubular part of the other member *d*. Engagement is secured by a sliding sheath *n* with a stud *p*, which traverses the slot in the member *d*.

10,787. CLOCK CASES. E. C. R. MARKS, London. (W. E. McGraw, Everett, Mass., U. S. A.) May 18.

The casing *a* of a clock is made of transparent material on which are etched designs such as *e*, and is closed at the top and open at the bottom. The movement is protected from dust and corrosion by being enclosed in a metal casing *f*, which

is mounted in the front and back walls of the outer casing *a*, and is highly polished so as to reflect the designs on the outer casing. The cylindrical surface of the casing *f* may be fluted, as shown in Fig. 5, or corrugated, as shown in Fig. 6, in which cases the reflected images are distorted.

10,821. THIMBLES. C. E. ILES, Birmingham. May 19.

For the purpose of ventilating the interior of thimbles, the crowns are provided with one or more holes and a perforated guard is provided in

the interior of the crown. In the form shown in Fig. 1, the crown *a'* has a central hole *a''* and a guard *b* of steel wire gauze is fitted immediately

SOLIDARITY

SOLIDARITY

SOLIDARITY

"THAT'S ALL"

America's Leading Jewelry Auctioneer

James L. Hand
14 Maiden Lane, New York

The largest and most successful sales ever conducted in the United States and Canada were conducted by Hand. Many auctioneers advertise that they are "wonders." Printers' ink is purchasable and the man with little ability might call himself the greatest ever. Write them all if you wish to but write "Hand" for his booklet on auctions. It will save you money and reputation. Why jeopardize your business by employing a "has been." Employ "Hand," the recognized Leader.

Read what three of the leading papers of the U. S. say.

The *Detroit Free Press* says: "It requires no special talent to sell average merchandise at auction, but in selling a stock as fine as that carried by Sturgeon & Co., a man of more than ordinary ability is needed. The magnificent collection of precious stones, the products of the famous silversmiths, the objects of art, etc., that comprise the largest stock of its kind in this section of the country, were described and sold by Mr. Hand in a manner both interesting and instructive. Never before has such a representative audience been collected at an auction sale in Detroit."

The *Association Jeweler* says: "Mr. Hand has avoided at all instances identifying himself with fake sales or poor business alliances, as in the present case he has allowed his name to be coupled with only high class retail concerns."

The *Omaha World Herald* says: "The auction sale of the fine stock of the Mawhinney & Ryan Co. was ably conducted. Its success was due to the personality of Mr. Hand, the auctioneer, who is a man of education and refinement."

I conclude this week the most successful sale ever conducted in southwestern Iowa, the stock of E. H. Leffert, of Council Bluffs, reducing this fine \$60,000.00 stock in four weeks. Write Mr. Leffert as to my ability and write me to my New York office for a list of the great sales made by "Hand."

If you value your reputation "Hand" is the man.

JAMES L. HAND.

in the form of a shallow cup. Below the disk is a hexagonal disk *c*, while below the disk is another gauze disk *d* superimposed upon a perforated diaphragm *e*. In a modification, the gauze is suspended with and a star-shaped disk used, and another, only a gauze disk is used above the perforated diaphragm. Where the thimble has a lining *f*, the parts are held up between the lining and the crown, but where there is no lining, the disk *c* and any other elements used, may be seated in an annular groove *a* formed in the interior of the thimble, as shown in Fig. 9, or the disk *c* may be indented beneath the disk. In a further modification, shown in Fig. 11, a well *a* is formed in the crown *a*¹, and the sides of the well are perforated to provide ventilation holes.

1909. JEWELRY FASTENINGS. W. TRAININ, London. May 21.

For additional security, the spring tongue of a snap fastening for jewelry is provided with a flat or grooved portion *c*, which is engaged

the bolt *e* carried by the hook portion. The bolt is prevented from being totally withdrawn by a spring working in a groove in the bolt, or, by providing the bolt *g* with an additional limb *g*¹ carrying a stop piece as shown in Fig. 6.

131. BROOCHES. T. D. PANNETT and T. L. PANNETT & SONS, London. May 22.

A clip is attached by means of a chain E and is fastened D to a brooch A for the purpose

of suspending a light flat article, such as a ball-gramme. The clip comprises hinged jaws, which are held either open or closed by a flat spring H secured to the center of one jaw G. A row of teeth G⁴ on the jaw G lies between two rows of teeth G⁵ on the other, when the clip is closed.

11,148. BRACELETS. E. LOH MULLER, Cologne, Prussia. May 22.

A bracelet is constructed in the form of a gated ring. The segment *a* is a tube containing a

bolt *b* which normally closes the ring, but can be withdrawn by the knob *e* against the action of a spring *d*.

11,159. PINS, DRESS. A. BRUCKMANN, Pforzheim, Germany. May 22.

In safety or retaining devices for scarf-pins, hat-pins, etc., the gripping-members carried by a slide-piece working in a tapering casing consist, according to this invention, of rollers. Figs. 2, 3, 4 show cross-sections of one form in which the

slide-piece *d* is spring-controlled and carries two rollers *e* mounted in transverse slots *h* in the

piece *d*. In a modification, one roller only is employed.

Applications filed Aug. 30 to Sept. 4, 1909.

19,790. NEW STUD FOR COLLARS. DAVID GWYN ROBERTS, Staple Hill, Bristol.

19,953. IMPROVEMENTS IN HAT-PINS. CHARLES MAZUC, Liverpool.

20,022. PROCESS FOR INLAYING AND ORNAMENTING METALLIC SURFACES. SERRARD OSBORN COWPER-COLES, Westminster, London.

20,056. SAFETY FASTENERS FOR BROOCHES, JEWELRY, ORNAMENTS, BUCKLES, CLASPS, MEDALS, ORDERS, BADGES OR SAFETY-PINS, OR FOR ANY SIMILAR OR ANALOGOUS PURPOSES. GEORGE HUDSON GRIFFIN, London.

Complete specifications accepted Sept. 8, 1909.

18,406. FLEXIBLE METALLIC WAIST-BAND. BELT, GARTER, BRACELET, CHAIN OR OTHER SUCH ARTICLE. PEARCE & BERLYN.

1909. 9,517. MANICURING APPLIANCES. STRAUS.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Sept. 29.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the port of New York for the week just ended:

Amapala: 1 case silver plated ware, \$122.

Auckland: 70 cases clocks, \$961; 12 cases plated ware, \$567.

Bremen: 1 case optical goods, \$150.

Berlin: 2 cases clocks, \$136.

Bombay: 27 cases clocks, \$461; 33 cases clocks, \$601.

Buenos Aires: 33 cases clocks, \$927; 71 cases clocks, \$1,500.

Calcutta: 1 case watches, \$184; 7 cases clocks, \$174; 21 cases clocks, \$387.

Colon: 10 cases clocks, \$360; 1 case clocks, \$180.

Christiania: 8 cases clocks, \$319.

Colombo: 20 cases clocks, \$381; 53 cases clocks, \$562.

Corinto: 20 cases clocks, \$283.

Havre: 2 cases silver, \$350; 2 cases jewelry,

\$266; 1 case silverware, \$1,000; 1 case optical goods, \$212.

Glasgow: 34 cases clocks, \$765.

Guayaquil: 1 case jewelry, \$1,401.

Hamburg: 2 cases optical goods, \$266; 2 cases watches, \$2,824.

Havana: 1 case plated ware, \$107; 1 case jewelry, \$139; 10 cases clocks, \$179.

Hohart: 2 cases plated ware, \$291.

Las Palmas: 6 cases clocks, \$104.

Liverpool: 2 cases jewelry, \$550; 1 case thermometer, \$120; 2 cases watches, \$1,200; 1 case silverware, \$100; 94 cases clocks, \$594; 2 cases watches, \$1,250; 3 cases silverware, \$1,173; 12 cases clocks, \$590; 3 cases plated ware, \$296; 2 cases watches, \$1,200; 1 case optical goods, \$770.

London: 6 cases optical goods, \$2,839; 4 cases watches, \$440; 76 cases clocks, \$2,537; 32 cases watches, \$5,927; 2 cases plated ware, \$327; 3 cases optical goods, \$269.

Matanzas: 1 case optical goods, \$293.

Montevideo: 3 cases plated ware, \$350; 60 cases clocks, \$525.

Para: 4 cases watches, \$2,194; 2 cases jewelry, \$738; 15 cases clocks, \$390.

Rio de Janeiro: 3 cases jewelry, \$964; 3 cases optical goods, \$368.

Rotterdam: 1 case optical goods, \$150.

Santo Domingo: 33 cases jewelry, \$55.

Santiago: 6 cases thermometers, \$399.

Shanghai: 4 cases clocks, \$1,427.

Southampton: 7 cases watches, \$1,355; 1 case optical goods, \$308.

Sydney: 8 cases optical goods, \$815; 3 cases watches, \$971; 10 cases thermometers, \$600; 102 cases plated ware, \$5,618; 107 cases clocks, \$2,500; 39 cases plated ware, \$2,221; 23 cases clocks, \$350; 4 cases optical goods, \$439.

Trinidad: 3 cases plated ware, \$266.

Valparaiso: 8 cases plated ware, \$1,305; 3 cases watches, \$127; 6 cases silver plated ware, \$620.

Wellington: 2 cases watches, \$346.

The Silver Treasure of Hermopolis.

THE famous silver treasures of Hildesheim and of Boscoreale are universally known. The older Hildesheim treasure contains the most beautiful examples extant of Greek work in precious metals, and the Boscoreale discovery brought us also curious representations from Hellenic times, such as the "Dance of Death" on a silver cup. The Hildesheim treasure is in Berlin, the Boscoreale, discovered in 1895, came by roundabout ways to the Louvre. The owner of the land between Pompeii and Vesuvius, Vincenzo Prisco, had the silver carried secretly to France, and sold to Baron Rothschild, who presented it to the Louvre.

A third discovery of antique silver was made a few years ago on the west bank of the Nile, near the present village of Achmumen, on the site of the old Hermopolis. As late as 1821, a French expedition saw 12 large pillars projecting 17 metres high in the air, the remains of a Greek portico. To-day they have disappeared, like other ruins, and were probably used in the building of a modern saltpetre factory. But a collection of silver was found there, wrapped in coarse linen. Most of it was melted down, but some came into the hands of dealers, and at last to the Berlin Museum.

There are four well preserved smooth flat dishes, a shallow bowl, a small flat plate, and fragments of a very large flat, corrugated platter. The chief piece of the collection, a flat silver dish 25 centimetres in diameter, has in the center a repoussé head of Hercules. Another shows a Maenad, and a third, of poorer silver, is smooth.

The collection probably dates from the period before the Christian era.

Drive-Wheels in Your Business

A line of Elgin Railroad Movements will prove a strong drive-wheel in your business. Not only will the Railroad Elgin command the patronage of railroad men in your district, but it will also attract *other* trade, for it is only natural that the man who wants a reliable timepiece will go where the railroad man, whose duties require him to have a correct and durable watch, buys his.

Briefly stated, these are the advantages of the Railroad

Elgin

Large plain hands and figures; large spring which will run longer on one winding than that of any other railroad watch; silver finish, metal dial easily seen in faint light—the only metal dial with inlaid figures of hard enamel (or, if preferred, watch can be had with plain enamel dial). The thinnest railroad watch made. Cased at the factory and timed in the case.

Another business drive-wheel is that Elgin is the most popular watch word everywhere—a popularity maintained by Elgin advertising and, in itself, a distinct asset to the dealer—to *you*.

Advertising in railroad magazines is creating a demand for the Elgin with the "49 silver dial" or the "49 enamel dial," and your stock should be in readiness to anticipate the demand. Your jobber or the Company will furnish prices on request.

These are the four grades and established retail prices as advertised:

	GRADE		20 YEAR GOLD-FILLED	25 YEAR GOLD-FILLED
VERITAS		23 JEWELS	\$46.00	\$48.00
VERITAS		21 JEWELS	\$43.00	\$45.00
FATHER TIME (VERITAS MODEL)		21 JEWELS	\$38.00	\$40.00
B. W. RAYMOND	" "	19 JEWELS	\$34.00	\$36.00

ELGIN NATIONAL WATCH COMPANY

Factories: Elgin, Ill., U. S. A.

THE HOROLOGICAL REVIEW

Complicated Watches.

Written expressly for The Jewelers' Circular-Weekly by H. Reinecke.

Cross-Watch Made in 1600.

IN the historical division of the Jubilee Exhibition of the artisans of Steiermark the lively interest of the technical and lay visitors was aroused by an old cross-watch constructed about 1600 A. D., by the then celebrated clockmaker and jeweler,

At the present time many watches are made which may be used to do everything which may be done by mechanical contrivances in connection with a timepiece in the shape of a watch. Some of these may be named and passed in review, pointing out generally their uses, attractive points and construction. Among them may be named hour, quarter hour and minute repeaters, center, seconds and chronographs of many varieties, simple and perpetual calendars, clock watches, double-time watches, sidereal watches, musical and alarm watches, etc. The more useful ones are chronographs, repeaters, which strike hours and quarters, and simple calendars. Some of the others are artistic or novelities.

Practical double-timers are yet destined to become a desideratum to meet the introduction of different standards of time in relation to Greenwich time in this country and elsewhere. Centre seconds have been for a long time useful to medical men, to mariners and to invalids, etc. Fractional parts of seconds are wanted now in everything, in science, and in anything subject to accurate time, including amusements and games. Chronographs indicating fractional parts of seconds have not yet reached any point of reliability and are still being perfected. In fact, all complicated watches, when needing repairs, must have their construction studied patiently by skilful watch repairers only. Inexperienced workmen ought never to presume to do any repairs on them.

Single calendars have been described as follows: "In these the day of the month is shown, and the watch automatically changes it at midnight each 24 hours. The date dial is divided up to 31 days and for 28, 29 or 30 day months, the hand requires correction. Some calendars show in addition the days of the week, the month and the age of the moon."

In these simple calendars are shown the day of the week, the month and the moon (except for a small error that accumulates with the moon disc), the date only requiring corrections.

The calendar wheels are driven from the hour wheel, which turns once in 12 hours.

This is made to drive two wheels of exactly the same size, turning in 24 hours. A pin in one of these wheels moves the day of the week wheel one tooth. This wheel has teeth and is mounted on a fixed stud in the watch plate and is held in position by a spring or a jumper. The other 24-hour wheel similarly moves the date wheel nearer the month wheel, which has 12 teeth, one tooth in each revolution.

A second pin on one of the 24-hour wheels moves the moon wheel one tooth each day. In cleaning these watches leave all calendar wheels and studs dry, but oil the springs where they touch sparingly. When putting together set the watch at 12 o'clock, then put on all calendar wheels in such a position that they just begin to change. As a rule, each hand and wheel can be set by jumping it round with a push on the case side. Clean all these pushes from dirt, and oil them.

The independent center seconds watch was introduced to enable the seconds hand to be stopped and started without stopping the watch. These watches have two main-springs and two trains of wheels. One is the going train, the other the center seconds train, and its sole business is to drive the second hand. The escape pinion has always six leaves; therefore, one of these leaves comes around for each second.

The last pinion of the seconds train was a fly pinion with a light arm that just caught the leaves of the escape pinion. Every time a leaf of the pinion passed the arm of the fly made one revolution. This caused the center seconds hands to beat dead seconds. The independent train was stopped and started by a slide on the side of the case.

Center seconds watches have the minute hand driven by motion wheels and without a center post in the center wheels. If the depths of these wheels are a little shallow they allow the minute hand too much side shake. To reduce this error, some watches have a very thin and light spring acting on the teeth of the canon pinion to hold it back. The pressure of such a spring is so slight that it does not interfere at all with the going of the watch.

(To be continued.)

ANTIQUE CROSS-SHAPED WATCH.

Johann Georg Mayr, of Augsburg, and lately obtained from private ownership by the Graz Museum of Industrial Art. We take this opportunity of presenting our readers with an illustration of this cross watch, re-

Waltham Watches

The history of the WALTHAM WATCH COMPANY is the history of watch manufacturing in America. More than half a century ago this Company introduced a new principle in the construction of watch movements, and has ever since applied the most advanced methods, producing always the best watches in the world. THE WALTHAM WATCH COMPANY has built within its own walls the marvelous machinery employed in making the 16,000,000 WALTHAM watch movements now in use.

Waltham Watch Company

Waltham, Massachusetts

roduced from the *Leipziger Uhrmacher Zeitung*.

The unsymmetrical cross shape with a taller upper and a longer lower part supplied the idea for the form of construction. To relieve the monotonous effect of the ordinary lines, Mayr inserted a dentil at each of the four corners of his frame. The case pieces are made very broad in comparison with the height of the watch, in order to have more space for the dial and for artistic decoration.

The dial itself consists only of a narrow ring in the middle of the cross, and serves as a frame to enclose a small figured bronze relief, two cherubs pointing with raised arms to heaven. The remainder of the surface of the cross around the dial is filled with plastic ornamental figures in relief skillfully adapted to the irregular masses of the surface. A saint in the act of blessing, sitting on a throne in the upper part of the cross over artistically designed clouds, cherubs in the side-pieces, and a representation of the crucifixion in the lower part constitute the subjects of the ornamentation, harmonizing with the religious ideas associated with the form of the timepiece. The figures are embossed by hand in bronze.

On the back of the watch appears the name of the maker and various decorative figures, partly engraved, partly embossed.

The interior of the watch is made of light bronze, gilded only at the dial. The crystal cover has a silver border, gilded at the outside, which, when the cover is closed over the watch, contrasts well with the bronze dial with its more pronounced color effects.

Tempering of Cylinder Wheels.

ACCORDING to a German exchange, the barrel cover of a table clock can be used with good advantage for this purpose, since in these covers a rather high rim has been turned, which protects the teeth of the horizontal wheel very well. A watchmaker

MODE OF TEMPERING CYLINDER WHEELS.

in Leipsic has been able with the aid of this method to temper the center of the wheels with great ease, and commends it to his fellow craftsmen for emulation. The illustration given herewith seems to render further description unnecessary.

Wilson K. Bryant, a jeweler of Saratoga Springs, N. Y., has secured judgment for \$323 against Mrs. Charlotte M. Sherman. The case was tried before a referee and there were objections to him, the defendant's attorney claiming that the referee had not complied with the law upon appointment, and that he was associated in a business way with Mr. Bryant's lawyer. There may be an appeal.

Aeroplane "Ascendency" in the Show Window.

Timely Display Suggesting the Latest Achievement in Aerial Navigation.

IT is quite astonishing that some clock-maker has not, up to the present time, conceived the idea of constructing a show window piece, based on the prevailing craze and having an aeroplane as its motive. This want is at last to be filled, says *La France Horlogère*, and shown herewith is an illustration in which the device dear to Willbur Wright plays the most important part. To speak correctly, the idea submitted by a horologist (who wishes to preserve his anonymity) is primarily a "design" for

a 10-minute wheel, graduated from 0 to 6, and a minute wheel, graduated from 0 to 9.

The aeroplane, supposing it to be in relief on the piece, hides the mobiles. It would be more difficult to set up this system of driving click if all parts of the armature of the aeroplane are expected to stand out clearly in the construction. In such case we would advise the location of the hours on the sun itself, the two eyes of which could be made to show the minutes, while the mouth could be used to display the hours. The operation would always be effected by means of the driving click, which the aeroplane could be made to strike every minute, with the aid of the pawl of its level, controlled by the movement of the pendulum.

The mechanical part of the show window piece is susceptible of easy construction; the idea only is original and novel, and it is for this reason that it has been published in these columns, believing that it will interest readers and that some of them may utilize it. C. B.

A TIMELY SHOW WINDOW PIECE.

a show window piece for the use of watchmakers, and each one can turn to his own account and elaborate on or simplify the piece he wishes to execute, according to his ideas. Here are its characteristic features:

From the globe, in which is concealed a clock movement, there ascends every minute an aeroplane, with the aid of a click-work, or trip, operated by a bent lever concealed by the painted cardboard clouds.

At each release of the click the aeroplane comes in contact with the sun, and at this contact a driving click acts on a ratchet with 60 teeth concealed behind the armature of the aeroplane. This wheel is inscribed with figures from 0 to 59; these are the minutes. At the division 59 a pin causes the hour wheel (graduated from 1 to 12) to advance one notch. It must be understood that the use of only two mobiles compels the use of a minute wheel of a certain diameter, if we desire the minute figures to be visible. It is for this reason that the use of three mobiles may be preferred—an hour wheel, graduated from 1 to 12,

To Straighten a Bent Balance Spring.

WHERE a balance spring is so bent in an upward or downward direction that its restoration appears almost impossible, or attainable only with great loss of time, it can be restored to a plane or flat condition easily and quickly by the following means:

Take a round disc of brass, about three-quarters of an inch (2 cm.) in diameter and one to two millimeters thick; grind it flat on one side and attach to it, at the edge, two steady pins, opposite to one another. Then bore, through the center of the disc, a hole three to four millimeters in diameter. Also make a round steel disc of the same thickness and size and drill a hole of the same size as that in the brass disc through its center, and also provide two holes into which the steady pins of the other disc will fit easily.

After this steel disc has likewise been ground flat, this very simple but exceedingly effective apparatus is ready for use. The bent balance spring is placed on the brass disc, so that the eye lies in the center hole; then cover it with the steel plate, being careful that the coils do not, at any point, overlap. Then take the two discs in pliers and expose them with the enclosed spring to the flame of an alcohol lamp.

As soon as the steel plate acquires the dark blue color, remove the flame; and, with the tweezers, carefully remove the steel disc as quickly as possible. This proceeding will have made the spring perfectly flat, and it will not be difficult to re-dispose it concentrically.

It is to be recommended that each time, before use, the steel plate should be rubbed off with an emery stick, in order that the color shade may be more readily perceptible.

THE SOUTH BEND COMPLETE WATCH
Polaris
 REGULATES THE TIME OF THE WORLD

*Sold Under An
 Everlasting Guarantee.*

THIS GUARANTEE for YOUR CUSTOMER.

You would like to guarantee a watch to give satisfaction forever, if you knew the watch would come up to the guarantee, but up until now such a guarantee would have been at your own risk because no watch manufacturer has ever had sufficient confidence in his product to sell it under such a guarantee.

The **SOUTH BEND "POLARIS"** you can sell under an everlasting guarantee at our risk for every watch of the "POLARIS" grade is accompanied by a written agreement guaranteeing satisfaction forever. If we did not know that the **SOUTH BEND "POLARIS"** was made as good as any watch can be made and would always be an accurate timepiece if not abused, we could not afford to make such a strong guarantee. It is really not a risk on our part, but it is simply insuring by a written agreement what we know the watch will do if given proper treatment. A prospective watch buyer could not ask more.

THIS GUARANTEE FOR YOU.

The **SOUTH BEND "POLARIS"** will be advertised extensively and, of course, we are going to make a strong talk on the first everlasting guarantee ever given on any watch. The result will be a large number of these watches will be sold and we are so confident of its sale that we will guarantee you a profit on every **SOUTH BEND WATCH** of the "POLARIS" grade in twelve months' time from the date of purchase. In other words, we will insure you a sale at a profit by written agreement on the **SOUTH BEND "POLARIS"** within one year.

Space will not permit of our telling you all of this extraordinary proposition on this page, but we hope you will fill in and cut out the coupon in the lower corner and direct it to us to-day.

SOUTH BEND WATCH CO.
 South Bend, Ind.

Send me full particulars of your proposition to guarantee me a profit in one year on the South Bend "Polaris."

MANUFACTURERS OF HIGH GRADE WATCHES

SOUTH BEND :: :: :: INDIANA

Magnetism in Chronometers and Watches.

Prepared expressly for The Jewelers' Circular-Weekly.

A WATCH which is strongly magnetized will stop entirely and will not go at all. When slightly magnetized, wholly or partly in part, it will not keep correct time. At the present time this is quite a common occurrence when the balance or the balance spring, or both, become feebly magnetized, on account of having been located under the influence of a powerful electro-magnet, such as a running dynamo or motor.

When such is the case the watch is brought to the watchmaker, with the complaint that the watch does not keep time, and its erratic running may simply cause variation of seconds, when the balance is vibrating principally one and one-quarter turns, as in such case the magnetic poles of the arm of the balance are counteracting each other.

To produce the best results in a marine chronometer it is customary to give each vibration of a one and one-quarter turn in a horizontal position.

In order to test a pocket watch for magnetism, it is the bad habit of most watchmakers to use a small compass. In this manner magnetism might be communicated imperceptibly to the watch. The proper modus operandi for such a test is as follows:

Take a piece of perfectly soft iron binding wire, about half an inch long and very fine. Tie a fine silk fibre around the middle of it and fix the other end in a slit in a stick of pegwood. This tester will swing freely and point in any direction not influenced by a magnet; but if there is any magnetism present in any part of a watch the tester will point to it. Remember that magnetism of enough energy will point through glass or even through the rim of a watchcase in this manner.

You can test the balance of a watch without taking the watch apart. If these pieces of wire are pure iron they will not become permanently magnetized by their use, but for the sake of safety it is well to make them red hot after having been used.

Demagnetization is accomplished by causing the lines of force to pass through the magnetized piece in opposite and contrary directions. This is done by revolving the magnetized part or the entire watch movement rapidly in the field of a powerful horseshoe magnet. This explains the principle, but quite a number of different methods have been devised by scientists.

Careful tests, however, have shown that a watch or a part of a watch which has once been magnetized is never free again from magnetism. This may be explained by the fact that the presence or subsequent absence of magnetism is a change of molecular structure, which is hardly ever restored to its normal condition when it has once been disturbed, as the vibration of the equilibrium between positions and negative electricity is a natural standpoint in the metal.

A fine watch with a steady and close rate

once disturbed by magnetism may therefore be considered forever spoiled, unless the balance and the balance spring are changed by the use of non-magnetic metals, which may also have to include parts of the escapement.

Many attempts have been made to supply a suitable metal for such a purpose. C. A. Paillard has achieved considerable success with different alloys, of which palladium is the principal component metal. Of such alloys he has compounded several which have been patented.

The first described in the United States Patent specifications contains the following elements:

Palladium	60 to 75 parts
Copper	15 " 25 "
Iron	1 " 5 "

The preceding proportions may be varied and such variations will not affect the characteristics of the alloy.

The process of producing this alloy is stated to be as follows:

About half of the palladium to be used is placed with the other metals and with a small quantity of borax and pulverized charcoal in a clay crucible and heated until melted. The remaining part of the palladium is then added, and when the whole is melted the mass is poured into a mold and is then ready for use.

Patent No. 367,159 described an alloy which is cheaper in its production and which is suitable for a cheap grade of watches or for parts thereof.

The inventor makes the following statement in the specifications:

"I have found by experiment that the alloy hereinafter described and claimed can be successfully employed in the manufacture of watches and timepieces for all the parts not required to be non-magnetic and hardly dilatable, as it is not perceptibly affected by ordinary magnetic or other disturbing causes or influences. The cost of its production is also such that it can be profitably and economically used for all the ordinary parts of watches where perfect uniformity and regularity of movement under all circumstances are not required."

The composition of this alloy is as follows:

Palladium	50 to 75 parts
Copper	20 " 30 "
Iron	5 " 20 "

The method of the production of this alloy is the same as the preceding one.

United States Patent 367,161 describes an alloy possessing in the highest degree the properties desired in parts of high grade watches. The following is the composition of this alloy that is described and claimed in this patent.

Palladium	65 to 74 parts
Copper	15 " 25 "
Nickel	1 " 5 "
Gold	1 " 2 1/2 "
Silver	3 " 10 "
Steel	1 " 5 "

United States Patent 367,161 describes an alloy which, besides possessing the properties of the preceding, has the additional

property of being raised, by tempering, to a very high degree of hardness. The inventor uses this alloy as follows:

"In order that the best result may be obtained in watches and chronometers I have found that it is necessary that other parts of the mechanism employed therein, viz., the escape wheel, the lever, guard pins and regulator index pins, shall possess the same properties and in addition thereto be capable of being tempered to a high degree of hardness."

This alloy has the following composition, viz.:

Palladium	45 to 50 parts
Silver	20 " 25 "
Copper	15 " 25 "
Gold	2 " 5 "
Platinum	2 " 5 "
Nickel	2 " 5 "
Steel	2 " 5 "

Competent authorities say that the segments of Paillard's balances consist of two laminæ of different palladium alloys, the coefficients of expansion of which are so proportioned as to permit them to act as in the compound balance of brass and steel.

After melting the alloy composed of metals mentioned according to patent 367,161, the molten metal should be poured into a mold, to form a plate. This plate, when cold, is to be forged or hammered, being frequently heated to red heat alternately with the forging, until it becomes hard and has obtained the desired thickness. The statement has been made by good authorities that the same method is employed in treating nickel steel of Mr. Guillaume.

(To be continued.)

New Illuminated Clock for Buffalo, N. Y.

AN illuminated electric clock may be placed on the curb at the southeast corner of William and Sherman Sts., in Buffalo, N. Y. A request to place the timepiece at that point has been made by the Citizens' Bank, of Buffalo, to the Board of Councilmen. The board held up its approval, on the ground that the bank should furnish a bond to indemnify the city against any possible accident as a result of a collision or for other reasons. This action was taken as the result of an amendment introduced by Councilman Wright, who pointed out that other cities had been recovered against in cases arising out of the placing of similar contrivances. Councilman Siegrist opposed delay, urging that the bank wished to erect the clock in time for the coming carnival to be held in William St. Councilman Siegrist explained that the proposed clock is not an advertisement. If the Board of Aldermen approves the amendment calling for a bond from the bank the matter will then go directly to the Mayor.

Word was received from Zanesville, O., last week, to the effect that John N. Bonnet, for many years a well-known jeweler of that city, had died Sept. 28 at the home of his daughter, Mrs. C. A. Miller, in Baltimore. Mr. Bonnet has been in ill health for many months past, but his death, while not unexpected, was a great shock to his friends. The deceased is survived by three daughters, Mrs. Miller, Miss Emma Bonnet and Mrs. Helen Powell, and five sons, William, Harry, Charles, John and Arthur.

IN justice to yourself and to the welfare of your business, *don't buy your Fall stock of watches* without keeping in mind that in the 7-jewel field the new remodeled Ingersoll-Trenton is the only *one* sold exactly as Jewelers want *all* watches marketed.

- (1) The "I-T" is, without exception, the best 7-jewel watch ever built. An examination will prove this.
- (2) It is sold only through responsible jewelers and only direct to the retail trade.
- (3) The prices are absolutely restricted, guaranteeing a fair profit.
- (4) It is the most extensively advertised of any watch ever put on the market. Every "ad." reads: "Sold by responsible jewelers only."

No jeweler should overlook the article in his line which is most prominently before the public.

The coupon in the corner will bring full information of great interest to every jeweler who can get these goods.

“YOU HAVE CERTAINLY SOLVED THE OIL PROBLEM”

Is what watchmakers are writing us every day—it is what one of the best known and largest jewelers in New York City wrote us—at the same time telling us that poor oil had cost him over \$5,000.00 last year on account of work being done over without charge.

Haven't you been up against the same condition? You're the exception if you haven't had to clean hundreds of watches and clocks without charge within the year after they had been turned out as repaired.

It's your own fault if you do it hereafter, because you can get an oil now which will not gum, will not evaporate, will not discolor or become rancid, will not corrode the pivots. It is

Fulcrum Watch and Clock Oil

and it is the only watch or clock oil ever known which is absolutely free from acid, AND WE CAN PROVE IT.

FULCRUM OIL sells at 35c. per bottle, or \$3.75 per dozen, and can be obtained from all material jobbers.

Order a Bottle To-day and Convince Yourself.

FULCRUM OIL COMPANY, Franklin, Pa., U.S.A.

The “Monastery”

We constructed the “Monastery” works with a view of competing with a weight movement against inferior spring works. Our success has been great. The weight “Monastery” construction, cchain wind, is of such excellent quality in every respect and offered at such a reasonable figure that it is out of question to-day to offer any hall clock above \$50.00, with long pendulum spring works.

A genuine Grandfather clock has always a weight movement. And we will state that any chiming Hall clock made up with a cheap spring movement can never be satisfactory. The bammer blow is too weak to get the tone out of good bells; only thin, light bells can be used with the little blow of the hammer; every day the spring gets weaker and the chiming slower; it even ceases after 5 or 6 days. Besides, in such cheap affairs the dial works are not suitable for quarter chiming. The combination makes a very poor clock. Not so with the “MONASTERY,” which are heavy, powerful brass works, with solid steel pinions and built as a good weight chiming movement should be constructed.

The illustrated model is a fine piece of furniture, fit for any residence, and can be obtained with three combinations of striking:

1. With five 1¼” tubular bells, made and tuned by Mr. R. H. Mayland (Westminster chimes); list.....\$180.00
2. With five rodgongs, also Westminster chimes; a feature in this combination is that the hour is struck on 4 gongs which, being tuned in a chord, produce a sound which is the nearest imitation of the distant resonance of a big tower bell; list... 151.00
3. Hour and half strike on 4 rodgongs, tuned in a chord; list..... 104.00

Prices F. O. B. New York.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Football Time the Occasion for Striking Window Displays.

SOMETHING suitable for the football season is especially attractive now. A football of gigantic size, placed in the cen-

The sides and back of the window should be hung with college colors of every variety in the form of small flags and pennants.

To make the football is not difficult, the cost is very little. A keg is padded on either end with rags and forms an oval as shown in Fig. A. Cover this entire affair with some strong cloth tacked tightly and drawn smooth. An outer covering of buff-colored cloth is now tacked or sewn over the "football," and after it is crossmarked to imitate leather stitch the ball is complete (see Fig. B).

Fig. C is a sketch of a show window designed along the lines suggested.

For small price cards use oval cut-outs of miniature footballs, with stitches outlined.

Larger signs could be outlined on card shaped like pennants but of various colors.

As catchy text for these signs some of the following might be used:

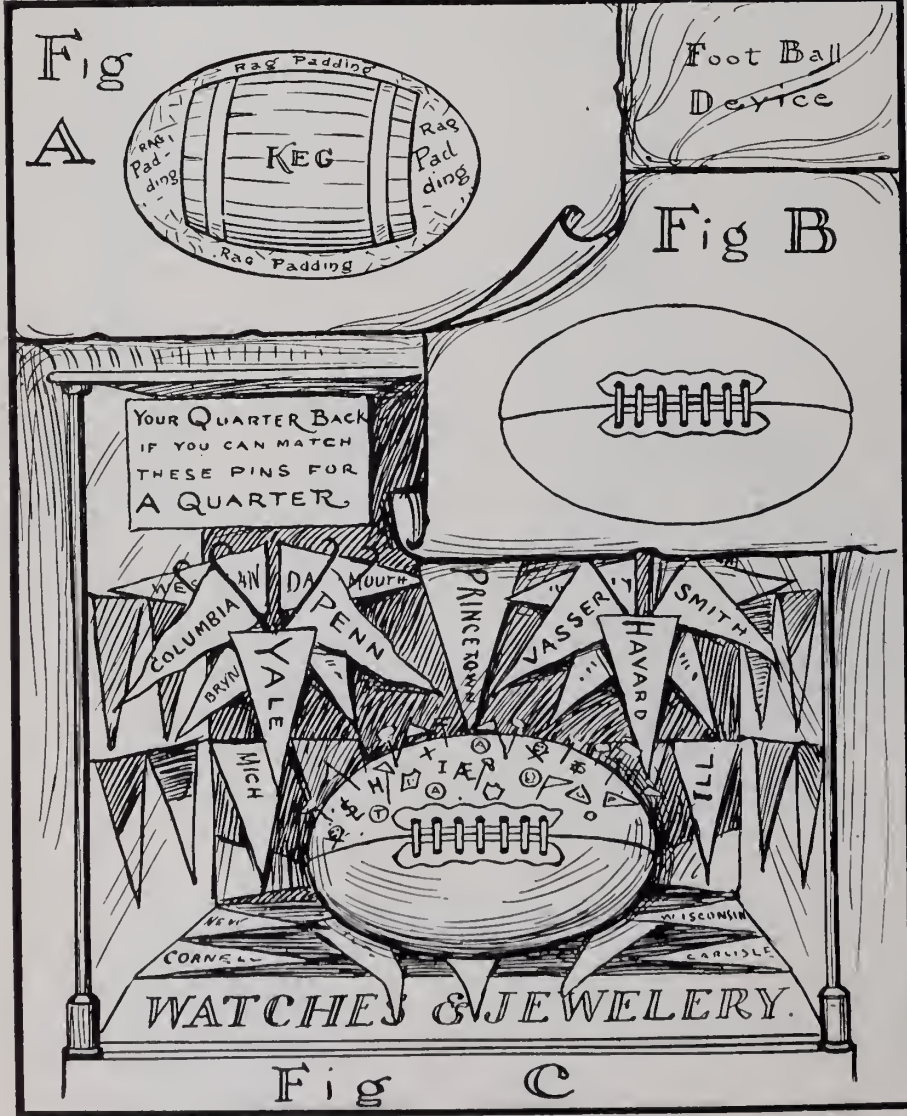

Your "quarter-back" if you can match these pins for a quarter.
 No one ever kicks at these values.
 These college pins are the warmest ever shown.
 Show your colors.
 We've pins of all the colleges.

The display outlined above is one that will be very pretty if care is taken not to make it too gaudy. Match and blend your colorings as nearly as possible, and a tasteful effect will be the result.

Little Courtesies of Business Life.

IF you are a jeweler and someone enters your store and requests to be directed to a certain shoe dealer's or wine merchant's establishment, you courteously tell him where to find these firms. Had the same party asked you to direct him to one of your rivals in the jewelry trade (if you are the average retailer), you most likely would have first tried to ascertain his business with your competitor and tried to sell him some of your own stock or else pretended ignorance of the whereabouts of the people sought for.

Why not be fair toward both the public and your trade members? Seldom, if ever does one divert trade by tricky means—and it is best to be square from the start. Give the desired information, and then it would be perfectly proper to announce that being in the same line, you would be pleased to have a share of the buyer's patronage. Why be less courteous to one trying to find a competitor than if the question were about a dealer in other wares? The pretended lack of knowledge fools no one but yourself. The enquirer will eventually locate the people he wants, and if he is an every-

ter of the window, and used as a display cushion for college pins and emblems, will prove a decided winner.

These need not be purchased but can be rented for a nominal sum from some flag dealer.

Storekeeping Department.

As a sort of human being he will tell how he dodged his question, and both your competitor and his customer will have a good laugh at your expense. Each will be likely to relate the little incident several times, putting you in a bad light.

Apply the Golden Rule in your treatment of your competitors. There are many little warring men in the same trade can extend to each other, and it is mutually beneficial. Customers also appreciate entering the store of a man above little tricks and are likely to patronize as a preference men not afraid of their trade-fellows. Another bad policy to criticize in an unfavorable manner acts as a business method of people in your own line. Customers have a knack of telling their alleged grievances and seeking corroboration. Be dignified enough to "hold your tongue" on such occasions and you will appear at a greater advantage than if you joined in their vituperations.

The man who runs only his own business and attends strictly to it is upbuilding a lasting structure, and he profits immeasurably by the record he establishes of being a liberal-minded gentleman. The busy-body in trade is like the social scold, a favorite with no one, and merits no other treatment than the contempt of all right-thinking people.

Many a merchant scrupulously honest in his dealings is devoid of tact, and by being a stickler in his transactions for little unimportant details acquires an undeserved reputation for being mean.

Avoid petty disputes with customers, even though you know and can prove them to be wrong. Small differences are not worth while fighting for. A little moral triumph over a man frequently means a perpetual grudge on the part of the customer and a consequent trade deficit from this party and his circle of friends.

Bad humor grows on one, and if not checked in time one is apt to become as irascible as a certain old innkeeper, who, entering his public sitting-room on a Winter's day and noticing a guest carelessly expectorating on the large stove in the center of the place, yelled out: "Say, you, spit in my face"! The startled guest inquired what caused the host to hold such odd views of etiquette, and was gruffly informed that "it costs me two dollars to have that stove cleaned and I can wash my face for nothing." Of course, the above is an extreme case, but it illustrates what a ludicrous position a bad temper can place one in.

The public resents churlish treatment from those whom they favor with their patronage. There is no reason why a tradesman should be servile in his manner, but there is every reason for him to be tactful and polite, and he can be so without loss of dignity. A little patience in explaining how to operate any articles sold that are new or unusual will avoid many disputes over breakage and complaints that material was defective. One must also remember that there is always a possibility that the customer's complaint is a just one, and he should be allowed to tell his story.

A man of my acquaintance bought a pair

of shoes from a prominent firm and was displeased with them. He was obliged to return them four times, and he was politely treated each time he visited the store. At last the shoes were forwarded to the manufacturer, and it was found that they were defective, and an investigation was made, which resulted in calling in a large lot of shoes of faulty construction which would have possibly proven a big drawback to selling a heavily advertised article. Consequently it paid to be considerate.

Don't detain customers unnecessarily. Their time may be valuable. Don't talk too much. If customers like to hear anyone talk it is most probable they are fond of hearing their own voices and will appreciate a good listener. Don't pretend a knowledge of the means or income of your customer or hint about what price goods you imagine they can afford.

Don't criticize or make jesting remarks to your trade about other customers; the natural result will be that reflection will cause them to suspect that they will get same treatment. Don't attempt to dust stock, read, write letters or occupy yourself in any other manner while serving customers.

If a customer tenders you a mutilated or even a bad coin, don't pass it back to him with an indignant air. He may be a victim of someone else and unaware of having suspicious money. Give him the benefit of the doubt and return it, saying: "I am afraid you have been victimized; this coin is bad," or some similar polite statement.

A very successful merchant whom I know has a sign painted in his store, reading:

"Kanadian koin
Kan be spent here."

He has made many friends by accepting this and other foreign money, of which people ordinarily find it hard to dispose of.

Should a customer visit your place at closing time, don't yawn or show signs of unrest if you are delayed a few moments beyond your regular time. If you must leave at a specified time, tell your customer so frankly and he will understand that, while hints, even though impolite, are not effective. When occasion requires you to say, "Thank you," say it as if you meant it and not in a mechanical manner.

Another class of persons to whom it most certainly pays to be courteous is the traveling salesmen. Don't act as though you were too busy to entertain drummers. There are some of them who are bores, but the general run are carefully chosen, highly paid and representative men, to whom it is always profitable to listen, if one wants to keep right up to the minute. A merchant who scares off commercial travelers is digging his own business grave, as it is only a question of time when such a man will become a back number.

It pays to give salesmen a hearing. They frequently pull one out of a rut and bring storekeepers in connection with firms whom it is extremely profitable for them to deal with.

Clerks and other business associates should be treated with consideration, so

that they can maintain self-respect. It adds to their efficiency and makes them inclined to extend courtesy to those with whom they come in daily contact in your place of business.

Loud orders and every appearance of quarreling should be avoided. It cheapens an establishment to permit noisy disputes. Also avoid hasty conclusions. Give men under you a chance to explain seeming errors. Sometimes a more explicit statement about the manner in which you prefer work done will prevent misunderstandings. No man will do your work exactly as you do it yourself. The most humble clerk will retain some individuality of manner, and the best one can hope for from employes is that they follow one's instructions as strictly as it is possible for an intelligent man to do and use their own brains to direct them as circumstances seem to indicate best.

Parties associated together for years differ in their ideas as to details, and are successful because they learn to combine their views and yield to each other on minor points.

When advertising your business, either in newspapers or otherwise, make it a point to avoid reference to your competitors, and also be accurate in your statements. It pays to avoid extravagant claims, so only say what you can prove.

It is foolish to try to inveigle people into your store with false promises and is a waste of your time. Moreover, no permanent trade ever results from trickery.

Watch the Other Fellow.

AS soon as a dealer sees the benefits to be derived from carefully and systematically reading the advertisements of his competitors, he will make this a feature of his daily work; not that he desires to follow in the footsteps of anyone, nor copy the ideas for arguments, but to keep in touch with what every competitor in his locality is doing and talking about.

It is a part of his business to investigate, as far as possible, the purposes and methods of operation employed by those in his particular line of business, for often the knowledge thus gained will effect his own plans of procedure. At any rate, the man who keeps himself well posted is not working blindly.

Advertisements usually contain information regarding three classes of articles—something for which there is a great deal of call, some dead stuff that it is desirable to clear out, or new articles which it is desired shall be pushed—all of which it is well to know about.

By reading advertisements it is not only easy to obtain ideas that have heretofore escaped your notice, but some phrase or statement will suggest some entirely new line of thought, to be followed up and worked out to advantage. Your neighbor's ads, if you will let them, will prove a valuable stimulus both to thought and action.

Maxwell & Berlet, Philadelphia, Pa., are distributing a clever little ad. in the form of a score card complimentary to the University of Pennsylvania football players, season of 1909. On one side of the leaflet is the M. & B. ball at the goal.

Libbey
"THE WORLD'S BEST"
CUT GLASS

BUSINESS ESTABLISHED 1818

The customer may not ask to be shown Libbey cut glass, but she expects it to be placed before her.

This is not the exception, but the rule—because, in the customer's mind, cut glass is synonymous with Libbey.

THE CONNOISSEUR'S HANDBOOK.

Definitions of Some Technical Terms in Gold and Silver Smithing and Ceramics
Alphabetically Arranged for Easy Reference.

By Clement W. Coumbe.

(Continued from issue of Sept. 22.)

CALCEUS (Lat.). "The high Roman laced shoe which, in contradistinction to the *caliga*, was worn with gala or official clothing."—Ferrer.

CALCEUS.

A shoe, part of the regular Roman dress, and usually worn in public. Each order, and every *gens*, had its particular kind of *calceus*. The patricians wore a *mulleus* or *calceus patricius*. This was a shoe of red leather with a high sole, like that of the *thurmus*. The leather passed round the back of the heel, where it was furnished with small hooks, to which the straps were fastened. It was originally a part of the royal dress, and was afterwards worn by generals on the occasion of a triumph. In later times, with the rest of the triumphal costume, it became a part of the dress of the consuls. In the second rank came the

CALCEUS.

calceus senatorius, or shoe worn by the senators. This was black and tied round the leg by four straps. In the case of patricians it was ornamented by a crescent-shaped clasp (*luna*). The *calceus* of the equites (see *equites*), and of ordinary citizens, was also black. The latter was called *cro*. It rose as high as the ankle, and was fastened with a simple tie."—Harper's Class. Dict.

CALCITE is a soft mineral. The stalagmitic *calcite* was used by the Egyptians and ancient Greeks for carving vases, statues, etc. (See *alabaster*.) It takes a fine polish, but its hardness being only 3, it becomes easily marred by scratches. Mexican onyx is a *calcite* and much used for ornament.

CALCULUS (Lat.). "A pebble or small stone worn by friction to present the appearance of a pebble. Calculi were used in antiquity for recording votes (for which purpose they were thrown into the urn), for reckoning, and for mosaic paving."—Mollett. Hence our word *calculation*.

CALDAS (Spain). "This (ceramic) factory would appear to have been specialized for faïences in relief. The greater number are covered with a black coating; the others with the customary enamels of the country, violet, yellow and green. Some bulls of excellent design and skilful modeling sold at a low price."—Jacquemart.

CALDWELL, James. An English potter. Became partner with Aaron Wood (1790), the Burslem potter. Firm was known as Wood & Caldwell. The latter retired in 1818 and the firm became Wood & Sons.

CALICE. The chalice suspended from the *ciborium* (altar dome) was called a *calice*.

CALIGA (Lat.). "A military boot worn by soldiers and officers of inferior rank. The *caliga* consisted of a strong sole,

CALIGA FROM ARCH OF TRAJAN.

studded with heavy pointed nails, and bound on by a network of leather thongs, which covered the heel and the foot as high as the ankle."—Mollett.

CALIGARI, Antonio Filippo. An art potter of Lodi (Italy), where he worked at Antonio Ferretti's fabrique (1763). He came to Pesaro under influence of Passeri. In conjunction with Antonio Casali and Pietro da Sassuola, of Modena, he established a faïence fabrique "producing wares of great excellence, hardly to be distinguished from the Chinese."—Jacquemart.

CALIPTRA. (See *calyptra*.)

CALIVER. A gun. "A corruption of the word *calibre*, the name being given in the early part of Elizabeth's reign to those pieces, the bores of which were of one standard size."—Meyrick.

CALIX (Lat.). The Roman equivalent of the Greek *kylix*. (See *cylix*.) It was the

most commonly used of all drinking vessels. It was often without handles, probably.

CALLAINITE is a green hydrous phosphate of aluminum having bluish and whitish spots. Its hardness is 3.5 to 4; specific gravity, 2.5. It is opaque to translucent. What little of it is available is discovered in small round fragments found only at Man-er-H'rock, in Brittany.

CALICULA (Lat.). "A kind of very thin metal disk, more or less ornamented, worn by rich Christians, and especially priests, as an ornament for the dress. *Caliculae* were also made of purple-colored cloth. Many of the pictures in the catacombs represent persons wearing *caliculae* on their *colobia* (see *colobium*) and other garments."—Mollett.

CALLIMACHUS (Gr. Kallimachus). A Greek artist of the second half of the V. century B. C. Said to be the inventor of the Corinthian order of capital. A clever goldsmith evidently, as the golden chandelier in the Erechtheum at Athens was one of his celebrated works.

CALOTE. "A species of skull cap which officers and soldiers wore under their hats in the French cavalry, being saber-proof."—Meyrick.

CALPAR (Lat.). An old term for *dolium* (to which refer).

CALPIS (or *kalpis*). A Greek vessel for carrying water. It was somewhat similar to the *hydria*. Like the latter, it had three cylindrical handles, but the upper one did

CALPIS.

not reach beyond the rim like the *hydria*. Judges' lots were often cast in the *calpis*, and unguents are supposed to have been kept in it.

CALTAGIRONE (Sicily). "It was believed in this neighborhood, where potteries have existed from very early times, the Arabian occupants of Sicily had furnaces producing those siliceous glazed vases, some of which bear ill-indited Arabic lettering, and of which we have examples in our museums. * * * Prince Filangieri * * * tells us that the remains of such furnaces and the fragments of such wares had been found at *Caltagi-*

KALANA GLASS

AN entirely new and beautiful effect in etched glassware in which floral designs, such as pansy, lily, poppy, geranium, etc., are shown in an attractive manner true to nature. No illustration could convey the exquisite beauty of this ware.

During the dull times we have been preparing to meet the prosperity which we were certain would follow. You can now find among our samples many good things in Cut Glass, Engraved Glass and Rock Crystal for prompt shipment.

me. These, however, refer to wares which have arranged as a separate class siculo-Arabian). * * * The glazed and enameled pottery produced at *Callagirone* later date seem to have been of little importance."—Fortnum.

CALTHROP, caltrop, caltrap, galytrap, galap, chevaltrap. "An iron instrument used ancient times to gall and wound horses' feet on time of war. It had four spikes so

ORIGINAL CALTHROP.

ACTUAL CALTHROP.

arranged that when placed on the ground it was always erect."—Milbourne. In Christian art the *calthrops* are attributes of St. Themistocles.

CALVARY, cross, also known as *cross of the Passion*, or *cross of Christ*. This her-

CROSS CALVARY.

aldic cross "is mounted on three steps, pieces or degrees."—Robson.

CALZE, Pier Francesco. Faience artist of Castel Durante (XVI. century). Decorated istoriati pieces, with mythological subjects.

CAMAÏEU. This term "formerly meant a piece graven in relief, or cameo. The term is now more frequently applied to a painting in monochrome (of one color), in grisaille, black, blue, green or red."—Marsyatt.

CAMALE, or *camallus*. "In French camail.

"METHOD OF FASTENING CAMAIL TO THE BASINET. ACTUAL SIZE."—MEYRICK.

The chain covering for the neck which

was fastened to the basinet."—Meyrick.

CAMAIL (see *camale*), *camelaucum*, *calamaucius*, *calamaucum*. "The camail. It was

CAMAIL, OR CAMALE.

originally made to cover the head as well as the shoulders"—Meyrick.

CAMALLUS. (See *camail*.)

CAMAYEU (same as *camaicu*). "Monochrome painting, i.e., in shades of one color; or in conventional colors not copied from nature."—Mollett.

CAMBA, *cambale*, *cambiae* or *camberota*. "Jambes, or armor for the legs."—Meyrick.

CAMBERIA (Lat.). Italian *Gambiera*. "Jambes, or armor for the legs."—Meyrick.

CAMBRAI (France). "After information communicated by M. de Boyer de Sainte Suzanne, Cambresian ceramics would go back to the XVI. century. * * * In the "Livre au bans" (in the town library) * * * of 1641, is recommended to cleanse the earth intended for 'poterie blanche' from the pebbles and alum glaze it generally contains. This denomination of 'white pottery' again found in several localities of France evidently refers to enameled faience. M. Houdoy has met with a piece of faience signed 'Cambray,' but he thinks it to be only the name of a decorator attached to the Lillois works, and not that of a town."—Jacquemart.

CAMBRESIAN FAIENCE. The "poterie blanche" of Cambrai (to which refer).

CAMBULUM. "An ancient short sword."—Meyrick.

CAMELLA. "An earthen ware or wooden vessel employed in certain religious ceremonies."—Mollett.

CAMEO. "The term signifies work in relief upon stones of two or more differently colored layers, affording a background and a contrast. The term which first appears in the 13th century as *camahutum* is usually derived from the Syriac *chameia*, 'a charm' from the light in which such relics were universally considered in those ages by the Orientals and Europeans. There may, however, be some truth in Von Hammer's conjecture, who makes it the same with *camaut*, 'the camel's hump,' applied metaphorically to anything prominent, and therefore to gems in relief, as distinguished from signet stones."—King. "From the Arab word *camant*, a flower, and used since the crusades."—King.

CAMERA, or *camara* (Lat.). This term denoted, among other things, a chariot with an arched cover formed by hoops.

CAMILLO, of Urbino. Camillo and his brother Baptista (not of the Fontana family), faience artists of Urbino, went to Ferrara. "We hear of fresh experiments in the production of porcelain, directed by Maestro Camillo, of Urbino, assisted by his brother Baptista, and which seem to have resulted in success," but he was killed by

the accidental explosion of a cannon, in 1567, and he died refusing to divulge the secret of his formula.

CAMILLO FONTANA. (See Fontana.)

CAMP (Her.). "A term used by French heralds, as well as *corpon*; and is the same as *componée* or *gabony*."—Robson. (See *componée* and *gabony*.)

CAMPAGUS, or *compagus* (Lat.). "A kind of boot worn by the Roman emperors and

CAMPAGUS. FROM MARBLE STATUE OF EMPEROR AT CARTHAGE.

military officers under the later empire."—Smith.

CAMPANA, Ferdinando Maria. A painter on majolica at Siena (Italy), after prints by Marc Antonio. Said to have worked also at Castelli, and at San Quirico before going to Siena. A plate in the British Museum is signed by him and dated 1733.

CAMPANA SUPELLEX. "Under this title in the Roman period the bronze utensils such as wine sieves, wine ewers, dippers, etc.,

CAMPANA SUPELLEX.

were so called, especially those made at Capua, in the Campagna."—Forrer.

CAMPANED (Her.). "When bells are borne pendent from a *file*."—Robson.

CAMPANI, Ferd. Maria, of Siena. A majolica artist of the XVIII. century. Worked at Terchi's St. Quirico (Italy) fabriqué.

(To be continued.)

A dispatch from Spartanburg, S. C., recently announced the death of George Hennemman, who for a number of years was a well-known jeweler and a prominent resident of that town. Death was due to congestion of the lungs.

An interesting article on the medals of the Hudson-Fulton celebration appeared in *Harper's Weekly*, Sept. 25. The article, which was written by Charles de Kay, contained cuts of the Hudson-Fulton medal, the medallion of the official badge and the first medal of the society, "Circle of Friends of the Medallion."

We Do Not Use Pressed Blanks

Hawkes Cut Glass

IS CUT FROM THE *SOLID* BLANK

No. 1.

No. 2.

No. 1 illustrates a pressed blank, *viz.*:—the pattern pressed into the Glass.

No. 2 illustrates a solid blank, the kind entirely used by us.

The DIFFERENCE in the finished article is unmistakable, the pressed blank being devoid of lustre and brilliancy and giving one the idea of a cheap moulded article. It can easily be detected by passing the fingers lightly over the inside of the article. Wherever the cutting on the outside is deeper a slight swelling on the inside will be noticeable to the touch. Whereas the genuine article cut from the solid blank is free from all these defects, being perfectly smooth on the inside, having a lustre and brilliancy only equaled by that of the diamond, and when held to the light is as clear as crystal.

Pressed or Figured Blanks Cut Over Appeal to the Department Store Trade

WE DO NOT SELL DEPARTMENT STORES

but cater exclusively to the legitimate Jewelry trade. In return we ask for the business of the Jewelers whom we are seeking to protect by furnishing genuine cut glass (not purchasable by department stores) at prices competitive with the inferior product.

No piece of HAWKES CUT
blank is genuine without this

HAWKES

GLASS cut from the solid
trade-mark engraved on it.

T. G. HAWKES & CO., Corning, N. Y.

Grand Prize Paris Exposition

WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page. No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2343.—Brass for Small Screws.—We are using brass rods for making small screws, but find this metal does not turn clean. Can you give us a brass alloy which will turn up sharp? Please kindly state the composition of navy brass. S. & B.

ANSWER:—Screwing brass is a type of low metal, to which is added 2 per cent lead. This will turn better in the lathe than the yellow metal. Naval brass is composed of: Copper, 62 per cent.; zinc, 37 per cent.; tin, one per cent.

QUESTION No. 2344.—Kayserzinn.—Can you give me the alloy of kayserzinn? K.

ANSWER:—Kayserzinn is an alloy containing tin, 92.98 per cent.; copper, 1.58 per cent.; antimony, 5.44 per cent. It is somewhat akin to britannia metal, containing only a smaller proportion of copper and antimony.

QUESTION No. 2345.—Castings of Flowers.—How can I get the impression of a natural flower so I can use same for casting in silver and other metals? C. F.

ANSWER:—Castings can be made of natural flowers, leaves, buds or stems by painting them over very lightly with molten wax, then making a plaster mold for them. The waxed parts need not be removed from the plaster at once, but may be left to dry and afterwards burned out of the plaster. This is done after the plaster has thoroughly dried by heating it. The wax will run out. The remaining dried leaves or flowers are burned out by heating the plaster. The stems are used for gateways to pour the metal in, and, for that reason, should be made quite large, which is done by putting on a thick coating of wax around the stem several times. When ready to cast, heat the plaster mold as warm as possible and pour the metal in very hot. When cold the plaster must be broken, so the casting can be removed.

QUESTION No. 2346.—Soft Soldered Watch Cases.—In watch case repairing I often have to use soft solder. This soft solder will cause trouble when I silver or gold plate the case. The deposit will not take on the soft solder. Is there a good remedy for this? S. G.

ANSWER:—The silver and gold deposit will take on the soft solder if the part is scratch-brushed before plating. But as this cannot be done on polished cases it is best to take a large wooden water pail and fill it about two-thirds full of rain water. Dissolve in this about two quarts of coarse salt and four ounces of cyanide. Add about one gallon of coarse sawdust. Clean the

soft soldered pieces by potashing or washing in benzine; wire and hang in the sawdust mixture; keep the solution in motion with a paddle and long enough until the watch case looks thoroughly clean. Rinse and proceed to plate. The operation will allow one to dispense with scratch-brushing, and, if done right, the deposit will take to the soft solder.

Simplified Electroplating for Jewelers.

(Written expressly for THE JEWELERS' CIRCULAR WEEKLY by "R. B.")

(Continued from issue of Sept. 22.)

BURNISHING ON GOLD AND SILVER.

AFTER the articles have received a coat of metal, be it silver or gold, as the case may be, careful judgment should be used in finishing the article to render it attractive for the market.

Nothing causes such lasting admiration as that which impresses itself upon one's fancy or imagination through the beneficent medium of "contrast." No matter how pleasant a color or shade one gives to an object, unvarying dull uniformity will render it not only displeasing to the eye, but utterly unrepresentable.

A pleasant contrast may readily be obtained by burnishing part and keeping the other parts satined, oxidized or French gray. A space or part of an article which is intended for any inscription, or engraving, of any crest, insignia, name or initials, should either be satined, French grayed or, in case of gilding, Romaned or rosed, and the immediate parts surrounding such surface should be nicely burnished to set it off.

One can readily notice the value of the suggestion, and it will fully repay one to carefully examine the gilt clocks and candelabra on exhibition in any jewelry shop. They are usually of a very dead Roman gold or silver gray, and raised or prominent parts are highly burnished, giving a glittering brilliancy, thus affording a very harmonious and highly artistic touch to the finish of the article.

OBJECT OF BURNISHING.

The object of burnishing is threefold:

(1) It gives a splendid brightness and lends beauty to the finish by direct contrast with the dull part of the object, thus preventing uniformity of finish.

(2) It preserves the metal deposited on the article, as no metal is removed in the process of burnishing. To obtain a bright finish by any other means would cause the loss of some deposited metal.

(3) It renders the deposit more durable, as the burnishing hardens the deposit.

Burnishing is done by means of extra-hardened steel tools, the edges of which are highly polished. It may also be done by means of specially shaped bloodstones—a green siliceous stone sprinkled with red jasper.

As bloodstone tools are costly and very good burnishing may be done by means of steel tools, bloodstones can be dispensed with. Their principal use is for burnishing large gold-plated surfaces, such as the

FIG. 13.

inside of trays, cups, ladles, antique snuff-boxes, etc.

In burnishing the tool should frequently be dipped into soap-suds made of good washing or laundry soap, so as to render the contact very slippery and thus avoid scratching. At frequent intervals the tool should be wiped dry with a clean cloth or towel and rubbed on walrus or bull-neck leather sprayed with crocus or fine rouge on one part for high polishing and at the

FIG. 14.

right end with finely powdered emery for smoothing the tool's edge when it becomes nicked and uneven.

The high polish on the tool can easily be restored by moving the tool up and down over the crocused leather with great rapidity of motion and slight pressure. The leather should be kept well covered when not in use, and free from dust or foreign substances; otherwise it will scratch the tool and prevent a high polish. The tools must be kept perfectly dry and free from dampness and acidulent atmosphere.

Burnishing tools come in various lengths and shapes, calculated to accommodate

oneselves to any shaped surface or inner part of articles.

Shape *a*, in Fig. 13, is usually employed for the purpose of burnishing inside the bowl of spoons and rim of large trays, or the concave vessel of hemispherical shape. Shape *b* is used for burnishing the inside of watch case centers, the horn and part of the crown and indentations which readily receive its point.

Shape *c* is conveniently used for all flat slightly convex surfaces of such articles as watch cases, trays, knives and spoons and ornamental objects.

Shape *d* is used for hollow-shaped jewelry, little hearts and dental work, such as crowns and bridges and mouthpieces.

Shape *e* is used for burnishing the inside of boxes, loving cups, ladles and creamers. Shape *f* must be employed to get at the bottom of deep vessels of limited width.

There are many other shapes which the operator will learn to use to advantage after several attempts. These shapes are not recorded of sufficient value to demand detailed description here.

The burnishing should be done by the sliding movement, with slight pressure and steady stroke. The contact should always be slippery and highly polished.

In burnishing one should assume the position shown in the illustration (Fig. 14).

(To be continued.)

Cracking Off of Enamel During Electro-Plating.

NO sooner has the experienced and thoughtful electro-plater elaborated a method by which he has succeeded in a certain number of cases in preventing the cracking; no sooner has he begun to boast of his success and undertaken the gilding of enameled articles under guarantee, than on the next occasion, perhaps just when success is especially important, the behavior of the enamel teaches him the truth of the saying, "all theory is vain," and in this case we may add, practice also. Under precisely the same conditions, and with the same care and foresight that we have worked hitherto, the enamel cracks cheerfully as before, while we have to confess with sorrow that once more nothing has resulted from our infallible method.

One of the principal causes of an accident of this kind, which we have to consider, says George Nicolaus of Hanau in the *Deutsche Goldschmiede-Zeitung*, is the insufficient thickness of the object to be enameled; if in addition a current of too great an intensity is used, then the cracking off of the enamel may be "guaranteed." Also, if the object has been allowed to get too hot during soldering, the metal is apt to become loosened in the structure, which is an extremely unfavorable condition for the success of the enameling process. The requisite cavity produced by engraving or stamping, and which is to be filled up with enamel, may not be entirely uniform; the stamping may not have been deep enough, or the exact outlines be missed.

If a current of the same intensity has

been used for many articles, the failure may with certainty be attributed to irregular annealing. A current of too great an intensity is doubtless a fundamental error, but an unsuccessful result may also be produced by the opposite condition—a current of minimum intensity, on account of the much longer period of immersion, and even more so than by a current of medium intensity.

A combination of circumstances undoubtedly favorable for the holding together of the enamel during electro-plating is supplied if there is a good thickness of metal in the article, if the latter has been evenly annealed in a steady fire, and if it has, moreover, not been allowed to get too hot during the subsequent enameling, thus obviating any injurious action on the joinings and the tension of the metal.

The best proof of the truth of this assertion is furnished by the well-known cheap enameled club and festival badges, which are made of spurious metal; also by the Russian images of saints (ikons), enameled in solid silver, which can be electro-plated in the most unexceptionable manner.

It is a mistake to have the object suspended in one position with the anode on one side of it; it should be kept in motion and the anode passed uniformly round it in the bath, so that the current may act concentrically, and a more rapid and more even coating of the deposit be induced. If the anode is left suspended on one side, the current can only act on a very limited area, and this is apt to cause a cracking of the enamel. It is a well-known fact that the power of resistance of the enamel depends on its color; the green translucent color has the feeblest resisting capacity, a proof that the composition of the enamel is a factor to be considered.

It has been stated that a bath prepared without potassium cyanide gives a better result; my experience does not support this contention. I have seen just as many failures in a gold bath prepared with blood-lyc salt (prussiate of potash) as in a cyanide bath. It has often been proposed to protect the enamel with a covering; this would be useless, for the current does not attack the enamel from above, but passes through the metal from below and removes the enamel from the bottom.

It follows from what has been said that the gold and silver plating of enameled goods always involves some risk, for which the electro-plater should not be held responsible, but which the party giving the order should take into consideration when making his calculations.

It results further that, as we are not in a position to detect faults in the object originating during its construction, except when the shell has been made too thin, nobody can safely undertake a guarantee. Certainly the work can be carried out with care and caution; what this means can be seen from the following description of my method of work:

For gold-plating enameled articles of jewelry I use a warm gold bath; this should be neither hot nor cold, but heated till the steam begins to rise. Before immersing the articles in the bath, I always put them into hot water (not boiling). I use only a

fresh unused gold bath, in which a beautiful deposit can be much more rapidly produced than in one already used. Moving the object about during the process and passing the anode round it is not only advantageous but necessary.

As soon as a beautiful color has been obtained, the article should be removed from the bath, rinsed in warm water, dried immediately in sawdust, wrapped in tissue paper or cotton wool and laid aside. If the color does not come out well the first time it should be gently scratched (but not before the article is cool), then the article should again be placed in warm water for about a minute and the process just described repeated. With this treatment I have been gratified to find comparatively few cases of cracking; now and then something goes wrong, but very seldom, since after a preliminary testing of the object I have felt almost certain that I could undertake the work without risk.

It is advisable to employ a current of two volts and slowly increase it a little. If a piece cracks only slightly and in a not very noticeable part the enamer can often sufficiently conceal the damage by a little cold enamel or varnish. Pieces that have been enameled a second time behave well as a rule during gold plating; it sometimes happens, on the other hand, that a piece has to be enameled three or four times before it will hold.

With dead or rough enamel the following point should be noticed: If pieces of dead enamel are scratched before or after gold-plating, it is sometimes unavoidable that the brass brush brushes over the dead enamel and leaves a very thin coating of brass on it. This layer of brass must be carefully rubbed away with potassium cyanide solution and a small piece of wood before the object is placed in the bath. If the enamel with the brass coating, especially if the latter lies firmly on the enamel in consequence of vigorous scratching (the enamel would thereby be metalized to a certain extent and rendered capable of receiving the precipitate), is immediately suspended in the bath a deposit will be formed on the metalized part also, which might be extremely difficult to remove.

In a communication to the *Deutsche Goldschmiede-Zeitung* it is suggested that the silver bath is more dangerous to the holding together of the enamel than the gold bath, as a correspondent had noticed that, with a number of articles which were to be either gold or silver plated, the majority of cases of cracking occurred in those that were silver-plated. The opinion does not correspond with the facts. In silver-plating a current of lower intensity is employed and a deposit is more quickly formed than in gold-plating.

The cause of these accidents must be sought elsewhere, in some mistake in the process or some carelessness in carrying it out. In my experience it has seldom happened that a piece has been spoiled in the silver bath. Silver-plating is much more rarely performed than gold-plating. The conditions ought to be the same for both. Patience, a well-adapted current intensity and a fresh bath are the most reliable means for securing a satisfactory result.

Much Better than the Law Requires

Recent United States Government assays of 14 Karat Gold Cases, made since the new stamping law went into effect, show that the cases of the Brooklyn Watch Case Co. assay **14.29 Karat Fineness.**

The Cases of ten different Gold Case Manufacturers assay as follows:

BROOKLYN WATCH CASE COMPANY . .	14.29
.....	14.03
.....	14.02
.....	14.00
.....	14.00
.....	13.96
.....	13.88
.....	13.86
.....	13.82
.....	13.45

These assays include the entire case, with the exception of the crown and springs, the law requiring that the stock used in 14 Karat Gold Cases shall assay, including the solder, 13.50 Karat.

While most of these cases come within the law, you will note that the cases of the **BROOKLYN WATCH CASE COMPANY** assay **14.29**, which not only **exceeds the law's requirements**, but is of a **Higher Quality** than any of the others.

STORE OF LEFFERT BROS., PORTLAND, OREGON.

The Jewelers represented on this page are using our Catalogs again this year.

This fact should convince you that they are worthy a trial.

Write at once for Samples and Particulars

The Catalogs sent out by this firm since 1907 were made by The Arnstine Bros. Company.

Our Catalogs will prove of inestimable value to you in creating and stimulating business during the coming Holidays.

COUNCIL BLUFFS, Ia., Jan. 14, 1909.
THE ARNSTINE BROS. COMPANY,
Cleveland, Ohio.

Gentlemen—Answering your inquiry regarding our recent holiday business, we are pleased to state that we found our Catalogs more valuable than ever before. They created a very strong demand for the goods illustrated.

Our experience during the past six years you have made Catalogs for us, convinces us that it is the proper plan on which to conduct our business. The catalog is a big trade winner; it has the power of getting competitors' business; is a splendid medium to favorably influence the minds of the people; creates a demand for jewelry and gives the store a high standing. Since we began using the catalogs, our business has nearly trebled itself.

The goods illustrated, which you furnished, and the prices were entirely satisfactory.

Very truly yours,
EMIL H. LEFFERT.

THE REASON WHY

We are able to handle orders for Mesh Bags in any size quantities is because after long years of experimenting—on what seemed to others an impossibility—we have at last succeeded in making a machine to produce mesh.

The advantages to you are many, of which a few are: a perfectly smooth strong mesh, finer than can be produced by hand for double our price—prompt deliveries—and a guarantee that your Holiday orders will be taken care of. Your experience will supply many others.

W. & D. Bags are offered by Leading Jobbers.

WHITING & DAVIS CO.

7 Maiden Lane
New York

PLAINVILLE (Norfolk Co.), MASS.

Chicago

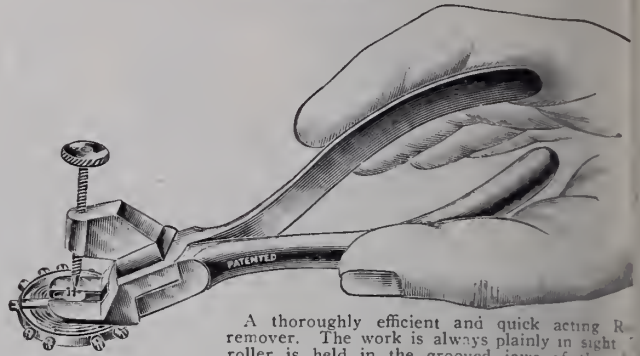

IMPROVED BEZEL AND WHEEL CHUCK No. 26

CUT IS FULL SIZE.

Larger capacity for holding work and improved construction. Will hold wheels or plates from 3 mm. to 52 mm. Bezels, rings, watch cases, etc., from 13 to 62 mm. State name and size of lathe when ordering.

Price, Each, \$9.00

ROLLER REMOVER No. 60 (Patented)

A thoroughly efficient and quick acting roller remover. The work is always plainly in sight. The adjustable head which holds the most obstinate roller will instantly yield to gradual pressure of the screw.

Nickel Plated, Each, \$1.50

SCREW DRIVER No. 112 With Special Clamp and Two Blades

Use the screw driver like an ordinary one until the screw is partly extracted. Then press the sliding clamp down; this is so made that it engages the head of the screw and holds it until it is desired to put it back again, when it automatically disengages itself, and the driver sends the screw clear home. Particularly useful with stud screws.

Our illustration shows the clamp drawn back, which permits the driver to be used like any ordinary spectacle screw driver. The other illustration shows screw held in the clamp ready to be placed in the mounting.

Price, \$1.00

CROWN CHUCK No. 50

For enlarging or cutting deeper crowns of watch cases. A movable pin in the stem regulates the depth required for various sizes. Four caps of various sizes are supplied with each to hold crowns from small to large. Stem fits in No. 50 wire chuck.

Price, Each, \$1.50

REFLECTING LOUPES

Made in 2, 2½ and 3-inch Foci

"THE NEW MODEL BUNKER LOUPE"
A NEW REFLECTING EYE-GLASS OF MERITO

PATENTED APRIL 17, 1908

WORTH MORE THAN TEN TIMES THE PRICE, FOR ESCAPEMENT-WORK ALONE.

PRICE .85¢ SINGLE, 2-2½-3" FOCUS.

For inspection between the plates of a watch movement, or any recess from which light is excluded, these loupes are an absolute necessity. They have been greatly improved in construction, the mirrors now being optically ground concave, which causes them to reflect powerful rays of light at the necessary point.

Single Lens - - - - - Each, 85c.
Double Lens, very powerful - - - - - \$1.50

For Sale by all Jobbers in the United States and Canada.

SPECTACLE AND EYEGLASS SETTING-UP PAD No. 1

This pad consists of a circular piece of rubber not too solid to give when a convex surface is laid upon it, thus preventing any possible breakage. It has a metal rim with two bent arms which hold the clamps of the eyeglass or spectacle, and keeps them in place while the screw is driven home.

Instructions for Using the Setting-Up Pad No. 1

Put the lens in the straps of mounting. Then put the lens in the holder by letting the two prongs come on each side of the stud, hold the lens in place between the thumb and forefinger of the left hand. Draw the lens up in the strap by pressing the thumb of the right hand against the end of the lens, and with the forefinger and middle finger of the right hand press against the rim of the holder on each side of the two prongs. Place spectacle in holder in the same way. Then secure the lens by turning the screw home. Will hold any strap of rimless spectacle or eyeglasses.

Our illustration shows "So-Easy" Eyeglass Mounting on Pad. We show this one in particular as it is one of the most difficult ones to assemble.

Price, Each, 50 cents

For over half a century the word ROGERS applied to plated ware has been deservedly synonymous with the highest art of the designer, and the most careful and finished workmanship of the artisan, but dominating all else

DURABILITY IN THE SERVICE OF THE CONSUMER.

To add still further prestige to the high standard of the ROGERS name comes our announcement of the succession of *the sectional process* of plating over the common method of a uniform silver deposit on articles of flatware.

The coating of silver on flatware articles invariably wears through at the points marked XII on the above illustrations because the quantity of silver deposited has not heretofore been adjusted proportionately to the wear the Spoons and Forks receive.

OUR SECTIONAL PROCESS

of plating, deposits on these exposed points a triple quantity of silver, thereby more than doubling the service obtained by the old method of uniform plating. We are thus enabled to guarantee that plated ware of our manufacture will bear

50% MORE SILVER

than standard plate and will outwear any and all other brands of silver-plated ware.

SEND TO-DAY FOR OUR CATALOG No. 15

Simeon L. & George H. Rogers Company
HARTFORD, CONN.

—FACTORIES: HARTFORD AND WALLINGFORD, CONN.—

Since the Days of '47

Quality and beauty have made "1847 ROGERS BROS." silver plate the choice of discriminating purchasers since the original Rogers Bros. first made this famous ware in the year 1847.

From that period this brand has been the accepted standard. It has constantly increased in popularity because of its remarkable service and grace of design. To-day, the mark

1847 ROGERS BROS. X S TRIPLE

guarantees the heaviest triple plate. Behind that guarantee is the largest silver business in the world.

Spoons, forks and fancy serving pieces bearing the "1847 ROGERS BROS." trade mark may be purchased with the full confidence that they are without equal, either in wearability or beauty.

"Silver Plate that Wears"

may be had in a wide variety of patterns as suggested by the pieces shown.

Sold by leading dealers. Send for illustrated catalogue "L28" showing designs.

**MERIDEN
BRITANNIA COMPANY**
(International Silver Company, Successor)

NEW YORK CHICAGO
SAN FRANCISCO

OVER FIFTY MILLION READERS

see the advertisements of "1847 ROGERS BROS." silverware *every month*.

The advertisement reproduced (in reduced size) on the other side of this sheet will appear on the back cover of the November *Ladies' Home Journal* in four colors, as shown.

The Delineator, Woman's Home Companion, Designer and other prominent women's magazines will print similar advertisements, but not in colors.

The various magazines in which our advertisements appear have a combined circulation of over 10,000,000—and, figuring the customary way, five readers to each copy, have between fifty and sixty million readers.

And this does not include those who see our advertisements in weekly newspapers, with a total circulation of over half a million, and in the big New York and Boston dailies.

AND IT'S ALL YOUR ADVERTISING IF YOU HANDLE OUR GOODS

LABEL (WHITE) ^{XS} TRIPLE GRADE

LABEL (BLUE) XII ^{XS} TRIPLE GRADE

LABEL (YELLOW) ^{XS} QUINTUPLE GRADE

LABELS FOR BOXES SHOWING THE THREE GRADES OF PLATE

In line with the policy of its owners for the past fifty years to make flatware bearing the trade-mark "1847 ROGERS BROS." the best, we now furnish wares of this brand in the following grades only:

1847 ROGERS BROS. ^{XS} TRIPLE

Teaspoons plated not less than six ounces per gross (other staple pieces in proportion). List prices on all articles in this quality are the same as former "A-1" plate.

1847 ROGERS BROS. XII ^{XS} TRIPLE

Teaspoons plated not less than six ounces per gross (other staple pieces in proportion), and on the points most exposed to wear an additional plating. List prices on all articles in this quality are the same as our former "XII" plate.

1847 ROGERS BROS. ^{XS} QUINTUPLE

Teaspoons plated not less than ten ounces per gross (other staple pieces in proportion). List prices on all articles in this quality are the same as our former triple plate.

The plate on fancy pieces will be in keeping with grades described above.

Our No. 12 Medium Knives are now plated 16 dwt. and bear the trade-mark:

These are still labeled and billed as "No. 12." This change in plating also applies to Nos. 43, 44, 45, etc. Although carrying this increased amount of silver, there is no increase in price.

With a better quality offered at the same price, and the increased advertising space, the dealer handling our goods has an exceptional chance for a large fall trade.

THE LAUREL

TRADE MARK
STERLING 1899

☐ The **LAUREL** pattern is now ready for delivery in the dozen, with the fancy pieces in process.

☐ Made on the popular **MARTHA WASHINGTON** shape.

☐ Decorated with a dainty **LAUREL** wreath, cut with the delicacy of hand engraving.

☐ Finished in light, medium and heavy weights at a very moderate price.

☐ In manufacturing "**THE LAUREL,**" every care has been exercised as to design, die work and finish—it is in every sense a Pattern of Class—but on account of slenderness of outline, proper distribution of weight, the most perfect factory and manufacturing facilities, it will be offered at the price of the cheap "ordinary" patterns now on the market.

☐ This is another **Smith Pattern,** designed to remain permanently in demand.

PENDANTS and LOCKETS

IF you haven't seen the Fall showing of Simmons Pendants, Lockets and Neck Chains, you ought to make it a point to do so at your earliest opportunity.

No finer quality or more artistic and refined designs in gold-filled goods have ever been offered—every pendant and locket affording unmistakable evidence of *Simmons Superiority*.

PENDANTS will be especially good sellers this season and you can make no mistake in putting in a good-sized assortment of them.

The Simmons line of pendants offers a fine selection of particularly attractive and salable patterns that should certainly be included in your Holiday showing.

Specimens of *Simmons Superiority*

A New Simmons Chain Posterette

**for your Holiday
Window Displays**

The new Simmons-Chain Window Posterette, which is now ready for distribution to the trade, is most attractive in subject and in color.

It is striking, yet refined and wholly artistic, and cannot fail to attract the attention of all passers-by to the window in which it is displayed.

It is printed in rich and harmonious colors on fine plate paper and mounted on a heavy, dark-toned board 15 inches wide by 20 inches high.

We send with each posterette a window plan and sketch, suggesting an effective way of displaying it in conjunction with jewelry or any goods you may desire to show in your window.

Please let us know at an early date if you wish us to send you one of these posterettes; it is, of course, mailed free.

THE STERNAU COFFEE-MACHINE

Lovers of coffee are quick to recognize the difference between good coffee and the other kind. Good coffee is the *only* kind that can be made with the Sternau Coffee-machine, because its process of distillation is the only proper way to make the beverage. This is a telling argument that can be used effectively by the retail jeweler in making the sale. This machine is so constructed as to be easily taken apart and cleaned. Its beauty is another feature that makes it an easy seller.

NOTHING BUT STERLING!

ROGER WILLIAMS SILVER CO. are manufacturers of high grade sterling ware only. We are the house that is always busy. Our goods are of original design; we do not wait for our competitors to originate for us. We manufacture no light weight or trashy goods, as we cater exclusively to the legitimate jeweler.

A complete line of samples is carried both at our New York Salesroom and at the Factory, Providence, R. I.

The Legitimate Trade is cordially invited to call and see for themselves. We furnish exclusive pieces, no matter how large or how small.

Our "IMPERIAL" flatware pattern should not be overlooked by any jeweler. It is an assured success. Its pleasing, attractive and graceful lines appeal to all tastes. Place a small order of this pattern in your stock and watch the results. It stands out from all other patterns, being an entirely new departure from all other flatware designs.

A full line will be carried in stock after October 1. Our toiletware line in the Bead, Plain and Engraved patterns, is unsurpassed in weight, workmanship and design.

We advise the trade to place their orders early to insure prompt delivery as present indications show that we shall be unable to fill orders received after November 1 as promptly as now.

Write or 'phone us for catalogue and attractive prices. Better; visit our salesroom or factory and see for yourselves.

THE CORONET BRAID

JET HAIR PINS CORRECT

THE CORONET BRAID, one of the most graceful of all coiffures, is a revival. It encircled the heads of former beauties, just as it does with the belles of to-day. Loop Hair Pins were inseparable from this style of head dress. Fashionable women wore from four to eight of these hair pins. The pendulum has swung back once more. The old Coronet Braid is now the "latest style." It was foreseen here. The revival calls for correct Loop Hair Pins of Jet. They are here provided in many artistic variations. Priced to retail from 75c. to \$5.00 per pair.

**Ziruth-Unbreakable
GOLD AND PLATINUM CHAINS**

Are cheaper than those that claim to compare in quality and much better than those of equal price.

Are stronger, more flexible, better finished, finer shaped links, more beautifully colored, more carefully soldered and inspected than any other chain on the market and are so conceded by the trade.

They are plump 10K. and 14K. as stamped and fully guaranteed.

Of what value is the stamping law unless you assay your goods? We invite you to assay our chains.

Chains, cheap in construction are dear at any price and therefore you cannot afford to use machine made chains in place of hand made chains.

ZIRUTH-UNBREAKABLE HAND MADE CHAINS

are the cheapest because they are the best constructed on the market.

Our prompt deliveries of orders are the wonder of the trade.

Write us at once and our representative will call or we will submit samples and prices.

We cater to the manufacturing and jobbing trade.

DO NOT CONFUSE US WITH ANY FIRM BEARING SIMILAR NAME.

CHARM OF BLACK OPAL JEWELRY

THE EFFECT of Black Opals very largely depends on their mountings. While their lights vary there always is a prevailing tone. Durand Black Opal Jewelry always catches the right tone-finish, greatly heightening the effect. The finest Black Opals are employed in innumerable designs.

A novel and artistic effect, suitable for both young and elderly men

Made by the most skilled workmen in the world

Our reputation has been gained through the production of the highest grade goods, and we lead the world in the manufacture of Walking Canes, Umbrella Handles, Riding Crops and Corkscrews.

Jewelers who have handled our lines know their surpassing merit and are regular customers; those who have not should give us a trial at once, as our workmanship is unexcelled and our prices the lowest, as through us you buy direct from the manufacturers.

SCIENTIFIC RECONSTRUCTED WHITE SAPPHIRE

A stone of value - "The Diamond's Neighbor." The nearest likeness to a diamond ever marketed. Has a wonderful brilliancy, very highly polished, and will retain its brilliancy. Stone is hard and wearing qualities are lasting. Beware of imitation Reconstructed White Sapphires, which are of little or no value.

These are the genuine

Price per Carat, Finest Selected Reconstructed White Sapphires \$1.75

Price per Carat, Second Grade Reconstructed White Sapphires 1.45

SCIENTIFIC RECONSTRUCTED RUBIES

These Reconstructed Rubies are absolutely as hard and have the same beautiful appearance as the Genuine Oriental Rubies. They are the scientific production of small particles of Genuine Rubies fused under intense heat through an electrical process and purified through a chemical process.

When ordering, kindly state sizes desired, the same as when ordering precious stones, as 1/4 carat, 1/2 carat, etc., as per gauge shown above.

These Genuine Reconstructed Rubies, per Carat, \$1.10

Genuine Reconstructed Rubies, second grade, per Carat, \$0.65

JEWELRY OF DISTINCTION

**"EDGEWOOD"
BAR PIN**

The design of this pin is patented, and we will promptly prosecute any manufacturer who infringes on same.

ENAMEL BAR PINS are among the best sellers this Fall. THE "EDGEWOOD" pin has been pronounced the best pin of its kind on the American Market.

RETAILERS should use this pin for the following reasons:

- The GOLD is fourteen karat.
- The WORKMANSHIP is perfect.
- The DESIGN is patented.
- The PEARLS are selected Oriental Baroques.
- The PRICE is moderate.
- The PIN will not be imitated in inferior goods.
- The ENAMEL can be furnished in eight colors.

We sell direct to the retail trade.

THE HARVEY J. FLINT CO.

Punch Set for United States Battleship "St. Louis" Sent to That Vessel.

R BALLARD left St. Louis for San Francisco recently, taking with him a magnificent solid silver punch-bowl set, designed and made by the Mermod, Jaccard and Co. Jewelry Co., which was presented to the citizens of St. Louis to the officers of the U. S. S. *St. Louis*, Sept. 4. The oak chest containing the service traveled in St. Louis. To avoid risk of delay and other matters Mr. Ballard engaged a stateroom on the Wabash limited for the exclusive use and occupancy of the chest of silver.

The set cost \$3,000. It is made of solid silver. The punch bowl, gold lined, stands 15 inches high and has a capacity of 10 gallons. It is supported on a massive foot. Both bowl and foot are beautifully embossed with raised designs, among which is the figure "St. Louis" printed on a horse, and the seal and shield of the city of St. Louis. The handles of the bowl have figures of the American Eagle worked in bas relief on them.

There are 24 solid silver punch cups, a gold lined ladle and a richly-engraved old English waiter. Each of the cups bears the name of the United States navy and the name "St. Louis". The set is finished in a rich gray and is considered one of the most beautiful of its kind ever produced in St. Louis.

The vessels of the United States Navy whose presentation services have been illustrated and described in THE JEWELERS' CIRCULAR-WEEKLY and the dates of the issues in which these appeared from time to time are as follows:

The St. Francis Hotel Trophy for Golden West Grand Prize Race.

THE accompanying illustration will give a faint idea of the beauty of the St. Francis Hotel trophy contended for recently on the automobile track at Tanforan by six of the fastest automobiles on the Pacific coast. The trophy is one of the most magnificent ever awarded on the Pacific or anywhere else for that matter, and is highly prized by the winner of the race.

The trophy, which is three and a half feet high, stands on a base of Pennsylvania marble, around the bottom of which are four plates and on one of these is the inscription in raised block letters, "Golden West Grand Prize Race." The other plates are inscribed with the conditions of the race, etc. In the middle of the base are the figures of four racing automobiles, heavily etched on a band of silver, representing a circular track.

Above the figures of the racing automobiles is a succession of draped wreaths, surmounted by a large silver column, around the bottom of which are four reproductions of the coat-of-arms of the Hotel St. Francis. Above this, in bold relief, is a model in miniature of the hotel.

Near the top of the silver column is a drapery of wreaths and bow-knots, suspended from which are four State seals, representing the States of Oregon, Washington, California and Nevada, comprising

the territory of the "Golden West." Above this and surrounding the column are four winged wheels, while above these rises a figure standing on a winged wheel, representing victory and speed.

This beautiful work is especially attrac-

THE ST. FRANCIS HOTEL TROPHY.

tive to San Franciscans, inasmuch as it is the product of local industry. The design is that of Lester Hammersmith, of the firm of Hammersmith & Co., and the entire work was done in the silver factory of that concern.

George A. Smith is about to open a branch store in Apponaug, R. I. Mr. Smith at present conducts a store in Hinsdale, Mass.

Annual Report on the Production of Precious Stones.

of the United States Geological Survey's Advance Pamphlet on Gems and Gem Minerals for 1908, Compiled by Douglas B. Sterrett.

(Continued from issue of Oct. 6.)

FELDSPAR GEMS—AMAZON STONE, MOONSTONE, ETC. COLORADO.

Pike's Peak region has long been famous as a source of beautiful crystals of amazon stone, smoky and clear quartz. One of the most prolific areas has been that called Crystal Park by collectors, lying from two to four miles west and south of Manitou Springs and extending southeasterly from the east side of Camp Cove along the slopes of the mountains for a distance of three miles. Numerous prospect holes in Crystal Park region with the less valuable minerals left on the dumps show the past activities of mining collectors. Fine quartz crystals occur in numerous places outside of the Crystal Park and especially to the northwest, toward Pike's Peak, more amazon stone has been found.

The rock of this region is principally coarse granite composed chiefly of light flesh-colored potash feldspars, a white plagioclase feldspar quartz and biotite mica. Pegmatite occurs in dikes, veins and irregular masses through the granite. The crystals of amazon stone occur in cavities or pockets in the pegmatite. The sizes vary from less than one inch to nearly a foot across. Some of these pockets are filled with cavities in the granite, around which the crystallization is coarse and the same as in the pegmatite. In some cases the microlitic pockets are connected by seams or veinlets, and can be easily traced for yards. In other cases the pockets are isolated, and others may or may not be found near by. The pockets are lined with crystals of amazon stone, smoky and clear quartz; usually topaz and phenacite are present. The crystals of amazon stone are generally well developed, and vary in size from a fraction of an inch to three or four inches square. The color ranges from gray to bright green and is often darker in one portion of a crystal than in another. Crystals from the shallow prospects are often more or less stained with iron rust both on their surfaces and along cleavage cracks. The rust may be removed with oxalic acid to prepare the crystals for mineral collections and for sale as gem material. Quartz crystals are found ranging from a fraction of an inch to several inches across, either singly or in clusters of parallel grown crystals. Some are colorless, though the majority are more or less clear smoke colored, sometimes very strongly so. They furnish fine cabinet specimens for mineral collections. Whitman Cross¹ and W. Hillebrand describe the occurrence of the specimens of minerals of this region. Those observed were orthoclase, albite, biotite, quartz (smoky or clear), garnet, columbite, gonite, hematite and limonite, arfvedsonite, astrophyllite and zircon. As much as a ton of crystals have been found in one pocket.

The amazon stone and crystals of the associated gem materials, quartz, topaz and phenacite, were mined by J. D. Endicott during 1898 in the Crystal Peak region four miles north of Florissant, Teller County. The occurrence of these minerals at this locality is evidently similar to that of the Pike's Peak region. The country rock in each case is coarse granite. Mr. Endicott reports that the crystals are found in leads of pegmatite, which can be traced from a few feet in some cases to over a hundred yards in others. In some cases the pegmatite is nearly in sheet form. The amazon stone occurs in streaks and pockets in the interior of the "veins" and attains a thickness of one foot in places; in other cases it is absent. Troughlike depressions occur in places in the cavities, and in these the amazon stone is stained and coated with films of oxide of iron. Evidently the troughs served as channels for water deposition of limonite from solutions. Some of the amazon stone is of good gem quality and shows a rich green and blue-green color. Other specimens are pale or badly stained with iron. The crystals obtained in mining are often quite perfect and would make fine cabinet specimens. Many crystals of smoky quartz and a few of phenacite and topaz were obtained in 1908 during the work

for amazon stone. The Crystal Peak region is noted for the fine specimens of the minerals it has yielded. W. E. Hidden¹ has described phenacite, topaz, xenotime and fayalite from this locality. Messrs. Cross and Hillebrand² described a fragment of a clear greenish tinged topaz crystal measuring nine centimeters on an edge. This was but the corner of what must have been a very large crystal.

PENNSYLVANIA.

Dr. Edgar T. Wherry reports the occurrence of amazon stone with sunstone at the Mineral Hill locality, about one mile west of Media, Delaware County, Pa. These minerals are found loose in the soil, where they are brought up from pegmatite ledges by the action of frost.

GARNET.

UTAH.

For many years the Navajo Indians have collected the rich red pyrope garnet found on their reservation and sold them to tourists or at the trading stores. The exact locality at which these garnets were found and their mode of occurrence has always been more or less indefinitely known. Within the last few years the quantity of garnets collected by the Indians has been decreasing, and many of the traders that formerly bought quantities of garnets now state that they are becoming very scarce. A partial explanation for this seems to be that whereas the greater part of the garnets was formerly brought to trading posts in Arizona and New Mexico and to stations along the Santa Fe Railway, a considerable part is now traded at points in Utah and goes out from Salt Lake City. Tourists still buy these garnets from the Indians along the railroad, though they generally obtain only small and inferior gems. A visit to the garnet field was made possible through the kindness of J. L. Hubble, of Ganado, Ariz., who furnished the necessary guide and equipment to reach the locality, as he did also for the trip by the writer to the peridot locality described in subsequent pages.

Clear red garnets associated with peridot gems weathered out of basic rocks are found at several places around and to the north of Fort Defiance. As a rule the garnets from these localities are small and not often sufficiently large for cutting. The supply of gem garnets comes from close to the Utah-Arizona line about 12 miles southwest of the mouth of the Chin Lee Valley and San Juan River in Utah. It has commonly been reported that the gems came from Arizona, though Don Maguire, of Ogden, Utah, reported the locality as Utah. The garnets occur in an elevated region a few miles north of the Arizona-Utah line, about 100 miles west of north of Ganado, Ariz., and over 120 miles northwest of Gallup, N. Mex. After visiting the locality one can readily appreciate the value of the "Arizona ruby," as the garnet is called. It is necessary to make a long trip over sandy and rocky trails with many miles between water pools or springs, and at its end garnets of good size and quality are not found abundantly, and, when found, are on an arid stretch of country several miles from water.

The geology of Arizona and Utah in the Navajo reservation has been little studied, and in the limited time given for the trip to the garnet region but few notes were obtained to add to the general knowledge. The route followed led over the mesa country north from Ganado and down the valley of Naklini Creek to Chin Lee at the mouth of Canyon de Chelly. From Chin Lee, through a mistake of the Indian guide, a northwesterly course was followed to a point within a few miles of Agathla Needle, some 25 miles S. 60° W. of the garnet fields. From this point the route led down Gypsum Valley, which drains into the Chin Lee Valley near its mouth. The garnet field is several miles northwest of this canyon. The return trip was made over the elevated country south of the garnet field, across the Chin Lee Valley nearly opposite the mouth of Carriso Creek, up Carriso Creek to Bradley's store, and then south to Chin Lee.

¹Mineralogical notes, *Am. Jour. Sci.*, 3d ser., vol. 29, 1885, pp. 249-250.
²Minerals from Pike's Peak: *Am. Jour. Sci.*, 3d ser., vol. 24, 1882, pp. 251-256.

Descending from the mesa several miles north of Ganado one passes over several miles of petrified forests in which the trees are not so numerous as in the famous localities near Adamana. The formation in which the trees are imbedded, however, appears to be identical with that near Adamana. The rock exposures in Canyon de Chelly and along the Chin Lee Valley north to the garnet locality appear to be similar and consist principally of red beds, largely cross-bedded sandstone and conglomerate. This sandstone forms great blocky vertical cliffs from 100 to several hundred feet high along the Chin Lee Valley and the canyons entering it. This formation extends west from the Chin Lee Valley and northwest from Gypsum Valley, forming the semi-mesa country on which the garnet deposits occur. These red beds may correspond to those described by L. F. Ward¹ in the Little Colorado region to the south, referred to the Triassic age and provisionally thus accepted by N. H. Darton.² The red sandstones extend over 30 miles west of the Chin Lee Valley to the region around Agathla Needle. In the latter region basic rocks outcrop at numerous places and in several instances have formed sharp needle-like masses hundreds of feet high with small bases. Agathla Needle is evidently composed of such a rock and stands several hundred feet high. One of these hills or outcrops, about four miles south of Agathla Needle, was composed of two types of rock—one a dark, hard, dense basaltic rock with visible olivine phenocrysts and the other a dark-gray, somewhat porous olivine-mica rock. A few small pieces of peridot were found weathered out of this rock. Between Agathla Needle and the garnet locality basaltic and other basic rocks outcrop at several places both as needles and as dikes, cutting the sandstone formations.

The extent of the area over which gem garnets are found was not determined. Actual examination was limited to a stretch of country about two and one-half miles long in a northwesterly direction and half a mile wide. From the apparent similarity of the formations around this strip it was judged that garnets should be found over an area of several square miles, probably four miles north and south and five or six miles east and west, while the field might extend several miles beyond a line of hills to the north.

The garnets are found on a series of mesa-like benches rising from Gypsum Valley on the southeast, and between 6,000 and 7,000 feet (barometric measurement) above the sea level. The elevation increases slightly to the west in the mountains around Monument Pass. The benches and mesa on which the garnet deposits occur are nearly level in places and dip to the southeast in others. They are formed by different beds of the red sandstone formation, the edges of some of the beds standing as small cliffs over the next lower. In places the sandstone floors are bare; in others they are covered by wind-blown sand in layers varying from a few inches in depth to dunes many feet high. This sand is brought up principally from the red sandstone country to the southwest, from which direction the prevailing winds of the region blow. The garnets are found in the sand and on the sandstone floors, associated with pebbles of feldspar sometimes with a moonstone luster, occasionally emerald-green diopside, red sugary quartz, and such rocks as granite, diorite, trap, etc. Some of the garnets and hard-rock fragments are rounded and polished on one or more sides by the action of the wind-blown sand as they lie exposed on the surface. This accounts for the smooth rounded surfaces so prevalent on many of the garnets from the Navajo country. The garnets may be uncovered by a wind from one direction and then covered up by that from another, or vice versa. By the shifting of the dunes the position of the garnets is changed so that different sides are exposed for polishing by the wind-blown sand.

The source of the garnet over the mesa country is in a stratum of coarse, unconsolidated drift or gravel that rests on the more elevated part of the red sandstone on the northwest of the area examined. This drift is over 100 feet thick and is composed of boulders, which vary from stones weighing many tons to cobble size, mixed through a matrix of pebbles and sand. The gravel and boulders consist of biotite granite gneiss, porphyritic biotite granite gneiss, hornblende or diorite gneiss, partly epidotized trap and basaltic rocks, epidote hornstone, soapstone, tremolite, asbestos, sugary

OPALS

All Sizes and Qualities

quartz, and large blocks of light gray colored ferrous limestone of carboniferous age. Just what the origin of this conglomeration is to be determined is not known. The general appearance of the drift is that of a glacial deposit. Glaciation taken place in the San Francisco Mountains¹ of Pima County, Ariz., and moraine deposits were formed. The latter are thought to be of a rather recent age, probably Quaternary. Whether there has been glaciation in the slightly higher country west and northwest of the garnet drift is not known. It is probable that the garnet-bearing drift deposits are of greater age than the glacial deposits of the San Francisco Mountains, for the former are covered with a thin layer of hard white sandstone and are at almost the same elevation as any of the surrounding country. The presence of such quantities of crystalline and ancient rocks in the drift cannot be explained by very recent action, as these rocks do not occur near the locality.

Garnets are scattered through the drift, and are carried down with the drift on the mesa country below during erosion.² In the mesa country the garnets undergo a partial concentration during the breaking down and washing away of its loose matrix. The latter takes place readily when the protecting cover of hard sandstone is removed. In one place near the garnet formation some garnet hills were found built up of over half garnet chips ranging up to three millimeters across. The remainder of the mineral grains of these hills consisted of cleavage chips of orthoclase feldspar, a smaller amount of hornblende gneiss rock, quartz, epidote, etc.

Garnets found in this region range in size from small grains to over three centimeters in diameter. The larger ones are not perfect, being flawed and cracked. They often have a pinkish-red color, and rarely contain gem material. The best gem garnets are not often over one centimeter or 12 millimeters in diameter, and the greatest yield of gems is in garnets of less than eight millimeters in diameter. Garnets that cut perfect gems over three carats in weight are scarce, while those ranging from one to two carats when cut are fairly plentiful. Stones of one carat and under are abundant. A garnet cut in an ordinary brilliant measuring eight millimeters across and 5.5 millimeters thick will weigh about one and one-half carats. The garnets range in color from the beautiful rich Burgundy wine red characteristic of pyrope to lighter shades, with some more or less cinnamon color. Some of the red garnets are so dark that the gems show a black color and appear nearly black. In others they appear brilliant even under artificial light. Imperfections occur in many of the garnets. These imperfections may be cracks or flaws or inclusions of dark spots or of other minerals. In deeper-colored garnets flaws are often difficult to detect until the stone has been partly or wholly cut.

The dark spots appear to be due to cavities in the garnet in some cases; in others they are caused by inclusions of other minerals. Among the minerals found associated with the garnets is reddish-green diopside, and in one specimen of net which had been split a small diopside crystal of pin-head size was found in the center. In another specimen a tiny garnet was found attached to a larger diopside crystal. Minute acicular inclusions are also present in some of the garnets. They are arranged according to certain directions of symmetry in the crystal and are probably rutile. These acicular or threadlike inclusions are so fine that they do not perceptibly affect the color and luster of the gems.

The garnets are collected by the Indians who search carefully over the sandy country below the drift. Apparently no methods are used to find the gems that may be concealed below a few inches of sand, but only those on the surface are picked for. The shifting of the sand uncovers the garnets at one time and covers them up at others, and therefore renders the possibilities of new finds attractive. No water can be obtained except during rainy seasons to wash for the garnets, so that the method of concentration cannot be used. The use of screens it seems possible much material could be worked over with good results. The sand could be thus eliminated, and the garnets are rather easily picked out from other pebbles.

Screens varying in size of mesh from four-fifths to one-fifth of an inch would be very serviceable in screening and separating the material for hand picking. In the majority of cases the garnets are richest near the bottom of dunes or sand beds, and that portion should therefore be sieved. The larger garnets are now difficult to obtain, but it is probable that the "Arizona ruby" will again become more plentiful when the Indian learns to work a little more systematically for this gem.

COLORADO.

J. D. Endicott, of Canon City, Colo., has taken up two claims for garnets on Grape Creek, two miles S. 75° W. of Canon City. The country rock is biotite schist-gneiss, garnetiferous in streaks. It strikes north of east to east and west and dips 45° N. Pegmatite is associated with the gneiss in places. The portion prospected for garnets consists of a garnetiferous streak in which the garnets are rather plentiful and of some size. Certain smaller bands and lenses in the "vein" up to eight or 10 inches thick are richer in garnet than the rest of the rock. The garnets are found in crystals varying from minute size to over three inches in diameter, wrapped in biotite in the gneiss. The greater part of the garnets are more or less crushed and fractured. The cutting material, though mostly small, comes from the solid portions of the crystals not injured by fracturing. The color is the beautiful red to pinkish red of almandine or precious garnet, and handsome gems of about two carats' weight have been cut.

Specimens of spessartite garnet and topaz are still obtained from Ruby Mountain on the east side of Arkansas River opposite Nathrop, Chaffee County, Colo. The deposit is on public land and is visited intermittently by collectors chiefly for mineral specimens, though some garnets suitable for cutting are obtained. The work done by each collector does not usually exceed a few blasts in the most favorable places. The locality has been described by Whitman Cross,¹ and the following notes are prepared principally from his description:

The garnets and topaz occur in cavities in a rhyolite of probable Tertiary age. The rhyolite outcrops in three places—in Ruby Mountain, a hundred yards north of Ruby Mountain, and on the west side of the river opposite Ruby Mountain. Ruby Mountain is a hill about 200 feet high and a quarter of a mile long, running north of west and east of south parallel with the course of the river. The upper and larger part of the hill is composed of white to pinkish-gray rhyolite of very fine grain with more or less flow banding of light and darker layers. The lower portion of the hill where outcrops are not covered with talus on the southeast and northwest ends are composed of gray volcanic glass with perlitic texture. This perlitic contains numerous round particles of obsidian up to the size of a pea. On the east side of the hill are rhyolitic tuff beds which, in an exposure on the north of the hill, dip about 20° E. Cross mentions vertical contact between the rhyolite and inclosing Archean gneiss.

The crystal-bearing cavities are larger and more abundant in the rhyolite in the upper part of the hill. These cavities are lithophyses as in the Utah topaz locality described later. The cavities range in size from a millimeter cross section to more than five centimeters in greatest dimensions. They are elongated in the direction of the flow lines in many places or are composed of numerous smaller joining cavities in this direction. Some of the lithophyse shells are fairly well developed in concentric layers, though generally the cavities are very irregular in shape and inclusions. The walls of the cavities are generally drusy with tiny brilliant crystals which Mr. Cross determined to be sanadine. Small quartz crystals also occur in the cavities though no tridymite has been found. The garnets have a transparent deep-red to cinnamon-red color and are of the spessartite variety. Crystals of over a centimeter in diameter are rare and the average size is about 2.5 millimeters. The crystals have sharp edges and brilliant faces in the cavities. Generally only a part of the crystal form is developed, for the surfaces are very rough where the garnet is attached to the matrix. The predominant crystal form is the trapezohedron (211) with a small development of the dodecahedron (110). Several garnets often occur in the same cavity, with or without topaz. The topaz is less plentiful than the garnet and of about equal dimensions. The crystals are attached to the walls of the cavi-

ties and to the shells in different positions, so that in some cases doubly terminated crystals occur. The forms observed in the order of their prominence are given by Mr. Cross as: M(110), L(120), O(221), C(001), F(021), Y(041), A(100), G(130), and F(202). The crystals are clear wine pink or yellow, while in the unbroken cavities in the rock, but fade to colorless or tinted pale bluish on exposure to the light.

Mr. Cross² describes also a similar occurrence of garnet in a coarse rhyolite at Chalk Mountain, near Fremont Pass, Colorado. A specimen of rhyolite with small garnets in a cavity was given to the writer by J. D. Endicott, of Canon City. This specimen was from the Gudge mine near Westcliffe, Custer County, Colo., and appears to come from an occurrence similar to that described above.

JADE.

BURMA.

The production of jade (jadeite) in the Myitkyina district of upper Burma during 1907 amounted to 3,590 hundredweight,² with a local value of £18,998; this is an increase of 1,375½ hundredweight over 1906. Part of the jade is used locally, part carried overland to southwest China, and the greater part is exported through Rangoon, principally to China. The exports through Rangoon during 1907 amounted to 2,636 hundredweight, valued at £49,643. The production in 1908 was 3,367 hundredweight, valued at £22,332.³

The occurrence and origin of jadeite in the Kachin Hills in the Myitkyina district, upper Burma, has been carefully discussed by A. W. G. Bleek.⁴ Jadeite is found at three places in the Kachin Hills, at Tawmaw, Hweka and Mamon. At Tawmaw the deposits consist of a metamorphosed igneous dike intruded into serpentine. At Hweka the jadeite occurs in boulders in a conglomerate. The jadeite boulders are quarried from the slope of a hill and are sometimes found of large size. At Mamon the jadeite is found in boulders in the alluvial deposits and bed of Uru Chaung River.

Professor Bleek concludes that the jadeite was formed by the metamorphism of an albite-nepheline rock, both of these minerals being found with the jadeite in places. The change would be represented chemically by Na₂AlSi₃O₈ (nepheline) + Na₂AlSi₃O₈ (albite) = 2NaAlSi₂O₆ (jadeite). Under certain conditions albite-nepheline rock might form, while under conditions of high pressure, during consolidation or after, jadeite with a much lower molecular volume would be produced. The color of pure jadeite is stainless white and specimens closely resemble marble in appearance. The rich emerald-green colored jadeite is the most highly prized and is not abundant compared with the white or dull-green varieties. Some jadeite has a pale amethystine color. The emerald-green color of the best variety of jadeite is due to chromium; the dull-green color of other varieties is due to iron; and the amethystine color is supposed to be caused by the presence of manganese.

(To be continued.)

Hudson-Fulton Exhibition of Colonial Silver at the Metropolitan Museum of Art.

(Continued from issue of Sept. 29.)

BRING the Hudson-Fulton celebration the thousands of visitors at the Metropolitan Museum of Art, New York, shown much interest in the exhibit of American silversmithing, described in issues of Sept. 22 and Sept. 29. Every room devoted to the display of

At the extreme left in the illustration is shown a sugar bowl, oval in shape, with bands of bright cutting. It has two scroll handles with ring drops, a trumpet-shaped cover with urn-shaped finial and is 6 $\frac{3}{8}$ inch high. It bears the mark W. G. Forbes in script in rectangle. It was loaned by William H. Wentworth.

SILVERWARE BY WILLIAM G. FORBES.

silverware have been thronged with people intent on seeing the workmanship of the early artisans. Those who have in their possession pieces of silverware of an early date have lingered long before the cases, comparing and discussing the various exhibits. The arrangement of the collection made it an easy matter to locate each piece and, by reference to the catalogue, determine its maker. The exhibit judged by the interest it has aroused as well as by its own merit has proved a decided success in every way, and those instrumental in its arrangement can justly feel that their work has been greatly appreciated.

In the preceding articles on the exhibit pieces of the handiwork of various silversmiths have been shown, and at the same time an endeavor has been made to give special prominence to the work of the earlier workmen, together with that of Paul Vere, who, from an historical standpoint, is the most prominent of all the early silversmiths. In the accompanying cuts are shown examples of the work of various silversmiths without relation to their age or portance.

One illustration shown on this page depicts a number of pieces of silverware typical of the work of William G. Forbes, who was admitted as a freeman in New York in 1773. His name appears in the first New York directory in 1786 under a notice of a meeting of a gold and silversmiths' society.

The sugar bowl, second from the left, is urn-shaped and fluted. The cover terminates in an urn-shaped finial. It is engraved with the monogram R. H. W. in

TEAPOTS, SUGAR BOWLS, PITCHERS, ETC., BY EOFF, CARY DUNN AND JOHN AND TUNIS DENISE.

script, and has a height of nine inches and diameter of 6 $\frac{7}{8}$ inches. It bears the Forbes mark and was loaned by R. T. Haines Halsey.

The teapot at the right is oval, with chased bands. It has a domed lid with

urn finial, curved spout and silver handle. It is engraved S. P. O. in script on each side and was also loaned by Mr. Wentworth.

The teaspoons, six in number, are engraved G. F. in script on the front of the handles and also bear a bright cut cartouche and drop on the front of the handles. They are 5 $\frac{1}{2}$ inches in length and were loaned by Mr. Halsey. The ladle, bowl and silver tongs all bear the Forbes mark and are typical of his handiwork.

The illustration shown below depicts the work of five workmen. The cream pitcher, coffee pot and sugar bowl on the top row are the work of Garrett Eoff, who worked in New York in 1805. He was born about 1785 and died in 1850. The cream pitcher is barrel-shaped and has a foot-band chased with sheaves of wheat. It has a turned-over lip, S shaped handle and is 3 $\frac{7}{8}$ inches high. It bears the maker's mark and was loaned by George S. Palmer.

The coffee pot is melon-shaped, with richly chased shoulders. It has four ball-and-claw feet, with leaf effect on the body of the pot. The lid and dome are of especial beauty, being decorated with repoussé and chased clusters and leaves of grapes. It is 11 inches high and 10 $\frac{1}{2}$ inches wide. It was loaned by Hon. A. T. Clearwater. The sugar bowl belongs with the coffee pot and is decorated in the same style, having ring handles dropping and fitting over lions heads.

The tankard and sugar tongs in the second row are the work of Cary Dunn, a silversmith in New York for 31 years. Both pieces bear the mark "C. Dunn" in rectangle and were loaned by R. T. Haines Halsey.

The teapot and stand, sugar bowl and cream pitcher are all of one set and are the work of John and Tunis Denise, who worked in New York in 1798. The pieces are engraved in monogram J. M. C. and were loaned by Mrs. Edward G. Janeway.

Each piece also bears a phoenix's head and sheaf of wheat in rectangle.

The illustrations on page 65 show the work of a number of artisans, among whom was George Ridout. The articles shown are types including sugar bowls, cream pitcher,

Special Announcement to Large Diamond Buyers

THIS is to inform the trade that I have opened a factory and office for the cutting of diamonds at 120-126 Walker St. (junction of Canal St.), New York, under the management of Jos. Polak, formerly connected with S. L. Van Wezel. This cutting establishment has capacity for the employment of fifty diamond cutters and polishers, working on my own rough importations exclusively, is equipped with the most modern machinery and is now in full operation.

knives, teapot, porringer and other articles. Speaking of early silversmithing the Catalogue of the Metropolitan Museum of Art says: "The first silver made in New England was probably fashioned by English or American emigrants who had served their apprenticeship in England. They were followed by craftsmen who either were born here, or, like John Bull, arriving at an early age, learned the trade on this side."

craft Trade or Occupation but such as are Freeman thereof or soe Admitted by the Mayor or Court of Aldermen for the tyme being." But in 1807 it was stated that "Freemen are seldom created; and no prosecutions are brought against those who carry on their business without taking out their freedom."

Workers in silver who are interested in their art can on application to the Metropolitan Museum of Art obtain the privilege of listening to a lecture on early silver-

in relief in a swimming attitude. On the base are finely wrought views of the river, bridge and city.

The cup was made four years ago, and was competed for in four annual events. It

TYPES OF SILVERWARE BY EARLY AMERICAN SILVERSMITHS.

In England it was required that every goldsmith should have his mark set upon his work after it was assayed and marked, with the king's mark (mark) testifying to the fineness of the

Colonial silversmiths marked their work with their initials, with or without a crest, placed in shields, circles, etc., without any guide as to place of manufacture or date. After about 1725 it was the custom to use the surname, with or without initials, and sometimes the full name. Since the establishment of the United States the name of the town was often added and the letters D or C in a circle, probably meaning dollar or coin, showing the standard or coin from which the wares were made. In many instances a lion passant guard, eagle displayed, anchor, star, fleur-de-lis, etc., were added, and marks of the maker and dealer are sometimes found stamped on the same piece. Many of the silversmiths used several different marks during their career.

In the Colonies no assay marks were necessary or used, but attempts were made to give protection to purchasers of plate similar to that given in Europe. Maryland was the first State, however, to regulate the quality of plate, and that not until 1814. Then an act was passed fixing the standard at 11 ounces of fine silver to the pound avoirdupois.

Before commencing business, it was necessary for the silversmith to become a Freeman. In New York, 1683-4, the Common Council enacted: "That noe Person or Persons whatsoever within this city or Liberties doe keep Shop or Sell any Goods or wares by Retaile or Exercise any handi-

smithing, illustrated with lantern slides. This opportunity should not be neglected. It is suggested that a committee be appointed who will make formal application in writing to the museum authorities for the lecture.

A Handsome Swimming Trophy.

ILLUSTRATED herewith is the handsome trophy known as the Adolphus Busch Cup, which, as noted in a recent issue of THE JEWELERS' CIRCULAR-WEEKLY, was presented to F. J. Handy, Chicago, who won the 10-mile river Marathon of the Missouri Athletic Club, on Labor Day, for the third consecutive time, by beating all competitors in the swim from the Chain of Rocks to the Eads Bridge.

The trophy, which cost \$1,000, is of solid silver and was made by the Mermod, Jacob & King Jewelry Co., St. Louis, being paid for by Adolphus Busch, the St. Louis brewer. The cup is two feet high. The modeled figure of a diver surmounts it. At the base of the cup proper is a figure

ADOLPHUS BUSCH CUP.

had to be won three times in succession to become the absolute property of a contestant.

A new Centennial souvenir spoon made by William Weidlich & Bro., which presents emblematically the idea of "St. Louis to the front," is making good with the St. Louis trade, and many of them have been placed.

WE INVITE COMPARISON

Consider all the points that go to make up a perfect Scientific Stone and let your sound judgment pick the best that's offered.

There is a difference.

Long continued experiments on Scientific Stones have brought results, giving our products the distinction which we take pride in pointing out.

It is the absolute purity of the material, its closest approach to the natural gem that, in combination with the highest skill of the cutter, yield the fine quality we claim for Our Scientific Products—their Uniformity of shade and form, Correctness of size and Brilliance of finish.

In building up the reputation our Scientific Stones enjoy throughout the country we were guided by a policy aiming to produce an article that would become popular, not by reason of its cheapness, but on account of its intrinsic qualities. Hence—The Superiority of Our Scientific Stones.

RECONSTRUCTED RUBIES - SCIENTIFIC WHITE SAPPHIRES - HOPE SAPPHIRES.

GET THE BEST—it costs no more.

THE NEWS FROM ENGLAND.

Unseasonable Weather Retards London Trade and Sheffield and Birmingham Complain Though Imports and Exports Increase—Col. Stockall Confesses That He Robbed His Own Firm Robbers of Mappin & Webb Sentenced—First Jewelry and Silversmithing Competitions—Jurors of the Imperial International Exposition—Anglo-Japanese Exhibition Next Year.

LONDON, Sept. 29.—Trade has not been equal to that of September of last year. Unfortunately the weather has been most unseasonable and quite upset business generally, and as a result from all quarters it is learned that trade has been most unsatisfactory. In Scotland trade remains much the same, although a brighter outlook is apparent. Irish trade is also poor. In Sheffield about the same conditions obtain as in August. Birmingham complains of poor trade, and yet despite all the imports are increasing and exports are £5,500,000 when compared with the same month of last year, while the exports show an increase of almost £1,750,000, compared with the same period last year, but total exports are nearly £10,000,000 behind those of 1908.

* * *

The dramatic arrest of Col. Stockall and his confession that he burgled his own premises in November, 1904, has been the talk of the trade. It literally eclipsed the national robbery at Mappin & Webb's, which resulted in three of the men being sentenced to penal servitude for 10 years, one to eight. Col. Stockall was at the time managing director of J. J. Stockall & Co., Ltd., a manufacturing and factoring firm established by his father. Over £3,000 worth of watches and jewelry disappeared, and the Colonel told a most circumstantial story of his being attacked, gagged, bound and tied up to a rack by men who, under pretense of buying a presentation watch, got into the premises after closing time on a Saturday afternoon. On the Monday morning he was found in an exhausted condition, for, it transpires, he so firmly tied himself up that it was impossible to free him again, and so without food or water he remained in his uncomfortable position for over 36 hours. And now he suffers the mortification, this once highly respected man, of standing in the felon's dock, self-confessed as a clever thief, who will bring his father's gray hairs in sorrow to the grave. As I write Col. Stockall is awaiting trial, and the insurance company which paid £3,000 in respect to the burglary has a copy of the police depositions, and that developments in this direction are daily expected. Only about £1,000 of the goods have been recovered.

* * *

The sequel to the big robbery at Mappin & Webb's is that one man was discharged, two sentenced to penal servitude for 10 years and one for eight years. The men, the police stated, were implicated in the robbery of the motor trophy from Oxford in a short time since and were colleagues of a gang of American thieves who had been about town. However, "it is an ill wind that blows nobody any good," and the cabman who first became suspicious and warned the police has been presented with

a new cab and horse by Messrs. Mappin & Webb, while the insurance company has given him £500.

* * *

A short time since M. Goldschmidt, of Paris, was robbed of £10,000 worth of pearls, while in the well known West End restaurant, the "Monico." In connection with this the police have made a couple of arrests this week.

* * *

Saturday the first jewelry and silversmithing competitions took place in London, and there were over 100 entrants. Some stupid employers have refused to give their boys the Saturday mornings off to allow them to compete, but there is every possibility of successful first competitions.

* * *

The jurors appointed to judge the exhibits at the Imperial International Exhibition included Julien Trippin, the translator of Saunier's treatise on horology; Thos. D. Wright, head of the horological department of the Northampton Institute, Clerkenwell, L. C.; W. Augustus Steward, chief instructor in silversmithing and jewelry at the Central School of Arts and Crafts, and Starkie Gardiner, the well-known authority on bronzes and art metalwork. The latter two worked together on the silversmithing, jewelry and enameling jury and also on the fine arts jury. Although people have been somewhat critical with regard to the exhibits, the fact remains that, although there are not by any means so many fine exhibits this year, there are nevertheless a considerable number of first-rate productions, notably in silverware and bronzes, in the Italian section.

* * *

The Anglo-Japanese Exhibition, which will be held next year at Shepherd's Bush, will gather from reliable sources, bids fair to be very successful. Several well-known British firms who fought shy of this year's have already made application for positions, and if the exhibition authorities act reasonably there is every possibility of the exhibition being a great success. Certainly the Japanese Government and the Japanese people are taking exceeding interest in the exhibition, and, moreover, it has the benediction of His Majesty King Edward as well as the Japanese Emperor.

ST. GEORGE.

Plans Being Formed to Increase and Strengthen the Membership of the A. N. R. J. A.

PITTSBURG, Pa., Oct. 7.—J. P. Archbald, the hustling president of the American National Retail Jewelers' Association, was in Pittsburg from Blairsville, yesterday, and held an interesting conference with Steele F. Roberts, whom he recently appointed chairman of the finance committee of the organization. Efforts are now being put forward to secure the names of jewelers

in every State, and when this data is collected an appeal will be made to them for contributions. The money collected will be used to infuse still greater activity in the association. It is intended to invade the New England States, but this will not be done this year, although it is expected that an organizer will be sent there next year. The association is said to be weak in the New England territory, and it is desired to greatly strengthen the jewelers' ranks there. Mr. Roberts told THE JEWELERS' CIRCULAR-WEEKLY correspondent to-day that if he had the means he would himself pay the expenses of an organizer in that district. He is of the opinion that all jewelers should affiliate with a local or national organization, and he places much value on a local organization, citing as an instance what the Jewelers' 24-Karat Club, of Pittsburg, has done for the jewelers of the Pittsburg district, bringing them together as they had never been before, and in a way that no one ever thought possible.

New Members Elected by the Jewelers Security Alliance.

The regular monthly meeting of the executive committee of the Jewelers' Security Alliance was held on Friday, Oct. 8, the following members being present: Chairman Butts, President Sloan, Vice-Presidents Wood and Champenois, Secretary Noyes, Treasurer Karsch and Messrs. Abbott, Alford, Bowden, Brown and Stern.

The following new members were admitted:

M. C. Alford and Fred J. Baker, Huron, S. Dak.; D. G. Gallett, Aberdeen, S. Dak.; Johnson & Landstrom, Huron, S. Dak.; Marlett & Baker, Middletown, O.; Charles A. Sauer, Aberdeen, S. Dak.; Schmidt Bros., Redfield, S. Dak.; L. Dlouhy & Co., Miller, S. D.; Louis Gilbride, Portland, Ore.; Lange & Lange, Rapid City, S. Dak.; W. D. Nelson & Co., Pierre, S. Dak.; V. E. Death of Harry Canfield.

The brief notice of the death of Harry Canfield, secretary and treasurer of the Roy Watch Case Co., 21 Maiden Lane, New York, which appeared in the last issue of this journal, was read with surprise and sympathy by a large number of friends in New York City and other parts of the country, many of whom had not even known that Canfield was seriously ill. As stated last week, Mr. Canfield died, Tuesday of this week, at his home, 37 Sidney Pl., Brooklyn, of typhoid pneumonia. The funeral services were held Thursday evening, and interment took place, Friday, in Green-Wood Cemetery.

The illness to which Mr. Canfield finally succumbed dated from Sept. 1. Typhoid

THE LATE HARRY CANFIELD.

fever developed, but it was hoped that his strong constitution would overcome the disease when pneumonia set in, and despite every effort of medical skill and the nursing of loving friends and relatives he grew worse until death ended his suffering.

Harry Canfield was the son of Charles B. Canfield and Mary A. Canfield, and was born, Sept. 1868, in Hartford, Conn., where he spent his boyhood days. He came to New York as a youth, and in 1897 obtained employment with the Roy Watch Case Co., where he soon won the respect and confidence of all with whom he came in contact. He was of kind-hearted and friendly disposition, and numbered many in the trade as friends. When Charles Glatz, the former president of the company, retired, in 1904, A. L. Stearns and Mr. Canfield succeeded him in the management of the concern, Mr. Stearns becoming president and Mr. Canfield secretary and treasurer.

Mr. Canfield was a member of a number of trade and social organizations, among which were the Jewelers' 24-Karat Club of New York City, Crescent Athletic Club, Brooklyn, and the Veteran Association of the Seventh Regiment of the National Guard. He found much enjoyment in athletic sports, and always took an active part

in the various athletic events in connection with the trade outings.

The beautiful floral tributes sent by the employes of the Roy Watch Case Co. and others bore mute testimony to the esteem in which he was held.

Deceased is survived by a widow, Elsie Glatz Canfield; a daughter, Catherine; a sister, Mrs. Joseph G. Duncan, of Indianapolis, Ind., and a brother, Charles Canfield.

Bold Thief Captured After Stealing Three Diamond Rings from a Boston, Mass., Jeweler.

Boston, Mass., Oct. 11.—One of the boldest jewelry robberies reported here in a long time occurred Wednesday evening of last week, and before the alleged thief was captured a desperate chase and battle had taken place. The prisoner, who insists that his name is Robert Fulton, had grabbed three diamond rings, the property of Elmer P. Sawtelle, diamond merchant and jeweler at 31 Huntington Ave., and these gems, valued at \$200, were wrested from the thief's hand, the police say.

Fulton is about 21 years old and athletic. His home has been, he says, in Newark, N. J., but lately he had been lodging at 92 Chandler St., though the landlady there does not recognize him by that name. His effects are being guarded by the police, and if anybody turns up there to claim them they will have to answer questions. Mr. Sawtelle's store is just across from the Hotel Nottingham. He is a young man, cautious and athletic, and because of these things Fulton was taken into custody.

More than two weeks ago the man, known as Fulton, called at the Sawtelle store and asked to be shown some solid gold watches. These he inspected closely, and then departed, saying he would return and make a purchase. About 7.20 Wednesday evening the young stranger appeared again, and Mr. Sawtelle remembered him very well. This time Fulton wanted to look at diamonds. Mr. Sawtelle at first permitted him to see only one diamond ring at a time, as the two were alone in the store.

As Fulton wanted to compare the rings, Mr. Sawtelle finally allowed him to hold three rings at a time, but immediately realized he had made a mistake.

"Just a moment, please," said Mr. Sawtelle. "If you will give me back those rings I can show you others that will better please you."

"Never mind," replied Fulton, "these will do," and, closing his right hand over the rings, he shouted: "Good-night, sir," turned and dashed out of the store into Huntington Ave.

Mr. Sawtelle promptly vaulted over the counter and started in pursuit, shouting, "Stop that thief!" and hundreds of pedestrians stopped to watch the race. Fortunately, three of them were prompt to come to Mr. Sawtelle's assistance. They were William P. Cook, night watchman at the Huntington chambers, next door to the store; John F. Devlin, watchman for Coleman Bros., and Daniel Gallagher, the foreman of the same contracting firm. The four men followed Fulton as he turned from Huntington Ave. into Dartmouth St., and crowds of spectators followed. Fulton turned abruptly into a Dartmouth St. door-

way and backed up against the wall, preparing to give his pursuers a battle.

Watchman Cook grabbed Fulton by the throat and Devlin and Gallagher got each a grip on his arms. Just then a patrolman from station 16 appeared and took Fulton in charge. Fulton's right hand was closely holding the rings, the officer declares, and when his fist was forced open the diamonds were revealed.

The policeman took his man to the station, where Cook and Devlin declared that they had seen Fulton and two companions standing in front of Hotel Nottingham and watching the jewelry store on many evenings during the past two weeks. They had been suspicious of the trio, and assert that they saw two accomplices run away when Fulton was captured.

Fulton insisted next morning, when given the "third degree" by headquarters detectives, that his name was Fulton. He did not seem disturbed about his predicament. He joked with the officers and declared he had come recently from Newark. The police failed to find his picture in the rogues' gallery under the name of Fulton. Thereupon they had him photographed and measured. It was thought he might, as others have done, betray himself when writing his name. He did not falter, however, but signed himself on the bottom of the blank in a clear hand, "Robert Fulton."

The prisoner was later brought before Chief Justice Bolster in the First Session of the Municipal Court and held in \$500 bail for trial.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Oct. 6.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Bombay: 93 cases clocks, \$1,307.
 Buenos Aires: 45 cases plated ware, \$5,395; 72 cases clocks, \$1,515; 12 cases optical goods, \$3,839.
 Cape Town: 53 cases watches, \$983.
 Calcutta: 18 cases clocks, \$335; 2 cases watches, 335.
 Colon: 2 cases watches, \$100.
 Fremantle: 34 cases plated ware, \$1,468; 7 cases thermometers, \$150; 21 cases watches, \$2,063; 1 case optical goods, \$575.
 Hamburg: 3 cases watches, \$2,741.
 Havana: 1 case jewelry, \$274; 2 cases plated silver, \$112; 87 cases clocks, \$1,449.
 Kingston: 21 cases clocks, \$255.
 Liverpool: 1 case plated ware, \$150; 1 case jewelry, \$225; 114 cases clocks, \$1,994; 3 cases watches, \$1,200; 6 cases jewelers' findings, \$7,000.
 London: 4 cases thermometers, \$390; 5 cases optical goods, \$1,132; 1 case watches, \$100; 89 cases clocks, \$1,976.
 Montevideo: 19 cases plated ware, \$1,795.
 Naples: 1 case jewelry, \$500.
 Puerto Barrios: 5 cases plated ware, \$478; 2 cases plated ware, \$161.
 Santo: 3 cases plated ware, \$296; 125 cases clocks, \$766.
 Savanilla: 1 case optical goods, \$106.
 Soerabaya: 2 cases clocks, \$101.
 Southampton: 9 cases watches, \$1,989; 1 case scopes and views, \$250.
 Sydney: 1 case watches, \$100; 103 cases clocks, \$398; 15 cases plated ware, \$730.
 Vera Cruz: 68 cases plated ware, \$624; 3 cases scopes and views, \$160.

In the store of W. H. Oppold, Sterling, Ill., was shown recently an automatic Winchester rifle won by Capt. Benjamin Eick in a recent rapid-firing match.

Bus Army Lieutenant Who Passed Worthless Checks to be Tried at Pittsburg, Pa.

PITTSBURG, Pa., Oct. 8.—Donald C. Thompson, who is wanted by the police in at least 18 different cities in the United States, was brought to Pittsburg last night by officers from Norfolk, Va., to answer to a charge of swindling a Fifth Ave. jeweler and other merchants of this city by means of bogus checks. Thompson is the man who is known as "Lieut. Earl McFarland, U. S. A.," who is carrying on his operations wore

THOMPSON, BOGUS ARMY LIEUTENANT.

his uniform of a United States officer, which he had especially made in New York, in which place he hails.

Thompson was arraigned for a preliminary hearing this morning before United States Commissioner W. T. Lindsay and is to await the action of the October United States Grand Jury in the sum of \$500 bail. He was committed to the city jail in default of bail. The War Department had Thompson brought here, although he is under indictment at Los Angeles, Cal., where he also operated, but for some reason the War Department headed off the action of the United States Marshal's office at Los Angeles and ordered the man brought here. Los Angeles waiving their writ.

The prisoner is a dapper-looking individual and wears clothes of the best make. He talked entertainingly to a JEWELERS' CIRCULAR-WEEKLY correspondent this morning in the office of United States Marshal Stephen Stone. He was asked how many jewelry stores he had visited in his operations, but evaded the question, but there is said to be little doubt about his operations which covered a wide field. He is only 24 years old, and is regarded as one of the newest swindlers captured in a decade. Thompson was arrested in a Norfolk hotel, where a description of the man was lying on the clerk's desk when he registered. Chief Kiser was notified and soon had the man locked up. Kiser brought him here. Thompson's plan was to enter a store and pass a small bill of goods and tender checks for various amounts, explaining that he was an officer in the United States army, and

his funds being tied up elsewhere, he did not have the cash. Being a man of good address, a good talker and a fine dresser, it did not take him long to make a good impression. He easily worked his way into the good graces of everyone. Thompson says that he has a wife and little daughter in New York.

"When my little daughter sees me again," he said to THE JEWELERS' CIRCULAR-WEEKLY correspondent, "she will say, 'Mamma, who is that gray-haired man?'" meaning that he realized that he was in for a long vacation behind the bars. "When I am in New York my headquarters usually are at the St. Regis Hotel," he went on, "but the New York police were not slick enough to get me, that honor belonging to Mr. Kiser. I never was a soldier in the United States army, and where my wife and daughter are or where I secured the lieutenant's uniform is my own business. My home at the present time is in Pittsburg, and I have sort of enjoyed a week's-end vacation at your county jail."

Thompson looks the part of an army soldier and acts it. His knowledge of army life and affairs is extensive. He claims to be a magazine writer, but Chief Kiser told the correspondent that Thompson's knowledge of writing amounts only to his having held a job as advertising solicitor in Tampa, Fla.

Death of W. Powell Harvey.

DES MOINES, Ia., Oct. 6.—W. Powell Harvey, a well-known resident of Des Moines, and for many years a dealer in imitation jewelry at 206 Sixth Ave., died, last week, at his home, 203 Forest Ave., after an illness of three months' duration, of heart disease.

Deceased was a native of New York State, having been born in Amsterdam, Oct. 26, 1856. He had been in the jewelry trade many years, and had conducted stores in many cities. He came to Des Moines about 14 years ago and started in the imitation jewelry business, and in 1898 he located in Chicago under the Palmer House. This

venture did not prove successful, and about nine years ago he came again to Des Moines, where he located under the style of the Barado Diamond Co. He subsequently left here, but returned again in the Summer of 1906.

Mr. Harvey was quite prominent as a merchant in this city, and was at one time a candidate for councilman. He is survived by his widow, one daughter, a mother and two brothers.

Death of Aaron Rosenthal.

TORONTO, Ont., Oct. 6.—Aaron Rosenthal, senior member of the jewelry firm of A. Rosenthal & Sons, Ottawa, died in that city, Friday, Oct. 1, aged 78, as the result of a complication of diseases. He had been actively identified with the business interests of Ottawa for 31 years.

Mr. Rosenthal was a native of Lobenz, Germany, and was engaged in the jewelry business in Australia for some years. After having been in Montreal for a period he came to Ottawa in 1878, and started in business at 113 Sparks St., in the same locality now occupied by the firm. His sons, as they grew up, became identified with the business, and about six years ago the present firm was organized with Mr. Rosenthal's four sons, Adolphe, Samuel, Martin and Harry, as junior partners.

The deceased was a prominent member of the Hebrew Synagogue and connected with several societies, and was noted for his charitable disposition. He had been in poor health for some time before his death, and recently took a trip to the south. Upon his return his condition gradually became worse.

Involuntary Bankruptcy Proceedings Against the City Jewelry Co., Montgomery, Ala.

MONTGOMERY, Ala., Oct. 6.—An involuntary petition in bankruptcy was filed with the clerk in the United States Court of this city, Oct. 1, against the City Jewelry Co., 10 Commerce St. The signers of the petition are the Montgomery Journal Co. and the Times Publishing Co., with A. F. Whiting and W. C. Hill as sureties. The petitioners allege that the assets of the company consist of a jewelry stock and fixtures and are worth about \$5,000. Application for temporary receiver was also made, and Judge Jones appointed Geo. Stuart as such receiver.

The Jewelry Co. is a corporation of which J. H. Shreve is president, J. L. Ivey vice-president and D. H. Shreve the secretary and treasurer. J. H. Shreve, who is also in the dry goods business at Greenville, purchased the stock of the Sherwood-Bartlett Co. early this year, which he sold out and incorporated the present company, April 16, with a capital of \$15,000, of which stock he held nearly the entire amount.

A dispatch from Berlin, Germany, Oct. 5, stated that George Heim, the chemist who was accused by the government authorities of mining diamonds in Southwest Africa and smuggling them to Germany in contravention of the government diamond monopoly in that colony, hanged himself in prison. The case aroused much attention, owing to the large operations effected. The precious stones were brought to Germany concealed in blocks of cement.

LOUIS J. DEACON, Atlantic City, New Jersey

Max Jacobs, Who Obtained Jewelry on False Representations, Sent to Jail for Four Years.

A man giving the name of Max Jacobs, who was arrested, recently, on a charge of larceny preferred by J. R. Wood & Sons, 170 Broadway, New York, pleaded guilty to the offense, last week, and was sentenced, Monday, by Judge O'Sullivan in the Court of General Sessions, New York, to four years in Sing Sing.

Jacobs first became known to J. R. Wood & Sons when he was for a time acting as a messenger and messenger for the Mount Morris Jewelry Co., of Harlem. He stayed at the firm's place of business and on several occasions was sent to the offices of J. R. Wood & Sons to get goods for the firm. Later, after he was no longer in employ of the jewelry concern, he took advantage of the fact that he was known to the offices of the Wood concern and, representing that he was still employed as previously, he obtained diamond jewelry valued at \$2,500, with the understanding that the goods were for the Mount Morris Jewelry Co. The goods, consisting of rings, he had

which had been delivered to the Mount Morris Jewelry Co. was sold, and it was learned that the man was no longer employed there.

The case was turned over to an attorney, and with the help of the salesman who led Jacobs to have the goods, undertook the task of locating him. It was learned that Jacobs was staying at Coney Island, but a search there failed to locate him. While the hunt was still on the missing man came to the offices of J. R. Wood & Sons and was once arrested. He said that he had been asked to bring back some of the goods which he desired to exchange for others. His prompt arrest did not admit of his making the exchange. He was taken by the police authorities and has been waiting an opportunity to plead to the charge.

When Jacobs was taken into court, Monday morning, two pawnbrokers were present with attorneys, who told the court that the rings should not be returned to the firm of J. R. Wood & Sons because they were obtained under circumstances which gave Jacobs the right to pledge them. This contention was quickly overruled, as the man had already pleaded guilty to grand larceny.

The prisoner said he was a jewelry agent and that he lived at 2085 Lenox Ave., New York.

John Gaard, Beloit, Wis., Who Mysteriously Disappeared Several Months Ago, Still Missing.

DETROIT, Mich., Oct. 6.—A search is being made in this city, both by the police and by the members of the Lodge of Elks, for John Gaard, a well-to-do Beloit, Wis., jeweler who was last heard of in this city. It is believed that he became demented as the result of his wife's death, after which Gaard planned to go to Norway with a party of relatives. He went to Chicago ahead of the others and there disappeared. He was traced from in Denver and he wrote home from Detroit. He was seen here, June 1, in the Fourth Street Presbyterian Church. The last previous trace of him

was on May 30, when he mailed a postal to Beloit.

Where he has been since June 20 no one seems to have any idea. He is five feet five inches in height, weighs about 140 pounds and is 47 years of age. W. H. Hanfen, Beloit, called the matter to the attention of the Detroit authorities, requesting that action be taken to find the missing man.

Chicago Jeweler Commits Suicide at Grave of His Wife in a Milwaukee Cemetery.

MILWAUKEE, Wis., Oct. 11.—Preferring death to being separated from his wife, who died two years ago, Julius Manasse, a Chicago jeweler, formerly of Milwaukee, committed suicide, last week, by shooting himself at the grave of his wife in one of the Milwaukee cemeteries. Mr. Manasse had been making frequent trips to the Milwaukee cemetery, and friends have known that he was despondent. Mrs. Manasse was also a suicide.

Most of the property of the dead jeweler was left to his sister, Rose, of Chicago. His will leaves her \$700 in cash, \$1,000 life insurance policy in the Knights and Ladies of Honor, a \$2,500 life insurance policy in the Knights of the Maccabees and an interest in his business at 3638 S. Clark St., Chicago. The business itself is left to his brother, Morris J. Manasse. All his personal jewelry is left to a niece, Celie Hartt, of Montreal, Canada. A friend, Dr. Harry Greenberg, of Milwaukee, is left \$100.

Mr. Manasse's funeral was held from the Schram undertaking rooms in this city, Oct. 6.

Death of Leonard Ohlson.

DALLAS, Tex., Oct. 6.—Leonard Ohlson died, Wednesday, Sept. 29, at his home, 131 Caroline St., aged 60 years. The funeral was held from Bethany Church, corner McKinnon St. and Cedar Spring Ave., to Greenwood Cemetery, Friday, Rev. James Kirkland conducting the services.

Mr. Ohlson, who was a jeweler for many years in Dallas, was a native of Stockholm, Sweden. He is survived by his widow and the following children: Mrs. W. L. Peacock, Mrs. Norman DeBorde, Miss Ottie and Miss Ruby Ohlson and Leo and Egbert Ohlson, all of Dallas. He was a member of Queen City Lodge No. 941, Knights of Honor.

Death of Frank O. White.

NEW ORLEANS, La., Oct. 6.—It was with deep regret that the friends of Frank O. White, of the firm of White Bros., dealer in cutlery, jewelry, etc., whose store is at 424 Canal St., heard the news, Monday, that he had died at Polo, Ill. The remains were brought here for interment.

Mr. White was a native of Geneseo, Ill., but had been a resident of New Orleans for 14 years. Together with his brother, Wm. T. White, he founded the firm of White Bros. and became well known and prominent in commercial circles. His residence in this city was at 1211 Henry Clay Ave.

B. O. King & Co., Stockton, Kans., have sold out to G. R. Thomason, who conducted a jewelry and drug business at Cuba, Kans. Mr. Thomason has closed out his store at the latter place.

A. D. Calkins has opened a jewelry store at Osceola, Wis.

Russell B. Maybee is opening a store at Fort William, Ont.

W. F. Leavell recently opened a watch-making shop at Sultan, Wash.

W. E. Cawood has opened a shop in the Republic building, Cleveland, O.

J. Kray will soon engage in the retail jewelry business at Clara City, Minn.

Ostermeier & Trunk have opened a jewelry store at 518 Monroe St., Springfield, Ill.

The Herzog, Thompson Co. will shortly open a new jewelry store at Montgomery, Ala.

A new store has just been opened by M. Wroblewski, at 883 Russell St., Detroit, Mich.

A retail jewelry store has been opened by H. Porter, at 716 Walnut St., Kansas City, Mo.

T. C. Carr is about to open a store at Island Pond, near Morrisville, Vt., in about two weeks.

Fred. Poley has started in business as a manufacturer in the Republic building, Cleveland, O.

A jewelry store has been opened at 3118 Kensington Ave., Philadelphia, Pa., by John Grund.

Samuel Kantor has engaged in business on his own account at 1979 Third Ave., New York.

The Albany Jewelry Co., recently began business in the Astor House, on Broadway, New York.

The National Watch & Diamond Co. has opened a suite of offices in the Colonial Trust building, Reading, Pa.

Ed. Barfield, Prescott, Ark., has rented the quarters formerly occupied by the variety store, and will conduct a store there.

"The Marceaux" is the style of a new store which has been opened at 50 Nassau St., New York. Mr. Jacobson is the manager.

Lyle F. Chadband and Oscar Corman, both of Bloomington, Ill., have formed a partnership and will open a jewelry store at 114 S. Main St.

The Nevada Optical Co. has been incorporated at Reno, Nev., and will shortly open a complete grinding plant. The firm will do a manufacturing, wholesale and retail business.

The Crescent Jewelry Co., Pittsburg, Pa., has been granted a charter by Governor Stuart. The capital stocks is \$25,000, and the directors are: H. D. Montgomery, Chas. B. Prichard and J. D. Meyer.

Chas. A. Burmaster has engaged in business under the name of the Central Plating Co., at 40 State St., Detroit, Mich. Mr. Burmaster was formerly with Wright, Kay & Co., of the same city.

Special Order Work

Special order work is profitable if proper material is at hand to carry out the ideas and wishes of critical customers.

In addition to our large stock of American and European cut precious and so-called semi-precious stones, we carry an assortment of rough gems from which we can readily cut odd sizes and shapes and so fill practically almost any order.

The ownership of American gem mines and a large modern lapidary shop place us in a unique position to serve the trade.

Upon request we will send a list of the stones we cut and carry in stock.

The Coloring and Etching of Gem Stones.

WHEN the coloring of a precious stone is undertaken for the purpose of making it off as a similarly colored natural stone, such products may with justice be termed counterfeits. It is a different matter entirely, says the *Journal der Schmiedekunst*, when, for instance, a topaz is transformed by heating into a topaz and sold as such. Agate especially has for a long time been the object of attempts to impart to it different colors concerning which we shall have to say later. Yellow burned amethyst is sold as citrin (gold topaz), and in this deception can be imputed, because in this case we are dealing with the same material as quartz, which is of the same value. To effect the coloring of onyx, the stones are first washed and then dried in the air. They are placed in honey, diluted with 500 parts (½ liter) of water to 250 (250 grammes) of honey. The pot containing the stones in this fluid is placed on a stove or on a warm stove, but care must be taken that the fluid does not come to a boil. As the stones must always be recovered with the fluid, it requires continuing up. In this manner, one must continue for at least 14 days. After this period, the stones are removed from the fluid, washed off and placed in another pot, which is then filled up with sulphuric acid and the stones are covered. A piece of paper is placed over the pot; it is placed in a stove and live coals heaped about it. In a few hours the porous or soft stones are colored; others may require as much as a day, while some cannot be colored at all. The stones are finally removed from the fluid, washed and dried on the stove. They are then polished and laid for a day in a box, so that any possible fissures may be filled with it and greater brilliancy imparted to them. The oil is removed by rubbing with an emery paper.

The so-called Brazilian carnelian, which at the present time is worked up in Oberstein and Idar, is subjected to the same treatment as the domestic, as well as the other colored stones with straight markings. Chalcedony can be beautifully colored a pale yellow, either monochrome, clouded or striped, by drying them for several days on a stove, not too hot, laying them in a pot and pouring hydrochloric acid over them. The vessel is then covered with a piece of slate, which must be tightly sealed by means of putty or clay. After the pot has been allowed to stand quiet on the stove for 14 days, at least, the change of color to yellow will be complete.

To beautify their natural colors many stones are burned and the following process is carried out with them. The stones are dried for at least 14 days on a very hot stove; they are then thrown into a crucible and moistened with sulphuric acid. The crucible is then covered with a lid and heated in a hot fire, to a red heat. The stones are allowed to die out gradually, and when the crucible has cooled off the iron sulphate in the stones is completely deprived of water. The color of the oxide is very apparent in the transparent mass and the carnelian color. Large pieces are easily burned; they should there-

fore be cut first, to reduce their bulk. The milky white chalcedony with the beautiful dendritic brown and black markings, which is worked in Oberstein and Idar into medallions, is also imitated, with the dendritic markings so naturally and durably produced that these artificial arborescent markings can only with difficulty be distinguished from the natural article.

Etching can only be effected in the case of gem stones in which the chief component is silicic acid—for instance, rock crystal, carnelian, chalcedony, etc. Fluoric acid is well adapted for this purpose because in contact with silicic acid the latter is dissolved. The process employed is as follows:

After the stone surface has been cleansed it is prepared with an etching ground, just the same as in etching on copper. Then the design is traced in it, the whole inclosed in a wax dam and finely powdered fluor-spar strewn over the surface. Then pour on a mixture of sulphuric acid and water, in equal parts, until the whole has thickened, and cover with a close metal cover, so that the fumes arising from the acid cannot escape. The gaseous acid causes the etching to proceed more rapidly. Then take a leaden box, the upper side of which can be used as a lid, and hang in it the grounded and traced stones on threads secured to the inside of the lid by wax. To the bottom of the box a leaden pipe extends, which is connected with the lead retort that is exposed to a gentle fire, and in which the mixture of fluor-spar and sulphuric acid has been placed. On the bottom of the box a little water is poured, which absorbs the excess of acid.

The lid must be lightly cemented down. The acid fumes will now enter the box and etch the tracing on the stone. By this process the lines are rendered rough and matt, whereas in that first described they are made smooth and brilliant.

News Gleanings.

August Basse, Quincy, Ill., has been succeeded by Henry Basse.

Charles M. Sullins, Creal Springs, Ill., has removed to Marshall, Ill.

Frank Baldwin, Booneville, Ia., has gone to Van Meter, in the same State.

The business of the late Fred Dubach, Sabetha, Kans., has been discontinued.

George Warnheis, a jeweler of Black Lick, Pa., recently sustained a loss by fire amounting to \$900.

W. L. Williams, Winnfield, La., recently sustained a loss of \$600 by fire. The loss is covered by insurance.

A. E. Veon, Brainerd, Minn., died there, recently, of disease incident to old age and troubles contracted during service in the war.

The retail jewelry store of Dawson & Bristol, Pierre, Colo., was the scene of a burglary, recently, when stock valued at \$100 was stolen. There is no clue.

C. G. Breneman, Altoona, Pa., is making improvements in the interior of his store at 1416 Eleventh Ave., in that city. The entire front of the store will be remodeled, and new show windows will replace the old ones.

Edward E. Baker, Warsaw, N. Y., watch

inspector for the Buffalo, Rochester & Pittsburg Railroad, has been granted a patent on a railway tie and fastener. Railroad men say Mr. Baker's invention will prove practicable in railroad operations.

It was recently reported that G. W. Wills, Tecumseh, Nebr., had sold out his business, but Mr. Wills says this is a mistake, and was due to the fact that he sold out his bicycle business. He continues selling the jewelry, clock and watch line, and says that he is in Tecumseh to stay.

The Eugene L. Deacon Jewelry Co., Denver, Colo., is seeking to locate J. C. Richdale, a former employe of the concern, for whose arrest Mr. Deacon says a warrant has been sworn out. Members of the trade who may know anything of the missing man are requested to notify E. L. Deacon at 1620 Champa St., Denver, Colo.

Hugh Connelly, Detroit, Mich., recently received from the E. Howard Watch Co., Waltham, Mass., a copy of a wireless message sent to the watch company by Commodore R. E. Peary. The message was sent from a Marconi station at Battle Harbor, Sept. 14, and in it Peary thanks the concern for congratulations tendered to him.

Burglars entered the jewelry store of C. Earl Wetzel, Council Bluffs, Wednesday night, and secured a small amount of money, two revolvers and several small articles of jewelry. They made their escape before the robbery was discovered, and bloodhounds were called from Deatur and placed on their trail. Entrance was gained to the building by forcing a door in the rear.

At a meeting of the City Council of Houston, Tex., about a week ago, an amendment to one of the city ordinances was offered and passed under the emergency provisions which will have a direct bearing on the right of pawnbrokers to purchase articles from minors. It is intended to act as an aid to the police to trace stolen articles. The new provision makes it a misdemeanor for any pawnbroker to take in pawn an article from a minor without the consent of the parent or guardian, and fixes the penalty at not less than \$10 nor more than \$50.

Werre & Brundige, jewelers, have opened a store at 70 Water St., Newburg, N. Y., for many years occupied by John H. Taylor and Taylor & Berivoitz. The senior member, Winfield H. Werre, came to Newburg from Detroit, Mich., about three months ago. He is a graduate of the Landis School of Engraving, in Detroit, and the Philadelphia (Pa.) Watchmaking School. He had served as manager for Mr. Taylor. Albert S. Brundige is the son of H. V. Brundige. Werre & Brundige have added an optical department and the store has been remodeled.

Customers of H. A. Roland, a watchmaker at 37 Maiden Lane, New York, are seeking to locate him. Mr. Roland went away Saturday last and an investigation later disclosed that he had left in the safe at his office a box containing a note and pawn-tickets for customer's watches, which he had pledged for \$92. The note stated that Roland was about to commit suicide, but as his tools were missing his customers think that he has skipped out. The missing man has been in business for 18 months, prior to which time he was employed by L. W. Sweet & Co.

Goods open for inspection from October 18 to 23 at 505 Fifth Ave., near 42d St., sale beginning October 25

North Attleboro.

Harry H. Curtis returned, last week, from a successful western trip. Edward Wilmarth is enjoying a few weeks in the White Mountains. F. F. Barrows has returned from an automobile trip to New Hampshire. C. Hudson has returned from a west-rip in the interests of his firm. Charles T. Paye attended the senatorial convention, last Friday, as a delegate. C. Pratt, Newark, N. J., was in town, last week, calling on the local jewelers. A large storage shed in the rear of the jewelry shops has been removed to East

Twedy has returned to his winter home in New York, after spending the summer in town.

I. Cutler, W. B. Ballou, C. Ray Randall and R. Blackinton enjoyed an automobile ride to the Brockton fair last week. Andrew Johnson, an employe of Main & Elliot Co., recently located a child in the woods of Wrentham, who had been missing several days.

Last week a manufacturing jeweler of North Falls sent his errand boy to the office for \$10 worth of stamps. The boy took the money and boarded a train for Boston and has not been heard of since. A hearing was given, last week, by Judge Charles L. Brown in the United States court in the patent infringement case of George L. Vose Mfg. Co. vs. G. C. Hudson & Co., of this town. The complainants claim that their rights in invention patented by Thomas Hudson of a certain style of watch have been infringed, and ask for an injunction on manufacturer. The defendant denies the originality of the Hudson watch, and asserts that it has been abandoned to the public.

An announcement was made last Wednesday morning of the sale of the F. L. Shepardson & Co., one of the oldest jewelry firms in North Attleboro. The new owner is Carl Hempel, a well-known young man who has been employed by Cheever, Hempel & Co. for some years. Mr. Hempel took possession of the business last Wednesday, and will conduct the business under the same name and will manufacture a high grade of chains and jewelry as the firm has in the past. The business of F. L. Shepardson was established in 1875 in a factory on East St., now situated in the rear of Mr. Shepardson's home. It was originally started by Mr. Shepardson and his father. Mr. Hempel, the new owner, has a host of friends in North Attleboro who are confident he will meet with success in his new venture.

The manufacturing jewelers in the north and south districts paying over \$100 in taxes are: Walter B. Ballou, \$142; Manufacturers' National Bank, \$289; Harry F. Ira Barrows, executors, \$380; H. F. Barrows, Jr., \$361; H. F. Barrows Co., \$388; H. F. Barrows' heirs, \$3,297; A. S. Bishop, \$293; Roswell Blackinton, \$160; Anthony H. Bliss, \$591; Frank H. Bliss, \$2; Walter G. Clark, \$464; Arthur E. Codrington, \$150; F. H. Cutler, \$121; Raymond Draper, \$317; G. Herbert French, \$1,488; G. Frothingham, \$178; Furbush, Swift & Ther, \$160; Edgar L. Hixon, \$986;

Charles O. Mason, \$163; George L. Paine & Co., \$300; Paye & Baker Mfg. Co., \$695; C. Ray Randall, \$258; W. H. and E. I. Riley, \$167; Howard C. Saunders, \$104; F. L. Shepardson & Co., \$100; William E. Smith, \$302; T. I. Smith Co., \$1,683; J. J. Sommer, \$694; J. J. Sommer & Co., \$340; Straker & Freeman, \$197; John L. Thompson, \$266; Union Power Co., \$214; George K. Webster, \$350; G. K. Webster & Co., \$1,855; George A. Whiting, \$161; L. W. Wise, \$1,253; W. & S. Blackinton Co., \$760; R. Blackinton & Co., \$920; F. B. Brigham, \$142; James O. Copeland, \$198; Fred S. Gilbert, \$172; G. C. Hudson & Co., \$300; Frank G. Pate, \$132; C. Ray Randall & Co., \$280.

Attleboro.

Charles H. Tappan has purchased several new fast racing horses in the south. P. Nerney has returned from New York, where he enjoyed the Hudson-Fulton celebration.

The shop bowling league started last Monday evening and will continue during the winter.

Edward E. Sweeney presided over the Republican Representative Convention, which was held here, last week.

Frank Ruggles, salesman for W. E. Richards & Co., is receiving congratulations upon the arrival of a daughter at his home in Wrentham.

The Town Hall Committee, of which Joseph L. Sweet is a member met last Thursday evening and voted to recommend to the town that a piece of land belonging to C. L. Watson, of the firm of Watson-Newell Co. on N. Main St.

J. S. Fearn, Taunton, has recovered the sample case of silverware he lost in town on a Taunton train, last week. The case was found in shrubbery near Capron Park, where it had been thrown by the two men who had taken it. The police found that it had been taken in an error by a drunken man, and it was returned to its owner.

The Cohannet Silver Co., Taunton, has been at work for some time past filling a large order for 254 premium cups of different designs for the State fair at Salt Lake City, Utah, soon to be held. Two of these cups are of special excellence and will be awarded to some fortunate persons who make particularly fine exhibits. The cups are handsomely engraved and make a very attractive appearance.

The case of the Cornell-Andrews Smelting Co. vs. the Boston & Providence R. R. Co. was heard, last week, in the Massachusetts Superior Court. This case is considered an important one and much is involved in the decision of the court. The plaintiff is the lessee of a piece of land upon which they have built a large smelting plant. The land is owned by Clarence Watson. The abolition of the grade crossings in Attleboro was decreed by the court in 1904, but it was not until 1906 that the land in question was taken for the purpose of abolishing the grade crossing at this point. This is the only way the Cornell-Andrews Co. had of carting the scraps from the other factories of the town in wagons to its plant, and when this was blocked up their business was injured.

A. Strauss, Backes & Strauss (London, Eng.); Isidore Freedman (Montreal), and A. Freedman, S. Freedman (Antwerp), were in Toronto, Ont., the week ending Sept. 30.

Among the traveling representatives in Toronto, Ont., last week, were: W. H. Sparks, Seth Thomas Clock Co.; Louis Schoenberg, Lyons Mfg. Co.; George B. Kenrick, Reed & Barton; George W. Starkweather, W. F. Renziehausen.

Among the travelers, who, recently, called on the Buffalo, N. Y., jewelry trade, were: W. H. McKenna, S. B. Champlin Co.; W. R. Shute, Day, Clark & Co.; Joseph Keller, Keller Mfg. Co.; Herman C. Schwartz, Charles C. Wientge Co.; I. P. Klous, Meyerowitz Bros.

Among the traveling representatives who visited the trade in Lancaster, Pa., recently, were: J. L. Roland, International Silver Co.; E. Woolf, Michael Woolf; H. A. Brennan, Robert S. Gatter; Morris Friedman, M. Friedman & Co.; C. H. Macarty, Kastenhauer & Lehrfeld.

Traveling salesmen who visited Indianapolis, Ind., recently, were: Ferd. Phillips, Richter & Phillips; Alvan T. Hatch; John F. Garland, Keller Jewelry Mfg. Co.; F. E. Jacobus, Bride & Tinckler; F. G. Kreuger, Gebhardt Bros.; Milton J. Vogel, Morris Vogel & Bro.; R. P. Clarke, New England Watch Co.

Traveling representatives who called on the Cincinnati, O., trade, during the past week, included: M. Untermyer, Charles Keller & Co.; Mr. Sinnock, Ehrlich & Sinnock; Harry Farquarson, E. A. Potter & Co.; A. W. Levy, Louis Strasburger's Son & Co.; J. W. McClannin, Wilcox Silver Plate Co.; J. M. Morrow, American Watch Case Co.; George A. Jochum, C. Cornehlens; William J. Anton, Durand & Co.; J. M. Torbert, Simeon L. & George H. Rogers Co.; James R. Palmer, Henry A. Kerby; C. B. Bartlett, Whiting Mfg. Co.; Percy D. Lucas, Frank W. Smith Co.; George N. Steere, George N. Steere Co.; W. S. Noon, Cory, Clark & Noon; W. F. Joel, E. H. H. Smith Silver Co.; Norbert Hofman, Eichberg & Co.; C. T. Barbour, Watrous Mfg. Co.; Leo Henle, Sussfeld, Lorsch & Co.

The traveling representatives who called on the trade in Omaha, Nebr., during the past week, were: W. G. Moland, Sansbury & Nellis; Morton Frackman, S. Frackman; Henry Hoffa, Hodenpyl & Walker; H. C. Wilson, Crescent Watch Case Co.; C. E. Pettit, B. A. Ballou & Co., Inc.; E. Denilie, Champenois & Co.; Mr. Levy, Fox Mfg. Co.; F. L. Pettee, Waterbury Clock Co.; W. A. Lamb, Geo. H. Fuller & Son Co.; F. C. Winship, H. C. Fry Glass Co.; J. R. Palmer, Henry A. Kirby; R. J. Marsh, C. A. Marsh & Co.; Mr. Brower, S. O. Bigney & Co.; H. H. Jacobson, Jacobson Bros.; F. F. Gibson, Gibson, Krugler & Co.; Mr. Kolker, Juergens & Anderson Co.; N. E. Treat, Gorham Co.; W. F. Adams, Simpson, Hall, Miller & Co.; F. B. Frank, Pairpoint Corporation; D. L. Nesler, Nesler, Mackenzie Co.; Mr. Bond, Brown Art Goods Co.

Traveling representatives in Boston, Mass., last week, included: B. F. Griscom, Bippart, Griscom & Osborn; A. D. Manning, D. Wilcox & Co.; Mr. Bishop, Bi-hop & Bishop; George W. Read, Larter & Sons; Mr. Hollister, Chapin & Hollister Co.; A. T. Sansbury, Sansbury & Nellis; Arthur Connell, Link & Angell; Mr. Glander, J. D. Dalzell & Co.; William B. Peck, Crossman Co.; F. C. Standing, Charles Weller & Co.; A. E. Allsopp, Allsopp & Allsopp; J. W. Wertz, C. Sidney Smith & Co.; David Young, White & Young; H. C. Ward, Durand & Co.; Mr. Lanneau, Battin & Co.; Fred Hoyt, Hoyt, Obrig & Geiger Co.; Max Moser, Moser & Whyte, Miles Carter, Carter, Qvarnstrom & Remington; Mr. Ruggles, W. E. Richards Co.; Mr. Cha e. Boss & Baldwin; Mr. Swift, Furbish, Swift & Fisher; J. J. Sommer, J. J. Sommer & Co.; Fred Somes, Bates & Bacon; Mr. Sherrill, Sinnock & Sherrill; A. R. Engelmann, Krantz, Smith & Co. (Inc.).

Buffalo, N. Y.

William St. jewelers are taking an active part in plans for a big East Side carnival to be held at an early date.

Joseph Block, of the Queen City Ring is in New York on business. J. H. Porter, of the same firm, is on a western

the last meeting of the Buffalo Optical Society the organization of the Buffalo branch of that body was postponed until the next meeting.

H. Wile, of White, Wile & Warner, manufacturing jewelers, is on an eastern tour. A. B. Warner has returned from New York. Their factory is being operated day and night at present.

Among the jewelers who recently visited the Buffalo jewelry market were: J. S. Punxsutawney; P. M. Riley, Holston, N. Y.; J. A. Snyder, Du Bois; W. H. Silver Creek, and F. Nordstrom, Westtown.

Charles A. Schopp, an Ellicott Sq. jeweler, recently reported to the police that his store in Herkimer St. was entered by burglars.

A diamond stud and other jewelry were stolen. Mr. and Mrs. Schopp have returned from Syracuse.

Buffalo friends of George R. Lammerts have been informed that he has taken a tour as representative of the Kennedy Manufacturing Co., Detroit. He is covering Indiana and Illinois. Mr. Lammerts was formerly sales agent for E. Kirstein Sons Co., Chicago & Eisele, who are agents for the Buffalo Cut Glass Co., have a most interesting exhibit at the Buffalo Industrial Exposition being held at the Broadway Arsenal in this city. The exhibit shows the cutting and polishing of glass and is under the general charge of H. C. Van Auda. The display is attracting widespread attention.

John C. Betz, of Schneider & Betz, manufacturing jewelers, who, as recently announced in THE JEWELERS' CIRCULAR—WEEKLY, has been nominated for assessor by the Democrats of Buffalo, is being boosted by some of the local newspapers. One paper says that his experience as a business man will make him a valuable member of the Board of Assessors. Mr. Betz is at present an unincorporated

J. Carr, the jeweler at 2127 Main St., Niagara Falls, has a record of which any business man can feel proud. He has been at the same stand and in the same business for 43 years. Mr. Carr started to learn the jewelry business with O. R. Newton, Oct. 1, 1866. In 1882 Mr. Newton sold his business to Carr & Brown. In 1884 Mr. Brown sold his interests to Mr. Carr, who has since been in charge of it.

United States Attorney John Lord Orian announces that so far as he has discovered no others are connected with the Amsterdam Diamond Co. in this city than Joseph H. Miller, who ran the office of the concern in the Palace Arcade. As already announced in THE JEWELERS' CIRCULAR—WEEKLY, Mr. Miller was recently arrested on a charge of using the mails for fraudulent purposes in connection with the concern. Miller is now at liberty under

decision of interest to jewelers and involving the sale of jewelry has just been handed down by Justice Brown of the Supreme

Court of Buffalo. He holds that a person doing business and buying goods while under the age of 21 years cannot, under any circumstances, be held responsible for the purchase of said goods. The sale of nearly \$600 worth of jewelry by Rosenbloom Bros., of Rochester, to Libbie Rosokopf, who had jewelry stores in Buffalo and West Seneca, a suburb of this city, was responsible for the suit. An action was tried in the Municipal Court in January, 1908, because she failed to pay the bills for jewelry when due. Judge Hodson, of Buffalo, who presided at the trial in that court, held that the plaintiff could not recover on the contract of purchase by the defendant because, from a legal standpoint, she was an infant in age, although it appeared in the case that she was running two stores, was a grown woman and married. Judge Hodson held that the defense made by Mrs. Rosokopf was against equity, but that the law was clear that she could not be held on the contract for the purchase of merchandise other than necessaries. In the appeal case Justice Brown has just upheld the decision of the lower court.

Newark.

Mr. De Wyngaert, of Scofield & De Wyngaert, is touring Pennsylvania.

George W. Starkweather, of the Wm. H. Renziehausen Co., is home from a business tour.

Mr. Leithoff, of Leithoff & Stevens, 61 Arlington St., has returned with his family from a four months' tour of Europe.

Dr. R. Chesler, D. O. S., the optical specialist, has removed from his old quarters on Halsey St., and is now at 102 Market St.

J. A. Lebkeucher, of Kremenz & Co., widely known to the trade in Newark, is seriously ill. He has been ailing for some time and has now been removed to a hospital.

Theodore M. Woodland, of Jones & Woodland, has again been elected a director of the First National Bank, of West Orange. Mr. Woodland was one of the organizers of this institution.

The Frizlen Cut Glass Co., Vineland, N. J., has been incorporated, with a capital of \$10,000. The incorporators are William L. Frizlen and W. F. Tower, Vineland, N. J., and David Doerr, Dacosta, N. J.

Newark retail jewelry stores along N. Broad St. will soon be brilliantly illuminated evenings. The Business Men's Association has almost completed its work, and the lights will be in place on Nov. 1.

Among the buyers in town, last week, were: Mr. Patch, of Henry Birks & Sons, Ltd., Montreal, Can.; Mr. Cuff, of Rylie Bros., Toronto, Can.; Mr. Gilbert, St. Louis, Mo., and E. Jaccard, Kansas City, Mo.

The Elm Mfg. Co., East Orange, N. J., has been incorporated to manufacture jewelry, with a capital of \$125,000. The incorporators are F. J. Meerlender, F. D. Meerlender and H. H. Picking, all of East Orange.

The United Silver Co., of this city, has been incorporated to manufacture silverware, with a capital of \$15,000. The incorporators are Paul Armitage, James Betts and A. H. Montegriffo, Jr., all of Newark.

J. Wiss & Sons will soon commence the erection of a 12-story marble structure on Market St., opposite Military Park. The building promises to be one of the finest in the State and the finest in Newark, from an architectural standpoint. The concern is one of the largest retail jewelry and cut glass concerns in the city.

When the Japanese business men who are studying conditions in this country visit Newark they will inspect all the big factories, including the jewelry concerns. Included in the committee which has been appointed by the Board of Trade to receive them and conduct them about are Curtis R. Burnett and Matthias Stratton.

Announcement has just been made at New Brunswick, N. J., of the marriage of Dr. Walker Atwood, formerly of this city, and Miss Helen Bennett, of Church St., New Brunswick. They were married on Sept. 15, in this city, by Justice of the Peace Hopwood, stopping off during a visit to New York. Dr. Atwood is an oculist and came to this city about six weeks ago.

The beautiful Autumn floral display and decorations in the large show window of Mrs. A. F. Williams' jewelry store, 23 E. State St., attracted the attention of many passers-by during the past week. The decorations include red and yellow asters and streamers of the same colors artistically arranged. Brilliant diamonds nestle in beds of yellow satin and yellow and red wax candles in dazzling silver candelabra add to the enchanting scene.

Additional testimony in the case of John M. Kiefer, the jeweler, whose wife is trying to prove him insane, was taken at the courthouse this week. Kiefer's brother, Andrew O., a wholesaler on Arlington St., is seeking to keep him from Overbrook Asylum, where he was formerly confined. Much of the testimony was of a personal nature. Physicians engaged by Kiefer testified that Kiefer was now sound in mind and had no delusions. His wife declared otherwise.

The Good and Welfare Committee of the Manufacturing Jewelers' Association is already actively campaigning, after the Summer vacation, for the stamping and placing of a trade-mark on all goods sent to the retailers. Because of the failure to stamp goods properly some concerns help perpetrate much fraud year after year, and it is to eliminate this that the manufacturers are crusading. In Pennsylvania a State law makes it a misdemeanor to sell goods lower than 10 carat, marked as "gold"; hence the agitation here would no doubt result in ridding the country of much of this practice. It is possible that when the New Jersey Legislature convenes in January a bill may be prepared and presented by the manufacturers along the lines of the Pennsylvania measure. The Good and Welfare Committee has not yet arranged a date for the meeting of the association, but will do so soon. When the association meets there will be an interesting business and social session. The committee is composed of the following members: A. J. Parker, of the Osmon Parker Co.; Andrew Hedges, of A. J. Hedges & Co.; Theodore M. Woodland, of Jones & Woodland; Matthias Stratton, of Alling & Co., and Joseph Angell, of Link & Angell.

Boost Your Holiday Sales

WITH K & H UMBRELLAS

One of these doll umbrellas given away free with any umbrella at \$6 or over will mean more umbrella sales.

Each one is in every respect like a "full grown" umbrella—has steel frame, strong hard-wood rod, fine sateen cover, nickel ferrule, assorted handles. Size 12 inches from tip to tip.

Canada Notes.

TRADE CONDITIONS.

Business is good, especially in western Canada, for the last 18 months stocks have been low. With a record harvest and easy money during a period of forced inactivity, a heavy demand has arisen, the rush of orders making it difficult to supply the call for some lines. In the watch trade, though good, is not so noticeably active. The watch business is satisfactory, with increased demand for railroad watches. The demand as regards clocks is not so favorable, as it appears to be falling to a greater extent in the hands of the department stores. Silver is in good demand and jewelry is active. Chains and ring bracelets are not selling so well as formerly, expansion bracelets being more scarce of late. Fobs are much in requisition. Fashion in souvenir goods opened late this year and the volume of trade in this line was considerably below expectations. Skilled mechanical work is in great demand.

A. Burns, Vernon, B. C., has assigned O. Cochrane, New Liskeard Clock Co., New York, Ont., advertised that it is selling to Wm. M. Bulger, formerly of Seaforth, is opening a store in Vancouver, B. C. W. H. Latimer & Poulter, Toronto, Ont., succeeded by the Michigan Optical Co. B. Thorofofsson, Saltcoats, Sask., has transferred his business to the Thomas Jewelry

Mund Scheuer, Jr., with Edmund Scheuer, Toronto, Ont., has gone to New York on a purchasing trip. G. Ellis, P. W. Ellis & Co., Toronto, has returned after an extended trip to eastern jewelry centers. A. Kent, of Ambrose Kent & Sons, Toronto, Ont., has gone to place orders in New York and the Attleboros. Walter J. Barr, president of the Goldsmiths' Stock Co., Toronto, Ont., has gone to New York on a purchasing trip. S. Smith, St. Catharines, Ont., and J. Jeannet, Elmira, Ont., were among the buyers who visited Toronto, last week. Milburn, Peterborough, Ont., had his store considerably damaged by smoke and fire during a fire in the neighboring premises, Sunday, Oct. 3. Out-of-town jewelers calling on the Toronto, Ont., trade, last week, included: J. Hollingshead, Streetsville; A. Birks, Arthur and J. Landreble, Galt, all Ontario.

John A. McEwen, who recently resigned his position with Ryrie Bros. Toronto, Ont., on account of ill health, and at present in Vancouver, Ont., visited Toronto, last week, and is much improved in health. The marriage of Albert Freedman, Montreal, Canadian representative of S. Freedman, diamond merchant, Antwerp, to Miss Mel Hart, of Montreal, will take place Oct. 14. Mr. and Mrs. Freedman will go on a honeymoon tour 'round the world. Three men were recently arrested at Steveston, B. C., on suspicion of being concerned in the recent robbery of C. E. Redfern's jewelry store, Victoria, B. C., when \$40 worth of goods were taken. One of the named Innis alias Roberts escaped from the lockup. The others have been identified by Mr. Redfern as having visited the store the day of the robbery. R. Dingwall, Ltd., Winnipeg, Man., has leased the ground floor of the new

McArthur building on the corner of Portage Ave. and Main St., in that city, which will give them 8,000 square feet of floor space. It is expected that their new quarters will be ready for occupation early in the new year, and the fitting up will be of the most modern and luxurious character. One or two members of the company will visit Europe in the meantime to place extensive orders in readiness for the opening.

The jewelry store of C. Dawson, 198 Carlton St., Toronto, Ont., was robbed of jewelry valued at \$600 on the evening of Friday, Oct. 1. Mrs. Dawson and another lady were in charge, Mr. Dawson having gone out. The women were in a back room, when one man entered, leaving two confederates on guard outside, and snatched a tray containing brooches set with pearls. The men got away, but were afterwards arrested. Upon one of them, Fred. Parish, some of the stolen goods were found. He confessed to taking the articles and implicated the others, Malcolm McCollum and Harry Dewsbury, as his partners. The latter couple were also identified by Mrs. Dawson. The thieves were arraigned in the Police Court on Monday and remanded for a week.

Pittsburg.

Robert Miller, Lorain, O., came to Pittsburg, last week, to witness the ball games of the national series. Howard Smart has gone to Omaha, Nebr., to engage in the jewelry business with an uncle at that place who is a manufacturing jeweler. F. H. Kennerdell, who will be one of the next jury commissioners of Allegheny County, was in Pittsburg, last week, from Tarentum, buying stock. Sam F. Sipe has erected a large and handsome electric sign at the Union Station which is attracting a great deal of attention from travelers who live in the suburbs.

B. J. Harkins, who for a number of years was marker at the Pittsburg Stock Exchange, is now associated with the M. J. Smit Co., Fifth Ave. and Masters Way. L. M. Smit left Sunday night for Detroit to attend the Pittsburg-Detroit baseball world series. Mrs. Smit preceded him there in an automobile, and Mr. Smit will come home in the car. John J. Butler, Providence, is visiting his son, Haywood M. Butler, director of physical culture in the Allegheny Preparatory College. Mr. Butler is a member of Waite, Thresher & Co., Providence, one of the largest manufacturers of jewelry in the United States.

Carl Gillespie, of Gillespie Bros., has been in the east for 10 days, F. F. Lang, of the same house, presented a coral stickpin to the man who knocked the first home run during the national baseball series. Mr. Lang has recently made some very fine articles from wood which he carved by hand. The Hardy & Hayes Co. has completely recovered from its recent fire. The carpenters and painters have finished their labors and the store looks handsomer than ever. The walls of the first floor have been

painted in white and a delicate shade of blue, adding a subdued tone to the entire interior. Steele F. Roberts, president of the Jewelers' 24-Karat Club, of Pittsburg, announces that the club will give a "social" about the middle of next month, when an effort will be made to arrange a good time for the members of the organization. Following the holidays a number of smokers and similar affairs will be held.

The John M. Roberts & Son Co. at the present time is making some extensive alterations to the second floor of the establishment in Market St. New metal ceilings are being installed and will be finished in a delicate white and decorated in gold. The firm also will equip the room with 30 chandeliers. John M. Roberts promises that it will be the best-lighted room in America. The firm display cut glass throughout this entire floor. Some changes are also being made to Mr. Roberts' offices.

The members of the Jewelers' Duckpin League rolled the second game of the season Monday night of last week. The Wattles team took four straight from the Diamonds; the Loch's trimmed the Vilsacks three out of four and the Terheyden's and Roberts' teams split even. The Wattles are first in the standing of the teams, with eight games to their credit, or 1,000 per cent. The Loch's, Terheyden's, Roberts', Vilsack and Diamond follow in the order named.

The Pittsburg Association of Credit Men will entertain the members of the Pittsburg ball team at luncheon in Pittsburg to-morrow, provided at that time, they have concluded playing all the games that it will be necessary to demonstrate who are the world's champions. This town has been baseball mad for a week. Many out-of-town jewelers came here to attend the series. Friday and Saturday retail business was almost suspended because of the enthusiasm.

The revival of prosperity is nowhere more evident than in the northwest. The remarkable development in this section of the country during the past decade is well shown in the growth of Jos. Mayer & Bros., Seattle, Wash., the largest jewelry factory of the far west. How many jewelers would imagine that on the Pacific coast there is a modern and well appointed factory giving employment to 225 workmen, exclusive of the office help? This firm has five departments, making exhibition pieces in silver, gold and silvery jewelry, diamond work, Masonic and emblem goods and watch cases. The house also has a complete optical department, including a lens-grinding shop, and does silver-plating for the trade. The firm is composed of Joseph, Alfred and Marcus Mayer, and their three traveling men cover the territory from and including Alaska to Arizona. Besides being manufacturers, Jos. Mayer & Bros. are large jobbers of watches, jewelry, silver and plated ware, clocks, optical goods, and, in fact, everything required in a retail jewelry store. Some of the special presentation pieces made by this factory, notably the silver service for the battleship *Washington* and the "Dick Ferris" trophy, were high examples of the silversmith's art.

GORHAM SILVER

¶ The Gorham Company are gratified to announce that they have made every preparation for coping with what bids fair to prove an unusually busy holiday season.

¶ They are enabled to offer to the trade a selection of appropriate goods hitherto unexampled either as to variety of style or individuality of design.

¶ It must, however, be remembered that, though every endeavor will be made to fill all orders promptly and satisfactorily, the interests of all concerned are best served if these orders be placed as early as possible.

Failures During September. THE improved conditions in the business world are well reflected in the reports of the failures during the month of September, which generally were below the average of the previous years in number and amount of liabilities. According to the table of failures prepared for Dun's Review, there were but 813 commercial insolvencies last month, with liabilities of \$8,446,000, as against 1,026 in September a year ago, with liabilities of \$17,298, and 856 in September, 1907, with liabilities of \$18,935. Of these the decrease is shown both in manufacturing and trading lines.

As far as the jewelry trade is concerned, the showing keeps pace with the general conditions as outlined above, particularly in the total liabilities. According to the table of failures by branches of business compiled for Dun's Review, there were but 13 jewelry and clock dealers reported insolvent last month, whose liabilities aggregated \$70,360, as against 19 in September, 1908, with liabilities of \$111,628, six in September, 1907, with liabilities of \$103,612, six in September, 1906, with liabilities of \$16,428, and nine in September, 1905, with liabilities of \$80,407.

Stamp Out the Gem Smuggler.

OF the disagreeable elements with which the business world has to contend the three worst (the three disgraces they might be called) are the swindler, the thief and the smuggler, but the meanest of all is the smuggler. Caution on the part of business man can often keep him from being a victim of the thief or swindler, but there is little or nothing he can do to protect himself from the smuggler, and the loss incurred in the aggregate by the practices of the smugglers may sometimes equal that of the combined aggregate of losses suffered from thieves and swindlers.

As it is the Government's duty to stamp out smuggling for its own benefit and to protect the legitimate merchants who directly or indirectly have paid the full customs charges upon the articles which they handle, the mercantile interests naturally leave it to the Government to deal with the smuggler and keep their hands off the subject. However, there are times when business lines for their own sake should actively co-operate with the Government in the stamping out of smuggling by taking measures of their own and getting evidence against the smuggler, and if reports that have been coming to this office and rumors that have been going around the trade are true, such conditions exist in the jewelry and gem trades at the present time.

It is nothing new for the jewelry trade to suffer from smuggling, and no matter what the duty on jewelry or gems may be, the intrinsic value of the articles are so high that the avoidance of even the smallest duty amounts to a material saving. What is more, the bulk, particularly in gems, is so small that smuggling these articles has not been difficult to those who believed that the amount to be gained was worth the risk. Heretofore the greatest loss to the trade has not been from the professional who brought in his goods to sell,

During the nine months from Jan. 1, 1909, to Sept. 29, 1909, 351,000 copies of The Jewelers' Circular-Weekly were circulated. There is no free list. During the remaining three months of this year over 115,000 copies will be issued. Hundreds of the leading houses are reaping the advantages of having their advertisements in nearly half a million copies a year.

but from the tourists and returning residents of the country who have shown little compunction about violating the customs law when they felt they could do it safely. In pearl necklaces particularly the loss of duty by the Government, if it could be properly computed, will be found to run into an enormous sum, as it is a common custom for rich people who buy these abroad to bring them into this country and forget to mention the fact to the inspectors of customs.

That there has been a decrease in the practices of tourists, and that this decrease will continue as a result of the activity of the customs inspectors at the Atlantic ports, within the last month or so, is generally believed, and it is to be hoped that the many seizures that have been made and the prosecutions that have been threatened will to a large extent put a stop to the illegal acts of these people who are in other respects honorable and respectable.

For the first time in years the jewelry trade is now suffering more from the professional smuggler than from the tourist, and, according to rumors that have been going around the trade in New York for some time, the professional smugglers in gems are not only active, but are working on more systematic lines than ever before. Correctly or incorrectly, the names of some large houses are connected with these smugglers in the rumors, and this has even been brought to the attention of Government officials.

This condition should be stopped at once, and it is up to the trade to help to do it. We suggest that a fund be raised immediately by the principal importers, cutters and retailers for the purpose of prosecuting, without fear or favor, every one connected directly or indirectly with the clandestine importation of diamonds or other gems, and that steps be taken for the purpose of getting evidence both in Europe and America that can be laid before the United States attorneys in the districts through which the gems now come. To prevent undue influence or pressure being brought upon the subscribers to the fund, we would suggest that it be put into the hands of an international detective or other agency with instructions to go ahead and get evidence and prosecute without caring as to who is involved by the evidence or permitting immunity to be granted to any guilty party for any reason whatsoever.

The Government is stopping the practices of the private smuggler; let the jewelry and gem trade help kill out the professional smuggler by refusing to deal with him and by helping to get evidence that will put him where he belongs.

H. A. KIRBY

Manufacturers of Gold Jewelry
PROVIDENCE and NEW YORK

Lancaster, Pa.

G. W. Reisner visited Pottstown last week.

Samuel Zimmern, with Henry Zimmern & Co., visited Lancaster friends, last week.

Frank B. Fon Dersmith, with Loeb, Weber & Son, spent last week at Atlanta.

Elmer S. Woods, for the past two years a salesman for a Havana, Cuba, jewelry firm, is at home on a visit.

Frank Gaskins, railroad watch maker at Sunbury, Pa., was in Lancaster last week and called on the local trade.

Mr. Hitchler, Wilkes-Barre, Pa., formerly a missionary for the Hamilton W. Co., visited this city, last week.

J. George Fox, late a student at the school, has taken a position as watchmaker and engraver with George L. Blackwell, Camden, S. C.

Arthur Metzger, formerly with the Hilton Watch Co., has resigned as secretary of the Lancaster Board of Trade and taken a similar position with the Trenton, N. J. Board of Trade.

The friends of T. Wilson Dubbs were pleased to learn that his father, Dr. J. Dubbs, of the faculty of Franklin & Marshall College, is recovering from a late serious illness.

Charles J. Rood, president of the Hilton Watch Co., has returned from a trip to New York. J. Fred. Lever, of the company, was last week elected a director of the Lancaster Gas, Light & Fuel Co.

George L. Hepp, Lititz; A. T. Hepp, Parkesbury; Wm. P. Carsons, Baldwinsville; Edmund Rankin, Pittsburg, and J. H. Senig, New Holland, were among the visitors who visited this city, last week.

James W. Simcox, Boston, formerly of Lancaster County, was in Columbia, Pa., last week, on his wedding tour. His wife was Miss Matilda Warren, of Providence, R. I., who was visiting friends in Lancaster, Pa., a year ago, when she and her husband were at the home of her hostess.

Albert Langer, who was arrested in York, Oct. 6, for shooting a Lancaster County policeman on Oct. 4 while under arrest for selling liquor illegally, stole some articles from C. F. Lichtenstein's store a day or two before the shooting, and will answer to this charge among others.

C. S. Ridenour, late with C. G. Brennan, Altoona, Pa., has entered the F. Bowman Technical School for a special course in watch work. Cecil Aron, Painesville, O., has returned here, finishing a course in watchmaking at school. Leroy Gallatin, R. R. Kennerly, ward Link and W. J. Fisher, students, were in the big county fair at York, Pa., last week.

Inquiries made by a resident of Oil City, Pa., relative to George Hoff, a once famous clockmaker of Lancaster County, one of whose fine clocks crops up now and then at different points in this country, led to a recent investigation which showed that he was in business in Lancaster in 1780. He came from Germany in 1765, it is probable that he was in business long before that year. He died here in 1816. Two of his sons, John and John George, were noted clockmakers here.

the Republican Assembly convention (anhattan, held last Wednesday night, ng the candidates for members of as-

ssembly who were nominated are Wm. Hoetzel, jeweler, of 293 E. 156th St., Bronx.

Wm. I. Rosenfeld, 1 Maiden Lane, has established an Antwerp office at Avenue de Keyser, and where he will hereafter buy his diamonds direct—not through brokers. M. B. Rosenbeek will be in charge of the office.

A notice of appearance has been filed by attorneys representing the Bay State Optical Co., in response to an action brought recently in the United States District against the concern by the American Optical Co. for alleged infringement of an eye-glass patent.

Sadie E. Shapiro, daughter of J. Shapiro, treasurer of the Watchmakers' Jewelers' Benevolent Association No. 1, will be married, Sunday evening, Oct. 24, to Maurice E. Passes, late of London, Eng. The ceremony will take place at the Lexington, 109 E. 116th St.

Dr. George F. Kunz, of Tiffany & Co., it was announced, last week, has accepted the chairmanship of the American Advisory Committee of the exhibition of American manufactures, to be held in Berlin in 1910. The directors of the committee include many well-known men in this country.

A discharge in bankruptcy was denied last week to the former export company known as H. J. Lesser & Co. It was alleged that the firm made false statements on which to obtain credit and on which they obtained a loan of \$4,000 from Jacob H. Schiff, the banker. Mr. Schiff opposed the discharge successfully.

William Barthman, 174 Broadway, has purchased the stock, good will and fixtures of the business formerly conducted by D. C. Van Riper, 170 Broadway. Mr. Barthman said, last week, that he had not yet fully decided what he would do, but that he contemplated continuing the business at the same address under the same firm style.

Henry J. Bebro, alias "Harry Phillips," who was placed on trial in London, last week, on charges of fraud connected with the bankruptcy of the Feltham's Bank, which he founded, will be remembered by the older members in the trade as the same man who, back in 1894, swindled a number of Maiden Lane jewelers on various pretences.

A trophy in the form of an Indian war canoe, made of silver, with clusters of ivy resting on flint arrowheads, has disappeared in a mysterious fashion from the Arrow-Head Inn. The cup was offered by the proprietor of the Inn to the winner in a four-in-hand race, which was driven from Arrow-Head Inn to Madison Square Garden. The trophy was supplied by Chester Billings & Son.

It was learned last week that the home of Jerome Adler, of Charles Adler's Sons, 527 Fifth Ave., who lives at 29 E. 79th St., was entered by burglars on the night of Sept. 28, and a considerable quantity of valuable jewelry taken. The jewelry, which was the property of Mrs. Adler, was taken from an unoccupied room. Detectives were assigned to the case but no information as to what the stolen goods consisted of could be obtained either from the police or detectives.

Creditors of George H. Carpenter and Maurice C. Dreschfield are notified that

there will be a first meeting of creditors at the offices of referee in bankruptcy, Peter B. Olney, 68 William St., on Oct. 27. Mr. Carpenter was adjudicated a bankrupt April 27, and Mr. Dreschfield was declared bankrupt on Aug. 14. Petitions in bankruptcy were filed in the United States District Court in this city against both bankrupts by Rudolph A. Breidenbach and others some time ago. Following the filing of the petitions a long-drawn-out series of examinations were conducted before Referee Olney, as special master, the final outcome being the adjudication in bankruptcy of both Carpenter and Dreschfield.

Adolph Kohl, who was arrested recently, charged with the larceny of \$2,400 worth of diamonds, some unset and some in the form of rings, brooches, etc., from Nebeling & Silverberg, 49 Maiden Lane, New York, was arraigned in the court of General Sessions, Part III, Tuesday, of last week, and pleaded guilty to grand larceny in the second degree. Kohl had been in business with his father, Daniel Kohl, in New Jersey, and had from time to time obtained goods from the firm of Nebeling & Silverberg for his father. The young man continued to represent to the New York firm that he was in business with his father, and the goods he obtained in this way had been pawned. It was said last week that all of the goods taken from the Maiden Lane jewelry concern have been recovered. Kohl will be arraigned for a final disposition of his case this week.

Frederick Portman, a Swiss watchmaker, who stole a 98-cent watch from a Brooklyn department store, was freed through the efforts of his wife, who not only secured his release from prison but obtained employment for him and made a number of friends. The man, whose home is in Allentown, Pa., had not fared well since he came to this country two years ago. He came to New York during the Hudson-Fulton celebration to seek for work. Mrs. Portman, when notified of his arrest by telegraph, came to New York, where she convinced the authorities that her husband was an honest man, and that it was hunger that made him steal the watch to provide means of obtaining food. The man was taken before a magistrate with the result that he secured his release and it is reported that he is now employed in the department store from which he stole the watch.

An action has been started in the United States District Court by Maximillian P. Fisher against R. L. & M. Friedlander, 30 Maiden Lane, alleging an infringement of the complainant's right to a patent on a certain original invention of a useful frictional grip for sliding rods. The complaint sets forth that before July 17, 1896, Wm. L. Preece was the original inventor of the device, and he patented the article on April 20, 1897, under letters patent No. 581,136. It is further stated that Mr. Preece transferred his rights to one H. Powell Rees and that Mr. Rees assigned and transferred all his rights to the complainant in this action. The complainants allege that the defendants have sold a large number of the devices in question, notwithstanding the fact that they have been notified that they were infringing upon the rights of the complain-

New York Notes.

(Continued from page 87.)

A preliminary injunction is asked for to restrain the defendants from infringing pending the adjudication of the suit. Frank Jeanne, of Wm. S. Hedges & Co., for Europe, Wednesday of last week, in the *Mauretania*.

Dennis, buyer for T. Eaton Co., a department store at Toronto, Ont., is in this city and has been buying Fall goods.

Bert Oppenheimer, for many years with J. & M. Friedlander, 30 Maiden Lane, has announced his engagement to Miss Beth Hoffman.

A new jewelry store was opened last week at 50 Nassau St., under the style of "Le Bijou." It is understood that a Mr. ... is to be the manager.

A sale at the Fifth Ave. Art Galleries, Saturday, a diamond Greek tiara sold for \$100. The bidding on 131 lots of jewelry which was offered for sale was brisk.

J. Arcus, formerly a well-known diamond broker of Paris, has removed his office to the active diamond district of Antwerp where he is located at 14 Ave. Char-

les Goldsmith, of Ingomar Goldsmith, recently returned to New York after an absence of five months in Europe. He is again for Paris in about four

weeks. Benjamin Roth, 204 State St., of Chicago, was a visitor in New York, last week, and was at the offices of THE JEWELERS' CIRCULAR-WEEKLY. He has gone to Provi-

dence. Aikim-Lambert Co. is represented in the New York Stationers' Bowling League this season. The team lost three games to the Anderson-Prigge team re-

cently. George J. Klinick, representing L. Heller & Co., in New York and Newark, is receiving congratulations from his friends in the city upon his engagement to Miss Anna ... boss, of this city.

Bendix & Son have opened a new store at 114 E. 42d St., near the Grand Central Hotel. Julius Bendix has been in business at 800 Third Ave. The two places will now be conducted under the name of J. Bendix & Son.

Winterhalter, of the Towle-Winterhalter-Hannafin Co., Butte, Mont., has returned from Europe after an extended trip and has started for his home. While in this city he made his headquarters with Henry ... & Bro., 71 Nassau St.

Among the out-of-town manufacturers who were in Maiden Lane during the past week were: Charles E. Hancock, of the C. E. Hancock Co., Providence, R. I.; Orin Clifton, of the Webster Co., North Attleboro, Mass.; and Charles D. Root, president of the Hulton Watch Co., Lancaster, Pa.

Among the out-of-town jewelers who were recent callers on Henry Freund & Co., 71 Nassau St., who made their offices in this city that concern while in town, were: W. Cornish Beck, of the W. H. Beck Co., Six City, Ia.; Ernst Wetteroth, of the Wetteroth Jewelry Co., St. Joseph, Mo.; J. Schuster, Cleveland, O.; C. S. Oberlin, Fresno, Cal.; George W. Feldman, Frank-

lin, Pa.; S. S. Kaufmann, Fredericksburg, Va.; George Kapp, Jr., Toledo, O.

The sale of the diamond and precious stone jewelry mentioned in the last issue of THE JEWELERS' CIRCULAR-WEEKLY will take place, Oct. 25, at 505 Fifth Ave. The goods consist of the finest selection of modern examples of the jewelers' craftsmanship, and contain the finest specimens of rubies, sapphires, pearls and diamonds. The goods will be open for inspection from Oct. 18 to Oct. 23, and catalogues will be sent out on application to prospective buyers.

Among the out-of-town visitors in this city, last week, were: L. Black, of the L. Black Co., Detroit, Mich., who made his headquarters at the Hotel Knickerbocker; M. A. Hagen, Fargo, N. Dak., stopping at the Breslin; W. A. Pierpont, Naugatuck, Conn.; I. Anthony, Camoneh, Ia.; Maurice Van Vliet, president and manager of the Baldwin Jewelry Co., San Francisco, Cal.; J. Wetherell, of J. Wetherell & Son, Parkersburg, W. Va., and A. B. Griswold, New Orleans, La., a number of whom were callers at the offices of THE JEWELERS' CIRCULAR-WEEKLY.

The jewelry store of Louis Spitzer, on Broadway, Far Rockaway, was entered by burglars on Wednesday night of last week. Goods to the value of about \$100 were taken. The thieves evidently became frightened, as they were leaving the store, for a number of articles taken were dropped in the street. The work is believed to have been done by three Italians who were observed hanging around town previously. Mr. Spitzer has offered a reward of \$50 for the arrest and conviction of the thieves.

An evidence of the great improvement in the diamond trade is shown in the cutting works of Eduard Van Dam, 437 Fifth Ave., which are being worked to their utmost capacity. Mr. Van Dam has increased his factory space and added 12 new cutting mills. These are of the latest improved type, and are operated by individual electric motors, thus dispensing with all shafting and belting. The mills occupy very little space and can be readily moved from place to place as required without any shifting of machinery, or interfering with the other mills, as the motor is attached to the base of each mill. This mill is a new Belgian invention and runs very smoothly.

In one of the windows of the Tower Mfg. & Novelty Co., 306 Broadway, there is on exhibition a handsome leather case filled with Castell pencils of all kinds and sizes which A. W. Faber will present to President Taft. The leather is of the finest morocco, red in color and the cabinet is lined with silk. A number of the pencils have silver and gold holders, while the erasers are green to match the color of the Castells. The cabinet is an elaborate affair, and will doubtless be highly appreciated by the highest executive in the land when the presentation is made on behalf of Count von Faber-Castell, the owner of the great pencil factories bearing his name here and abroad.

The Jewelers Security Alliance is trying to locate one J. Herman, who was until recently in the employ of H. Greenblatt, 168 Washington St., Seattle, Wash. He is charged with having robbed his employer of a tray of gold coins valued at \$150 and

a miscellaneous assortment of English and Australian gold coins, together with about 20 men's and women's watches and a miscellaneous quantity of jewelry. Herman had worked for the jeweler for about six weeks as a watchmaker and clerk, and had been employed without references. The missing man is described as 26 years old, five feet seven inches tall, weighing 160 pounds, by nationality a Russian, who speaks English brokenly. He has a smooth-shaven face and dark brown hair and eyes.

Elinor Loraine Beattie, who was recently brought here from London to answer a charge of obtaining a quantity of silverware from the Gorham Co., Fifth Ave. and 36th St., by representing herself to be a well-known customer of the firm, was released from the Tombs, Friday, in \$1,750 bail, pending her trial. The bail was at first placed at \$3,000, but was later reduced. Judge Crain, of the Court of General Sessions, accepted the bond, which was given by the National Surety Co. Miss Beattie was located through the agency of a caricature made of her by one of the employees of the Gorham Co. while she was purchasing goods at that establishment. Detectives learned that she had left the city and she was traced to London, England, where she was arrested and extradited.

Collector Loeb, of the customs service, has received from the Treasury Department detailed instruction relating to the enforcement of the marking clause of the new tariff act. The construction of the new law as set forth in the Treasury regulation just issued is regarded by importers as liberal. A decrease in the market value of the article caused by marking or printing is considered by the department as constituting "an injury," and the customs authorities are instructed to consider such articles exempt from the marking provisions of the new tariff. Articles which, while they may be marked without injury to the structure of the article itself, would constitute a defacement and materially depreciate their value and in many instances render the same unsalable, are considered by the Government to be not capable of being marked.

A five-dollar gold piece of private manufacture brought \$140 at the auction of coins held at the Elder Auction Rooms Saturday. This coin was made in 1852 by the assaying firm of Wass, Molitor & Co., and is the first specimen that has been offered for sale in many years. Wass, Molitor & Co. put so much value in their gold coins that they took away from the official United States Assay Office nearly all of its business. The coin was intrinsically worth \$5.04. It is due to the value in excess of face that the coin is now so scarce, the majority of them having been remelted years ago. The design is quite similar to that of the regular United States half eagle, but the inscription on the reverse reads "In California Gold Five Dollars." At the sale many new records were made, principally for three-dollar pieces. A fine coin of this denomination, dated 1869, in which year only 2,525 three-dollar pieces were coined, brought \$18.25, a figure much above the previous records. A gold dollar, dated 1860, struck at the Dahlonega Mint of Georgia, brought \$55, and a four-dollar piece

1879 brought \$51. Two specimens of hexagonal 50-dollar piece of California, 1851, respectively, 1851 and 1852, brought \$1 and \$115.

Among the out-of-town jewelers who called at the offices of J. R. Wood & Sons this week was J. Stoecker, Syracuse.

Columbus Day, the new holiday, was observed by a number of prominent houses in trade yesterday. There seemed to be a feeling of uncertainty, Monday, as to what would be done by many concerns. One firm was willing to close if another did, but no one seemed willing to take the initiative.

A business which has been conducted in the style of J. & W. Taylor, 70 West St., Newburgh, N. Y., has been purchased by W. H. Werre and A. S. Brundage. Mr. Werre has been connected with the management of the store for the last several years. Mr. Brundage has had long experience in the jewelry business.

The next meeting of the Optometrical Society of the City of New York will be held at the rooms of the society, 29 W. 39th St., this evening, at eight o'clock. The executive committee will make its report on the matters of membership and other matters which were referred to it. The revised constitution and by-laws, as read at the last meeting, will be presented for a vote on the adoption thereof. The executive committee announces the following lectures: October—Chas. F. Prentice; subject, "Static and Dynamic Reproduction." November—A. Martin; subject, "Reaping the Fruits of Industry." December—F. B. Marchant; subject, "Troublesome Cases." January—To be decided. February—A. J. Cross; subject, "Dynamic Skiametry." Those whose applications are pending are again requested to appear to the meeting, in order that their names may be balloted on.

The suit of John R. Wood & Sons against J. C. Proudman over a memorandum of transaction is set down for trial, this week, before the Supreme Court, Trial Term, Part 16, before Justice Dayton. A decision reversing the judgment of the lower court and granting a new trial was handed down by the Appellate Division in January, 1908. The case is now again before the court was brought to recover the sum of \$622.14 damages, the value of diamonds alleged to have been converted by the defendant. As told in the columns of THE JEWELERS' CIRCULAR—WEEKLY at the time that the action was first tried, in October, 1904, Mr. Trebilcock, who was a member of the firm of J. C. Proudman & Co., sent a clerk to the plaintiffs' offices with two diamonds and 23½ pennyweight 14-karat gold, which were delivered together with a memorandum bill. The diamonds were sold to a third party, and what money was received on the purchase was deposited in the bank to the credit of J. C. Proudman & Co. The complaint alleged that under the contract the defendants agreed to return the goods upon demand, and that this demand was refused by the defendants and they therefore converted the articles to their own use. The answer to the complaint was a general denial.

Boston.

William B. Garfield, with Kettell & Blake, has returned from a several weeks' camping trip at Wilson Mills, Me.

Lucian Rockwell, western representative of the Poole Silver Co., has been for a few days visiting his firm's factory and calling on friends.

Charles W. Davidson, president of the Thomas Long Co., addressed the William H. Davis Club, of Newton, Monday evening, taking for his subject "The Diamond Industry."

The engagement is announced of Miss Marion Squire, daughter of N. C. Squire, a leading jeweler of Lynn, and Arthur S. Kelly, of the diamond department of D. C. Percival & Co.

A club composed of the wholesale salesmen of the Smith, Patterson Co., known as "The 14 of Us," held its annual fishing excursion Sunday, Oct. 3. The day proved profitable and interesting to all who participated. Of the party Tom Hodgeson was "high liner" and Charlie Ramsdell was "Jonah."

Mrs. Dora A. Thompson, wife of William A. Thompson, a local jeweler and former president of the Medford Board of Aldermen, died at her residence, 19 Magoun Ave., Medford, Oct. 1. She was born in Medford, July 30, 1849. Besides her husband, a son, Leslie P., an artist, and Blanche Thompson survive her.

Among the jewelers in town, last week, were H. B. Ross, Ross Bros, Calais.; C. A. Harriman, Bath; Mr. Morrow, Camden Jewelry Co., Camden, Me.; Percy Safford, J. F. Safford Co., Farmington, A. B. Duncan, Portsmouth, N. H.; C. E. Gray, W. F. Chisholm, Gloucester; S. C. Hewitt, Salem; H. S. Hewett and Loring Smith, U. C. Smith Co., Brockton.

George H. Fernald, of the Waltham Watch Co.'s factory, who is in charge of the automatic machines of the company's exhibit at the Alaska-Yukon-Pacific Exposition, has announced his engagement to Miss Katherine Niblock, of Rockport, Ind. The wedding will take place in November and Mr. and Mrs. Fernald will make their home in West Newton. Previous to her marriage to William Collins, of Summit, R. I., Miss Etta Bennett, of the plate department, was given a reception by her shopmates and presented with a beautiful cabinet containing about 50 pieces of silverware. Mrs. Elizabeth Jones has been elected grand vice-president of the Daughters of St. George, the election taking place, last week, at the session of the grand lodge at Gloversville, N. Y. The opening games in the Waltham Watch Co. bowling league were rolled, Monday evening, Oct. 4, when the Machinists lost to the Jewel Assembling team.

Much sympathy is expressed for Aaron Mendelsohn, who shot at a man he believed to be a burglar intent on robbing his Summer home, and thereby seriously wounded a private of the 83d Company, Corps of Coast Artillery. The accident occurred at Mr. Mendelsohn's Hull residence Thursday night. The injured man is Private Michael J. Brogan. There are a number of regular companies of coast artillery stationed in and about the harbor, and several are quartered at Fort Revere. It was about 11 o'clock when the Mendelsohn

household was aroused by a noise apparently proceeding from the kitchen. Mr. Mendelsohn went downstairs and took his revolver with him. Receiving no response to his inquiry, "Who's there?" he fired, not waiting to turn on the electric light. When the incandescent was flashed on the scene, however, Brogan was found stretched upon the floor, the bullet having entered his back and passed straight through him. Mr. Mendelsohn summoned the police and physicians and everything was done to relieve the soldier. The doctors declare that Brogan was intoxicated and agree with the police that Brogan thought the Mendelsohn cottage was closed for the season and crawled inside for the purpose of taking a night's sleep. Brogan had no intention of robbing the place, all agree. The soldier, it is thought, will recover providing blood poisoning does not set in.

Games Rolled by the Jewelers' Bowling League of New York.

The following were the scores of the teams of the Jewelers' Bowling League of New York in the games rolled last week:

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended Oct. 9, 1909.

The U. S. Assay Office reports: Gold bars exchanged for gold coin....\$622,052.14 Gold bars paid depositors..... 78,831.75

Total\$700,933.89 Of this the gold bars exchanged for gold coin are reported as follows:

Oct. 4.....	\$142,524.58
" 5.....	158,334.66
" 6.....	73,054.46
" 7.....	124,698.62
" 8.....	102,979.67
" 9.....	20,460.15

Total\$622,052.14

As a result of a fistic encounter between A. Y. Boswell, a prominent jeweler of Tulsa, Okla., and James Warren, a diamond dealer of Muskogee, both were brought to court, recently, where Boswell said he had thrashed Warren because the latter had offered him a \$100 bribe to put a wrong value upon the diamond which Warren was about to sell. Warren, on the other hand, claimed that he had only offered the jeweler the money as commission if he would help him sell the stone to his customer. It cost Boswell \$10 for his act resenting what he considered an insult, but the jeweler immediately gave notice that he would appeal the case, as he claimed that he acted only as an honorable man should act under the circumstances.

No. 11.

Chicago Notes.

Barton is on a trip through the west.
 Manheimer is in New York for a few weeks' stay.
 Lorish, with the Alvin Mfg. Co., is in the northwest.
 Cohenour, Muskogee, Okla., is re-opening his store.
 Cook, with the E. Howard Watch Co., was here, last week.
 Cron, with the C. H. Eden Co., is in from the northwest.
 St. Clair, with S. Sternau & Co., is on a trip through Ohio.
 Diekey, Newton, Kans., has just used a new automobile.
 Ham Carew, Steator, Ill., was here, last week, accompanied by his wife.
 Caliger has returned from a western trip and is now in the northwest.
 Ritkin, with L. Heller & Sons, was here last week, calling on the trade.
 Walther, with the D. F. Briggs Co., is on a trip through the middle west.
 Pollock, Oklahoma City, Okla., has just installed an installment jewelry department.
 M. Dueber, of the Dueber-Hampden Co., spent two days here, last week.
 Caro, of Caro & Co., has returned after a two weeks' vacation at West Baden.
 Cunningham, with the Allison Mfg. Co., is on a western and southwestern trip.
 Talbot, with the Alvin Mfg. Co., was here over here, last week, on his way west.
 W. Green, of Max R. Green & Co., is on a pearl buying trip on the Mississippi.
 Schlients, trunk jobber of Deffenbacher Co., was here, last week, buying goods.
 and Mrs. S. H. Hess celebrated the anniversary of their marriage on Oct. 7.
 Lake, with the Waltham Watch Co., has returned from a month's eastern tour.
 Newman, retail jeweler at 4825 S. Wabash Ave., has returned from a Euro-trip.
 The number of directors in the corporation of Babson Bros. has been reduced from 10 to four.
 George Major, of Milliken & Major, Wabash, Ill., was here, last week, accompanied by his wife.
 F. Hirsch, manufacturers' represen-

tative, has returned from a trip to the Pacific Coast.

The bankrupt estate of J. F. Dailey & Co. has declared a third and final dividend of 4 per cent.

O. A. Starke, president of the Star Watch Case Co., Ludington, Mich., was here, last week.

J. K. Glennon, Chicago manager for the Kryptok Sales Co., became the father of a baby girl, Oct. 2.

R. T. Kleckner, with Theo. W. Foster & Bro. Co., has returned from a trip to the Pacific Coast.

Elmer A. Rich, Jr., son of Elmer A. Rich, was recently married to Miss Florence H. O'Brien.

A. J. Munson, formerly of Ames, Ia., was here, last week, buying goods for his new store at Tuscola, Ill.

Maryan Ast, formerly with John S. Rimkus, has opened a new jewelry store at 1618 S. Ashland Ave.

M. M. Schmoeger, buyer for J. C. Bloom & Co., Denver, Colo., stopped over here, last week, on his way east.

M. L. Lagassee, formerly in the retail jewelry business at Newwaygo, Mich., has removed to Hillsdale, Mich.

C. W. Chilcote, optician, at 432 North Park Ave., has opened a new optical-jewelry store at 462 N. Park Ave.

Oscar A. Lessing, representing the S. & B. Lederer Co., has returned from a six weeks' trip to the Pacific Coast.

Mr. C. E. Child, with the Chas. M. Robbins Co., was called east, last week, on account of the death of a grandson.

Mr. and Mrs. E. A. Dayton have returned from a trip to California, where Mr. Dayton combined business with pleasure.

News was received here, last week, of the death of Mrs. W. G. Spies, wife of W. G. Spies, retail jeweler, at Steubenville, O.

William Miller, retail jeweler at 565 E. 43d St., has engaged in the manufacturing jewelry business in room 700, 156 Wabash Ave.

F. G. Hayner, Colorado Springs, Colo., accompanied by his wife, passed through here, last week, on his way to New York City.

Mr. L. Carr, for the past 24 years with Lapp & Flerhem, and who was the head of their tool, material and optical departments, has embarked in the retail jewelry business at Benton Harbor, Mich.

The Commercial Jewelry Co. has been

incorporated here, with a capital of \$80,000, to do a general jewelry and merchandise business. The incorporators are A. W. Beck, A. J. Parker and M. L. Fearing.

Miss Josephine Hershfield, sister of Ben Hershfield, with the Star Watch Case Co., will be married in Kansas City, Oct. 19, to "Jack" Greenman.

Neal Vanderwolf, with the Watson & Newell Co., has recovered from an operation for appendicitis, and is again able to attend to his regular duties.

Carl N. Oulie, Black River Falls, Wis., accompanied by Mrs. Oulie, stopped over here, last week, on their way home from a five months' trip to Norway.

Geo. K. Thomas, stationed at the factory of the Elgin National Watch Co., at Elgin, is on a vacation. While absent his place will be filled by Mr. McKinley.

Leon Nordman, Jr., and Bert Nordman, of Nordman Bros. Co., San Francisco, Cal., stopped over here last week on their way home from a six months' trip to Europe.

A. Tetaz, designer for the Keystone Watch Case Co., stopped over in this city, last week, on his way west, where he will spend a three months' vacation. Mr. Tetaz intends investing in a western farm.

George Wettstein, Cedar Rapids, Ia., accompanied by members of his family, is on an automobile trip from Cedar Rapids to New York and return. The party stopped over here, last week, on their way east.

The trunk of jewelry belonging to Theo. Jacobs & Co., supposed to have been lost some time ago at Springfield, Ill., has been recovered intact. It was sent by mistake to the interurban freight house at East St. Louis, Ill.

Albert Schwarz, brother of E. Schwarz, died, last Wednesday morning, and was buried from his late residence, 434 E. 45th St., on Friday. Interment was at Rosehill Cemetery. Deceased, who was a member of Chicago lodge A. F. & A. M., Myrtle Council R. A., and Bankers' Council N. U., is survived by a widow, two daughters and two sons.

W. F. Dunn, with the C. D. Lyons Co.; Al. Sweet, with J. F. Sturdys' Sons Co., and Harry Hull, of Barden & Hull, met Dr. Cook, the Arctic explorer, at the Jefferson hotel in St. Louis, Oct. 6. Dr. Cook was told about the chilly atmosphere travelers sometimes encounter while selling goods on the road, and made some notes on the subject, which he promised to embody in his lectures.

MANNING, BOWMAN & COMPANY
Meriden, Conn.

NEW YORK

CHICAGO

SAN FRANCISCO

Catalogue No. 56 J. Illustrating Complete Line Sent On Request

Charles E. Graves & Co. have leased a portion of the second floor of the North building, which is directly over the store they now occupy, and will use in conjunction with their present business.

Extensive alterations will be made, and a passenger elevator will be installed for the accommodation of their customers. The new room will be used principally for jewelry, art objects and kindred lines.

J. Jacobus, who for the past 11 years has been the diamond buyer for the S. F. Co., of New York, and who previously occupying that position was for 14 years connected with Casperfeld & Cleveland, has been engaged by Loftis Bros. Co. as manager and buyer for their diamond department.

Thomas A. Cray has been engaged as assistant to Mr. Jacobus. Mr. Cray was for the past eight years assistant to Arthur Patrick of Chester Billings & Son, New

York. Among the out-of-town retail jewelers who were here last week, were: T. H. Craig, of Ferris & Craig, Champaign, Ill.; M. F. Harlan, Ia.; Paul N. Strain, of Stratton, Ill.; William T. Jennings, of Chicago, Ill.; W. C. Carroll, Lebanon, Ky.; Van Hoy, Jr., Shelbyville, Ky.; C. L. Bour, Greenville, Mich.; James Scribner, Attica, Ind.; G. H. Martin, Genoa, Ia.; J. H. Potts, Lyons, Ia.; George Weiser, Salina, Kans.; L. Bunde, Milwaukee, Wis.; J. C. Randow, Geneva, Ill.; J. J. Nicoll, Kenosha, Wis.; G. W. Martin, Chicago, Ill.; Mr. Teed, of Teed & Teed, West City, Ia.; C. Pieper, Holland, Mich.; Mrs. D. C. Griswold, Clinton, Wis.; J. Beale, Rockford, Ill.; Mr. Hurd, of Hurd & Diller, Sycamore, Ill.; Wm. Stratton, Seymour, Ind.; C. C. Thoma, Battle Creek, Mich.; L. Krasney, Milwaukee, Wis.; C. G. Lindholm, Joliet, Ill., and Mr. Goss, of Goss & Saxe, Milwaukee, Wis.

Cincinnati.

Harry Gilsey, of S. & H. Gilsey, left, this week, to call on the trade in the south.

C. Stoner, of Lindner & Co., has started on a three months' trip in the south.

William Meyer, with G. W. Meyer, Chattanooga, Tenn., has returned from a buying trip to New York.

Henry McClure, of W. F. Fisher & Co., called here, the past week, while on his way to the east.

Herzog, of the new firm known as Herzog, Thompson Co., Birmingham, Ala., was here, last week, buying stock for the retail jewelry store this house is about to open.

Madison & Co., having met with great success in their new business on Vine St., have found it necessary to both enlarge their quarters and add more extensively to their stock.

James C. Haslam, of the John Holland Pen Co., returned from his business trip two weeks ago by reason of illness. His health is improving, and it is expected he will be in business soon.

A. Spiegel, who has recently been representing Klein Bros. in the south, came here last week, with a badly sprained ankle, which will keep him from business

for several weeks. Ed. M. Klein, of the firm, will take Mr. Spiegel's place during his illness.

F. A. Hall, a representative of the Dennison Mfg. Co. at Boston, Mass., and H. K. Taylor, the company's representative at Philadelphia, Pa., were visitors at the Cincinnati office of the concern, last week.

Horace W. Harneyer, for many years a jeweler in the Arcade, has returned to this city, and at present is engaged in writing sketches for motion pictures. Mr. Harneyer states he has been very successful in this line of work.

S. A. Moore, doing a stationery and book business in Gallipolis, O., and a brother-in-law of A. H. Uhrig, who recently went into bankruptcy in that place, has offered to make a cash settlement for the latter at 30 cents on the dollar. Mr. Uhrig's assets are about \$7,000 and his liabilities are about \$19,000.

Sidney C. Howard, a Columbus, O., jeweler, and Miss Pearl Guy, of the same city, were married, Monday morning, Oct. 4, at the residence of the Rev. Gervaise Rough-ton, of this city. They were accompanied by the bride's father and brother. Mr. and Mrs. Howard then left on a trip among the eastern cities.

David E. Fletcher, watchmaker in the St. Paul building, was run down at 4th and Vine Sts., Oct. 6, by an automobile belonging to William Andrews, of Newport, Ky. Mr. Fletcher had walked out to the street just as the automobile turned the corner. Not seeing it in time, he was struck and hurled to the ground. He was taken to his office, where his injuries were dressed. He is reported as not seriously hurt.

Out-of-town jewelers who were here the past week, buying goods, included: Owen Sherwood, Falmouth, Ky.; L. Heid, Columbus, O.; O. B. Schmidt, Tiffin, O.; A. Wahl-rab, Dayton, O.; Joseph Mazer, McAlester, Okla.; W. L. Wilhelm, Portsmouth, O.; Charles Creighton, Franklin, O.; P. M. Spicer, Milford, Ky.; S. L. Sherwood, Ewing, Ky.; Ed. C. Dwyer, Greenville, O.; Grant Luzader, Pennsboro, W. Va.; Mr. Shelman, Irvington, Ky.; J. W. Thompson, Danville, Ind.; W. M. Northrup, North Baltimore, O., and Mr. Olmhausen, of Olmhausen & Smith, Celina, O.

Detroit.

TRADE CONDITIONS.

Fall trade is excellent and manufacturers and jobbers are kept very busy handling their orders, while the retail stores are thronged. "My business for September was just 92 per cent. better than the business of September, 1908," stated one prominent retailer. Every indication points to a continuance of this condition as the city is enjoying a period of unexampled prosperity, manufacturers and contractors claiming that they cannot secure enough labor.

J. D. Patterson, Port Huron, was here, last week.

D. L. Ranney, Leslie, visited the wholesale trade, last week.

L. H. Cooper, Oxford, was in the city, last week, on a buying trip.

M. Wroblewski has started in business at 883 Russell St., handling jewelry and religious articles.

Noack & Gorenflo have again been awarded the annual clock contract by the Detroit Board of Education.

W. W. Bridges, Marine City, was in Detroit, a few days ago, and reports business good in the up-river towns.

William F. King, Jr., Adrian, came in, Monday and Tuesday of last week, to attend the baseball games at Bennett Park.

Frank B. Bromley, formerly with Bullard Bros. Co., St. Paul, Minn., has taken a position as engraver with the Charles A. Berkley Co.

William Traub, of Traub Bros. & Co., was one of the loyal Tiger rooters who went to Pittsburg to witness the first games of the world's series.

Charles A. Burmaster, formerly with Wright, Kay & Co., has started the Central Plating Co., with offices at 40 State St., and is doing work for the trade.

F. A. Drexel has moved into the quarters formerly occupied by Kunz & Rogers, at Woodward Ave. and Larned St., putting in new fixtures and improvements.

E. F. Hill and C. H. Keller, salesmen for Noack & Gorenflo, were in the home office recently to replenish their lines, and went out again, last week, to their territory.

H. C. Finley, who has been watchmaker for S. P. Flayer, has purchased the store and stock of Emory Locke & Son, 1181 Jefferson Ave. Mr. Locke will go to Arizona.

William Creigh, who has been employed in Wright, Kay & Co.'s factory department, has left that firm to go to Milwaukee. There he is to have charge of a manufacturing business.

Henry M. Wright, of the firm of Wright, Kay & Co., returned, last week, from a five weeks' stay in the east. He spent most of his time in rest and recreation, but also took occasion to visit various factories.

George Thompson, Guatamala, Central America, visited his home at Utica, Mich., recently, and stopped over in Detroit to buy goods. Mr. Thompson has spent many years in Mexico and Central America, and has a good mercantile business there.

Max Jennings, St. Clair, who came down to buy goods, last week, states that the advance orders of the shipbuilding company of his town are sufficient to keep the shipyard force busy all Winter, thus assuring good business for the St. Clair merchants.

At the regular monthly meeting of the Detroit Jewelers' Board of Trade, last Thursday evening, the success of the September buyers' excursion and entertainment was the principal subject of discussion. Trade matters were also discussed, and the members had a thoroughly good time.

President Charles T. Evans, of the New York State Retail Jewelers' Association, did not receive the Republican nomination for member of Assembly in the 2d Oneida District. Mr. Evans, however, made a good showing, receiving 25 votes, including the support of all the Utica delegates.

William Veler, 410 E. Broadway, Toledo, O., states that the item in the issue of Sept. 22 to the effect that he had sold out his business a year ago and contemplated starting another store, is incorrect. He says he simply rented the store building where he had done business for many years, and that he still has his stock and tools, and that he never told anyone he contemplated starting another store or that he had given up his jewelry business.

Milwaukee.

George Cox, Black Earth, Wis., was a recent Milwaukee visitor.

Fred W. Teschner, Milwaukee, has moved from the Metropolitan building to 749 3d St.

John P. Hess, Fond du Lac, Wis., has installed a new electrically operated cash register.

Albert S. Smith, a prominent jeweler at Birmingham, Ala., and Miss Barbara Lepsch, Milwaukee, were recently married.

Louis W. Bunde, president of the Bunde & Upmeyer Co., jewelers of Milwaukee, is on a short business trip in the east.

The junior member of the firm of C. Christenson & Son, Stoughton, Wis., was a recent visitor in Milwaukee circles.

T. Jewett, of the Gorham Co., Chicago, and Fred Pattee, of the Waterbury Clock Co., called upon friends in the Milwaukee trade, last week.

R. Wendt, for many years connected with A. Bloedel, has started in business for himself as manufacturing jeweler and repairer at 648 3d St., this city.

The capacity of E. H. Warnke & Co., manufacturing jewelers, is being increased by the enlarging of the working force and by the installation of additional new equipment.

A. D. Calkins, formerly with H. C. Calkins & Co., jewelers at Ladysmith, has opened a new store at Osceola, Wis. His father will continue to conduct the store at Ladysmith.

T. J. Dale, Kenosha, Wis., has purchased a site for a new store, and work will begin at once on the erection of a two-story brick structure. The new building will be located on Main St.

The interior of the store of A. Wiggenhorn & Son, Watertown, Wis., is being extensively remodeled. A new steel ceiling has been put in place and other improvements are being made.

The C. Preusser Jewelry Co., Milwaukee, has donated a silver cup and base as a prize for the winning relay team in the annual swimming races, which will be held under the auspices of the Milwaukee Athletic Club this Winter.

Richard Bott, former Milwaukee jeweler, who recently made an assignment to his creditors, was in the city a few days of the past week. Mr. Bott is now engaged in pearl fishing in western Wisconsin. The former jeweler is one of the leading pearl experts of the State.

David Goldman is making preparations to enlarge his downtown store by occupying adjoining quarters at the corner of W. Water St. and Grand Ave. The additional floor space will more than double the present quarters. Mr. Goldman has been meeting with an excellent business since the opening of the new store nearly a year ago.

Milwaukee jewelers were interested, last week, in the fact that a gold wedding ring belonging to Walter Moody and lost for more than nine years has just been found by J. L. Houlehen, also of Milwaukee. While searching for a diamond ring dropped down a furnace register in the house formerly occupied by Mr. Moody Mr. Houlehen found the long-lost wedding circlet. Jewelers say that this instance is good proof of the contention often made

that a wedding ring should be engraved. The ring found bore the full name of the owner.

J. J. Rammer, who has been engaged in the jewelry business at Sheboygan Falls, Wis., for the past 11 years, has sold out to Charles C. Meier, of the same village. Mr. Rammer expects to leave Sheboygan Falls, although his plans for the future have not as yet been completed. During the past year he has been conducting a piano business in connection with his jewelry store. Mr. Meier, the successor, has had considerable experience in the jewelry field and will carry on both businesses as conducted by Mr. Rammer. For the past year he has been connected with the Plymouth Parlor Frame Co.

Cleveland.

S. Y. Ball has been west on business.

D. A. Boswick, Berea, was in town, last week.

Ben Tietman has left the Bowler & Burdick Co.

Hurbert Burdick is confined to his home with grippe.

L. S. E. Miller, Painesville, is now with the Little-Long Co., of Charlottesville, N. C.

Oliver Meyer, who was with the Cowell & Hubbard Co., is now with the Price Pyrometer Co.

Fred Poley, who was with the Cowell & Hubbard Co., recently opened a manufacturing establishment in the Republic building. He is making a specialty of platinum work.

H. W. Burdick was chosen a director of the Wholesale Merchants' Board of the Chamber of Commerce at the annual meeting, Oct. 7. Mr. Burdick is going to Turkeyfoot Lake on a duck shooting trip next week.

The following out-of-town buyers were in Cleveland last week: C. F. Gardner, Newton Falls; T. H. Parks, Mantua; Chas. Stausmeyer, Fremont; G. F. Elgin, Kent; C. N. Wilson, Salem; J. C. Sharer, Alliance.

C. R. Sigler has had a slight relapse and will be confined for at least another week. Clyde Campbell, superintendent of the Sigler Bros. Co.'s watch department, has returned from an automobile trip through southern Ohio. W. H. Kennon, Sigler Bros. Co.'s western representative, was in town, last week.

M. Horwitz, who failed the latter part of August, is back in business again at the old stand, 3735 Woodland Ave. Horwitz owed about \$3,000, and his stock was sold to satisfy creditors. The stock was sold to one party, and Horwitz says this party offered it to his brother so cheap that he bought it and in turn transferred it to him.

W. E. Cawood opened a manufacturing jewelry and optical establishment in the Republic building this week. Mr. Cawood is the patentee of a mounting and he will push this article in this locality, besides engaging in a general manufacturing business. Mr. Cawood has been with the Schauwaker Bros. Co. for some time, and previous to that was in business in Toledo.

E. Werder, Charles City, Ia., will soon overhaul and redecorate his store.

Minneapolis and St. Paul.

Sam H. Lindquist, Camden Place, a suburb of Minneapolis, has returned from trip in Wisconsin.

W. C. Leber and family have moved from Minneapolis to Lake Minnetonka, where they have spent the Summer at their Summer home.

Among the jewelers in Minneapolis during the past week were: G. Lomen, LeR. Minn.; E. J. Haas, Stanley, N. D.; Jesse L. Cross, Staples, Minn., and I. Radabaugh, Hastings, Minn.

The Minnesota Wholesale Jewelers' association held their regular monthly meeting, last week, in St. Paul, transacting routine business. The annual meeting was deferred until late in the month.

George Johantgen is preparing to open his new manufacturing jewelry store at 36 S. 5th St., Minneapolis, this week, next week. His new establishment will have excellent light and is favorably located, being a few steps off Nicollet at 5th St. and adjacent to the city stairs.

A test case will soon be up in the Municipal Court in Minneapolis as to the legality of sidewalk show cases. Four merchants have been arrested charged with obstructing the sidewalks. Some of the jeweler-opticians have sidewalk display stands, which come under the prohibition should the law be upheld.

The legality of the law aimed at the stamp companies in Minnesota will come at the October term of court before the Supreme Court. Merchants generally do not affect jewelry stores directly, though some of the larger department stores have taken them up in reorganizing their departments which include jewelry.

Springfield, Ill.

William C. Summer has returned from Boston, Mass., where he received the degree of Masonry.

A. S. Wormood, jobber of watch movements and cases, has returned from a business trip through the west.

George L. Williams, an optician, Miss Anna George, both of Decatur, Ill., came to Chicago and were married. Thus Mr. Williams has been in Decatur for the past two years, and the couple will return to their home in that city.

A shot fired by an unidentified person crashed through a heavy plate glass door of the home of John C. Pierik, 820 S. 7th, after the members of the family had retired. No one was injured, but a report was made to police headquarters and an investigation is being made.

Under the firm name of Ostermeier Trunk, Charles A. Trunk, Chicago, opened their jewelry store in this city Saturday, Oct. 2. Their place of business, at 515 Monroe St., has been entirely refurbished and presents a modest, yet beautiful appearance. At the formal opening of the store the place was crowded from 10 o'clock, when the doors were opened, to closing time. Handsome souvenirs were given all visitors.

St. Louis.

W. Hoyt returned Thursday from a long trip to New York.

and Mrs. Frank Pfeiffer, Parsons, spent the week in this city.

R. Blake and wife, Columbus, Kans., among the Centennial week visitors.

and Mrs. R. Hawkins, Springfield, spent Centennial week in St. Louis.

A. Buder, Cairo, Ill., who spent the week in St. Louis, was accompanied by his sister.

and Mrs. H. Haverkamp, of Troy, Mo., is bringing her son, F. W. Haverkamp, of the St. Louis Jewelry Co.

J. Sinn, La Plata, Mo., was accompanied on his Centennial week visit to St. Louis by Mrs. Sinn.

J. Martin, Van Buren, Ark., who came to the Centennial celebration, was accompanied by his wife.

and Mrs. Hoffman, Poplar Bluff, and Mr. and Mrs. W. D. Davis, Grand Bluff, Ill., were visitors, last week.

E. Tower, of Tower & Long, came in on a trip through Missouri and will leave for Kansas on a trip through Kansas.

Nearly all of the jewelry houses closed Friday afternoon to permit their employees to see the aeroplane flights at Forest Park.

Samuel Kober, of the Maritz-Kober Jewelry Mfg. Co., after spending Centennial week here, will leave next week for the West.

A profusion of hothouse plants added to the attractiveness of the salesrooms of the Bauman-Massa Jewelry Co. during the week.

J. Burke, president of the Brooks Jewelry & Optical Co., will leave Tuesday on a business trip to Chicago and will be gone several days.

and Mrs. Newman, of the Allen-Newman Jewelry Co., who came home for the Centennial week, will leave for western Missouri next week.

organ H. Cox, of the Hoyt Jewelry Co., after spending a couple of weeks here, will leave Saturday night on a trip through Kansas and Texas.

olph Lowenstein, of the J. Lowenstein Jewelry Co., who came in from the West for the Centennial, will leave the first of the week for a trip through Missouri.

H. Konert, secretary and treasurer of the E. H. Kortkamp Jewelry Co., is suffering with a broken wrist, the result of an accident struck by the crank of his automobile.

Andrew Adank, of the Brooks Jewelry & Optical Co., who was confined to his bed for three weeks by an injury, has so far recovered as to be able to resume his duties.

Dolph Umbrecht, Brooks, Jewelry & Optical Co., who came in for the Centennial, will leave next week on an extended trip. He has not decided in which direction he will go.

to attract the attention of Centennial week visitors, Charles Rellwig, 1209 Olive St., had an illuminated windmill in his window, with the revolving arms weighted with jewelry.

mes J. Burke, president of the Brooks Jewelry & Optical Co., has just issued a complete new catalogue of the jewelry and

optical goods carried by the firm. It contains 216 pages and is liberally illustrated.

Winton E. Barclay, vice-president of the Hoyt Jewelry Co., who is touring the country with the English Pilgrims, soccer football team, will not return to St. Louis until about Oct. 15, when the team comes here to play.

Herman Mauch will leave Sunday morning for his annual fishing trip up the Illinois River. He will spend a week at the reservation of the Montezuma Hunting & Fishing Club, near Montezuma, Ill. He is the president of the club.

Considerable enterprise was shown during Centennial week by the Maritz-Kober Jewelry Mfg. Co., of this city, by the display on the concern's building of a large sign bearing the inscription "Welcome Jewelers." The building was crowded with visitors during the parade.

A. L. Blankenmeister, of the Blankenmeister-Oberting Jewelry Co., after spending a week in St. Louis, will leave Monday on a trip through Oklahoma and Kansas. George Oberting will leave for Kansas and Nebraska. Lawrence Oberting will start through Missouri and Iowa.

Among those well known in the trade who attended the 13th annual reunion of the St. Louis high school class of June, '96, at the Marquette Hotel, on Monday of last week, were Samuel Kober, of the Maritz-Kober Jewelry Mfg. Co., and S. R. Culbertson, of the Hess & Culbertson Jewelry Co.

R. F. Reeves having disposed of his entire interest in the Reeves-Kemper Co., to J. I. Gutfreund and W. F. Kemper, his former associates, the latter announce that they have reincorporated as the Gutfreund-Kemper Supply Co., assuming all obligations of the former concern, and will conduct the business as heretofore.

C. W. Blankenmeister, brother of A. L. Blankenmeister and uncle of Oscar Blankenmeister, of the Blankenmeister-Oberting Jewelry Co., died Saturday evening, aged 56, from the after-effects of a stroke of apoplexy. The funeral took place Tuesday from the residence, 5138 Raymond Ave., to Bellefontaine cemetery.

Little Miss Dorothy Fitzroy, daughter of J. M. Fitzroy, of the Mermod, Jaccard & King Jewelry Co., sang a solo before an audience of 15,000 people at the Sunday-school demonstration, Sunday afternoon, at the Coliseum, which opened the Centennial week celebration, and received an ovation. She has a voice of remarkable sweetness which penetrated to the farthest corners of the great auditorium.

J. C. Johnson, president of the Johnson Jewelry Co., Colorado Springs, spent the week in St. Louis seeing the sights and visiting the trade. When he leaves Saturday evening for New Orleans he will be accompanied by J. Reed Elliott, president of the Elliott Jewelry Co. From New Orleans they will go to New York by steamer. Mr. Elliott will make purchases and transact other business in New York and will return to St. Louis in about two weeks, being accompanied this far on the return trip by Mr. Johnson.

The week-long celebration by St. Louis of the Centennial of its incorporation brought jewelers to the city from the interior of Missouri and the adjacent States

and all parts of the southwest. More jewelers were here than have been in the city at any one period since the World's Fair. Most of them combined business with their sight-seeing and pleasure-seeking, and the manufacturers and jobbers are glad that they came. Most of the traveling salesmen came in from the road to receive and help entertain the visitors. They were made at home at the wholesale houses and invited to see the parades from the windows, and the St. Louis members of the trade generally exerted themselves to show the visitors a good time. Among those who came to town and spent the week here were the following: H. A. Hendrichs, of Hendrichs & Chambers, Jefferson City, Mo.; F. A. Henninger, Columbia, Mo.; N. S. Weiler, Cape Girardeau, Mo.; Felix Keaney, De Soto, Mo.; W. J. Martin, Van Buren, Ark.; E. A. Buder, Cairo, Ill.; William Mosby, Newport, Ark.; John Koetting, Ste. Genevieve, Mo.; August Winkler, Poplar Bluff, Mo.; J. Meyer, Vandalia, Ill.; E. H. Goff, Belgrade, Mo.; Louis Punch, Texarkana, Ark.; I. W. Harper, Mokane, Mo.; Phillip Kelly, Nokomis, Ill.; E. H. Goulding, Alton, Ill.; C. B. Johnson, Okolona, Miss.; T. H. Morton, Boonville, Mo.; A. W. Brassler, Malvern, Ark.; J. B. Lewis, Richmond, Mo.; A. H. Hoppe, Apalachicola, Fla.; Frank Pfeiffer, Parsons, Kans.; J. T. Parker, Murray, Ky.; J. E. Mackey, Farmington, Mo.; Martin Wolff, of Wolff Bros., Murphysboro, Ill.; E. M. Thomasson, Quincy, Ill.; A. C. Parno, Greene, Ia.; V. L. Prevallet, Perryville, Mo.; William Mosby, Newport, Ark.; W. A. Rowe, Waltonville, Ill.; M. Pilcher, Mexico, Mo.; F. R. Collumber, Eldon, Mo.; R. Hawkins, Springfield, Mo.; M. C. Scott, Wright City, Mo.; J. H. Keadle, Bellflower, Mo.; H. D. Jones, Trenton, Tenn.; G. R. Blake, Columbus, Kans.; John Wick, Highland, Ill.; L. S. Smith, Kosciusko, Miss.; H. J. Miller, Springfield, Ill.; L. A. Holdener, Belleville, Ill.; Fred Simon, Collinsville, Ill.; Oliver Lewis, Stonefort, Ill.; Mr. Hoffman, Poplar Bluff, Mo.; R. R. Greene, Salem, Mo.; G. H. Gieseke, Fenton, Mo.; E. J. Baumann, Ste. Genevieve, Mo.; Mr. Carvey, of the Krug-White Jewelry Co., Staunton, Ill.; Buhrman & Emery, Springfield, Mo.; W. D. Davis, Granite City, Ill.; T. H. Edwards, Clarksville, Mo.; J. F. Baloun, Steelville, Mo.; C. H. Bard, Sedalia, Mo.; C. J. Sinn, La Plata, Mo.; J. E. Walz, Boonville, Mo.; A. E. Zuckschwerdt, Tipton, Mo.; A. W. Brassler, Malvern, Ark.; H. A. Burns, Springfield, Mo.; Michael Hirsch, Muskogee, Okla.; C. W. Beardsley, Litchfield, Ill.; E. E. Gunter, Dexter, Mo.; A. Y. Boswell, Tulsa, Okla.

Five diamonds worth \$300 in the aggregate, were stolen from a jewelry store at 335 S. Adams St., Peoria, Ill., in broad daylight, recently. The thief entered by the front door of the place, calmly walked behind the counter and to a show window, where he lifted a trap containing the jewels and walked out. The proprietor, one clerk and a watch repairer, were in the rear of the store at the time and did not discover the loss for some time. The thief was seen at his work by passersby, but because of his cool manner of working they thought that he was an employe of the firm. Have your unbounded loyalty.

San Francisco.

TRADE CONDITIONS.

Retail business is increasing to such an extent in San Francisco that the predictions are being freely made by jewelers that the coming holiday season will be as heavy a one as that of 1907, which was a record-breaker in point of volume, both here and elsewhere on the coast. Stores that depend largely upon the transient trade are doing a fine business at the present time and more people are passing through this city than at any time since the fire.

F. L. Presbrey, with the Bassett Jewelry Co., has returned from an extensive trip.

A. I. Hall & Son will cease representing C. Dorflinger & Sons, 36 Murray St., New York City, the cut-glass manufacturers, after Jan. 1 next.

W. S. Fulton, representing the Potter & Buffinton Co. and the Roy Watch Case Co. on the coast, has just returned from a successful trip of several weeks.

A. I. Hall & Son now have a fine display of holiday goods in their showrooms, and are making an early display on account of the Portola festival that commences Oct. 19.

Among the jewelers in town during the past week were: Charles A. Daunt, Modesto, Cal.; J. B. Williams, Susanville, Cal.; B. Torigoe, of B. Torigoe & Co., Watsonville, Cal., and Stanley A. McIntosh, of Lovelocks, Nev.

W. Shoemaker, formerly a resident of Merced, Cal., where he held a position in a retail store, but lately with E. Radke, 717 Market St., San Francisco, recently visited the Valley town, where he was married. The bride was formerly Miss Helen Wilson, of that place, and her father was formerly in the jewelry business, but is now retired.

During the past week a number of delegations of Easterners who are attending various conventions on the Coast have been in town and the Diamond Palace has been well visited. The prominent location on Kearny St. is causing this store to be visited by more people than ever before, and when the new Palace Hotel is opened, a short distance away, even more people are expected.

The new store of Radke & Co. on Post St., near Grant Ave., is now completed, and it is announced that three times the business has already been done in the new location as had been the rule in a similar length of time at the old location on Van Ness Ave. Workmen are still busy on the Addison Head building, next door, but this work is approaching an end, and this side of the street will soon be free from building operations. One of the features of the new store is the cut-glass department, more attention being paid to this than ever before.

On Nov. 9 the Palace Hotel reopens its doors on the old location on Market St., and jewelers in this vicinity are looking forward to this event with a great deal of anticipation, for the proximity of the Palace Hotel means a great deal to almost any retail line of business. The announcement is made that the management of this hostelry are to immediately commence the erection of a large office building on its lot just across Stevenson St., from the hotel, and that this will be specially fitted up for the convenience of traveling salesmen and fac-

tory representatives. This will be of special advantage to travelers in the jewelry line.

Kansas City.

TRADE CONDITIONS.

This is the week of the Fall festivities in Kansas City and the town is overflowing with visitors from Kansas City territory. Railway officials estimate that the trains of Monday, Tuesday and Wednesday brought into the city not less than 150,000 people, breaking all previous records. Primarily these people came here for pleasure, but a certain percentage of them were business men and women who combined business with pleasure-seeking, with the result that this has been a busy week for Kansas City merchants in every line of trade, not excepting the jewelry trade.

H. Porter has opened a retail jewelry store at 716 Walnut St.

Fred Schmidt, who comes here from Chicago, has entered the employ of the Hassig Jewelry Co., as a polisher.

The C. B. Norton Jewelry Co. has rearranged its office and salesrooms' furniture and fixtures in a manner that not only makes it more convenient for officials and employes but more attractive.

Ed. N. Dunning, for the past 22 years a jeweler in Kansas City, Kans., has closed out his business on Minnesota Ave., near 6th St., and will move to Texas, where he has bought a ranch near Mercedes. Impaired health caused Mr. Dunning to retire from business, and he hopes ranch life in the Lone Star State will benefit him.

Among the jewelers in town last week were the following: E. Stone, Blue Rapids, Kans.; F. E. Pirtle, Council Grove, Kans.; E. J. Barnett, Ponca, Okla.; J. O. Bates, Manhattan, Kans.; A. W. Logue, Scammon, Kans.; C. G. Willett, Goffs, Kans.; W. H. Haupt, Bartlesville, Okla.; Geo. A. Young, Moberly, Mo.; J. R. Lucas, Ogalala, Nebr.; E. C. Six, Eric, Kans.; G. M. Spaulding, Solomon, Kans.; B. H. Green, Wellsville, Kans.; W. C. Summers, Eureka, Kans.; V. W. Huffman, Herrington, Kans.; S. P. Shipley, Neodesha, Kans.; W. H. McCutcheon, Luther, Okla.; W. H. Pontius, of F. E. Pirtle & Co., Anthony, Kans.; J. Coffman, Salisbury, Mo.; W. J. Smith, Stockton, Kans.; M. H. Hill, Smith Center, Kans.; W. D. Brotchie, Scandia, Kans.; J. W. Phillips, Chanute, Kans.; J. N. Hole, DeWitt, Nebr.; W. F. Cyeskleba, Sylvan Grove, Kans.

Pacific Northwest.

W. F. Leavell has just opened a new store and watchmaking shop at Sultan, Wash.

The marriage of George S. Bernic, of Siegrist & Co., La Grande, Ore., to Miss Jean MacDonald, of that place, is announced.

Frank L. Jones, who recently purchased the jewelry establishment of O. D. Johnson, Wenatchee, Wash., is having the place thoroughly remodeled and new fixtures installed.

Kristian Falkenberg, Walla Walla, Wash., has completed the addition of 25 feet of space to his store, as well as a complete change of decorations. This is the fourth time in the past four years that he has found it necessary to enlarge his place of business.

Indianapolis.

Mr. and Mrs. Charles Mayer have returned from a trip to New York.

The Federal Engraving Co. has added another room to its quarters in the old building and has also added a copper engraving department.

Carl L. Rost has gone to Kansas on business. He was accompanied as far as St. Louis by Mrs. Rost, who will remain in that city for some time.

P. M. Strain has recently opened a jewelry store at Bloomington. He has been in that city after having been in business at Rolla, Mo., for a number of years.

A. P. Craft has gone for a two-week fishing trip in northern Indiana, making a trip in his automobile and expecting to cover much territory before returning.

Charles B. Dyer, of Dyer Bros., is making an extensive trip over the state, visiting colleges in the interest of the line of ornamental jewelry manufactured by the company.

During the quarter ending Sept. 30, the amount of silverware passing through a custom house in this city amounted to \$2,000, much below the average in previous years.

The engagement of Miss Gladys to Alfred Pahud, Jr., has been announced and the ceremony will take place Oct. 15. Miss Lauer is the daughter of Mr. and Mrs. Charles W. Lauer.

Dyer Bros. have opened their new hand-wrought jewelry with 25 styles. The Fall term will close Dec. 6 and will be followed by an exhibition of the same, manufactured by the class, Dec. 9-10.

The Reitenour Jewelry Co. has been organized and incorporated at Union with an authorized capitalization of \$50,000 by I. N. Reitenour, S. I. Echebarger, Frank T. Parker. The company will conduct a retail jewelry business.

Out-of-town jewelers in this city last week, included: J. L. Harding, Brainerd; Herman Tabler, Waynestown; McCain, Kokomo; Aaron Pursel, Nashville; A. W. Owens, Greenwood; G. O. Camp, Shirley; John W. Hudson, Fort and H. S. Coffin, Newcastle.

L. F. Kiefer & Son have on exhibition a tea set carved out of coconut shell. L. A. Kiefer, in 1876. The tea set was given by Mr. Kiefer to his sister as a wedding present. The cream pitcher is made with silver, while all of the pieces are made with silver handles and ornaments.

Charles Hill and Quenna Nelson, newly arrested here recently, with a large quantity of jewelry and diamonds, and about 50 pawn tickets, have been turned over to the Chicago police. Part of the jewelry has been identified as having been stolen from the home of Frank P. Ives, 3826 Ellis Ave., Chicago.

The brassard awarded to Barney O'Connell in a race meet at the Indianapolis Speedway recently, was manufactured by Dyer Bros. It is in the shape of a bracelet of sterling silver, and weighs 16 ounces. There is a hinge for fastening it to the arm. The brassard was made for the Electric Co., Anderson, and the holder of it receives a salary of \$75 a week as he retains the brassard.

Omaha.

TRADE CONDITIONS.

Local jewelers were materially affected by the business depression while the strike was in progress. It is now that the strike is practically over and the Ahsarben Fall festivities are in the foreground, business has resumed its former activity.

L. Shook, of the Shook Mfg. Co., returned last week, on a business trip.

W. Mertz, cashier and bookkeeper with B. Brown Co., left, last week, to accept a position in St. Paul, Minn.

Martha Copley, Superior, Nebr., is the daughter of Henry Copley, this week. Copley is also one of the Ahsarben Fall festivities.

J. Kass, jeweler and engraver for the firm who was formerly located in the Armstrong block, has moved to 2122 N. St., Omaha.

M. Woodberg furnished a sterling loving cup for the 20th Century Farmer Co., to be presented by them to the owner of the best crop of fruit at the Horticultural Fruit Growers' Association convention.

H. Hyman, a traveling salesman for the C. Bros. & Co., while leaving the store of Sol Bergman Jewelry Co., last week, was involved in a severe accident. Mr. Hyman, while going to notice a slight step just outside the door, slipped and fell on the walk, and the result broke his shoulder. Mr. Hyman was taken to New York the following day. The latest reports are that he is rapidly recovering.

The Ahsarben Fall festivities, for which the railroads have issued special and reduced rates, have induced a large number of out-of-town jewelers to come to Omaha this week. A good many take this opportunity to do their Fall buying. Among the out-of-town jewelers here were: Mr. J. C. Hunt, Alimal, Nebr.; Mrs. J. C. Hunt, Superior, Nebr.; L. J. Wendel and wife, Marion, Ia.; C. H. Rasmussen, Edgar, Mo.; J. Morris, Handcroft, Ia.; W. E. Engel, Waukeeny, Kans.; H. F. Heald, Chester Oak, Ia.; L. A. Line, Cozad, Nebr.; W. H. Hille, Becmer, Nebr.; C. J. Jensen, Deer, Wyo.; E. A. Waterman, Gordan, Nebr.; C. H. Wray, Lincoln, Nebr.; John Thorson, Wahoo, Nebr.; Theo. Christerson, Great Falls, Mont.; F. Arman, Wall Lake, Ia.; D. T. Truth, Lincoln, Nebr.; A. Urbans, Ninder, Nebr.; Carl F. Mel, Columbus, Nebr.

Pacific Coast Notes.

The Hanford Jewelry Co., Hanford, Cal., disposing of its stock at auction. J. R. Merritt & Smith have opened a new store in the Turlock Hardware building, at Turlock, Cal.

William E. Pelley, formerly of Los Angeles, Cal., has taken a position with H. E. Dixon, Lompoc, Cal.

The store of A. Lepper, 2515 Shattuck St., Berkeley, was entered by thieves, recently, and five cheap watches were stolen. It is supposed that someone entered the store while the proprietor was in the rear of the building and took the watches from the show window.

M. Mather, who has been in business at San Pedro, Cal., for some time, has sold his store to R. F. Winslow, Pendleton, Ore., and has left for Guayman, Mex., where he

has been given the management of a large establishment. In addition to this position he has been appointed watch inspector for the Webb C. Ball Watch Co. His territory will extend from Nogales to Guadalupe. His family will remain in San Pedro for another month attending to the shipping of the household effects. Mr. Winslow is an experienced jeweler, and for a number of years operated a large store at Pendleton, Ore. He is making the change on account of the climate.

It has been erroneously reported that J. G. Swain bought out and succeeded D. S. Binford, of 122 E. Philadelphia St., Whittier, Cal. The real buyer and successor is Lee C. Sawin, who has been in charge of the business since Aug. 1, and will continue at the same stand, which he has completely renovated and redecorated, and now has one of the most complete and thoroughly equipped jewelry and optical stores of any small town in the State.

Los Angeles.

C. S. Douglas is now in the silver department of Brock & Feagans.

William Petry, 114 S. Spring St., has returned from a two-weeks' business trip to San Francisco.

Emile Shostrom, with Donovan & Seaman's Co., has gone on a duck-hunting trip in the vicinity of San Jacinto.

R. V. Phillips, formerly with Cady & Olmstead, is now in the jewelry repair department of Brock & Feagans.

E. E. Peck, president of the Los Angeles Gem Co., is now in Arizona, visiting the company's turquoise mines.

J. Wiesenberger, 453 S. Broadway, has gone to Murrietta Hot Springs for a week's rest before the rush of holiday trade begins.

Harry W. Harrison, salesman in the gold jewelry department of Montgomery Bros., has gone on a quail-hunting trip to San Jacinto.

William Petry has just received 10 sacks of turquoise from his mine in Nevada. O. Wehrend, who has charge of the mine, is now in this city.

L. C. Sawin, M. J. Kaliher, and Mrs. Parker, Whittier, and S. P. Clem, Redondo, were out-of-town jewelers who visited this city, a few days ago.

L. E. Inns, traveling representative of the Pacific Gem Co., has returned from a 10-weeks' trip on the road and started out again to look after the holiday trade.

J. C. Fleming & Co. are making further alterations in their store, including the construction of a large skylight near the center. Meanwhile they are having an alteration sale.

Mrs. McMullen, of the Southwest Turquoise Co., has recently received several orders for the new facet-cutting machine which she invented, and the machines are now being made.

The Whitley Jewelry Co. is placing on the market a new stone, which is attracting considerable attention. It is a variety of chrysocolla matrix from Lower California. The matrix is a dark brick red.

W. C. Libs, who has been with Hambright & Walsh for a few years past, has gone to Imperial, Cal., and taken a posi-

tion there in the hope that the change of climate will be beneficial to his health.

R. H. Schwarzkopf has been sick in bed for about two weeks, but is slowly recovering. F. C. Curry, Mr. Schwarzkopf's traveling representative, has gone on a trip north, to be absent about six weeks.

A letter recently received from Minnesota brings the information that Chas. C. Noble, formerly head of the diamond department in Montgomery Bros.' store, is still in poor health and staying at a sanitarium.

George L. Bannister, Newton Moore, John Luckenbach and O. L. Wuerker were among the jewelers who went to Catalina Island, a few days ago, to attend the initiation ceremonies, when a large number of candidates were received into the Mystic Shrine.

Carl Entenmann, president of the Carl Entenmann Jewelry Co., has started on tour among his customers up and down the Pacific Coast. He expects to be gone about five weeks, going by the way of the San Joaquin Valley and returning by the coast route.

Brock & Feagans sold six solid silver cups for the auto races at the Orange County Carnival of Products held at Santa Ana. The same company has just sold a handsome loving cup to the Pasadena Y. M. C. A. Tennis association to be given as a trophy.

The German American Turquoise Co., 114 1/2 S. Spring St., is now devoting its time largely to cutting black opals for Field & Walton of this city. These opals are part of a consignment received by Field & Walton from Australia and are considered remarkably fine stones.

The Southwest Turquoise Co. has rented quarters on the south side of W. 4th St., between Broadway and Hill St., and expects to move there Nov. 1. The new quarters will be much larger than those now occupied and the three shops and salesroom now on N. Broadway will be brought together and will be afforded much better accommodations. The store is now being remodeled. This company finds an excellent demand for satellite and creolite, both named by Mrs. Gertrude S. Reynolds McMullen.

The business of the Angelus Jewelry Mfg. Co. has grown rapidly since its removal to 126 E. Jefferson St. A. P. Wood, the manager, has just returned from an extended trip as far east as Denver and New Orleans during which he took such a large number of orders that the shop is unable to fill all of them promptly, although 25 people are employed and are working 12 hours a day. The Los Angeles Gem Co., which is associated with the Angelus Co., occupying the same building, is also doing a large and increasing business.

G. Jacobsen has bought the stock and fixtures of W. J. Graff, Soldiers' Grove, Wis.

D. Buchanan & Son, Richmond, Va., have filed articles of incorporation with a capital of \$10,000 subject to an increase to \$35,000. The officers are: President, D. A. Buchanan; vice-president, G. M. Schaefer; secretary and treasurer, D. S. Hardy.

Philadelphia.

H. O. Hurlburt & Sons, 14 S. 10th St., continue to close at 5 P. M.

William Leiner is no longer connected with the Newark Jewelry Co.

S. C. Levy has removed from 2314 Columbia Ave. to 2607 Oxford St.

E. Weinmann has moved his Philadelphia office from 925 to 900 Chestnut St.

Homer Vernan has accepted a position with Riggs & Bro., 310 Market St.

Charles Mason, 602 Chestnut St., Perkasie, Pa., has disposed of his business.

S. A. Ludwig, Easton, Pa., spent the week end in this city with Mrs. Ludwig.

W. E. Harwood of the Fontneau & Cook Co., Attleboro, stopped over for a few days.

W. P. Thornton, with H. A. Kirby, manufacturer, Providence, R. I., was a recent visitor.

William H. Stern with the Herald Novelty Co., New York, was in town during the week.

E. H. Wetherhold, jeweler, of Allentown, Pa., was a recent visitor here with Mrs. Wetherhold.

E. P. Van Nortwich, with the American Oil & Supply Co., Newark, N. J., visited the trade, last week.

Charles Rose, jeweler, 1016 Pine St., was a recent visitor to New York, attending the Hudson-Fulton celebration.

John Grund, formerly with E. S. Radley, has started in the jewelry business for himself at 3118 Kensington Ave.

T. J. Wilkinson, of Lyons & Wilkinson, 472 Lancaster Ave., has opened a horological school at 25 S. 54th St.

Edwin Koshland, representing Charles H. Koshland, diamond importer, 702 Chestnut St., has started on a business trip.

Al. Bandschapp, retail jeweler, 468 N. 8th St., with a party of friends, has started on a pedestrian trip to Easton, Pa.

Harry Gold has resigned his position with William Gibbons, and has bought the business of Robert Leusch, 2113 N. Front St.

Louis P. White, wholesale jeweler, 9th and Chestnut Sts., has brought suit against Emma and David R. Reynolds, for ejectment.

Miss Meyer, sister of Charles P. Meyer, retail jeweler, 929 Passayunk Ave., has just returned from a three months' tour of Europe.

Ed. Sickles, of M. Sickles & Sons, is spending a few days with Mrs. Sickles in New Brunswick, N. J., combining business and pleasure.

L. A. Favre, a jeweler of Portsmouth, N. H., and at one time a representative of H. O. Hurlburt & Sons, visited old friends in the trade last week.

E. P. Ledos, of the Ledos Mfg. Co., Newark, N. J., was a visitor to this city during the week, and will leave shortly for an extended western trip.

J. Rubenstone, of 125 S. 7th St., and 1607 Susquehanna Ave., acted as chief marshal in the parade given by the Business Men's Carnival on Oct. 7 and 9.

Walter Lowry, watchmaker for George Ware, Atlantic City, has resigned his position and is now associated with a jewelry house in Mount Holly, N. J.

E. D. Cole, retail jeweler, of Washing-

ton, D. C., contemplates a continuance of his auction, which has been successfully engineered by H. T. Stapleford, of Wayne, Ind.

J. E. Caldwell & Co. are exhibiting in their window the large silver cups, pitchers and platters designed and made by this house as prizes for the Rose Tree Hunt first Fall meet.

Harry Weir, 106 Levering St., Manayunk, Pa., has been appointed chairman of the carnival committee, to be held from Nov. 1 to Nov. 15. Many jewelers in this section will take active interest.

The Hoover & Smith Co., 616 Chestnut St., has opened its uptown branch store, Walnut and 13th Sts. The house is showing a very fine selection of diamonds, watches, jewelry and silverware.

Notice has been given that a meeting of the creditors of Frederick Goldman, bankrupt, will be held at the office of the referee, Monday, Oct. 18, to consider the confirmation of the trustee's account, declaration of dividend and the closing of the case.

A. Hall, well known to the jewelry trade of this city, and at one time an employe of M. Sickles & Sons, was held last week under \$1,500 bail, for speeding and using another's license. Mr. Hall recently married Miss Bergdoll, an heiress, of this city.

Edward Evans, an oldtime jeweler and optician of this city, died, recently, at his home, after a serious illness of three weeks. Mr. Evans was 76 years of age, and had been identified in the jewelry business for the past 35 years. The business will be sold to settle the estate.

The following jewelers were visitors to this city during the week: A. L. Dennis, Stroudsburg, Pa.; E. K. Bean, Lansdale, Pa.; E. Blaine, of Lloyd & Blaine, Pocomoke City, Md.; Carson & Smith, Hagerstown, Md.; C. Kohler, Norristown, Pa.; J. H. Shuler and J. D. Sallade, Norristown, Pa.; S. W. Hart, Kennett Square, Pa.; G. W. Landis, Newville, Pa.; D. H. Krause, North Wales, Pa.; H. B. McFarlan, E. Dowington, Pa.; J. Lacey Tyler, Laceyville, Pa.; Samuel Zimmern, with H. Zimmern & Co.; John MacPherson, Mauch Chunk, Pa.; William R. Cobb, Pawtucket, R. I.; William Beek, Vineland, N. J.; L. S. Caldwell, Wildwood, N. J., and W. L. Roberts, Wilmington, Del.

Harrisburg, Pa.

TRADE CONDITIONS.

With all the local industrial plants again working full time and plenty of orders in sight, and the improved trade conditions along the Pennsylvania Railroad system, jewelry merchants are anticipating a much better Fall and holiday season trade than was given to them in 1908. The city has inaugurated a movement to secure more small industrial plants and has appointed a committee of 50 which purposes raising a fund of at least \$50,000 for this express purpose, and also to secure the building of an independent municipal railroad belt line connecting the various local industrial plants. Merchants are very hopeful of the future so far as Harrisburg is concerned.

Mrs. George A. Hutman, wife of the well-known jeweler, has recovered from a recent serious illness.

Jacob Tausig's Sons, 420 Market St., announce the closing of their store at 6 P. M. every day except Saturday.

James Springer, a brother of George N.

Springer, watchmaker for W. P. Deroy, Market St., died suddenly, Oct. 4.

Fred Robin is well pleased with his removal from 6th and Broad Sts. to 25th St. near Walnut. He is now in the downtown business district.

James Yohe, a notorious "second-story man, who is thought to be implicated in a number of jewelry robberies, aggregating \$15,000, in this city and vicinity, was arrested at York last week.

A watch book containing the number and descriptions of all watches returned to pawnbrokers has been opened at Harrisburg headquarters. Returns of stolen watches will be entered in red ink.

C. Ross Boas and Henry C. Claster represent the jewelers on the Harrisburg Committee of Fifty, appointed to secure the jewelry industries for the city. Henry C. Claster and J. Claster have contributed \$500 to the \$10,000 industrial fund now being subscribed.

Harrisburg retailers have given their unqualified indorsement to the letter sent out to jobbers and wholesalers by the Executive Committee of the Pennsylvania Retail Jewelers' Association, asking them to discontinue selling their wares at prices to others than retail jewelers.

Merchants of Harrisburg, including jewelers, are forming a local mercantile agency similar to Dun's and Brazer's. It will be identified with the Mercantile Agency of Pittsburg. Such agencies are being formed in Danville, W. Va., Columbia, Lancaster, Williamsport and other Pennsylvania cities.

Connecticut.

W. B. Robertson, Norwich, is dead.

C. R. Gardiner has been appointed chasing agent for the International Jewelry Co., Meriden.

The New Haven Cloek Co., New Haven, has taken out a permit to build an addition to one story to its factory in Hamden.

W. T. Hedges, Boston representative of Landers, Frary & Clark, New Britain, visited the factory in New Britain last week on a business trip.

John J. McDonald resigned about a month ago his position as foreman of the England Watch Co., Waterbury, after having been associated with that concern for 26 years.

Charles L. Taylor, at one time associated with the Wilcox Silver Plating Co., Meriden, died suddenly of heart disease, at his home, 322 W. Main St., Meriden. Mr. Taylor was 72 years of age and was native of Bristol.

Jacob W. Hiney, at one time superintendent of the Meriden Britannia Co.'s factory, and a well known resident of Meriden, died in Middletown, recently, at the age of 80 years. Mr. Hiney is survived by two daughters and one son. The deceased was born in Albany.

Harry Nesbit, brother of Evelyn Nesbit Thaw, was sentenced to 60 days in jail in the city court of New Haven, by Judge Mathewson, for trying to pawn rings which he said were set with diamonds and which he claimed were sold to him as genuine by L. Glouskin, a jeweler of Chapel St. The witness stand and testified that the rings had not diamonds, but sapphires.

"Multi-Silver Fortified Back"

Showing silver plating on front of spoon

IN addition to our extraordinary standard plating we give a "Multi-Silver" plating to the entire back of every spoon and fork—the place wear-resistance is most necessary:

As our Multi-Silver plating is accomplished in one operation, by a new patented process which we control exclusively, we get an extra fortification at but a trifle more than the cost of the additional silver:

Our goods have a standard price and profit for the dealer, because we take advantage of every invention to make them better:

How Well-Laid Plans of Burglars Were Frustrated by the Jewelers Security Alliance.

As the Boston express was pulling slowly out of the station at Albany two well-looking men—one large, stout and heavy, and the other short, stocky and plump—came sprinting down the platform, swinging themselves up on the steps of the train, dropped into their seats breathlessly from the exertion of boarding the moving train.

"July gee!" said the big fellow, who was evidently a German. "That was a close shave. Good thing I didn't bang the car against the car getting on."

"You bet your life," said his companion, who had the map of Ireland plainly im-

printed on his forehead, "I was just pacifying him, and while they both went back to get the bag an officer was concealed in the store."

On the return of the men they went up on the steps of the store to get a better view of the interior, and must have discovered the presence of the officer, for they left in a hurry and went back to the station, followed by the officers who had been shadowing them all the time, and were there placed under arrest. The one who had the bag made no resistance, but showed great anxiety about it, and shouted to the officer who seized him to be careful of it. The Irishman showed fight and attempted

where they can do no mischief for a long time to come.

Inspector Hart, of Boston, brought a witness to the hearing to identify Sheedy, whom he had seen loitering around a dental supply office in which the safe was blown and \$2,000 worth of gold stolen. Detective-Sergeant Butler, of Hartford, was also present with a witness who identified both men, whom he had seen in a hallway of a house adjoining a jewelry store there which had been robbed the same night, and evidence was given that jewelry stolen from that store had been recovered from women in Hartford and New Haven to whom Sheedy had given it the day after the robbery, while the revolver taken from him had been stolen from a store in Hartford.

Warrants have therefore been lodged against both men by the police of Boston and Hartford, on which they will be arraigned as soon as their present term has been completed.

Now, there was no magic about this capture, and the Springfield police did not find out about the burglary by "consulting the stars," but it was the direct result of the up-to-date methods of the Jewelers Security Alliance, the protective organization whose little blue sign appears on the doors of 5,000 of the best jewelry stores in the country as a warning to "cracksmen" to keep off.

The "Pinkertons," who are the detective agents of the Alliance, were "wise" to this "plant," and had the burglars under observation so that within five minutes after they boarded the train the New York office was informed and immediately telephoned the Springfield police to be on the lookout for them, with the results as stated above.

When the Alliance was first formed, 26 years ago, it contented itself with the pursuit and punishment of burglars *after a member had been robbed*, and has met with gratifying success in that direction, sending to prison a long list of noted safe-crackers, and in addition over 100 less noted "crooks" have been jailed through the reward offered by the Alliance for the arrest and conviction of burglars who did not attack safes.

The cost of all this detective work, however, was heavy, and frequently the chase was so prolonged that little of the stolen property could be recovered, most of it having been squandered before the burglars could be arrested.

It became evident, therefore, that it would be more economical and also more satisfactory to *prevent* robbery, as far as possible, and during recent years strenuous efforts have been put forth in this direction.

New signs have been furnished to the members, and so extensively advertised that they are well-known to all professionals, who are very seldom willing to risk attacking a store where they are displayed; and whenever a burglar is arrested in any part of the country a notice is sent to him with an illustration of the Alliance signs, warning him never to molest a store which is under its protection.

Arrangements have also been made with the Pinkerton Agency by which a chain of offices covering all sections of the country has been established, from which detectives can be rushed to any threatened point at

(Continued on page 109.)

AUGUST PALMER.

TIMOTHY A. SHEEDY.

ed upon his countenance. "One good would end this trip in a hurry. You keep a tight hold on the bag now, so curves won't throw it around, or we never get there."

on the arrival of the train at Springfield, Mass., the two men left the car, handling the valise with great care, and checked at the parcel counter. There were four police officers standing about, apparently inspecting the arrivals, which caused "Dutchman" to remark:

"Looks like a reception committee, don't it, Tim? Did you order a brass band to meet us?"

"I guess they are not after us," said the other, "but it might be safer if we were not together." whereupon they separated, and were shadowed by several detectives, who took different routes to the vicinity of A. E. Cunliffe's jewelry store on Worthington Street. Here they met again and inspected it with the most painstaking care, looking at it from every possible point of view, and coming back several times for further observations, after which they retired for consultation.

Suddenly the larger one exclaimed excitedly: "You ought to know better, Tim, don't go up against one of those jewelry stores! Didn't you pike off the safe when you were up here before to lay out the plant?" After considerable argument, however, his partner succeeded in

to shoot, but, having been warned that these were dangerous men, the officers were prepared and grabbed his hand before he could get the pistol out of his pocket or fire through it.

The men were readily identified as "Gus" Palmer and "Tim" Sheedy, well-known "cracksmen," both of whom have served several terms for burglary; and an examination of the bag showed that Palmer had good reason to be nervous about it, for it contained sufficient nitroglycerine and dynamite to blow up the whole station, and if dropped would probably have killed every person near it. In the bag were also found fulminating caps, batteries and a full set of safe-breaking tools, while Palmer had a loaded revolver and Sheedy was supplied with an automatic Colt with 12 shots in the magazine, so that they were prepared to make a desperate defense if they had been interfered with when at work at the safe.

At the hearing the next morning the men were held in \$200 bail for carrying concealed weapons and in \$5,000 bail for bringing burglars' tools into the State, and, not being able to raise the necessary funds, were remanded for the Grand Jury, which indicted both last month for having burglars' tools, and also brought a separate indictment against Sheedy for burglary of a store. The men, therefore, have not only been prevented from robbing the Cunliffe store, but will certainly be "put away"

THIS DEPARTMENT CONTAINS A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN, THE UNITED STATES PATENTS THAT HAVE BEEN ISSUED AND THE REGISTERED TRADE-MARKS.

UNITED STATES PATENTS.

PUBLISHED OCT. 5, 1909

11,600. GEOGRAPHICAL CLOCK JEAN B. OLINGER, Milwaukee, Wis. Filed Feb. 15, 1909. Serial No. 477,879.

A clock of the described class, a dial having a face provided with an annulus subdivided into segmental divisions of alternately the same character, and marked to indicate time geographical points on opposite meridians, in

combination with means for rotating the dial, and a concentric annulus marked to indicate sub-hours in time, the divisions on the dial being marked to represent points having a time standard differing by one hour from the preceding division of the same character and 12 hours difference of the same character to indicate A. M. and P. M. the hour.

11,602. WATCH-GUARD. EMIL M. LOEWENTHAL Rockaway, N. J. Filed March 6, 1908. Serial No. 419,419.

A device of the character described comprising a stud provided with means adapted to engage a spring at one end and a chain at its other end, a body formed on said stud, grippers mounted on said body, a hood mounted upon and surrounding

said body, means for holding said grippers in normal positions, a sliding head mounted on said stud provided with a hood, the hood of said head being adapted to telescopically engage the end of said sliding head to form a casing for said grippers, means formed in said sliding head adapted to permit said grippers to project therefrom, means for returning said grippers to their normal positions, and means formed on said stud adapted to limit the movement of said grippers on said sliding head.

11,605. NICKEL ALARM-CLOCK. ELMER E. STOCKTON, Bristol, Conn., assignor to the E. Ingraham Co., Bristol, Conn. Filed Feb. 19, 1909. Serial No. 478,851.

A nickel alarm-clock, the combination with a metal case-body or shell having one of its ends turned inward at a right angle to form an annular sound-hole flange which is perforated, of

a concentrically arranged bell located within the said case-body or shell adjacent to the said flange

through the perforations of which the sound of the bell passes out of the clock.

11,605. NICKEL ALARM-CLOCK. ELMER E. STOCKTON, Bristol, Conn., assignor to the E. Ingraham Co., Bristol, Conn. Filed Feb. 19, 1909. Serial No. 478,852.

In a nickel alarm-clock, the combination with the case-body or shell thereof, of a bell concentrically arranged within the said case-body or shell,

and a sound-hole ring made independently of the said case-body or shell and formed with sound-holes and located just within the edge of the case.

DESIGN.

40,280. WATCH DIAL. FREDERICK G. GRUEN,

Cincinnati, O. Filed April 1, 1909. Serial No. 487,364. Term of patent 14 years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."]

TRADE-MARK PUBLISHED OCT. 5, 1909.

Ser. No. 44,136. (CLASS 28. JEWELRY AND PRECIOUS-METAL WARE.) BAUMGOLD BROS. & Co., New York. Filed Aug. 13, 1909.

Particular description of goods.—Solid and plated chains, charms, brooches, finger-rings, earrings, bracelets, lockets, scarf-pins and stick-pins made in whole or in part of precious metal.

TRADE-MARKS REGISTERED OCT. 5, 1909

75,460. WATCH, POCKET AND JEWELRY CHARMS. HERMAN D. UMBSTAETTER, Boston, Mass.

Filed April 19, 1909. Serial No. 41,872. Published Aug. 3, 1909

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1908, FROM THE Illustrated Official Journal.)

ISSUE OF SEPT 22, 1909

11,600. CLOCKS COMBINED WITH TALKING MACHINES. R. M. WOLFF, Steglitz, and J. PAHLE, Friedenau, both in Germany. May 29.

A clock allows a talking-machine to sound at definite intervals, for advertising purposes, etc. A pivoted spring-controlled lever 9 bears a projection 15, which prevents the rotation of the main spindle 19 of the driving-train of the talking-machine by engaging in a hole 20 in a cam 18 fixed to the spindle. When a pin 7 on a disk carried by the arbor of the minute-hand of the clock bears against a tooth 12 at one end of a second pivoted spring-controlled lever 10, the other end 13 pushes aside the lever 9, thereby freeing the spindle 19. The talking-machine train is still

FIG. 2

FIG. 4

checked, however, by the bent end 13 of the lever 10 obstructing a pin 22 on the regulating-spindle 21, until the pin 7 passes the tooth 12, when the lever 10 is pulled back again by its spring. The immediate return of the lever 9 is prevented by a sliding piece 24, which, as soon as the projection 15 is withdrawn from the hole 20, covers the hole; but after the spindle 19 has made a revolution, the projection 15 pushes the slider 24 aside and re-enters the hole 20. The rotation of the cam 18 allows a pivoted bar 31 and rod 33 to fall, moving a hinged flap 34, on which rests an arm 37 fixed to the horn 36 of the talking-machine. The reproducer 40 is thereby permitted to come into contact with the record, owing to the pull of a spring 38 on the horn, which is pivoted on a rod 44 in such a manner that motion in the direction of the length of the record may also take place. As the cylinder is rotated by a driving-cord 28, the impression on the record shifts the reproducer and the horn longitudinally until simultaneously with the stopping of the driving-spindle 19, the cam 18 lifts the bar 31, whereupon the flap 34 raises the reproducer out of contact with the record, and with the horn it is returned to its

Applications for patents, Sept. 6 to 11.

20,428. IMPROVEMENTS IN PIN POINT PROTECTORS. THOMAS WALL, Birmingham.

Air Ships and Smuggling

It is by no means inconceivable that in the comparatively near future the world will witness flying planes perfected to a point which will enable them to make trips of several hundred miles with a fair degree of certainty in calm weather—and our frontiers march with those of Canada to the north and of Mexico to the south several thousand miles. Along both these borders the Government now maintains a corps of inspectors to prevent smuggling. Their services are believed to be generally effective. But it is obvious that the construction of flying ma-

JEWELLED HAMMER PRESENTED TO PRESIDENT TAFT AFTER HE HAD USED IT TO FASTEN A DOOR PLATE ON THE HOME OF THOS. F. WALSH.

ines moderately dependable for speed and safety would create entirely new conditions for smugglers in the countries which adjoin. Their own should undertake to use such devices for night flights across the borders with cargoes light in weight, yet possessing high value—such, for example, as diamonds, opium, or opium.—Philadelphia *Evening Bulletin*.

B. W. Blocher, Ellwood City, Pa., who had been seriously ill, is reported convalescent.

An Interesting Display of Trophies.

AN interesting display of trophies was recently made by Geo. Wolf & Co., Louisville, Ky., which excited considerable local attention. This consisted of about 20 silver cups and pitchers, which were to be awarded as prizes at the Kentucky State Fair, and were furnished by this jewelry house.

The jewelers had these grouped together

AN EXHIBITION OF THE TROPHIES OF THE KENTUCKY STATE FAIR MADE BY A LOUISVILLE, KY., JEWELRY HOUSE.

at their store, 418 Fourth Ave., in such a way as to show off the graceful outlines and other details of all the trophies.

Jeweled Hammer Presented to President Taft.

ONE of the many handsome gifts received by President Taft on his trip through the west was a jeweled hammer which the President used in fastening a brass plate on the wall of Thomas F. Walsh's country

How Well-Laid Plans of Burglars Were Frustrated by the Jewelers Security Alliance.

(Continued from page 105.)

short notice, and the Pinkertons are maintaining an extensive information bureau, containing pictures and descriptions of thousands of professional criminals, together with their methods and the haunts which

they frequent, so that when a burglary is committed this bureau can often judge who the burglars were and where they are likely to be found by the way in which the work was done.

Confidential relations have been established with correspondents in all parts of the country, from whom information is obtained regarding robberies which are contemplated, and the Alliance has frequently sent word to members whose stores have been selected for attack, warning them of weak points which have been observed by criminals. These were immediately strengthened and the proposed raid would then be abandoned, the thieves recognizing that their plans must have been discovered.

The Alliance also sends bulletins to its members, giving in detail all the various tricks of sneak-thieves, pennyweighters and other criminals who prey upon the jewelry trade, with information and advice as to the best means of prevention.

Such work as this is invaluable to the retail jeweler, and it is no wonder that the membership of the Alliance is increasing by leaps and bounds, more than 400 new names having been added to the roll since Jan. 1, 1909, of whom 108 were received at the September meeting.

Certainly every jeweler who carries any stock at all owes it to himself, his family and his creditors to secure this protection, which can be obtained for a merely nominal rate, the Alliance not being a money-making corporation, but an association of jewelers for mutual benefit.

home at Denver, Colo., which was renamed "Clonmel."

This hammer, which is studded with jewels, was made by the Boyd Park Jewelry Co., Denver, under the direction of Thomas L. Drake, general manager. A fine amethyst is set at one side, while the inscription is on the center of the head.

Paul J. Taliaferro, formerly with the Mulford Jewelry Co., has associated himself with the firm of W. C. Graves & Bro., Memphis, Tenn.

Get the Railroad Trade

CONTROL the railroad trade in your district and you are assured of a good business. The duties of railroad men require them to have a correct and durable watch.

It is also true that other trade follows railroad trade, because the patronage of railroad men at once stamps your stock as *reliable*. The Railroad

Elgin

is designed especially to meet the requirements of the railroad man. The silver finish metal dial is most popular because the faintest ray of light illuminates it. This is the *only* metal dial made with *inlaid* figures of *hard enamel*. Some prefer the white enamel dial.

The Railroad Elgin is the thinnest 18 size watch made. It is timed and cased at the factory, and will run longer on one winding than any other railroad watch.

Another sales factor is *Elgin prestige*; for the Elgin is the most popularly known watch in the country, and this particular Elgin is everywhere recognized as a standard railroad timepiece. Advertising in railroad magazines is familiarizing it among railroad men who are anxious to see it and who are asking for the Elgin with the "49 silver dial" or the "49 enamel dial."

You can't control the railroad trade with a poor watch; but you *can* with the Railroad Elgin. Write to your jobber or to the company direct for prices.

These are the four grades and established retail prices as advertised:

	GRADE		20 YEAR GOLD-FILLED	25 YEAR GOLD-FILLED

THE HOROLOGICAL REVIEW

The Curious Astronomical Clock at Olmütz.

Written expressly for The Jewelers' Circular-Weekly, by Chas. A. Brassler.

Since the celebrated Strasburg clock was made the construction of similar extensive and complicated clocks has been almost at a standstill. Various astronomical clocks have, it is true, been made in Germany and America for exhibition

purposes: we need only remind our readers of the ingenious "Twelve Apostles clock" which was destroyed by fire a few years ago at the exhibition at Arnheim; of C. Spath's clock in Steinmauern—a remarkable work from a technical point of view; of the so-called "universal clock," by Noll, of Villingen, exhibited in various cities, and of R. L. Wille's clock, similarly designed, which was on view at the exhibition in Leipsic.

None of these comprehensive but at the same time portable clocks can, however, rank with the Strasburg clock, which has existed for several centuries, and which, after being restored in the thirties of last century by the celebrated clockmaker, Schwilgue, of Strasburg, works to-day with perfect action in all its parts.

For about 200 years, however, the Strasburg clock had a rival in the astronomical clock at Olmütz, first constructed in 1422. This complicated piece of mechanism, which had previously been restored several times (in 1552-57, in 1661 and 1746), had unfortunately become seriously damaged in the course of time; its reconstruction involved considerable difficulty and expense, as all the separate parts had to be renewed, but the necessary money was at last raised by subscription, and when, in the firm of Ed. Korfhage & Sons, of Buer, Hanover Province, Germany, technicians were found competent to grapple with the difficulties of the reconstruction, the work was taken in hand and brought to a successful conclusion in the spring of 1898.

A description of this remarkable work of art will doubtless interest our readers.

The clock is fixed in a niche, three tiers or stories high, in the outer wall of the town hall, close to the tower. The principal wall of the clock, which is 15 meters high and 5½ meters wide, is divided into three portions: a lower part with the calendar and the astronomical disk, a central part with the group of angels and the movable figures, and a top part likewise decorated with pictures.

A glance at the lower portion of the principal clock facade reveals a marble slab in the middle with the inscription "What thou hast inherited from thy fathers win it to possess it," and below, in smaller letters, "To the Mayor, Joseph von Engel, and the combined efforts of the art-clock restoration association and the Town Council belongs the credit for the restoration of this clock in 1898."

Over the tablet with the inscription the socle like substructure on which it rests

OLMUTZ CLOCK AFTER ITS THIRD RESTORATION, IN 1746.

Waltham Watches

COLONIAL SERIES

COLONIAL SERIES movements are made by the
WALTHAM WATCH COMPANY only. They are supplied in five qualities
as follows:

RIVERSIDE MAXIMUS; Nickel

23 diamond and fine ruby jewels; two pairs diamond caps; raised gold settings; accurately adjusted to temperature, isochronism and five positions and carefully timed; compensating balance; meantime screws; patent Breguet hairspring, hardened and tempered in form; patent detachable balance staff; both balance pivots running on diamonds; double roller escapement; sapphire jewel pin permanently driven into the roller; exposed sapphire pallets; steel escape wheel; gold train; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels; steel parts chamfered; fine glass handpainted dial of most modern and artistic design.

RIVERSIDE; Nickel

19 fine ruby jewels; raised gold settings; adjusted to temperature and five positions; compensating balance; meantime screws; patent Breguet hairspring, hardened and tempered in form; patent detachable balance staff; double roller escapement; steel escape wheel; exposed sapphire pallets; red gold center wheel; patent micrometric regulator; exposed winding wheels; tempered steel safety barrel.

ROYAL; Nickel

17 jewels; red gold settings; adjusted to temperature and three positions; compensating balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; exposed pallets; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

No. 1425; Nickel

17 jewels; red gilded settings; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; exposed pallets; red gilded center wheel; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

No. 1420; Nickel

15 jewels; settings; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; exposed pallets; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

COLONIAL SERIES movements are sold in cases only. Each movement is fitted in its case and the watch timed at the WALTHAM factory.

Waltham Watch Company

Waltham, Massachusetts

extends upwards on each side of the wall and forms a square frame for the calendar dial which shows the days of the week, the weeks, the months, the date and the phases of the moon by means of hands. On a central disk, moving from left to right, the days are pointed out by a gilded staff held by an angel at one of the sides.

The remaining space to the right and above of the base below the volutes at the top is covered with paintings. In these paintings the painter, Bitterlich, has depicted the ideal figure of the original con-

struction here shown by a neatly executed mechanical contrivance. In the center of the disk we see the sun, and around it the planets Saturn, Jupiter, Mercury, Earth, Mars and Venus revolving round the sun from right to left (west to east).

Uranus and Neptune, which require, respectively, 84 and 165 of our years to complete one revolution, are omitted, as it would have been impossible to represent their orbits. Round the sun may be seen the four seasons, pretty allegorical figures, also painted by Bitterlich.

On the edge of the planetary dial and in separate fields are shown the months, and behind them the corresponding signs of the

behind the scenes at noon the angels' hammers are set in motion at the same time.

Not only music-making angels, but a row of moving figures, human and animal, are shown on this tier. Here we see the Count of Hapsburg and the priest, Saint George and the Dragon, the Kings of the

CALENDAR DIAL.

sector of the clock, Anton Pohl; on the left we see the old master in his workroom, on the right the master after his legendary death by the ungrateful Town Council of Olmutz. Both the pictures are full of domestic life.

Above the calendar dial, occupying the entire breadth of the wall, and surrounded by friezes, is the astronomical portion of the work. It includes, on the left, a twelve-

PLANETARY OF THE CLOCK.

hour dial, with a minute dial above it, in the center, the astronomical division, showing the movement of the planets, and on the right two 24-hour dials. The lower of the two dials shows the solar day, divided into 24 hours; the upper dial, revolving, containing in its center the northern celestial hemisphere, shows the sidereal

astronomical dial with the mechanism behind it forms the real center of the work. The path of the planets is

THE OLMUTZ CLOCK AS IT IS TO-DAY.

zodiac—well-executed paintings in elegant plastic frames. All the dials of the astronomical portion of the work are made of silvered sheet copper and have blue edges. All the carvings of the surrounding woodwork are richly colored. In the four corners Bitterlich has painted some small angels' heads.

One story higher begins the aerial section. Instead of dials and hands, we here see in the center of the scene, arranged in three rows, one above the other, a group of 16 charming little angels, each bearing a hammer and a bell. The latter are made of wood, but when the bells begin to ring

PRIEST AND ATTENDANT.

East, the Virgin on her throne with the Child Jesus, the flight into Egypt, the four periods of life, symbolized by highly characteristic moving figures, and finally the inevitable wing-flapping and crowing cock.

MADONNA WITH THE INFANT.

All these figures, made by Hotger, of Wiedenbrunn, Westphalia, from Bitterlich's designs, are richly colored.

Above and partly within the mechanical section is a portrait of the Empress Maria Theresa. It is not necessary to inquire the reason for the presence of the portrait of the empress, who was twice in Olmutz. It

RING OUT THE OLD—RING IN THE NEW

STANDARD.—30-hour time, Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.
THE RATTLER.—30-hour time, Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case nickeled and highly polished.
LONG ALARM.—30-hour time, Six-minute Alarm with "shut off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

Why travel in the same old rut the balance of your natural life, and buy the same antiquated styles of Nickel Alarm Clocks your grandfather used to buy, just because some manufacturers have not thought it necessary to produce new designs in other clocks?

We have some new ones, superior to anything heretofore made, and to introduce them and put a set into the hands of every jeweler, we will, on receipt of \$6.00, deliver east of the Rocky Mountains, express prepaid, one sample of each, consisting of eight clocks as described.

Don't fail to avail yourself of this opportunity to see a complete line of up-to-date alarm clocks.

See coupon at bottom of page.

DI-ALTERNATOR.—30-hour time, Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch; extra large bell. Height, 7 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

**THE
E. INGRAHAM
CO.
BRISTOL, CONN.**

"THE ALARM CLOCK WITH THE CONCEALED BELL"

See cut of interior view showing bell located entirely within the case. The unsightly visible bell eliminated. Bell cannot be disarranged or thrown out of adjustment.

SIREN.—30 hour time, Long Alarm (four minutes), with "shut-off" switch. Large bell inside of case. (See interior view.) Height, 6 in.; Dial, 4 1-2 in., solid brass; Case, nickeled and highly polished.
VIBRATOR.—30-hour time, Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch. Large bell inside of case. (See interior view.) Height, 6 in.; Dial, 4 1-2 in., solid brass silvered; Case, solid brass, old brass finish.

ROTATOR.—30-hour time, Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch. Large bell inside case. (See interior view.) Height, 6 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

TEAR THIS OFF AND MAIL TO-DAY

THE E. INGRAHAM COMPANY, BRISTOL, CONN. :

Gentlemen—Enclosed find \$6.00. Please send me by express, prepaid, your "Introductory Assortment" of eight alarm clocks, consisting "Standard," "The Rattler," "Long Alarm," "Alternator," "DI-Alternator," "Siren," "Vibrator" and "Rotator." Yours truly,

Name.....Address.....

as it simply because it was there before and because on principle no alteration in the original arrangement of the figures was contemplated. It was even contemplated to reproduce the frescoes of the painter, Handtke,

THE BOY, PERSONIFYING CHILDHOOD.

to repair them merely, but this was found to be impossible, and Bitterlich was assigned to reproduce Handtke's symbols, entire freedom being allowed

ROOSTER THAT ACTUALLY CROWS.

in the exercise of his imagination and inventive faculty. As a result we have eight great pictures on the side walls of the clock, representing, on the right, rhetoric, geography, geometry, biology, industry; on the left, arithmetic,

astronomy, architecture, mechanics and music. All these were sciences and virtues necessary for the successful completion of the work. Within the pointed arch, at the top, Bitterlich painted an Apollo with the Muse and Pegasus, and to form a connecting link between the above-mentioned great wall pictures he added two portraits of the geographers Strabo and Ptolemy on each side. Here also his work was suggested by the symbolizing art of Handtke.

Other pictures by Bitterlich are to be seen at the top of the back wall; they are arranged in two groups to the right and left and represent various persons looking down over a Gothic parapet on to the clock; also a luna under the second large lunar disk and above the portrait of Maria Theresa. These groups are in modern style, full of life and action, and are painted on wood. It is a pity that they are placed too high to be easily seen from the screen below. They must be seen through a glass to be properly appreciated.

We will add a few words on the mechanical portion of the work. The clock consists of a going train with a gravity escapement. It comprises a quarter-hour striking work, an hour striking work, a double train for moving the figure of the boy, a double driving gear for the bells and a train for the cock. The minute hand, the hour hand, the astronomical work and the 24-hour hand for solar and sidereal time are given from the going train. The calendar work in its turn receives its impulse from the astronomical work, in which a lever drops every night at midnight, thereby setting all the parts of the calendar work for the next day.

The large day dial of the calendar work is set in motion by an iron ring provided with 363 teeth, to which an automatic arrangement for leap-year is fitted. The large ring, as we have said, has only 363 teeth, two less than the number of days in the year. The two missing teeth, however, are replaced by a wheel segment with three teeth attached to a large wheel and kept stationary for three years by a movable star with four points. In the fourth year this star-wheel releases the wheel segment; this causes the wheel to stop for 24 hours on Feb. 29.

A stationary dial divided into four fields is inserted in the interior of the movable calendar disk; in it are shown the days of the week, the date, the months and the phases of the moon. A single disk with unequal notches, revolving once round its axis in four years, provides for the exact regulation of the hands of all these dials.

The mechanism for indicating the periods of revolution of the planets in the astronomical work is so arranged that a special tube is provided for each planet, set in motion by a driving wheel on the inner orifice of the hand. The revolution of the tube, exactly corresponding to the period of revolution of each planet, causes the hands, which are furnished with stars and astronomical symbols, likewise to revolve. The earth hand is the first to strike the eye; it points out exactly the revolution of the moon round the earth.

The impulse for the lunar revolution is communicated through the entire length of the planet hand bearing the earth, and is

conceived and constructed in the most ingenious manner. The solar and lunar eclipses are plainly indicated by this device.

The movements of the mechanical figures are carried out in the following order: Every day at noon when the sound of the hour strokes, which the symbolical figures of Youth and Manhood accompany with blows from a hammer, has died away, the boy plays a pastoral melody. He has a repertoire of six pieces. After this a peal of bells is started; these bells play three tunes, which may, if desired, be transferred to the music-drum, provided that not more than 16 notes are required, this being the number of bells. While the first piece is being played these figures appear in the left central field: St. George, Rudolph of Haps-

PAINTING ON SLIDE OF CLOCK.

(Representing the grief of Anton Pohl after destroying his own great work.)

burg with the priest and Adam and Eve.

With the second piece the figures in the central field to the right show themselves; these are the three Holy Kings (Wise Men of the East) before Mary on her throne, and the Holy Family on their flight to Egypt. During the performance of the third piece all the figures appear once more, and the cock crows and flaps his wings.

The clock is driven by eight weights. The pendulum rod is made of ash wood previously boiled in hot oil; the pendulum, therefore, has a remarkable capacity for resisting the effects of change of temperature and damp. The manufacturers fit these wood pendulums to all large clocks, and consider them superior to the compensation pendulum. The ball of the pendulum weighs exactly 50 kilograms.

The playing work is provided with an iron drum 70 centimeters in diameter and 80 centimeters long. The notes are easily adjustable, and 11,520 pins can be inserted in the note cavities. The 16 bells of the music work, each of which has two hammers, weighs 300 kilograms; the weight of

entire works is about 28 metric centimeters. The total cost of the reconstruction amounted to 17,000 marks (\$4,250), a moderate sum when the difficulties of the work are considered.

The citizens of Olmütz have reason to be proud of the work. The time required for completion was considerable. Even the elements contributed to impede its progress by throwing the concealing scaffolding to the ground, so that the unfinished work stood exposed to public view. Every difficulty has now at last been overcome, and Austria possesses another interesting art memorial.

The repairers of the clock, Messrs. Korfe, also deserve the highest credit for their work, for not only have they solved a difficult problem with complete success, but the clock, in the opinion of experts, is a remarkably beautiful and enduring one. Inquiries to come it will, unless destroyed by some unfortunate accident, bear eloquent testimony to the skill of the German firm.

FOUR'S NOTE.—There is a tradition that Anton was blinded upon the order of the Council of the City of Olmütz so as to prevent him from making a similar work of art anywhere else. Regarded at this ingratitude, the master, deprived of his sight, under the pretense of wishing to create something in the mechanism, is said to have asked to be led to the clock, which opportunity he is supposed to have utilized to destroy the whole work by twisting or cutting a wire. Similar traditions exist with reference to other clocks, as the one in Strasburg, that of Besse, etc. They have been dramatized and used in story form by various authors, but we take them "with a grain of salt." It seems sufficiently refuted in this case by the fact that Pohl subsequently constructed a similar clock in Breslau and that the Olmütz clock kept running satisfactorily until 100 years after its installation, although others seem to have kept it in operation according to the records.

Magnetism in Chronometers and Watches.

(Continued from issue of Oct. 6.)

MAGNETISM as a branch of electrical science is highly interesting and useful, and forms an almost inexhaustible field for the average mind. By the watchmaker, magnetism is to be avoided as far as possible, which is very difficult to do with the greatest care. Small oblong tools often become spontaneously magnetic when placed for a long time in a particular direction. In connection with this are quotations from Boenditch's Navigator which are interesting:

It was many years after the discovery of the compass before it was suspected that the magnetic needle did not point accurately to the north pole of the world; about the middle of the 16th century observations were made in England and France which fully proved that the needle pointed to the eastward of the true north. This difference is called the variation of the compass and is named east when the north point of the compass is to the eastward of the true north, but west when the north point of the compass is to the westward of the true north. The quantity of the variation may be found by observing with a compass the bearing of a celestial object in the horizon (or, as it is called, the "magnetic amplitude"). The difference between this and the true amplitude, found by calculation, will be "the variation."

The same may be obtained by observing the magnetic azimuth of any celestial object when elevated above the horizon; the difference between this and the true azimuth, found by calculation, will be the variation.

Some years after the discovery of the variation, it was found that it did not remain constant, for the easterly variation observed in England gradually decreased till the needle pointed to the true north, and then increased to the westward.

As all the courses steered by a compass must be corrected for the variation to obtain the true course, it is of importance to the navigator to know how to find the variation at any time.

If the needle of a compass is exactly balanced on its point in a horizontal position and then the magnetic virtue communicated, it will point toward the north and will also be inclined toward the horizon, the north point of the needle tending downward and the south point upward in northern climates, while the contrary will occur in southern climates. This inclination of the needle to the horizon is called "the dip of the magnetic needle," which is different in different places, though it has been found to remain nearly in the same place since its discovery in the year 1576, in which year, at London, it was 71 degrees 31 minutes; in 1723 it was 74 or 75 degrees, and in recent times it was 72½ degrees.

Messrs. Humboldt and Biot published a method by which the dip may be calculated for any given place in north latitude with a considerable degree of accuracy. According to this theory, there are two magnetic poles, one in latitude 79 degrees one minute N. and in longitude of 27 degrees 42 minutes W. from Greenwich; the other is diametrically opposite in the latitude 79 degrees one minute S. and in longitude 152 degrees 18 minutes E. The great circle of the earth 90 degrees distant from these poles is called the magnetic equator.

In the magnetic equator the dip is nothing, and at the poles it is 90 degrees; at any other point of the surface of the earth the dip varies with the distance from the magnetic pole. This distance may be calculated by common spherical trigonometry by measuring the distance on a terrestrial globe from the magnetic pole to the place for which the dip is to be calculated. The dip was calculated on these principles for 20 places in Europe, Asia, Africa and America, but at Spitzbergen the difference was between four and five degrees.

(THE END.)

Five wheels and a small battery virtually constitute the mechanism of a wonderful clock just invented in England. It will run three years without attention, and at the end of that time all that is required is to attach a new battery. Another new English clock enables the possessor to ascertain at a glance the mean time, the meridian, and relative position of every part of the empire, besides being able to witness the actual speed and direction of the earth's rotation. The motive power is a clock in the base of the stand, and the apparatus requires winding only once a week.

Weight and Size of the Balance.

THE regulating power of a balance is measured by its mass or its weight at the circumference, multiplied by the square of the speed.

The effective or useful weight in a balance is that situated away from the center; that is why care is taken to use the thickest rim possible and even to make it heavy and load it with screws. For the same reason the dimensions of the core and of the arms are reduced as much as possible. The speed is measured by the distance covered, within a given time, by a point on the circumference of the balance.

If, therefore, says *Revue Internationale de l'Horlogerie*, the diameter of a balance is increased, its regulating power will increase in the same ratio; large balances are consequently preferable to small ones. If two balances of equal weight, moving at an equal circumferential speed, are of unequal size, their regulating power will be the same; but the larger balance will have the advantage of being exposed to less friction, for its angular motion will be smaller. In fact, the latter's arc, measured at its circumference, will correspond (on equal distances covered), to a smaller number of degrees than the arc described by the smaller balance.

It is better to use the largest balance possible and relatively light, making quick vibrations, than a heavy large balance making slow vibrations.

Given the diameter of a balance and the number of vibrations to be performed, it is better to make it travel over the great arcs by making it lighter than to increase the mass at the expense of the speed.

If two balances are of equal power their weights will be in inverse ratio to the square of their speeds.

If two balances have equal weights, but unequal speeds, their powers will be in the same ratio as the squares of their speeds.

If the speeds are equal the powers will be in the same ratio as the weights. If the weights and the speeds are unequal, the powers will be in the ratio of these weights multiplied by the square of the speeds.

With the help of the principles just explained, after we know the weight of a balance, its diameter, its speed, the force that keeps it in motion, we shall be able to deduct the new conditions required by any other balance of different weight, diameter, speed and different impulse.

All balances can scarcely be of the same weight and size, for these two elements are governed by several proportionate laws arising from the motive force and the dimensions of the depth or glass and from other data equally variable.

The determination of the weight and of the diameter of the balance has, therefore, been, and still is, the subject of more or less uncertain investigations.

A thief recently hurled a brick through the large plate glass show window in the store of E. E. Chandler, Boone, Ia., and stole 10 gold watches valued at about \$250. Notwithstanding the fact that the jewelry store is located only three doors from the police station there is no clue to the thief.

DON'T WASTE YOUR BREATH

attempting to sell at a profit the identical goods that the Mail Order Man sells. He will beat you nearly every time.

"Turn the tables" on him and sell the goods you know he cannot buy.

The **SOUTH BEND WATCH** has never been sold to Mail Order Houses, Department Stores and such unfair competition, and it is guaranteed to give your customers satisfaction.

You can buy them complete, timed in the case, or **SOUTH BEND CASES** and **MOVEMENTS** separately. It is a great convenience to you to buy your cases and movements direct from the factory.

It will mean increased business to the Dealer who carries a line of these cases in his stock. Our line will be sold exclusively through the Dealer and Jobber. In offering our goods for sale, you will not be up against the competition of Mail Order Houses.

Drop us a line for description and prices. You will find both interesting.

THE PENNSYLVANIA WATCH CASE COMPANY YORK, PA.

The "Monastery"

We constructed the "Monastery" works with a view of competing with a weight movement against inferior spring works. Our success has been great. The weight "Monastery" construction, chain wind, is of such excellent quality in every respect and offered at such a reasonable figure that it is out of question to-day to offer any hall clock above \$50.00, with long pendulum spring works.

A genuine Grandfather clock has always a weight movement. And we will state that any chiming Hall clock made up with a cheap spring movement can never be satisfactory. The hammer blow is too weak to get the tone out of good hells; only thin, light hells can be used with the little blow of the hammer; every day the spring gets weaker and the chiming slower; it even ceases after 5 or 6 days. Besides, in such cheap affairs the dial works are not suitable for quarter chiming. The combination makes a very poor clock. Not so with the "MONASTERY," which are heavy, powerful brass works, with solid steel pinions and huilt as a good weight chiming movement should be constructed.

The illustrated model is a fine piece of furniture, fit for any residence, and can be obtained with three combinations of striking:

1. With five 1 1/4" tubular hells, (made and tuned by Mr. R. H. Mayland (Westminster chimes); list.....\$180.00
2. With five rodgongs, also Westminster chimes; a feature in this combination is that the hour is struck on 4 gongs which, being tuned in a chord, produce a sound which is the nearest imitation of the distant resonance of a big tower hell; list... 151.00
3. Hour and half strike on 4 rodgongs, tuned in a chord; list..... 104.00

Prices F. O. B. New York.

"YOU HAVE CERTAINLY SOLVED THE OIL PROBLEM"

Is what watchmakers are writing us every day—it is what one of the best known and largest jewelers in New York City wrote us—at the same time telling us that poor oil had cost him over \$5,000.00 last year on account of work being done over without charge.

Haven't you been up against the same condition? You're the exception if you haven't had to clear hundreds of watches and clocks without charge within the year after they had been turned out as repaired.

It's your own fault if you do it hereafter, because you can get an oil now which will not gum, will not evaporate, will not discolor or become rancid, will not corrode the pivots. It is

Fulcrum Watch and Clock Oil

and it is the only watch or clock oil ever known which is absolutely free from acid, AND WE CAN PROVE IT.

FULCRUM OIL sells at 35c. per bottle, or \$3.75 per dozen and can be obtained from all material jobbers.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

The Witches' Hallowe'en Trip to the Moon.

A Display designed expressly for The Jewelers' Circular-Weekly.

HALLOWE'EN offers the jeweler a chance to decorate his window with a great many interesting and attractive devices which may be sold at a moderate price. Crêpe paper, for instance, can be bought by the yard very cheaply, on which there are printed witches, bats, moons, etc.

down again. These can be bought as large as two feet high. A watch can be attached to each of these, and it is suggested also that all the watches, and especially the large center clock, be stopped at "the witching hour" of 12.

The cut-outs of the bats can be bought

tage of the opportunity to show a line silver-backed hand mirrors. The rest the display can be made up of various charms, pins, buckles, souvenir spoons, rings, crosses, etc.

Lastly, some "wise old owls" may be used to fill in vacant spaces, as between candelabras in the picture. These can be bought ready-made.

If rightly managed, this ought to be a showy, interesting and timely window

Business "Bewares."

BEWARE of the man who ridicules everything and everybody.

Beware of the man who talks mill and borrows money for lunch.

Beware of the man who goes to church simply through force of habit.

Beware of the man too proud to learn. Beware of the man who thinks always of his own comfort only.

Beware of the man who distrusts and disbelieves every member of his race.

Beware of the man who does not stop to drink or work.

Beware of the man who shuns all human society.

Beware of the man who speaks ill of every woman.

Beware of the man who accepts hospitality and then gossips about it at home.

Beware of the man who tries to set a monument for himself out of the teeth of his fellow-men.

Beware of the man who smiles in your presence and sneers in your absence.

Beware of the man with a spine like a rubber hose.

Recent Window Displays.

A NUMBER of original displays were seen during the recent Hudson-Fulton celebration in New York. The most noteworthy was seen in a large show window on Broadway and consisted of a model of a biplane and one of a monoplane with their wooden propellers whirling around at great speed. The pianist was seated at the wheel and apparently enjoying to its fullest his trip through the air. A working model, crude, of course, of the great Zeppelin dirigible and a model of a smaller dirigible were also shown. All the models were suspended in the air against a ground painted to represent the sky.

AN ORIGINAL ALL HALLOWE'EN WINDOW DISPLAY FOR THE JEWELER.

These can be cut out of the paper used as it is.

In the illustrated suggestion for a window the centerpiece, a large "jack-o'-lantern," is made of paper on a wire frame, arranged to admit an incandescent electric light. These, when illuminated, have a startling effect. They can be procured in any size. Smaller paper "jack-o'-lanterns" may be used as candle shades, and a special shade is made decorated with black witches.

In the window shown herewith it is suggested that the background curtain be white in order to give a startling contrast to the black witches sailing up to the moon and

ready-made, if so desired, and the decoration of the brilliantly colored Autumn leaves can be bought also already strung up with wire for use.

The foreground covering might appropriately be made of some reddish-brown or other dark Autumn tint for the display of jewelry.

The tripods, or witches' caldrons, on the sides can also be bought cheaply. These should be filled with small jewelry, with chains overflowing, and "fires" of precious stones underneath.

As mirrors are used in a great many games, etc., the jeweler may take advan-

Storekeeping Department.

The Suggestion Case.

By XENO W. PUTNAM.

Do you ever try a "suggestion case" just inside your door? The idea is a better one when properly carried out, for it gives the undecided customer the help he needs.

It should occupy the same position in relation to the show window that the latter occupies to the newspaper advertising; it explains the subject and goes more into detail. It is also somewhat similar in nature to the suggestion case, but is more specific in treatment and therefore more personal in its appeal. To the maker of gifts it is particularly helpful and any jeweler knows that he probably handles a larger proportion of gifts in its regular business than any other except perhaps the bookman.

It should range in the case an attractive sample of the various articles kept in stock that are most appropriate for gifts, as that is where the largest number of customers are to be found. The season of the year, of course, must influence the contents. For the next few weeks the Summer gift must be in evidence; the bits of jewelry suitable for Summer outings. A little later the holiday gifts begin to come in gradually until just before Christmas the suggestion case should be filled with suitable gifts of the greatest variety. When no particular season goods are quite in order for holiday gift suggestions are always timely. In fact, there is no season of the year when some sort of gift goods are not in demand.

Keep the case filled with the daintiest of gifts but representing a good range in price. Let it be presided over by some one who is specially familiar with the matter, as a customer here is far more likely to desire assistance than some one at the regular counters in quest of a definite article.

The gift purchaser may or may not have an idea what to select. In either case a well displayed gift goods is a welcome assistance; the finding of all that is most suitable and daintiest brought together for convenient inspection. Sometimes the collection on itself will solve the problem but often the assistance of the clerk is needed. Get a really competent clerk, with such a display of gift goods under direct inspection may relieve the customer of much perplexing drudgery.

The suggestion case should always be kept up-to-date and always busy. Teach the public that they may depend upon your assistance on all occasions and then do not disappoint them by letting it grow stale or out of season. Keep it constantly new, bright, fresh and dainty, and always suggestive. Do not permit some one article to crowd out the needed variety. Remember that this case must cater to all tastes. Do not attempt built-up designs which to attract attention, as in the show window. This is the next step beyond, and the attention has been secured, and it is necessary to show goods from their individual standpoint instead of through their collective effect. The only display

allowable here, and that should never be omitted, is a placard announcing that "Perhaps the gift you are looking for is here. May we show you?" or something of that nature.

When backed up by good management and efficient clerks, the suggestion case will be found one of the most effective methods of store advertising and will at the same time be a method for which many of your customers will thank you heartily.

Selling Arguments Used by Retail Jewelers.

GOOD Watches. You can't go wrong in selecting that watch you are thinking of getting from our stock. Should you have

The Retail Jewelry Store of A. W. Newman, Binghamton, N. Y.

ILLUSTRATED below is the retail jewelry store of A. W. Newman, 18 Chenango St., Binghamton, N. Y. This store measures 48 feet in length and 18 feet in width. The ceiling is of steel and is painted white. The fixtures, including the show cases, are all of mahogany and present an attractive appearance.

The concern has one show window, six by four feet, which is brilliantly illuminated by means of arc lights. This window has plate glass mirrors in the back and at the sides, which thus enhances the beauty of the display and make the window space ap-

INTERIOR VIEW OF THE STORE OF A. W. NEWMAN, BINGHAMTON, N. Y.

any particular make or grade in mind you are pretty sure to find it here—and at a reasonable price as that watch can be sold for. If you don't quite know what watch to buy, the best movements are here for your comparison. We especially recommend the Hamilton watches, \$12 to \$50, for exacting service. New England popular priced line, \$2 to \$10. Renaud, Keokuk, Ia.

On the face of it, our statement that you cannot get better watch repairing in town than from us may strike you as blowing our own horn. After the accident bring it here and we will make it like new. We employ only the best of skilled and experienced workmen in our watch repairing department. Virgin & Young, Macon, Ga.

Diamonds and pearls in gold and platinum mountings are still the most prized effects of fine jewelry. Our designs embrace a very large line of artistic creations. All mountings are hand-made, insuring entire security in holding the stones. While offering goods of such exceptional quality our prices are most moderate, and we guarantee all precious stones to be exactly as represented. Don't neglect to look over our stock, as it is most choice and complete. I. M. B'itz, Topeka, Kans.

pear much larger than it really is. Maple wood is used for the flooring.

The store is illuminated by means of gas and is also wired for electricity. Besides an extensive line of jewelry, the firm carries a line of leather goods.

Storekeeping Philosophy.

THE world cares little for what you believe. It's what you do that counts.

When in doubt, use old-fashioned common sense.

It is the clerk who is always trying to more than earn his money who becomes the owner of a store and the boss of other men.

Make your show window a show window. A circus without spice and novelty is no circus at all.

Your house is built of bricks. Your business is built of details. The soundness of the whole depends upon the soundness of the part.—*Business Philosopher.*

The store of E. E. Chandler, Boone, Ia., was robbed of \$250 worth of watches recently. A brick was cast through the window.

ALEXANDER H. REVELL & CO.

Dayton and Eastman Streets

"BEGIN NOW"

To beautify your store for the holiday season of 1909 and 1910. A new set of fixtures will bring that increased business. Our "Quarter of a Century" experience "is yours for the asking."

Write us to-day for copy of our new loose leaflet catalogue and let us quote you prices.

The Proof of the Pudding

The proof of ability in any line consists in doing the things that others have failed in doing.

This we have done repeatedly, and can furnish the proof.

We sold \$20,300 in one sale where another auctioneer had thrown up his hands after selling only \$3,000.

In another sale we sold three times as much as the combined sales of two other auctioneers, and realized much better prices.

We have repeatedly taken dead sales—the result of the work of incompetent auctioneers—put new life and vim into them, and closed out the stock at a profit.

However, it is not the large amount of goods sold that counts so much as the net results in the profit and loss account—the small amount of new goods used, compared to the percentage of your goods, and your dead stock in particular, that are disposed of, and that larger and more important question of the after effects of your auction sale upon your customers, and, consequently, upon your future trade.

We believe we have solved the problem of how to conduct an auction sale so it will be to your profit, in both dollars and cents, and in the building up and permanency of your regular business.

We will furnish you evidence that sales, at this time of the year, when regular business is dull, can be made as profitable as during the seasons when regular business is booming.

We would be pleased to talk with you about it.

NEW YORK

RETAIL JEWELERS ADVERTISING

How to Go About Selling Goods by Advertising.

By Geo. Frank Lord, in *Printers' Ink*

UNTIL within recent years most successful advertising men believed their success was due to a sort of sixth sense—inborn—that ordinary mortals could not hope to attain. And in a recent editorial on advertising appearing in a New York newspaper and presumably written by the advertiser-manager this ancient fallacy is again re-negated.

Advertising ability is in the same category as clairvoyance, those who believe they possess it should be greatly comforted, and their unfortunate aspirants for success in advertising should be duly discouraged. It is not true. The ability to sell goods through "salesmanship in writing" can be learned as readily as ability to make arithmetical calculations, or to build houses, or to conduct farming on a scientific basis.

Professional advertising men do not depend on *inspiration* for ideas and plans of campaign. Whether consciously or not, they work by *method*. And their method is learned and successfully used by any man of average education and common sense. The purpose of advertising is to *sell* something, whether it be merchandise, services or opportunities, necessities, utilities or luxuries.

Good advertising consists of an efficient presentation of the selling points of the article or proposition to be sold to possible buyers. Hence, when an expert advertiser is confronted with a selling proposition to be advertised, he first considers whether the salability of the article, does the demand for it exist, or must it be created; who needs, wants, or could be made to want it; how best can these possible buyers be reached, and what is the most efficient and economical method of bringing to the attention of the article to their attention. The conclusions at which he arrives after considering these points—and certainly any advertiser with commercial common sense and a large knowledge of people and affairs can form such conclusions—constitute the plan that determine the kind of an advertising campaign to be conducted. No inspiration or intuition is required thus far, but a method or analysis—a scientific selection and grouping of facts.

The next step is to analyze the production and motive forces that can be brought to bear on the execution of such a campaign. What are the manufacturing and financial resources of the prospective advertiser? How extensively can he afford to advertise? How much business can he sell? How fast can he deliver goods, direct to purchasers or through dealers? How many dealers has he? Where

are they located? What territory does he cover or want to cover?

The conclusions arrived at regarding these points indicate the extent of the proposed campaign and also throw further light on the kind of campaign. It will be noted that he is still proceeding along exact and scientific lines.

Next comes the selection of mediums and apportionment of the advertising appropriation among them. The only qualifications for expert work along this line are knowledge of quality and quantity of circulations, and economical methods of buying and using space. Any one can acquire such knowledge.

Finally, he comes to the actual preparation of the copy—the writing and designing of the ads. "Ah!" you say, "here is where genius is required." But you are wrong. We are accustomed to ascribing to genius, clairvoyance and miracles any performance that we can neither do nor understand. And just as the marvelous results produced by the mythical Sherlock Holmes proved ridiculously simple when his scientific methods of analysis were understood, so the mystery of successful ad-writing vanishes before the light of reason.

The successful ad. must attract the attention of possible buyers, create desire in their minds for the article advertised, and induce them to write or call, or perform some other action leading to a purchase of the article. In general terms that is all there is to ad-writing. The rest is purely a matter of detail that can be mastered by any one with sufficient analytical ability to do an example in fractions or elementary algebra.

To attract the favorable attention of prospective buyers is simply a matter of placing in carefully selected mediums a pleasing illustration of the article or one of its selling points and a strong headline.

Creating desire consists merely in describing the selling points of the article or proposition in such a manner as to appeal to the common needs or desires of mankind and the special requirements of the class for whom the article is intended. The determination of selling points and distinctive features is the important prelude to an effort to create desire. And analyses of articles to ascertain their selling points is strictly scientific work rather than genius. The method is very simple, but requires thought and trained merchandising perception.

Producing action leading to a purchase is largely a matter of informing the reader how and where the article may be obtained,

how to distinguish it from other or similar articles, and making it easy for him to order or purchase it.

The advertising man who says, "The longer I am in the advertising business the less I feel I know about it" is a self-confessed incompetent. Invariably it will be found that he works without method, and is a subscriber to the "ancient and honorable" fallacy that "advertising men are born, not made."

What Some Jewelers Say.

THE beauty of cut glass made by skilled artisans, in every way symmetrical, sparkling, brilliant, beautiful. A few specialties in carved crystal worthy of your attention are vases, jugs, glasses, bowls and trays. Frankly, we do not think you can afford to miss this exceptional opportunity. Virgin & Young, Macon, Ga.

In the foreground is where we seek to be. No wall flowers or dark alley objects for us. In the foreground, and foremost in estimation of best judges is the finest stock jewelry in town now to be seen here. Don't take our word, but come and see. Critical judges, as well as experts, all advise to buy of us. Do it. Privett & Co., Wilson, N. C.

Why not? Invest in a diamond ring. Just as practical as presenting a bank account when your gift is a diamond. That is if you buy it right. We have a beautiful assortment—stones of first water—beautifully cut. We know you will fully appreciate the values if you talk with us. Kinsel & Petri's, Columbus, Ga.

Herschede Diamonds.—No gift pleases more than diamonds. Purchasing the precious and semi-precious stones at initial sources, and making unique diamond set jewelry, enable this establishment to offer excellent inducements. Original designs are submitted. Some minimum prices are: Single stone rings, \$50; two and three stone rings, \$100; dinner rings, \$125; all-diamond clusters, \$150; La Vallieres, \$50; pendants, \$75; bracelets, \$60; Dutch collar pins (bar), \$40; earrings, \$80; lockets, \$35 sleeve buttons, \$25. Equal inducements offered in the higher values. Selections will be sent out of town on approval. Insured in transit. Silversmiths, jewelers, goldsmiths. The Frank Herschede Co., Cincinnati, O.

Diamonds, "the best gift of all." We believe that every one would be glad to have a diamond, and our reasons for thinking so are these—they are constantly increasing in value, having more than doubled in price in the last eight years. We believe the advance will continue, for the supply is decreasing and the demand increasing. We think you should buy diamonds from us. Our reasons are that we buy in large enough quantities to deal directly with the cutters, thus eliminating entirely the wholesaler's profit. You can exchange any diamond bought of us for at least its full value as part payment on a larger stone. Every diamond we sell must be right in quality, color, cutting and price. Solitaire diamond rings from \$40 to \$1,100. The Ernsting Co., San Diego, Cal.

C. S. Kepner, Asbury Park, N. J., has sold out to George E. Moyer, of Trenton, who will move to the former place.

We Do Not Use Pressed Blanks

Hawkes Cut Glass

IS CUT FROM THE *SOLID* BLANK

No. 1.

No. 2.

No. 1 illustrates a pressed blank, *viz.*—the pattern pressed into the Glass.

No. 2 illustrates a solid blank, the kind entirely used by us.

The DIFFERENCE in the finished article is unmistakable, the pressed blank being devoid of lustre and brilliancy and giving one the idea of a cheap moulded article. It can easily be detected by passing the fingers lightly over the inside of the article. Wherever the cutting on the outside is defective a slight swelling on the inside will be noticeable to the touch. Whereas the genuine article cut from the solid blank is free from all these defects, being perfectly smooth on the inside, having a lustrous brilliancy only equaled by that of the diamond, and when held to the light is as clear as crystal.

Pressed or Figured Blanks Cut Over Appeal to the Department Store Trade

WE DO NOT SELL DEPARTMENT STORES

but cater exclusively to the legitimate Jewelry trade. In return we ask for the business of the Jewelers whom we are seeking to protect by furnishing genuine cut glass (not purchasable by department stores) at prices competitive with the inferior product.

No piece of HAWKES CUT

Devoted to Art Pottery, China, Marbles, Bronzes, Cut and Decorated Glass Ware, Bric-à-Brac, Lamps, Art Metal Wares, Fancy Goods and Kindred Lines.

The Collection of Old Wedgwood Presented by Isaac Falcke to the British Museum.

In a recent issue the *Pottery Gazette* of London again referred to the truly magnificent collection of old Wedgwood which has been so generously presented to the nation by Isaac Falcke. The donation has, of course, been acknowledged in no stinted words of gratitude by the authorities of the British Museum, on behalf of the public in a letter to Mr. Falcke. It has also been referred to in the press.

Mr. Falcke having received upwards of 50 complimentary notices, some of which are illustrated. The *Pottery Gazette* says that though there are many fine specimens of Wedgwood admirably displayed by the British Museum, and connoisseurs and students are pleased with the facilities afforded for inspecting these objects of their admiration, they will welcome with gratitude this substantial addition of choice specimens of original productions of Wedgwood to the national collection. Admirers of "Old Wedgwood" and they are more numerous than is generally supposed — will be glad to know that this fine collection is now available for their inspection.

We can remember other justly famous collections of old Wedgwood, notably the Anderson collection and the Tweedmouth collection," says our contemporary, "but we have no hesitation in saying that the Falcke collection, consisting of nearly 400 pieces, is the finest of them all. It is natural that it should be so. Mr. Falcke has all his life been an admirer of Wedgwood, and a collector of his wares. Fifty years ago he was one of the famous Bond St. dealers in art, and in the course of his business many specimens of old Wedgwood came under his notice. The best of them he did not sell, but added them to his collection, and many years he has had the satisfaction

of admiring them and of showing them to his friends. Few collectors have such opportunities of securing the object of their desire, and it was because those opportunities presented themselves to such an expert as Mr. Falcke that he acquired such an unrivaled collection.

PART OF THE FALCKE COLLECTION OF OLD WEDGWOOD IN THE BRITISH MUSEUM.

"Mr. Falcke was born in Yarmouth nearly 90 years ago. His father was a fine art and antique dealer, and when quite a youth the son acquired a strong partiality for Wedgwood, and amused some of his companions by saying he should 'form a collection.' 'What shall you collect?' they asked. 'Wedgwood,' he replied, and they laughed still more, as they knew he had very little money. However, a short time after he bought a small piece of Sèvres and showed it to them in triumph. As he told us of this incident Mr. Falcke opened a glass case, and, taking out a small covered box or jar and placing it in our hand, said, 'And there it is.' This was the first item in the now famous Falcke collection

"In due time Mr. Falcke, with his brothers, succeeded their father in business and removed to London. They eventually settled in Bond St., and it was there the best of their business was done. Like other dealers, he used to make frequent visits to the Continent, where many beautiful things could then be purchased. Fifty years ago he retired from business, and he and his wife, who is also an enthusiastic lover of Wedgwood, lived quietly in Gower St., traveling a great deal, and when in London devoting their attention to their favorite subjects — antique ceramics generally, and Wedgwood particularly.

With them the collection of Wedgwood is not a mere "hobby" — it is the outcome of an intelligent appreciation and a hearty admiration. It has been a real pleasure to them to form this collection, and they have enjoyed caring for it and showing it to their friends, and even to strangers who have asked to inspect it. It has always been their desire that others should share their gratification, and, with this in view, the collection was lent for exhibition at Crystal Palace in 1857, and to the South Kensington Museum in 1862. It was exhibited at Leeds in 1868 and at Bethnal Green Museum in 1857, 1876 and 1877, after the removal of the famous Wallace collection. It was shown at Liverpool in 1879, at Guelph Museum, in 1890, and at the Burslem Centenary Exhibition in 1895.

"Mr. Falcke has always wished such of the public as cared to do so to participate in the joy he felt in contemplating the work of the 'greatest English potter,' and it was the knowledge that so much satisfaction had been given by the public exhibition of his treasures at different places that led him to contemplate presenting them to the nation.

"We had a most interesting conversation with Mr. and Mrs. Falcke on this question. They are a venerable couple. The gentleman is nearly 90 years of age and his wife

KALANA GLASS

AN entirely new and beautiful effect in etched glassware in which floral designs, such as pansy, lily, poppy, geranium, etc., are shown in an attractive manner true to nature. No illustration could convey the exquisite beauty of this ware.

During the dull times we have been preparing to meet the prosperity which we were certain would follow. You can now find among our samples many good things in Cut Glass, Engraved Glass and Rock Crystal for prompt shipment.

s years his junior, but both still possess their mental and physical faculties, except that Mr. Falcke is slightly deaf. All the references to their cherished collection were full of pathos, and when we remarked upon the personal sacrifice they were making in parting with it Mr. Falcke, with undisguised emotion, revealed the feeling by which they were actuated in disposing of it in the way they had decided upon. He said:

"The collection of these beautiful examples has been one of the joys of our long lives. It is a 'labor of love' and we have always had it as a collection for the unique art wares we have collected. In recent years we have been distressed by the thought that when it pleased God to take us away, the collection—the work of our hands—must be sold by auction, our long loved wares scattered to the winds, and as a collector I had of no more. To prevent this, we decided to present it to the nation, so that we now have the assurance that the Falcke collection would remain intact for all time. Conditions that would afford the present and future generations the opportunity of admiring and appreciating the best works of England's art potter. We are convinced that a close acquaintance with works of art is calculated to educate, refine and improve the tastes of the people. Another feeling, no doubt, largely influenced our decision. We wished to provide, besides being kept entire, the collection should never go out of England. We are now satisfied in knowing that these contingencies can never occur."

The collection will soon be open to public inspection, judiciously arranged under the capable direction of C. H. Read, who is in charge of the Department of British and Medieval Antiques at the British Museum. Mr. Falcke remarked, Mr. Read will be a careful foster-parent, and his courtesy to lovers of ceramics who visit his department is proverbial.

We give an illustration of part of one of the rooms at Gower St., in which the Wedgwood collection was displayed. This is a reproduction of a photograph kindly loaned to us by Mr. Falcke. Some of the objects of the collection will be easily recognized, particularly the Barberini or Portland vase standing on the center table. The history of the vase and of Wedgwood's reproductions is too well known to need further reference here. This is a splendid vase, and is marked No. 4, being the fourth produced by Wedgwood. It is of the finest beauty for undercutting, light and delicate. It was from the collection of Mrs. Laurence, of Ealing.

The collection contains many pieces that are unique, and among them 20 plaques and medals all signed by John Flaxman, whom Mr. Falcke describes as 'England's greatest sculptor.' The most notable of these are the plaques or tablets, 'Mercury Uniting the Kingdoms of France and England' and 'Peace Preventing Mars from Opening the Gates of Hell,' both signed by Flaxman. These medals are produced in white china and ball clay, and are the original models in which the Jasper plaques were produced. The *bas reliefs* are historical, and were executed by Flaxman at Wedgwood's request to commemorate the treaty of commerce between France and England in 1786. Another important work by Flaxman is a life-size bust of Mercury in black basalt, 12 inches high. Mr. Falcke regards this as Flaxman's masterpiece. Respecting this, Flaxman wrote to Wedgwood, 'You did me the honor to praise my "Bust of Mercury,"

the cast of which I hope you will favor with a place in your studio as one of the highest gratifications you can bestow on its sculptor.'

"The *bas relief* of 'Esculapius and Hygiea' is a choice piece. It is 8¼ inches high and 6½ inches wide, in mazarine blue jasper and white relief. It is taken from a *bas relief* in the Museum at Rome. As we saw it on the wall of Mr. Falcke's room it showed signs of having been broken and repaired. Mr. Falcke explained that he obtained it from a dealer's shop in Hanway St. more than 50 years ago, where he found it broken and thrown away on a rubbish heap. He gave 3s. 6d. for it, and had it repaired as we saw it. It is a relief of incomparable beauty, and Mr. Falcke believes it to be unique.

"Every piece in this collection is worthy of notice, and in due time no doubt we shall have a descriptive catalogue furnished by its new owners. The value of an art collection depends entirely upon the qualification of the collector, and it is this fact which should enable us to estimate the artistic worth of the nation's new acquisition. Mr. Falcke was the Nestor among collectors, and as a collector we may be sure he retained nothing that was not genuine, and the best of its kind. He is the possessor of a very rare collection of Greek, Roman and mediæval bronzes and plaquettes, and a charming collection of Oriental china. But as a collector of old Wedgwood he has had few equals, no superior. There is probably no higher authority on old Wedgwood than Miss Meteyard. She edited 'Memorials of Wedgwood,' 'The Wedgwood Handbook,' 'Wedgwood and His Works' and 'A Catalogue of Wedgwood Manufactures.' When Miss Meteyard published her well-known 'Choice Examples of Wedgwood Art' she selected 16 specimens from Mr. Falcke's collection to illustrate it. This is the high-water mark of approbation of his skill as a collector, and we may estimate the value of his magnificent present to the nation accordingly."

Official Invitation to Participate in Roubaix Exhibition.

Pierre Lefevre-Pontalis, chargé d'affaires of the French embassy at Washington, informs the Government of the United States that an international exposition is to take place at Roubaix, Department of the Nord, in 1911, under the official patronage of the Minister of Commerce and Industry. This official notice comes with the statement that "the Minister of Foreign Affairs has asked him to announce that the French Government would be glad to have the United States Government take part in this exposition." The organizers of the exposition suggest that if a number of American firms desiring to exhibit should send their goods in charge of a commissioner-general they would find a real advantage in displaying their products. A programme, in French, showing the different classes and conditions of the exhibition is on file in the Bureau of Manufactures.

Henning & Koch, Ann Arbor, Mich., have dissolved, Wm. Henning continuing alone. M. F. Akers, Rawhide, Nev., recently moved to Lewiston, Idaho.

The American Pottery Industry of 1908.

A REPORT on the statistics of the clay-working industries in 1908, by Jefferson Middleton, has just been issued by the United States Geological Survey as one of its "mineral resources" series. The portion of this report devoted to the pottery industry shows that in 1908 the value of the pottery products of the country was \$25,135,555, a decrease of \$5,007,919, or 16.61 per cent., from 1907. This was the lowest value reported since 1902. Notwithstanding the loss in value of product, domestic wares supplied 72.54 per cent. of the entire consumption of the country, the highest proportion ever reached except in 1902.

"Pottery" in this report embraces not only the common household "dishes," but all kinds of ware turned on a wheel, such as flower pots, stoneware and yellow and Rockingham ware, also sanitary ware, bath tubs and porcelain electrical and hardware supplies.

Thirty-seven States report hardware supplies, Ohio being in the lead with products valued at \$10,706,787, or 42.6 per cent. of the value for the whole country. New Jersey was second, reporting wares valued at \$5,949,991, or 23.67 per cent. of the whole. The third State in value of products was West Virginia, which reported pottery valued at \$2,083,821, or 8.29 per cent. of the total.

The commonest grade of pottery—red earthen ware (flower pots)—was reported from 30 States, the total value of this ware being \$757,900, which was \$87,565 less than the value for 1907. Massachusetts is the largest producer of this ware, reporting it to the value of \$150,148.

The variety showing the greatest loss—none showed a gain—was the general white ware, comprising table and toilet wares, including so-called cream-colored ware, white granite, semi-porcelain ware and semi-vitreous porcelain ware. This class of ware decreased from \$13,913,680 in 1907 to \$11,474,147 in 1908, a loss of 17.53 per cent. This product was reported by 68 potters. The higher grade china, including bone china, delft and belleek ware, showed a decrease of \$349,649, or 18.11 per cent., from 1907. Only 16 potters report this grade of ware.

Of the two leading pottery centers of the country, Trenton, N. J., and East Liverpool, O., the former reported wares valued at \$5,649,472 and the latter \$4,050,384, these two places reporting 38.59 per cent. of the total value of the pottery for the entire country. Trenton alone reported nearly one-fourth of the total—22.48 per cent.

The imports of pottery showed even a greater proportionate decrease in value from the 1907 figures, the loss being \$3,062,821, or 22.54 per cent. Of this decrease \$3,019,973, or over 98 per cent., was in general or white ware.

The exports of American pottery were valued at \$983,760 in 1908. Of this total \$906,286, or 92.12 per cent., was in earthen ware and stone ware and \$77,474, or 7.88 per cent., in high-grade ware.

Bowlby & Ferrig, Omaha, Nebr., have dissolved. C. W. Bowlby will continue the business alone.

Your Interest And Ours

This is the beginning of a somewhat unusual series of talks designed for your profit and ours.

Our commanding position in the Gold and Silver world gives us a right to address you, for we speak with authority, knowing whereof we speak.

This authority is in no way self-assumed but is freely accorded to us by the trade at large—in the largest degree by those who know us best.

Our interest will be your interest, and if we can show you that it is a profitable thing for you to buy your Gold and Silver from us and ship your Waste to us, our gain will follow your gain as a matter of course.

In these weekly visits we shall tell you frankly why and how we can serve you to your best advantage.

And this is exactly what we shall show to your satisfaction.

WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page. No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2347.—**Preventing Dross Alloying Metals**—How can I prevent excessive dross in melting and alloying metals?
P. D.

ANSWER:—The making of dross can be prevented by melting a small quantity of metal and gradually adding still smaller quantities, so that the melting pot contains the solid metal throughout the entire operation. Thus the temperature is kept below the fusing point, and as a much higher temperature is required to effect combination between the oxygen and nitrogen of the atmosphere, no dross is formed. The molten alloy is stirred briskly after removal from the fire and up to the moment of pouring in order to facilitate its absorption of heat from the hotter walls of the vessel and thus keep it, despite its comparatively low initial temperature, sufficiently fluid to be poured into the mold. The hardest melting metal should be melted first and the lesser one next, with the lowest melting last.

QUESTION No. 2348.—**Etching Varnish**. Please inform me how I can make an etching varnish, such as is used as a resist in etching silver or gold articles.
E. V.

ANSWER:—Etching varnish, or resist, is made with two ounces of white wax, one-half ounce each of black and Burgundia pitch. Melt together, adding by degrees one ounce powdered asphaltum. Boil until a drop taken out on a plate will break when cold. Pour into warm water and break into small balls. When ready to use, warm the metal to be etched, then thinly brush over the warmed liquid varnish. Another, which is called engravers' varnish, is made with yellow wax, one ounce; mastic, one ounce; asphaltum, one-half ounce. Melt together, then pour into water and break into balls. Use in the same manner as above.

QUESTION No. 2349.—**Varnish for Plaster Casts**.—I have a few plaster statues to which I want to give a coating of suitable varnish. What kind of varnish can I use?
V. P.

ANSWER:—A good varnish suitable for plaster is made by fusing over a fire one-half ounce of tin and one-half ounce of smelt, and adding one-half ounce of mercury. This substance, when mixed with the white of an egg, forms a beautiful varnish for plaster casts. Another simple way is to brush the statue with copal varnish; let it dry a while, and sprinkle with bronze powder.

QUESTION No. 2350.—**To Deaden Gilding**.—I have several pieces of brilliant gilding and I desire to make them look dull.
T. D.

ANSWER:—The brilliancy of gilding can be deadened with an amalgam, consisting of 46 parts of aluminate of potash and three parts of sea salt in five parts of water. Cover the gilded pieces with this amalgam, hold over a flame until the coating is almost transparent, then immerse in cold water; rinse with hot water and dry in sawdust.

QUESTION No. 2351.—**Blistering Acid-Colored Jewelry**.—My acid-colored jewelry blisters when soldering. How can I prevent this?
B. A.

ANSWER:—In order to solder acid-colored jewelry without blistering, cover the pieces with a paste of borax, boracic acid or rouge. When dry, scrape away the covering where the solder is to flow. This covering will protect the pieces somewhat from the heat and no blisters will form.

A Simple Method of Recovering Gold from Cyanide and Yellow Prussiate Plating Solutions.

(From the Brass World.)

THE recovery of gold from cyanide plating solutions has always been an unsatisfactory process. The method usually practiced by gold and silver refiners is to evaporate the solution to dryness and then melt the residue, but it is an expensive and unsatisfactory operation for the reason that gold plating solutions contain very little gold, and the cost of recovering it in such a manner is frequently greater than the value of the gold obtained.

The other method, frequently followed, of attempting to precipitate the gold by means of an acid is also very unsatisfactory, both for the reason that it fails to recover little, if any, of the gold and also gives off the dangerous hydrocyanic acid fumes. There is still another method often tried, and that is to deposit the gold on a strip of steel by means of the electric current. This method also fails to a certain extent, as it is very slow and does not remove all of the gold. The large excess of cyanide in the solution prevents the deposition of the gold completely.

The principle of the method about to be described lies in the fact that if metallic zinc is immersed in a cyanide gold solution, the gold is precipitated on the surface and adheres firmly. After a time, the gold is completely removed from the solution and the zinc may then be dissolved in sulphuric or muriatic acid, leaving the gold undissolved.

This method, of course, is not new, as it has been used in gold mining for a long time and is known as the "cyanide process." The principle is the same in mining, as the gold ore, from which the gold is to be extracted, is treated with a solution of potassium cyanide in water, which dissolves the gold completely. The solution is then treated with zinc, the gold precipitates upon it from which it is readily obtained. It is believed, however, that this method, although long and extensively used in recovering gold from lean ores, has not before been applied to the reclaiming of gold from plating solutions.

TREATING THE PLATING SOLUTION.

The gold plating solution from which the gold is to be reclaimed is placed in a stone crock or any other receptacle that may be desired. Large solutions may be treated in a tank. The metallic zinc used gives the best results if in the form of fine turnings, resembling curled hair, and in the gold mining industry, a special form of lathe is used for cutting slab zinc into such a shape. In case such turnings cannot be obtained, then sheet zinc clippings, granulated zinc, borings or any other form of finely divided zinc may be employed. The object is to expose the greatest amount of surface to the liquid and the zinc turnings are excellent, both for the reason that they expose the necessary surface and hold together well when the exhausted solution is poured off after the gold has been removed. In using the zinc, care should be taken to see that fresh surfaces are had. If coated with oxide, the zinc does not work as well.

The proportion of zinc used in the gold plating solution need not be exact as long as it is in excess, and the more surface exposed the more rapid the precipitation. From one to two ounces of zinc to one gallon of the gold plating solution will give rapid results. To extract the gold, therefore, take the following:

Gold plating solution.....	1 gallon
Zinc turnings.....	1 oz.

The turnings (or other convenient form of zinc) are placed in the bottom of the solution and allowed to remain for some time. Usually a few hours are all that are required for the precipitation, during which time the solution should occasionally be stirred in order to expose it to the zinc as thoroughly as possible. A good plan is to place the zinc in the gold solution during the day, stir frequently and then allow it to remain over night. In the morning the operation is completed.

When placed in the solution, the zinc first turns gold colored and then black, but the gold does not become spongy or non-adherent. It adheres tenaciously to the zinc, so there is no danger of its falling off.

It is unwise to allow the zinc to remain too long in the solution, as nothing is to be gained, and a white zinc salt is then formed, which interferes somewhat with the decanting of the solution. This white zinc compound, however, usually will not form under several days.

(To be continued.)

Henry McLaulin, Sanford, Fla., returned home last week from a business and pleasure trip to New York.

(See Text on Page 57.)

Alvin Deposit Ware

CRYSTAL COASTERS

The discriminating jewelers, those best qualified to appreciate Silver Excellence, have ever been our best patrons.

ALVIN SUPERIORITY is shown in the so-called "little points" which go so far to achieve elegance in style.

When you see a piece of deposit ware a little better than any deposit ware you have ever seen, you will find it is Alvin make.

ALVIN MANUFACTURING CO.

Silversmiths

52 Maiden Lane, New York

Much Better than the Law Requires

Recent United States Government assays of 14 Karat Gold Cases, made since the new stamping law went into effect, show that the cases of the Brooklyn Watch Case Co. assay **14.29 Karat Fineness.**

The Cases of ten different Gold Case Manufacturers assay as follows:

BROOKLYN WATCH CASE COMPANY . . .	14.29
.....	14.03
.....	14.02
.....	14.00
.....	14.00
.....	13.96
.....	13.88
.....	13.86
.....	13.82
.....	13.45

These assays include the entire case, with the exception of the crown and springs, the law requiring that the stock used in 14 Karat Gold Cases shall assay, including the solder, 13.50 Karat.

While most of these cases come within the law, you will note that the cases of the **BROOKLYN WATCH CASE COMPANY** assay **14.29**, which not only exceeds the law's requirements, but is of a **Higher Quality** than any of the others.

STORE OF A. F. HOFFMANN, ST. LOUIS, MO.

St. Louis, Mo.,
April 23d, 1909.

THE ARNSTINE BROS. COMPANY,
Cleveland, Ohio.

Gentlemen:—The Catalogs you furnished were an excellent piece of work and would be a credit to any store, likewise the ten thousand large four-page Christmas Circulars. These I had distributed in the section of the city tributary to my store and they brought excellent returns. They had the strength to draw the buying public to my store which made a very large increase in my business.

For ten years previously, I made my own Catalog, but in the future, will send out the ones you make; and the fact that I have just given you a large order for my Fall Catalog proves to you my faith and satisfaction in what you furnished me.

I am,

Sincerely yours,

A. F. HOFFMANN.

The Catalogs sent out by this firm in 1908 were made by The Arnstine Bros. Company

Let Us Send You
Samples and Particulars
They're Free
For The Asking

ALTON, ILL.,
Feb. 22nd, 1909.

THE ARNSTINE BROS. CO.,
Cleveland, O.

Dear Sirs:—Regarding your Catalog, I wish to say that I consider it a most indispensable necessity for a first class jewelry store. People are buying more and more every day from Catalogs showing the goods in the greatest demand and at the right prices. If your prices are not as low as some other Catalog, for an article that can be easily compared, your prices are not right. Therefore be careful not to illustrate an article that you feel the price might be high

The Arnstine Brothers surely have exceeded all others in the getting up Catalogs to the present day.

I remain,

Sincerely yours,

C. L. GOULDING

The Catalogs sent out by this firm since 1904 were made by The Arnstine Bros. Company

STORE OF E. H. GOULDING'S SONS CO., ALTON, ILLINOIS.

We are represented in every State in the Union. If you contemplate using Catalogs, and will notify us, we will have our representative call on you and explain our proposition.

Here's
To The
Good Old
Hudson River
Itself

SOURCE OF THE HUDSON RIVER

And The
Wadsworth
Twenty-Five
Year
"Pilot"

CELEBRATE Hudson and Fulton as much as you like, but as for us we take our hats off to the Good Old River itself. A river like this could not lie round loose without somebody discovering it. And the steamboat would have come in time anyway. We salute the HUDSON RIVER. We salute its waves and tides. We salute its teeming ships. We salute the Pilots who guide them. Speaking of Pilots

THE WADSWORTH 25-YEAR "PILOT"

Watch Case is no stranger on the Hudson River. Large shipments are constantly crossing to the great terminals. On the decks and in the cabins, passengers have this case in their watch-pockets. Stately ships carry them to the ends of the earth. Four of these cases would have lasted the hundred years recently celebrated. Order the Wadsworth "PILOT".

IMPROVED BEZEL AND WHEEL CHUCK No. 26

CUT IS FULL SIZE.

Larger capacity for holding work and improved construction. Will hold wheels or plates from 3 mm. to 52 mm. Bezels, rings, watch cases, etc., from 13 to 62 mm. State name and size of lathe when ordering.

Price, Each, \$9.00

ROLLER REMOVER No. 60 (Patented)

A thoroughly efficient and quick acting roller remover. The work is always plainly in sight. The roller is held in the grooved jaws of the tool. The adjustable head which holds the screw is quickly brought into position over the staff and the most obstinate roller will instantly yield to the gradual pressure of the screw.

Nickel Plated, Each, \$1.50

SCREW DRIVER No. 112

With Special Clamp and Two Blades

Use the screw driver like an ordinary one until the screw is partly extracted. Then press the sliding clamp down; this is so made that it engages the head of the screw and holds it until it is desired to put it back again, when it automatically disengages itself, and the driver sends the screw clear home. Particularly useful with stud screws.

Our illustration shows the clamp drawn back, which permits the driver to be used like any ordinary spectacle screw driver. The other illustration shows screw held in the clamp ready to be placed in the mounting.

Price, \$1.00

SPECTACLE AND EYEGLASS SETTING-UP PAD No. 1

This pad consists of a circular piece of rubber not too solid to be broken when a convex surface is laid upon it, thus preventing any breakage. It has a metal rim with two bent arms which hold the lens of the eyeglass or spectacle, and keeps them in place while the screws are driven home.

Price, each, 50 cents

REFLECTING LOUPES

Made in 2, 2½ and 3-inch Foci

"THE NEW MODEL LOUPE"

A NEW REFLECTING EYE-GLASS OF MERIT

PATENTED APRIL 17, 1900

WORTH MORE THAN TEN TIMES THE PRICE, FOR ESCAPEMENT-WORK ALONE.

PRICE 85¢ SINGLE, 2-2½-3" FOCUS.

For inspection between the plates of a watch movement, or any recess from which light is excluded, these loupes are an absolute necessity. They have been greatly improved in construction, the mirrors now being optically ground concave, which causes them to reflect powerful rays of light at the necessary point.

Single Lens - - - - - Each, 85c.
Double Lens, very powerful - - - - - " \$1.50

For Sale by all Jobbers in the United States and Canada.

DIAMOND AND STONE SETTING TOOL No. 85 (Pat. Applied for)

The only tool that will do the work correctly and quickly.

These tools, invented by a stone setter of many years' experience, do the work they are intended for with absolute perfection, whether the hands of an experienced or inexperienced workman. In eight minutes after adjustment in lathe will cut a smooth seat for any stone from 2 to 2 carats.

Tools are made of polished and hardened steel and are indestructible. Will fit in chucks Nos. 28 and 44.

The greatest labor saving device ever invented in the line of setting cutters. Put up in neat hlock and box.

Price, per set, \$5.50

THE REASON WHY

We are able to handle orders for Mesh Bags in any size quantities is because after long years of experimenting—on what seemed to others an impossibility—we have at last succeeded in making a machine to produce mesh.

The advantages to you are many, of which a few are: a perfectly smooth strong mesh, finer than can be produced by hand for double our price—prompt deliveries—and a guarantee that your Holiday orders will be taken care of. Your experience will supply many others.

W. & D. Bags are offered by Leading Jobbers.

M. J. AVERBECK'S CATALOGUE

GENTLEMEN:

Our new Fall Catalogue will be ready about October 25th, it took us about six months' hard work to prepare it, it contains 132 pages, has more than 5,000 illustrations, all half-tones, it is chock full of new things, it is expensive; if you want it, please ask for it, if you have no use for it, please tell us so.

For over 18 years we have made the best selling line of Jewelry Novelties, etc. in Gold, Gold-Filled and Sterling Silver. If you are an up-to-date Retail Jeweler we feel sure you will have use for this valuable book. Remember we are First Hands, you buy RIGHT, when you buy from us.

There will be no discount sheet in our Catalogues or booklets hereafter.

Send us your mail orders, we are prompt.

THE LAUREL

TRADE MARK
STERLING 1800

☞ The **LAUREL** pattern is now ready for delivery in the dozen, with the fancy pieces in process.

☞ Made on the popular **MARTHA WASHINGTON** shape.

☞ Decorated with a dainty **LAUREL** wreath, cut with the delicacy of hand engraving.

☞ Finished in light, medium and heavy weights at a very moderate price.

☞ In manufacturing "**THE LAUREL**," every care has been exercised as to design, die work and finish—it is in every sense a Pattern of Class—but on account of slenderness of outline, proper distribution of weight, the most perfect factory and manufacturing facilities, it will be offered at the price of the cheap "ordinary" patterns now on the market.

☞ This is another **Smith Pattern**, designed to remain permanently in demand.

GARDNER, MASS.

Silver Plate that Sells

For over half a century the word ROGERS applied to plated ware has been deservedly synonymous with the highest art of the designer, and the most careful and finished workmanship of the artisan, but dominating all else

DURABILITY IN THE SERVICE OF THE CONSUMER.

To add still further prestige to the high standard of the ROGERS name comes our announcement of the succession of *the sectional process* of plating over the common method of a uniform silver deposit on articles of flatware.

The coating of silver on flatware articles invariably wears through at the points marked XII on the above illustrations because the quantity of silver deposited has not heretofore been adjusted proportionately to the wear the Spoons and Forks receive.

OUR SECTIONAL PROCESS

of plating, deposits on these exposed points a triple quantity of silver, thereby more than doubling the service obtained by the old method of uniform plating. We are thus enabled to guarantee that plated ware of our manufacture will bear

50% MORE SILVER

than standard plate and will outwear any and all other brands of silver-plated ware.

SAN FRANCISCO, CAL.: 704 Market St.

We are also Makers of High Grade Gold Filled Chains, Fobs, Bracelets, Pendant Necks and La Vallieres

THE CORONET BRAID, one of the most graceful of all coiffures, is a revival. It encircled the heads of former beauties, just as it does with the belles of to-day. Loop Hair Pins were inseparable from this style of head dress. Fashionable women wore from four to eight of these hair pins. The pendulum has swung back once more. The old Coronet Braid is now the "latest style." It was foreseen here. The revival calls for correct Loop Hair Pins of Jet. They are here provided in many artistic variations. Priced to retail from 75c. to \$5.00 per pair.

Note our new line of High Grade, Gold Filled, Electric Soldered, Neck Chains. Made from solder filled, seamless wire. Every chain stamped "Bates & B." and warranted. Different from all other makes.

Many a patient suffering from an accident or serious illness has had a permanent and speedy recovery owing to the increased efficiency of the services rendered by the physician using a Sphygmometer, or pulse-timing instrument. You ought to show one to your doctor; he will thank you, and one sold to him will mean sales to others. Made in plain pulse-timer and pulse-timer and watch combined. Sells for \$10.00 and upward with a good margin of profit for the dealer. Write us for booklet and sample.

19 Ave. Plantyn, ANTWERP

**Ziruth-Unbreakable
GOLD AND PLATINUM CHAINS**

Are cheaper than those that claim to compare in quality and much better than those of equal price.

Are stronger, more flexible, better finished, finer shaped links, more beautifully colored, more carefully soldered and inspected than any other chain on the market and are so conceded by the trade.

They are plump 10K. and 14K. as stamped and fully guaranteed.

Of what value is the stamping law unless you assay your goods? We invite you to assay our chains.

Chains, cheap in construction are dear at any price and therefore you cannot afford to use machine made chains in place of hand made chains.

ZIRUTH-UNBREAKABLE HAND MADE CHAINS

are the cheapest because they are the best constructed on the market.

Our prompt deliveries of orders are the wonder of the trade.

Write us at once and our representative will call or we will submit samples and prices.

We cater to the manufacturing and jobbing trade.

DO NOT CONFUSE US WITH ANY FIRM BEARING SIMILAR NAME.

**"EDGEWOOD"
BAR PIN**

The design of this pin is patented, and we will promptly prosecute any manufacturer who infringes on same.

ENAMEL BAR PINS are among the best sellers this Fall. THE "EDGEWOOD" pin has been pronounced the best pin of its kind on the American Market.

RETAILERS should use this pin for the following reasons:

- The GOLD is fourteen karat.
- The WORKMANSHIP is perfect.
- The DESIGN is patented.
- The PEARLS are selected Oriental Baroques.
- The PRICE is moderate.
- The PIN will not be imitated in inferior goods.
- The ENAMEL can be furnished in eight colors.

We sell direct to the retail trade.

Some Examples of American Gold and Silver Work Presented to Japanese and Chinese Navies.

IMMEDIATELY upon the return of the United States Atlantic Fleet from their memorable voyage around the world subscriptions were made by the officers and enlisted men for the purpose of obtaining

seen in the illustration on the front cover of this issue the body of the cup consists of a large, round bowl, supported by the globe, which is flanked on two sides by American eagles modeled in high relief. The handles are ornamented with chrysanthemums, the national flower of Japan. The cover is decorated with nautical motives, and is surmounted by two eagles and

of the United States Atlantic Fleet are similarly applied around the base. These are: United States Atlantic Fleet—*Connecticut* (flagship), *Kansas*, *Minnesota*, *Vermont*, *Georgia*, *Nebraska*, *New Jersey*, *Rhode Island*, *Louisiana*, *Virginia*, *Missouri*, *Ohio*, *Wisconsin*, *Illinois*, *Kearsarge*, *Kentucky*.
 Imperial Japanese Navy—*Mikasa*, *Fuji*, *Asahi*, *Sagami*, *Azuma*, *Yakumo*, *Nisshin*,

SILVER CUP PRESENTED TO OFFICERS AND CREWS OF THE CHINESE NAVY BY OFFICERS AND MEN OF THE AMERICAN FLEET.

appropriate presentation pieces to be given to the officers and crews of the imperial Japanese and Chinese navies, in recognition of the courtesies shown by them to our officers and men. A committee of officers was appointed to make a suitable selection from competitive designs submitted by the leading jewelers of the country, with the understanding that contracts for both pieces were awarded to the Bailey, Banks & Biddle Co., Philadelphia, Pa.

The committee selected for presentation to the officers and men of the Japanese Navy a massive silver loving cup, 34½ inches in height, exclusive of the base. As will be

seen in the illustration on the front cover of this issue the body of the cup consists of a large, round bowl, supported by the globe, which is flanked on two sides by American eagles modeled in high relief.

The following inscription appears on the obverse of the loving cup: "Presented to the Officers and Men of the Imperial Japanese Navy by the Officers and Men of the United States Atlantic Fleet in grateful recognition of the generous courtesies received during their visit to Japan in October, Nineteen Hundred and Eight."

The names of the 16 vessels of the Japanese Navy which entertained the American battleships are applied in gold around the upper rim of the cup, while those of the 16 vessels

of the United States Atlantic Fleet are similarly applied around the base. These are: *Kasuga*, *Katori*, *Kashima*, *Tsukuba*, *Ikoma*, *Soya*, *Otowa*, *Niitaka*, *Tsushima*.

The seal of the United States appears just above the globe, on which is etched the map of Japan, while gracefully arranged below is a group of anchors, trident and flags of the United States and Japan enameled in colors.

On the reverse appears the same inscription in Japanese characters. This was originally transcribed by his excellency, Baron Takahira, Japanese ambassador to the United States. The engraving was reproduced exactly from a photograph of the original writing. Under this inscription is

Picture Number Three.
14-K. Mother-of-Pearl Loose Link Buttons.

A very extensive line of finest quality—hand polished—well matched mother-of-pearl with—strong—satisfactor platinum and 14-K. gold mountings. All at prices that more than meet any competition.

seal of the Navy Department of the United States, and a second group of anchors, trident and the official naval ensigns of the United States and Japan, the two enameled in colors. On this hemisphere of the globe is etched the map of the United States.

The loving cup rests upon a mahogany base, to which is applied, in silver, the seals of the United States and of the Navy Department, encircled by wreaths of laurel.

A handsome punch bowl of sterling silver, mounted on a base of copper in antique design, designed on Chinese lines, was chosen for presentation to the officers and men of the Chinese Navy. The bowl is depicted in illustration on page 59, but the base is omitted.

The following inscription appears on one side of the bowl in English and on the other side in Chinese characters: "To the Officers and Crews of the Chinese Navy in recognition of their courtesy and hospitality, July, 1908." On the base of the bowl, in English only, is this inscription: "From the Officers and Crews, Second Squadron, United States Atlantic Fleet."

Applied to the body of the punch bowl are the eight battleships of the Second Squadron, modeled in gold. These appear in the same order as that in which the vessels entered the harbor at Amoy, the flag-ship, *Luisiana* in the lead, followed by the *Prima*, *Missouri*, *Ohio*, *Wisconsin*, *Illinois*, *Kearsarge* and *Kentucky* in the order named. To secure absolute accuracy of proportion and detail, photographs of these battleships were reduced to the size of the enameled decorations, which were executed in these photographs. Prominent naval objects have pronounced the reliefs to be perfect representations of the vessels.

The division of the line is marked by a decoration in high relief, consisting of an eagle and anchor of silver, surmounting crossed staffs of the Chinese and American flags, which are enameled in colors. The punch bowl is 16½ inches in height and 14 inches in diameter at the top, while the weight of the whole is 235 ounces.

These magnificent pieces are remarkable, not only for artistic embodiment of significant details, but for beautiful harmony of proportion and excellence of execution, forming two of the handsomest specimens of the silversmith's art exhibited in recent years.

Involuntary Bankruptcy Petition Against the Hammatt-Dickey Co., Jacksonville, Fla.

JACKSONVILLE, Fla., Oct. 13.—The involuntary petition in bankruptcy which was filed in the United States Court against the Hammatt-Dickey Co., doing business as wholesale dealers and cutters of precious and semi-precious stones, at 323 Main St., bears the usual allegations required by law. It was filed for the purpose of conserving the assets. According to the statement made, the concern's assets are much in excess of its liabilities, as it claims the book accounts are worth about \$2,000, the stock about \$6,000, while the indebtedness is figured at only about \$2,800.

It is said that the trouble was due to the fact that the concern could not realize quickly on its accounts, nor could it liquidate its stock. The landlord had served the company with notice to pay up or move and claims of the creditors had been put in the hands of the attorneys to sue in the State courts. To protect all interests bankruptcy proceedings were necessary, but the concern, being a corporation, an involuntary petition had to be filed. A temporary receiver has been appointed.

The Hammatt-Dickey Co. was incorporated in 1908 under the laws of Florida, with an authorized capital of \$10,000, which at the time was claimed to be fully paid in. Those mainly interested in the concern were C. S. Hammatt and R. N. Dickey, of whom the latter had been in the same line here individually. Early this year Mr. Dickey bought out Mr. Hammatt's interest, and though the concern was conducted as a corporation, he was said to be the virtual owner. He has been hampered for lack of capital for some time, and in the Spring attempted to get an extension from his creditors.

Interesting Suit Over a Patent on Bracelets Decided by the United States Courts.

PROVIDENCE, R. I., Oct. 13.—Much interest is being manifested among the bracelet manufacturers of this city and the Attleboros in the hearings that opened last week in the United States Court of the District of Rhode Island before Judge Arthur L. Brown in the patent infringement case brought by the George L. Vose Mfg. Co., of this city, and the Corey Mfg. Co., formerly of this city, against G. C. Hudson & Co., Inc., of North Attleboro.

This was a suit that was instituted for infringement of rights to a certain style of expanding bracelet, the patent on which expired on March 17, 1908. The suit, however, was instituted more than two years previously, having been filed Jan. 8, 1906. The patent was granted to Thomas C. Hudson, March 17, 1891, who assigned the same to the George L. Vose Mfg. Co., and who in turn allowed it to be made under royalty by the Corey Mfg. Co., Sandland, Capron & Co. and others. The patent was sold to George L. Vose by Mr. Hudson Sept. 29, 1896, and license to manufacture the same was granted to the Corey Mfg. Co., April 20, 1905, and the suit now pending has been continued for the purpose of an accounting.

The defense denied the originality of the

Hudson invention, and asserted that it had been abandoned to the public and also replied that the respondent's bracelet did not infringe the Hudson patent.

The court sustained the defendants, dismissing the bill of complaint on the ground that the patent had been anticipated by a prior patent and was therefore void.

Last Honors Paid to the Late Herman T. Jarecki, Erie, Pa.

ERIE, Pa., Oct. 13.—The funeral services over the remains of the late Herman T. Jarecki, Saturday last, at his late home on French St., marked the passing of a man whose death proved a distinct loss to Erie, as well as to the jewelry trade of this section of New York, of which he had so long been a member. His had been a leading name among the business houses of Erie for more than half a century, and he was the last but one of a family whose work had made an indelible impress upon the general character of the city.

Herman T. Jarecki was the son of Charles W. Jarecki, a goldsmith and jeweler, who came to Erie from Germany with his family in 1852. Of the elder Jarecki's seven sons, four (August, Charles, Gustave and Herman) learned the business of their father; two, (Henry and Frederick) went into the iron and brass manufacturing business, and one (Theodore) became an accountant, but later connected himself with the enterprises of his brothers.

After mastering his trade Herman Jarecki started in the jewelry business on his own account in Brown's block, at State St. and N. Park Row, in partnership with his brother-in-law. The firm, which was known as Drodzewski & Jarecki, remained in business for two or three years, and finally Mr. Jarecki, who continued alone, moved to 508 State St. In 1876 the business was again moved to a building Mr. Jarecki had erected at 728 State St., where he remained for the rest of his life. Mr. Jarecki married a Miss Becker, of this city, but his wife passed away in 1873, leaving two children.

Throughout his 48 years' career as a merchant of Erie Mr. Jarecki bore an enviable reputation for his enterprise, integrity and high sense of honor. He was noted for his excellent judgment and artistic taste, and was reputed high as a connoisseur and expert in everything that pertained to his trade. Many of the present successful jewelers are graduates of his store, where they received not only an excellent knowledge of the jewelry trade, but were grounded in those principles of probity, honesty and thoroughness that are common to the merchants of the old school.

Personally, Mr. Jarecki was a man of kindly disposition, who was loved not only by his family and relatives, but by his friends and acquaintances in business and fraternal circles. For many years he had been prominent in the Masonic order and was connected with the Perry Lodge, Temple Chapter, Mount Olivet Commandery, K. T., and Zen Zen Temple of the Mystic Shrine. The esteem in which he was held was attested in many ways, not the least of which were the many eulogies of his character which appeared in the obituary notices in the local press.

Annual Report on the Production of Precious Stones.

Text of the United States Geological Survey's Advance Pamphlet on Gems and Gem Minerals for 1908. Compiled by Douglas B. Sterrett.

(Continued from issue of Oct. 13.)

JASPER, PETRIFIED WOOD, ETC., ARIZONA.

Probably the largest jasper deposits in the world are those of the petrified forests of Arizona. It is not alone the sight of so many petrified trees that causes wonder to the visitor, but the large quantity of brilliant colors displayed by these stones. The deposits have been described by L. F. Ward,¹ and their beauties portrayed by many artists. Geologically the petrified forests may be briefly described as occurring in formations of Tertiary age. The trees were not petrified in place except in a few instances, but were washed down from high levels and scattered over large areas or accumulated in comparatively confined basins. They were deposited in and covered by a glauconitic sandstone stratum overlying purple and gray marl beds. This stratum now forms a capping over large areas of mesa country. In their present positions the petrified trees are scattered where the sandstone has been cut into by erosion of valleys and gulches and washes. Some of the trees remain in the sandstone, while others, principally fragmentary, have been dropped by the washes by the erosion of their parent rock. In a few cases the petrified tree trunks are preserved nearly whole, while as a rule they occur in fragments large and small. The smaller material is abundant over large areas, and in the larger blocks or sections of trees are numerous.

The trees have been petrified by silica in its various forms with varying quantities and kinds of impurities acting as pigments and furnishing a variety of diverse colors. The general form of the petrified trunks and limbs and a few details of structure have been preserved during petrification, although the minute detail of structure seen in some petrified woods is wanting. The mineral matter petrifying the trees is largely jasper with varying amounts of chalcedony and quartz. The jaspers color from brilliant red, through orange to yellow color. The large number of shades of these jaspers, particularly in reds, is striking. From the crimson and maroon reds there are all gradations to terra cotta, cardinal, scarlet, cherry-red, etc., orange, and from orange yellow through ochre to drab to corn yellow. Some pieces have a suggestion of green in the yellow, giving an olive tint. These colors in the jasper are sometimes distributed over areas of several square inches and then in are banded or irregularly mixed with other colors. The colored jaspers occur mixed with and patches scattered through gray cherty chalcedony or through translucent gray chalcedony streaks and splotches of black jasper or flint lend contrast to the varied colors of the jaspers. The texture of some of the petrified wood is dull and gritty, though a part is brighter, and some even glossy. Occasionally amethyst and quartz crystals are found in cavities in the petrified trees or resting over limbs.

Many of the petrified forests of Arizona, especially those near Adamana and Holbrook, are protected by law against material being carried off. Visitors are generally allowed to take off a few shavings, however, as souvenirs or material from which to cut souvenir ornaments or gems. Even one does not procure such specimens, a visit to the petrified forests always proves of great interest, especially to one interested in mineral objects of natural beauty. A trip to the forests is not difficult, and two areas of petrified trees may be seen in half a day's drive from Adamana, on the Santa Fe Railway.

Petrified forests are known to exist in other portions of Arizona, and some of these are doubtless outside of the regular reservation and where they could be used to procure material for polishing. If it is not possible to find such areas, a small area might be set aside where petrified wood could be obtained for use in ornamental work. Petrified forests occur in the Navajo Indian Reservation between Ganado and Chin Lee and have

been reported farther west in the Moqui Reservation.

CALIFORNIA

Mrs. Gertrude S. McMullen, of the Southwest Turquoise Co., of Los Angeles, Cal., kindly sent in a specimen of jasper from near Hart, Shasta County. This material is from a deposit owned by Hart & McCullum. It is composed of layers of white, gray, yellow and red jasper in peculiar straight and curved bands. It appears to be slightly granular though very fine grained and susceptible to a fair polish. The material will be used in jewelry under the name "creolite."

LABRADORITE, OREGON.

Maynard Bixby, of Salt Lake City, Utah, reports the discovery of a new deposit of labradorite in southern Oregon. The labradorite ranges from a colorless glassy variety resembling quartz to dark, showing fine red, salmon and green tints. Mr. Bixby states that the mineral would yield handsome gem material.

CANADA.

Dr. F. S. Ward, of Rochester, N. Y., reports an importation of several hundred pounds of labradorite from Nain, Labrador, for gem purposes. There is a considerable demand for a good grade of this stone for jewelry purposes, especially in the west.

LAPIS LAZULI, CALIFORNIA.

A company has been formed in Los Angeles, Cal., under the name of the Lapis Lazuli Mining Co., to operate a deposit of lapis lazuli in the Death Valley region of San Bernardino County. Mrs. Margaret Robertson, president of the company, states that the mineral has been thoroughly tested and pronounced lapis lazuli. So far only surface material has been obtained while assessment work was being done on the claim. Development work is to be started in the fall.

MOONSTONE, VIRGINIA.

Specimens of rough moonstone were received from Henry Mackay, Hewlett, Va., where they were obtained from a mica mine. This moonstone is a variety of orthoclase feldspar and occurs in pockets in veinlets of partly kaolinized feldspar in a decomposed mica gneiss formation. The pockets range from the size of an egg to that of a coconut. Gems cut from this material display a certain amount of the chatoyancy of moonstone, but not so strongly as in the Ceylon gem. The particular pieces examined were slightly yellowish and not the pure white of good moonstone. It is possible that a better grade will be found in this locality.

CEYLON.

James Parsons,² principal mineral surveyor of Ceylon, reported the discovery of a new deposit of moonstone in the village of Weragoda, in the southern province. Some of the moonstones are of the fine blue variety. They are found in white kaolin, under about 4½ feet of black mud, in a swampy region. It is probable the moonstone is derived from leptynite (acidic granulite), as in the Kandy district of Ceylon, whence the bulk of the world's supply of moonstone is obtained.

OPAL.

NEVADA.

L. F. Denio, of Denio, Ore., reports the discovery of opal in Humboldt County, about 20 miles south of the Oregon State line and 40 miles east of the California State line. The opal has been found over an area of seven miles long by one mile wide. Two groups of claims, about five miles apart, have been located on the best prospects. The character of the opal is different in these two groups, one furnishing a brilliant black stone, the other blue, green and red opals. Much petrified wood occurs in the region, with which good opal is sometimes found in seams or attached to the outside of the petrified wood. The regular supply of opal is in a decomposed porphyry of brownish red color. Basaltic rock outcrops nearby.

¹Los Angeles Mining Review, May 1, 1909.

²Ceylon Administration Rept., pt. 4, 1907.

Only limited prospecting work has been done so far.

J. B. Stott kindly sent in specimens of opal from a deposit being tested by himself near Austin, Lander County. The specimens consisted of common white opal, yellowish opal, lilac-tinted opal, and milky opal. Some of the specimens displayed a faint flash or fire when viewed in certain position. Mr. Stott reports a 100-foot incline sunk on the deposit in which the quality of opals improves with depth. The opal occurs as a core in balls of partly silicified rock whose nature could not be determined. The specimens examined contained cores of opal 1½ inches through in balls three to four inches in diameter. Mr. Stott states that the opal-bearing balls occur in a seam of blue clay, about two feet thick, between black and red lava beds.

UTAH.

James V. Brooks, of Milford, has sent to the Survey a specimen of banded red, brown, yellow, gray, white, and colorless opal. The exterior of the specimen had a white sintery coating or crust as if deposited by a hot spring or similar agency. The specimen measured 2½ inches by one inch by three-fourths of an inch in thickness and was evidently broken from a large slab. The opal is common opal and does not display any fire. It is highly colored, resembling the rich colors of jasper. The specimen shows interrupted periods of deposition, as some of the layers are flat and straight as in onyx, and the others are wavy and cut through portions of the onyx-like bands. This opal takes a good polish and might be used for small ornaments, mosaics, or even curio jewelry. It is not unlike richly colored Mexican onyx or onyx marble in appearance.

AUSTRALIA.

New South Wales.—The value¹ of precious opal produced in New South Wales in 1907 amounted to £79,000, which is greater than for any other year since 1903. The White Cliffs division of the opal region furnished £66,000 and the Lightning Ridge field in the Walgett division supplied the remainder.

Queensland.—The production² of opal in Queensland during 1907 is estimated at £8,000, the same as in the two preceding years. For several years previous to 1904 the production was much greater, and the total production since 1890 is estimated at £158,695. During seasons of drought the opal production is large, as the farmers take up mining as a means of livelihood. During 1907 the season was favorable for crops, and the opal production was consequently small.

PERIDOT.

ARIZONA.

Peridot suitable for gem purposes is found in two regions in Arizona. The first one discovered was that north of Fort Defiance, in the Navajo Indian Reservation, about which little has been written. The other region is near Rice, or the old Talklai post office in the White Mountain Apache Indian Reservation. At the latter locality the peridots are found in the original basaltic rock matrix, as well as loose in the soil. In the Navajo Reservation gem peridot is probably to be found at several localities; it appeared to be fairly plentiful at the only locality visited, about 10 miles north of North Defiance, a mile or two west of the Arizona-New Mexico line. This locality is on and around the ranch of Navajo Charlie. An Indian guide reported the occurrence of gem peridot and garnet on two prominent knobs several miles east of this locality in New Mexico. Small peridots, occasionally large enough for cutting, are found at Black Rock, an outcrop of basic rock near Fort Defiance. The peridot locality near Navajo Charlie's could be reached from Fort Defiance, though the trip was made from Ganado, 35 miles west southwest, across by the Zilch-Tusayan Butte.

The rocks between Ganado and the peridot locality consist chiefly of red and grayish sandstones and conglomerate, with an outcrop of volcanic rock forming Zilch-Tusayan Butte. Petrified wood is scattered over much of the region, especially between Ganado and the Butte. The red sandstone probably belongs chiefly to the undifferentiated Triassic as mapped by N. H. Darton.³ East of Zilch-Tusayan Butte the red sandstone

170 BROADWAY, Corner Maiden Lane - - - NEW YORK

is a large area of mesa and gently sloping country extending to near and around the peridot. The peridot is associated with volcanic rocks which occupy a basin or depression 200 to 300 feet deep, partly surrounded by red sandstone mesa or plateau country. The volcanic rocks crop over an area a mile long east and west a three-fourths or more of a mile north and south. The basin is drained by a wash which flows from the northwest, turns east across it, then south along the sandstone contact on the east side, and finally cuts across the sandstone to the east near Navajo Charlie's house. Several creeks and washes enter from different sides. A prominent wash from the southwest, running parallel along the sandstone contact on that side, is the other wash at the outlet of the basin, where a gorge has been cut through the red sandstone. The volcanic rock outcrops from small rounded hills in the valley or from ridges extending from the sides into the valley. The valley floor, where many of the peridots are found, is level and flat in places.

The character of the volcanic rock varies in different exposures, some of the differences being due to texture and grain and others due to variation of composition. It was not possible to make a careful petrographic study of the different types, although it is hoped this may be done later, hence the names will be used in a provisional way. The volcanic rocks are of three types—coarse grained porphyry, orthoclase basalt, and peridotite agglomerate. These rocks are associated with one another in places apparently in an irregular way, and their relations were not determined.

The monzonite porphyry is a spotted gray rock with white orthoclase and oligoclase phenocrysts occurring up to two centimeters across. Biotite inclusions are abundant also. The groundmass is very fine grained and consists of feldspar laths, with some biotite and girite. A few rounded, euhedral quartz crystals are present. All of the monzonite porphyry seen was badly altered, and in some the biotite had gone over to chlorite completely, giving the rock a dull greenish cast which resembled serpentine except for the remnants of white feldspar crystals scattered throughout.

The orthoclase basalt is a dark-gray to nearly black rock, in places rather dense and fine grained, in others medium grained. A porphyritic texture is locally present. The rock is composed of orthoclase, olivine, biotite, orthoclase, iron ores, and magnetite. Weathering or partial weathering renders the rock lighter in color.

The peridotite agglomerate is a dark-greenish to black, altering to a dark reddish on partial weathering. It is composed of olivine, largely altered to serpentine in places, enstatite, a little diopside, and iron ore, with much yellowish serpentine in places. More or less limonite staining is present in some specimens. The olivine and serpentinized olivine occurs in rounded grains and in fragments of corradicated grains through the serpentine. Porphyritic grains of the peridotite contain inclusions of rounded and angular fragments of foreign material, as quartz or sandstone. Rounded pebbles of euhedral olivine or peridot are also present as inclusions. Some of the peridotite was observed to contain many rounded and corroded grains of transparent peridot from pinhead size up to those of the size of a pea. Small emerald-green diopside crystals are also scattered through the peridotite.

The different rocks present different degrees of resistance to weathering and consequently occupy different positions with respect to the topography. Several ridges extending from the hard sandstone boundaries into the basin of volcanic rocks are composed chiefly of the more resistant orthoclase basalt. These ridges also contain areas of peridotite and monzonite porphyry in places. The peridotite and monzonite rocks appear in the lower ground and on some of the low, rounded hills in the valley. Some of these hills, about 100 feet high, north of the center of the basin, is formed by peridotite agglomerate, resembling kimberlite and monzonite porphyry, which have resisted erosion longer than the surrounding rock. This hill is now being eroded off into angular talus and gravel slopes by weathering.

Peridot is found more or less plentifully at several places in the valley. Some of these are on the foot of the hills or ridges of peridotite and others are on the flat valley floor. Specimens were gathered in the talus and wash at the foot of the ridge back of Navajo Charlie's house, especially below outcrops of peridotite agglomerate. The valley wash a half to three-quarters of a mile northwest of the house peridot was found in several bare, sandy places. Some of the ant-

hills, one to two feet high, in one of these patches were found to be built up of over 75 per cent. of peridot grains. The remainder consisted of garnet, quartz, rock fragments, diopside, etc. These grains range up to four millimeters in diameter, and are carried in from the surface over an area of many square feet around the ant-hills. They are not brought from the ground underneath the hills as is thought by some persons. The nests are built above ground and are covered with the grains of mineral. The ants use no selective method, but take the most available grains. The richness of the ant-hills in peridot therefore indicates the abundance of that mineral in the soil. Larger grains of peridot suitable for gem purposes are not found on the ant-hills, but loose in the soil. From the occurrence of the peridot near and below the peridotite agglomerate outcrops and the presence of gem-quality peridot in good-sized grains in this rock, it is evident that the gem is derived from the agglomerate. The abundance of small grains of olivine or peridot both in the same soil as the large grains and in the peridotite, combined with the tendency to disintegration of the latter, also strengthens this view.

Among the minerals associated with the peridot are garnet, emerald-green diopside, quartz, calcite, titanite iron and others. The garnets have a beautiful red color, varying from deep pyrope-red to cinnamon-red, and are mostly small, under five millimeters in diameter. Occasionally large garnets and diopsides of sufficient size to cut are found.

The peridots display a large range of colors or shades of the same colors. Some have a beautiful light yellowish-green color, others have richer green or a stronger yellow tint. Some are a brownish green, and others are regularly brown in color. Practically all are transparent and clear, though some are slightly smoky or contain visible dust specks through them. Under the microscope these dust specks appear as minute hexagonal plates with a dirty brown color. Some peridots are clear throughout, but contain a few scattered black spots. Others contain minute cavities which appear on polished surfaces as tiny pits. A few blades of an emerald-green mineral, probably diopside, were observed inclosed in a peridot gem. Beautiful gems are cut from some of the peridot from this region. Some of the perfectly clear golden-green stones, so much admired, are obtained in gems of three to four carats weight. Gems weighing from one to two carats are fairly abundant. The darker yellowish-green stones could be obtained plentifully.

The peridots occur in rounded and fragmentary grains with rough pitted surfaces and some rather smooth cleavage faces. Some of the surfaces are deeply pitted or corroded, as if attacked by the magma in which they were contained. This corrosion is present on the peridot still embedded in the peridotite agglomerate, and is therefore not caused by later corrosion. The grains and specimens found range up to three-fourths of an inch in larger diameter.

The peridot region has been searched over so often by the Navajos that large gems of rich yellowish-green color are difficult to find. Small pebbles of peridot are abundant. It is probable that a large supply of gems could be obtained by plowing or working up favorable areas of the valley and allowing the rain to wash out the gems. Some of the soil is dry and sandy, and in this it might pay to size off the pebbles with sieves and then pick over for gems. This would have to be done without water during the greater part of the year, as the stream bed in the valley is dry.

QUARTZ, ROCK CRYSTAL, RUTILATED QUARTZ, ETC.

ARKANSAS.

Reports of the discovery of diamonds near Delaney, in Madison County, appeared during the year in the press. Specimens sent to the Survey by W. L. Anderson, of Delaney, proved to be quartz of very clear limpid quality.

TEXAS.

J. C. Melcher, of O'Quinn, Fayette County, reports that a number of the clear colorless quartz pebbles found in that region were cut during 1908. Cut specimens sent to the Survey were perfectly clear and colorless and would be very satisfactory as souvenir gems.

PENNSYLVANIA.

George O. Simmons, of Brooklyn, N. Y., reports the occurrence of small ruby-red rutile crystals on quartz and rutilated quartz at Howard House, Delaware County, Pa.

VERMONT.

George Davidson, of South Royalton, reports the occurrence of a large deposit of quartz in that region. A few specimens of crystals have been obtained for cabinet use, and massive material has been sold for rough specimens.

BRAZIL.

According to A. S. Atkinson¹ the best quartz and rock crystals of Brazil come from the Cristaes Mountain in the State of Goyaz. The output has been large from this region, and mining has been carried on for many decades. Undeveloped deposits still exist. Yellow quartz is exported from Goyaz and is sold in considerable quantity for cheap jewelry. It resembles topaz and is sold for that mineral.

ROSE QUARTZ.

SOUTH DAKOTA.

Rose quartz of a more or less pale color is found at numerous places in the Black Hills. It is associated with the pegmatite rocks of the region and is found at several of the mica mines. Material suitable for gem purposes has been mined in quantity at the Red Rose mine only. The latter mine is 6½ miles S. 30° E. of Custer in a small gulch draining into French Creek. The mine was first taken up some years ago by a Mr. Demerou and was sold to eastern parties for \$300. After the claim was allowed to revert it was re-located and is now held by Samuel Scott, of Custer.

The operation of obtaining rose quartz at the Scott mine consists simply in blasting the massive quartz from the face of a large ledge and selecting the material of suitable quality. The rose quartz occurs in a ledge six to 15 feet thick that stands from 10 to 30 feet high along the south wall of a small gulch. It outcrops for a distance of over 100 yards and is found at points 200 yards apart. The quartz is part of a large pegmatite which has an east and west strike and cuts directly across the schistosity of the cyanite-muscovite-biotite gneiss country rock with a steep dip. The strike of the gneiss on the south side of and close to the pegmatite is about north and south with a vertical dip. Part of the quartz is white; a large part is pale rose; some is of a rich dark rose color, and some has a purplish rose tint. The dark rose color occurs through the quartz over areas 10 to 12 feet across. Solid clear translucent to transparent flawless rose quartz of deep color is obtained in pieces up to two inches in diameter. The greater part is more or less checked with flaws, or is marked with cloudy lines running through the quartz in various directions. These lines represent joint planes, the walls of which have been firmly cemented together again with quartz. In many cases these seams resist fracturing as strongly as the solid quartz, so that they do not impair the strength of gems cut from such material. One prominent set of these seams lies nearly flat in the rock. The ledge is fractured by un cemented joints into large blocks. The most prominent set of these joints has a northwest direction and is vertical.

That the rose quartz will hold its color well for all gem purposes is shown by the persistence of the rose color on the outcrop of this mineral where it has been exposed to the weather for long periods. Other places blasted into several years ago hold the same rich color on their surfaces as within the mass of the rock. Rose quartz can be obtained in quantity and in large blocks at this mine. It is reported that one block was sawed into two table tops, measuring 18 by 30 inches. The massive rose quartz is sold for from three to 25 cents per pound, according to depth of color and number of flaws or seams. Selected material brings from \$8 to \$12 per pound.

COLORADO.

Rose quartz has been found at several localities in Colorado, especially in Fremont County. One of the most promising of these is the Wild Rose claim, located in May, 1907, by J. D. Endicott, of Canon City. The Wild Rose claim is six miles north of Texas Creek and is located on a steep mountain side about 500 feet above and one-third of a mile west of the junction of Echo Canyon and East Gulch. The country rock is highly crumpled cyanite-mica gneiss and schist, cut by hornblende schist beds. The rose quartz occurs in a large mass or ledge that forms a part of a pegmatite body. The pegmatite is also mica bearing, and may be mined for this mineral at some

The rose quartz outcrops for about 150 feet in a north and south direction along the main side. The outcrop stands about 20 feet high though the true thickness of the mass could not be determined, as its dip was not known. There are smaller masses or segregations of quartz through the pegmatite. The greater part of the quartz of the pegmatite has at least a pale rose color, though some is white. Portions are deep enough color and are clear enough to be used for gem purposes. Clear translucent to transparent pieces of flawless rose quartz up to several inches in thickness can be obtained, and also blocks for ornamental purposes.

CALIFORNIA.

V. D. Parson, of Freeman, Cal., reports the discovery of a deposit of rose quartz of good quality in Kern County. Much of the material near the surface, at least, is more or less flawed, so specimens of large clear or translucent material are difficult to obtain. Mr. Freeman states the color of the quartz is good and that the material will probably improve on opening the deposit.

(To be continued.)

Watch Cases Worn as Jewelry Declared to be Dutiable at 85 Per Cent.

WASH., Oct. 14.—The Collector of Customs at this city has received a letter from Charles D. Hilles, Acting Secretary of the Treasury Department at Washington, D. C., in reply to an inquiry relative to the duty on watch cases. The letter states that watch cases in question which are to be worn on the person are dutiable at 85 per cent under Par. 448, tariff act of Aug. 5, 1909, and not at 40 per cent. under Par. 192 of the same act.

The letter reads as follows:

The department duly received your letter of the 18th inst. in which you invite attention to the provisions of the tariff act of Aug. 5, 1909, which provides that watch cases shall be subject to duty at the rate of 40 per cent. ad valorem, and to the provisions of Par. 448 of the said act in regard to the classification of articles of every description when wholly or in chief value of silver, German silver, white metal, brass or gun metal designed to be worn on apparel or carried on or attached to the person, whether known as watches or otherwise, and whether or not denominatively or otherwise provided for in any other paragraph of the act.

In reply, I have to advise you that in the provisions of the department the broad provisions, "all articles of every description," and "all articles, whether known as jewelry or watches, and whether or not denominatively or otherwise provided for in any paragraph of this act, would seem to set aside specific enumeration. Complete watches, knives, smokers' articles, boxes, cigarette cases and cigar cutters (watches) if wholly or in chief value of German silver, white metal, brass or gun metal valued at 20 cents per dozen pieces or over, are designed to be carried on or about the person dutiable thereunder rather than under the provisions providing for such articles as nominally provided for. The established principle that merchandise to be classified in the condition in which it is presented, it would seem that unassembled watch cases such as cases and movements, are not designed to be carried on the person until further assembled or manufactured into complete watches, and therefore they would be dutiable under Par. 199 which provides for watch cases and watch movements. Thimbles of the materials mentioned, and rings designed to be worn on the apparel or carried on or about or attached to the person, would seem to be dutiable under Par. 199 as articles composed in chief value of metal. Respectfully,
CHAS. D. HILLES, Acting Secretary.

A dispatch from Antwerp, Oct. 9, stated that diamond merchants there were interested to learn that, following the Belgian example, the Dutch government will present a bill in Parliament to adopt a metric unit of 200 milligrammes. This will mean a cut of 3.0864 grains, against the English standard of 3.17 grains.

Watchmaker Disappears After Writing That He Is a Thief and Would Commit Suicide.

Detectives have as yet been unable to obtain any trace of H. A. Roland, a Russian watchmaker, who disappeared from New York, as told in the last issue of THE JEWELERS' CIRCULAR WEEKLY, Oct. 9, leaving behind him a letter containing the announcement that he was guilty of theft, and that he would end his life at an early hour Monday morning by jumping off the Brooklyn Bridge. The letter was addressed to Benjamin Beekman, of L. W. Sweet & Co., New York.

According to the letter Roland had been unable to live in any degree of comfort. He had raised money by pawning his customers' watches, and, being afraid of the police and unable to face the disgrace of exposure, he had resolved to kill himself. The letter which Mr. Beekman exhibited to the police is a curious ill-spelled affair, written in a cramped hand and on fancy note paper. It recounts how the watchmaker had only earned \$30 a month, of which the rent for his little room on the ninth floor ate up \$20. Roland came to L. W. Sweet & Co. three years ago well recommended. He was an expert watch repairer, but after he had been in the employ of the concern for some time they decided to give up this line of business. Roland then started in a repairing business of his own and the firm turned over considerable work to him and helped him in many other ways.

A customer of the watchmaker complained that he was keeping a watch set with diamonds, on the plea that he had sent the works to the factory. The customer asked to see the case and the watchmaker could not produce it. Mr. Raives, of L. W. Sweet & Co., went upstairs and questioned the watchmaker, who confided to him that he did not want his customer to know that he had dropped the watch on the tiles and injured it.

After the watchmaker had disappeared pawn tickets were found in his place of business which aggregated \$92. It is said that Roland pawned between \$300 and \$400 worth of watches, among them one valued at \$190.

Detectives are still searching for the man. Roland boarded in Brooklyn, where it was said that he was three months in arrears for his board. The watchmaker was a widower, and far as known he had no relatives in this country.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

" 14.....	139,945.00
" 15.....	125,595.54
" 16.....	61,250.45
Total	\$630,768.31

J. R. Wood & Son Win Suit Against John C. Proudman Involving a Memorandum Agreement.

The suit of John R. Wood & Sons against John C. Proudman came up for trial Friday of last week in the Supreme Court, trial term, part 16, New York county, before Justice Dayton, and on Saturday morning a sealed verdict was rendered by the jury, finding for the plaintiffs. The action was brought to recover the sum of \$622.14, the value of diamonds alleged to have been converted by the defendant. The case was based on the construction of a memorandum agreement.

When the suit first came up, in January, 1906, a decision in favor of the defendant was rendered. An appeal was taken from this judgment, and a decision of the Appellate Division reversed the judgment of the lower court and granted a new trial. The action tried out, last week, was the retrial granted by the Appellate Division.

The story of the case, as brought out at the time of the first trial, was to the effect that in October, 1904, Mr. Triebelcock, who was a member of the firm of John C. Proudman, New York, and who managed the business, sent a clerk to J. R. Wood & Son's office for two diamonds and some gold, which were delivered to him, together with a memorandum. The diamonds were sold to a third party, and the money received therefrom was deposited in the bank to the account of John C. Proudman & Co. The complaint alleged that under this contract the defendant agreed to return the goods upon demand, and this demand was refused by him and that he had therefore converted the articles for his own use. The answer was a general denial.

At the trial on Friday some of the testimony that had been given before was repeated. Mr. Proudman and Mr. Triebelcock were the witnesses for the defense, and W. A. Nixon, credit man for J. R. Wood & Sons, was the only witness for the plaintiff. Practically no new evidence was offered on either side.

The defense tried to prove that the transaction was changed from a memorandum to a charge account, but the witness for the plaintiffs would not admit of any such agreement, contending throughout his examination that the transaction was on memorandum from first to last.

Another point strongly urged was that the action was brought against Mr. Proudman individually and not against the firm of J. C. Proudman & Co. It was claimed by the defense that Mr. Triebelcock was acting not for the defendant but for the firm. It was pointed out that Mr. Proudman knew nothing about the transaction at the time and that the evidence adduced by the plaintiffs was not admissible under the pleadings, because that was all directed to prove a firm transaction.

In answer to this contention the plaintiffs claimed that when a conversion concerns a firm, an action in any respect to it may be brought against all or any of the partners.

C. F. MacKenzie represented the plaintiffs and B. Pattison the defense.

L. J. Lyons, Suisun City, Cal., has moved to Santa Rosa, Cal.

WE INVITE COMPARISON

Consider all the points that go to make up a perfect Scientific Stone and let your sound judgment pick the best that's offered.

There is a difference.

Long continued experiments on Scientific Stones have brought results, giving our products the distinction which we take pride in pointing out.

It is the absolute purity of the material, its closest approach to the natural gem that, in combination with the highest skill of the cutter, yield the fine quality we claim for our Scientific Products—their Uniformity of shade and form, Correctness of size and Brilliance of finish.

In building up the reputation our Scientific Stones enjoy throughout the country we were guided by a policy aiming to produce an article that would become popular, not by reason of its cheapness, but on account of its intrinsic qualities. Hence—The Superiority of Our Scientific Stones

RECONSTRUCTED RUBIES—SCIENTIFIC WHITE SAPPHIRES—HOPE SAPPHIRES.

JEWELERS BUILDING, 373 WASHINGTON STREET, BOSTON, MASS.

Death of Herbert A. Capron.

PROVIDENCE, R. I., Oct. 16.—Herbert A. Capron, secretary of the Brown & Dean Gold Refiners, 102 Richmond St., this city, died at his home on Pawtuxet Neck, on Monday. For several months Mr. Capron had been in poor health, his condition gradually growing worse until about three months ago he became confined to the bed. While his death was expected by his family and intimate friends, it came as a great surprise to his business associates and others, who were not aware of the serious character of his illness.

Good natured, enthusiastic and energetic, Mr. Capron was a man who made friends easily and always retained them. He was

THE LATE HERBERT A. CAPRON.

well known among the manufacturing jewelers of this city and the Attleboros, while his social affiliations gained for him a wide circle of acquaintances.

Herbert A. Capron was born in North Attleboro, Mass., Aug. 6, 1859, and was the son of George N. Capron, who is still living at the age of 79 years. In 1860 he came with his parents to this city and received his education in the public schools, finishing with a course at Mowry & Goff's School. He came of a family of jewelers, his father having begun as an apprentice to Jabez Gorham, founder of the Gorham Manufacturing Co., 69 years ago, and his father's brothers also being connected with the jewelry industry during their lifetime, one of them, Charles Capron, having been for several years a member of the manufacturing jewelry firm of Palmer & Capron.

Soon after leaving school, at the age of 16, he entered the employ of the manufacturing jewelry concern of McCloy & Swinn as bookkeeper, making occasional trips to New York as salesman for the firm. He remained with the late John A. McCloy through the varied changes in the latter's manufacturing business, and when the latter retired from the jewelry business, in 1890, to start the *Manufacturing Jeweler*, Mr. Capron continued with him as an advertising solicitor. Later he was employed as a solicitor for the refining firm

of Brown & Dean, and when that concern was incorporated, several years afterwards, Mr. Capron, having acquired some stock, became secretary of the corporation, remaining so until his death.

Since 1903 Mr. Capron has been a prominent figure in the automobile business in this vicinity. He organized the Rhode Island Motor Car Co. soon after the popularity of automobiles made the demand such as to command special attention to it, and was manager of the company until its incorporation, last Summer, when he was elected president and treasurer of the company. He was a member of the Rhode Island Automobile Club, the American Automobile Association, the Rhode Island Yacht Club and the Pomham Club, and was also prominently identified with the Ancient Order of United Workmen.

Mr. Capron was twice married, his first wife being a sister of his then employer, John A. McCloy, by whom he had three children, Herbert A. Capron, Jr., who is connected with the Rhode Island Motor Car Co., and two daughters, Florence E. Capron and Bessie G. Capron. His second wife was Minnie O. Chatterton. The funeral was held Thursday afternoon.

Providence Jewelers Taking Part in Coming Elections—Henry Fletcher Renominated as Mayor.

PROVIDENCE, R. I., Oct. 16.—With the holding of the Republican city convention this afternoon and the nomination for city officers, the political contest is on with full headway and will hold the center of the local stage until the election on Nov. 2. Henry Fletcher, treasurer of the Fletcher-Burrows Co., manufacturing jewelers, has been renominated as Mayor, and it is expected that he will be re-elected by an increased majority over last year.

At the convention this afternoon among the delegates were the following who are associated with the manufacturing jewelry industry: Ward 1, Henry D. Sharpe and Harold N. Ostby; Ward 6, Nelson S. Gibbs; Ward 7, George H. Grant and Edmund A. Truelove.

In the make-up of the Republican ticket for members of the City Council the names of the following jewelers appear: Ward 2, Alderman, John Kelso; Councilman, William A. Schofield, Ward 5, Councilman, Albert E. Stevens; Ward 6, Councilman, Joseph Baker, Jr.; Ward 7, Councilmen E. Merle Bixby and Aldridge G. Pearce.

The fact that Roswell C. Smith, of the Sydney Smith Co., was not re-elected one of the members of the State Central Committee from this city at the Republican State convention the other day has brought to light a good story. The Providence delegates held a caucus before the convention, and it was pretty well understood by them that the same committeemen would be re-elected. Representative Harry Cutler, of the Cutler Jewelry Co., who was to have nominated Mr. Smith, was elected chairman, and when it came time to nominate the State Central Committee the name of Walter H. Durfee, manufacturer of tubular chimes and hall clocks, was placed in nomination in place of Mr. Smith, and the delegation was elected before the members were aware of what was happening.

Boston, Mass., Police Puzzled as to the Identity of Thief Convicted of Robbing Jeweler.

BOSTON, Mass., Oct. 18.—Robert Fulton, the young man who stole three diamond rings valued at \$300 from the jewelry store of Elmer P. Sawtelle, 34 Huntington Ave., on the evening of Oct. 6 and who was arrested only after a long and exciting chase and a desperate street fight, although sentenced, last Friday, by Chief Justice Bolster in the central police court to an indefinite term in the Concord Reformatory, has fooled the police up to now as to his identity and his home address.

From time to time Fulton has been arraigned in court and upon each occasion he has persistently declined to tell the judge anything of himself or of his past life. He was debonair, well groomed and well supplied with money. The police are satisfied that he had two comrades in his daring robbery, and yet he has persistently declined to tell anything of them. They were seen, and the police have a good description of them and are searching for them. In an unguarded moment Fulton dropped the information that he "belonged in Newark, N. J.," but the police of that city have written Deputy Superintendent Watts that they do not know Fulton.

Before Fulton was sentenced, however, Deputy Superintendent Watts received a communication from the police of Springfield, Mass., in which he was told that Fulton is wanted in that city for a larceny. A warrant was contained in the letter calling for the arrest of Fulton on the charge of stealing \$180 from Henry E. Marsh, of Springfield. Chief Justice Bolster, when told of this fact, ordered that Fulton be held at Concord Reformatory at the expiration of his Boston sentence for the custody of Patrolman Toland, of the Back Bay police station, so that he could take him into custody upon the Springfield warrant and deliver him to the Springfield officers.

When he was sentenced, Fulton smiled, and when he was taken away to prison he laughed aloud and intimated that he had fooled the detectives and would continue to fool them to the end of his trials. He did not enjoy the story of the alleged Springfield transaction and said he would defeat the officers in this incident without difficulty.

But the police are now determined to discover who he is and what his history is, and to that end thousands of circulars bearing his picture and measurements will be sent broadcast throughout the large cities and towns of the world in the effort to ascertain if he is wanted for crimes in other places and with the hope of ascertaining who he is. Fulton is regarded as one of the cleverest thieves the Boston police have had to deal with in a long time.

Mr. Sawtelle recovered his property stolen by Fulton.

Harry G. Palmer has resigned his position as watch inspector for the Boston & Maine Railroad at Mechanicville, N. Y., and also disposed of his jewelry business. After a short sojourn in the Adirondacks he contemplates moving to the far west.

Fuller & Sons Co. has also secured following: 75 ozs. 14k. gold, \$13.20 per Troy ounce; 12 ozs. 24k. gold, \$22 per Troy ounce; four ounces 14k. gold wire, 12 to 20, B. & S. wire gauge, \$13.60 per Troy ounce; five ounces do., 0.044 inch diameter, \$13.60 per Troy ounce; nine ounces do., 0.072 inch in diameter, \$13.60 per Troy ounce; 150 hollow gold balls, 14k., 1/16 inches in diameter, 12.5c. per dwt.; 50 wt. gold solder, 10k., best quality, 54c.; 50 pwt. do., 12k., best quality, 63c.; 50 14k. gold joints, 5/16 inch, 20c. each; 50 do., 1/4 inch, 18c. each; 50 14k. gold pin gages, 1 1/2 inches, 50c. each; 50 do., 1 1/4 inches, 45c. each.

The C. G. Braxmar Co. will furnish 30 enamel targets for distinguished pistol shot badges at \$2.50 each; also 50 for distinguished marksmen's badges at \$3.50 each.

All the foregoing items are for the use of the Rock Island Arsenal.

Attachment Against Stock of J. S. Stimpson, Missing Wheeling, W. Va., Jeweler.

WHEELING, W. Va., Oct. 13.—Nothing has been heard of J. S. Stimpson, the Market St. jeweler, who disappeared from this city Oct. 4, but last week an attachment against the contents of his place of business was sworn out by George Hess, Bridgeport, and the store was closed by Justice Hobbs. Mr. Hobbs alleges that he took a diamond ring valued at \$185 to Mr. Stimpson to sell on commission, and though the jeweler gave him a check for

this amount it was not paid when presented at the bank. It is said that the missing man owes in all about \$1,500, including two claims for \$500 and \$335 respectively.

Mrs. Stimpson, the wife of the jeweler, says that she fears that her husband has met with foul play. At the time he disappeared, she says, he started from his home at the usual time and told her that he would attend a meeting of the Woodmen's Lodge before he returned in the evening. He did not attend the lodge meeting and she has heard no word from him since. Friends of the jeweler say that unless he has met with an accident they are sure that he will return and settle up all his obligations.

Mr. Stimpson started in business for himself early, last year, prior to which time he was employed by T. A. Westmyer, of this city.

Hezekiah R. Cox, Madisonville, Ky., Goes Into Voluntary Bankruptcy.

MADISONVILLE, Ky., Oct. 13.—Hezekiah R. Cox, a jeweler of this town, has filed a voluntary petition in the office of the Federal Court at Owensboro, and according to schedules which accompany the petition his liabilities are \$12,009 and the value of his available assets about \$3,337. Mr. Cox's financial trouble is said to be due to the fact that he suffered from a fire a short time ago which destroyed a large quantity of his stock, on which he has been unable to collect insurance.

Mr. Cox, who was formerly in business in Johnson City, Ill., sold out the business in October, 1904, to G. E. Ellis. He came to Madisonville in 1906 and continued here ever since; for a while he had a branch in Greenville, but this he sold out in September, 1908. In the Spring of last year Mr. Cox was burned out, and he suffered a loss on his stock of about \$5,700, and his fixtures, worth \$2,200, were also destroyed. At the time, he was insured for \$5,000 and was able to adjust his loss on the fixtures, but the loss on the stock was not settled for and the claim is still in the courts.

Boston, Mass., Police Arrest Man Who They Believe Robbed Jewelers.

BOSTON, Mass., Oct. 17.—Another young man who is suspected of being a clever and highly successful jewelry thief was captured by Inspectors Patterson and Norton, Friday afternoon. He was caught in a west end pawnshop in the early evening when he was in the act of selling a mileage book on the Boston & Maine Railroad, good between Boston and Marblehead and valued at \$37. The ticket was good for 150 trips, and later it was discovered that it was stolen two weeks ago Thursday evening from F. O. Smith, a clerk in the Boston postoffice, who lives at 149 Elm St., Marblehead.

The prisoner, who gave the name of John Donovan, 33 years old, of Middlesex St., this city, was arrested because he is suspected of being one of those thieves who prey upon jewelers. He called at the west end pawnshop on the evening of June 12 and sold a large and miscellaneous lot of jewelry, consisting of solid gold finger rings, cuff buttons, a lady's solid gold watch and numerous other articles of personal adornment. The pawnbroker reported the incident and the detectives began a search for the young man. Yesterday afternoon, while the police were waiting, the man who gives his name as Donovan dropped into the pawnshop and attempted to sell the mileage book, and he was at once recognized as the jewelry thief and arrested. He had in his possession two of the modern skeleton keys, which will open almost any lock, and because numerous jewelry stores in the suburbs have been entered in this manner and looted the police strongly suspect that the prisoner is the man who has been so persistently sought by the small jewelers throughout New England.

Donovan was well dressed, suave and polished, and he seemed thoroughly acquainted with the ways of detectives, for he was in perfect control of his emotions and declined to talk about himself, his habits or his home. He laughed cheerily with the police and told them it was their job to get him and that he was not going to be anybody's fool and peach on himself.

Donovan was photographed, measured and finger-printed for the rogues' gallery, and his records will be sent to the jewelry trade in the effort to secure an identification of him. It is strongly suspected that he does not live in Boston and that he is a jewelry thief of national reputation.

Much of the jewelry pawned by Donovan has been recovered by Deputy Superintendent Watts, and it will be placed on exhibition by Chief Inspector Dugan in the effort to secure identifications of the property. Jewelers who have lost property by thievery have been invited to call at police headquarters and look at the articles recovered from Donovan.

Later the police discovered that Donovan is known to them as Joseph E. Barrett and also as John Thompson. Cyrus H. Blackington, 1334 Blue Hill Ave., Mattapan, claims some of the jewelry sold by the prisoner to local pawnbrokers. It was stolen some time between Aug. 12 and 14.

Donovan, or Barrett, has been hell for trial. The police are active in looking up his record.

Death of Paul Juergens.

CHICAGO, Oct. 16.—Paul Juergens, founder of the Juergens & Andersen Co., and president of that corporation, passed away this morning, aged 75 years. The news of his death came as a great shock to all the people of Chicago, where Mr. Juergens had been favorably known for over half a century. Of late years he had not been actively engaged in business, coming down to the office but a few hours a week. The funeral services will be held Monday, at 2 p. m. Probably no man in the United States

THE LATE PAUL JUERGENS.

more to do with the development of the manufacturing jewelry industry of this section of the country than Paul Juergens. Born in Oldenburg, Germany, on Sept. 19, 1834, he had the advantage of a good education in the public schools, and was carefully instructed in the silversmith's craft at his father's bench. When 16 years of age he came to this country and first found employment with a small German jewelry store in New York, with which he remained for years; after that he was employed by Cooper & Fisher, jewelers in the same city. In 1854 his father also came to this country, bringing with him his family of five children, and in company with Paul Juergens came to Chicago, establishing the firm of Juergens & Son, manufacturing jewelers, at 77 Lake St.

In 1857, Sebastian Andersen, who had married a sister of Paul Juergens, came from New York and joined the firm, the name being changed to Juergens & Andersen. Subsequently they moved to the rear of 117 Lake St., back of what was at that time the leading retailer jewelry firm in the city, Matson & Hoes. In 1871 the great fire of Chicago burned them out, causing a loss of \$37,000. The concern quickly reorganized and moved to a barn on Eldridge Street. Another move found them located on the second and third floors at Jackson and Wabash Ave. Four years later they again moved to the northeast corner of State and Madison Sts. While there, in 1876, the company was incorporated, with

Mr. Andersen as president and Mr. Juergens, treasurer.

Mr. Andersen died in 1894 and Mr. Juergens assumed the presidency. In 1900 the firm moved to its present location, 92 State St.

Mr. Juergens was married in 1862, and his family consisted of five children, two boys and three girls. The sons, Wm. F. Juergens and H. P. Juergens, are, respectively, treasurer and secretary of the concern, Wm. G. Andersen being vice-president.

Mr. Juergens was a man of sterling character. Starting with a small capital, great skill in his craft and tireless energy he surmounted difficulties that would have embarrassed many men. The great loss in the fire of 1871 found him more ambitious than ever to retrieve the losses the firm sustained. While many older and richer firms compromised with their creditors after the fire, Juergens & Andersen paid dollar for dollar, and no jewelry firm in the United States ever enjoyed a fuller measure of confidence than the firm of which Mr. Juergens was so long a member.

Death of George P. Olmstead.

KANSAS CITY, Mo., Oct. 13.—With the recent death of George P. Olmstead, for several years a partner in the jewelry firm of Cady & Olmstead, this city, the trade lost an upright business man and this city an honorable citizen. Mr. Olmstead's death, at the age of 80 years, was caused by heart disease. Besides his interest in the jewelry firm, Mr. Olmstead was a large investor in cattle ranches in Texas and Arizona, had extensive mining interests in other States and was a retired lumber merchant.

The deceased was born, Sept. 17, 1829, in Little Falls, N. Y. He was obliged to leave school when quite young and started to learn the trade of carpenter. He moved, in 1859, to Pontiac, Ill., where shortly afterward he married Miss Cornelia E. Hunt. He went to Tuscola, Ill., two years later, and there engaged in the lumber business, remaining there for eight years and finally coming to this city, where he again entered the lumber business with John Hall and C. B. Leach. This business continued until 1887, when Mr. Olmstead retired from active business, retaining, however, his interest in the Cady & Olmstead Jewelry Co. until 1903, and his mining and ranching interests until the time of his death.

C. N. Olmstead, who was one of the founders of the jewelry firm, died in March, 1882, and after that L. S. Cady and G. P. Olmstead continued without changing the style until 1901, when the business was incorporated as the Cady & Olmstead Jewelry Co., with an authorized capital of \$100,000, fully paid in. When George P. Olmstead retired from the concern his stock was taken over by Mr. Schneider, who has succeeded him as vice-president. The deceased was a keen business man and a student of scientific and biblical subjects.

The police of Glens Falls, N. Y., have taken into custody two men, who are believed to have been implicated in the recent burglary of the store of J. E. Thompson. The store was entered a short time ago when stock valued at \$100 was stolen.

Tiffany & Co. Reported to Have Been Robbed of a Valuable Necklace and Ring.

According to newspaper reports, a mysterious theft of a diamond necklace, said to be valued at \$10,000, and a princess ring, set with four rows of diamonds, from the workshop of Tiffany & Co., New York, on the fifth floor of their Fifth Ave. building, occurred a short time ago, and is giving no end of trouble to the detectives who are trying to solve the mystery.

The gems, according to the story in the daily papers, disappeared a few days apart, despite precautions that would seem to make such thefts impossible. So careful was the secret of the necklace guarded that it was not known to the general public that the jewelry was missing until Monday.

The necklace had been sent to Tiffany & Co. for repairs about four weeks ago. The diamonds of which the necklace was composed ranged in size from 1½ to 3 carats, and attached to the necklace was a sapphire pendant in the form of a star. The necklace was placed in the hands of a trusted workman in the main room on the fifth floor, and he was instructed to have it ready the next day. According to the story, the man left the room for a few minutes, placing the necklace in a box on his work table, and, on returning, the necklace was missing. He notified the superintendent of the store and a search of the room followed. No one was allowed to leave the room, and private detectives conducted a close examination and personal search of each employe.

The ring, which disappeared four days later, according to the story, vanished in an even more mysterious manner. After the theft of the necklace extra precautions were taken to guard against possible loss in the future. Notwithstanding this precaution, the ring also was missed.

Inquiry at the Tiffany & Co. establishment by a representative of THE JEWELERS' CIRCULAR-WEEKLY failed to throw any light on the story. Several people who were asked about the matter said that they could give no information, and all inquiries were referred to Geo. Fred Heydt, who, in turn, turned the matter over to Mr. Moore, the head of the concern. When questioned as to the story which appeared in the papers, Mr. Moore flatly refused to give out any information whatsoever. He said that the matter did not concern the public and that he did not care to have anything published about it in any way, adding that when Tiffany & Co. had a story which they wished published they would give it out themselves. He would neither affirm nor deny the newspaper accounts, and said that he had absolutely nothing to say one way or the other.

Manufacturing Jewelers Pay Tribute to Henry G. Thresher.

Members of Trade from Providence and the Attleboros Tend Mr. Thresher a Complimentary Dinner and Present Him with a Handsome Loving Cup.

PROVIDENCE, R. I., Oct. 16. More than a hundred manufacturing jewelers and others identified with the industry in this city and county attended when Henry G. Thresher, of Waite-Thresher Co., chairman of the committee of the New England Manufacturing Jewelers and Silversmiths' Association (which secured the new jewelry schedules in the Payne tariff bill passed the last session of Congress and which brought about improved conditions in the jewelry industry throughout the country), was given a complimentary dinner at the West Side Club, this evening, and was presented with a silver loving cup.

The occasion was taken as one on which to do honor to the man who, it was said, had preserved the industry and given labor thousands of jewelry workers, not only in this State, but in all the States where jewelry is manufactured.

Previous to the dinner, which was held in the dining room of the club, a reception was held from 6 to 7 o'clock in the club parlors, following which an excellent menu was served. At the conclusion of the dinner Harry Cutler called the assemblage together and in a speech introducing the Governor he called attention to the extent, value and importance of the manufacturing jewelry industry, in this vicinity. He said in part:

MR. CUTLER'S REMARKS.

"We are gathered here, this evening, actuated by various motives: First, to show the guest of the evening our friendship for him, and, secondly, to do him honor because honor is due him. A little over a year ago, when it became known that it was going to be the business of the Administration to mutilate a business contract with the rest of the world, naturally every industry looked toward its leaders to present its case before the proper tribunal in the proper manner. The jewelry industry, common with all other industries, looked for its leaders to present their side of the case.

How well and with what zeal, self-sacrifice, and with what success the guest of this evening served you I am not at this time to say. Others present, in all probability, will do that. Those in Washington who regarded the manufacturing jewelry industry as a small one and had looked upon it in the nature of a side show or corner stand needed instruction and education upon its importance. There was but one man among us to do that sort of a task.

Our guest showed to the Representatives at the Capitol that the manufacturing jewelry industry in Providence and the Attleboros represented an investment of \$35,000,000 in 412 individual establishments, employing 19,000 hands, with wages for a year amounting to \$10,000,000, and with sales amounting to \$41,000,000 annually, within a radius of 15 miles, and that more than 75,000 persons are dependent upon it for a livelihood.

It required careful consideration and judgment to just the proper time and the proper manner in which to present these facts to the commission which their full significance would be most forcibly. But he chose his time well and succeeded in bringing to our Solons, what was news to a majority of them, that the manufacturing jewelry industry of New England was not a prize-package business, but a business of considerable moment. It was left to our guest to explain to the national lawmakers that we manufacture a luxury subjected to the vagaries of the season and the whims and fancies of the people.

It was necessary to make them fully understand that in the jewelry industry the competition was keen at home and keener from abroad. With the so-called German agreement and erroneous classifications with which he had to deal, we could not have made a better selection as to our leader and

representative. He did our work and did it well at a great personal sacrifice. He argued that if we were paying wages amounting to \$10,000,000 annually why not bring about a condition whereby we could pay wages amounting to \$20,000,000? He acted for us as our emissary at court and is entitled to all the honor that we can bestow. We love him, and we feel that this is a fitting manifestation of our regard and high esteem.

If it had been possible there would have been four times as many present this evening to join with us in this demonstration of our appreciation, but even though it were 10 times that number here assembled, our regard and esteem could not have been made more sincere, notwithstanding the unanimity of regard with which we hold him.

In introducing Governor Pothier, Mr. Cutler referred to the time when the Governor and Mr. Thresher served the State together in the General Assembly, in 1888. Governor Pothier was received with a ris-

HENRY G. THRESHER.

ing applause as he rose to respond. He spoke feelingly, and said:

GOVERNOR POTHIER'S REMARKS.

"I could not possibly refuse an invitation to attend this gathering and be present on an occasion like this in honor of Henry G. Thresher, and I esteem it a privilege, indeed, to be able to pay my tribute of admiration and respect to a citizen and a gentleman whom I have known intimately for several years.

Mr. Thresher was associated with my early days. I shall always remember him for his kindly assistance and companionship. I recall with feeling of greatest pleasure the first day I met him, when in 1887, young and unknown, he welcomed me to the legislative halls of our State. His interest in me has never flagged. The grasp of his hand has always been warm and his countenance always cheerful and inspiring. Men like him are an honor to Rhode Island, and it is because our State numbers in the ranks of its citizenship men of such unblemished character, hearty and true, that it stands to-day in the front ranks of progressive commonwealths, strong in business credit, strong in its institutions. You are honoring yourselves, gentlemen, and honoring your industry in honoring Henry G. Thresher.

Mayor Henry Fletcher, of the Fletcher-Burrows Co., manufacturing jewelers, was the next speaker. He said:

MAYOR FLETCHER'S TRIBUTE.

I admire the man that can do something. This

country, this State and this city owes its prosperity and its greatness to the fact that it has men who can do and have done something. The day has gone by when we ask a man who his father was or who his family was. It is to-day who are you and what have you done, what are you doing and what are you going to do?

The guest of the evening knows how to do things. He knew how to get about to do the very things you desired him to do. What he did was not from selfish motives. It was rather for the men at the bench that he worked, and in working for them he worked for this State.

It is fitting and proper that the manufacturing jewelers should convene here to-night to express their appreciation of the work performed by Mr. Thresher in Washington before the tariff revision committee in behalf of our interests.

The importance of his achievements and the skillful manner in which the question was handled stamp him as a past master in the consideration of such problems.

We admire him for the untiring zeal, energy and enthusiasm which he brought to bear in the execution of his commission. He performed his task in a characteristic manner and we know from experience that his efforts will be exceedingly likely to accomplish the desired end.

I admire him for his integrity and join with you in paying tribute to a man who is a man. That is the highest tribute you can pay. The best work we do we do for others. Mr. Thresher has by his labors done this State great service. The benefits to be derived will unquestionably prove of great advantage to the craft, and the community accordingly, and it affords me great pleasure to join with you in hearty commendation of his efforts which were crowned with such signal success.

Judge William H. Sweetland, of the Rhode Island Supreme Court, said in part that it was a pleasure to take part in this complimentary dinner, given in honor of Mr. Thresher, "as not only does Mr. Thresher enjoy the high esteem of the manufacturing jewelers, but he enjoys the high regard of all citizens of the State. What he did was for the prosperity of the industry and the State. Such qualities as he possesses cannot be but for the good of the entire community."

Judge Christopher M. Lee, of the Superior Court of Providence County, said it was a great honor to be present to pay respects to one who had done so much for the industrial life of the State. "It is an honor to do honor to such a man," he said.

George W. Gardiner, Collector of Customs, Custodian of the Federal Building and Appraiser, after paying a fitting tribute to the occasion and the guest of honor, spoke of the elevating influences of the jewelry industry, saying: "You men have not only developed an industry that has bedecked and bejeweled kings and princes, but you have also clothed every housemaid in the land with 'clatonic sovereignty.'" In a happy manner, Collector Gardiner told of his efforts and that of his deputies to interpret paragraph 448 in the new tariff measure. He read the paragraph and finally, after suggesting that the paragraph was easy of interpretation, suggested that all Mr. Thresher did was to secure a duty of 85 per cent. on novelties and such things.

Alfred Krower, of New York, replied to Mr. Cutler's introduction as an importer and paid a high tribute to the work done by Mr. Thresher. He said that the paragraph in the new tariff bill left little to be desired on the part of the jewelers. The differences between the pay of the foreign workmen and those of this country were pointed out by Mr. Krower, who claimed that anyone familiar with the manufacturing jewelry business in this country and abroad would have no

CHAS. KELLER & Co.

ESTABLISHED 1865

SEVENTY-ONE NASSAU STREET, NEW YORK CITY

MANUFACTURERS OF 10KT.
AND 14KT. JEWELRY FOR THE

will offer for sale to the trade, at public auction, without reserve, on behalf of the purchasers, a stock recently acquired of

JOSEPH FRANKEL'S SONS

This stock is the balance of goods purchased by Joseph Frankel's Sons of **GATTLE, ETTINGER & HAMMEL**, and consists approximately of **\$500,000** worth of jewelry mounted in a highly artistic manner with the finest grades of

DIAMONDS, PEARLS and PRECIOUS STONES

Goods open for inspection until October 23 at 505 Fifth Ave., near 42d St. Sale begins October 25

difficulty in seeing without any lengthy explanation that 85 per cent. tariff was not excessive and did not afford the industry more protection than was necessary for its prosperity. He concluded by wishing Mr. Thresher long life and prosperity. Toastmaster Cutler then called upon Mr. Thresher, who, after thanking the large company for the honor paid him, gave a detailed account of the appointment of the tariff committee, of the numerous meetings and conferences that were held in this city and the Attleboros and the framing of the wely paragraph; of the many visits to Washington, the appearing before the tariff committee; of the obstacles that were encountered and overcome and of the many explanations made and prejudices that had been cleared away before the paragraph as now stands was finally adopted as a part of the tariff law.

In explaining the benefits of the new jewelry schedules, Mr. Thresher said:

MR. THRESHER'S RESPONSE.

We had no need for a new tariff bill in 1897 jewelry as we have now, but owing to the erroneous classifications of goods which were brought into the country under wrong schedules, we were forced this year to frame a new jewelry schedule. The Collector of Customs at New York had 15,000 cases of appeals before him which were pending owing to the uncertain definition of the various classes of jewelry. The new schedule, while complex upon its face, figures out to be an ad valorem duty of 85 per cent. on all grades of jewelry as described in the paragraph. It defines jewelry, and jewelry will come in under ar. 448 at an increase in duty of from 60 per cent., as it was in the Dingley bill, to 85 per cent. of the new Payne bill. The Government's losses have been stopped and the largest importers of chains are bringing in more chains, including cable, curb and rope chains, than before the schedule came a law.

Mr. Thresher told of the prosperity in the jewelry business that has resulted from the passage of the new tariff law and pointed to the great demand for help and the revival of many industries in connection with the trade that had heretofore been slack. He mentioned the many lines of jewelry that were now open to manufacture by concerns here, including dress buttons, militant and millinery ornaments that heretofore were prohibited as a product owing to the sharp competition of cheap foreign labor.

At the conclusion of Mr. Thresher's address Secretary Everett L. Spencer read letters of regret from Gen. Thaddeus F. Sharretts, of New York Custom Appraisers' Board; United States District Attorney-General Charles A. Wilson, Congressman Adin B. Capron, William H. Waite and James R. MacColl. George H. Holmes, chairman of the Advisory Council of the Association, was then called upon, and said: "This is one of the rare occasions that come in the lives of men. It is frequently customary for men to be honored in military, political, social and religious life, but it is seldom that a man is honored in commercial life, especially by men of his own industry, and particularly when there is the keen competition in that industry that there is in ours."

Mr. Holmes then referred briefly to the work done by Mr. Thresher and the beneficial results to the industry, community and country, and concluded by presenting Mr. Thresher with a handsome silver loving cup on behalf of the members of the association and friends of the recipient.

Mr. Thresher was taken completely by surprise, and it was several minutes before he was able to thank his friends and business associates for the kindly remembrance.

Seated at the Tables.

At the head of the dining hall was a long table, extending its entire width, at which were seated the officers, speakers and invited guests, while at a score of small tables, arranged tete-a-tete, were gathered more than a hundred manufacturing jewelers of this city and the Attleboros and personal guests.

Seated at the guests' table were Toastmaster Harry Cutler, president of the New England Manufacturing Jewelers and Silversmiths' Association; Gov. Aram J. Pothier, Mayor Henry Fletcher, Judge William H. Sweetland, of the Supreme Court; Judge Christopher M. Lee, of the Superior Court; Collector of Customs George W. Gardiner, Henry D. Sharpe, of Brown & Sharpe Mfg. Co.; Henry G. Thresher, George H. Holmes, Col. J. Edward Studley, George K. Webster, of North Attleboro; Theodore W. Foster, Isaac F. Foster, Albert A. Bushee, of Attleboro; John J. Butler, Former Representative Albert Totten, of North Attleboro.

Grouped about the smaller tables were the following: Ralph S. Hamilton, Dr. Frederick V. Hussey, Robert M. Hamilton, Ralph S. Hamilton, Jr.; George H. Cahoon, Abil Davis, Alfred Krower, of New York; Edward B. Shepard, Frederick A. Ballou, Edward B. Hough, Fred D. Carr, Howard D. Wilcox, William B. Peck, Eugene W. Knight, Herbert F. Tourtellott, C. Horton Whipple, Bradford Campbell, Peter Lind, William H. Mason, **JEWELERS' CIRCULAR-WEEKLY**; Thomas W. Williams, *Providence Journal*; Walter B. Frost, *Manufacturing Jeweler*; Edward K. Brown, *Evening Tribune*; Clarence M. Dunbar, Wade W. Williams, Frank T. Pearce, Aldridge G. Pearce, Everett L. Spencer, Walter W. Burnham, Archibald G. Loomis, J. Perry Carpenter, Samuel M. Einstein, of Attleboro; Thomas S. Carpenter, of Attleboro; R. C. Thompson, Charles A. Whiting, North Attleboro; Charles E. Hancock, Eustace Crees, E. C. Bliss, E. M. Bliss, of Attleboro; Nephtalie Levy, Lucien Kosmann, Horace W. Steere, William H. Grafton, William S. Metcalf, of Plainville; Samuel S. Wild.

Henry W. Harvey, John M. Buffinton, LeFavour H. Bosworth, Harry M. Mays, Dr. Henry Rolfe Brown, Fred A. Bigelow, Edwin A. Sweeney, of Attleboro; Hon. Sydney O. Bigney, of Attleboro; Frank Mossberg, of Attleboro; Augustus A. Greene, William P. Chapin, Charles W. Battey, Harold C. Field, Arthur O. Ostby, Englehard C. Ostby, Alfred K. Potter, Frank C. Miller, Frank B. Reynolds, R. Foster Reynolds, W. S. Ballou, of North Attleboro; Roswell Blackinton, of North Attleboro; Charles T. Paye, of North Attleboro; W. N. Fisher, of Attleboro; Walter A. Griffith, Dr. J. B. Gerould, of North Attleboro; Meyer Harzberg, William Wildpret, Maurice J. Karpeles, George C. Rueckert, William A. Copeland, George Bunce, Ludwig J. Roehr, Samuel D. Macpherson, Edward Parsons Tobie, executive secretary to Gov. Pothier; W. A. Cook, of Attleboro.

Banquet Pickings.

Alfred Krower was the only New Yorker present.

The music by Fay's orchestra was greatly appreciated and encores were frequent.

Ralph S. Hamilton and his brother, Robert, and son, Ralph, Jr., made an imposing trio of diners.

The menu cards had a very clever pen and ink portrait of the guest of honor, Henry G. Thresher.

Harry Cutler made an ideal toastmaster. His introductions were well chosen and sly hits prettily turned.

Governor Pothier, Judge Sweetland and Mr. Thresher were all members of the Rhode Island Legislature in 1888.

Many got caught on Collector Gardiner's joke that the new jewelry tariff paragraph was printed on the back of the menus.

The Ostby & Barton Co. was represented by President Englehardt, E. Ostby, Secretary Fred D. Carr, Factory Manager Arthur O. Ostby.

John J. Butler, superintendent of the Waite-Thresher Co.'s shop cut his vacation short so as to be present to assist in honoring his employer.

The reception and dinner proved a pleasant event, ably conducted by a committee consisting of Frank T. Pearce, Everett L. Spencer and Harry M. Mays.

Notice was given that the expression, "chaticon sovereignty," used by Collector Gardiner, had already been appropriated by Theodore W. Foster. At least so George Holmes says.

Two members of the Rhode Island General Assembly, a Mayor of Providence, an ex-Mayor of Pawtucket, and two former members of the Massachusetts Legislature, all jewelers, were seated at the tables. Going some?

A pretty effect was afforded in the lighting of the dining hall. On each table were candelabra with lighted candles and deep red shades. As Governor Pothier entered the hall the large incandescents overhead were suddenly turned on, flooding the room with brilliant light.

Involuntary Bankruptcy Petition Filed Against Abe Orman, Philadelphia, Pa.

PHILADELPHIA, Pa., Oct. 15.—A petition in involuntary bankruptcy has been filed against Abe Orman, 507 South St., in the United States Court, Oct. 11, 1909. The petitioning creditors are: Marden & Kettlety Co., Tuttle & Stark and Silverman & Bros. On an application filed by the above petitioners through Attorney William P. Davis, Jr., Potter Davis, Jr., has been appointed receiver and has authority to dispose of the assets at public sale after ten days' notice to all known creditors.

Samuel W. Cooper is acting for the petitioners and Bamberger, Levi & Mandel for the baukrupt.

Thief Captured While Trying to Rob Window of Geneva, N. Y., Jeweler.

GENEVA, N. Y., Oct. 16.—There was a daring robbery at L. H. Barth's jewelry store this evening. The thief smashed in a window, grabbed a tray of watches and other jewelry and started to run, but bystanders who saw him at once put him under arrest.

The jewelry taken was valued at \$400, and it was all recovered on the thief and in the street. The burglar gave his name as Harry L. Lloyd, aged 60 years. The man has a State prison record.

F. A. Brigham has opened a store in West Point, Ia.

K. L. Turner has just begun business in Dallas, Ga.

E. C. Dwyer recently engaged in business at Greenville, O.

Ralph R. Briggs has opened a jewelry store at Leeds, N. Dak.

W. A. Fabian has opened an office at 805 Sansom St., Philadelphia, Pa.

S. Klein recently opened an antique shop at 135 S. 8th St., Philadelphia, Pa.

George N. Smith will shortly open a retail jewelry store at Apponaug, R. I.

W. H. Bayles has engaged in business as a retail jeweler in Port Jefferson, N. Y.

G. L. Gardner will start in business at Fort Meade, Fla., about Jan. 1.

J. A. Dowding has located in Benkelman, Nebr., where he has opened a jewelry establishment.

McEwan & Ramsey will open an up-to-date jewelry store in the near future at Fond-du-Lac, Wis.

L. E. Freedman has started in business as a watchmaker and optician at 1480 Madison Ave., New York.

A new jewelry establishment was opened recently by the Brown & Armstrong Co., at 1208 F St., Washington, D. C.

L. R. Dillingham, Spokane, Wash., will soon occupy premises in the First National Bank, where he will conduct a jewelry store.

Raymond Deibert is a new jeweler in Slatington, Pa., where he has begun business in the Marstella building, on lower Main St.

W. H. Hopkins & Co. have leased quarters at 121 Main St., Jacksonville, Fla., where they have opened a retail jewelry establishment.

Edward J. Haas has begun business on his own account at Stanley, N. Dak. He was formerly a watchmaker for Munns & Pomerleau, Minneapolis, Minn.

The Varieties Jewelry Co. has been incorporated in Terre Haute, Ind., with a capital of \$10,000. The incorporators are C. P. and F. C. Mancourt and W. L. Hornbuckle.

The Clecman Jewelry Co. has been incorporated with a capital of \$10,000 in Denver, Colo. The incorporators are Edward C. Clecman, Sayde Clecman and Theodore G. Wilk, Denver.

The International Gold & Diamond Dredging Syndicate, Inc., is a new concern which was recently incorporated in Wilmington, Del. The incorporators are C. E. Pearson, W. P. Pile and B. M. Spicer.

The Frizlen Cut Glass Co. was recently incorporated to manufacture cut glass at Vineland, N. J., with an authorized capital of \$10,000. The incorporators are: Wm.

L. Frizlen and Wilbur F. Tower, Vineland, and David Goerr, Dacosta, N. J.

The Sherwood Jewelry Co. has filed articles of incorporation in Montgomery, Ala., with a capital of \$15,000, of which \$8,000 is paid in. The officers of the concern are: President, John H. Sherwood; vice-president, D. D. Moore; secretary and treasurer, W. S. Sherwood.

The firm of Walter B. Bliss & Co., engravers and manufacturers of fobs, belt buckles, etc., has been organized to do business in room 422, San Francisco building, San Francisco, 4th and Main Sts. The firm is composed of W. B. Bliss and W. H. Breard, the former of Attleboro, Mass. The latter was formerly with Montgomery Bros., Los Angeles.

Window of Frisch Bros. Store at Buffalo, N. Y., Again Smashed by Thieves Who Get \$2,000 Worth of Gems.

BUFFALO, N. Y., Oct. 14.—A tray of diamonds, valued at \$2,000, was stolen from the show window of Frisch Bros.'s jewelry store, 443 Genesee St., last night. The robbery was one of the most daring brought to the attention of the police in several years, and was committed by two men, who made their escape after a long chase.

The tray of diamonds was on display in the show window. Shortly before 9 P.M. a stranger appeared in front of the store. He waited his chance, and when there were few persons in the immediate vicinity he hurled a stone through the window and, reaching in through the hole, grabbed the tray and dashed down the street. A confederate was in waiting a short distance down the street and the diamonds were passed to him, whereupon the men separated. The crashing of glass attracted the attention of several persons and they pursued the fleeing man. He was a good sprinter and soon eluded his pursuers, including the Messrs. Frisch and others of the store, who joined in the chase.

The police of the Fourth Precinct were notified of the robbery and in a short time several detectives were at work on the case. The Pinkerton agency, which is employed by the Jewelers' Security Alliance, was also notified.

Miss Lillian Schick, who saw the men as she was returning home, gave a good description of the thieves to the police. It was she who saw the tray of diamonds passed from one to the other. The police believe that the robbery was the work of experienced crooks, who had carefully planned it in all its details.

This is the second time that Frisch Bros. have been robbed. In each instance the thieves broke the display window.

CLEVELAND, O., Oct. 18.—A man who refused to give his name last Thursday caused the arrest of a suspect whom the police claim is Cowboy Hill, a notorious crook. The man was on a St. Clair Ave. car and noticed two men reading a Buffalo paper and laughing over a robbery and commenting on the cleverness of the job. His suspicions were aroused and he got off and called a near-by police station by phone, stating the facts. A bicycle patrolman gave chase to the car and saw the men on Stanward Ave. and told them they were under

arrest. They ran in opposite directions and he gave chase. The officer shot at one of them, who refused to stop upon being ordered to do so, and probably fatally wounded the man. He was hurried to a hospital at \$300, jewelry and a set of saws were found on him. The man gave his name as Jorab a Spaniard. The police believe he helped rob the Buffalo, N. Y., jewelry store Frisch Bros.

BUFFALO, N. Y., Oct. 18.—Police Chief Regan, of Buffalo, expressed the opinion that the man arrested and shot in Cleveland and his partner were undoubtedly connected with the robbery at Frisch Bros. store. Chief Regan and other members of the Buffalo police department are busy engaged, however, in considering the case of Morris Darling and William Sabin, who were arrested in Buffalo last Saturday afternoon on suspicion of being connected with the robbery. The men had a room in an E. Huron St. lodging house and aroused the suspicions of the police. Detective-Sergeants Lynch, Elsaesser, Schand and O'Connor went to the room, which was on the second floor, and forced the door. When the detectives entered Darling leaped from the window facing the street, carrying with him glass and cash. Detective Schuh went after Darling and captured him at Oak St. The fugitive was not injured. Sabin tried to escape, but was grappled by Detective O'Connor and easily overpowered.

Mawhinney & Ryan Co., Omaha, Neb., After Financial Strain, Take Steps to Liquidate and Reorganize.

OMAHA, Neb., Oct. 15.—The following notice was issued by the Mawhinney & Ryan Co., this week:

"Owing to expanding business by acquiring outside stores before the panic, Mawhinney & Ryan Co. has, for the past year or more, labored under a financial strain. They have recently closed out their out-of-town stores at a great loss and it has been their aim to devote their entire energy and capital to the Omaha store. A difference of opinion among the stockholders as to the investing of more capital has caused a condition to arise whereby liquidation was necessary in order to reorganize and continue the business, and to that end bankruptcy proceedings have been started. The business is still open and will continue to run as heretofore, and a reorganization will be effected in the immediate future."

The business was incorporated under the laws of the State of Nebraska, in 1901, with an authorized capital of \$60,000, and was increased later to \$75,000. Mr. Ryan, manager of the business of A. B. Hulman, for 15 years, and began business on his own account in 1897. He incorporated under the style of G. W. Ryan & Co., reorganized the business in 1900, and in 1901 that business was closed out, at which time he became associated with the present concern.

The firm has always been considered a successful one and has succeeded in building a good business. Mr. Mawhinney, of the firm, was originally employed by the C. Raymond Co., which concern was succeeded by Mawhinney & Holliday, 10 years ago.

News Gleanings.

Carl Wedler, formerly of Rochelle, is now Ashton, Ill.

The stock of Frank Borisk, Norwood, N. Y., will be sold at auction Friday of this week.

John P. Hess, Fond du Lac, Wis., has stalled a new electrically operated cash gister.

A Buckmaster, Madison, Wis., has presented the Caffteria, one of the leading ones of Madison, with a handsome clock. Owing to the death of J. P. Angell, Pine bluff, Ark., his widow, Mrs. E. A. Angell, has discontinued the business at that place. O. H. Stone has sold the business which he conducted for 14 years in Pittsfield, N. Y., to L. L. Huntington, and moved to Livingston.

Joseph Oliver is enlarging his store in Market St., Amsterdam. His salesroom will be twice as large and new show cases will be installed.

Sol Sallan, Detroit, Mich., is particularly militant, notwithstanding the dark days of autumn, a little cheerer in the person of a man having recently arrived.

Geo. A. Coe has sold his store at Leon, Ia., to McCorkle & Allen, Knoxville, Ia. The business is in charge of R. O. Allen. Mr. Coe will probably locate in Wyoming.

The Reitenour Jewelry Co. has been incorporated in Union City, Ind., with a capital of \$6,000. The incorporators are: I. N. Reitenour, S. I. Echelberger and F. T. Parker.

The Kuchl Clock Co., Chicago, has been incorporated with a capital of \$1,000 to manufacture and deal in clocks, watches and jewelry. The incorporators are: Theodore Kuchl, J. Goldiner and John L. Rodgers. Jewelers at Merrill, Wis., were caused no little inconvenience, recently, when the tower clock in the Court House refused to conform to its usual methods of time-keeping. It was repaired by E. O. Farber.

A. A. McIntyre, who is said to be a jeweler, committed suicide in jail at Hempstead, Tex., on Oct. 7, by taking poison. The prisoner had been indicted on a serious charge and was awaiting trial. The remains were buried at Shiloh.

The firm of George T. Brodnax, Memphis, Tenn., celebrated its 12th anniversary, about a week ago, by holding an annual fall opening. The establishment was artistically decorated with flowers and palms and presented a most attractive appearance. Souvenirs in the form of potted plants were given to visitors.

Discoveries of precious stones and gold in Liberia have been reported to the State Department by George W. Ellis, American chargé d'affaires of Monrovia, the capital of the Liberian republic. There is a general belief that a systematic search in the blue clay region of the interior will reveal diamond mines in that territory.

The theft of \$50,000 worth of jewelry from the Ludgate Hill jewelry store of W. C. Aitchison, at London, England, was discovered, Oct. 11. The robbery occurred some time between Saturday night and the opening of the store Monday. Aitchison believes that pickpockets robbed him of the keys to the jewelry vault as he was going home Saturday night.

William P. Yeoman, Waukegan, Ill., who recently died at the age of 71 years, was well known at Kenosha, Wis., where he learned the jeweler's trade under the late R. O. Gottfredsen. At the age of 17 Mr. Yeoman came to Kenosha, where he remained for three years. He was active in the jewelry business at Waukegan until 1905, when he retired and his son took charge of the establishment.

Jewelers in the vicinity of Oklahoma are warned to be careful in dealing with a man who is going through that section attempting to pawn or sell diamond rings. The rings are made up to look worth very much more than their actual value. The man, who was last heard of in the vicinity of Chelsea, Okla., is about 50 years old, with hair turning to gray and speaks with an accent. He has a large bushy mustache, weighs about 160 pounds and stands about five feet eight inches high.

L. C. Trowbridge, Rapid City, S. Dak., was in Sheboygan, Wis., last week, calling on friends in the city, where he had conducted a jewelry business more than 43 years ago. As a young man he conducted a store at Sheboygan in 1865 and 1866. At that time there were only two jewelers in Sheboygan, Mr. Trowbridge and Mr. Pfister, father of W. A. Pfister, well-known jeweler of the State, who is engaged in business at Sheboygan. Before engaging in the jewelry business at Sheboygan Mr. Trowbridge had seen active service in the Civil War and had been a prisoner at Libby Prison.

Sam Berman, a Joseph Ave. merchant, reported to the Police at Rochester, N. Y., Thursday, that he had been swindled out of \$215 by two men, who had sold him a pair of imitation diamond earrings. The men, he claimed, showed a receipt from J. R. White & Co., purporting to indicate that the earrings were bought there for \$465. Inquiry at the White establishment showed that the firm had never had any dealings with the men and had no knowledge of the receipt. After buying the earrings, Mr. Berman discovered that they were only imitations. The detectives have a description of the men and are looking for them.

The annual meeting of the corporation members of the New England Manufacturing Jewelers and Silversmiths' Association will be held at the Masonic Temple, Providence, R. I., on Saturday evening, Oct. 30, for the purpose of transacting routine business and the election of officers. The annual reports of the several officers and committees will give résumés of the work that has been done during the year, while that of President Cutler will outline the policies of the association and make certain recommendations for the coming year's work. The advisory council held its regular weekly meeting at the rooms of the association in the Wilcox building Thursday afternoon, at which there was a good attendance, and much time was taken in the discussion of matters pertaining to the new jewelry tariff and other features of the association work. The free labor bureau that was established about a year ago by the association was discussed at considerable length and plans considered for a change in the policy and method of conducting the bureau during the coming year.

LETTERS TO THE EDITOR.

Exclusive Lines for Retail Jewelers.

MASON CITY, Ia., Oct. 13, 1909.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

The time has come when manufacturers should give the retail jewelers protection and give them exclusive control in their towns for their respective lines. It may not make any difference in some localities or to some retail jewelers, but it does to me. I believe in printers' ink, and have spent a snug little sum of money on it, but I try, as far as possible, to avoid advertising any line that the other fellow carries; but this in many cases is not possible.

In plain English, it makes me sore to take up a new line, such as — eyeglasses, advertise them heavily, trying to create a demand for them, and then have all the other doctors, jewelers, etc., in the town immediately buy them as soon as I have created a demand for them. In one certain line I was selling a line of goods, advertised them heavily and was making some money on them, but another dealer in town (not a jeweler) "buted" into the game, and then another did likewise, and now none of us is doing enough business in the line referred to to buy wadding for a popgun.

In our various watch lines the manufacturers all promise us protection; but they put the retail price on their watches so low that the retail jeweler cannot afford to sell at the "fixed" price and is obliged to boost it a little, and even though the price may be fixed, if he advertises the goods, he is driving part of the rabbits into the other fellow's sack. This plan would be better if all jewelers were good advertisers, but as a rule they are not.

It is a well-known fact that you cannot go into a town the size of Mason City (15,000) and buy Hart Schafer & Marks clothing at two different stores in the town. The same with Stetson's hats and many other like lines, and I think it should be so in the retail jewelry line, especially in watches, clocks, hollow and flat ware, both sterling and plated. The cut glass and china manufacturers are confining their trade, as a rule, to one dealer, and their action is appreciated.

In this city we have a clean set of jewelers, and if any one jeweler, as a rule, is handling a line of glass, silverware, etc., the other fellow keeps out, but in watches, cases and other lines it is a free for all.

I should like to hear from other retail jewelers on this subject through your valuable paper. Yours respectfully,

J. H. LEPPER.

The suit of Mrs. Donie M. Halbert against the E. Howard Clock Co., of Boston, Mass., for the sum of \$30,000 for damages on account of her husband's death from falling clock weights at the Court House at Columbus, Miss., in August, 1908, was tried before Judge Niles in the United States Court at Aberdeen, Oct. 11, and resulted in the defendant company winning the case, Judge Niles holding that it had complied with the contract when it installed the clock and the accident happened 18 months later. Gen. E. T. Sykes represented the clock company.

GORHAM SILVER

¶ The Gorham Company are gratified to announce that they have made every preparation for coping with what bids fair to prove an unusually busy holiday season.

¶ They are enabled to offer to the trade a selection of appropriate goods hitherto unexampled either as to variety of style or individuality of design.

¶ It must, however, be remembered that, though every endeavor will be made to fill all orders promptly and satisfactorily, the interests of all concerned are best served if these orders be placed as early as possible.

Treat Smugglers as You Treat Other Criminals. FROM the words of commendation and indorsement which were received from many members of the trade it would seem that the editorial in the last issue, headed "Stamp Out the Gem Smuggler," struck a responsive chord in many sections of industry and brought forth further evidence to the effect that the smuggling of precious stones, principally diamonds, into the American market has reached a point which causes it to materially affect the industry and seriously hamper the business of legitimate importers and cutters. Whether it is due to a laxness on the part of the Government officials or to the increase in demand for gems in the United States, or both, is not certain, but whatever be the cause, gem smuggling has increased and is increasing at a rate that is disgraceful, and if something is not done soon the industry must suffer.

In stamping out gem smuggling the cutter, the manufacturer and the retailer must assist the Government in getting evidence, but one of the first things to be done in hitting at this illegal practice is for the entire trade to awake to a full realization of the fact that smuggling is a crime and not a technical offense; and that he who encourages the smuggler either by dealing with him or "winking" at his actions is almost equally guilty with him in helping to demoralize the industry, even if he be not a party to the fraud upon the Government. The toleration with which the acts of the smuggler have been looked upon both by the trade and the public is deplorable, because the smuggler is in reality a meaner and more despicable criminal than is the thief. He is a thief as far as defrauding the Government of its revenue is concerned, but in addition he is a disturber of the trade, a liar and a cheat. Through the actions of an ordinary criminal an individual or a firm alone may suffer, but through the acts of the smuggler both the Government and all members of the industry are deprived of what is justly their own.

It is the toleration of the smuggler's practices by some of the reputable firms in Europe that permits the clandestine importation of gems into this country on the scale that it has now reached. Unless the smuggler be recognized as nothing but a thief and a cheat by the legitimate merchants and importers of this country, prosecution and detection will be made unusually difficult. If, on the other hand, legitimate importers and retailers will all make it clear that they will have no dealings with the smuggler, or even with a man suspected of smuggling who is unwilling to prove that the goods that he offered paid their duty, much can be done to stop the spread of this crime. If, in addition, every honest merchant will make public every bit of evidence he gets that would indicate that smuggling had been permitted, many of these crooks must go out of business.

A man who offers to sell smuggled goods or in any way helps in avoiding payment of duty insults the man to whom he makes the offer, and should be treated with no more consideration than would be given the professional crook who offers to dispose of

stolen property. There are no exceptions to this rule. The smuggler is a criminal of the lowest type, and he should be treated as such by all honest men. He who tolerates or associates or deals with "customs thieves," as they are sometimes and properly called, properly forfeits the respect of his honest associates in business.

The Marking Clause of the Tariff Law.

IN a recent letter which was received from Acting Secretary of the Treasury Hilles by the Collector at New York in reference to the enforcement of Section 7, of the present tariff act, as to marking the country of origin on articles generally, indicates an unusual spirit of tolerance combined with common sense on the part of the Treasury Department. It has been the impression heretofore that the officers of the Treasury Department were soulless creatures who insisted on adhering to the letter of the law more than to the spirit, and in no way permit common sense to be considered in the administration of the revenue statutes, which were to be carried out without regard to the effect they would have on mercantile interests. In fact, it was often believed (and the decisions of the department at times almost gave reason for the belief) that in the administration of customs particularly, annoyance of importers under cover of the law was the chief object to be obtained. However, if Secretary Hilles' ruling is indicative of the attitude of the department now, such criticism is far from just.

Articles to be marked, stamped or branded by the provisions of Section 7 of the present law are specifically limited to those capable of being marked without injury, and the department is of the opinion that the various methods referred to in this section are prescribed with reference to the customs of commercial lines and not exactly literally or arbitrarily. The important point of Secretary Hilles' ruling is that the words "capable of being marked" should not be construed by collectors as if they read "possible to be marked," for the Secretary realizes that it might be possible to mark without injury certain articles at a cost so disproportionate to their market value as to practically prohibit their importation. This, he says, is not the intention of the statute. He even goes further in stating, "Neither should the words 'without injury' be construed as referring solely to actual damage to article itself," because "any article intended primarily for ornamental purposes, such as lamp shades, statuary, vases, jewelry, etc., might be marked in a conspicuous place, etc., without injury to their structure, but such marking would

Our Latest Achievement

constitute such a defacement as to materially depreciate the value of the article and, in many instances, render the same unsalable. If, therefore, the market value of an article would be materially decreased by its being marked in a conspicuous place regardless of the character of such mark the same should be considered as not capable of being marked without injury."

In brief, his ruling provides that articles such as are usually and ordinarily marked, must be held as capable of being marked without injury, and all articles of the character required to be marked to indicate the country or origin under Section 7 of the Act of July 24, 1897, should also be required to be so marked under the provisions of said Section 7 of the Act of 1906 and in addition thereto all similar articles though not customarily marked, which are readily susceptible of marking without injury to their structure or materially increasing their value should be so marked.

The question of whether any article is capable of being marked without injury is a question of fact in every instance to be determined by the collector in accordance with the principles which are laid down in this ruling. Doubtful questions, the Secretary insists, should be referred to the Department for determination in order to secure a uniformity of practice at the various ports where a uniformity of practice at the various ports may be maintained.

Washington, D. C.

Elmer D. Cole is selling out at auction the stock of Jerome Desio, of Victor F. Desio & Co. who has returned after a three months' sojourn abroad.

Bradley S. Dixon, a jeweler in E. St. St., is taking a prominent part in the agitation of the merchants of southeast Washington to force the government to reclaim and refill the Anacostia flats.

On the charge of selling jewelry without a license, Sidney Lindmann, who gave his address as Philadelphia, was taken to police headquarters recently by Detective Pratt and Howlett. The man was said to have disposed of a number of pawn tickets for jewelry which his wife had pledged.

Harris N. Brown and Richard Armstrong, Tuesday of last week, opened a new jewelry establishment at 1208 F. St. Mr. Brown has been in the jewelry business in Washington for the past 10 years, and until recently was secretary and treasurer of the Shaw & Brown Co. Mr. Armstrong has been connected with the trade for many years, and was for seven years employed by Shreve & Co., San Francisco. At the opening, last week, the store was handsomely decorated with ferns and flowers and was crowded with visitors.

H. J. Hooper, jewelry auctioneer, of Maiden Lane, New York, has just issued a very attractive and interesting weekly auctioneering. It is for free distribution and a copy may be had by those interested for the asking.

The stock of jewelry and optical goods formerly owned by Mrs. L. D. Chomart of Stockton, Kans., has been sold to W. W. Smith, who has had charge of the store there the last four years. The firm will be known as the Smith Jewelry & Optical Co.

bearing the above trade-mark is vouched for by the manufacturers. It is an unequivocal guarantee that every article bearing it is of the Karat standard, complying in all and every respect with the various stamping laws enacted throughout the country. You can represent it to your customers as we represent it to you with the guaranteed assurance that it is one of the best and most artistic lines offered the discriminating trade of to-day.

H. A. KIRBY

Manufacturers of Gold Jewelry
PROVIDENCE and NEW YORK

New York Notes.

Leo M. Sachs, 7 Maiden Lane, visited the Washington, D. C., trade last week.

Harry Booth, with Sturtevant & Whiting, spending a few days at Lakewood, N. J. J. J. Weil has moved his office from 37 Maiden Lane to the Knox building, 452 14th Ave.

I. Goodfriend, of Goodfriend Bros., 13 Maiden Lane, sailed for Europe recently on the *Mauretania*.

Freeman has opened a place of business at 1480 Madison Ave. Mr. Freedman is a jeweler and optician.

Herman Heilmann, with the Potter & Hinton Co., 65 Nassau St., served on a Brooklyn jury last week.

Edmund Scheuer, Jr., of Edmund Scheuer, Toronto, Can., was among the out-of-town visitors in this city last week.

The Gorham Mfg. Co. has declared a regular quarterly $2\frac{1}{2}$ per cent. dividend on common stock, payable Nov. 10 to stock record Nov. 8.

The Silversmiths Co. has declared a regular quarterly one per cent. dividend on common stock, payable Nov. 15 to stock record Nov. 10.

George Wettstein, Cedar Rapids, Ia., arrived in this city last week in his automobile, in which he made the trip here from his home town.

A. Kent, of Ambrose Kent & Sons, Toronto, Can., was in town last week, and intends to visit the Attleboro factories when he returns home.

L. Sweet, of the R. F. Simmons Co., Attleboro, Mass., sailed Saturday on the *Orland* for a trip around the world. He will be away about five months.

Simon Adler, of Rosenbaum & Adler, 65 Nassau St., sailed Tuesday of last week for Europe on the *Kronprinzessin Cecilie*. He will be away about four weeks.

Samuel and Louis Jaskow, of Bodenmer & Jaskow, 87 Nassau St., sailed Friday last week on the North German Lloyd steamer to visit the European diamond markets.

A large amount of diamonds, watches and gold jewelry, belonging to the estate of Adolph Newburger, is being sold at auction by Frank Walker, 608 Broadway, Brooklyn.

A general alarm was sent out by the police last week for William Ernest Wright, 27 years old, of 428 W. 125th St. Wright is a jeweler. He was last seen at the 42d subway station.

Among the eastern manufacturers seen in the Lane during the last week were George A. Whiting, of Sturtevant & Whiting, North Attleboro; and G. Herbert Tench, of Riley & French.

Alfred Krower, of Albert Lorsch & Co., Maiden Lane, attended a dinner Saturday night at the Westside Club, Providence, R. I., which was given in honor of H. G. Thresher, of the Waite-Thresher Co.

Creditors of the New York Export & Import Co. are notified that the personal property belonging to the estate of the company will be sold at public auction at 133 Front St., on Oct. 27, at 10:30 o'clock.

The Grand Jury to serve during the October term of the criminal branch of the

United States Circuit Court has been sworn in by Judge Hough, and includes the name of Max G. Ernest, a jeweler, at 558 Columbus Ave.

A petition in bankruptcy has been filed against Selim Elias, a dealer in notions and jewelry, 60 Washington St., by two creditors. It is alleged that Elias is insolvent and removed stock worth \$1,000 and made a chattel mortgage without consideration.

Among the out-of-town visitors in Maiden Lane last week were Adolph Block, of the Queen City Ring Mfg. Co., Buffalo, N. Y.; David Fisher, buyer for Eliassof Bros. & Co., Albany, N. Y.; and C. D. Marks, jewelry and notion buyer for the "Famous," St. Louis Mo.

Among the out-of-town jewelers who called at the offices of THE JEWELERS' CIRCULAR-WEEKLY last week were: John A. Hapl, Dunkirk, N. Y.; Mr. Guthman, Youngstown, O.; J. D. Jensen, Henderson, Ky.; C. S. Bennett, Guilford, Me., and Henry Kirshner, Buffalo, N. Y.

Mr. and Mrs. A. S. Van Wezel arrived in this city Monday of last week on the steamship *Rotterdam*. Mr. Van Wezel is here on a visit to examine his new cutting establishment at 120 Walker St., and will return to Europe in about a month to supervise his European cutting works.

Maiden Lane was visited last week by a delegation of Japanese merchants who are touring the country inspecting the various industries in the United States. The Merchants' Association, of this city, who acted as hosts to the Japanese visitors last week, chartered the steamer *Sagamore* to take the commissioners for a sail up the Hudson. The members of the commission are inspecting the industries in this city and will go from here to other cities.

Bagg & Co., 452 Fifth Ave., have brought an action against Archibald S. White, based on the sale to Mrs. White of a diamond and emerald brooch valued at \$35,000. According to the complaint, Mrs. White agreed to buy the brooch at the price stated when it was shown her at her home, but Mr. White asserts that the brooch was sent to Mrs. White merely on approval, and that it was returned to Bagg & Co., and that the transaction was not closed.

At the regular monthly meeting of the directors of the Jewelers Board of Trade, held last Thursday, the following firms were unanimously elected to membership in the board: Barnett Bros., Chicago; Fred Blauer & Co., Chicago; Codding & Heilborn Co., North Attleboro, Mass.; B. Hlyman & Co., New York; T. R. Kilkenny Co., Providence, R. I.; Kuessel Bros. & Co., Milwaukee, Wis.; S. Lindenborn, New York; Hans Peterka, Chicago; Reinhardt Mfg. Co., Providence, R. I.

The police of the E. 35th St. station are on a hunt for a man who, at an early hour Monday morning, of last week, broke into the jewelry store of Marcus Singer, 652 Third Ave., and made away with 65 one-dollar watches, leaving a bartender's apron on the floor behind him as the only clue to his identity. There was \$20,000 worth of jewelry in the safe, besides many trinkets of value in the showcases, which the

burglar left behind him. It is believed that the ringing of the burglar alarm frightened the thief away before he attacked the safe. The shop showed no evidences of a violent entrance and the police believe the work to be that of an expert at locks.

The Jewelers Security Alliance received a notification last week from W. J. Gamm, 3 W. Main St., Madison, Wis., that on Oct. 11 the front window of his store was broken by a man throwing a brick against it. The hole made in the glass was too high for the offender to reach the diamonds displayed in the window, and he tried to escape, but was caught by Frank Coleman, who turned him over to Edward Segkora. The prisoner, who gave the name of Samuel Eisner, told the police that he had come to Madison the previous Friday night and slept in a box car. The police say that he was formerly in the Joliet prison for an indefinite term and was let out on parole. At the hearing the prisoner pleaded guilty and was held for sentence.

Herman Streiff, wholesale jeweler at 415 Broadway, with a branch store at 58 Market St., Newark, failed to obey an order of Nathaniel S. Smith, referee in bankruptcy, to pay \$10,000 to Max L. Schallets, trustee in bankruptcy, for assets unaccounted for, and on motion of Emanuel Eschwege, counsel for Schallets, Judge Hand ordered the commitment of Streiff until the money is paid. A petition in bankruptcy was filed against Streiff April 11, 1908. He attempted to account for the disappearance of assets by saying that his store in Newark was robbed on the night of March 30, 1908, of jewelry worth from \$5,000 to \$8,000, but the referee disbelieved the story of the robbery; and that he had loaned \$5,400 to relatives and friends.

It was announced at the Metropolitan Museum of Art last week that during the time between Sept. 10 and Oct. 14, there had been an attendance of 97,000 at the museum, as compared with 46,043 visitors at the museum last year during the same period. The average attendance is on the increase, it was said, and large numbers of out-of-town visitors from nearby towns are making special trips to visit the exhibit that was prepared for the Hudson-Fulton celebration. It was also said that the Egyptian antiquities are to be arranged during the Winter by A. M. Lithgoe and Arthur C. Mace, who have been engaged in excavation work in Egypt. These Egyptian exhibits, when arranged, will comprise one of the largest and finest collections of the kind ever brought together.

An answer has been filed to the suit which was recently brought by Stern Bros., 51 Maiden Lane, against Stern Bros. & Co., 68 Nassau St., to recover \$50,000 damages. The complaint in this action alleged that the defendants succeeded in getting trade journals to refuse the advertisement of the plaintiffs and that the defendants were guilty of unfair competition and were acting with malice and intent to injure and destroy the plaintiffs' good name and business prosperity. An injunction is asked against Stern Bros. & Co. The answer which has now been filed is a general denial of any intent on the part of the

endants to in any way injure the intiffs. The answer sets forth that the intiffs have been in business since 1871, whereas the defendants have only been in business since 1904. The answer says that the defendants would not continue their advertisement in a certain journal while the publication continued to carry the advertisements of the plaintiffs, under the name of "Stern Bros.," but that the defendants did not object to the plaintiffs advertising under a name that would not be so similar to that of the defendants as to mislead the trade.

The firm of D. Rosenbaum & Son has been succeeded by S. Rosenbaum.

Buret Huste, Puerto Rico, was among the out-of-town jewelers here during the week.

Mrs. Annie Rudleson, Atlantic City, N. J., offering 15 cents cash in settlement of claims against her.

C. H. Eden, of the C. H. Eden Co., Attleboro, Mass., sailed, Saturday, on the *Auguste* for Europe.

Ernest Wulff has moved his business, formerly at 92 W. 164th St., to a more commodious store across the street, at No. 91.

F. P. Iannarone, 339 Central Ave., Far Rockaway, N. Y., announces that he is going to transfer his business from there to Los Angeles, Cal.

Lee Reichman, of Reichman Bros., 65 Nassau St., who went abroad, recently, will return home on the steamship *Kronprinz Wilhelm*, Oct. 19.

Howard C. Newman, with C. G. Alford Co., 11 John St., is confined to his home in East Orange, N. J., with typhoid fever, which he contracted while on a trip in the north.

Beime & Glasser, silversmiths and goldsmiths, now located at 49 2d St., will remove, about Nov. 1, to their new building, 52 Bryant Ave., corner Jennings St., Bronx.

Max Laubheim, of Laubheim Bros., 65 Nassau St., is recovering from a very serious operation for appendicitis. He will, it is expected, return to the office within about 10 days or two weeks.

The parents of Mrs. O. D. Wormser celebrated their golden wedding, Saturday, at their home, 96th St. and Broadway. Mr. Wormser is well known in the trade as a member of Joseph Frankel's Sons.

The exhibition of "three centuries of New York" held in connection with the Hudson-Fulton celebration in the galleries of the National Arts Club, 119 E. 19th St., will be continued throughout the month.

The K. & F. Jewelry Co., of this city, has been incorporated to manufacture and deal in diamonds, watches, jewelry, etc., with a capital of \$10,000. The incorporators are: Lee Koenigsberger, 116 Lexington Ave.; Wm. Fischer, 1065 Boston Road, and Bernhard Schafrau, 955 Prospect Ave., all of this city.

A letter received recently from the president of the Seattle Exposition informs the firm of Borrelli & Vitelli, coral manufacturers, 401 Broadway, that they have been awarded a gold medal by the exposi-

sition for a display of all kinds of coral goods, and especially for rare strings and cancos and other artistically carved pieces.

The Meriden-Britannia Co., 218 Fifth Ave., has on exhibition a reproduction of a tankard made by Jeremiah Drummer, who worked as a silversmith in Boston. He was born in 1645 and died in 1718. The original piece is in New Haven, Conn. A reproduction of a porringer by William Cowell, also an early Boston silversmith, is shown by the same concern.

The Board of United States General Appraisers, last week, decided not to reduce the duty on automobile goggles, classified by the Collector as dutiable at 50 per cent. ad valorem under the provision of the Dingley law for goggles. The importers insisted that the provision in the tariff for goggles was not intended to cover automobile goggles, and that the articles should be allowed to enter at 45 per cent. as manufactures of glass. General Appraiser Sharretts, who writes decisions for the Board, holds that the assessment as made is correct and must stand.

The Jewelers' Safety Fund Society is sending out, this week, booklets to members of the society and others who it is thought will be interested in the work of the organization. The booklets are published by the society in honor of its 25th anniversary and contain a history of the society, together with a review of the work that is being done. The booklet contains 25 pages of reading matter and illustrations. Photographs of the officers and directors, together with views of the offices of the society at 15 Maiden Lane, are shown. The cover has the emblem of the society embossed in gilt. Altogether the booklet contains much valuable information about the society and its work.

At a meeting of the recently organized membership committee of the Merchants' Association of New York, on which the jewelry trade is represented by H. H. Butts, of Hayden W. Wheeler & Co., it was decided to hold trade meetings and luncheons at the rooms of the association from time to time. The first of these meetings will be that of the jewelry trade members, and will be held Wednesday, Oct. 27, at 12:30 p. m. A buffet luncheon will be served and matters affecting the trade discussed and the work of the association presented in detail. It is hoped by this plan to greatly increase the membership of the association. The jewelry trade is already represented in the association by a number of prominent firms, and it is hoped that others will join.

Among the indictments handed down at the October term of the Federal Grand Jury was one against Miss Catherine McKee, Harrisburg, Pa., who was a second cabin passenger on the steamship *Oceanic*, which arrived Aug. 25, 1909, and from whom were seized some pieces of lace and some jewelry. Miss McKee was placed under arrest on Aug. 25, and waived examination when arraigned before Commissioner Shieff's. Miss McKee appeared before Judge Holt on Oct. 7, accompanied by counsel, and pleaded guilty to the indictment charging her with smuggling. There were two counts in the indictment; as to one Judge Holt suspended sentence, and on the other he

imposed a fine of \$100, which was paid. Civil proceedings are still pending, which involve property of a value of \$1,000.

At the third annual New York electrical show at Madison Square Garden there is on exhibition an apparatus called the "Moore Artificial Daylight Window," which is of interest to the diamond and precious stone trade. It is claimed that the light, which is produced by an electrical current being passed through a tube containing carbon dioxide, will enable the gem merchant to determine with greater accuracy the relative worth of diamonds and other precious stones. The light which is on exhibition is of an intense whiteness. The demonstrator in charge of the exhibit has a number of different gems, with which he shows the advantage of using such a light. The light is of practical value in all other lines as well where a color distinction is important. The lights are made by the Moore Electrical Co., Newark, N. J.

Among recent out-of-town jewelers seen in the Maiden Lane district were: L. H. Jerger, Thomasville, Ga.; W. O. Amann, Sidney, O.; Carson & Smith, Hagerstown, Md.; J. W. Neasham, Ottumwa, Ia.; E. Miller, representing G. N. Conklin, Marquette, Mich.; Arthur E. Dumas, Manchester, N. H.; J. H. Hollister, of E. H. Hollister, Greenfield, Mass.; L. Furtwangler, of Furtwangler & Rhea, Greensburg, Pa.; I. R. Prindle, Great Barrington, Mass.; Maj. J. N. Prior, of Warren, Prior & Son, Fayetteville, N. C.; C. L. Taylor, Uhrichsville, O.; A. B. Duncan, Portsmouth, N. H.; William Davis, of the Davis & Hawley Co., Bridgeport, Conn.; F. L. Williams, Adams, Mass.; E. F. Mayer, Butte, Mont.; Mr. Davidson, of the Thos. Long Co., Boston, Mass.; William Chapman, Portsmouth, Va.; A. Preusser, Grand Rapids, Mich.; L. H. Barth, Geneva, N. Y.; B. C. Clark, Purcell, Okla., and E. Gross, of the Judd-Gross Co., Toledo, O.

David Chertow, who arrived last week on the Red Star liner *Laderland*, failed to make a declaration of some dutiable articles and the customs authorities seized his jewelry, valued at \$600. Acting Deputy Surveyor Harris had his suspicion aroused by the actions of Chertow and he ordered Inspector Teichlauf to make a careful examination of the passenger's baggage. In going through the trunks the inspectors found a jeweler's scales, such as are used by diamond dealers. This led to further search of Chertow's person, which resulted in the discovery of one diamond stud and two diamond rings. The goods were ordered seized and the officer instructed to escort Chertow to the Customs House for a hearing. Chertow told Special Deputy Surveyor Smyth that he had been abroad for 15 months and had decided upon entering the diamond importing business. He said that his partner was to buy the stones in Antwerp and he was to sell them in this city. He said that the seized jewelry was intended for his personal use and not for sale. The stock of merchandise with which he was to start in business, Chertow said, was on the way to this country. The surveyor reported the seizure to the collector, and it was said at the Customs House last Friday that the matter was still under consideration, but no action had been taken.

For All Manufactures in Coral

LAPIDARIES PRECIOUS
GEMS in Unique Cuttings

Boston.

R. A. Breidenbach was in town last week on business.

E. M. Wilder has been enjoying the smelting in Quincy Bay and has had a number of large catches.

J. H. Reidpath has succeeded to the position held by the late Edward W. Feeney with the Wm H. Brine Co.

The Nathan & Hurst Co. is planning to enlarge its quarters on the second floor of the Jewelers' building by the addition of another room.

F. W. Ruggles, who has been employed by Robbins, Appleton & Co. in their local office for over 18 years, has opened an office in the Jewelers' building.

A lady's watch has been donated by the Waltham Watch Co. to the Quineboquin Chapter, Independent Order of Red Men, to be disposed of at the "trading post" conducted by the organization in Lincoln Hall, Waltham, Nov. 3, 4, 5 and 6.

Isaac W. Mandelstamm, said to be a watchmaker of Boston, pleaded nolo to an indictment charge before Judge Dodge in the United States District Court last week. He is accused of being implicated with others in concealing evidence in the failure of a bank company.

Boxers have begun the formation of a pugil league among the various departments of the Waltham Watch Co.'s factory. Eric Ridstrom, who studied at the Massachusetts Institute of Technology and worked in the machine department, has secured a position as draughtsman for a marble firm in Proctor, Vt.

The apartments of Max Posner, at 43 Humboldt Ave., Roxbury, were entered by thieves late Saturday evening, Oct. 9, and jewelry valued at \$500, a collection of old coins and \$11 in bills were stolen. Mr. Posner was at his place of business at the time, and Mrs. Posner and her daughters were at the theatre. They returned shortly after midnight, Sunday, to find the place had been ransacked. Mr. and Mrs. Posner say that the jewelry taken includes four rings set with diamonds, a locket set with a sapphire, a gold watch with several diamonds in the case, and a diamond brooch and scarfpin.

The Newton Comb Co.'s plant at Leominster, which is located in the Morse block in the center of the town, was almost entirely destroyed by fire Thursday last week, causing a loss of \$20,000. In addition there was a panic among the 60 girls employed there, and three were injured in the rush to escape and also slightly burned, each requiring the services of a physician. The blaze started on the third floor and was caused by the explosion of some fluid used in the manufacture of combs. The flames spread so rapidly that some of the girls at work in the room were searched before they could escape. There was a crush on the stairway, the frightened girls crowding to get out of the burning structure, but their injuries were not of a serious character.

Jewelers in this city last week were: H. Spencer, Caribou; F. A. Harriman, Waterville; Edward King, Bethel; C. S. Bennett, Guilford; George H. Griffin, Portland; H. F. Burgess, Fairfield; T. Albert

Field, Brunswick, and Guy O. Vickery, Augusta, Me.; W. I. Hatch, Charles Morse and J. M. Kimball, Lancaster; F. P. Plummer, Dover; C. W. Hatch, Claremont; C. H. Sinclair, of N. C. Nelson & Co., Concord; E. N. Whitcomb, Berlin; J. A. Payson, Laconia, N. H.; E. F. Emery, Windsor; J. D. Blackshaw, St. Johnsbury; F. L. Scofield, St. Albans, and George R. Bosworth, Williamstown, Vt.; J. A. Brightman, Southbridge; J. W. Westgate, Nantucket; Samuel Stone, Fall River; James Wain and G. H. Schmidt, Lawrence; M. J. Harrington, Whitinsville; S. C. Hewitt, Salem, and H. S. Hewett, Brockton.

Christopher Figenbaum, who was engaged in the jewelry trade in this city from 1887 until a short time ago, when he retired, with his wife, celebrated their golden wedding anniversary Saturday evening, Oct. 9, at their residence, 63 Atlantic St., Quincy. Both are natives of Christiansand, Norway, and came to this city 22 years ago, where Mr. Figenbaum started in the jewelry trade, which he followed with much success. In the gathering of relatives and friends that surrounded them were six of their nine children and 14 grandchildren. Mr. and Mrs. Figenbaum were assisted in receiving by Miss Adelaide Figenbaum and Frederick Figenbaum, while the ushers were Peter and Ferdinand Figenbaum. Rev. Mr. Molsted made a congratulatory address and there were piano solos by Miss Lillian Braner and Miss Grace Figenbaum and vocal solos by Adelaide Figenbaum.

Cornelius C. Doherty was arrested Saturday, Oct. 9, by Inspectors Shields and Pelton, of police headquarters, on a charge of larceny. It is alleged in the complaint that on Sept. 24 Doherty stole watches and jewelry valued at \$630 from J. S. Round & Co., jewelers, at 734 Washington St. Doherty was employed as a salesman by the Round concern. He says that on the day in question he went into a saloon to purchase a drink and laid down his sample case containing the jewelry. When he turned again to pick it up, the case had disappeared. His loss so troubled him, he says, that he didn't report to his employer and stayed away from business. On Tuesday of last week Doherty was arraigned in the Municipal Court. He claimed to have good witnesses that he had been unable to locate up to that time. The police also desired a postponement, so the case was continued for trial until yesterday.

The meeting of the New England Watchmakers' club, held Tuesday evening of last week in room 11, Engineering building "B," Massachusetts Institute of Technology, was attended by an unusually large number of members and their guests and proved the extreme popularity of the principal speaker, Charles T. Higginbotham, consulting superintendent of the South Bend Watch Co. In the gathering were representatives of various watch companies, including Messrs. Marsh, Olson and Duncan, of the Waltham Watch Co.'s factory. Pres. William B. Garfield presided and introduced Mr. Higginbotham in a felicitous speech. The latter replied gracefully and then delivered a highly interesting address on "The Escapement," illustrating his remarks with a huge working model. Mr. Higginbotham

is visiting relatives and friends in this vicinity, by whom he is cordially welcomed. The New England Watchmakers' Club looks forward to one of the brightest and most prosperous years in its history, the officers feel.

Buffalo, N. Y.

Charles F. Damm, manufacturing jeweler, 520 Main St., will make extensive improvements in his salesroom.

John W. Ware and family moved from Dunkirk, N. Y., to Los Angeles, where he will engage in the jewelry business.

Richard Petersen, a diamond setter for Heintz Bros., has returned from New York. He recently recovered from a serious illness.

Among the jewelers who recently visited the Buffalo jewelry market were: A. D. Bliss, Albion; P. M. Riley, Holland, and W. H. Fuller, Silver Creek.

The Retail Jewelers' Association will hold a smoker at Pattersen's hall, 237 Syracuse St., Thursday evening, Oct. 28. A programme of athletic events will be a feature of the meeting.

As a result of considerable improvements, the clock, silverware and cut glass department of King & Eisele has been enlarged. The jobbing department of the concern has been moved from the third to the first floor.

Word has been received here that Harry D. Ruger, son of Morgan A. Ruger, an optician, of Elmira, N. Y., will become associated with his father in the optical business there. Mr. Ruger, Jr., was prominent in athletics in the Elmira Academy, about 10 years ago.

The Niagara Cut Glass Co. has removed its exhibit from the Broadway Arsenal, where the Industrial Show closed last Saturday night. The exhibit proved a big advertising feature for the company. Beautiful samples of the product turned out by the concern were shown and many orders were received.

A report from Niagara Falls says that the police there are hunting for a self-styled jeweler who worked for J. Boff, a pawnbroker of that city. The man was out of work and Boff gave him temporary employment. It is alleged that he purloined four watches, valued at \$20, from his benefactor.

John C. Yung, a member of the firm of Yung & Debus, 151 Genesee St., jewelers, attended the convention of the Commission on Evangelism, a national meeting held at 1st Church, this city. Mrs. Yung had as her guest Miss Susan Bauenfeind, a missionary of Tokio, Japan, who lectured before the commission.

The educational committee of the Buffalo Optometrical Society met at the office of the Simeox Optical Co., last Friday night. The committee decided that the society will continue the study of "Thorington on Refraction." After the study class some time will be devoted to asking and answering questions on the subject under discussion.

Carl Michel, of the Michel Jewelry Co., of Portage, Wis., who recently opened a branch store at Cambria, Wis., has sold the Cambria branch to Fred Schultz, who was in charge of it.

CHICAGO, WEDNESDAY, OCTOBER 20, 1909.

No. 12.

Chicago Notes.

George H. Thomas returns from a northern trip, this week.

Max Hirsch, traveler for R. Noel & Co., York, was a recent visitor in Chicago.

J. Walther, representing the D. F. Co., is making a middle west trip. Wm. Watson, 55th St. and Lexington is the father of a boy, born Oct. 4. Les Schwob, son of Adolphe Schwob; York, is spending a few days at the Chicago office.

A. Cohen and M. H. Cowen, travelers Rettig, Hess & Madsen, are in from territories.

C. Patton, Canon City, Colo., stopped a few days ago on his way home after a visit in the east.

T. Irvine, LaCrosse, Wis., called at Chicago office recently. He is on his way to New York.

W. Harman, manager of the Alvin Co., New York, paid a visit to the Chicago office recently.

A. LeRoy, advertising manager of the Western Clock Mfg. Co., was a recent visitor at the Chicago office.

Thomas J. Jacobs, of the Knickerbocker Ser Co., is making a trip to Kansas City, Omaha and the northwest.

The jewelry and fixtures of the estate of A. Bardenheimer, Madison, Wis., will soon be sold by order of Probate Court.

Frank E. Behrendt, western representative of the Homan Silver Plate Co., has just returned from an eastern trip.

J. Burke, president of the Brooks Jewelry & Optical Co., St. Louis, was a recent visitor for a few days in this city.

W. Morgan, son of S. W. Morgan, Verona, Minn., is taking a course in engineering of A. Wehde, 151 Wabash Ave.

J. Wilson, representative of the Jas. E. Blake Co., made a visit to the Chicago office, recently, accompanied by Mrs. Blake.

George G. Gubbins, traveler for the Illinois Watch Case Co., is making a three weeks' trip to eastern and southwestern points.

P. Vaumer, of J. P. Vaumer & Co., Eliston, Idaho, stopped over here a few days on his way home after a visit to eastern points.

Louis Usselman, 3150 S. State St., has enlarged his store and added a new optical department. He also is going into the manufacturing of emblem pins.

I. Felsenthal, of the Chicago office of

the Philadelphia Watch Case Co., has just returned from a western trip. L. M. Levy, secretary of the company, will visit the Chicago office, this week.

L. E. Fay, representative here of the R. F. Simmons Co., after his return from a western trip, went on to New York to bid adieu to R. L. Sweet, who will shortly start on a trip around the world.

Frank P. Cheney was brought back to Chicago a few days ago from Pittsburg, Pa., by Detective Stark to answer to a charge of obtaining a diamond ring valued at \$200 from E. Kirchberg, 76 State St. He is charged with obtaining the ring by a confidence game, and is being held at Harrison St., awaiting trial.

W. F. Scanlan, traveler from the Chicago office of the Oneida Community, Ltd., has just returned from a trip through Iowa. G. H. Miller, traveler from the same office, left, last week, for an eastern trip. Mrs. M. A. Kinsley, wife of the Chicago manager of the Oneida Community, Ltd., has recently come from Kenwood, N. Y., their former home. They have taken a place in Oak Park and will make their future home there.

Among the out-of-town visitors during the past few days were the following: C. C. Patton, Canon City, Colo.; U. S. Bond, Osceola, Ia.; Fred Overstreet and wife, Paxton, Ill.; Joseph Embry and wife, Richwood, O.; C. Bagley, of Bagley & Co., Duluth, Minn.; J. H. Ramsey, Aledo, Ill.; J. W. Neasham, 120 E. Maine St., Ottawa, Ia.; C. F. Noeker & Son, Virginia, Ill.; C. E. Hurd, Sycamore, Ill.; W. E. Thoma, Kalamazoo, Mich.; R. A. Woolward, Sandwich, Ill.; J. M. Bigwood, Terre Haute, Ind.; L. E. Kriebs, Elkport, Ia.; H. A. Roberts, Veedersburg, Ind.; U. D. Fortier, St. Anne, Ill.; C. F. Graff, Elkhorn, Wis.; M. F. Tinsley, Harlem, Ia.; Guinaud Bros., Ashland, Wis.; Paul M. Strain, Bloomington, Ind.; Mr. Teed, Webster City, Ia.; Ferguson & Craig, Champaign, Ill.; Range Jewelry Co., Trenton, Mo.; Younglove & Singer, Peoria, Ill.; P. B. Sturgell, Paris, Ill., and J. E. Ramsey, Fond Du Lac, Wis.

At a recent meeting of the stockholders of the Rockford Silver Plate Co., Rockford, Ill., L. A. Littlefield, for many years engaged in the silver business in New Bedford, Mass., was elected secretary and general manager. Mr. Littlefield succeeds the late Edward Taylor as director and manager of the entire business of the corpo-

ration. After the death of Mr. Taylor, Mr. Littlefield became superintendent of the Rockford Silver Plate Co., discontinuing his business at New Bedford.

Minneapolis and St. Paul.

John Rentz, Rentz Bros., Minneapolis, intends to go to Aberdeen, S. Dak., to register on the land drawing.

C. Bergquist, Minneapolis, was among those who went to Aberdeen, S. Dak., to register upon the land drawing on the Standing Rock and Cheyenne Indian reservations.

A. Thurston, Thurston Bros., Buffalo Center, Ia., was in Minneapolis, recently, on his way to Aberdeen, S. Dak., to file in the drawing for land there, about to be thrown open to settlement.

Oscar Holmgren, cut glass designer for the Eagle Cut Glass Works, died, last week, in Minneapolis, aged 32 years. He designed and executed the model which took the first prize at the exposition in St. Louis in 1904.

George Johantgen, Minneapolis, has revised his plans somewhat with reference to engaging in the manufacturing jewelry business, and has given up the location at 36 S. 5th St. He has not announced his future plans.

Mr. Burritt, who has been doing watchmaking and engraving for the trade, with offices in the Andrus building, Minneapolis, has retired from business and has taken a position with Kirchner & Renich, of the same place.

Thieves recently entered the factory of the Eagle Cut Glass Co., in North Minneapolis, through a skylight, and stole some of the finer pieces from the factory. The loss amounts to several hundred dollars. It is thought that the work was done by experts.

J. B. Hudson & Son have been showing an interesting window display, consisting of specimens of the gold banquet service for the new Radison Hotel building, Minneapolis, which is expected to open about Dec. 1. The building is 12 stories high and of fireproof construction throughout.

Among the out-of-town jewelers in the Twin Cities during the week were: Julius Anderson, Mora, Minn.; C. C. Carr, Page, N. Dak.; Capt. H. W. Klopf, Neillsville, Wis.; Frank E. Williams, Waterville, Minn.; L. A. Martin, Superior, Wis.; S. A. Grafslund, Lake Park, Minn.; H. W. Palm, Brown Valley, Minn.

RESULTS ARE WHAT COUNT

STOCK ORDERS

In no other market will you find a more attractive and complete line of ready-to-deliver goods. Stocks are always new and up-to-date, for they move lively in Chicago. Stocks are always large for the same reason. The demand centers here and we are always prepared. No better selection of Diamonds and Precious Stones is shown anywhere. Novelties and seasonable goods are shown here simultaneously with New York, London and Paris. Chicago stocks, prices and service should attract your orders.

REPAIRS

No job too small, no job too large—none too difficult for Chicago shops. The equipment, skilled workmen and facilities are here. Despatch is usually an important factor in repair work—and it gives Chicago all the advantage. Diamond setting, matching, jewelry and watch case repairing, enameling, coloring, soldering, sizing, jointing, engraving, polishing, stringing, ferrule work for pipes and canes, re-plating, etc., etc. Send the jobs here for quick action and profit. Antiques repaired, renewed, etc.

SPECIAL WORK

Our manufacturing facilities are unsurpassed. Fine gold, silver and platinum work made to order. Cluster work and special design orders executed promptly in the best possible manner and at prices which favor Chicago as your market. In lodge jewels, emblems, buttons, pins, etc., we lead the world. Send in the rough ideas of your customers for special work and let us send you accurate, detailed designs with estimates that will permit you to get the order against any competitor.

OUR SHOPS ARE YOUR SHOPS

“WRITE CHICAGO ON THE PACKAGE”

St. Louis.

A. Fassett, of Weiss & Fassett, has returned from a business trip to Indiana. The umbrella department of the Hless & Albertson Jewelry Co. has been enlarged. The St. Louis Clock & Silverware Co. have added watches, watch cases and chains to their lines.

Edward Netzheimer, of the Maritz-Kober Jewelry Mfg. Co., has returned from a fishing trip on the Black River in Arkansas.

Arthur S. Feist, who has been traveling through the west and southwest with manufacturers' lines, is expected to return to St. Louis at a day or two.

Levy, of the Furstenwerth-Uhl Jewelry Co., who came in from his Missouri territory for the centennial, left again for interior on Monday.

Martin Hacker was on the jewelers' committee for the Get-Together banquet, given Saturday night, which brought the centennial week celebration to a close.

Joseph J. Mazer, McAlester, Okla., president of the Oklahoma Retail Jewelers' Association, stopped in St. Louis, Friday and Saturday, on his way home from a trip to New York.

H. Cummings and A. Widdicomb, traveling representatives of the St. Louis Clock Silverware Co., who came home for centennial week, have returned to their respective fields.

H. F. Hines, H. D. Wachholder, Herman Gehling and William Goeggle, traveling representatives of William Weillich & Bro., who came in from their territory to help certain centennial visitors, have gone out again.

Moses Strauss, of the L. Bauman Jewelry Co., went to Hermann, Mo., Friday to attend the funeral of Mrs. Hasenritter, wife of J. H. Hasenritter, a jeweler at that place. Mrs. Hasenritter died in a St. Louis hospital.

The new annual catalogue of the Furstenwerth-Uhl Jewelry Co. consists of 400 pages and is the largest and most complete book ever issued by the firm. Many requests have been received for it in advance of publication.

W. E. Susong, Carl Gross, S. L. Lowenstin and Joseph Auer, travelers of the Bauman-Massa Jewelry Co., who returned to St. Louis to entertain their customers who attended the centennial celebration, have returned to their routes.

Most of the manufacturing jewelers and material men now keep their places open Saturday afternoons, after having kept them closed every Saturday afternoon since early Spring. The jobbers will observe Saturday closing until November.

Fred. J. Bross, of the L. Bauman Jewelry Co., who has been incapacitated from work for several weeks, on account of an injury, will leave on Monday for his regular territory in Illinois. Clarence Heyman will leave during the week on a trip through Missouri. Roscoe Hawkins, Springfield, Mo., who spent centennial week in St. Louis, was accompanied by his wife. Other visiting jewelers who brought their wives with them were: A. R. Stevens, Nevada, Mo.; R. N. Phipps, Fulton, Ky.; Otto Burkland, Moberly, Mo.

W. Westphal, one of the prominent jew-

elers of St. Charles, Mo., has taken an active part in the arrangements for the celebration of the town's centennial, which is to take place this week. Arthur J. Lee, of the Lee Kehl Mfg. Co., will spend one day at the celebration and other St. Louis jewelers will probably attend.

The case of Edward F. Poos, charged with assault to kill, was set for trial, Monday, in Judge Shields' criminal division of the Circuit Court, but a continuance was taken to Oct. 25, by consent. Poos is charged with assault to kill his father, August Poos. Father and son were in the jewelry business together at 3564 S. Broadway. Family trouble led to an encounter and several shots were fired. August Poos and his wife were wounded. Poos died on the way to the City Hospital. Edward thought he had shot his father and made a free confession to that effect, but the Grand Jury investigation established that he was mistaken and that August Poos had killed himself. However, he was indicted on the charge of assault to kill and will be tried on that charge. He has been out on bond since the tragedy. Mrs. Poos recovered from her wound.

Centennial week visitors, in addition to those mentioned last week, were as follows: T. C. Knox, Sulphur Park, Ark.; Albert M. Dueber, Canton, O.; W. S. Loeb, Canton, O.; J. Haas, Vandalia, Mo.; I. B. Morris, Perry, Mo.; S. L. Weiser, Winchester, Ill.; Edward Barefield, Prescott, Ark.; A. Glueck, Dodge City, Kans.; Enno Dick, New Baden, Ill.; Frank A. Arnold, Pine Bluff, Ark.; Otto Burkland, Moberly, Mo.; Roscoe Hawkins, Springfield, Md.; Robert R. Greene, Salem, Mo.; A. R. Stevens, Nevada, Mo.; S. L. Barnard, Alban, Ill.; R. N. Phipps, Fulton, Ky.; A. Prothro, Dermott, Ark.; W. J. Martin, Van Buren, Ark.; Charles Mosby, Batesville, Ark.; D. L. Brown, Glasgow, Mo.; Fred. Herold, Jerseyville, Ill.; W. Clement, Cape Girardeau, Mo.; J. Krumrey, Ballwin, Mo.; Adam A. Haffner, Desoto, Mo.; G. R. Blake, Columbus, Kans.; H. D. Jones, Trenton, Tenn.; William R. Davis, Springfield, Mo.; W. H. Mitchell, Seneca, Mo.; Otto Rink, Carlyle, Ill.; W. Rosenberg, Decatur, Ill.; F. W. Meisenheimer, Ava, Ill.; F. W. Alley, New Madrid, Mo.; A. Buchroeder, Columbia, Mo.; O. W. Morey, Valentine, Nebr.; M. F. Denman, Stuttgart, Ark.; E. W. Herring, Keytesville, Mo.; William Fischer, Whitehall, Ill.; A. S. Higbee, Roodhouse, Ill.; D. F. Carpenter, Moberly, Mo.; C. L. Evington, Richland, Mo.

Pacific Coast Notes.

The Edwards Jewelry Co. is enlarging its store at Oakland, Cal.

The store of Fred W. Lippman, Redwood City, is being remodeled and redecorated.

R. F. Winslow, who recently purchased E. M. Mather's store, San Pedro, Cal., has returned to Pendleton, Ore., to get his family, and is expected back in the southern city to-day, Oct. 20.

A man giving his name as Levy and having a number of aliases has been arrested at Oakland, Cal. A pawnbrokerage establishment in Broadway is being investigated by the police department for alleged complicity in a confidence scheme that has

been exclusively worked there. Levy's plan of operation was to advertise for sale a pawn ticket for an alleged valuable diamond ring. He had a post-office box and secured many replies. When the bargain hunter redeemed the ring it was found that the latter was not worth the investment.

Kansas City.

Carl L. Rost, Indianapolis, Ind., was here, last week, looking after investments.

Fred Schmidt, Chicago, has taken a position as polisher with the Hasig Jewelry Co.

S. Bloom, traveler for the Meyer Jewelry Co., was in for the Priests of Pallas celebration.

Leslie White, with D. B. Ward & Co., who has been in the house during Carnival Week, has gone out to his territory again.

The Greene Jewelry Co. will move, about Nov. 1, from the old location at 1118 Walnut St., to the southwest corner of 12th and Grand Sts.

The travelers of the Edwards & Sloane Jewelry Co., who were in this city, last week, have all gone out to their respective territories again.

Carl L. Haber, of the Towle Mfg. Co., stopped off in Kansas City, last week, to attend the carnival ball, and officiated as one of the floor committee.

J. R. Mercer was chairman of the Priests of Pallas committee which went to St. Louis to meet Dr. Cook and to entertain him while he was in this city.

Otto Knaul, with the Woodstock-Hoefler Watch & Jewelry Co., has returned to the road after spending last week in the city helping to entertain his visiting customers.

George F. Taylor, traveling representative of the Woodstock-Hoefler Watch & Jewelry Co., who came in for a few days during the carnival, became ill while at home and is just now able to get out to his territory again.

E. P. Ledos, of the Ledos Mfg. Co., who was billed to have arrived in Kansas City last week, has notified his customers that he was called home on account of the severe illness of his wife, and will not call until later in the season.

The following out-of-town jewelers were in this city, last week: H. Burgdorff, Cawker City, Kans.; F. B. Schroeder, Paola, Kans.; C. E. Durall, Kincaid, Kans.; Dr. E. R. Kennedy, La Crosse, Kans.; B. A. McElwain, Plattsmouth, Nebr.; M. C. Fox, Russell, Kans.; I. D. Fagin, Lathrop, Mo.; A. L. Cline and wife, Edgerton, Kans.; J. Y. Wilson, Osceola, Mo.; C. W. Bowen, Brunswick, Mo.; Mr. Inglis, of Inglis & Huber, Higginsville, Mo.; E. V. Lee, Louisville, Kans.; John Gilles and wife, Fort Scott, Kans.; R. C. Libby and wife, Weir City, Kans.; G. W. Ellis, Butler, Mo.; F. W. Holmes, Sayre, Okla.; J. H. Vankirk, Campbell, Nebr.; G. E. Kimmel, Centralia, Kans.; Ray W. Folsom, Waterville, Kans.; J. H. Whiteside, Liberty, Mo.; H. P. Hall, Carthage, Mo.; C. H. Wardell, Nowata, Okla.

Several hundred dollars' worth of jewelry was obtained, recently, by burglars who entered the jewelry store of W. J. McCray, Denton, Tex. Entrance was gained through a rear window.

Reputation in Business is

We have made during the past 10 years most all of the great sales. Auctioneers who under most favorable conditions make a few successful sales and from necessity are obliged to make use of the same firm's name give no good evidence of their talent. Look at our yearly record.

We made The Duhme Bros. sale, Cincinnati, of more than three months.

Made The Mermod-Jaccard sale, St. Louis, over 100 days.

The Chas. Crankshaw sale, Atlanta, Ga., ten weeks.

Three sales for A. M. Hill } New Orleans.
Two sales for M. Scooler }

The Sigler Bros., Cleveland, Ohio. Ten other sales in this same city.

The Keil & Hettich } Chicago, and a score
The Pairpoint Co. } more here.

A. Goldman, Seattle.

The King Moss Co., San Francisco.

We have made Twelve Sales that amounted to over One Million Dollars Cash.

Business Follows Our Flag

Correspondence always treated in strict confidence

The Test of Years

Some great judge has said: "The strongest possible evidence is documentary evidence." Above we have given testimony in the form of our ever-increasing business and sale, always carried to a successful completion. Proving that during our TWELVE years' partnership we have always held first place. During the past year of a partnership existing longer than any ever formed by jewelry auctioneers, we have maintained our complete supremacy by making it our most successful, selling more merchandise, and like all the preceding one handling more important sales than all our competitors combined. "In the orchard under the trees where are the best apples, will be found the most clubs." JEALOUSY. Yes, it exists even among auctioneers, but we have never torn others down to build ourselves up. We only ask the observing jeweler to compare our credentials, the true evidence of ability.

Reasons why we should make your sale

- 1st
We give you the benefit of our lifetime's experience.
- 2d
Our combined services cost no more than those of men of untried ability.
- 3d
We can do for you as we have for hundreds of others, sell your old stock and not hurt your reputation.
- 4th
We can offer you more inducements and original methods to bring about results desired.
- 5th
We have sold for the same firms from 2 to 5 times, and in many of the leading cities from 3 to 10 times.
- 6th
We are more than specialty auctioneers. We are business advisers.
- 7th
Have made a complete success of more than a score of sales where others failed.
- 8th
More than a hundred jewelry auctioneers have come and gone since we were established.
- 9th
In sixty per cent. of our sales we show a net profit of over twenty per cent. We can prove that we cleared for one firm over twenty thousand dollars.

It is sent FREE, express prepaid, but to legitimate jewelers only.

M. S. FLEISHMAN CO.
Heyworth Building
CHICAGO, ILL.

Los Angeles.

George H. Pennington started for a trip to the north a few days ago and will be gone about six weeks.

Harry Packard, formerly with the Geneva Optical Co., has taken a position as salesman for Hambright & Walsh.

Ed. Bastheim and C. C. Abel, of Bastheim, Adams & Abel Co., are still on the road visiting customers in the north.

The S. S. Schepps Co. has made its show window very attractive by the use of electrically illuminated flowers and fruits.

Salvador Castellanos, head watchmaker for the Carl Entenmann Jewelry Co., is still unable to visit the company's office.

Lake Miller, formerly of Salt Lake, is now visiting the city trade for Bastheim, Adams & Abel, taking the place of Harry Adams.

Arthur Turner, of the E. W. Reynolds Co., has just returned from a trip through northern California. He has bought a new automobile.

It is reported that Louis Burger, formerly manager of the F. B. Clark jewelry store, is about to open a jewelry salesroom in San Bernardino.

Miss E. H. Harris, daughter of W. T. Harris, jeweler at the corner of 1st and Air Sts., has taken a position with the S. S. Schepps Co., 621 S. Broadway.

Out-of-town jewelers who have been in the city recently include W. B. Woolsey, wife; F. B. King, Redlands; Mrs. M. J. Fisher, Whittier; Lars Shaker, Redondo. Carl Entenmann, of the Carl Entenmann Jewelry Co., who is traveling among the company's customers in the north, reports that he is making an especially successful trip.

A. E. Baranger, traveling representative of H. F. Wallace, has returned from a trip through the San Joaquin Valley. The business he did was more than satisfactory to H. F. Wallace.

R. H. Schwarzkopf, who was thought to be recovering from a severe illness, had a serious relapse a few days ago. His condition became critical, but he is now considered out of danger.

George M. Williams, proprietor of the Geneva Watch & Optical Co., is again interested in the automobile business, having entered into a partnership which will conduct an agency for an eastern car.

Albert Kauffman, of the Santa Paula Jewelry store, Santa Paula, Cal., was in this city a few days ago. From here he went to San Francisco, intending to go from there to the east, to be gone about a month.

Miss Augusta Bleyer, an optician who recently came here from San Francisco and opened an office with Ira M. Stabler at 702 S. Spring St., has opened a branch office in connection with the Los Angeles Badge & Jewelry Mfg. Co., 342 S. Broadway.

Harry Adams, formerly with the Trafton Jewelry Co. and more recently with Bastheim, Adams & Abel Co., has now associated himself with Fink & Co., 819 Central Building. He will have a responsible position, caring for the trade in this city and in near-by towns.

F. M. Barr, who was recently brought back here from Ashland, Ore., to answer the charge of having passed a worthless

check for \$525 on Julius Wiesenberger, 453 S. Broadway, in payment for a diamond ring, will have to stand trial in the Superior Court, having been held for trial by a justice court. For 12 years Barr has attracted attention in southern California. The diamond was purchased after Barr had lived in luxury here for several weeks. He dropped out of sight last January, after getting the ring. Mr. Wiesenberger first tried to get his check cashed at the bank in San Diego upon which it was drawn, but found that Barr had only 53 cents there to his credit. It is reported that he went to Hayti, where, posing as a rich American, he married the daughter of a wealthy planter. He had trouble in getting funds from the United States, and his bride's father, it is said, advanced him \$500. He was accused of having taken her to another island and deserting her. He returned to San Francisco and then in disguise visited friends in San Diego. His presence there was discovered, but he escaped to Oregon.

Toledo.

George L. Wening, 1413 Cherry St., will shortly enlarge his store and stock.

The Wolcott-Kapp Co. has just finished the new signs on its store as well as making other internal arrangements which add greatly to the appearance of the business.

S. B. Stein, who for several years has conducted a jewelry store at 612 Adams St., has remodeled his quarters completely. Mr. Stein has added a new front, remodeled the interior, installed considerable new furniture, enlarged his quarters and his stock. These changes have been made necessary by increased trade which he believes will continue.

George Ward, alias "Portland Fatty," was given a sentence of three years in the penitentiary for his part in the robbery of the Staley jewelry store at Sylvania, a small town near Toledo, July 13. Anticipating a light sentence, Ward threw himself on the mercy of Judge Brough, but was staggered when the court calmly told him that three Federal indictments were pending against him in Vermont. Just what the Federal authorities will do to him after his term in the Ohio penitentiary has not been made public, but the fact that they are in existence had influence with Judge Brough when he ignored the plea for mercy on the part of the defendant. Ross Woolever and Arthur Wing, companions of Ward in the robbery, were indicted by the Grand Jury, but have not yet been tried. Both Ward and Woolever have given favorable testimony in behalf of Wing, who, they say, was drunk on the night of the robbery and was not conscious of what he was doing. The trials of these two men will take place shortly.

The Brussels correspondent of the London Daily *Tel. graph* says that Germany has entrusted to an Antwerp syndicate the sale of all rough diamonds discovered in German Southwest Africa. It is decided not to compete with the British diamond firms in South Africa adopting the system of limited production. Thus the dreaded slump in the price of diamonds will be averted.

Cincinnati.

Mr. Mehmert and family, Olney, Ill., were the guests of Joseph Mehmert, Norwood, O., recently.

O. B. Schmidt, Tiffin, O., was here, last week, after attending the county fair in Hamilton, O.

Norman Schweeting, son of F. A. Schweeting, is studying engraving with Charles Neubauer, Perim building.

A. A. Spiegel, of the Klein Bros. Co., has recovered sufficiently from his recent accident to resume business on the road.

R. Ketterman, formerly with the Ben. Schneider Jewelry Co., 1411 Vine St., is now associated with Richter & Phillips.

Ed. C. Dwyer, who sold out his jewelry business in Greenville, O., about a year ago, has recently opened a new store in that place.

Harold H. Haerr, representative of the D. Gruen Watch Co., is receiving the many felicitations of his friends upon his recent marriage.

Charles Hummel, of the Thoma Bros. Co., who recently sustained a broken ankle, is attending to business again, but has to walk on crutches.

Bert Ganz, of the Gustave Fox Co., who was called in from the road by the death of his father, Sol Ganz, Walnut Hills, has resumed business again.

Mrs. William Meseke, Seymour, Ind., mother of Albert Meseke, an Oberlin, O., jeweler, died Oct. 13 at her home, after an illness of about two weeks.

I. N. Fox, of Fox Bros. & Co., has left on his western and coast trip. Burton Fox, of this firm, is expected home from Europe the last of October.

August Newstedt, of Lindenberg, Strauss & Co., was called in from the road the past week owing to the sudden death of his brother-in-law, Mr. Stevenson, a son-in-law of Herman Duhme.

Jacob Randolph, a brother of E. F. Randolph, of Randolph & Mittendorf, Williamson, W. Va., and Clarence Sauer, brother of Albert Sauer, Newport, Ky., are studying engraving with Fred J. Kilp, Perim building.

Quite a number of jewelers came here, last week, in connection with the Ohio Valley Improvement Association convention. George H. Newstedt, as a representative of the Cincinnati Industrial Bureau, was a delegate to the convention.

Out-of-town jewelers here the past week buying stock included: C. C. Hyde, New Castle, Ind.; C. L. Mellott, Woodfield, O.; H. C. Reed, Blanchester, O.; Andrew Aman, William H. Gussee, J. L. Schell, M. B. Gary and J. Auderton, Dayton, O.; O. C. Beer, Sumner, Ind.; Philip Horr, Aurora, Ind.; A. E. Johnson, Versailles, O.; Mark Howell and wife, Rendville, O.; A. G. Meade, Beckley, W. Va.; Edward Israel and F. A. Schweeting, Harrison, O.; Mr. Zimmerman and Mrs. J. C. Beck, Martins Ferry, O.; L. Heid, Columbus, O.; Mr. Marlett, of Marlett & Baker, Middletown, O.; S. L. Sherwood, Ewing, Ky.; M. F. Conly, Louisa, Ky.; L. R. Olmsted, Milan, Ind.; C. G. Hood, Nepton, Ky.; J. W. Tufts, Loveland, O.; Frank J. Liesner, Hamilton, O., and Edward B. Scott, Batavia, O.

Cleveland.

N. C. Cook, sales manager of the Howland Watch Co., was in town, this week. Valter Dueble, Canton, has returned in his extended trip through the west. Mrs. C. L. Waldorf, Los Angeles, Cal., is making a course at the Newmeyer School of engraving.

Joe Blumrich, who was formerly with Gynon Jewelry Co., is now with the Wisconsin Jewelry Co.

Ed Teitman, who left the Bowler & Redick Co., last week, is now one of the leading force of the Scribner & Lochr Co.

J. J. Cowell was elected to the board of directors of the Cleveland Credit Men's Association at the annual meeting, last week.

The firm of Swikart & Frayberry was organized the first part of this month to engage in the general engraving business. The partners have located an up-to-date shop in the Standard building. Both Messrs. Swikart and Frayberry were formerly with C. A. Albrecht.

Out-of-town buyers here, last week, were: J. Higgins, Shelby; E. D. Davis, Kent; C. Fisher, R. Miller and Geo. A. Clark, Rain; Geo. F. Elgin, Kent; W. Gilger, Newark; I. Schiff, Lorain; N. D. Randall, in pole; Benj. Mosley, Willoughby; G. Follett, Jeffersonville, and A. O. Kintner, Painesville.

The Wholesale Merchants' Board of the number of Commerce has inaugurated a scheme that should be a benefit to the local trading houses. Each day the jobbers report all out-of-town dealers in the city, and the board has a regular follow-up system to keep the dealer interested in Cleveland as a trade center.

The Scribner & Lochr Co. has found that it will be necessary to install a new lighting system on account of the erection of a new building beside the one they occupy, which has cut off the daylight this concern always enjoyed. The new system will be very elaborate, however, and will do much to make up for the loss of daylight.

Friends of E. F. Mallett, of the Sigler Bros. Co., will be glad to learn that he has recovered from the illness that kept him away from work for four months, and he is back at his old place. W. L. Kennon, H. Wagner and A. Ellboygen, Sigler Bros. Co.'s traveling men, are all in town this week, getting ready for their Winter trips.

San Diego, Cal.

O. F. Ahring, head designer with the C. F. Ernsting Co., has just returned from a three weeks' trip to his old home in St. Louis, where he was formerly connected with F. W. Drosten.

R. E. Church, St. Anthony, Idaho, has taken a position in the watchmaking department of the C. W. Ernsting Co. W. H. McPherson, formerly with Richard Vath, Tacoma, Wash., is a recent addition to the watchmaking staff of this house.

James Jessop, Joseph Jessop & Sons, is on a six weeks' trip in the north, during which he visited the displays at the Alaska-Yukon-Pacific Exposition. He is now in San Francisco, making a study of watch-

cases, repairing in the various shops and gaining new ideas for the manufacturing department of his firm over which he presides.

Indianapolis.

Carl Rost has returned from St. Louis and Kansas City.

Jefferson H. Reed spent a day or two at his Brown County farm, last week.

A. P. Craft, of the A. P. Craft Co., is home after a fishing trip to Rochester, Warsaw and Barbee Lake.

Charles W. Lauer, of Charles W. Lauer & Co., made a business trip to Lafayette and Danville, Ill., last week.

L. E. Heap, employed for some time by Thos. U. Bonifield, Warren, has taken a position with A. B. Johnson, Sheridan.

An addition will be built to the business block owned by Emil Mantel at 625 W. Washington St., the work to cost about \$4,500.

Dyer Bros. have received several thousand attractive pin trays, which are being given as souvenirs to women who patronize the establishment.

Retail jewelers buying stock in this city, last week, were: John W. Hudson, Fortville; Aaron Pursel, Noblesville, and George Long, New Richmond.

The interior of the salesrooms of Hoffman & Lauer, dealers in jewelers' supplies, have been redecorated and all of the fixtures have been varnished.

Thomas Miller, formerly of New York, has taken a position with M. C. Lang, who recently succeeded to the manufacturing jewelry business of E. B. Johns.

Leopold Krauss is having plans drawn for remodeling his store at 45 N. Illinois St. A new front will be built, the room redecorated and new fixtures installed.

Charles Mayer & Co. have reserved a box at the Shriners' Circus, to be held all of next week at the State Fair Grounds, for the benefit of the building fund of Murat Temple.

A few days ago one of the weights in the clock in the Court House at Bluffton, broke loose from the cable holding it and crashed through a floor 40 feet below. The damage has not yet been repaired.

Charles Mayer & Co., last week, engraved the trophy won by Louis Strang in a 100-mile automobile race at the local speedway, a few weeks ago. The trophy was given by the G. & J. Tire Co. and cost \$1,000. The prize was shown in Mayer & Co.'s store window part of the week.

Two extremely valuable pearls were found in Indiana last week, one being sold to A. Bitterman, of Evansville, for \$2,500, by a man who neglected to give his name. The other one was found in White River by James Gray, Worthington, who sold it to a Terre Haute buyer for \$3,000. Gray's pearl weighed 34 $\frac{3}{4}$ grains.

A thief recently entered the store of Andrew P. Lundberg, Worcester, Mass., and escaped with a number of rings worth about \$300. The owner of the store was ill at his home at the time of the robbery, which was committed in broad daylight, while the attention of the clerk was engaged elsewhere.

San Francisco.

S. H. Friend has secured quarters in the Mutual Bank building.

Louis Thompson, with Rothschild & Hadenfeldt, is now in the northwest on a business trip.

M. E. Pinto, a trusted employe of Henry M. Abrams, died, a few days ago, of appendicitis.

Mr. Addsdorfer, with the Wm. L. Gilbert Clock Co., is now in the northwest on a business trip.

Fred Sheridan, manufacturers' agent, has just returned from the north, where he made a successful trip.

W. Schimmelschien, who represents S. Meyer & Co., Los Angeles, was a visitor in San Francisco recently.

Among the out-of-town jewelers in this city during the past week were: G. Benninghausen, Seattle, Wash.; Mr. Wilkins, Red Bluff, Cal.; A. E. Gribi, Hanford, Cal., and C. V. Mount, Petaluma, Cal.

A. I. Hall & Son, Inc., have sent out handsomely engraved cards inviting visitors to make their headquarters at the concern's offices during the Portola Festival, which began yesterday and will continue until Oct. 23. The firm is located at 150 Post St.

Since the manufacture of the Hotel St. Francis automobile trophy one of the most noteworthy pieces of work by Hammer-smith & Co. has been a silver cup presented by the employes of Newman & Levinson to the members of that firm on the removal to the downtown district.

Arthur J. Eaton, the aged jeweler of 833 Shrader St., who attracted a great deal of attention some weeks ago when he brought charges against his wife and son-in-law for attempting to scare him to death with imitation "spooks," is again in the public eye. This time, however, he had a narrow escape from something more material than "spooks." While motoring near Watsonville, after nightfall, a meteor fell with a blinding flash close to the machine and exploded. His story is confirmed by his traveling companions and by the inhabitants near by who saw the fall of the heavenly visitor.

During the past week there have been a number of burglaries in San Francisco and several jewelers have suffered considerable loss. Oct. 11 three stores were entered, and from each one goods valued at from \$200 to \$300 were taken. The stores robbed were those of G. Gensler, 1106 Market St.; "Lasky's" 814 Market St., and Lovick Bros., kodak dealers, 56 Kearny St. Local jewelers have been warned to be on the lookout for thieves, as the news has been received from Seattle that crooks who have been operating there during the Alaska-Yukon-Pacific Exposition are leaving in large numbers for this city for the purpose of operating during the Portola Festival.

The Beuld Drug & Jewelry Co., Beuld, Ill., has increased its capital stock from \$1,500 to \$3,000.

The plate glass show window in the store of Hammond Bros., Cohoes, N. Y., was broken one night about a week ago, supposedly by accident. There was a large crowd in front of the store at the time.

Milwaukee.

W. S. Sargent, New Lisbon, Wis., called on the Milwaukee trade, last week.

Fred N. Harris, associated with A. C. Baker, Appleton, Wis., was married recently to Miss Irene Le Claire, of Oshkosh, Wis. Mr. and Mrs. Harris have left for Fort Dodge, Ia., where Mr. Harris will be connected with a jewelry establishment.

Louis W. Bunde, president of the Bunde Upmeyer Co., has returned from a short business trip in the east. Mr. Bunde visited Bunde & Upmeyer establishment at Newark, which is in charge of F. H. Osterd, and found business in a satisfactory condition.

The regular monthly meeting of the Milwaukee Jewelers' Club was held Oct. 13. The main feature of the gathering was the weekly banquet held at the Blatz Hotel, at which an informal discussion of trade topics was taken up. The matter of a certain Grand Ave. establishment selling cheap jewelry stocks as "sample" goods brought forth considerable comment.

Archie Tegtmeier, well known south side dealer of Milwaukee, has offered a handsome loving cup as a prize to Milwaukee hard artists. The first progressive three-day tournament for the Tegtmeier trophy has been opened, and much interest is being manifested. In order to win the Tegtmeier trophy a player must win three of the games played during the season.

Samuel Eisner, of Chicago, attempted her a bungling daylight diamond robbery at the W. J. Gamm jewelry establishment, last week, and as a result is now in the Madison, Wis., jail. Eisner threw a brick through a towel through the Gamm play window, but his aim was poor and the hole that he made was a little too high for him to reach the diamonds below. He tried to run, but the crash of falling glass had attracted a crowd of passers-by, and after an exciting chase by Edward Kora and the police Eisner was captured. He was brought back to the Gamm store where Eisner admitted that he had smashed the window and that he was after the diamonds on display, and his only regret seemed to be that he failed in his attempt. The Madison police believe that the prisoner is innocent at the present time. The attempted robbery in itself, tried as it was on a crowded street, is an indication that all is not right with Eisner, say the police, and the actions of the man since his capture have been peculiar.

Pacific Northwest.

Joseph Jacobs, New York, is now covering the trade in Portland, Ore.

The John G. Barr Co.'s store has been moved to a new location at Salem, Ore., directly across the street from the old site. Work has been commenced by the First National Bank of Spokane, Wash., on a new building at that place that is to be occupied by L. R. Dillingham as retail dealer.

The property upon which the store building of Elwell Bros. stands, at Kelso, Wash., has been sold to a bank at that place, and a modern structure will be erected in the near future.

The store of W. H. Symons, 1427 Third Ave., Seattle, Wash., was broken into, recently, and 11 watches, valued at \$150, were taken. Entrance to the store was effected by breaking a window.

Omaha.

Mr. and Mrs. S. W. Lindsay have gone to Chicago for a short trip.

L. V. Borsheim has returned from a business trip to Sulphur Springs, Ark.

Mr. Knapp, of the Shook Mfg. Co., is at present in Colorado on a business trip.

Mrs. Albert Edholm and daughter returned from a sojourn in New York, last week.

S. M. Jolliffe, Logan, Ia., and W. H. Iler, Little Sioux, Ia., were here, last week, buying Fall stock.

Chas. Krause, Randolph, and Wm. Deiring, Phillips, visited Omaha, last week, on business and pleasure.

R. E. Chidick, Stewart, Nebr., and G. Cross, De Witt, Nebr., were in the city the early part of last week.

N. Nielson, Harlan, Ia., who is the president of the Iowa State Jewelers' Association, was in this city, last week.

Albert Pohlman, Pierce, Nebr., and F. Lenion, Ashland, Nebr., were in this city, last week, for the Aksarben festivities.

A. Mandelberg has been called out of the city on account of the very severe illness of his father, who lives in Baltimore, Md.

Albert Edholm is displaying two special watches which were manufactured by Patek Philippe. One is an order for a customer and the other is somewhat of a novelty.

Albert Edholm sold the army officers who were recently in this city a large sterling loving cup, which was presented by the visiting officers to the Hyperion Club, Des Moines, Ia.

Mr. Clay, formerly with the C. B. Brown Co. and who recently took over his father's store at Long Pine, Nebr., was in Omaha, last week. Mr. Clay replenished his stock and looked after new store fixtures.

Columbus, O.

D. L. Auld, of the D. L. Auld Co., manufacturing jewelers at Long & Young Sts., recently was taken to the Grant Hospital to undergo a surgical operation for the purpose of removing a cancerous growth. Mr. Auld was reported to be doing well.

Frank F. Bonnet, of the Frank F. Bonnet Co., 77 N. High St., has the sympathy of his friends in the trade, owing to the recent death of his brother, John M. Bonnet, for many years a well-known jeweler in Zanesville, who died at Baltimore a short time ago, in the 72d year of his age. Frank F. Bonnet and his family went to Baltimore for the funeral services and returned to this city last week.

Much interest is being taken here in the work of the students at the William Morris School, which opened its term this month under the direction of Miss Wilhelmina Stephens, who instructs in copper, brass, silver and jewelry working. Mrs. A. L. Ralston will continue her lectures on "Art." The Columbus Dispatch recently published illustrations of some of the jewelry and silverware done by the jewelers at this school.

Canada Notes.

Lamontagne & Chamberland, Quebec, have dissolved partnership.

Albert H. Tobey has given a chattel mortgage to H. J. McKinly, Sudbury, Ont., for \$725.

Percy F. Woodhouse, Saskatoon, Sask., has disposed of the branch of his business at Biggar to George A. Matthews.

Henry Birks & Sons, Ltd., Montreal, have issued a writ against R. C. Henry, Ottawa, Ont., in the Circuit Court, for \$286.

Out-of-town jewelers calling on the Toronto trade, last week, included: J. S. Smith, St. Catharines, Ont.; W. H. Smith, Oakville, Ont., and T. G. Challoner, Rossland, B. C.

The Elgin National Watch Co. is now dealing with the retail trade direct instead of through jobbers, and carrying stock in its office in Toronto. This change in policy is being watched by the trade with much interest.

The business of F. Spangenberg, Kingston, Ont., has been sold to Rogers & Wright. It is probably the oldest jewelry house in Canada, the business having been established in the '30's by the father of Mr. Spangenberg.

James Roy, Port Arthur, Ont., who failed in business owing to the Fulton Jewelry Co., Toronto, Ont., an account, recently had a check for \$236, made by a Winnipeg firm, presented for payment at the Imperial Bank, Port Arthur. Instead of paying the check the bank held it and communicated with the United Empire Bank, which held a judgment against the Fulton Co. The latter bank obtained the check under garnishee proceedings and was upheld by the court. Mr. Roy took an appeal to the Divisional Court, where it was dismissed, the judge deciding in the bank's favor.

Atlanta, Ga.

Nat Kaiser and Fanny Kaiser filed in the Superior Court, Oct. 12, an application for incorporation under the style of Nat. Kaiser & Co., Inc. The company will be capitalized at \$10,000, and will do a general wholesale and retail jewelry business.

The silver loving cup, known as the Davis & Freeman cup, which was offered by the jewelry firm of that name for the golf tournament, was won by F. G. Byrd. Davis & Freeman were also makers of the piece given by the Atlanta Constitution to William Smith, the baseball manager.

The trophy to be given to the winner of the 260-mile race at the Speedway, Nov. 13, and known as the City of Atlanta Trophy, is said to be one of the handsomest pieces of its kind ever given for an automobile contest. It will be presented by the mayor with the official seal of the city. This trophy, which cost \$7,500, stands six feet high, and is made of gold, silver and copper. On an elaborate base appears a group of a male and female figure. The latter, emblematic of victory, holds in her outstretched hand a laurel wreath, and is held in the arm of the male figure, typical of speed.

Onsgard & Vaaler, Spring Grove, Minn., have dissolved. Ben. L. Onsgood continuing alone.

Pittsburg.

Edmund Rankin has returned from a business trip to Lancaster.

L. M. Smith returned, last week, in his automobile from Detroit, where he had gone to witness one of the games of the Pittsburg-Detroit series.

Charles S. Moore, who has been covering Ohio, Kentucky and elsewhere for Sam F. Sipe, has done some splendid business in those States, much to the delight of Mr. Sipe.

C. M. Wilson, Salem, O., was in Pittsburg last Wednesday to witness the fifth game of the world's championship baseball series between the Pittsburg and Detroit teams.

J. R. Reed & Co. are repainting the exterior of their store in Market St., and otherwise making some alterations and repairs preparatory to taking care of a big Fall and holiday trade.

F. F. Lang, of Gillespie Bros., had the honor of presenting Fred Clarke, of the Pittsburg baseball team, with a handsome coral stickpin, for making the first home run by a player of the Pittsburg club.

The Pittsburg Association of Credit Men did not have an opportunity to entertain the members of the Pittsburg Baseball Club last Thursday, as was anticipated, because the club was in Detroit, but probably will do so later on.

The John M. Roberts & Son Co. has completed the repairs and alterations to the store and have greatly enlarged the stock in anticipation of a splendid Fall and holiday trade. The store is now more brilliantly lighted than ever before. The firm make their own electric light.

William Heeren, of Heeren Bros. & Co., left Pittsburg last Thursday for New York, from which place he sailed Saturday on a tour around the world. Mr. Heeren will visit China and Japan and the Philippines, returning to America by way of San Francisco. He will visit a number of western points before returning to Pittsburg.

The United States Grand Jury will convene here this week and will act on the case of D. C. Thompson, the bogus army lieutenant who is being held here to await the actions of that tribunal on the charge of passing worthless checks on local merchants. It is stated that Thompson will make an effort to put up a fight when his case comes to trial.

J. C. Crawford took an active part in the great centennial convention of the Disciples of Christ, which convention opened in Pittsburg a week ago last Monday. Mr. Crawford spent several days at the centennial headquarters, assigning visitors to rooms and doing other work of necessity. It is estimated that fully 40,000 strangers were in the city, and some of the jewelers sold a number of souvenirs to the visitors, to take home to friends.

Quite a number of local houses entertained customers at the baseball games played in Pittsburg last week, many coming here from out of town to take in the baseball series. Among the jewelers here last week were: F. A. Heberline, Ambridge; J. M. Langendorf and Mrs. Langendorf, Monongahela; Mr. and Mrs. R. A. Noble, East Liverpool; Wm. M. Barbour, Mid-

way; J. V. Rosendahl, Irwin; E. A. Bloser, New Kensington; O. N. Williams, Slippery Rock.

Lancaster, Pa.

TRADE CONDITIONS.

Last week's big Lancaster County agricultural fair brought a great crowd of people to the city from the country districts. This helped the jewelry trade to some extent but not as much as it would have done had the prospects for good prices for the staple crop, leaf tobacco, been better.

John J. and Charles E. Bowman visited Philadelphia, last week.

Cecil H. Armacy has gone to Altoona to take a position with M. Berman.

The wife of H. C. Kern, a retired jeweler of Mount Joy, Pa., died a few days ago in her 83d year.

Wilbur Charles has gone to Baltimore and Washington on a two weeks' pleasure and business trip.

J. George Fox has taken a position as watchmaker and engraver with G. L. Blackwell, Camden, S. C.

John A. Bair, late with Henry Weeber, has taken a position in Hanover, Pa., with J. H. Wildasin as watchmaker.

Gordon L. Gardner has returned to his old home, Fort Meade, Fla., where he will engage in business for himself about Jan. 1.

Abram L. Barr, with Aug. Rhoads, has been nominated a member of the executive committee of the Young Republican Club.

Thomas C. Mullenberg, formerly of Lancaster, now a traveling representative of Horace N. Tuttle Co., was in Lancaster, last week.

The ground for a section of the proposed large annex to the Hamilton Watch Co.'s factory has been staked out, preparatory to excavation operations.

At the annual election of officers of the Retail Merchants' Association, last week, T. Wilson Dubbs was elected a member of the executive committee.

John B. Plank, Pittsburg, is in Lancaster, visiting his wife's relatives. He expects to leave in December for Los Angeles, with a view of opening a store there.

J. B. Roumfort, of the H. S. Meiskey Co., is back from a three months' southern trip, and F. A. Huber, another representative, has started off on a two months' trip over his territory.

E. R. Kant, of the Non-Retailing Co., who returned home, last week, from an extended trip, has now started west and will be absent until the end of November. F. A. Wheeler, of the same company, has gone to the middle west, after spending a few days at headquarters after his return from the south.

Among the jewelers visiting Lancaster lately were: S. H. Miller and R. V. Fagley, Mount Joy; N. W. Pinkerton and H. H. Hershey, Manheim; J. H. Sensenig, New Holland; H. R. Wertsch, Lititz, Pa.; Phares Wiseman, Toledo, O.; Casper Cooper, Milwaukee, Wis.; Joseph Platt, Denver, Colo.

Lancaster had two visitors, among jewelers here last week, who have done some very fine work in the line of miniature reproductions. J. A. Shomaker, York, has made a set of watchmakers' tools that can go into an ordinary sized snuff box, includ-

ing a perfect lathe of 33 pieces that is three-quarters of an inch in length. Hilbert, Norfolk, Va., has made a perfect roller skate of gold that is just an inch long.

Amer Turgen, late a student of the F. Bowman Technical School, has married to a Miss Moore, and has taken position at Chambersburg, Pa., with V. Ludwig. John Wertsch, a brother of Wertsch, Lititz, Pa., has entered the school as a student. K. B. Bare and C. S. Knour, students, took in the automobile at Fairmount Park, Philadelphia, race track. Jesse Fox, late of the school, has taken position at Charlotte, S. C.

Harrisburg, Pa.

Mrs. Geo. A. Hutman recently recovered from a serious illness.

Harrisburg's Committee of 50 has increased to 100. E. L. Rinke is one of the new members.

The Antique Shop, dealing in old odd jewelry, watches, etc., has opened business at 1008 Market St.

The big public clock at 4th and Market Sts. is temporarily off duty pending installation of a new set of batteries.

Henry C. Claster has sublet the premises, No. 411 Market St., now occupied by the City Loan Office, to the United States Stores Co. Possession will be given on Jan. 1, 1910.

Over 100 local merchants met, last week, and organized the Merchants' Mercantile Agency, which will be affiliated with similar organizations throughout the State. K. Dean is president and J. Coover is secretary and treasurer.

Syracuse.

Vanderburgh & Durney, 124 S. Salisbury St., announce that "owing to the demands of creditors" they will close out their business once. An auction sale is in progress. I. Murray, the jewelry auctioneer of New York, will conduct the auction sale of Vanderburgh & Durney. This is the largest sale Mr. Murray has conducted in Syracuse in the last six years.

C. C. Graham, general sales manager of J. F. Kane, assistant sales manager of Benedict Mfg. Co., manufacturers of plated ware, East Syracuse, will start the middle of October for Australia, by way of San Francisco and Honolulu, Sydney. From Australia they will visit Japan and from there extend their tour around the world, returning from home some time in the late Spring. The Benedict Mfg. Co. is now busier than it has been any time in its history. Last month increased its force by 200 additional men and is working each department on a new schedule. It is advertising for help leading silver manufacturing centers in the United States and Canada and the salesmen report business in their respective territories as exceedingly good.

E. E. Chandler, Boone, Ia., lost a pair of watches, which were stolen from a display window, recently. The loss amounted about \$250, besides the value of the glass window, which was broken.

Philadelphia.

S. Klein has opened an antique shop at 5 S. 8th St.

Harry C. Birch stopped over here on his way south, last week.

John Beachem, representing Kohn & Co., New York, was a recent visitor.

John Grund, 3118 Kensington Ave., became a benedict, early last week.

Vernon L. Phillips, Smyrna, Del., has purchased a new home in Smyrna, Del.

J. B. Bennett, a retail jeweler of Norfolk, Va., was a recent visitor with Mrs. Bennett.

A. G. Lee, representing the Howard Watch Co., Waltham, Mass., was a recent visitor.

W. A. Fabian, for many years connected with R. Pinkstone, has opened an office at 5 Sansom St.

Walter Sheppard, 10th and Spring Gardens Sts., will shortly move into his new home at Logan, Pa.

George A. Davison, with Joseph K. Davison Sons, 718 Sansom St., is away on a pleasure trip in Canada.

Mr. O'Donnell, of the Roy Watch Case Co., New York, was a visitor to this city the interest of his firm.

Poland & Bros., 4347 Main St., Manhattan, are making extensive alterations and improvements in their store.

John Allison, formerly with F. L. Bean, Camden, N. J., has accepted a position with K. Smith & Son, this city.

Mr. Beckwith, of the Hamilton Watch Co., Lancaster, Pa., spent several days in this city on business, last week.

John MacPherson, Mauch Chunk, Pa., with a party of friends, motored to this city, last Saturday, to view the automobile races.

Frank Hurlburt has the sympathy of the public, owing to the death of his daughter, which occurred last Monday evening, at 11.

John Oliver, of George Oliver & Sons, Burlington, N. J., has been appointed a member of the Grand Jury of Burlington County.

Miss Madeline Weller, for some years connected with the registry department of E. Caldwell & Co., was quietly married, last week.

Joseph Wachs, salesman for J. F. Neill, 7 Sansom St., will use the horse and carriage he has recently purchased to call on the trade.

The Bailey, Banks & Biddle Co. is exhibiting the facsimile of the Cullinan diamond, presented to King Edward VII. on his 66th birthday.

George M. Kite, a jeweler of this city, was discharged in the Bankruptcy Court, this week, as an involuntary bankrupt. Referee, Edwin F. Hoffman.

M. Zineman & Bro., opticians, will soon occupy their new stores at 117 and 119 North St. The premises are now undergoing thorough overhauling.

H. T. Whaler, Miami, Fla., stopped off in this city, recently, on his way home from arragansett Pier, where he conducts a jewelry store in the Summer.

The incorporators of the Vanadium Metal Co. are principally Philadelphians. The company will deal in all kinds of metals, and is capitalized at \$300,000.

Application was made, last week, by the members of the Penn Button Co. for a dissolution of partnership. The firm was established in 1891 and controls a line of ornaments and fancy goods.

George W. Fuller, formerly at 217 Federal St., Camden, N. J., has opened a new store at 310 Linden St., Camden. Mr. Fuller, who has been traveling for the past year in search of health, returned very much improved.

Gilbert Jaques, brother of S. Jaques, of Cook & Jaques, Trenton, N. J., dropped dead at his home, Sunday, Oct. 10. Heart trouble is supposed to have been the cause. Mr. Jaques had been in the employ of the firm for 30 years.

J. A. Caldwell, of J. E. Caldwell & Co., has just returned from an extensive European trip. Mr. Caldwell has brought with him an unusual collection of artistic and beautiful pieces, which can be seen in the various sections of this store.

The Menckly Bell Co., Troy, N. Y., has been awarded the contract for the Seth Thomas clock which is to be placed in the tower of the new Carnegie Library at Swarthmore College. There will be four bells to the set of chimes, the largest weighing 3,000 pounds.

Quite a number of Camden jewelers are taking active interest in the industrial parade which is to take place, Nov. 10, under the auspices of the Business Improvement Association. William L. Hurley, jeweler, president of the Board of Trade, F. B. Wallen and James F. Bentley are busy perfecting plans.

Samuel Mellin, a well-known jeweler of this city, was married, last Monday, to Miss Nora Wood, at her home, 150 Republic St., Washington, D. C. Several years ago Miss Mellin, who was then a nurse in the Polyclinic Hospital, treated Mr. Mellin for an eye affection. It was a case of love at first sight, which finally resulted in the marriage last week.

The Pennsylvania Retail Jewelers' Association held a regular monthly meeting at the Jewelers' Club, Monday evening, Oct. 18. The meeting was attended by the Philadelphia members, who are interested in the report from the executive committee regarding the matter taken up at the last meeting. Ira D. Garman, president of the association, presided.

Fifteen cases of relics from Egypt were the result of the third expedition made by Eckley B. Cox, Jr., into Nubia. The specimens were unpacked at the Museum of Arts and Sciences of the University of Pennsylvania. Ancient writings, scarabs and statuettes, some set with jewels, were numbered in the collection. Half of the relics unearched had to be turned over to the Egyptian Government.

Albert Lawson, who gave his address as 1305 Garrett St., entered the jewelry store of Simon Gorman, on 2d St. below Fairmount Ave., last Wednesday, and after selecting jewelry valued at \$40 tendered \$5 in payment and made off with the package. After an exciting chase by the jeweler the thief was finally overtaken and held prisoner until a policeman arrived. The culprit was arrested and given a hearing before Magistrate Ladner, Thursday morning, and held in \$500 bail for court.

The following jewelers were visitors to this city during the week: R. W. Quicksall, Mt. Holly, N. J.; M. Friedeburg, Atlantic City, N. J.; O. T. Fenton, Hightstown, N. J.; H. V. Stratton, Bordentown, N. J.; Roland Oliver, Burlington, N. J.; J. Lacey Tyler, Laceyville, Pa.; D. N. Krause, North Wales, Pa.; W. B. McFarlan, East Downingtown, Pa.; H. I. Marks, York, Pa.; N. Poland, Wilmington, Del.; B. B. Topping, Milford, Del.; B. L. Coder, Oxford, Pa.; Milton Reed, Doylestown, Pa.; J. A. James, Swedesboro, N. J.; J. D. Sallade and C. Kohler, Norristown, Pa.; M. Keinard, Phoenixville, Pa.; J. Swartz, Lehighton, Pa.; Ira Landis, Allentown, Pa.; R. C. Green, Pottsville, Pa., and C. Solliday, Lambertville, N. J.

The Pinkerton detectives, to the great surprise of the City Hall Police Court, last week, failed to present charges of forgery and the passing of forged checks against James Gordon Winters, 2008 N. Broad St., who had been arrested on these charges. When Winters was taken into custody information was received from the American Bankers' Association that he was wanted for passing alleged fraudulent checks on several jewelers in New York and Baltimore. At the same time a warrant was sworn out by J. E. Dillon, a diamond dealer, 635 N. 11th St., charging Winters with the larceny by bailment of a diamond ring valued at \$300. When Winters was arraigned, Saturday morning, there was only one complaint entered against him, and this was made by J. E. Dillon, who said he had entrusted the ring to Winters upon his voucher that he had a purchaser for it. Dillon said when he attempted to regain possession of the ring he was unable to do so. Winters was held under \$800 bail.

New Orleans, La.

The New Orleans *States* recently published a half-tone portrait and a sketch of the career of Phillip N. Kreutz, 3322 Burgundy St.

Samuel J. Hart, of the Hart Jewelry Co., who returned recently from a trip to the east, on which he combined business and pleasure, has been widely quoted in local papers in an interview in which he makes favorable comparison between the prospects in New Orleans and those in other cities which he visited.

On a charge made by Felix Bour, a jeweler employed by T. Hausmann & Sons, 818 Poydras St., detectives some time ago arrested two men whom they charged with being suspicious characters. The jeweler claimed that the prisoners came to him with a proposition to buy stock in a mine which, they stated, was located in Cook County, Wyo., offering to sell for \$100 stock which he could dispose of for \$500. As he believed the men to be swindlers he notified the police and caused their arrest. The police have been endeavoring to learn the history of the men and whether they operated in other sections of the country.

A. J. Shreve, who for several years conducted a store in Sebring, O., has purchased the china stock of B. E. Reamer & Son, Alliance, O. He will move to the latter place and install his jewelry stock in the new quarters.

Providence.

TRADE CONDITIONS.

Business in this city has shown a wonderful improvement during the past few weeks. The manufacturers are all busy, some working overtime two or three hours daily, while others have been increasing the number of their employes. Practically every line of the industry has shown a much better condition since the first part of October than at any time for the past two years. The traveling men generally report a far better commercial feeling in all sections of the country, especially in the far west. Among the heaviest selling lines at the present time are the cheaper grades of silver goods, novelties, etc., and plate, the demand for which is reported as being very brisk. Silver toilet goods are very popular and the demand is unprecedented. While present orders are for immediate delivery, the manufacturers have already commenced to prepare for new lines, and designers, pattern and tool makers are busy getting out new lines. The report from the retail jewelers of the city is that the volume of business done during the past four weeks exceeds any four weeks since the Fall of 1906.

L. W. Tweed, of this city, was in New York recently.

Hamilton & Hamilton, Jr., chain makers here, have started on night work.

C. H. Ballou & Co. have added a line of collar buttons to their sample cases.

A. T. Wall has returned from a business and pleasure trip as far west as Chicago.

Mr. and Mrs. Everett I. Rogers have returned from a few days' stay in New York.

S. M. Samuels has been elected to membership in the Pawtucket Merchants' Association.

Alvan T. Hatch, manufacturers' agent of this city, was a recent visitor in Indianapolis, Ind.

F. A. Simmons was a visitor in Albany, N. Y., last week, combining business with pleasure.

John J. Butler, superintendent for Waite, Thresher Co., has been enjoying his annual vacation.

Harry F. Huestis has been granted a permit to build a one-story wooden garage at Lenox Ave.

George N. Steere has returned from a western trip and reports business as very satisfactory.

Edwin A. Bush, general manager of the C. S. Bush Co., was at Rochester, Vt., for several days.

Emery J. San Souci has been elected a trustee of the Olneyville Free Public Library Association.

The Inlaid Comb Co. is running its factory nights to keep pace with its numerous orders from the West.

Irving Lederer, of S. & B. Lederer Co., has returned from an extended vacation spent in European travel.

Little & Co. are settled in their new quarters at 150 Chestnut St. and report an increasing amount of business.

A. Bingswanger, buyer for the Siegel Cooper & Co. store, of Chicago, was in this city recently placing orders.

Mr. and Mrs. Charles S. Bush have closed their home at Buttonwoods, and returned to this city for the winter.

Horace F. Carpenter has been elected vice-president of the Arion Club, the principal musical association of this city.

Martin S. Panning has been elected president of the Providence Public School Teachers' Retirement Fund Association.

Mrs. Martha O. Nickerson has been ap-

pointed by the Municipal Court as executor of the estate of Browning B. Nickerson.

Charles E. Hancock, of the C. E. Hancock Co., spent the major portion of last week among the firm's trade in New York.

Mr. and Mrs. William H. Manchester left recently for Haines Landing, Me., where they are to remain for two weeks at "Billy" Soule's camp.

Horace M. Peck, manager of the Manufacturing Jewelers' Board of Trade, was in New York on business in connection with that association.

Among other improvements that are to be made immediately at the Doran building on Chestnut St., is the introduction of a freight elevator.

A large force of millwrights are working day and night completing the machinery arrangements at the plant of the Metal Products Corporation.

Gen. Herbert S. Tanner and Capt. Horace Manchester have returned from a cruise down Narragansett Bay in the latter's fast launch, the *San Toy*.

Edwin C. Bliss, of the E. C. Bliss Mfg. Co., was a guest at the meeting of the Boston branch of the National Metal Trades Association at Boston.

Dutee Wilcox has been re-elected president of the People's Savings Bank, of Providence, and his son, Howard D. Wilcox, one of the directors.

George H. Holmes, of George H. Holmes & Co., who has been traveling in Europe with his wife and daughter, returned home recently on the *Kronprinzessin Cecilie*.

George N. Smith, who has been in Hinsdale, N. H., for several years, has removed to Apponaug, where he will open a retail jewelry store and watch-repair shop.

Miss Annie Florence Barton, daughter of Nathan B. Barton, of the Ostby & Barton Co., was married at Sharon, Mass., on Oct. 2, to Walter E. Brownell, of Boston.

Frank Esser, formerly of Esser & Co., has fully recovered his health and is now representing the William C. Greene Co., of this city, through the New England States.

Albert S. Vennerbeck has returned from a business trip to New York, Newark and vicinity in the interests of the Vennerbeck & Clase Co., gold and silver platers of this city.

At the auction sale of the plant of Miller, Fuller & Whiting Co., at North Attleboro, last week Tuesday, the machinery was purchased by the E. A. Eddy Machinery Co., of this city.

Mr. and Mrs. Frank B. Reynolds and daughter, Miss Carolyn A. Reynolds, returned Thursday by automobile from Maine, after a Summer's stay at Cape Tanglegwood.

Mr. and Mrs. Horace E. Remington celebrated the 10th anniversary of their wedding recently. There were more than 200 relatives and friends who paid their respects at the reception.

The Ostby & Barton Co. is operating its large plant every evening until 9 o'clock on account of the press of orders. It reports an unusually extensive business from the west during the past month.

Arthur W. Barrus, with the Gorham Co., was re-elected for the ninth time State Council Secretary of the State Council of

Rhode Island of the Junior Order of United American Mechanics on Tuesday last.

The handsome heavy cross of solid gold recently presented to retiring Commander James B. Gay by St. John's Commandery Knights Templar, of this city, was made by Harvey & Otis. It is valued at \$150.

The Cutler Jewelry Co. has been working until 11 o'clock recently, and still enough business on hand to continue these hours, except for Mr. Cutler's intention to working the employes' rights.

Henry G. Thresher, of Waite, Thresher Co., was elected a member of the executive committee of the Congregational Church, Rhode Island at the annual meeting at the Churchill House, Monday evening.

Mr. and Mrs. Samuel Einstein, Attleboro, have been recent guests of Mr. and Mrs. Meyer Harzberg at their Summer home Longmeadow. Mr. and Mrs. Harzberg move to their city home the current week.

Zare White has commenced the erection of an addition to his new factory at Eddy St., which, when completed, will be more than double his present floor space. The addition will be two stories high and brick.

Someone, evidently desirous of a sign for a sign or an ornament or both, walked with a brass sign from in front of Albert S. Tanner's jewelry store, 24 Westminster St., last week. It was valued at \$51.

D. A. Wilkens has arrived in Chicago on his return trip from the Pacific coast. The Ostby & Barton Co., of this city, during his trip, received many orders from him for jewelry, several of which were for considerable amounts.

Charles R. Myers, an old-time journeyman jeweler, died at the home of his son, Andrew J. Myers, 142 Sutton St., this week a few days ago. He was in his 84th year and was one of the few bench hands of the old school living.

George A. Forsyth, Lieut. Joseph J. Jr., and William Glasheen were members of the committee that had charge of the celebration of the 55th anniversary of the Museum Light Guards at the new State armory last Wednesday evening.

At the annual meeting of the St. John's Commandery, Knights Templar, of this city, Edward L. Mulchahey, with Sydney Smith & Co., was elected commander and Edward C. Lakey and Harry E. Remington were elected guards.

Contracts for more than half a million dollars' worth of casting and construction work are on the books of the broad department of the Gorham Co. More than half of this is for the new post office erected by the Government at Cleveland.

Cards of invitation were sent out this week by Col. Arthur H. Watson for the marriage of his daughter, Miss Anna S. Watson, to Charles Fletcher, son of Jos. E. Fletcher, of this city. The ceremony will take place at Grace Church on Nov. 3.

One of the early Fall home weddings took place in this city last Tuesday evening. Miss Julia Montfort Fowler, daughter of Mr. and Mrs. Jeremiah Drake Fowler, was married to Arthur Field Fowler, of Trenton, N. J., at the home of the bride's parents on Ontario St.

At the Republican Assembly convention recently the following jewelers were nominated from this city for the General Assembly next year: George H. Holmes, of George H. Holmes Co.; Harry Cutler, of Harry Cutler Jewelry Co., and Edgar A. Lowry, of the George L. Vose Mfg. Co.

At the recent meeting of the Rhode Island Business Men's Association, among 60 firms and individuals admitted to membership were Theodore W. Foster & Co. Co., E. A. Eddy Machinery Co., William H. Miller & Sons, United Brush Co., O. San Souci, Brown & Dean, and E. C. Cass Mfg. Co.

The Deboise Importing Co. has opened showrooms at 55 Weybosset St. for the sale of imitation old Sheffield plate, of which it has a large stock. The concern is considering the opening of a permanent store in this city, with branch stores in other cities throughout the country, making headquarters here, however.

The Gorham Co. has been working overtime in many of the departments for some time in order to fill the orders which are in larger volume than at any time since the depression of 1907, and are running at a rate which will establish a record if the present business is maintained until the close of the season.

The Theodore W. Foster & Bro. Co. has been working its factory until 9 o'clock at night since the middle of September. Mr. Foster says the usual Fall rush is mainly responsible for the activity in his line, that business is better than it was at this time last year and that the outlook is the best since before the panic.

The plant of the Universal Die Sinking Co., 14 Blount St., was slightly damaged by fire that broke out from a forge one afternoon a short time ago. The heat started the sprinklers, and some damage from water resulted before the sprinklers were closed. The blaze was extinguished by an employe, no call for the fire department being sent in.

T. Leslie Tranter, for many years superintendent of the Shepard Co.'s store in this city until a few months ago, died in Boston Friday afternoon. He was unconscious when discovered in his room, and although physicians worked over him for more than 24 hours they were unable to save his life. He had been suffering from insomnia and despondency and death was due to an overdose of laudanum.

Charles Bowers, a traveling salesman for the W. H. Coe Mfg. Co., manufacturers of old leaf in this city, was badly injured in an accident to an automobile that he was driving in the 24-hour race at Brighton Beach, New York, Friday. He sustained a fractured skull and general contusions of the body. It is thought, however, that he will recover. In a previous 24-hour race at the same track one of his legs was broken in nine places as a result of an accident.

The regular monthly meeting of the directors of the Manufacturing Jewelers' Board of Trade was held in the rooms of the association in the Wilcox building on Friday afternoon. There was a full attendance, with President Robert E. Budlong in the chair. The usual routine business was transacted, sub-committees made their reports, finances were discussed and several

failures and settlements were considered. Five firms were admitted to membership, making the total number of firms affiliated with the board nearly 250.

Among the foreign importations received through the Providence Custom House, during the past week, were the following: From Bremen, 10 packages of imitation precious stones and manufactures of metals, one of silverware and one of jewelry; from Havre, one package of imitation precious stones; from Liverpool, two packages of manufactures of metal; from Rotterdam, one package of manufactures of metals and 21 of crockery; from Southampton, one package of enamel, one of copper stampings and two of imitation precious stones; from Toronto, one package of jewelry; from Trieste, one package of glass ware.

William H. Draper, of this city, sailed last Friday from New York on a four months' trip around the world. The journey will be made on the Hamburg-American liner *Cleveland*, and will include stops at Madeira, Gibraltar, Naples, Suez, Port Said, Bombay, Colombo, Java, Borneo, Hong Kong, Canton, Manila and Honolulu. At many of these points stops of several days will be made, notably in Egypt, India, Japan and the Philippines, where the tourists will be given opportunities to enjoy side trips of great interest. Mr. Draper expects to arrive at San Francisco Feb. 1, 1910, and then will make a leisurely trip across the continent.

The button manufacturing plant of D. R. Child & Co., at North Swansea, has been purchased by John C. L. Shabeck, the manufacturing jeweler of this city, who will continue to manufacture the same line of goods that was made by the Child company. The latter made an assignment several months ago and the sale of the plant was in accordance with the plan decided upon by the creditors at a meeting held a few weeks ago. Just what per cent. the concern will be able to pay in settlement of claims against it the assignee, James F. Phetteplace, is unable to say as yet. Other assets of the company are being disposed of at the best terms possible and Mr. Phetteplace expects in a few days to be able to make positive announcements.

North Attleboro.

F. S. Gilbert is making a trip through the west.

G. C. Hudson has returned from a western trip.

William Peckham returned to New York, last Wednesday.

Toronto, was in town, last week, placing orders.

W. Wolfson, New York, was in town, last week, calling on the manufacturing jewelers.

George W. Cheever has been appointed executor of the will of his mother, Mrs. Joanna Cheever.

Ernest L. Upham, secretary of the Y. M. C. A., has resigned to accept a position with Cheever, Tweedy & Co.

The engravers of R. Blackinton & Co.'s factory enjoyed an outing and theater party, last Saturday evening, in Providence.

Donald Barrows entertained a party from the factory of the H. F. Barrows Co., last Sunday, at the Barrows cottage, at Wareham.

John T. Morrill, who has at different times traveled for local jewelry concerns, has gone to Rutland Sanatorium for his health.

E. A. Precourt, who for 25 years has worked for R. Blackinton & Co., observed his silver wedding anniversary, last Tuesday.

A party of 25 manufacturing jewelers were guests of Frank O. Emerson at his country home, at Lake Mirimichi, last Tuesday afternoon, and enjoyed a duck dinner.

John E. Tweedy, Orin Clifford and E. H. Cummings have been appointed members of a subscription committee to raise funds for the improvement of the Baptist Common.

John and William Miller, who are members of the firm of Doran, Bagnall & Co., are receiving the condolences of their many friends owing to the death of their mother, Mrs. Mary Miller.

Howard R. Grant, salesman for Riley & French, was presented, last Wednesday evening, to Dr. Cook, the noted explorer, at the Iroquois Hotel, Buffalo, at a reception given by the Board of Trade of that city.

A. W. Dennis, who is interested in the jewelry business at Attleboro Falls, has announced that he will not run for a second term as lieutenant-governor of Rhode Island. Mr. Dennis makes his home in Providence.

Mandalian & Hawkins have grown so rapidly during the past year that it has been found necessary to obtain additional floor space. The owners of the Manufacturers' building, where they are located, have decided to relieve the congestion by the construction of a substantial addition.

In accordance with an order issued from the United States Circuit Court, the stock, tools, machinery, etc., of the Miller, Fuller & Whiting Co. were sold at public auction, last week. John T. Sharkey, of Taunton, was the auctioneer. The Eddy Machine Co., of Providence, bought most of the machinery. W. H. Riley, George E. Homer, of Boston; S. M. Einstein, of Attleboro, and G. C. Hudson & Co. were other large buyers. All of the goods were sold at a remarkably low figure. The second meeting of the creditors will be held at the County Court House in Taunton, Oct. 27, at 10 A.M., before Referee Clifford P. Sherman.

D. A. Boal & Son, Mansfield, Ill., has disposed of his business at that place to Harry Brent

Attleboro.**TRADE CONDITIONS.**

Fall trade is excellent and the manufacturers arc being kept busy filling their orders. A number of the firms, especially those making mesh purses and silverware, have been forced to operate their factories overtime in order to fill orders. Manufacturers are anticipating a much better Fall and holiday business than last year.

The jewelers' bowling league started its season Monday evening.

Walter J. Newman, who met with a severe accident in Taunton, a short time ago, is able to be out.

George L. Shepardson, of C. A. Marsh & Co., arrived in New York, last week, from a western trip.

The work is progressing rapidly on the Y. M. C. A. building that is a memorial for the late William C. Tappan.

C. H. Eden sailed, Saturday, on the *Auguste Victoria*, of the Hamburg-American Line, for a stay in Europe.

The employes of Carter, Qvarnstrom & Remington will enjoy their annual banquet in Providence, Saturday evening.

James E. Blake has been in St. Louis in the interests of his concern. He is expected home the latter part of the week.

Ralph Wilmarth, the son of a prominent jeweler, has been elected one of the first vice-presidents of the senior class of Brown University.

A number of jewelers from this place attended the reception held at the West Side Club, last Saturday evening, in honor of Henry G. Thresher.

The employes of the D. F. Briggs Co. donated, last week, the sum of \$60 to the benefit of the Reddington family, whose home was destroyed, last week, by fire.

Harvey Clap and Percy Clap, of the Daggett & Clap Co., were in New York, last week, on business. Ernest Qvarnstrom, of Carter, Qvarnstrom & Remington, was also in New York.

The J. M. Fisher Co. has obtained from Indiana the wood of four trees planted by Abraham Lincoln. Bits of the wood will be used for receptacles for the Lincoln pennies as a new novelty.

The fire department was called out, last week, to put out a blaze in a shed attached to the Attleboro Refining Co., on Union St. The blaze was quickly extinguished. The origin is unknown.

Eugene Wetherell Blaikie, a former resident of this town, but now a manufacturing jeweler of Providence, was married, last Tuesday afternoon, to Miss Grace Brewer at the bride's home in Hyde Park.

Judge Stevens, of the Superior Court in Fall River, was in town, last Wednesday afternoon, looking over the property of the Cornell-Andrews Smelting Co., to whom the jury recently awarded a verdict of \$28,060 for land damages as a result of the grade crossing abolition.

Referee in Bankruptcy Clifford Shermom has given his decision in the case involving the Gifford Mfg. Co. and Nils C. Wallenthin. An attempt was made to show there was a partnership between the two. The referee decided that there was no partnership. An appeal was taken from the decision rendered.

A telegram signed by a hundred persons was sent by the members of the Murray

Church, last week, to J. L. Sweet, who is a manufacturing jeweler of this place, bidding him God-speed upon his trip around the world. He sailed, Saturday, from New York with Mrs. Sweet. They expect to return in February.

F. O. Emerson, proprietor of the Emerson Cafe, entertained the following party of manufacturing jewelers at a duck dinner at his Summer home on Lake Mirimichi: W. N. Fisher, Frederick Perry, W. A. Engley, Harvey E. Clap, Charles H. Eden, Frank Mossberg, O. P. Richardson, Samuel M. Einstein and Amos Blackinton.

Connecticut.

F. E. Stockton has assigned to the E. Ingraham Co., Bristol, two patents which apply to a nickel alarm clock.

The erection of the new plant of the Whiting Mfg. Co., Bridgeport, has been suspended because of the inability of the contractors to get the steel structural work through from Pennsylvania.

Thomas Dumphy, for several years in the employ of the American Silver Co., Bristol, died, early Saturday morning, at his home on Divinity St., of tuberculosis. Mr. Dumphy was 52 years of age.

An addition will soon be built to factory "L," International Silver Co., Wallingford. The new building will be of brick, 30 by 100 feet, two stories high, and so constructed that two additional stories may be erected later.

Mrs. Jane A. Rockwell, mother of Lucien and Curtis Rockwell, who are prominently associated with the Rockwell Silver Co., Meriden, died suddenly, about a week ago, at her home, 10 Maple Branch. Floral tributes to the memory of the deceased were sent by employes of the above-mentioned concern, by the Poole Silver Co. and others.

A friendly suit has been brought by Landers, Frary & Clark, New Britain, through their traffic manager, Frederick G. Russell, against railroads of the western division, and it is hoped that the action will result in a ruling which will mean much to manufacturers if the point at issue is sustained. It is claimed that the rate on percolators to Chicago is 75 cents per hundred, but to points in the western division the rate would be \$1.50, or double. An exception is taken to the double first-class rate.

Walter Camp, president, and Edwin P. Root, secretary of the New Haven Clock Co., New Haven, on Thursday, appeared before the Board of Relief to protest against the assessment levied against the buildings owned by that corporation fronting on Hamilton, St. John and Wallace Sts. Their petition for relief related only to the assessed value of the buildings which, last year, was announced by the Board of Assessors as being \$91,000. This year the amount has been raised to \$181,000. The clock company simply claims that the structures on which the major part of this increase is based are, in the main, old buildings, and that the assessors did not allow anything for the depreciation on these buildings.

Clarence C. Buehrig, Minier, Ill., recently removed to Presho, Ill.

Newark.

Bertrand A. Weber, Hasbrouck Heights, Ridgewood, N. J., has opened a jewelry store on the Plaza.

Julius H. Pratt, known as the "Father of Montclair," who died last Thursday at his home in that place from old age, was at time connected with the ivory business.

The jury which considered the testimony in the case of John M. Kiefer, a New Jersey jeweler whose sanity was questioned by his wife, found him to be of sound mind. His brother, Andrew O. Kiefer, a manufacturer, looked after his interests. He will now be at liberty.

Mr. Van Orcutt is touring the south in the interests of the jewelry instrument department of the American Oil & Supply Co. This company is about to open a branch in Providence, R. I., under the supervision of George H. Smead, who is well known in the jewelry trade there. The branch is expected to take care of the trade in the Attleboro as well as in Providence.

At the request of several residents of West Orange, the police of West Orange are trying to find out what has become of Joseph Brosez and family, who lived at 30 1/2 West Orange Road until Friday, when they were removed to the city for non-payment of rent. Brosez is a watch repairer and when his goods were set out on the sidewalk there were among them a number of watches belonging to the people who are now anxious to locate him. Brosez took all his property with him, but left no address nor that of the repository where he placed the goods.

Elaborate preparations are being made by the Newark Board of Trade for the reception of the Japanese industrial delegation who will visit the city, Oct. 27. Several manufacturing jewelers are on the reception committee. The delegates will visit representatives of the big industries, including the paraffin Tiffany & Co., Kremenetz & Co., J. Wilson Sons and Aluminum Goods Mfg. Co. The names of the manufacturing jewelers to be included in a trade directory being prepared by the Board of Trade for the use of the Japanese merchants. It will be ready in two months and will then be sent to the headquarters of the Associated Board of Trade on the Pacific slope, with other similar directories. Then it will be forwarded to Japan.

The "Pulsometer" is the name of a new instrument similar to the Sphygmometer which was described and illustrated in the columns about a year ago, but it is with the watch movement of the latter. It can be used to equal advantage as the sphygmometer for pulse timing purposes by physicians who already have watches and do not care to purchase another, and they may be glad to avail themselves of the opportunity of obtaining an instrument of such value and accuracy as this. The Pulsometer indicates rapidly the number of beats of the pulse in a minute. These instruments are encased in nickel and brass cases and can be purchased by the consumer at a reasonable price. The Pulsometer is supplied by Henry Freund & Co., 71 Nassau St., New York, who are the agents in this country for both this and sphygmometer.

SOLIDARITY
"THAT'S ALL"

America's Leading Jewelry Auctioneer

James L. Hand
14 Maiden Lane, New York

The largest and most successful sales ever conducted in the United States and Canada were conducted by Hand. Many auctioneers advertise that they are "wonders." Printers' ink is purchasable and the man with little ability might call himself the greatest ever. Write them all if you wish to but write "Hand" for his booklet on auctions. It will save you money and reputation. Why jeopardize your business by employing a "has been." Employ "Hand," the recognized Leader.

Read what three of the leading papers of the U. S. say.

The *Detroit Free Press* says: "It requires no special talent to sell average merchandise at auction, but in selling a stock as fine as that carried by Sturgeon & Co. a man of more than ordinary ability is needed. The magnificent collection of precious stones, the products of the famous silversmiths, the objects of art, etc., that comprise the largest stock of its kind in this section of the country, were described and sold by Mr. Hand in a manner both interesting and instructive. Never before has such a representative audience been collected at an auction sale in Detroit."

The *Association Jeweler* says: "Mr. Hand has avoided at all instances identifying himself with fake sales or poor business alliances, as in the present case he has allowed his name to be coupled with only high class retail concerns."

The *Omaha World-Herald* says: "The auction sale of the fine stock of the Mawhinney & Ryan Co. was ably conducted. Its success was due to the personality of Mr. Hand, the auctioneer, who is a man of education and refinement."

I recently concluded the most successful sale ever conducted in southwestern Iowa, the stock of E. H. Leffert, of Council Bluffs, reducing this fine \$60,000.00 stock in four weeks. Write Mr. Leffert as to my ability and write me to my New York office for a list of the great sales made by "Hand."

If you value your reputation "Hand" is the man.

JAMES L. HAND.

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1908, FROM The Illustrated Official Journal.)

ISSUE OF SEPT. 29, 1909.

11,795. WATCHES. C. ROBERT, Chaux de Fonds, Switzerland. May 30.

In watches having winding and hand-setting mechanism operable from a longitudinally sliding winding-stem through a two-armed lever, especially in watches of the "calotte" type, the case a, Fig. 2, contains a foundation ring b to which is hinged the movement d. The movement is covered by a glass c carried by a ring f pivoted to the rim at g. The winding and setting mechanism comprises a spindle h, Fig. 1, on the lower part of which slides a clutch i provided with a groove l engaged by

one branch m of a double-armed lever n pivoted at t. A spring g, acting on the arm l, keeps the clutch in engagement with the winding-pinion k. The upper end v of the spindle is square and fits in a square recess j in the winding-stem o. On this stem being pressed down from its normal position, its lower part p acts on a stop u on the second branch r of the lever n to engage the clutch i with the setting pinion x. When the stem o is pulled upwardly, the end v of the spindle h is released from the recess j allowing the movement d to be swung out of the casing.

11,803. STUD INSERTERS. R. PELISSIER, Paris.

May 30. (Date applied for under Section 91 of Patents, etc., Act, 1907, Nov. 27, 1907.) An instrument for inserting a stud into a collar

comprises a lever, Fig. 1, forked at c into two branches b forming a notch a of nearly the same diameter at the head of the stud. The head of the stud is introduced into the notch a from the side and the lever is turned to the position, shown in Fig. 4, to allow the stud to be pulled through the collar. To separate the stud and lever, the lever must be turned back again.

107. JEWELRY. S. BETTS, London. June 1. Snap-fastenings for bracelets, etc., are formed by the catch-piece d arranged as shown, so that

may be released by lateral pressure without necessity to bend the bow b. Specification No. 75, of 1908, is referred to.

140. JEWELRY PROTECTORS. A. E. E. KEATING, London. June 3.

protector for necklaces, etc., which may be used as a bracelet or necklace, comprises a small tube a, Fig. 1, of metal provided with slots e and screw closing-plugs b, b', the plug b' having a stem fitting into a recess in the plug b. In a plate a' on the tube are fixed small eyes r and rings c. The chains c have one or more circular links d and are passed around or through the necklace, the link d being then disposed in

and e and secured by the stem of the closing-plug b'. In a modification, Fig. 2, the tube has a longitudinal slot h into which is slid a bar g bearing pins f. Rings d on the chains c are passed over the pins f and secured by screwed knobs k which may be ornamented. The ends of the necklace if provided with spring rings may be engaged with the pins f. If the pins have fixed knobs, the ends may be fastened by spring-rings. In another modification, the chains may be secured by spring links. The device is secured to the dress by a stay-pin passed through rings at the ends or by a link attached to it. It may be provided with additional sets of chains of varying lengths and designs so that the device can be used as a bracelet or necklace upon detachment from the dress. Screw-threaded holes may be provided in the tube for the reception of stones in screwed settings which may act as lock-nuts for the closing-plugs or g.

174. SLEEVE-LINKS. V. H. BUCK, Highbury, London. Aug. 13. The head a of a sleeve-link is provided with a

connecting-bar b so arranged that the connecting-piece c can be moved to either extremity as shown in Fig. 4. A spring piece d, Fig. 3, is stamped

out of the back of the head a to press against c and retain it in the central notch

12,117. WEARING-APPAREL. A. HOWLE, Mosley, Birmingham. June 4.

Stays or Stiffeners. To facilitate attachment to the article to be stiffened, the part b, Fig. 1, between two longitudinal slits at each end of the stiffener, is forced up to form a bridge, and the attaching-pin is passed through perforations c' at the ends of each bridge. A longitudinal groove b'

is made in the bridge to fit the pin. The elbow of each pin takes into a depression a', Fig. 3, at the outer end of its bridge, and the inner end of the bridge is also sunk at a' to facilitate the entry of the pin point into the perforation. The pins may also be held in by making the perforations out of alignment, and by reducing the diameter of the pins near their ends.

Applications filed Sept. 13 to Sept. 18.

The partnership existing between Hurd & Diller, Sycamore, Ill., has been dissolved, C. E. Hurd continuing the business alone.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Oct. 13.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the port of New York for the week just ended:

- Accra: 3 cases watches, \$167; 8 cases clocks, \$160.
Buenos Aires: 2 cases optical goods, \$2,178; 6 cases watches, \$106; 28 cases plated ware, \$4,129; 48 cases plated ware, \$3,327.
Basle: 1 case jewelry, \$100.
Berlin: 4 cases clocks, \$330.
Berne: 1 case watches, \$125.
Bombay: 109 cases clocks, \$2,156; 2 cases clocks, \$185; 70 cases clocks, \$1,017.
Bremen: 3 cases watches, \$2,711.
Calcutta: 16 cases clocks, \$300.
Callao: 1 case jewelry, \$160.
Colombo: 15 cases clocks, \$227.
Guayaquil: 1 case watches, \$150; 2 cases jewelry, \$120.
Hamburg: 1 case plated ware, \$250; 14 barrels jewelers' sweepings, \$5,000; 3 cases optical goods, \$129; 1 case optical goods, \$150.
Havre: 1 case jewelry, \$150; 1 case optical goods, \$150.
Kingston: 1 case plated ware, \$500.
Liverpool: 6 cases clocks, \$456; 1 case thermometers, \$150; 25 cases watches \$453; 1 case jewelry, \$500; 2 cases optical goods, \$410; 177 cases clocks, \$2,478.
London: 1 case plated ware, \$125; 10 cases watches, \$1,505; 9 cases optical goods, \$4,583; 19 cases clocks, \$626; 8 cases optical goods, \$4,804; 26 cases watches, \$3,556; 1 case pearls, \$250; 27 cases clocks, \$1,285.
Melbourne: 83 cases clocks, \$2,679.
Montevideo: 6 cases clocks, \$267.
Para: 1 case optical goods, \$135; 13 cases clocks, \$312; 3 cases jewelry, \$813; 1 case watches, \$389.
Port Limon: 2 cases plated ware, \$183.
Rio de Janeiro: 6 cases clocks, \$228.
Rotterdam: 1 case optical goods, \$121.
St. Johns: 12 cases clocks, \$205.
Santiago: 1 case plated ware, \$530.
Savannah: 14 cases watches, \$184.
Trinidad: 2 cases watches, \$165.
Valparaiso: 19 cases clocks, \$301.
Vera Cruz: 8 cases clocks, \$380.

The Crown Jewels of Persia.

THE inventory of the crown jewels of Persia has just been completed and is said to confirm the conjecture that they are really of fabulous value.

One glass case two feet long and a foot and a half high and wide is more than half full of exquisite pearls of all sizes. There are also in profusion necklaces, shields, scabbards, vessels of gold, sword hilts and chains blazing red with rubies or studded and incrustated with enamels, rubies, diamonds, pearls and gems of all kinds.

Perhaps the most valuable and most exquisite of all is the globe 20 inches in diameter on which are pictured the countries of the world in varicolored gems. The seas are made of emeralds, and in all there are 50,000 stones. This globe is estimated at a value of at least £1,000,000.—New York Sun.

The "City Fathers" got busy, recently, at Mason City, Ia., and ordered all overhanging signs to come down. A remonstrance with the majority of the business houses as signers met the Council in session, but without avail. Without any further protest all the merchants took down their signs, some of which cost as high as \$300. Among those who suffered the heaviest in this crusade were J. H. Lepper, J. H. Greve, W. H. Potts and F. C. Haase.

“Have
You
 the
 Elgin
 with
 the
 49
 Dial?”

“H AVE you the Elgin with the 49 Dial?”
 Such a question will soon mean money to you, because it's one that is going to be asked everywhere and often.

Back of it is the demand that is being created for the new Railroad Elgin through the medium of advertising in Railroad magazines and the telling of this innovation among watches.

This watch is making a strong appeal to railroad men and others because of its readable dial. The hands are large, the figures big and plain, the dial either of white enamel or silver finished metal. This latter dial has hard *inlaid enamel figures*. It catches the faintest glimmer and is easily legible in candle light, besides being proof against the chemical action of cleaning fluids.

This new Railroad Elgin is the thinnest and most compact 18 size movement made, and is cased at the factory.

Don't wait until you see two or three prospective customers go elsewhere before you lay in a stock, but write now, RIGHT NOW, for prices and terms. Your jobber can give you full particulars. Or write direct to the Company.

Be ready when the demand is made for the Railroad Elgin with the “49 silver” or “49 enamel” dial.

These are the four grades and retail prices as advertised:

GRADE		20 YEAR GOLD-FILLED	25 YEAR GOLD-FILL
VERITAS	23 JEWELS	\$50.00	\$52.00
VERITAS	21 JEWELS	\$46.00	\$48.00
FATHER TIME (VERITAS MODEL)	21 JEWELS	\$41.00	\$43.00
B. W. RAYMOND	19 JEWELS	\$37.00	\$39.00

THE HOROLOGICAL REVIEW

The Adjustment of Watches.

Written expressly for The Jewelers' Circular-Weekly by H. Reinecke.

(Continued from issue of Sept. 29.)

Breguet Springs.

BREGUET spring is a flat spring with an overcoil. The selection of a spring for a Breguet spring is conducted the same way as in a flat spring. The overcoil will not materially affect the number of vibrations in a given time. It is, however, difficult to lay down a practical rule as to how long an overcoil should be. The only guide to be given is that about one-fourths of the outside coil, or a little more of a properly sized balance spring (of the diameter of the rim of the balance) will be amply sufficient for the length of the overcoil.

Having selected a proper spring, which should be closely coiled about 15 or 16 coils, hardened and nicely finished to prevent adhesion, free from the collet except at point of attachment and set true in the collet and true in the flat. Bend the inner curve theoretically correct and in harmony with the overcoil, only in the reverse direction. Unless a Breguet spring is quite true to the eye it cannot possibly act well, and the middle coil should not jump from side to side when closing or opening.

With all these points carefully attended to, take two pairs of tweezers and bend up the outer coil. It is of some consequence to know what relation the two points of attachment are standing, and they should never be in a straight line or at right angles; but while the points of attachment in a flat spring of nominally 11 coils contains only 10³/₄ coils, so a Breguet spring should contain, when of 15 coils, 14⁷/₈ coils, and the same if of any other number, about one-eighth less than a full number of coils. This fraction of one-eighth may be varied according to circumstances in cases of adjustment.

Rules for such adjustment cannot be laid down, and the following is very applicable to the subject, and is taken from text written on the subject.

The secret of the proper relative position of the points of attachment into the stud and collet opposite to each other can only be solved as nearly as possible by trials. When opening or closing of the upper curve, making it larger or smaller, the equalizing

of the vibrations can generally be obtained after a few trials and experiments.

In the case of chronometers the following is pertinent. Prize essays may be written on the subject, but they are of no use to the actual springer, who is a man possessed of a peculiar talent, gifted to perform in less than an hour what hundreds can never do in a lifetime. The springer will take wire, coil the same to a nicety, harden it by his own process, and, according to his own judgment, cut it the exact length; form in an instant the elbows, pin them in to perfection, and, thus finished, it will bear the most searching examination by the strictest workman, so that wonder will give place to admiration at the apparent oneness of its action, the perfect regularity of its contraction and expansion; the helical spring will, both internally and externally, be like a broad band and not a series of coils.

To return to our subject, when the spring is broken down to an approximate size take two pairs of tweezers and bead up the outer coil. Hold the spring firmly with one pair and twist the outer coil upwards with the other pair in a gradually ascending slant, but with no sharp angle, as such angle destroys the molecular connection and the elasticity of the metal. Half-way round the raised coil will want another twist up to make the raised part level. Next take a pair of broad tweezers of which one side is convex and the other concave and gradually and gently proceed to curve the raised coil inward by nipping it firmly. See that the overcoil is quite free from the second coil at the point where it commences to curve inwards.

To judge the height required for the overcoil, put the balance in the watch and see how far up the balance staff the level of the pin-hole in the stud comes by sighting it across. Raise or lower the overcoil to this point. If the watch has an index the last quarter, or rather curved part of the overcoil, must be circular and of the same radius as the index will describe in moving the same. Finally pin the spring in its stud with a flatted pin and press it home hard. With a Breguet spring all timing is done by changing the balance

screws for lighter or heavier ones or by small washers under the screws. In making this statement it must be borne in mind and for consideration that the change (momentum) of the balance, if ever so small, is a factor in the isochronous condition of the balance spring.

In like manner the shifting of the index, which is sometimes done for assisting the concentric action of the balance spring by means of lengthening or shortening the overcoil and correspondingly the weight of the balance, which may also operate in favor of the isochronism. It is often assumed that the Breguet spring has only one adjusting curve, unlike the helical spring used in ships' chronometers, which has one at each end of the spring; but such assumption is certainly an error, for there is in every correct Breguet spring a theoretical curve attached to the collet, the formation of which claims a great deal of manual dexterity, and which in connection with the overcoil causes the spring to act strictly concentric, which action is made plain by the stationary appearance of the center coil of the spring, the perfect illusion of which indicates the skill of an operator. In fact, in mentally theorizing on the Breguet and other devised balance springs we must adhere to the helical form with two adjusting curves, with double attachments.

A striking example of such springs is the spring mentioned in Britten's hand-book as having been invented by Mr. Hammersley, and which has been applied in several instances by Mr. Walsh, of London, an eminent springer, in three-quarter plate watches. This spring was entitled "Duo in Uno," and was of a form of a Breguet and helical spring combined. I think the merits of this spring have hardly been appreciated, which fact I mention from practical observation. I can hardly sufficiently recommend to a watch adjuster the study by observation of the points of balance springs of successfully adjusted watches in connection with superior escapements.

The number of coils and their closeness or diameter of a Breguet spring is determined according to the weight and size of the balance for which it is intended. A balance weighing about eight or nine grains and of a diameter of its rim of about 62/100 of an inch is best suited by a balance spring of about 14 or 15 coils and of a diameter of about 30/100 of an inch. A balance weighing about 16 grains and of a diameter of its rim of 70/100 of an inch is best suited with a balance spring of about

Waltham Watches

COLONIAL SERIES

COLONIAL SERIES movements are made by the WALTHAM WATCH COMPANY only. They are supplied in five qualities as follows:

RIVERSIDE MAXIMUS; Nickel

23 diamond and fine ruby jewels; two pairs diamond caps; raised gold settings; accurately adjusted to temperature, isochronism and five positions and carefully timed; compensating balance; meantime screws; patent Breguet hairspring, hardened and tempered in form; patent detachable balance staff; both balance pivots running on diamonds; double roller escapement; sapphire jewel pin permanently driven into the roller; exposed sapphire pallets; steel escape wheel; gold train; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels; steel parts chamfered; fine glass handpainted dial of most modern and artistic design.

RIVERSIDE; Nickel

19 fine ruby jewels; raised gold settings; adjusted to temperature and five positions; compensating balance; meantime screws; patent Breguet hairspring, hardened and tempered in form; patent detachable balance staff; double roller escapement; steel escape wheel; exposed sapphire pallets; red gold center wheel; patent micrometric regulator; exposed winding wheels; tempered steel safety barrel.

ROYAL; Nickel

17 jewels; red gold settings; adjusted to temperature and three positions; compensating balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; exposed pallets; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

No. 1425; Nickel

17 jewels; red gilded settings; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; exposed pallets; red gilded center wheel; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

No. 1420; Nickel

15 jewels; settings; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; exposed pallets; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

COLONIAL SERIES movements are sold in cases only. Each movement is fitted in its case and the watch timed at the WALTHAM factory.

Waltham Watch Company

Waltham, Massachusetts

coils and of a diameter of its rim of at 35/100 of an inch. The wire of a bence spring of the latter kind would be thicker in proportion as the isochronism is produced by progressive force or resistance of the spring and its finer adjustments be the curve of the overcoil, which method, according to Saunior, was first proposed by Grdin, a French maker, prior to the year 1770.

(To be continued.)

The Great Clock in the Metropolitan Tower with Its Lofly Time-Signal Lantern.

ONE of the largest four-dial striking tower clocks in the world is now well tested and in good running order in the metropolis of New York, where it is considered one of the city's wonders.

The installation of this great clock in the tower of the Metropolitan Life Building at Madison Sq., marks not only a progressive step, but what is likely in the general nature of improvements to be something of an epoch in the history of great public timepieces. There are only the dial-faces of larger diameter in the world. To name them, simply to dispose of the question of gross size of dial, they are the clock of the church of St. Bombort, Malines, Belgium, which has a dial of 33 feet; St. Peter's, Zurich, which is 29 feet; and the big clock, with one face, on the Colgate factory, at Jersey City, N. J., which is 40 feet across. "Big Ben" on the Houses of Parliament, in London, is only 27 feet in diameter.

All of these great timepieces are operated, to a greater or less degree, by electricity, as clocks, great and little, have been for centuries past. The Metropolitan Tower clock is operated wholly by electricity. While the builders, the Self-winding Clock Co., will not reveal its intricate secrets of construction, for what it is claimed are good trade reasons, THE JEWELERS' CIRCULAR-WEEKLY is able to present a number of details of interest obtained directly from the builders.

The tower of the Metropolitan building, which rises 700 feet and 3 inches above the street level, and 736 feet above tide water, supports the great clock just about midway of its height, or exactly 346 feet above the pavement. There are four dial-faces, pointing due east, west, north and south, each dial being 26 feet, 6 inches in diameter. These dials are constructed of twin squares, of a concrete material which is absolutely waterproof and is believed to be due experimentation to afford the minimum of expansion and contraction in all weathers. It has been tested with satisfactory results on a large clock on the estate of the Duke of Westminster, in England, and is believed to have furnished the solution of an old problem.—how to provide a really weather-proof clock-face.

There is a simple yet highly attractive color-scheme worked out in the concrete, which can be plainly observed from the street, and adds very much to the attractiveness of a close view of the timepiece. The field of the dial is dead white, against which a centerpiece of smaller cut pieces

and a border of larger square ones of a rich turquoise-blue is arranged.

The great figures marking the hours on these dials are four feet high. The immense hands are of iron frame-work, sheathed in copper. The minute-hand is 17 feet from end to end, and 12 feet from center to point; while the hour hand measures 13 feet, 4 inches in all, and 8 feet, 4 inches from the center of the dial outward. The larger hand weighs exactly 1,000 pounds, the smaller one 700.

The mechanism which operates these great hands is installed in a small chamber within the tower, just behind the dial-faces, the dimensions being only 14½x25x34 inches.

The striking apparatus, which operates a most elaborate scheme of time announcement, controlling four bells every quarter hour, is but little larger than the dial machinery, the case containing it being 48x35x24 inches. The four great bells that are the "voice" of the clock are located 269 feet above the dials in the base of the observatory, and some 93 feet below the great gilded "lantern" whose office it is to flash out the hours at night, when the bells are silenced.

This flashing of the hours is a novel idea and is one of the features that is likely to soon make the clock notable the world over. At a prearranged hour, according to the time of the year, when twilight is advanced, the bells are automatically silenced till another prearranged hour of daylight, when they are automatically released, to chime the hours and quarters again. Meantime, during the dark hours, a series of signals, each one signifying a unit of time, is flashed from the "lantern," at the very highest point of the tower, to indicate the quarters and the hours in turn. We will refer to these signals again in detail in their order.

The bells are in four tones, G (1,500 lbs.), F (2,000 lbs.), E flat (3,000 lbs.) and B flat (7,000 lbs.). On these are played throughout the day the old English air so common in Great Britain, known as the "Cambridge Quarters." This is a simple melody rather religious in style, and is said to have been composed by Handel, 150 years ago. It is also played by "Big Ben." There are four divisions or bars to it of four notes each. The first of these is struck on the quarter hour, followed by one long note from the big bell, which is the general announcer, proclaiming the "quarter." The first and second bars are played for the half hour with two long strokes; the first, second and third bars with three single strokes for the three-quarters; and the full stave of "quarters" on the hour, followed by its sounding on the great deep-toned B flat bell, the like of which in tone and volume is certainly unmatched in New York City and probably elsewhere in this country.

These bells are installed 615 feet above the street level, and the largest can be heard at considerable distance.

The apex of the tower is a great gilded "lantern," easily described in general outline on a clear day from the pavement below. The chief office of this "lantern" is the flashing forth of the signals which take the place of the bells at night.

From this "lantern" there flash all night powerful electric arcs which disappear as the hours come around, single flashes being then instituted.

The quarter hours are flashed from each of the four faces of the "lantern" by a single red light, the halves by two red flashes, the three-quarters by three flashes. On the full hour the white arc lights go out temporarily and white flashes to the number of the hour are shown. The dial-faces, 350 feet below the lantern, are illuminated at night by 198 50-c. p. lamps for each dial, which are placed behind the dial and cause the figures and the hands to stand out with remarkable clearness, even in dull weather.

This entire system of public time-keeping is operated by a master-clock cased in elaborately carved mahogany and in shape somewhat larger than a "Grandfather's Clock," on the second floor. This master-clock also controls and operates 100 smaller clocks in the building, and several programme instruments for sounding bells in different departments of the Metropolitan Company's offices. It is adjusted to run within five seconds per month. All the controlling devices for the tower clock are automatically directed from this clock, and no human being approaches any part of the mechanism at any time. The contract in this instance was awarded to the highest bidder and the entire plant was produced within the period of eight months called for.

For the benefit of foreign readers and those in this country who may never see it, we may add that the Metropolitan Tower, from the top of which the night-hours, quarters and halves, are flashed is the highest inhabited building in the world, making this during the dark hours the highest clock in the world. There is, indeed, but one higher structure in existence, the Eiffel Tower at Paris, which is hardly more than a curiosity, and is devoted to no practical purpose except sight-seeing.

Determining Standard Time.

(By HARLAN T. STETSON, in the *Scientific American*.)

ALTHOUGH it may be generally known that the determination of time is the work of the astronomer, yet doubtless few people stop to investigate the precise methods employed in the correction and distribution of standard time. It is a system in itself quite indispensable to the success of the industrial world.

The great universal timekeeper is the earth itself. So uniform is the earth's rotation on its axis, that the length of the day according to Newcomb has not altered the 1-100th, and probably not the 1-1000th part of a second since the beginning of the Christian era. The direct effect of this rotation is the apparent revolution of the celestial sphere, or the daily motion of the sun, stars, and planets across the sky. As places on the earth are determined by latitude and longitude, so stars are located by right ascension and declination. Every conspicuous star has its position carefully determined, and from a star catalogue the astronomer knows at once the instant of

RING OUT THE OLD—RING IN THE NEW

STANDARD.—30-hour time, Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

THE RATTLER.—30-hour time, Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case nickeled and highly polished.

LONG ALARM.—30-hour time, Six-minute Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

ALTERNATOR.—30-hour time, Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

Why travel in the same old rut the balance of your natural life, and buy the same antiquated styles of Nickel Alarm Clocks your grandfather used to buy, just because some manufacturers have not thought it necessary to produce new designs in other clocks?

We have some new ones, superior to anything heretofore made, and to introduce them and put a set into the hands of every jeweler, we will, on receipt of \$6.00, deliver east of the Rocky Mountains, express prepaid, one sample of each, consisting of eight clocks as described.

Don't fail to avail yourself of this opportunity to see a complete line of up-to-date alarm clocks.

See coupon at bottom of page.

THE E. INGRAHAM CO.

BRISTOL, CONN.

DI-ALTERNATOR.—30-hour time, Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch; extra large bell. Height, 7 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

"THE ALARM CLOCK WITH THE CONCEALED BELL"

See cut of interior view showing bell located entirely within the case. The unsightly visible bell eliminated. Bell cannot be disarranged or thrown out of adjustment.

SIREN.—30 hour time, Long Alarm (four minutes), with "shut-off" switch. Large bell inside of case. (See interior view.) Height, 6 in.; Dial, 4 1-2 in., solid brass; Case, nickeled and highly polished.

VIBRATOR.—30-hour time, Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch. Large bell inside of case. (See interior view.) Height, 6 in.; Dial, 4 1-2 in., solid brass silvered; Case, solid brass, old brass finish.

A—Dial
B—Bell
C—Dust Cap
D—Movement

ROTATOR.—30-hour time, Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch. Large bell inside case. (See interior view.) Height, in.; Dial, 4 1 2 in.; Case, seamless brass nickeled.

TEAR THIS OFF AND MAIL TO-DAY

THE E. INGRAHAM COMPANY, BRISTOL, CONN.:

Gentlemen—Enclosed find \$6.00. Please send me by express, prepaid, your "Introductory Assortment" of eight alarm clocks, consisting "Standard," "The Rattler," "Long Alarm," "Alternator," "Di-Alternator," "Siren," "Vibrator" and "Rotator." Yours truly,

Name _____ Address _____

mination or meridian passage of any given star.

then with a suitable instrument an observation of a star's transit across the meridian can be obtained, and the time of occurrence be noted by a clock or chronometer, a comparison with the catalogue will disclose the amount by which the clock or chronometer is fast or slow. In an operation of finding the clock error is always what astronomers understand by the expression "obtaining time." The instrument used for making these observations is known as the transit instrument, and consists essentially of a telescope so mounted as to be capable of swinging about a horizontal axis in the plane of the meridian.

The accompanying illustration shows such instrument ready for the observation. The eye-piece of the telescope is placed in the reticle, comprising a number of spider threads, of which the attached diagram shows one to be stretched vertically and two horizontally across the field of view. The instrument is so adjusted that the middle

STANDARD TIME BELTS OF THE UNITED STATES.

of the vertical threads coincides as early as possible with the imaginary circle of the sky called the meridian.

When observations are to be made for determining time, the astronomer first turns to the Ephemeris or some catalogue of stars, and selects a star which is soon to transit, then from the declination he mentally calculates the altitude at which the star will transit. By means of a reading circle attached to the instrument he sets the telescope at the proper angle, so that the star will pass through the field of view. Either of two methods may now be employed in making the observations. The oldest and older of the two is known as the "eye and ear" method.

This consists of watching the star pass through the field, and while listening to the half-second beats of the chronometer, estimating to the nearest tenth of a second the time at which the star crossed each read of the reticle. In the "chronographic method," now much used, the mind has less to do, and hence more accurate results can be obtained. Here as before the astronomer watches the passage of the star across the reads of the reticle, but instead of estimating the time of transit, he presses a telegraphic key at the proper instant. The key is in electrical connection with an instrument called a chronograph, and an automatic record is made of each observation. Either method will leave a record on the five threads similar to the following, the Roman numerals designating the

number of each thread in order of observation:

I.	16.7
II.	25.5
III.	34.3
IV.	43.0
V.	7h. 9m. 51.7s.
Mean	7h. 9m. 34.24s.

The above is the actual result of a set of observations made by the writer, using the eye and ear method. The figures in the "seconds" column were written immediately after the transit of each thread; the hour and minute were filled in at leisure after the last observation.

The mean of these observations will give a more precise result for the transit over the middle thread than a single observation could afford. The exact right ascension of the star we will suppose to have been known as 6h. 58m. 35.95s., which equaled the correct time of the star's transit. The chronometer, however, recorded the time of transit as 7h. 9m. 34.24s., and was therefore fast by the amount of 10m. 58.29s.

Were the instrument in perfect adjustment, and were there no personal element to enter into the result, such a set of observations would be quite sufficient. As a matter of fact, however, there are always small errors in the instrument, which must be determined and applied as a correction to the final result. The astronomer, therefore, does not rely wholly upon a single record like the above, but will usually repeat the observation with a number of different stars on the same night. From these numerous records he is able to deduce the necessary corrections, and thus obtain a more accurate value for the chronometer error.

Time thus determined, ordinarily correct to within one-tenth of a second, is *sidereal* time; and though very useful to the astronomer, is quite unsuited to the use of the world in general, whose activities are governed by the rising and setting of the sun, and not the stars. Sidereal time must therefore be converted into *solar* time. This is easily effected by a simple calculation constantly employed by the astronomer. Having obtained solar time, there remains only to distribute it to the outside world.

Until within the last twenty-five years each community used its own local time, but as travel became more extensive it was found quite inconvenient to alter one's watch and system of time reckoning for every few miles of traveling east or west. Accordingly, in the year 1883 the United States adopted the present system of standard time. The whole country from the Atlantic to the Pacific was divided into time belts of approximately fifteen degrees in width. The "Eastern" belt, extending as far west as Buffalo, uses the time of the 75th meridian, which is very nearly that of Philadelphia, and is five hours slower than Greenwich time. Crossing into the "Central" belt, watches are set one hour earlier, as the time employed is that of the 90th meridian, six hours behind Greenwich time. Similarly, "Mountain" time uses the 105th meridian, seven hours behind, and the "Pacific" belt adopts the 120th meridian time, just eight hours slower than that of Greenwich. Such a system is quite indispensable to railroad lines, and hence standard time is some-

times called "railroad time." At present almost every civilized country is using some system of standard time, usually under the control of its own government.

The chief source for standard time in the United States is the Naval Observatory at Washington, D. C. Here high-grade clocks are carefully regulated by observations of the stars at night, and all necessary corrections applied. For the five minutes preceding noon of each day, eastern time, the Western Union and Postal Telegraphic companies suspend all ordinary business, and throw their lines into connection with the Washington Observatory. It is so arranged that the sounders all over the lines make a stroke each second during the five minutes until noon, except the twenty-ninth of each minute, the last five seconds of each of the first four minutes, and the last ten

AN OBSERVATORY TRANSIT INSTRUMENT FOR DETERMINATION OF STANDARD TIME. DIAGRAM SHOWS RETICLE OF TRANSIT.

seconds of the fifth minute; then follows the final stroke at exact noon.

This affords many opportunities for the correction and setting of timepieces throughout the country. The Western Union Company also operates a system of some 30,000 clocks, which automatically set themselves by the noon signal each day.

In addition to the Washington signals, many smaller observatories determine and distribute time in a similar way to jewelers and local railroad lines. In most of the larger seaports, time balls are dropped at noon, and give mariners an opportunity to correct their chronometers. Fire-alarm companies aid in the distribution of time in many localities by sounding bells at certain specified times each day, thus affording the public a convenient source of "correct time" with a reasonable degree of accuracy.

George C. Lang, a jeweler and optician of Barton, Vt., has purchased the property of the late Dr. C. R. Skinner, at that place.

Amos A. Shaw recently celebrated the 45th anniversary of his business career in Alfred, N. Y.

THE "BANNATYNE"

IS

"A TIMEKEEPER AHEAD OF THE TIMES"

WALTER FRAZER BROWN

Western Representative

Columbus Memorial Building

CHICAGO

The "Monastery"

We constructed the "Monastery" works with a view of competing with a weight movement against inferior spring works. Our success has been great. The weight "Monastery" construction, chain wind, is of such excellent quality in every respect and offered at such a reasonable figure that it is out of question to-day to offer any hall clock above \$50.00, with long pendulum spring works.

A genuine Grandfather clock has always a weight movement. And we will state that any chiming Hall clock made up with a cheap spring movement can never be satisfactory. The hammer blow is too weak to get the tone out of good bells; only thin, light bells can be used with the little blow of the hammer; every day the spring gets weaker and the chiming slower; it even ceases after 5 or 6 days. Besides, in such cheap affairs the dial works are not suitable for quarter chiming. The combination makes a very poor clock. Not so with the "MON-ASTERY," which are heavy, powerful brass works, with solid steel pinions and built as a good weight chiming movement should be constructed.

The illustrated model is a fine piece of furniture, fit for any residence, and can be obtained with three combinations of striking:

1. With five 1 1/4" tubular bells, made and tuned by Mr. R. H. Mayland (Westminster chimes); list.....\$180.00
2. With five rodgongs, also Westminster chimes; a feature in this combination is that the hour is struck on 4 gongs which, being tuned in a chord, produce a sound which is the nearest imitation of the distant resonance of a big tower bell; list... 151.00
3. Hour and half strike on 4 rodgongs, tuned in a chord; list..... 104.00

Prices F. O. B. New York.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

An Educational Window Display to Advertise the Watch-Repairing Department.

Prepared expressly for The Jewelers' Circular-Weekly by R. F. N.

WINDOW displays which aim to enlighten or impart information to the intelligent onlooker always attract considerable attention, and, if the information has to do with the business of the store-keeper, gives prospective customers a cer-

visited when his particular services are needed.

The man who takes only an indifferent interest in his work is no longer sought. Specialization and correct knowledge are forcing him to retire. Hence, we see that

neatly and large enough to allow the work to be read without effort by the average man.

An appropriate title for the display would be:

The Mysteries of a Watch Unfolded.

This might, if desired, be reinforced with other phrases such as:

We Know Watches From A to Z.

AN EDUCATIONAL DISPLAY, SHOWING CARDBOARD WITH WATCH PARTS PASTED THEREON.

tain amount of confidence in him. A jeweler or watchmaker, for example, who takes the pains of dismantling a watch and of placing the different parts in his show window with an inscription under each part, giving the name of that part, compels the prospective purchaser of a watch to believe that he takes more than an ordinary interest in horology and in watch and clock repairing. "He loves his work" will be the verdict, and that is the man who will be

one is impressed psychologically with a display such as that shown herewith.

The display can be made without incurring any expense except the purchase of an old movement, which will cost from 35 to 65 cents. Take the watch apart and paste up the different parts on one or two different pieces of stiff cardboard, as shown in the two illustrations. Have your printer, or, better, your show-card writer, if you have one, print the names of these parts very

We Understand the "Anatomy" of a Watch.

These phrases should be done in very neat lettering by a show-card writer, if one is available. If not, let your printer give vent to his artistic inclinations.

L. F. Smith, Oskaloosa, Ia., is now on the east on a buying trip.

Storekeeping Department.

Up-to-Date Selling Methods.

Extract from an article by FRANK FARRINGTON, in *Advertising and Selling.*

STORE that gets the name of always coaxing and importuning its customers to buy more will be disliked and people avoid it. The public like to step in and stand off a series of insistent attempts to sell them other things which they do not want. The retail salesman may easily undergo persistence under such circumstances.

On the other hand, the mere handing out of the goods asked for is being nothing but a slot machine would not be, and the machine would have the best of the argument.

If I had a clerk who was nothing more than a machine for taking orders, I would charge him and get a phonograph. The clerk who cannot help the business by encouraging people to buy better goods, more profitable goods, or other goods than merely what they come in and ask for, is a bit better than a phonograph, which could take the orders and repeat them with far fewer mistakes than the ordering clerk would make.

The mere order-taker is worth as much as 50 cents a day, maybe a dollar, if he can wrap parcels nicely, or if he is willing to help deliver goods and do odd jobs.

A good deal of the live advertising of the modern store is done on the basis that if people can be induced to come into the store for one thing they are pretty apt to buy something else before they get out. How much does a clerk help on this proposition? That is the measure of his salesmanship. If he does not help the store to get its money back on a sale that made no profit, he is a poor investment for the store. And any clerk who is a poor investment for the store is a poor investment for himself.

Of course, customers may look around and find things they want even if no one calls their attention to them. So might they go looking around town for a store at which to trade, and stumble into yours without ever having seen it advertised, but that is scarcely an argument against advertising.

It is the business of the clerk to help people to find things they want, other than just what they ask for, and the clerk who is most successful at this is the best salesman, provided all the time that it is understood that there is no salesmanship in overloading a customer.

It is the clerk's business to know what the store is advertising. If the store is properly run it will make it easy for the clerks to keep posted on such things, but it is up to the clerk to find out, anyway. There are too many cases where the customer goes in and asks for some special she has seen advertised, only to find that the salesman knows nothing about it and has to look it up. This gives a visitor a pretty good line on the amount of business being done on the article that has been advertised as such a big seller.

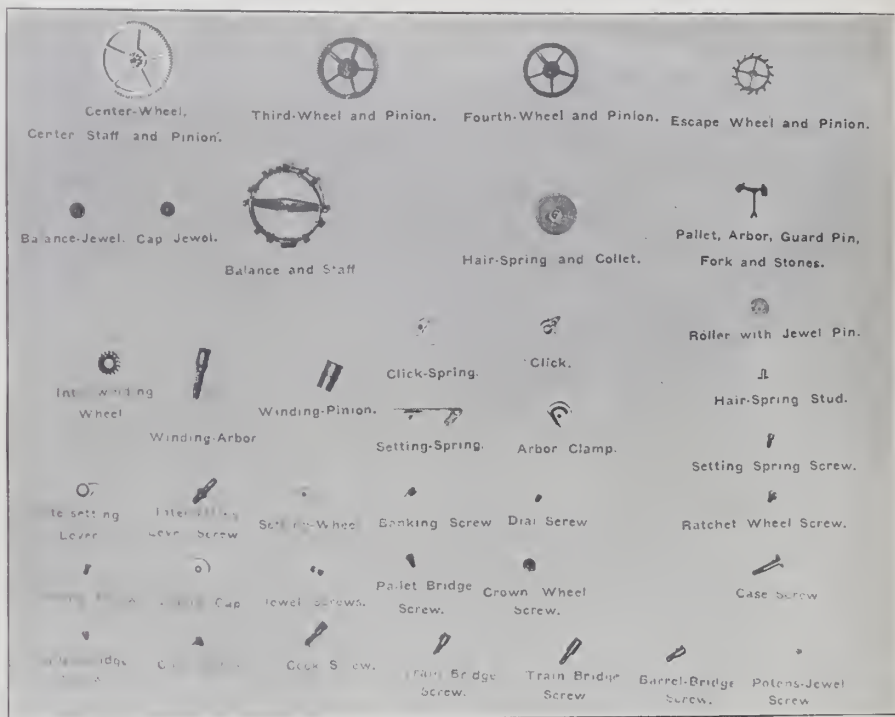

Plenty of stores get a bad name on account of the incapacity of a few of the employees. It is the poor service that is noted, rather than the good, even if it happens only occasionally. And one or two mistakes a day will soon give a very general opinion that there is something wrong with the service in that store.

This is due to the fact that it is human nature to complain of any real or fancied injustice, and each customer who feels a grievance will take more pains to air that grievance elsewhere than to come back to the store and get it adjusted. A few such customers going around telling their troubles,

is, the way to make an art worth the most possible money, the way to raise its value to the highest power, is to perfect it from the beginning. When you start in to learn salesmanship, learn each step well. Get the rudiments firmly implanted and then the advanced steps will be more easy.

One of the rudiments of salesmanship (or of any other art), is health. With health as a basis any man has 10 times—yes, a hundred times—the chance to make a success that he could have without health, and it is questionable whether there can be any large success unaccompanied by health.

Eat to live. Sleep till well rested. Exercise.

A SECOND CARD, SHOWING OTHER WATCH PARTS.

bles will soon make much feeling that the store is not fair.

A part of salesmanship is carrying a heart the interests of the customer. People soon discover when a salesman is inclined to help them to a wise choice of goods, or when he is inclined to sell them the most he can regardless of their own needs or inclinations.

It is frequently the case that the salesman knows better than the buyer how many or what goods ought to be bought, and this enables the salesman to do the buyer a favor that will leave an everlasting impression. It is at this juncture that the poor salesman falls down and loads up his man, while the wise one restrains himself and lays a foundation for future business.

It is just as important for a salesman to build for his future as for a merchant to do so. None of us can hope to succeed in a day or in a year. We are here for life, and if we expect to continue in business, either in one place or another, it is wise and necessary that we build as we go along. Otherwise we are using no better judgment than any fly-by-night con. man.

Any practical art can be made more practical by being made more scientific. That

is, the way to make an art worth the most possible money, the way to raise its value to the highest power, is to perfect it from the beginning.

After health comes the necessity for making one's self personally pleasing. Learn to talk intelligently of other things than your business. Keep posted upon current events well enough to be able to reply with sense to a remark upon any subject of the day. Don't be a one-idea man.

Strive to develop a character that will give people reliance in you. That will help you with the public, and it will help you with your employer. A man cannot make a success without a good character. Whatever seeming success he achieves will be based upon a foundation of sand, and it is only a question of how long before the fall will come.

In order to be a successful salesman you must first be a success at what God made you—a man. You cannot hope otherwise to succeed at these things you would make yourself.

The man who reaches a point where he thinks that he is a crackajack, and about at the top, has reached a point from which he will go down hill unless he takes his own measure before getting on the toboggan.

(To be continued.)

We Do Not Use Pressed Blanks

Hawkes Cut Glass

IS CUT FROM THE *SOLID* BLANK

No. 1.

No. 2.

No. 1 illustrates a pressed blank, *viz.*:—the pattern pressed into the Glass.

No. 2 illustrates a solid blank, the kind entirely used by us.

The DIFFERENCE in the finished article is unmistakable, the pressed blank being devoid of lustre and brilliancy and giving one the idea of a cheap moulded article. It can easily be detected by passing the fingers lightly over the inside of the article. Wherever the cutting on the outside is deep a slight swelling on the inside will be noticeable to the touch. Whereas the genuine article cut from the solid blank is free from all these defects, being perfectly smooth on the inside, having a lustre and brilliancy only equaled by that of the diamond, and when held to the light is as clear as crystal.

Pressed or Figured Blanks Cut Over Appeal to the Department Store Trade

WE DO NOT SELL DEPARTMENT STORES

but cater exclusively to the legitimate Jewelry trade. In return we ask for the business of the Jewelers whom we are seeking to protect by furnishing genuine cut glass (not purchasable by department stores) at prices competitive with the inferior product.

Alphabetically Arranged for Easy Reference.

By Clement W. Coumbe.

(Continued from issue of Oct. 6.)

CAMPANIFORM. The bell shape as found, for example, in the capital or base of pillars known as *campaniform*.

CAMPANIFORM BASE OF PILLAR AT SUSA.

KANABUS. "A wooden stock or framework used by potters and sculptors round which the clay was laid. In small statues and vessels it was of the simplest description, and mostly of the form of a cross."—*Repper's Class Dict.*

KANACHUS (Gr. Kanachos). "A Greek sculptor born in Sicily about 480 B. C. He worked in bronze, in the combination of gold and ivory (*chryselephantine*), and also in wood. His masterpiece was the colossal statue of Apollo at Miletus."—*Seyffert.*

CANALICULUS. The channels in a triglyph so called (See *triglyph*.)

CANALICULUS.

CANBERIA. "Armor for the legs. Jambres."—*Meyrick.*

CANCELLI. "A trellis, iron grating, or generally an ornamental barrier separating one place from another."—*Mollett.* Whence *chancel*.

CANDELABRA AND CANDELTICKS. "For lighting, the *candelabrum* played an important part in the domestic and religious life of the ancients. In the house they mostly employed slender, delicate bronze *candelabra*, and for religion the great state *candelabra* of marble. The *candelabrum*, like a column, consists of three parts—the base, the shaft and the capital.

"To afford the necessary steadiness the base of the *candelabrum* is on a compara-

tively large scale, and divided into three legs, which stretch out towards the points of an equilateral triangle. For the foot the claw of an animal, and in particular the claw of the lion, is used. Not infrequently

PUBLIC OR STATE CANDELABRUM. ITALIAN RENAISSANCE. AT VENICE.

the claws rest on balls or disks. The transition to the shaft is designed with a double calyx, the upper leaves of which rise and encircle the shaft, and the lower leaves descend and mask the junction of the three legs. A delicate anthemion may be per-

ANTIQUE CANDELABRUM FOOT. STYLE 1.

ceived between each pair of feet on richer examples. In exceptional cases the leg appears to grow from the mouth of an animal. Occasionally a circular, profiled and

decorated disk is used instead of the double calyx and anthemion.

"The decoration of the shaft of the antique bronze domestic *candelabrum* is sim-

ANTIQUE CANDELABRUM FOOT. STYLE 2.

ple, and consists of flutings or channelling, sometimes of naturalistic buds and leaves. It is divided into zones, or the shaft swells and diminishes alternately, giving a richer profile.

"The capital of the *candelabrum* has a plate or cup-like form according as it is destined to receive a lamp or a candle. The tops of the antique bronze *candelabra* are profiled like the so-called *kraters*."—*Meyer.*

ANTIQUE CANDELABRUM CAPITAL. NAPLES MUSEUM.

The term was originally used for the candle or torch, as the name implies. But later the holders for lamps were also so called, the same style of stand being used for both purposes. As they stood on the floor or the ground they were quite tall of structure.

Ecclesiastical candelabra and candlesticks. In the IV. century brass *candelabra*, inlaid with silver, were presented to the churches by Pope Sylvester. The most handsome *candlesticks* are the seven-armed ones, formed in imitation of the famous Temple *candlestick*. Of such a kind is the noble bronze *candlestick*, after the style of the Romanesque period, which the Abbess Matilda (about 1003) gave to the minister

KALANA GLASS

AN entirely new and beautiful effect in etched glassware in which floral designs, such as pansy, lily, poppy, geranium, etc., are shown in an attractive manner true to nature. No illustration could convey the exquisite beauty of this ware.

During the dull times we have been preparing to meet the prosperity which we were certain would follow. You can now find among our samples many good things in Cut Glass, Engraved Glass and Rock Crystal for prompt shipment.

church at Essen, membered by handsome ornamental bosses.

Besides these large *candlesticks*, there are also *pergulae* (*espaliers*), *herciae* (*harveys*), *rastella* (*rakes*)—that is, candlesticks with a broad upper slab, on which

SEVEN-ARMED CANDLESTICK.

any lights can be brought together by the use of one another, and for which the designation in Germany is *kerzstall* (chancel). Also are here to be reckoned the three-cornered *candelabra* (*hercia ad tribus*), as the iron one in the cathedral at Osnabrück. They were used on Good Friday, and in such a way that, at the singing of the Psalms, the lights were extinguished one by one in rows. Lastly there are the simple but generally very large *candlesticks* made for one single, very thick taper each, which it was the custom to place before the altars, sometimes in pairs on the steps of it.

From the simple *candelabra* arose at the altar *candlesticks*, which can be proved not to have stood on the altars before the XII. century, but which now are

strikes and fantastic shapes on the foot; but they are often of copper with enamel illustrations. As the latter, in consideration of their painted decorations, were formed with a very simple and little-membered contour, with surfaces as flat as possible, the *candlestick* of which we give as an illustration (see cut) forms a strong contrast to those treated as sculptures. Some excellent and especially large ones we see in the episcopal museum at Münster;

WALL LIGHT AT DORTMUND.

others in the archiepiscopal museum at Cologne, in the national museum at Munich, in the museum at Freising, and here and there in the treasuries of old churches. In the Gothic times, as a rule, the altar lights are simple works, cast in brass, without ornament, but often distinguished by noble proportions and fine membering. Of a

ALTAR CANDLESTICK WITH FIVE PRICKETS.

similar kind are the *lights of the acolytes*, with which the attendant on the priest had to conduct him to the altar.

Lastly we may mention the *wall lights*, which were mostly fastened on the piers and on the walls. They seldom occur, however, among the lights of the Middle Ages. Romanesque examples are in the church at Fürsten, near Munich; Gothic ones in St. Cunibert at Cologne, in the Reinold church at Dortmund, and St.

Mary's there (see cut). In the later times the staff which fastens the luster to the wall passes through a shield pierced with tracery-work, worked in elegant cast brass.

Quite a special kind of light is used for the worship of the dead, as in festive offices for the soul; the raised catafalque in the middle of the nave of the church is surrounded by a number of *candlesticks*.—Lübke.

Altar candlesticks. "From ancient representations we gather that some of these *candlesticks* were furnished with several prickets, as shown in the annexed cut, and in the church at Léart, in Flanders, a candlestick of this description is yet remaining."—Pugin.

Elevation candlesticks. "A pair of large candlesticks, standing either within or without the curtains, on the sides of the altar, holding tapers, lit immediately before the consecration, and in some churches extinguished immediately after the Elevation, in others left burning until after the communion. This term is not of any great antiquity. The candles lit to honor the Blessed Sacrament during the Elevation were generally held in the hands of the assistants. This is shown in the title pages of the old printed Sarum Missal."—Pugin.

Standing candlesticks "are standards to hold a number of tapers, set up in choirs, near shrines and images. Many of those still used in the Flemish and German churches are of the XV. century, and some exceedingly beautiful in design, consisting of a succession of diminishing circlets, supported by a standard, and forming a pyramidal mass of light. At Rheims Cathedral there were 10 *standing candlesticks* before the high altar covered with silver plates, nine of which held wax tapers on solemn feasts, and the 10th was for the Gospel. They were given by Henry, Archbishop of Rheims in 1170. In the church of Hal, near Brussels, a place of pilgrimage, the candlestick on which the tapers offered by the pilgrims are fixed stands in a sort of ornamental turret on the north side, and terminates in a perforated pinnacle to carry off the smoke."—Pugin.

Herse light. "This term is found in old churchwardens' accounts, and it does not,

HERSE LIGHTS.

as has been generally supposed, refer to lights set up round herse (see *herse*) at funerals, for these are directly mentioned

RENAISSANCE CANDELABRUM. BRUNSWICK CATHEDRAL.

necessary to it. In the earlier times we had only two on an altar, and, as a rule, they also occur in collections as pairs. They are mostly of bronze, and in the Romanesque period are covered with pierced foliage and creeping tracery-work, with dragons and other animals, often with

tapers; but it signifies a candlestick, with many lights made like a harrow (*hercia*), and for the service of Tenebrae in Holy Week. The modern word "hearse" from *hercia*, the part being used for the pole."—Pugin.

Paschal candlestick "is a large candlestick placed on the gospel side of the choir, holding a large candle or pillar of wax, lighted during mass and vespers, from Holy Saturday until the Ascension of our Lord. This custom is of very high antiquity in the Christian Church, and is in a very manner symbolical of our Lord's Resurrection. These *paschal candlesticks* were made of an enormous size, and sometimes of most elaborate design, nearly reaching the vaulting of the church, like that which belonged to Durham Abbey before its dissolution. At Constance the *paschal*

PASCHAL CANDLESTICK.

candle was lit from the clerestory; at Chartres the candle alone weighed 72 pounds; at Rheims it weighed 30 pounds; at Rouen 40 pounds. In the church of St. John Lateran the candle was so lofty that the deacon was seated in a portable pulpit to light it. In the beautiful language of the *Exultet*, sung on the lighting of the candle, the candle is compared to the pillar of light which guided the children of Israel, so that their gigantic proportions are in perfect accordance with the office of the day."—Pugin.

Processional candlesticks "differ from those for the altar in being longer in the stem and lighter, for the convenience of carrying in processions; a pair are always used on each side of the cross. A pair of *processional candlesticks* of the XII. century are still used at the Cathedral at Bruges."—Pugin.

CANDLESTICK. (See *candelabra*.)

(To be continued.)

Furnaces That are Fed With Sixteen Million Gold and Silver "Pieces" a Year in the Birmingham Assay Office.

SPoons or similar articles come to the Birmingham, England, assay office in the rough, so that a small piece can be readily removed from each article for assaying, says the *Illustrated London News*. The sample is weighed in a balance that the thousandth part of a grain will turn. Then it passes through the furnace and is refined. The residue, that is (in the case of silver articles) the pure silver, is then weighed again, that it may be seen whether the alloy in the sample was correct.

Gold has to pass yet another ordeal.

ORDEAL BY FIRE: A PRELIMINARY TO HALL-MARKING.

After they have been taken from the furnace the samples are boiled in nitric acid contained in platinum boilers. Reweighing follows.

About 16,000,000 gold and silver articles pass through the furnaces of the Birmingham Assay Office each year. The Birmingham hall-mark is an anchor; London's is a leopard's head within a shield; Chester's, three wheat-sheaves and a dagger; Dublin's, a figure of Hibernia; Edinburgh's, a castle; Glasgow's, a tree, fish and bell; Sheffield's, a crown.

In the illustration the furnaces for silver are at the further end of the row.

The City drug store, Ulen, Minn., is installing a line of jewelry and silverware.

RICH PLATES OF ENGLISH CHINA.

JUST at present the large importers of china have on hand principally stock pieces, but the lines will be replenished by the first of the year.

At the New York salesrooms of John Davison, 12 Barclay St., some fine specimens of English china now shown include a line of acid gold border designs in Coalport ware. These plates appear in a number of treatments, some with heavy, wide borders, while in others the tendency is toward a lighter band. In fancy, heavily decorated plates one is shown with a gold and white border within which is overlaid filigree work surrounding a gold design in repeated effect alternating with a white and gold pattern. The center of the plate contains a landscape and is surrounded by a heavy gold frame. The line of cups and saucers is comprehensive and includes many attractive patterns. Many other plates in fanciful designs are shown, among which is a series of landscape plates in hand-painted effects.

HUDSON-FULTON SOUVENIRS

THE recent Hudson-Fulton celebration in New York gave rise to a variety of souvenirs in china, silver, etc., many of which were very attractive. Hudson and Fulton plates showing likenesses of the famous men and their ships are still seen in many shops. Quaint Dutch scenes depicting windmills, etc., are shown side by side with Dutch shoes made of china. These and other attractive novelties are now on exhibition, and are still attracting much attention.

Where Our Bigness Counts for You

As one of the largest buyers and manufacturers of Gold and Silver in the world we are of course one of the largest buyers of bullion.

Every ounce of metal that we can recover from waste sent us means one less ounce to be bought in the open market.

For this reason our refining department is operated primarily as a source of supply for our manufacturing departments, and we can afford to pay you a larger average return than if the refining of waste was our only, or indeed our principal business.

In a subsequent issue we shall show you, too, how and why the size of our plant and the perfection of our equipment enable us to refine waste at less cost and with less loss than is possible with the small output and the primitive processes in use in the average plant.

WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page. No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2352.—Stripping Solution Difficulties.—*Kindly give me formula making a good stripping solution; also the information you can concerning the I use two ounces cyanide, four ounces potash and one quart of water, but unable to strip. Bright comes out with steel effect before green or pickle color stripped. I use dynamo which has rheostat that will generate two to six volts.*

D. S. D.

ANSWER:—Gilded articles will often strip even, leaving portions where the strip will affect the gold at all. A stripping solution will attack the even surfaces, but corners and recesses are not reached in many cases, for the reason that the color is retained, while the flat surfaces, which have been most exposed to wear, are thin and have very little of the coloring remaining. By stripping the remainder is removed for the corners and recesses are reached. It is advisable to use the stripping solution, which may consist of a few ounces of cyanide dissolved in a quart of water. As an anode a piece of electric light carbon can be used. It is often necessary to scratch-brush the pieces to be stripped, which will help some. But oftener the recesses and corners will have to be brushed out with steel matting brush and removed in this way when the strip will not do this work. This, of course, will frost or matt the piece, which is an advantage for Roman finish. If the matt finish is not wanted, then it must be polished off by the usual method of polishing such articles. Whether the articles are treated by frosting or polishing the surface should be treated thoroughly; otherwise an uneven finish will result upon re-coloring. The voltage should be regulated according to the size of the article to be stripped. A large piece requires a stronger current than a smaller one. The voltage may be a little stronger for stripping than for depositing, but the coloring is so quickly stripped off that the voltage is of small consequence. The principal point is to prepare the articles so that the current can do the work evenly. Some of the articles require more cyanide in the solution, and at a higher temperature than others. It all depends upon the amount to be stripped off.

QUESTION No. 2353.—Dull Color on Nickel.—*Will you kindly give us, through your columns or otherwise, formula of a quick-acting preparation that will give a dull dark brown or dark green finish on nickel? I want something which can be painted on with a brush and which will give a fairly durable finish. The red sulphide of antimony and aqua ammonia, mentioned by you,*

will not act on nickel for us.

C. S.

ANSWER:—Nickel will not oxidize as readily as copper or silver with the usual chemicals. It is best if the nickel can be plated with a film of copper, or silver; then almost any dark shade can be produced with liver of sulphur by merely dipping it into hot water in which is dissolved a piece of liver of sulphur and a little ammonia added. Another method is to lacquer the nickel with black lacquer, which is quite durable, but will wear off eventually. Another way is to lacquer the nickel with transparent lacquer; when dry, paint over with dead-black japalac, which can be purchased in any paint store, thinned with a little turpentine or a mixture of turpentine and linseed oil. This dries hard and can be finished by rubbing with a cloth. The *English Mechanic* gives a formula for a black dip for nickel which may be tried. The nickel must be perfectly clean, as the dip will not take on greasy or tarnished surfaces. The solution consists of four ounces of hyposulphite of soda and four ounces of sugar of lead, dissolved in one gallon of soft water. The solution must be used boiling hot. The articles should be immersed. The color is at first yellow, then purple and finally a dark blue. When it reaches this condition it should be rinsed and dried. It must then be lacquered with a lacquer of the shade desired. The lacquer will protect it and the color will last for several years.

QUESTION No. 2354.—Graining Brass Watch Parts.—*I have some plain brass watch parts to which I want to give a matt granular surface. How may I do this?*

G. B.

ANSWER:—To matt grain brass watch parts, fasten these parts to cork disks with pins and brush with a paste made of water and the finest pumice powder. It is then well washed and placed in a solution of 10 parts of water, 0.002 parts nitrate of mercury and 0.004 parts of sulphuric acid. After removing from this it is well washed and is then ready for the following solution: Silver powder, 28 parts; tartaric acid, 85 parts; common salt, 100 parts. The above parts are mixed together and moistened with water to form a thin paste. Place the brass parts on the corks in a shallow dish and put on the paste. After a few moments stir and bring fresh paste to the brass. This will soon produce a grain on the brass. Wash off well and finish with a scratch brush.

Jewelry and watches worth in all about \$500 were stolen recently from the store of Head & Sloan, Clinchport, Va.

A Simple Method of Recovering Gold from Cyanide and Yellow Prussiate Plating Solutions.

(From the *Brass World*.)
(Continued from issue of Oct. 13.)

REMOVING THE ZINC.

AFTER the gold solution has remained with the zinc in it for the necessary length of time, the solution is poured off from the zinc as completely as possible. The zinc may now be taken out and placed in a smaller vessel, such as an evaporating dish or glass jar, in order to allow a more convenient treatment.

The zinc is washed thoroughly by pouring clean water over it and then pouring off completely. This is done five or six times. It is unnecessary to filter the solution, as all of the gold adheres to the zinc.

TREATING THE ZINC WITH ACID.

The zinc now completely washed is treated with sulphuric acid made up as follows:

Water	9 parts
Sulphuric acid.....	1 part

The water and the acid are mixed and allowed to cool. It is then added directly to the zinc in small portions at a time, in order to prevent too rapid an action. The zinc gradually dissolves leaving the gold.

When all action of the acid on the zinc ceases a large number of black flakes will be found floating around in the solution. These are the gold. Owing to the fact that they do not settle readily it is necessary to filter them and it is easily accomplished by the use of a glass funnel and filter paper. When all the solution has drained off from the gold, the funnel is filled up with clean water and again allowed to drain off. This is repeated five or six times, in order to get rid of all the sulphate of zinc in the filter paper.

When the gold has thus been washed, it is allowed to remain on the filter paper and the whole dried. The flakes then may be easily brushed off with a small, stiff brush.

FINAL TREATMENT OF THE GOLD.

The gold thus obtained, while sufficiently pure for many purposes, contains more or less lead and frequently a little silver. The lead is obtained from the zinc used. It is impossible to obtain zinc free from it. If the gold plating solution contains silver, this, too, will come down with the gold. The gold, therefore, needs purification before it can be used. The method is as follows:

Place the gold flakes (after they have been detached from the paper) in a small evaporating dish or casserole and pour over them a mixture of two parts of water and one part of nitric acid. The nitric acid must be chemically pure, otherwise it may contain some chlorine, that will form aqua-regia and dissolve the gold. The whole is then heated for some time, until all action ceases and the gold is allowed to settle. The clear liquid is poured off, another portion is poured on, and the heating again allowed to take place. Actual boiling is preferable, as the gold is then more thoroughly purified.

The gold will turn a clear yellow color and resemble pure gold. Before it is usually black. When the second heating has

Gold and Silver Anodes a Specialty

When completed, the clear liquid is poured completely, clear water added and then poured away. The addition of water should be repeated five or six times when the gold will have been washed free from acid and other foreign matter. The gold is now ready. If heated to redness in a small crucible, it becomes quite dense and of a lighter color. If desired, it may be melted in a clay crucible under borax and a small button obtained. This, however, is unnecessary, as it only serves to unite the gold into one mass.

TESTING THE PROCESS.

The feasibility of the process was tested by making the following experiment. A standard solution was made up in the following manner and serves to represent a gold plating bath generally used:

Water	1 gallon
Ammonium cyanide.....	3 oz.
Gold	1 dwt.

To this was added one ounce of fine zinc turnings and the whole frequently stirred and allowed to remain over night. In the morning the solution was poured off, the residue washed, treated with acid in the manner previously described and the gold melted down into a bead and weighed. The gold used for making up the solution was accurately weighed, so that a close check could be obtained. The following are the results:

Gold taken.....	1.000 dwt.
Gold obtained.....	.978 dwt.

.022

Loss = 2.2 per cent.

It will be appreciated, therefore, that the loss of 2.2 per cent. of gold is quite small for such an operation, and probably much of it was lost during the washing and other mechanical operations. It serves to indicate, however, how accurate the process is and how easily it may be applied to the reclaiming of gold from plating solutions. The successive steps in the process may be enumerated as follows:

- (1) Treating the gold solution with zinc turnings.
- (2) Washing the zinc turnings from the exhausted solution.
- (3) Treating the zinc turnings with dilute sulphuric acid.
- (4) Washing the flake gold left.
- (5) Treating the flake gold with dilute nitric acid to remove lead and silver.

(THE END.)

Simplified Electroplating for Jewelers.

Written expressly for THE JEWELERS' CIRCULAR-WEEKLY by R. B.)

(Continued from issue of Oct. 6.)

LACQUERING PLATED OBJECTS.

AFTER the articles are completely finished as explained, except in rose or French gray, it is prudent to proceed and lacquer them.

OBJECT OF LACQUERING.

An object well lacquered and, if possible, heated after lacquering is well prepared to withstand the effect of time. When well lacquered it is impervious to the action of the atmosphere and will stand a great deal of handling. In fact, it is indispensable in the case of silver-plated objects, as silver readily oxidizes and loses its brightness.

Lacquer may be applied by both methods

—by brushing over with a fine camel's hair brush or by dipping the object into the lacquer. The latter method is economically practised in manufacturing establishments, but for jobbing the brush method is applied to advantage.

Great care and close vigilance must be exercised in preparing the work for lacquering.

In the first place, the object intended for lacquering must be absolutely free from moisture, dampness and humidity. An adhesive and tenacious coat of lacquer can be

the doing of the work all over again, an experience that should be carefully avoided, for the removal of the lacquer will, beyond question, injuriously affect the plating and cause unnecessary delay, annoyance and expense.

In short, the article after plating must be dry, spotless and free from dust.

The lacquer, which usually is too thick for use without thinner, which is specially prepared for the purpose of thinning the lacquer, should not be employed alone, as it causes the brush to drag and show stop marks, caused by discontinuity of the stroke.

When thinned properly it will enable the operator to completely and uniformly coat the article, taking care to completely cover all depressions, cavities, etc., so as to prevent the atmosphere from attacking the plating at any part, for once oxidization sets in it is like the work of a secret worm in preparing the early ripeness of fruit and its quick decay.

After the article is well and completely covered with a coat of good lacquer it should be moderately heated, as previously explained, over a slow flame.

An excellent way to heat small articles of jewelry, such as buckles, brooches, cuff

FIG. 15.

put on only when the surface of the object is perfectly dry.

Objects made of cast iron, steel or spelter should be well heated before lacquering in order to expel the moisture absorbed during the plating process.

The above-mentioned metals have a tendency to give up the moisture absorbed, during the course of several days, without any special effort on behalf of the operator; but when it does so voluntarily it is usually accompanied by innumerable little dark spots, frequently referred to as "breathing spots."

To avoid the appearance of such spots after lacquering it is deemed necessary to heat the articles made of such metals prior

FIG. 16.

to lacquering over a slow flame for several minutes, and thereafter permit them to cool off. The article should not be lacquered while it is warm, for the reason that the lacquer is a very sticky substance and will dry too rapidly, hardly affording sufficient time to completely finish lacquering the whole object, and thus causing the brush to stick and prevent an easy flow of the lacquer, which is indispensable to good lacquering.

Secondly, reasonable prudence must be exercised to render the object perfectly free from dust, stains and foreign substances; for once the lacquer is applied it is then too late to invoke any remedy save

FIG. 17.

buttons, medals and clock ornaments, after lacquering, is to suspend them on wires and hang them on a small wrought-iron baking oven of the type frequently employed for pie baking at home. They are inexpensive, convenient and very efficient for jobbing purposes. The oven is placed on a small gas or oil stove affording a small flame which will heat the oven in a comparatively short time. The article should be arranged therein as shown in Fig. 15.

The objects should be allowed to remain in the oven at least for a period of 30 minutes, during which time the articles should have acquired considerable heat. A camel's hair brush which will prove serviceable in rendering a flowing coat of lacquer and avoid foaming and air bubbles and show no stop marks or streaks is shown in Fig. 16.

The brush marked A is to be employed in lacquering large objects having flat or smooth surfaces, and will cover considerable area in a short time.

Brush marked B should be used for small objects and such parts of larger objects as brush will not readily reach in depressed and hollow recesses of object. The method and manner of lacquering is shown in Fig. 17.

(To be continued.)

Simmons Chains

VERY little need be said about the Simmons line of gold-filled chains except that it is bigger, broader and better than ever. Comprising an aggregate of more than 15,000 patterns in

**Vest, Dickens, Waldemar,
Pony, Lapel, Lorgnette,
Plain and Fancy Neck and Bead
and Eye-Glass Chains,**

it affords the widest selection of patterns ever offered by any chain line.

Because of the wide and long continued publicity which has been given them, Simmons Chains are known throughout every section of the country.

And in the matter of quality of stock, making and finish, **Simmons Superiority** is universally recognized by the trade and by the buying public.

And that they make the best selling chain proposition the trade has ever known is evidenced by the fact that they are sold by fully 80 per cent. of the entire list of retail jewelers in the United States—hundreds of whom continue to carry Simmons Chains regularly—year after year.

QUALITY HOLIDAY ADVERTISING FOR RETAIL JEWELERS OUR SPECIALTY

There are many features in connection with our Catalog Proposition which are worthy careful consideration. Let us send you samples and explain how we can increase your business from 50 to 100 Per Cent.

STORE OF G. W. BOWERS, MARION, OHIO.

Enterprising Jewelers Use Our Catalogs

MARION, Ohio,
Feb. 8, 1909.
THE ARNSTINE BROS. COMPANY,
Cleveland, Ohio.

Gentlemen:—In reply to yours of the 6th will say I have used your catalogs for five years and I consider them a fine advertisement and one that adds greatly to any first-class store.

I can truly recommend them to be a winner.

Yours respectfully,
G. W. BOWERS.

The Catalogs sent out by this firm since 1904 were made by The Arnstine Bros. Company.

Our facilities are the best, likewise our products

ST. PAUL, Minn.,

THE ARNSTINE BROS. COMPANY,
Cleveland, Ohio.

Gentlemen:—Our business in December, 1908, was the largest we have ever experienced, and we started in business in 1883. We lay it entirely to advertising, and particularly to our 1908 catalog, which we know helped to increase our business.

We most cheerfully recommend catalog advertising.

Yours truly,

O. H. AROSIN.

The Catalogs sent out by this firm since 1907 were made by The Arnstine Bros. Company.

CURIOUS CHINESE
14K. RINGS

VAN DUSEN & STOKES CO.

1123 Chestnut Street :: :: PHILADELPHIA

IMPROVED BEZEL AND WHEEL CHUCK No. 26

CUT IS FULL SIZE.

Larger capacity for holding work and improved construction. Will hold wheels or plates from 3 mm. to 52 mm. Bezels, rings, watch cases, etc., from 13 to 62 mm. State name and size of lathe when ordering.

Price, Each, \$9.00

ROLLER REMOVER No. 60 (Patented)

A thoroughly efficient and quick acting Roller remover. The work is always plainly in sight. The roller is held in the grooved jaws of the pliers over the staff and the most obstinate roller will instantly yield to the gradual pressure of the screw.

Nickel Plated, Each, \$1.50

SCREW DRIVER No. 112

With Special Clamp and Two Blades

Use the screw driver like an ordinary one until the screw is partly extracted. Then press the sliding clamp down; this is so made that it engages the head of the screw and holds it until it is desired to put it back again, when it automatically disengages itself, and the driver sends the screw clear home. Particularly useful with stud screws.

Our illustration shows the clamp drawn back, which permits the driver to be used like any ordinary spectacle screw driver. The other illustration shows screw held in the clamp ready to be placed in the mounting.

Price, \$1.00

SPECTACLE AND EYEGLASS SETTING-UP PAD No. 1

This pad consists of a circular piece of rubber not too solid to yield when a convex surface is laid upon it, thus preventing any possible breakage. It has a metal rim with two bent arms which hold the clamps of the eyeglass or spectacle, and keeps them in place while the screw is driven home.

Price, each, 50 cents

REFLECTING LOUPES

"THE NEW MODEL BUNKER LOUPE"
A NEW REFLECTING EYE-CLASS OF MERIT

PATENTED APRIL 17th 1906

WORTH MORE THAN TEN TIMES THE PRICE, FOR ESCAPEMENT-WORK ALONE.

PRICE .85¢ SINGLE, 2-2 1/2"-3" FOCUS.

For inspection between the plates of a watch movement, or any recess from which light is excluded, these loupes are an absolute necessity. They have been greatly improved in construction, the mirrors now being optically ground concave, which causes them to reflect powerful rays of light at the necessary point.

Single Lens, Focus 2 in., 2 1/2 in., 3 in. - Each, 85c.
Double Lens, very powerful - - - - - \$1.50

For Sale by all Jobbers in the United States and Canada.

DIAMOND AND STONE SETTING TOOL No. 85 (Pat. Applied for)

The only tool that will do the work correctly and quickly.

These tools, invented by a stone setter of many years' experience, do the work they are intended for with absolute perfection, whether in the hands of an experienced or inexperienced workman. In eight seconds after adjustment in lathe will cut a smooth seat for any stone from 1/2 to 2 carats.

Tools are made of polished and hardened steel and are indestructible. Will fit in chucks Nos. 28 and 44.

The greatest labor saving device ever invented in the line of stone setting cutters. Put up in neat block and box.

Price, per set, \$5.50

THE REASON WHY

We are able to handle orders for Mesh Bags in any size quantities is because after long years of experimenting—on what seemed to others an impossibility—we have at last succeeded in making a machine to produce mesh.

The advantages to you are many, of which a few are: a perfectly smooth strong mesh, finer than can be produced by hand for double our price—prompt deliveries—and a guarantee that your Holiday orders will be taken care of. Your experience will supply many others.

W. & D. Bags are offered by Leading Jobbers.

Great Leaders for the Holiday Season

These well priced and fairly priced pins we have thought out especially for the holiday season. Previous seasons the elaborate coloring and a fine work of Christmas interest — but many of the finer pins are too expensive for general popularity. In producing this year's line we have used all the composite coloring, but have reduced the size and adapted the pieces to the popular styles. This combination was happy — the duplicate orders tell the story — our pins are remarkable sellers. This is one of the fine things you will need for the holidays — therefore order now. Trade on all lines is exceptionally brisk this fall and it may have with December it will be impossible to have your orders filled.

THE LAUREL

TRADE MARK
STERLING 1800

☞ The **LAUREL** pattern is now ready for delivery in the dozen, with the fancy pieces in process.

☞ Made on the popular **MARTHA WASHINGTON** shape.

☞ Decorated with a dainty **LAUREL** wreath, cut with the delicacy of hand engraving.

☞ Finished in light, medium and heavy weights at a very moderate price.

☞ In manufacturing "**THE LAUREL**," every care has been exercised as to design, die work and finish—it is in every sense a Pattern of Class—but on account of slenderness of outline, proper distribution of weight, the most perfect factory and manufacturing facilities, it will be offered at the price of the cheap "ordinary" patterns now on the market.

☞ This is another **Smith Pattern**, designed to remain permanently in demand.

Silver Deposit Ware

Sterling Silver deposited on clear crystal glass (Vases, crystal or green). The illustration is only suggestive of our extensive line. Superiority manifest in artistic character of designs and lasting quality of workmanship.

This ware is going to be very popular during the Holidays, and we suggest that you ORDER EARLY.

WILCOX & EVERTSEN, Meriden, Conn.

NEW YORK: 218 FIFTH AVENUE

“Sectionally Plated Rogers” SILVERWARE

Re-inforced Plating
at the
Points of Wear
at the Price of
the Common Brands

For over half a century the word ROGERS applied to plated ware has been deservedly synonymous with the highest art of the designer, and the most careful and finished workmanship of the artisan, but dominating all else

DURABILITY IN THE SERVICE OF THE CONSUMER.

To add still further prestige to the high standard of the ROGERS trade-mark comes our announcement of the succession of *the sectional process* of plating over the common method of a uniform silver deposit on articles of flatware.

Years of Experience

have shown us the fallacy of the common method of depositing a uniform coating of silver on articles of flatware, for by such a plating process the coating of silver invariably wears from flatware articles at the points marked XII on the above illustrations, because the quantity of silver deposited is not adjusted proportionately to the wear the Spoons and Forks receive.

Our Sectional Process

of plating deposits on these exposed points a triple quantity of silver, thereby more than doubling the service obtained by the uniform plating method. We are thus enabled to guarantee that plated ware of our manufacture will bear

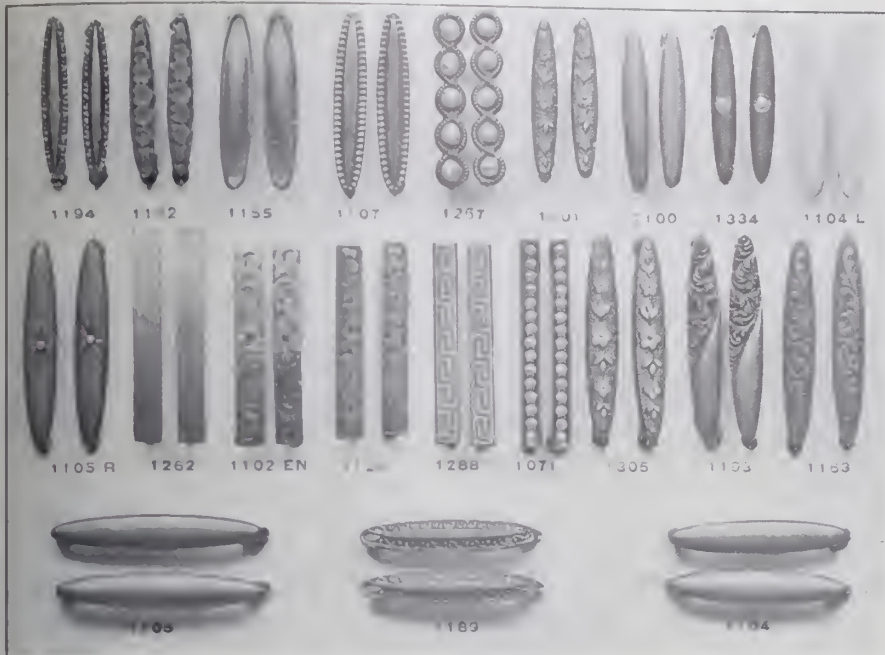

50% MORE SILVER

than standard plate and will outwear any and all other brands of silver-plated flatware.

Prices are the very lowest on the market. You can sell a **Krementz Bodkin-Clutch Stud** or **Vest Button** at the price which a similar set obtained elsewhere would cost you.

Note:

Should any of your customers have a set of vest buttons or studs with any old-style fasteners which have for any reason proved unsatisfactory, we will gladly change them (where practicable to do so) to **Krementz Bodkin-Clutch Holders**, making only a nominal charge for same.

KREMENTZ & CO.

TRADE MARK

Manufacturers of 14-Kt. Gold
and Diamond-Platinum Jewelry

NEW YORK OFFICE
1 Maiden Lane

NEWARK, N. J.

SAN FRANCISCO
722 Shreve Bldg.

Many a patient suffering from an accident or serious illness has had a permanent and speedy recovery owing to the increased efficiency of the services rendered by the physician using a Sphygmometer, or pulse-timing instrument. You ought to show one to your doctor; he will thank you, and one sold to him will mean sales to others. Made in plain pulse-timer and pulse-timer and watch combined. Sells for \$10.00 and upward with a good margin of profit for the dealer. Write us for booklet and sample.

19 Ave. Plantyn, ANTWERP

**Ziruth-Unbreakable
GOLD AND PLATINUM CHAINS**

Are cheaper than those that claim to compare in quality and much better than those of equal price.

Are stronger, more flexible, better finished, finer shaped links, more beautifully colored, more carefully soldered and inspected than any other chain on the market and are so conceded by the trade.

They are plump 10K. and 14K. as stamped and fully guaranteed.

Of what value is the stamping law unless you assay your goods? We invite you to assay our chains.

Chains, cheap in construction are dear at any price and therefore you cannot afford to use machine made chains in place of hand made chains.

ZIRUTH-UNBREAKABLE HAND MADE CHAINS

are the cheapest because they are the best constructed on the market.

Our prompt deliveries of orders are the wonder of the trade.

Write us at once and our representative will call or we will submit samples and prices.

We cater to the manufacturing and jobbing trade.

DO NOT CONFUSE US WITH ANY FIRM BEARING SIMILAR NAME.

HENRY ZIRUTH, Sole Manufacturer

GOODS THAT SELL

MILTON L. ERNST

Twelve Dutch Street :: NEW YORK
TO THE JOBBING TRADE ONLY

DO YOU REALIZE what it means to manufacture gold chains of excellent quality and faultless construction and sell them at prices much below what the retailer ordinarily pays for chains of similar quality? It means that we have a well organized factory and prefer selling these chains ourselves directly to the trade, thereby giving you the benefit of what it would cost to maintain a necessarily expensive organization of traveling men.

THAT NEW CHAIN we are exploiting is solderless and flexible, without stringing, 15-inch lengths only. IT SELLS AT SIGHT.

Write for a sample.

TRADE-MARK

JEWELRY OF DISTINCTION

ENAMEL BAR PINS are among the best sellers this Fall.

THE "EDGEWOOD" pin has been pronounced the best pin of its kind on the American Market.

RETAILERS should use this pin for the following reasons:

- The GOLD is fourteen karat.
- The WORKMANSHIP is perfect.
- The DESIGN is patented.
- The PEARLS are selected Oriental Baroques.
- The PRICE is moderate.
- The PIN will not be imitated in inferior goods.
- The ENAMEL can be furnished in eight colors.

We sell direct to the retail trade.

THE HARVEY J. FLINT CO.

SOLD TO JOBBERS ONLY

PLATINIDE Pendants

The Metal and The Pendants

Platinide is a new word, coined for the purpose of describing a new metal made by a secret process we discovered, perfected and own.

As its name implies, Platinide is like platinum. In fact, it is exactly like it in color and finish, and, for the manufacture of stone set jewelry made to give the exact effect of diamond set, platinum mounted pieces, it is without equal.

It can safely be asserted that Platinide is so far in advance of goods made to imitate platinum, that it is in a class by itself.

Silver used in the manufacture of imitation platinum jewelry tarnishes, which means, to keep it in presentable shape, much cleaning and refinishing on the part of the jewelers handling it.

On the other hand, Platinide is non-tarnishable, it requires no more care or attention than a piece of platinum jewelry—and therein lies one of its chief points of superiority.

The Platinide jewelry now being placed on the market for Fall and Christmas trade consists of a line of pendants.

These pendants are of unique and artistic design—they are like the finest pieces of diamond set, platinum mounted jewelry, and embody, to an unusual degree, the character, dignity and finish of the very much more expensive platinum goods.

They are set with the best quality of imported white stones and beautifully polished imitation sapphires, rubies, emeralds, etc., and produce an effect as brilliant in appearance as can anything this side of real diamonds and genuine platinum.

These goods will appeal to people of discerning taste and moderate means—to the great class that buys first-rate gold filled chains instead of solid gold ones—and, for that reason, the line deserves the attention of the trade.

Write for prices, descriptions and illustrations of the best in platinum-like pendants.

No. 13.

The Golden Horse of Altoetting.

By CHAS. A. BRASSLER.

ESPECIAL interest attaches to the conspicuous example of the goldsmith's art which is the subject of the accompanying illustration. It is a house altar, called "The Golden Horse of Altoetting," a Parisian goldsmith's work, dating back to about 1400. Originally a New Year's gift of Queen Isabella to her husband, Charles VI of France, in 1404, it now forms part of the treasure of the parish church at Altoetting, in Bavaria. It is a work of art of special importance, being considered the most exquisite and costly piece of French goldsmith work of the late Gothic period, and, in fact, of the whole 15th century. Thus writes Hager, District Councillor of Altoetting, whose description we follow, in the art memoirs of the Kingdom of Bavaria.

Over an open columnnade, enthroned on a platform reached by steps, in a bower, sits the Holy Virgin with the Child. Around her are the Saints John, the Baptist and Evangelist and St. Catherine, adored by King Charles VI. of France. Below in the portico stands the king's horse, held by a page. The pedestal is of gilded silver; the upper part, however, and, with few exceptions, all the figures, are of solid gold, in great part coated with opaque and transparent colored enamels.

On the platform, above the portico, there is a dais on which sits St. Mary enthroned, bending easily forward and holding the infant Christ on her lap, with the right hand; the left, holding a scepter, rests on a prayer book placed on a desk in front of her. The Child holds in its extended right

hand a ring, and turns towards St. Catherine of Sienna, who, represented as a child, sits on the left, at St. Mary's feet. By the side of St. Catherine, also represented as children, are the two Saints John. The arbor in which Mary is seated consists of trellis work composed of gold rods, entwined with gold tendrils and gold leaves, with white flowers, embellished with five balas rubies and five sapphires in box settings, and between these are set 34 pearls. Above the Madonna are poised two angels with the crown.

On the platform in front of the dais, in

an attitude of adoration, kneels King Charles VI. on a golden cushion. Opposite the king kneels a knight, holding in both hands a silver tilting helmet, on which are the golden royal crown and the lilies. Between the king and the knight is a high lectern, with a prayer book; on the left of the king stands a Dalmatian hound.

The length of the base is 45 centimeters, its breadth 27 centimeters, the height of the figure of Mary 15 centimeters; total height, 62 centimeters.

The presentation to Charles VI., on New Year's Day, 1404, is

commemorated by a memorandum in the treasure list of that unfortunate king. On July 29, 1405, Charles VI. pledged the "golden horse" and another similar piece for moneys for which he was indebted to the queen's brother, the Bavarian duke, Ludwig the Bearded. About 1413, when the bearded Ludwig, on the death of his father, returned from France to take up the reins of government at Ingolstadt, the "golden horse" was brought to Bavaria. On Dec. 17, 1438, Ludwig gave the companion piece to the "golden horse" to the parish church of Our Beloved Lady of Ingolstadt. There this work of art, which was even of greater intrinsic value than the "golden horse," remained until 1801, when it was reclaimed by the Bavarian government and melted down. A wooden model of it, painted, was received from Ingolstadt by the Bavarian National Museum in the 18th century. The "golden horse" was intended, in 1411, by King Ludwig, for the same church in Ingolstadt, but the gift was not consummated. The work remained in the possession of the Bavarian duchy and was

transferred, in 1447, by Henry of Landshut to Ludwig the Wealthy. Not until 1509 did it reach the treasure chamber of the emperor Maximilian.

The reason why this remarkable piece is known in Germany under the name of *Das kleine Rössel* and in French as *Le petit cheval d'or* is by no means plain, since the golden horse certainly does not form the most important feature of it. It seems as though more importance was attached to the horse than to the Virgin and the king. Despite the great public distress at the commencement of the 15th century, costly Year's gifts were very much in vogue among royalty. The existence of this piece, which was then known under the more appropriate name of "The golden image of the Virgin and the King," is sufficient proof of this asser-

Labarte gives a different explanation, and shows, of how this wonderful example of French goldsmithing came to Germany. Louis, the brother of Isabella of Bavaria, the queen of Charles VI. (who, in the way, became the mother of two English queens and is introduced in Shakespeare's Henry V.), was mixed up in many of her intrigues. Despite some irregularities that he was charged with, he remained in great favor with his sister. The public opinion accused him of being an accomplice in the disturbances and the prodigalities of Isabella and in numerous misappropriations committed by her to the prejudice of the royal treasure of France. In 1413 the Duke of Burgundy fell into the hands of the "Cabochiens" and was imprisoned in the large tower of the Louvre. But his captivity was not of longer duration than their ephemeral triumph, and scarcely delivered from their hands he found himself summoned by his sister to a new position of confidence, the command of the Bastille Saint Anne, where she had taken pains to place for safety the most precious jewels of the crown. The Duke of Bavaria, frightened, as is said, by the menacing attitude of the people of Paris, left France soon after. "But," concludes Labarte, "it is permissible to believe that before returning to Germany he knew very well to reimburse himself, through his own hands, for certain claims which he pretended to have against his other-in-law, King Charles VI."

This is the French explanation of the presence to-day of this French work of art in the treasure of the parish church at Aachen.

Magnificent Repousse Plate.

A HANDSOME product of German silversmithing is shown on the front cover of this issue in the shape of a repoussé plate preserved with other objects of art in the Museum at Kassei. The scene in the center, representing the crucifixion, is a fine example of repoussé work and chasing, while the rim is embellished in a highly unique manner with large precious stones set in pretty filigree leaves and foliage attached to the surface in relief. The shape of the plate is also rather unusual.

Mrs. L. L. Stone, Pittsfield, N. H., has sold out to Louis L. Huntington.

The Much-talked-of International Aviation Trophy Known as the Gordon Bennett Cup.

IN a recent article on "Aviation Cups" we presented illustrations of the Michelin Cup and of various designs submitted in competition for the same. To-day we show a picture of the "International Aviation Cup," known as the "Gordon Bennett trophy," which Glenn H. Curtiss, the daring aeroplanist, won for the United States at the recent aerial tournament on the Betheny Aviation Field at Rheims. It was Curtiss' success in the 20 kilometre speed contest (about a minute and a quarter to the mile for nearly 12½ miles) that captured the International Aviation Cup, which was the most important trophy offered, be-

near Mineola, L. I., where Curtiss recently won the Scientific American trophy by flying for 52½ minutes.

As mentioned in the former article on aviation cups this interesting trophy is surmounted by a faithful reproduction of a complete aeroplane supported by a winged figure of "Progress," on a mountain peak. The artistic simplicity of the piece stamps it as a conspicuous product of the silversmith's art.

Japanese Pearls

Annual Report on the Production of Precious Stones.

Text of the United States Geological Survey's Advance Pamphlet on Gems and Gem Minerals for 1908, Compiled by Douglas B. Sterrett.

(Continued from issue of Oct. 20.)

RHODONITE. CALIFORNIA.

J. A. Edman, of Meadow Valley, Cal., reports a large amount of rhodonite obtained from and around the Peters mine, near Taylorsville, Indian Valley, Plumas County, Cal. F. Stanfield, of the latter Consolidated Jewel Co., reports this rhodonite to be of fine pink or flesh color marked with black lines. It is becoming popular for the same uses as other opaque and matrix stones.

RUBY. BURMA.

The production of ruby, sapphire and spinel in the Burma ruby mines district during 1907¹ amounted to 334,535 carats, valued at £95,114, compared with 326,855 carats, valued at £5,540, in 1906. Of the total value of the output, ruby amounted to £93,428, and sapphire and spinel to £1,686. The production for 1908 was 1,194 carats, valued at £47,921.²

The occurrence of rubies in the Kachin Hills upper Burma is described by A. W. G. Bleeker.³ The rubies are found in the soil and alluvial deposit as well as in river gravels on the eastern slopes of the mountain range between Naniazeik and Manwe. The rock of this mountain range is chiefly granite and crystalline limestone. The crystalline limestone contains various contact metamorphic minerals as garnet, spinel, chondrodite, graphite, forsterite, besides valuable rubies and spinels. Dr. Bleeker calls attention to the locality of origin of the ruby advanced by Messrs. Brown and Judd that the rubies of the Burma ruby mines district were of purely chemical inorganic origin, and then presents evidence of the dimorphic chemo-organic origin of the lime-ones of Naniazeik and Manwe. It is probable that the ruby-bearing limestones of both districts are formed by similar agencies.

SAPPHIRE. MONTANA.

Of the four companies producing sapphire in Montana during 1907 only one was in operation during 1908. This was the New Mine Sapphire Syndicate, working on the original deposit of blue sapphire in Fergus County. The discovery of a new deposit of sapphire about three miles from the old mine in Fergus County, between Middle and South forks of Judith River, has been reported, though not authenticated.

INDIANA.

Attention was called by Dr. O. C. Farrington, of the Field Columbian Museum of Chicago, to the prospecting for sapphire in placer gravels by R. L. Royse, of Martinsville, Ind. Mr. Royse reports this mineral found in the auriferous glacial drifts of Morgan County. Nearly all the sapphire found has a bronze color with a marked green or chatoyancy due to minute regularly arranged inclusions. One gem cut "en cabochon" from such material gave a very fine cat's-eye effect, with brownish to reddish flash. Mr. Royse calls it oriental girasol, a name which may be used with a certain degree of accuracy.

INDIA.

Kashmir.—The production of sapphires during 1907 from the Kashmir mines⁴ amounted to 305,682 carats, valued at £3,144, as compared with 2,837 carats, valued at £1,327, in 1906. The large increase in quantity and small increase in value was due to the recovery of large quantities of lower grade stones along with the few gems of high value.

Burma.—A small quantity of sapphire is obtained from the ruby mines each year, and during 1907⁴ it amounted, along with spinel, to £1,686 in value.

¹Rec. Geol. Survey India, vol. 37, pt. 1, 1908.

²Advance statement of the production of minerals in India in 1908, by the Director of the Geological Survey of India, June 10, 1909.

³Rec. Geol. Survey India, vol. 36, pt. 3, 1908, pp. 164-170.

⁴Rec. Geol. Survey India, vol. 37, pt. 1, 1908.

SATELITE, SERPENTINE, CAT'S-EYE. CALIFORNIA.

The variety of serpentine mentioned in this report for 1907 as cat's-eye has been named "satellite" by the Southwest Turquoise Co., of Los Angeles, Cal. This company obtains the mineral from Tulare County where it is found in serpentine associated with asbestos. It resembles chrysotile asbestos in some particulars but is harder and has a rather coarse splintery cleavage in place of the fine fibrous cleavage of asbestos. The color is opaque greenish gray along the fibers and dark green across them. The cat's-eye effect is perfect when the gem is cut cabochon. Satellite is being introduced in the gem markets and has been favorably received in the western cities.

SMITHSONITE, "BONAMITE." NEW MEXICO.

The apple-green smithsonite, which so much resembles chrysoprase in color, from Kelly, N. Mex., has been called "bonamite" by Goodfriend Bros., of New York. This firm has cut and sold a quantity of this material. This smithsonite has been found in large quantities in the mine of the Tri-Bullion Smelting & Development Co., and as a thick crystalline coating or incrustation over the walls of cavities. It assumes mammillary and globular forms with drusy surfaces. The gem is as beautiful as chrysoprase, though greatly inferior in hardness.

SPHENE. NEW YORK.

Dr. E. S. Ward, of Rochester, N. Y., reports a quantity of sphene sold for gem purposes during 1908. This came principally from Switzerland, though a small quantity of old stock from the Tilly Foster mine, New York, was also used. This sphene yields very brilliant gems with a strong play of colors or fire.

THULITE. NORTH CAROLINA.

Thulite or rose-colored zoisite, occurs in the mica mines in North Carolina associated with feldspar, in which it forms patches and groups of crystals, sometimes radiated. Thulite is found at the Flat Rock mine and furnishes attractive gems when cut cabochon with the inclosing feldspar.

NORWAY.

Dr. E. S. Ward, of Rochester, N. Y., reports several hundred pounds of thulite imported from Norway for gem purposes.

TOPAZ. UTAH.

The following notes on the occurrence of topaz in the Thomas Range, Utah, have been abstracted from an article by Horace B. Patton.¹ This occurrence of topaz was first discovered by Henry Engelmann, geologist of an expedition across the Great Basin of Utah in 1859. Little was heard of the locality or of the topaz crystals after this, however, until a trip was made to the region and numerous specimens were collected in 1884 by Prof. J. E. Clayton, of Salt Lake City. Since that time numerous collectors have visited the locality and brief descriptions of the occurrence and crystals have been written.

The topaz is found in the Thomas Range of mountains about 40 miles north of Sevier Lake and a little over 40 miles northwest of Deseret. Locally the mountains are called the Dugway Range, and the topaz locality Topaz Mountain. Topaz Mountain is eight miles northwest of Joy, Juab County. The Thomas Range at this point consists of a much dissected table-land whose southeast face rises precipitously some 1,000 to 1,200 feet above its base for a distance of four or five miles. The part called Topaz Mountain is that portion along the southeast side where topaz crystals have been found most abundantly.

The rocks of this portion of the Thomas Range are of volcanic origin and rest on sedimentary

¹Topaz-bearing rhyolite of the Thomas Range, Utah: Bull. Geol. Soc. America, vol. 19, 1908, pp. 177-192.

formation of undetermined age. The only sedimentary rock exposed near the topaz locality is a bluish-gray limestone. Above this, in order, are rhyolite tuffs and lava flows, andesitic at the base, with several hundred feet of the more acidic rhyolite above. The later rhyolite flows compose the bulk of the volcanic rocks, and the latest of these contain the most topaz. The rhyolite varies under the microscope from white to light brown or brownish gray. It shows no trace of glass and is apparently not porphyritic. In places it is massive; in other places flow structure is marked. Microscopically the rock appears to be somewhat kaolinized, though under the microscope the feldspars are seen to be very little altered. The microscopic characters indicate a devitrified glassy lava. Lithophyses¹ occur in varying quantity through the rock, and are more abundant in certain portions where flow structure is but little developed or absent. They are also more plentiful in light-colored rhyolite with an evident crystalline texture than in the darker more dense portions. In quarrying, fine specimens of lithophyses with numerous crystalline concentric shells are obtained. The crystals on these shells are quartz and sanadine. On weathering under desert conditions the rick disintegrates to sand, which is swept away by the winds, so that soil accretulates only in more favorable places while the rock is left bare. The delicate shells of the lithophyses are first attacked and hollowed out by erosion. The small cavities thus formed are enlarged and by uniting with others form miniature caverns, some if them several feet across. Thus the rock presents a rough porous surface suggestive of a huge dry sponge.

Three types of topaz crystals are recognized from this locality—fine transparent, rough opaque and smooth opaque varieties. The opaque crystals make interesting cabinet specimens. The transparent crystals occur principally in lithophyses cavities, and less often in irregular cavities with no trace of lithophyses structure. The topaz crystals are more abundant in the lithophyses where the latter are characteristically developed. The clear crystals grow upon the walls of the cavities, being attached at one or both ends or along part of or on a whole side. Clusters of topaz crystals occur in some of the cavities. The crystals are also scattered over the surface, where they have been left by the disintegration and erosion of their matrix. The crystals vary from a beautiful wine color with brown tint to absolutely colorless. The natural color of the crystals in the rock unexposed is the wine color, and this fades on exposure to the light. After exposure for 50 to 70 hours to sunlight, even the deeper-colored crystals become practically colorless. The wine color of the crystals fresh from the rock is quickly destroyed by heating. All the crystals found exposed to the atmosphere are perfectly colorless, though it sometimes happens that a cluster of crystals is partly embedded in the surface, in which case the buried portions have retained their color, while those exposed to the light are perfectly colorless. The brilliancy of these transparent topaz crystals is exceptionally high and does not seem to be affected by exposure to weathering. The majority of the crystals are very small and but a small percentage are over one-fourth or one-eighth of an inch long.

The rough opaque topaz crystals occur scattered through the solid rhyolite, and occasionally project into cavities where the free portion is transparent. These crystals are larger than the transparent ones and range from half an inch up to 2½ inches in length. They generally have rough prism faces and ragged ends. The interior is crowded full with minute quartz grains and crystals which average about 0.05 millimeter in diameter. One crystal examined showed that the quartz grains compose about one-sixth of the bulk of the crystal.

The smooth opaque topaz crystals are similar to the rough opaque, except that the faces are smooth and better developed. They were found at two places only, and were embedded in fragments of rhyolite tuff that had been caught up in the rhyolite flow. An analysis of one of these smooth

¹Lithophyses (stone bubbles) are cellular cavities in acidic, glassy, or finely crystalline lavas. They consist of concentric shells of crystalline material grouped about a cavity or core. The layers are composed of crystals of such minerals as quartz, tridymite, feldspar, topaz, garnet, etc. In cross section the shells may present an appearance somewhat like the petals of a partly opened rose. In diameter, lithophyses range from a fraction of an inch to an inch or two.

opaque crystals, based on the excess of silica, indicated that 18.78 per cent. of the material was quartz.

Both the transparent and the opaque topaz crystals were probably formed by the same processes that is, by vapors or solutions contemporaneous nearly so with the final consolidation of the rock. The crystals in the cavities grew practically unhindered, while those in the rock formed where the feldspar had been removed. In the latter case the topaz included the resulting silica as quartz inclusions and crystals.

Specular hematite occurs in minute flakes one to two millimeters in diameter in the cavities and attached to rough topaz crystals. A few specular hematite crystals occur in the cavities with the topaz at this locality, and three or four miles to the west numerous garnet specimens were found in fair-sized crystals. Bixbyite was found adhering to rough topaz crystals.

Though topaz crystals are present over a large area, they are abundant over a limited area only, probably half a mile across. The weathering of the topaz-bearing rhyolite has left topaz crystals scattered abundantly over the surface. These crystals are mostly very small and brilliant though some large transparent crystals have been found. The tiny crystals shine brilliantly in the sunlight, making it difficult to locate larger crystals by their reflections.

The transparent topaz crystals, when of sufficient size for cutting, make very brilliant gems, though perfectly colorless. They are sold under the name of "white topaz," and are an attractive souvenir for tourists. The crystals are also highly prized for collection purposes on account of their transparency and the quality of the crystal faces. A. N. Alling¹ has described the following forms: Pinacoids, b (010), c (001); prisms, (110), l (120); macrodome, d (201); brachydomes, f (021), y (041); pyramids, i (223), u (111), o (221), e (441).

TEXAS.

P. H. and R. L. Parker, of Streeter, Mason County, report a production of about 25 pounds of topaz crystals, some of which are of gem quality. This topaz occurs in pockets, partly filled with clay, in a pegmatite "vein" cutting a gneiss formation. Topaz is found at other localities in this region, and a new discovery was made by the Parker brothers 12 miles north of Streeter. At the new locality topaz in good crystals is reported to occur with blue feldspar.

SOUTH AMERICA.

Brazil.—A. S. Atkinson² reports that old topaz mines of Boa Vista and Seramenhain in the basin of Arassuahy River have been reopened successfully by deep mining methods after the open-cut work had been abandoned. Work is successful at the José Correa and Coxabee mines also. The gems occur in a gravel bed at a depth of about 20 feet. The topazes are valued for the beautiful light to dark-yellow and deep-rose shades displayed by them, combined with perfect transparency. A specimen in the museum at Rio Janeiro obtained from Jequitinhonha River at Auro Preto weighs nearly 2,000 grams. It has a beautiful color, and is perfectly transparent and absolutely flawless.

(To be continued.)

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ending Oct. 23, 1909.

The U. S. Assay Office reports:

Gold bars exchanged for gold coin.....	\$640,320.45
Gold bars paid depositors.....	86,627.00
Total	\$726,947.45
Of this the gold bars exchanged for gold coin are reported as follows:	
Oct. 18.....	\$95,996.32
" 19.....	134,451.67
" 20.....	130,012.13

Bogus Army Officer Who Passed Many Bad Checks Sentenced at Pittsburgh, Pa.

PITTSBURG, Pa., Oct. 21.—Donald C. Thompson, alias "Lieut. Earl McFarland" and many other names, pleaded guilty, yesterday, in the United States Court to the charge of impersonating a United States army officer and was sentenced to pay \$100, the costs of prosecution and to serve two years in the Federal prison at Leavenworth, Kans. Thompson is the man who while wearing the uniform of an officer in the United States army induced a Fifth Ave. jeweler and several other Pittsburgh merchants to sell him goods and take his bogus check in payment. He had intended putting up a fight, but saw that the odds were against him and decided to enter a formal plea of guilty in the hope that he would get off with as light a sentence as possible.

Thompson, as noted in THE JEWELERS' CIRCULAR-WEEKLY, two weeks ago, was arrested at Norfolk, Va., and brought to Pittsburgh to stand trial, at the instigation of the War Department. He is wanted in 18 different cities where he had practiced his swindling game. Thompson admitted to the court that he had used the name of Lieut. McFarland, whom he knew well. Local merchants who called on the recruiting officers at the local recruiting station were told that the real McFarland is in the Philippines. Thompson said that his home is in Topeka, Kans., and that he had known McFarland since he was a little boy.

The bogus lieutenant has been taken to Kansas to begin serving his sentence, and it is likely that he will be taken to other cities to be tried just as soon as he serves out the sentence imposed upon him at Pittsburgh.

Creditors File Bankruptcy Petition Against Jay M. Barrett, Bradford.

PITTSBURG, Pa., Oct. 21.—An involuntary petition in bankruptcy was filed, this week, in the United States District Court against Jay M. Barrett, a jeweler at Bradford, Pa. The creditors who filed the petition were J. C. Crawford, A. H. Gerwig and the Marsh, Brown, Mather Co., whom Barrett owes \$499.35, \$607.69 and \$15, respectively. The petitioners set forth that the Pioneer Cut Glass Co. was allowed to become a preferred creditor by Barrett, also Morris Rosenbloom & Co., they having secured judgments against Barrett and caused executions to be issued in the Common Pleas Court at Bedford, Pa.

The sale of Barrett's stock was advertised to take place to-day, but a petition was filed asking that a restraining order be issued to prevent Barrett's property from being disposed of by the sheriff, and the court granted it. The petition further sets forth that the Pioneer Cut Glass Co. obtained judgment for the sum of \$5,271.67, and the glass company, too, is restrained from making any attempt to collect the money pending bankruptcy proceedings.

The court has directed that Barrett be brought here, Nov. 2, to show cause why he should not be declared a bankrupt. Just

what his assets and liabilities are is not known here, but they are thought to be considerable. Barrett is well known here and conducted a very good store at Bradford, where he is said to have been in business for some time.

Unique Golden Bell Device Used by President Taft in Opening the Gunnison Tunnel.

IN planning a device to be used by President Taft in opening the gates of the Gunnison tunnel, it was decided to get away from the old-fashioned push button, which has been used on so many occasions of public interest. The device finally decided upon was a silver plate, in two sections, mounted in a beautiful box of solid mahogany; one section represents the Gunnison river and tributary territory, and the other the territory embraced in the Uncomphagre valley. These two are separated by a very small space representing the Gunnison tunnel. The two plates are electrically insulated, one from the other.

The other important part of the device is a solid gold bell, which, when placed upon the silver chart, bridges the gap be-

GOLDEN BELL WITH WHICH PRESIDENT TAFT OPENED THE GUNNISON TUNNEL.

tween the Gunnison river and the Uncomphagre valley, thus closing the circuit and operating the electrical equipment at the headgates of the tunnel and releasing the water.

The box and electrical equipment was manufactured by the Western Electric Co., and the silver map and gold bell were produced in the workshop of the A. F. Wehrle Co., Denver, Colo. It was presented to President Taft as a souvenir of the occasion.

The bell is made of 18 karat Colorado gold purchased at the Denver mint. It is a marvel of workmanship, and while it is customary in such cases to mold the article, in this case the manufacturer, in order to avoid any possibility of flaws, had the bell hand-forged.

The interest taken by the public in a device of this kind was demonstrated by the crowds that gathered around the Wehrle Co.'s window, where the box was on exhibition on the afternoon just before it was shipped for the ceremony of opening the great irrigation tunnel.

Diamond Brooches and Pendants

We have a very fine assortment of these—all fashionable pieces, in the latest mode. The designs are unique and exclusive and of rare artistic merit. Mountings, platinum, and platinum and gold.

Being **Importers and Manufacturers**, we can offer unusually rich and handsome pieces at right prices. We are always prepared to send assortments that make sales for the dealer. Try us.

Reigning Jewelry Fashions Noted in Paris.

Dainty Novelties in Gold, Silver, Gems and Leather Goods Now in Demand Among the People of Taste in France's Capital.

PARIS, Oct. 15.—The automobile craze has given place to the aviation furor and the jewelers are on their mettle in order to invent new and fetching designs in medals, brooches, etc. Exhibited in a jeweler's window is the Gordon Bennett Cup (illustrated on page 59) lately awarded to Glen Curtis. It is a magnificent piece of workmanship, and the design leaves nothing to be desired. The base is of veined marble, which supports a rough mass of rock in dull silver. Upon the summit is poised airily a winged figure probably typical of victory. At the base of the rock is a branch of oak-leaves and acorns in silver gilt, and the steering gear of an airship. Supported on the tips of the outspread wings is the model of an aeroplane, with body of silver associated with some light wood. That the trophy should be the gift of a generous American and won by an American is significant of the prowess of the daring aviator, Mr. Curtis, and the liberality of Gordon Bennett. It appears that the automobilists and the cyclists each have their patron saint, whose image is fastened somewhere on the machine, and in some instances even a sculptured image in a shrine is placed inside as protection against accidents. Whether or not these images are efficacious is doubtful, but at least when emanating from some craftsman of talent they are decorative from an artistic point of view. It appears that the automobilists pin their faith on St. Christopher, this fashion having been inaugurated by the pious dowager queen of Italy, Margherita, who never stirs abroad without a tiny statuette of the patron of travelers, which is placed conspicuously in her motor car. A number of chauffeurs wear the St. Christopher medal, which represents the saint holding in his arms a child and leaning on a stick. On the reverse side is a railroad train descending a hill, at the foot of which is depicted an automobile distancing the locomotive.

The cyclists have adopted St. Catherine, who was broken on a wheel. On one side is the saint leaning on a wheel, and on the other a winged wheel with, in the background, a cyclist going at full speed.

The disciples of aviation have selected St. Elias as their patron, and several designs have been submitted to the Pope for approval.

It is singular in these days of enlightenment that people in every walk of life believe in the efficacy of fetishes, and any quantity are exposed in the jewelers' windows. A new one is a preservative against shedding tears, which is eagerly purchased by sentimental maidens. Novel are lucky fairy brooches of Celtic inspiration, and which are said to keep away evil spirits. The design dates back several hundred years and consists of a heart surmounted by a coronet studded with precious stones. In England and Ireland the talisman is offered by the godmother as a christening gift or given as a troth-token by a man to his sweetheart.

Tiaras are more and more used as ball or para ornaments. A pretty novelty shows a soft liberty ribbon wound in and out of the hair at the base of the tiara, softening the hard effect of the metal. A splendid pompadour ornament reveals flowers composed of emeralds with clusters of diamond leaves. Peacock's plumes, with eyes of emeralds and sapphires, are most effective set on one side of the front hair.

Emeralds, it may be remarked, are greatly in favor. Rings with flat table-cut stones of squarish form and sunken in a rim of dead gold are liked. Others show a circle of tiny sapphires or diamonds, which enhance the brilliancy of the stone.

Peacock colorings are evidenced by a bracelet not more than half an inch in width, with no visible setting, small emeralds and sapphires thickly sown concealing the gold, and over which is a Greek key pattern in tiny diamond sparks. A showy corsage brooch is in an elaborate design in several sizes of diamonds, with, in the center, an emerald as big as the thumb-nail cut *en cabochon* and denuding from a supple string of diamonds with smaller pendants on each side. Emeralds *en cabochon*, often two inches in length, are frequently associated with diamonds.

Pretty is a brooch in the form of a pearl oyster-shell, the surface thickly diamond-sown, while in the hollow is held an enormous brown pearl of inestimable value. Light and airy is a spray of oats and leaves composed of small diamonds and thrust through a slender crescent moon. This is intended for the hair or corsage.

A showy ring consists of a huge pink pearl in a diamond circle, the top of which may be unscrewed and used as a lace collar fastening. Not new, but pretty, are three Prince of Wales feathers in diamonds with pearl stems for the hair. A couple of open drooping locust wings is the graceful *motif* for a rich corsage jewel.

The reproduction of lace calls for much skill on the part of the craftsman, airy designs being perpetuated in precious stones, notably diamonds. Novel, but of rather doubtful taste, is a long and narrow collar-ette reaching well below the bust, the lace design being picked out in large, medium and small brilliants. Delicate and pretty are simulated scraps of lace in tiny diamonds turned over a wide band of black velvet, which shows between the interstices of the design. There is a fancy for disk-like pendants dangling from a slender platinum chain, or a string of small brilliants. These circular ornaments show flashing concentric rings, while others are of the finest gold or platinum wire barred in open fashion, on which is a design in small stones. A spider-web in blackened platinum holds imprisoned a ruby fly with diamond eyes, while the spider, its body of black opal and its legs of gold, is entangled in the gem-set web.

Aquamarine and brown and wine-colored topaz are liked as daylight stones;

some are set in blackened, rough-beaten silver with a barbaric pendant composed of a stone as big as a pigeon's egg. The designs are mostly Moorish or Byzantine, the form and workmanship being crude. Immense turquoise matrix in the shape of scarabs set in dull metal are also liked as brooches and pendants, often associated with mummy beads of dull blue or green. Illustrative of the topaz craze is a corsage brooch, consisting of a cluster of grapes in pale, honey-colored topaz hanging in a cluster of leaves of shaded green enamel veined in diamonds. An enormous bee, the body of orange topaz with silver wings, forms an appropriate pendant to be worn with a tailored suit of dark blue, brown or black. A key of tiny diamonds fastens a turn-down linen collar.

A stiff *porte monnaie* of gold is entirely incrustated with diamonds and punctuated here and there with blazing rubies. Kid bags of delicate colors are often clasped with gold and jewels, the jeweler collaborating with the worker in fine leather. These clasps are oval or square, of silver or silver gilt, and set with semi-precious or simili gems artistically arranged. There are often flaps with ornaments of metal and stones, and sometimes the corners of kid or suede bags are similarly ornamented.

Other fastenings are of enamel or of gold or silver *ciselé*. On a gold mesh purse the clasp was of gray silver, with a raised pattern in golden lily pads and leaves. Very rich are bags of mat black suede, embroidered in a design in tiny cut jet beads and paillettes. Many bags entirely of jet hand-embroidered or bead-incrustated, the bottom finished with a deep fringe.

Jet necklaces, consisting of strands of small beads looped, hanging nearly to the waist and held by great rosettes of cut jet, are becoming. Dog collars of jet, some diversified by diamond barrettes or of pearls or amethysts, are appropriate ornaments for half mourning. Jet *sautoirs* held together with great amethyst or baroque pearls or rhinestones look well. Square belt buckles, or of harp-shape, are of faceted jet with jet *cabochons* set in silver. There are high jet combs with coronet tops, others of silver set with amethysts, jet sprays for the hair in a pattern of maidenhair ferns, brooches in the form of roses and daisies of jet with rhinestone hearts; hatpins of jet in floral form and amethyst ornaments set in black silver and rimmed with faceted steel.

For the throat are faceted rock crystal beads, with occasionally a larger one of dark amethyst between. Amethysts set in jet are stylish in mourning jewelry.

L'eau castor is one of the new bag leathers. It comes in gray and mordore and has a moire surface. The oval top is the latest, with a top below which is a wide kilt pleated ruffle held at each corner with small buttons and silk loops. Bags in the shape of a heart and others formed like a horseshoe are attractive, the latter showing the horseshoe clasp in gilt, with the bag of brown or champagne kid or dull suede. Bags made of wood beads in black and various colors to match suits are new; some of them show designs in smaller wood beads in imitation of flowers. Dull and bright jet

WE INVITE COMPARISON

Consider all the points that go to make up a perfect Scientific Stone and let your sound judgment pick the best that's offered.

There is a difference.

Long continued experiments on Scientific Stones have brought results, giving our products the distinction which we take pride in pointing out.

It is the absolute purity of the material, its closest approach to the natural gem that, in combination with the highest skill of the cutter, yield the fine quality we claim for Our Scientific Products—their Uniformity of shade and form, Correctness of size and Brilliancy of finish.

In building up the reputation our Scientific Stones enjoy throughout the country we were guided by a policy aiming to produce an article that would become popular, not by reason of its cheapness, but on account of its intrinsic qualities. Hence—The Superiority of Our Scientific Stones.

Importer of Diamonds and Pearls

eads are often associated with clasps of unmetal or silver.

Hatpins are of supreme elegance, although necessarily those offered by the jeweler are less showy than the enormous imitation ones found at the imitation houses, and which are gorgeous and showy in the extreme. Those of real gems are of more modest proportions, balls incrusting with diamonds or colored stones and others with long slender heads half a finger long, while there are artistic pins of white or amber horn in the shape of birds or insects most delicately carved and enhanced with a few aquoises, olivines or garnets. Cheaper are the pretty pins consisting of an enormous half-open rose in pink, yellow or red enameled metal, made to match the hat in color.

There has been such an outcry against the long and dangerous pins that all of the shops are selling *protege points*, or point protectors, which take various forms, such as dull metal tips or pearl balls, which are screwed on after the pin is in place and which nullifies the danger to the eyes.

Fans which are perfect reproductions of those belonging to celebrated personages of olden time are favorites, and scarcely a bride's trousseau is complete without these artistic trifles. Some are painted by renowned artists like Madeleine Lemaire, on hickory skin or ancient vellum in faded colorings as if damaged by time. Most fans are of medium size, although there has been an effort to revive the very large ones once so fashionable, but which are in the minority. The latter lend themselves to elaborate decoration, affording a wider scope for the artist. Fans of Vernis Martin style imitating the old fans of the 17th century are quaint rather than graceful. Others show delicious airy carving on mother-of-pearl or ivory, the painting being executed on this brilliant surface, which is sometimes incrusting with precious stones. To subscribe to the fancy for matching, there are tops formed of overlapping paillettes of every conceivable color to match each costume, and which show pearl sticks stained to harmonize. Any number of cheaper satin and paper fans in the form of giant flowers, birds or animals are sold as cotillion favors and are pretty and salable. There are large fans of eagle and vulture feathers in natural tints and tiny ivory fans in delicate pierced work, fragile and ornate.

Lovely little clocks for the boudoir are but three inches high and are enameled of a brilliant empire green or *bleu de roi* and outlined with pearls or rhinestones.

Blotting pads show queer figures in silver or bronze. Pierrots, dancing girls, historic reproductions of *chef d'oeuvres* of sculpture, or ladies in hoop and farthingale with knights and troubadours are of real artistic merit. Penwipers of animals in bronze and gilt in the form of wild and domestic, of birds and reptiles, are fit ornaments for the writing table and are provided with felt tops. Others are covered with fur.

A pair of library candlesticks are of empire fashion, showing a straight fluted column of crystal, ringed at intervals with enameled and golden bands.

Diamond-rimmed quizzing glasses are handsome, and as many English ladies are adepts in screwing the single glass in the eye, are often seen. Magnificent is a knob

for a parasol handle, of thick gold wire in arabesques set at intervals with dull emerald *cabochohs* and opals.

Desk sets are of khaki, turquoise or dark blue morocco tooled like the cover of a precious volume. There is the portofolio,

the letter-holder, the blotting pad and bill clip, the latter the bill of a wild duck in gilt. A great gold and green enameled chameleon often serves as a paperweight and bill clip combined.

COUNTESS DE MONTAIGU.

National Monthly Import and Export Statistics.

Customs Authorities Suspect Big Smuggling Plot After Discovering Quantity of Watches in Italian Passenger's Trunk.

BOSTON, Mass., Oct. 22.—When the United States immigration officials took Mrs. Evaristo Nagliari, of Italy, off the steamship *Romantic* on the vessel's arrival at this port Wednesday morning, the customs officials did not subject her or her husband to a searching examination because the wife had given birth to a boy while the steamer was coming up the bay. Subsequent revelations, in which Nagliari's baggage figured, led the customs officials to realize they had come very near being hoodwinked, since an examination, made to-day, proved that the Nagliaris had in their trunk more than 200 watches which they had not included in their declaration. Mrs. Nagliari and her baby are at the hospital, while the husband is in the Charles St. jail, where he is held in default of \$500 bail for a hearing next Tuesday.

The Nagliaris, when they went away from the wharf Tuesday, left behind their trunk, which was held in bond. To-day Inspectors Thomas F. Mackay and W. H. Bond, of the customs department, overhauled the baggage in the presence of Nagliari. The officers found a tray in the trunk containing eight watches which had not been declared. This aroused their suspicions, and they decided upon a second and even more thorough search. Just as they were about to abandon their quest they discovered that the trunk had a false bottom. Upon removing the false bottom they found about 200 watches snugly packed away in the secret compartment.

The watches were of an expensive make and put up in cases of gold, silver and other metals. All of the watches were immediately confiscated by the Federal authorities and Nagliari promptly taken into custody. He was turned over to a deputy United States marshal and taken at once to the Federal building.

Nagliari was arraigned before U. S. Commissioner Hayes on a charge of smuggling. The prisoner pleaded not guilty and was held in \$500 bail for a hearing next Tuesday. In default of sureties he was sent to the Charles St. jail.

Special agents were at once detailed on the case and they began an investigation to ascertain if it was possible to verify their suspicions that Nagliari was acting in the interest of some big smuggler who, it is suspected, has long been doing this kind of work.

While the revenue department maintains the strictest secrecy, it is understood that a quantity of contraband goods has got by the port of Boston despite the constant vigilance of its officers. It is well known that since the New York customs officials have been unusually active in their efforts to prevent smuggling, Boston customs men have had a fear that this port might be looked upon as more accessible.

There have been several Secret Service men here of late, and it is believed that their presence was brought about in the Government's desire to break up a systematic series of smuggling in which foreign watches played no inconsiderable part.

The theory is that there is one man who

employs a number of people to bring goods into this country, they having legitimate reasons for making the transatlantic trip and being able to carry for him some small amount of goods. With this in view the customs officials and revenue agents will make a most complete and thorough investigation.

Boston, Mass., Police Taking Unusual Precautions to Protect Jewelers During the Holiday Rush.

BOSTON, Mass., Oct. 22.—In anticipation of the possible extensive operations of jewelry and gem thieves during the coming holiday season, when the stores carrying these goods display them in large quantities, Deputy Superintendent William B. Watts, who has charge of the local detective bureau, has already perfected his plans, as far as possible, to prevent a recurrence of these annual holiday crimes.

He has consulted with the heads of a number of jewelry firms and agreed with them on plans for protecting their stock. It is well known that there are a great many more watches and jewels on sale as Christmas approaches, and sometimes the articles are not guarded as carefully as they might be. Further, there are more customers in the store and the chance for a thief to steal is much greater.

Deputy Watts has ordered his own men and the private detectives which he will employ to study in the rogues' gallery the faces of all snatch thieves, "pennyweighters," jewelry and gem thieves, and make themselves thoroughly familiar with the men who are likely to attempt to prey upon Boston jewelers and department stores.

In some of the stores men will be stationed where they may command a full view of the interior and yet not be seen themselves. This system has been found to be successful in the past and will undoubtedly meet all expectations in the future.

Salesmen will be instructed to be very cautious and not be afraid to "size up" their customers and not place before the prospective purchasers too much of a selection. The man who attempts to substitute imitations for the real diamond or "palms" the jewel is likely to be caught, as the salesmen have been given lessons by Deputy Watts' men as to what they may expect.

Stores and streets will be patrolled by an augmented force of thief-catchers, Deputy Watts says, so that Boston jewelers may be fully protected. Detectives will meet at the railroad stations thieves who may select Boston as a place to "work."

Deputy Watts desires the co-operation of jewelers in keeping Boston free from larceny cases, and if he gets it he insists Boston will have no serious losses of jewelry in consequence of thieves.

Wisconsin Retail Jewelers' Association Decides to Hold Next Annual Meeting, July 19-21, in Milwaukee.

MILWAUKEE, Wis., Oct. 20.—The first quarterly meeting of the directors of the Wisconsin Retail Jewelers' Association was held at the Blatz Hotel, recently, and several matters of importance were up for discussion. Among other things, the directors set the dates for the next annual convention of the association as July 19, 20 and 21, Milwaukee to be the location.

It was decided to reinstate the initiation fee of \$2 to incoming members of the association, so that, with the annual fee of \$3, a total of \$5 will be paid by new members. Resolutions were passed to the effect that it was the belief of the directors that the annual conventions of the jewelers and the Wisconsin Association of Optometrists should not be held at the same time. It is felt that while the interests of both jewelers and opticians are closely allied, members in the past have endeavored to divide up their time between both conventions and the results have not been as satisfactory as they should have been. It is expected that the optometrists will hold their annual convention at Fond du Lac, the home of President Hugh McEwan, next year.

The directors reported that the quarter just passed was the most prosperous in the history of the Wisconsin Retail Jewelers' Association. The directors present at the meeting included: Gustave Keller, Appleton, president of the Wisconsin Retail Jewelers' Association; J. R. Chapman, Oshkosh; W. H. Becken, Beaver-Dam, and H. F. Stecher, of this city.

George Annenberg Files Voluntary Petition in Bankruptcy at Brooklyn to Wipe Out Old Debts.

George Annenberg, who was formerly in the jewelry business in Brooklyn, filed a voluntary petition in bankruptcy, Wednesday of last week, with the clerk of the United States District Court, Eastern District. His schedules show liabilities amounting to \$7,294 and assets of \$2,097, of which \$2,072 are enumerated as debts due on open accounts.

Among the unsecured creditors named in the petition are: J. Bulova & Co., \$98; Anzelewitz, \$167; M. Freed & Peikes, \$180; J. Horowitz, \$379; Frederick Kaufman, \$94; Wm. Kanowitz, \$517; I. Ollendorf Co., \$329; Laubheim Bros., \$451; Schiff Bros., \$105; Wagner & Co., \$81; Spiro & Hirsch, \$643; E. A. Kohn & Co., \$424; Perelman & Sorin, \$146; Haldimann & Co., \$119; R. Silbermintz, \$787; Charles Altschul, \$684. The greater portion of the debts were contracted in 1901 and are for merchandise sold and delivered, on which judgment has been obtained.

Mr. Annenberg commenced the business in 1891 as Annenberg & Bachrach, which firm subsequently dissolved, Mr. Annenberg continuing alone. He moved to 74 Graham Ave., in November, 1901. He met with business reverses and tried to obtain an extension, and offered 25 cents in settlement of his indebtedness. This was not accepted, and in December of that year his landlord dispossessed him. He has not been in business for some time.

Vily Check Swindler Who Recently Visited Montreal, Suddenly Disappears.

MONTREAL, Can., Oct. 20.—One of the cleverest check swindlers that Montreal has seen has been operating in the city recently. He has, however, had his quietus through the prudence of Mr. Cochenthaler, jeweler, 48 St. Catherine St., W., who has been more fortunate than some of his business colleagues in escaping the man's operations. Well dressed and about 25 years of age, his individual has passed several hundred dollars worth of bogus checks upon local merchants within the past week. He went into the jewelry store of Johnston Bros., 43 St. Catherine St., W., and, buying a scarf from one of the clerks, presented a check, stamped "certified," in payment. At first the clerk refused to accept the paper added to him, but the young man stated that he was well acquainted with the clerk's brother in Westmount and that it would be "all right." There was nothing suspicious about him, and after telling an anecdote concerning the clerk's brother he gained the confidence of the jeweler's assistant. The check was accepted and was only found to be worthless when presented at the Bank of Montreal.

The stranger next went to the store of Mr. Cochenthaler and there selected a ring, offering an accepted check on a Rochester Bank in payment, the check being signed by an alleged press syndicate. Mr. Cochenthaler informed his would-be customer that he would not take the check even if "accepted," as the purchaser of the ring was a stranger to every one in the store. The young man then volunteered the information that he had an uncle in the city and that as he was not in a very great hurry for the ring he would get the check cashed elsewhere and "return in the morning." He did not return, however, and it soon transpired that quite a number of St. Catherine St. jewelers, tailors, trunkmakers, hat and cap dealers had received the young man's visits and, in most cases, checks ranging from \$14 to \$24 had been tendered in payment for articles purchased, the man getting off with the balance and the goods.

Mr. Cochenthaler gave information to the police, but as they have not been able to trace the young man, and not having heard of him through the complaints of merchants, it is presumed that he has left the city.

Involuntary Bankruptcy Petition Against the Chas. Otero Jewelry Co., Pueblo, Colo.

PUEBLO, Colo., Oct. 20.—Creditors of the Chas. Otero Jewelry Co., last Wednesday, filed an involuntary petition in bankruptcy in the United States District Court here. Charles Otero is the president of the company, a corporation which has a store at 615 N. Main St. His associates in the company are Mattie J. Otero, secretary, and Alexander Hall, treasurer.

Mr. Otero has been in the jewelry business many years, and went into bankruptcy about 14 years ago. After the failure he incorporated the Chas. Otero Jewelry Co., and though he has worked hard and paid careful attention to business, he has had

trouble financially. He carried a stock estimated at over \$15,000, and his business has been well known. In the last year or so he has been hard pressed financially.

Case Against E. F. Poos, St. Louis, Mo., Charged with Assault to Kill His Father, Dismissed.

ST. LOUIS, Oct. 23.—The case against Edward F. Poos, of 3564 South Broadway, charged with assault to kill his father, August Poos, was dismissed Wednesday, in Judge Shields' criminal division of the Circuit Court by Assistant Prosecuting Attorney Newton. Mr. Newton stated that no case could be made against young Poos except on the testimony of his mother and sister, who would not testify against him willingly, and it was not at all certain that even with their testimony a case could be made against him. Besides he did not want to force the mother and sister into the ordeal of testifying against the son and brother.

The elder Poos and his son were associated in the jewelry business at the South Broadway address. The sister of Edward told him that her father had spoken slurringly of Mrs. Poos. Edward went to his father about it and there was a violent quarrel. Shots were fired. Mrs. Poos came running into the store. Her husband shot her. When the smoke cleared away August Poos was dying with a bullet in his brain and his wife was thought to be fatally injured, but she recovered.

It was supposed that Edward had killed his father and he shared the belief, but the autopsy disclosed that the elder Poos had died from a bullet which he had fired into his own brain. Edward, who had been held on the charge of murder, was released from that charge but the grand jury indicted him for an attempt to kill, as one of the bullets fired by him had taken effect in his father's body but had not been the cause of his death. Since the death of his father, Edward has continued to conduct the jewelry business on South Broadway.

Advertising Agent Accused by Jewelers Sent to Jail Until He Pays His Fine.

LEAVENWORTH, Kans., Oct. 20.—M. O. Britton, alias M. Bloom, of Duluth, Minn., pleaded guilty in the United States District Court, Oct. 14, to an indictment charging him with using the mails for fraudulent purposes. He will be committed to the Wyandotte County jail until he pays a fine of \$100. Britton has just completed a sentence of six months in Omaha for the same offense.

Britton claims he was authorized by a Mr. Bloom to use his name in an advertising business. Bloom, he said, authorized him to represent himself as a reputable jeweler selling high-class goods. He was to advertise his business widely and purchase goods of the leading wholesale dealers in large cities. He was not told how he should pay for the jewelry, and this is the very thing that got him into trouble.

Britton operated in San Francisco four years, and later came to McPherson, Kans., and went into business. He ordered con-

signments of goods from two Kansas City houses, referring them to Dun's and to Bradstreet's. Without making any inquiries the Kansas City dealers sent him the order. One of the consignments was returned to the sender; the other house did not receive any word from the consignee, and their goods were not returned.

It was then that the government took a hand in the matter. Britton was wanted in Nebraska for the same offense. He was taken to Omaha and tried in the United States District Court and sentenced to six months in jail. Before his sentence had expired he was indicted by the Federal Grand Jury, sitting in the United States District of Kansas.

Death of Samuel D. Mason.

NORTH ATTLEBORO, Mass., Oct. 23.—Samuel Dunster Mason, a well known manufacturer in the jewelry trade, died, last Monday morning, at his residence on Commonwealth Ave. The funeral was held Thursday afternoon.

Deceased was born in Attleboro, Sept. 4, 1848, and received his early education in that town. He became a member of the firm of Mason & Draper, in 1870, which was at that time one of the largest jewelry concerns in town. Later he sold out his interests in this firm and formed the firm of Mason, Ruggles & Co., and up to the time of his death carried on business under this name.

In 1873 Mr. Mason married Emma Draper. He was well known throughout the town, and is survived by his widow, two sisters and four brothers.

Japanese Commercial Commissioners Visit Jewelry Plants at Providence and Are Presented with Medals and Entertained by the Gorham Mfg. Co.

PROVIDENCE, R. I., Oct. 23.—The Honorary Commercial Commissioners of Japan, who are making a three months' tour of inspection through the United States, were the guests of the manufacturers and merchants of this city and vicinity, yesterday afternoon and evening, under the auspices of the Providence Board of Trade. While not specifically or directly interested from business point of view in the visit of the

Immediately after leaving their special train at the Union Station the visitors were escorted to the city hall, where they were received by Mayor Fletcher.

In automobiles the party was taken to points of interests about the city, including the plants of the Brown & Sharpe Mfg. Co., Ostby & Barton Co., Wightman & Hough Co. and other places. Among those who furnished automobiles for the trip

ber to upwards of 150. Included among those who joined the visitors here were Ralph Hamilton, of Hamilton & Hamilton, Jr.; William H. Thurber, of Tilden-Thurber Co.; William H. Mason, of THE JEWELERS' CIRCULAR-WEEKLY, who had been guide for one of the groups during the trip about the city, and William E. Tefft, of *The Manufacturing Jeweler*.

Owing to the large number in the party, small groups were escorted through the various departments, well-informed guides describing the details in each room as it

SILVER PLAQUE PRESENTED TO BARON SHIBUSAWA BY THE GORHAM MFG. CO.

OBVERSE OF SILVER MEDAL.

was visited. Secretary Lawton headed the long line, escorting Baron Shibusawa, the official head of the guests. The Japanese found much to interest, impress and astonish them, and several lingered long after the others had passed through, watching the operations and execution of the ponderous power presses and electric drops.

In the silver department the visitors were shown the individual pieces that are being made for the largest and most valuable private dinner set ever designed in this country, costing \$50,000. Pieces of an im-

REVERSE, SHOWING INSCRIPTION.

mense hotel order were also pointed out, and when the wages paid some of the experts in this department were stated the information caused considerable astonishment.

While much was seen to hold the attention of all, it was when the bronze foundry was entered that the climax of their wonder was reached. Here were the heroic bronze statues of Sir John Macdonald, the Premier, that is being completed for shipment to Canada; the imposing group with

subjects of the Mikado, the manufacturing jewelers were prominently identified in connection with their entertainment.

The committee of the Providence Board of Trade that arranged for the reception and entertainment of the visitors during their stay and which was chosen with a view to making it as representative of the city's industries as possible included Mayor Henry Fletcher, treasurer of the Fletcher-Burrows Co.; Nathan B. Barton, of the Ostby & Barton Co.; Henry D. Sharpe, of the Brown & Sharpe Mfg. Co.; John F. P. Lawton, of the Gorham Mfg. Co.; Walter R. Callender, of Callender, McAuslan & Troup Co.; Harry Cutler, of the Cutler Jewelry Co., and Frederick W. Aldred, of the B. H. Gladding Co.

were John Shepard, Jr., Samuel M. Nicholson, George H. Holmes, Gorham Mfg. Co., Harry Cutler, Hamilton & Hamilton, Jr.

The entire party met at the Gorham Mfg. Co.'s plant, where they arrived at about 4:30 o'clock. They were received by Vice-President John S. Holbrook, Assistant Treasurer and Secretary John F. P. Lawton, Assistant Treasurer William E. Keyes, Superintendent Fred C. Lawton and E. Frank Aldrich, each of whom, as a pretty tribute to the Japanese visitors, wore an immense white or yellow chrysanthemum in his buttonhole.

At the Gorham company's office the company which had been making a tour of the city was augmented by a number of business men and others, increasing the num-

Derry Manufacturing Company
DERRY, NEW HAMPSHIRE

Bishop Brooks as the central figure, and the big equestrian statue of Gen. George A. Custer. Here also were seen the massive bronze doors that are being finished on the new postoffice at Cleveland.

After going through the great plant the entire company assembled in the Gorham Casino, where a light luncheon was served and an informal reception held. At its conclusion Secretary Lawton, addressing the visitors from the Far East, said: "The Gorham Company takes great pleasure in welcoming to an inspection of its plant this distinguished body of gentlemen constituting the Honorary Commercial Commissioners from Japan.

"The time allotted to the inspection has been far too brief to accomplish all that the company would desire, but let us hope that a favorable impression has been made, and as mementos of this visit we beg the acceptance of these medals and album of photographs."

As he concluded speaking, Vice-President Holbrook and Superintendent Lawton handed to each of the Japanese a handsome example of the Gorham company's work in the shape of a solid silver medal. At the same time, as a special official recognition of the commission, Secretary Lawton handed to Baron Shibusawa a beautiful solid silver plaque in a plush case. Every person was also given a handsome souvenir panoramic photograph album of the works.

The medals were of solid silver, about two inches in diameter and specially designed and struck for the occasion. The face of the medal has the American and Japanese flags intertwined with a laurel wreath, while at the bottom is the hall mark of the Gorham company, with branches of oak. The reverse has the inscription, "Presented to the members of Japanese Commission on their visit to the Gorham Manufacturing Co., Providence, R. I., Oct. 22, 1909."

The plaque is an excellent example of the designer's art. It was done by R. Ziegler and is in the form of an ornamental panel, across the top being the date, "October, 1909," below which are the crossed flags of the two nations, similarly treated as in the medals, while in the lower part of the souvenir is shown the main entrance and administrative building of the Gorham group at the Elinwood plant. The base of the panel in the center is formed by simple scrolls encircling the hall mark of the concern, the lion, the anchor and Old English letter G.

At 6 o'clock the party left the Gorham plant for the Union Station, and were rapidly carried by special train to the Squantum Club and were introduced to Rhode Island's celebrated epicurean offering—a clambake. Covers were laid for 175, and among those who were present were the following who are identified with the jewelry industry or its branches: Arthur E. Austin, Frederick A. Ballou, Nathan B. Barton, Walter R. Callender, Walter Callender, Josiah W. Crocker, Julius Palmer, William P. Chapin, Theodore W. Foster, Henry W. Harvey, Walter Hidden, Samuel M. Nicholson, Lucien Sharpe, John Shepard, Jr., Henry G. Thresher, William H. Thurber and Dutee Wilcox. Mayor

Fletcher was one of the after-dinner speakers.

The Japanese party left here this morning at 6:30 o'clock for Boston.

Japanese Commissioners Visit Waltham Watch Factory.

Boston, Mass., Oct. 25.—One of the most interesting features of the three days' visit of the Commercial Commission of Japan was the inspection, last Saturday, by about 20 members of the party of the Waltham Watch Co.'s plant, at Waltham.

The distinguished foreigners were met upon their arrival in Boston by Engineer Henry C. Eaton, of the company, who was with them on their auto trip through the Boston park system, the Newtons and thence to Waltham. Upon their arrival at Waltham the guests were met in the treasurer's office by Consulting Engineer E. A. Marsh. After they had registered they were turned over to General Superintendent John W. Burkes, who was assisted by Assistant Superintendent Gleason Wood, Superintendent of Watchmaking Olaf Olson, H. E. Duncan, head of the timing department; G. W. Ela, electrician; Foreman E. L. Hull and A. P. Williams. Then they were escorted through the plant.

First the party was taken into the plate room, where the foundation of the watch is laid. From there they went through the train-making, balance, escapement and jewelers departments. The almost human automatic machines caused ejaculations of amazement from the very observing Japanese.

There was every evidence that the magnitude of the factory made a deep impression on the men from the land of the Mikado. They asked innumerable questions and declared the enterprise exceeded by far their fullest expectations.

The class of help employed greatly astonished the visitors. The sight of young women in silk waists as a part of their working dress and young men in neat business suits caused them to make many comments. The fact that employes make from \$10 to \$30 a week increased their surprise.

When the party had gone through the factory the members returned to the treasurer's office, where luncheon was served.

Philadelphia Jewelers' Clerk Held in Safe Until Police Arrest Him on Larceny Charge.

PHILADELPHIA, Pa., Oct. 23.—After his employers had become convinced that he had been selling jewelry which he had stolen, Morton J. Levy, 25 years old, of 2518 N. 31st St., was enticed to-day into a large safe which stood in the rear of the store where he worked and there imprisoned until a policeman arrived.

Levy was a stock clerk for the jewelry firm of Ritter, Kahn & Co. at 1014 Arch St. For some time jewelry has been missed. This morning another employe saw Levy selling jewelry to boys and told his employers.

When Levy came upstairs Max Kahn, one of the members of the firm, directed him to do certain things about the store. He asked the young man in a matter-of-fact way to enter a large safe in the back where

goods are stored. As the request was not unusual Levy walked in and Mr. Kahn shut the door.

Levy, it is claimed, later admitted he had been stealing jewelry for the last six months, saying that his salary was insufficient to meet his expenses.

Involuntary Bankruptcy Petition Filed at Cleveland Against C. L. Taylor, Dennison and Uhrichville, O.

CLEVELAND, O., Oct. 25.—An involuntary petition in bankruptcy was filed in the United States District Court of this city, Saturday, against C. L. Taylor, a jeweler who has stores at Dennison and Uhrichville, O., by the following creditors: Mount & Woodhull, \$3,841; Wm. I. Rosenfeld, \$729, and Hayden W. Wheeler & Co., \$2,136, all of New York. The filing of the petition followed the visit of C. N. Gray, of the Jewelers Board of Trade, to Dennison and Uhrichville, where he investigated the situation. F. G. Pittinger, Dennison, O., has been appointed receiver.

It is reported that on or about Oct. 15 Mr. Taylor transferred his store at Uhrichville to his father, Wm. Taylor, to secure him for cash loaned at the time that he started in business. It was also reported that he was selling his stock at his Dennison store at ruinous prices. No definite statement as to assets and liabilities is available at this time. Last February, in a report to the Jewelers Board of Trade, he claimed that he had a surplus of \$15,868.

Death of O. A. Rogers

DANBURY, Conn., Oct. 20.—Oren Augustus Rogers, who for 48 years conducted a jewelry store in Danbury, died yesterday, shortly before midnight, at his home, 3 Franklin St., of a complication of diseases. Mr. Rogers' health began to fail since he was injured, about eight years ago, by falling from a trolley car.

The deceased came to Danbury when 21 years of age and entered the employ of Huntington & Robinson, who at that time were prominent jewelers. He afterward started in business for himself, and at the time of his death was located at 11 West St.

Mr. Rogers was born in Charlemont, Mass., but at an early age moved with his parents to Pittsfield, where he learned the jewelry business under the tutelage of his father. He came to this city in 1861. He is survived by his widow and two sons.

The deceased was a member of Union Lodge, F. and A. M., Eureka Chapter, R. A. M., and Crusader Commandery, Knight Templars. He was also a member of the Masonic Veterans' Association.

T. H. Boone, Purcell, Okla., Makes a General Assignment.

PURCELL, Okla., Oct. 23.—T. H. Boone, a dealer in jewelry and stationery, of this town, has made a general assignment under State laws. No statement as to his assets or liabilities is given, but the latter are said to be small.

Mr. Boone has been in business here since 1900. He carried a stock worth about \$2,500 and was believed to be doing well, though of late he had not met all his obligations promptly.

NEW YORK

From The Jewelers' Circular, October 20, 1909.

H. J. Hooper, jewelry auctioneer, of 37 Maiden Lane, New York, has just issued a very attractive and interesting work on auctioneering. It is for free distribution, and a copy may be had by those interested in the asking.

GOING! GOING!! GONE!!!

- 
- And your reputation with it. Some Auctioneers can dispose of your reputation in a bungling endeavor to sell your stock. It therefore behooves you to exercise some judgment in the selection of an Auctioneer
- ☐ My new and attractive booklet suggests to you the qualifications that should be required of the man selected to handle your sale. Get a copy of it, read it carefully and proceed in your selection along the lines therein outlined.
 - ☐ If you do this your choice of an Auctioneer will be confined to a select few, as the standard established for myself is quite beyond the ability of the average Auctioneer.
 - ☐ **REMEMBER** That HOOPER personally superintends every detail of your sale. Nothing is entrusted to substitutes or assistants. You are guaranteed a legitimate and high class sale that will accomplish its purpose—no matter what it is—and furthermore it leaves you in excellent shape financially and commercially.

H. J. HOOPER

New York's Undisputed Leading Jewelry Auctioneer, with an Unparalleled Record for Successful Sales

The Absolute Time Co. is a new concern which has been incorporated in Augusta, Me., with a capital of \$1,000,000. The president is R. S. Buzzell; treasurer, E. J. Pike.

The United Jewelry & Turquoise Co. has engaged in business at 446 S. Broadway, Los Angeles, Cal. The firm will do a jewelry manufacturing and stone-cutting business.

T. J. Wilkinson has returned to Philadelphia, Pa., where he has opened a school for watchmakers at 25 W. 54th St. Mr. Wilkinson is a well-known horologist and teacher of that subject.

J. B. C. Schmidt, who for many years was in the employ of Shreve & Co., San Francisco, Cal., is now in business for himself in San Leandro, Cal., where he will make a specialty of repair work.

A charter of incorporation under the laws of Ontario has been issued to the Michigan Optical Co., Ltd., to manufacture and deal in optical goods in Toronto, Ont., with a capital of \$20,000. The provisional directors are Thomas F. Comerford, Francis J. Poulter and Ernest W. Pratt.

The Wisconsin Novelty Co. has been incorporated at Stevens Point, Wis., to manufacture various devices; including a contrivance for the polishing of all kinds of jewelry. The following are the officers: President, W. E. Kingsbury; vice-president, Bernard Kane; secretary, C. E. Emmons; treasurer, H. H. Pagel.

Shell Cameos Now Declared Dutiable as Precious Stones at Ten Per Cent.

Ad Valorem.

The Board of United States General Appraisers has handed down a decision of much interest to the jewelry trade dealing with the classification of shell cameos. The case in question arose on the protest of Benedict & Warner, New York, who asked that the assessment of 35 per cent. on cameos as "manufactures of shell" be set aside and the cameos permitted to come into this country at 10 per cent. under par 435 of the tariff act of 1897 as "precious stones cut but not set." The General Appraisers agree with the importers in their contention. The decision of the Collector is reversed and the lower duty granted.

The question as to the classification of shell cameos came up some time ago but in this earlier proceeding no evidence was submitted to show that shell cameos designed as settings for jewelry were known as precious stones by the trade. The Board in that case sustained the importers' alternate claim for a duty of 35 per cent. as manufactures of shell.

It is held that though shell is not a mineral, when prepared and designed for

settings for jewelry, it is commercially known as precious stone; and shell cameos are therefore placed as dutiable under the provisions in par. 435 tariff act of 1897 for "precious stones" cut but not set, rather than as manufactures of shell, not specially provided for, under par. 450.

The Board's opinion, which was written by General Appraiser Sharretts, as follows:

In G. A. 2763 this Board sustained the importers' alternative claim that shell cameos were dutiable at 35 per cent. ad valorem under Par. 450, Tariff Act of 1897, as manufactures of shell. No evidence was offered in that case tending to show that shell cameos designed as settings for jewelry were known as precious stones by the trade handling such articles. In the cases now on appeal the protestants object to the assessment of duty at 35 per cent. ad valorem on shell cameos, claiming the same to be dutiable at 10 per cent. ad valorem under the provision of Par. 435 of said act for precious stones cut but not set. At the hearing in the cases now upon appeal the concurrent testimony showed that the disputed articles are known in trade as precious stones, and this fact would seem to be conclusive in favor of the importers' contention, unless it can be shown that Congress in terms excluded them from Par. 435.

A more careful consideration of the subject leads us to a conclusion different from that arrived at in G. A. 3763 (supra). It is true that crude shell is not a mineral, but the same can be said of coral and pearls; nevertheless, both scientifically and commercially, these substances which, like shell, are of animal origin, when prepared and designed for settings for jewelry are known in trade as precious stones. See "Gems and Precious Stone of North American," page 310, by George F. Kunz; also Century Dictionary under the caption, "Precious Stone."

In determining the issue here presented, it is proper to consult prior acts bearing upon the subject. We find that from 1861 to 1883 there was a provision for "diamonds, cameos, mosaics, gems, pearls and other precious stones." (See Pars. 104, 367 and 1369.) The act of 1883, Par. 480, reads: "Precious stones of all kinds, 10 per centum ad valorem."

Under this act cameos continued, as in the prior acts, to be classified as precious stones. (See T. D. 9211, January, 1898.) The acts of 1890 and 1894 made no change, nor is there any indication of congressional intent to change the classification of cameos under the act of 1897, which there probably would have been if Congress had intended to depart from the practice that had prevailed for 36 years. In this connection it will be observed that Par. 449 of the present tariff act of 1909, again in terms includes cameos among precious stones. This may well be taken as a legislative interpretation that, although the act of 1897 is silent on the subject, cameos are to be regarded, in accordance with trade understanding, as precious stones. We find they are such in fact and sustain the claim in the protest that the cameos in question are dutiable at 10 per cent. ad valorem under Par. 435 of the Tariff Act of 1897, the Collector's decision being reversed.

G. A. 5763 (T. D. 25512). is hereby modified to conform to the principles enunciated herein.

Joseph Leblanc, cabman, who, Sept. 21 last, assaulted and robbed Charles W. Cedarstrom, a jewelers' traveler, of \$960, was, on Friday, sentenced at Montreal to four years in the penitentiary. Mr. Cedarstrom travels on his own account, purchasing many of his goods from Bloomfield Bros., 17 Notre Dame St. On the date named he engaged Leblanc to drive him to the Grand Union Hotel, where he was staying. The prisoner asked if there would be any objection to a friend of his, who desired to go in the same direction, riding in the cab at the same time. Mr. Cedarstrom replied in the negative. Then Leblanc, instead of driving to the hotel, conducted his vehicle into a dark lane, where he and the man in the cab attacked Mr. Cedarstrom and left him unconscious on the roadway after they had robbed him.

"THE CASE THAT COURTS COMPARISON"

Mr. Retailer:

It's the PLANT behind the PRODUCT, it's the BRAINS behind the PLANT that create the CHARACTER and MERIT of the article produced.

Now, Mr. Retailer,

Could a PLANT be better run, or a PRODUCT better made, than by men who have a *vital, personal* interest in the success of the enterprise?

Our men are STOCKHOLDERS in our company, they are working for themselves, the better their work, the more they profit; isn't that logic?

That's why the SOLIDARITY case is a *comparable* case most worthy of your confidence.

Our product is sold through the JOBBERS ONLY.

SOLIDARITY WATCH CASE CO.

D. E. D. McMURRAY, President

JOHN W. SHERWOOD, Vice-President

LOUIS J. MONTAGNON, Secretary-Treasurer

**Secretary Wheeler Addresses Members
of the American National Retail
Jewelers' Association on Im-
portant Topics.**

COLUMBIA, Mo., Oct. 21.—Claud Wheeler, secretary of the American National Retail Jewelers' Association, has sent out the following announcement to the members:

Gentlemen—We have been able to bring the work of the secretary's office up to date and are behind in but one thing, the issuing of membership certificates to new members. The printers have delayed us in this. Most of the members who have not received certificates live in Wisconsin and Oklahoma. In a few weeks these will be out. I find members, old members, who have never received a certificate and I would be glad to have such write me and I will issue one.

The matter of door plate is progressing nicely. In a short time I will have definite designs to submit to the committee, and by the first of the year will be ready to issue these plates to members. The charge for these plates delivered to a member will be \$1. A number have written me expressing a desire for the plate, but it will be impossible for me to keep a record of such expression. If a member desires the plate and will send me \$1 his order will be filled in the order received. If some 400 or 500 would do this it would aid very materially in getting these plates out. Under present conditions it is necessary for the officers to advance money for every purpose and wait returns for their money. Already the officers have advanced something like \$300, and it will require about \$400 to place the first order for door plates. If you feel that you want the plate send me your order together with \$1.

About Oct. 1 I sent out a number of letters and asked for suggestions which would aid the officers in compiling a code of ethics. The replies were very gratifying, but I wish every member of the trade would take a little time and make some suggestions either to the president or myself.

I cannot understand the indifference of some State officers. They seem to utterly ignore the fact that members of their State association chose them to attend to the business of the association. They doubtless work when the spirit moves them, and the spirit gets busy just a few weeks before the annual meeting. It seems impossible for this office to get replies from many States, as much as we have tried to do so. I wish some member of each State organization would write me and give the names of his State officers. I have requested this information of every State and have positive information regarding three or four. Every day I receive requests from trade journals, and others asking for an official list of State officers, and I am unable to give it. If you live in an affiliated State write your secretary and ask him if he has sent the information requested by this office. If he has he won't be offended, and if he has not it is time something stirred him up. The members of State organizations should not forget they have an organization as soon as the officers have been elected and the final toasts have been drunk. Watch the work and if your officers are doing their duty encourage them and help along. If they are doing nothing find out why.

The retail jeweler has things coming his way now and the advantage should not be lost. By a continuous, united, harmonious pull together, conditions in our trade will soon be as favorable as in any other line. Just why jewelers have for so many years plodded along and made no protest or offered any resistance while their lines of goods were being distributed through every channel imaginable is of no consequence now. The question is how to stop such practice. The repair business and an occasional sale will no longer suffice and it is time we compelled recognition from every quarter and came into possession of what is our own.

The resolution adopted at Omaha recommending that this office be made a sort of clearing house for State meeting dates should be observed by all States. By taking this matter up early I am sure satisfactory dates can be arranged for all without conflict. Some States have a regular meeting time each year. In such cases this office should be advised at once so other States can be notified. It is not too early to think of these things. A great many who are "too busy" to write or answer a letter are not nearly as busy as they think they are. My observation has been that it is the real busy man who has time to do things.

This office will appreciate a letter from any jew-

eler at any time telling us of conditions in his State, giving any information which can be used to the benefit of the trade. This office will also answer any and all inquiries which are sent in by members of the trade. Whether your association is affiliated or not, send me a list of the officers in your State. CLAUD WHEELER, Secretary American National Retail Jewelers' Association.

Trade Gossip.

A large number of new articles have been added by the Stover Mfg. Co., Freeport, Ill., to the concern's already extensive line of brass candlesticks, incense burners, etc. Among the list are two that deserve special notice. The one is a three-step base Jewish candelabrum with nine candle sockets. It is designed after the ancient Jewish candelabrum. Each octagonal face of the base shows a wreath of leaves and displays a difficult feat in brass moulding. The other article is a single candlestick with an octagonal art glass shade of neat design. The mechanism of the candlestick is such that only about one-half inch of the candle protrudes. As the candle burns away it keeps working up, so that instead of the shade moving down, as is usual, it retains its original position at all times.

The awards for the Veteran Watch Contest recently conducted by M. A. Mead & Co. have just been made. The first prize of \$75 was awarded for a Howard watch No. 280, which was submitted by W. L. Wilhelm, of Portsmouth, O., and which was in actual service since 1858. The second prize of \$50 was awarded for a Waltham watch, submitted by Max H. Elbe, of Niagara Falls, N. Y., and in service since 1859. The third prize was won by C. E. Shepard, of Penn Yan, N. Y., who also submitted a Waltham watch, which was in use since 1860. J. T. Montgomery, manager of the concern, who conducted this contest, announced that a large number of American watches were submitted which had been in actual use since the early 60's. This fact gives the retail jeweler a forceful argument to offer in favor of the longevity, so to speak, of the American watch and the ample returns which ensue from an investment in a high-grade watch, such as continuous satisfaction and precise timekeeping qualities.

Kansas City.

The Greene Jewelry Co. is preparing to move into its new quarters at the southwest corner of 12th St. and Grand Ave.

P. F. Murray, formerly house salesman for the C. B. Norton Jewelry Co., is now representing the house on the road.

Manufacturers say they are already busy with special work for holiday delivery. One manufacturer says the outlook promises an extraordinary trade.

Herbert Koppel, manager of the material department of the Myer Jewelry Co., is the proud father of a daughter, born Monday morning of last week.

Mrs. M. Klein, wife of Jeweler M. Klein, 1119 Main St., has just returned from a six months' visit to Berlin and Hungary, where she visited her brother, whom she had not seen for 30 years. She was accompanied by her daughter Sylvia and a sister, Mrs. Glick, of Cleveland.

The following new students have been enrolled at the Kansas City Horological and Optical School: Mrs. G. Pearce, Kansas City, Mo.; Mr. and Mrs. Ed. Garrison, Lyndon, Kans.; George Peck, Wellington, Kans.; J. L. Pearson, Hutchinson, Kans.; Mr. and Mrs. Geo. Nesbitt, Hill City, Kans.; C. G. Campbell, Star, Tex.

Martin Abrahamsen died, Thursday, Oct. 20, at the general hospital in this city, of tuberculosis. Mr. Abrahamsen was formerly an employe for several years of the Hassig Jewelry Co., and more recently of Mr. Gurney, formerly of Gurney & Ware. He was an expert jeweler and regarded as one of the finest workmen in the city. His widow and five children survive him.

The following jewelers from Kansas City territory were in town during the week: Sam Friedberg, Topeka, Kans.; D. L. Brown, Glasgow, Mo.; F. C. Clement, Pleasant Hill, Mo.; Leslie Burkland and wife, Moberly, Mo.; Leslie Hutton, Lebo, Kans.; C. W. Weidman, Knobnoster, Mo.; Ad. Zimmerman, Warrensburg, Mo.; Walter Sperling, Seneca, Kans.; W. W. Whiteside, Liberty, Mo.; G. C. Starr, Aloy, Okla.; J. A. Lukins, Bucklin, Mo.; Geo. Methe, Council Grove, Kans.; W. T. Brown, Sterling, Kans.; R. E. Bertholf, Cherokee, Kans.; J. H. Champlin, Pittsburg, Kans.

Baltimore.

George W. Leopold, of H. O. Hurlburt & Son, Philadelphia, Pa., was in this city, last week.

M. Koenigsberg is selling out his stock at his store, 503 N. Eutaw St., at a discount, preparatory to moving to 30 E. Baltimore St.

I. McGill Walker expects to have his handsome store on N. Charles St. ready for a formal opening about Nov. 15. He has temporary offices in the Professional building at Charles and Pleasant Sts.

Jenkins & Jenkins made the Belvidere bowl, to be presented by the Hotel Belvidere at the Pimlico meet, next Saturday. It is of special design, nine inches high by 11 inches in circumference, with the Belvidere coat-of-arms on the one side and a horse's head on the other, with a place for the inscription.

The Stieff Co. made the silver plaque trophy offered by Frank A. Munsey for his automobile reliability run from Washington to Boston and return. It is 14 by 24 inches and represents a landscape with an automobile speeding along the highway. In the distance is a lake dotted with tiny boats with a hilly, wooded country on the right and clouds floating in the sky. It is of French gray finish with a sterling silver frame mounted on polished flemish oak.

August F. Becker, corner of Hanover and Conway Sts., who had some difficulty with a negro, Valley V. Stokes, over the purchase of a watch, was recently acquitted of the charge of assault brought by the negro. The difficulty arose over the purchase of a watch which the negro bought from Mr. Becker and brought back to exchange. After securing another timepiece he started to leave without paying the additional charge of \$1.50, whereupon he charged the jeweler with drawing a pistol and threatening to shoot him.

CLOISONNE ENAMEL

THE BEST SELLING LINE of JEWELRY on the market. We are still the leaders in the manufacture of this beautiful class of goods. Wait for our salesmen this Fall and you will see a display of the most beautiful Enamel ever shown. A comparison of our designs and finish is the only argument needed to sell our goods.

SHEPARD MFG. CO. MELROSE HIGHLANDS MASSACHUSETTS
Souvenir Spoons a Specialty

Boston.

J. W. Armbruster, of the Illinois Watch Co., has been here on business.

Walter B. Snow was in Providence, last week, in the interest of his firm.

M. Myers left Saturday for a business trip through the west as far as the Pacific coast.

John Folsom, formerly with N. G. Wood & Sons, has taken a position with C. A. W. Crosby & Son.

W. F. Geyer, with D. C. Percival & Co., has been ill at his home suffering from an injury to his foot.

Elmer E. Knight and family have closed their Reading home and will reside in Boston during the winter.

E. A. Bigelow has returned from a trip which included several points in the south and the northwest.

Mr. Marshall, formerly with the Montreal office of the Waltham Watch Co., has been transferred to the Boston office of that concern.

George J. Hunt has opened a salesroom at 204 Berkeley building, 420 Boylston street, and will deal in hand-wrought silverware and jewelry. As a special attraction there is an exhibition at Mr. Hunt's place in painting, "Paul Revere at Work," by Frank O. Small.

The trial of John L. Nudd, accused of forging the U. S. mails in a scheme to defraud, is in progress before the United States District Court. After the case had been put on, Saturday, Oct. 16, and had proceeded several days, one of the jurors fell ill and a new jury was impaneled.

The case of Cornelius C. Doherty, charged with the larceny of watches and jewelry from J. S. Round & Co., jewelers, at 734 Washington St., has been *nolle prossed* by District Attorney Arthur D. Hill. It is understood that restitution was made and that the arrangement was satisfactory to the prosecution.

Among the jewelers in town last week were: J. E. Stephens, Rumford Falls; Henry Ross, Ross Bros., Calais; V. W. Hills, Norway, Me.; Carl W. Anderson, Manchester, N. H.; C. F. Godfrey, Hingham; L. E. Briggs, Vineyard Haven; H. W. Wood, Haverhill, Loring Smith, with C. C. Smith, Brockton, and E. S. Clark, Sandwich, Mass.

Former shopmates of Francis M. Winters, who until a short time ago was foreman in the escapement department at the E. Howard Watch Co.'s factory, tendered him a surprise party, Tuesday evening, Oct. 19, and presented him with a handsome seal ring. Mr. Winters' successor, Frank Bontz, made the presentation speech, to which the recipient graciously responded. Later there was a program of informal entertainment. Mr. Winters is well known in watch factory circles.

The E. Howard Clock Co. has completed a striking clock for the new public school at Chester, Mass.; a tower clock with an electric secondary system for the new Fort Garry station of the Canadian Northern Railroad at Winnipeg, Man.; a special interior clock, with woodwork to match other finish, for the parochial school at Brookline, Mass.; a special interior clock for the new R. H. Stearns building, Tremont St.,

Boston, and a special interior clock for the National Shoe and Leather Bank at Auburn, Me.

The employes of the Waltham Watch Co.'s factory who were in charge of the company's exhibit at the Alaska-Yukon-Pacific exposition are expected to return this week. While workmen were blasting a ledge across the river from the factory, one day last week, a huge piece of rock was thrown by the force of an explosion into the factory yard; no one was injured, though several had narrow escapes. The transfer of Job-Master George Brannon from the plate department to the adjusting B department brought forth an expression of good wishes from the young women in the plate department, who presented Mr. Brannon with a fountain pen. Timothy William McNamara, of adjusting B department, and Miss Theresa Cryer, of the setting-up department, were married, Wednesday afternoon, at St. Mary's Church, Waltham.

Buffalo, N. Y.

The Riverview Bronze & Mfg. Co., of this city, was recently incorporated.

Nat Slohm, a traveling representative of White, Wile & Warner, has returned from a successful business trip in the east.

Max Lewis and Max Fineberg, traveling for the Queen City Ring Co., have returned from extended business trips in the south.

Isidore Latz, a representative of the Empire Ring Co., who was taken suddenly ill the day of his departure on a business trip, two weeks ago, is reported to be much improved in health and expects to resume his trip about Nov. 1.

On motion of United States Attorney O'Brian, of Buffalo, the case of the government against the Amsterdam Diamond Co., of this city, charged with fraudulent use of the mails, which was to have been heard before United States Commissioner Keating, was adjourned recently until Nov. 8.

Buffalo jewelers are watching with interest the candidacy of J. H. Ullenbruch, a jeweler and optometrist, of 510 Main St., Buffalo. Mr. Ullenbruch was nominated for Democratic candidate for supervisor of West Seneca and the city of Lackawanna. His home is in Gardenville, a suburb of Buffalo.

The jewelers of William St. played a prominent part in the business men's carnival, held along that thoroughfare, last week, and thousands of citizens were in attendance. A. Zilliox, 413 William St., who was a prominent member of a committee in charge of the festivities, won a prize for a handsome window display. In the industrial parade H. Rosen, 654 William St., had a massive clock on a float. His exhibit won a prize and attracted much attention. Mr. Zilliox reported that in carnival week some thieves stole watches from his store window.

Many friends in Buffalo of John H. Deister, an Elmira jeweler, are watching with interest his candidacy for the office of County Treasurer of Chemung County, N. Y. Mr. Deister is on the Democratic ticket. It is reported that he is especially fitted for the position. Mr. Deister entered

the employ of John Bally & Son, E. Water St. jewelers, Elmira, and has remained with that firm ever since. Learning the trade of a jeweler, Mr. Deister became one of the most competent jewelry men in this section. He is prominent in fraternal societies.

An interesting phase of the recent robbery of Frisch Bros.' jewelry store here has a tendency to set at naught the opinion recently expressed by Police Chief Regan, of Buffalo, that a man shot and arrested in Cleveland not long ago had nothing to do with the robbery. The feature in question developed when Gustav Frisch, one of the proprietors of the store, recently returned to Buffalo from Cleveland and announced that he had positively identified as the firm's property two rings found in possession of the Cleveland prisoner. The defendant is William Baker Johnson, alias "Arthur Hill," alias "Cowboy Bill." It is said that extradition papers have been made out in Johnson's case and that he will be brought to Buffalo to stand trial just as soon as he has sufficiently recovered to make the trip. His confederates have not been captured. Johnson is a French half-breed and greatly resembles a negro. He is 20 years old. The Buffalo police report that Morris Darling and William Sabin, whose arrest was mentioned in THE JEWELERS' CIRCULAR-WEEKLY, last week, had no connection with the Frisch robbery. They were arrested as suspects in connection with the case.

Washington, D. C.

Members of the local Jewelers' Association spent a most enjoyable day at Great Falls recently. The dinner was served at the Inn, after which mementos of esteem were presented to the first vice-president, A. O. Hutterly, and the second vice-president, Chas. Goldsmith. A feature programme of the day included a baseball game between the F St. and the 7th St. jewelers.

Mrs. H. F. O'cott, who conducts a jewelry and novelty establishment at 813 17th St., N. W., under the style of "The Good Luck Shop," reported to the police, recently, that thieves robbed her store of jewelry and unset semi-precious stones valued in all at about \$500. The robbery occurred between Saturday evening, Oct. 16, and Monday, Oct. 18, although the loss was not discovered until sometime later. The police have found no clue.

Ivan Jensen & Co., Riverside, N. J., are now located in new quarters at Scott St. The firm moved recently from Pavilion Ave., owing to increasing business.

The stock and good will of the City Jewelry Co., Montgomery, Ala., which recently met with financial difficulties, have been sold several times since the proceedings were brought against the firm. One of the purchasers, H. F. Van Diever, sold it within 10 minutes after he obtained it to Geo. W. Adams, who, almost as quickly resold it to the Mercantile Exchange & Loan Co. The last named has been incorporated at Montgomery with a capital stock of \$5,000, of which \$2,500 has been paid in. The stockholders are D. I. Mills, M. A. Richards and C. F. Gross.

GORHAM LEATHER GOODS

ATTRACTIVE NOVELTIES FOR THE HOLIDAY SEASON

¶ It is realized by the Jewelry Trade in general, that Gorham Manufactures of Leather have attained as convincing a reputation in the estimation of the public as Gorham Silverware.

¶ This is due to the absolute integrity of their workmanship, the unsurpassed quality of their material, and the individuality of the style and appearance.

¶ Special attention may be directed to such attractive holiday goods as the Men's and Women's Traveling Bags and Suit Cases, without fittings and completely fitted with Toilet and Traveling conveniences in gold, silver, turtle ebony, ivory and tortoise shell; to the compact Manicure Cases and the Safety Razor combinations; to the Shopping Bags, Pocket Books, Card and Cigarette Cases in all the staple Leathers as well as in many exclusively controlled novelties.

THE GORHAM COMPANY

A Subscriber's Complaint. A SUBSCRIBER in a large city sends a letter to THE JEWELERS' CIRCULAR-WEEKLY which voices a complaint which we have heard from many quarters as to the manner in which the retail jeweler often suffers from actions of traveling salesmen in inducing watchmakers to leave one customer to secure a position with another. This subscriber's complaint is so typical of the others that we have received that we publish his letter in full on this page.

No doubt there are two sides to this question, as it is the common lot of traveling salesmen to be pestered by watchmakers and other employes of their customers to find them better or more congenial positions. and many salesmen have often acted as a free employment agency purely out of kindness of heart without any gain to themselves. The letter of the Chicago dealer expresses clearly and concisely the employer's side of the argument. Our columns are open to those who will take it up from the standpoint of the employe, the traveler, or both, as we feel the best way to remedy these petty annoyances which come into our trade is by inviting the fullest discussion thereon and giving publicity to opinions to all sides of the question.

Do Not Associate or Deal with Smugglers.

THE editorials in the last two issues of this journal on the subject of diamond smuggling and the discussion which they have aroused in the trade have had a slightly beneficial effect in bringing to the surface for open consideration a matter that has not heretofore been considered or discussed in a way commensurate with its importance to the industry at large. The throwing of the limelight upon the subject has also resulted in a running to cover on the part of many of these trade "vermin" who feel they can only work in the dark or at least when their practices are ignored by the trade in general.

But neither this discussion nor the strenuous action of the Treasury Department on smuggling generally (which has put the fear of the law into the minds of many evildoers) will have a lasting effect. The small dealers who have made a practice and business of smuggling for years, even if they stop temporarily, will soon continue their practices, and the larger firms who have systematized their methods for bringing in gems without the formality of declaring them at the customs house, have too much at stake and will not abolish their system until they see that exposure, prosecution and conviction is inevitable. For this reason it behooves all honest men in the jewelry trade to continue their interest in the subject and to aid in every way both the Government officers and those in the trade who may take steps to put an end to these practices.

The toleration which has been given by some reputable houses to the smuggler and his practices has grown up from long familiarity with the conditions, and not from a thorough lack of moral conscience. As a poet says of vice, "But seen too oft, familiar with her face, we first endure, then pity, then embrace." Some of our merchants

Have a well defined purpose in advertising, and write your copy and conduct your campaign accordingly. Shoot at the mark, not all around it.

have become so familiar with smuggling that they have passed the endurance stage and reached almost the pitying stage. Let the moral conscience of the trade awake before the last stage is reached. That it will awake we have no doubt, just as soon as the importers and dealers realize that the diamond smuggler is not a "trickster" or a man playing a game with the Government, but a thief and a criminal, and that he who consorts or in any way associates or deals with the smuggler shows the same moral obliquity as, and deserves no more respect than is accorded to the man who deals or associates with any other kind of crooks.

LETTERS TO THE EDITOR.

A Chicago Jeweler's Complaint.

CHICAGO, Oct. 18, 1909.

Editor THE JEWELERS' CIRCULAR-WEEKLY: During the last four years I have lost the services of two good watchmakers and traced the cause of their leaving directly to the influence of some salesman who secured their services for some other customer of his.

Both of these men were perfectly satisfied with the position they held with me. The first man, in fact, was willing to come back at the end of a week; the second man has just left and I haven't had a chance to find out whether or not he is satisfied with the change. But the confidential talk by the salesman of what a "snap" the other job would be, a hint of possibly a little more pay in the future, did the trick.

It is deplorable that we have among the traveling fraternity a few such men, who have both hands out for your business and when your back is turned resort to such a small, underhand trick as to persuade your help to take a position with another customer of theirs, presumably to try and make themselves solid with that customer, by securing competent help for them and depending on the reticence of the employer to keep their small methods from coming to light.

I have said a few such men—for happily there are only a few—for the majority of salesmen I know and have met, and who call upon me are square, honest, good fellows, who would no more think of stooping to such small trickery as I have just mentioned than they would of looting your show case. They are men worthy of your confidence and realize what is best for you is best for them; they confine themselves strictly to business when they call upon you, do not take up any more of your time than is necessary and do not take up any of your watchmaker's time, which is always valuable to you.

The above coat will fit two salesmen whom

I know, and neither will ever sell me any more goods or be allowed to enter my store if I know it, and I believe that among the retail jewelry trade there are other men who have had the same experience that I have had—more so in large cities, like Chicago, where salesmen call upon jewelers often

Yours,
J. A. A.

Canada Notes.

Lamontagne & Chamberland, Quebec City, have dissolved partnership.

E. R. Jackson, Ottawa, Ont., has taken a partner, the firm style being Jackson & Nelson.

George E. Snider, Deseronto, Ont., is moving to Vancouver, B. C., where he will open a jewelry store.

On Monday, Oct. 11, D. A. Rees, Brandon, Man., was married at Port Hope, Ont., to Miss Mary McKelvie.

W. E. Hayes has succeeded to the wholesale and retail business of Alfred Eaves, 101 Notre Dame St., W., Montreal.

Riddell & Vinet, Wellington St., Port St. Charles, have given a handsome silver cup for competition in a great road race.

Narcisse J. E. Beaudry, of Narcisse Beaudry & Fils, 287 St. Catherine St. E., Montreal, has returned home after a brief holiday.

Out-of-town jewelers calling on the Toronto, Ont., trade, last week, included J. S. Gill and A. H. Beath, Sudbury, Ont., and T. C. Watson, Newmarket, Ont.

M. R. Friend, of the jewelry department and W. Younie, of the photo frames department, of Ryrie Bros., Toronto, Ont., are in New York making purchases.

Albert Kleiser, manufacturing jeweler of Toronto, Ont., has purchased the Mackenzie building, 29-33 Melinda St., in that city, with a frontage of 53 feet, for \$90,000.

Among the most recent out-of-town callers in Montreal were: Mr. Stow, W. H. Wilmer & Co.; Irving R. Lederer, his recall in Montreal since his recent trip to Europe, and Mr. Ripley, of the Standard Button Co.

Harry Dewsbury and Fred Parish, convicted of stealing jewelry valued at \$25 from the store of Christopher Dawson, Toronto, Ont., were sentenced on Monday Oct. 18. Dewsbury, who is an old offender, was sent to jail for six months and Parish for 60 days.

The silver instrument which was used Thursday afternoon to enable King Edward to open the Tuberculosis Hospital at Beaumont Park, at Montreal, by direct cable communication from England, and which was described in a previous note as having been made by Henry Birks & Sons Ltd., will be presented to His Majesty, which has signified his willingness to accept the gift as a memento of what is a unique event.

The Montreal business house of William Eaves is celebrating its jubilee this year just two years after the death of William Eaves, who commenced work as a manufacturing jeweler on St. Francois Xavier St. 50 years ago this month. Through Mr. Eaves' business enterprise his trade grew and prospered with the passing of years and it is now being continued with success by his son William, who as a jeweler has proved himself worthy of his father's name.

TRADE

MARK,

ALL GOLD JEWELRY

bearing the above trade-mark is vouched for by the manufacturers. It is an unequivocal guarantee that every article bearing it is of the Karat standard, complying in all and every respect with the various stamping laws enacted throughout the country. You can represent it to your customers as we represent it to you with the guaranteed assurance that it is one of the best and most artistic lines offered the discriminating trade of to-day.

H. A. KIRBY

Manufacturers of Gold Jewelry
PROVIDENCE and NEW YORK

New York Notes.

Harold C. Brooks, Norwich, N. Y., has accepted a position with Tiffany & Co. as an engraver.

Ralph Hossie returned, last week, from western trip for the Mason & Howard Co., 180 Broadway.

Wm. Heeren, of Heeren Bros & Co., Pittsburg, Pa., sailed recently from this city on the *Cleveland* for a trip around the world.

Owing to the illness of S. Reyman, who formerly conducted a jewelry store at 48 W. 1st St., Mount Vernon, N. Y., the business has been discontinued.

Wm. T. Irvine, La Crosse, Wis., one of the oldest subscribers of THE JEWELERS' CIRCULAR-WEEKLY, was a visitor in this city, last week, and called at these offices.

The first meeting of the creditors of the American Specialty Co. will be held Nov. 10, at 10:30 A.M., at the offices of Nathaniel

Prentiss, referee in bankruptcy, 120 Broadway, for the purpose of appointing trustee.

So far as can be learned no light has been thrown on the mysterious robbery of jewels from the Fifth Ave. store of Tiffany

Co., as reported in the last issue of this journal. It is reported that the gems were the property of a wealthy family, which is co-operating with the firm in an attempt to recover them.

Invitations are out for the marriage of Lucie Crippen, daughter of Mr. and Mrs. Edwin Reid Crippen, to Fitz Randolph Dunn, Tuesday evening, Nov. 9, at eight o'clock. The ceremony will be performed at Christ Episcopal Church, East Orange, N. J. Mr. Crippen is manager of the New York office of the Philadelphia Watch Case Co.

Charles Flood, a watchmaker employed in a Manhattan concern, did not go to work one morning recently. A messenger was sent to his home, at 402 Hicks St., Brooklyn, to see if there was anything the matter with the old man. When the door was opened he was found lying on the bed, dead. It is supposed that death was due to natural causes.

Importers of foreign watches in the Maiden Lane district were seen last week in an attempt to get some trace of the woman murdered in the Islip woods, Long Island. The importers were shown copies of markings on the watch which was found near the skeleton, but they were unable to throw any light as to where the watch might possibly have come from.

The New York *Handels-Zeitung* in its issue of last Saturday quotes interviews by Henry Fera, of Fera & Kadison, and Ludwig Nissen, of Ludwig Nissen & Co., on the diamond situation. Both Mr. Fera and Mr. Nissen say that the diamond finds in German South Africa are of not enough importance to materially affect the diamond situation in any way.

Mendell T. Mackay, a young checker in a Broadway department store, who lives at 107 Lexington Ave., was held in \$2,000 bail, last week, by Magistrate Steinert in the Jefferson Market Court for the Grand Jury on his own confession. The police say that he had been stealing jewelry from the department in the store in which he

was employed. Mackay wore a diamond ring worth \$80 and a sapphire pin worth \$80 when he was arrested in his home.

The sale of fine jewelry, including diamonds, pearls and other precious stones, approximating in value \$1,000,000, was begun Monday at 505 Fifth Ave. The jewelry is a part of a lot recently acquired by Joseph Frankel's Sons from the firm of Gattle, Ettinger & Hammel, and the jewelry is being auctioned for those who acquired it from the Frankel concern.

Eleanor Loraine Beattie, who is alleged to have obtained a considerable quantity of jewelry from the Gorham Co. by representing herself as Mrs. Margaret B. Stearn, has inserted an advertisement in a New York newspaper seeking a position as chauffeur. Miss Beattie was arrested in London, recently, and brought back to this country, and is now out on bail awaiting trial.

Collector Loeb announced, last week, that he had been advised by United States Attorney Vreeland that G. I. Schnull, of Indianapolis, Ind., who arrived on the *Kaiserin Auguste Victoria*, Sept. 3, and was locked up in Hoboken for smuggling a brooch valued at \$500, had pleaded guilty to the indictment. A fine of \$200 was imposed. The brooch and case were found in his pocket.

M. L. Weinstein, a jeweler at Asbury Park, N. J., has formed a partnership with his brother-in-law, A. M. Glaser. The business will hereafter be conducted under the firm name of Weinstein & Co. Mr. Glaser, the junior partner in the concern, is an expert engraver and diamond setter, and during the last Summer was in charge of the Weinstein branch store in the Cooper block at Asbury Park.

Salem Elias, a dealer in religious goods and novelties, 60 Washington, St., against whom a petition in bankruptcy was filed on Oct. 9, has made an application to Judge Hand to dismiss the petition and vacate the order, appointing Hamilton Dow as receiver of the business. He denies that he is insolvent or that he has committed the acts of bankruptcy alleged in the petition. He claims that he has assets of \$25,000 in machinery, accounts, merchandise and real estate, and has liabilities of but \$10,000.

The Jewelers Security Alliance has received a notification from Vahlman & Jacobs, East St. Louis, Ill., to the effect that a window in their establishment was smashed Tuesday morning of last week between the hours of 1 and 3 A. M., and goods taken amounting to about \$300. The matter was reported to the Pinkerton detectives, who are making an investigation. Two men were arrested on suspicion, but have been allowed their liberty again because there was not enough evidence on which to hold them.

The Jewelers Security Alliance has received a report in regard to the recent robbery of the M. L. Roberts jewelry store at Pocatello, Idaho. The store was robbed of about \$10,000 worth of goods, mostly diamonds, and the robbery was committed at the noon hour, while Mr. Roberts was out at dinner and no one on duty. Included in the list of missing articles are 35 loose and mounted diamonds, 35 other rings and 15 gold chains, together with a gent's vest containing \$60 in money. It is the opinion of

the detectives that there were three or four men engaged in the robbery, and one man at least must have cut his hand, as blood was discovered on tools which were left in the building. A strong box in the safe was broken open and goods extracted from it.

The committee on lighting of the Fifth Ave. Association, composed of representative business men, met, last week, and adopted resolutions to the effect that Fifth Ave. should be put under the jurisdiction of the Park Department and that the city should make it the best illuminated highway in the country. Among the list of members of the committee appears the name of Wm. Sackett, of the Reed & Barton Co. The association plans to stop all loitering in Fifth Ave. and to do away with all electric flash signs.

Collector of Customs Loeb returned to this city, Friday, after a conference with Charles P. Montgomery, the chief of the Customs Division of the Treasury Department, Washington, D. C. It is understood that Mr. Loeb wants the form of the importer's bonds changed so that surety companies may be permitted to sign them through persons they may designate with powers of attorney. The present form requires signature in person, and the wording under consideration and likely to be adopted provides authority for power of attorney by bonding concerns.

The bulletin of the Merchants' Association of New York for the month of October has been issued, and takes up a number of interesting matters, among which are the form of the city's accounting system, the injunction suit against the Aqueduct Commission, the action against express companies, water storage in the Adirondacks and the regulation of public tax. The bulletin also publishes a list of the names of the honorary commercial commissioners and trade experts from Japan who were visitors in this city, last week, and were entertained by the Merchants' Association while here.

A meeting of the creditors of George H. Carpenter, fire extinguisher manufacturer, formerly at 17 E. 32d St., and Maurice C. Dreshfield, diamond broker, who formerly had an office at 170 Broadway, who were connected in transactions by which they obtained from Rudolph A. Breidenbach \$180,000 worth of diamonds, in 1907, under conditions which did not meet with Mr. Breidenbach's approval, was held, Thursday, at the offices of Peter B. Olney, 68 William St., for the purpose of proving claims and electing a trustee. Both of the bankrupts were present, but were not examined. Mr. Breidenbach was not present in person, but his attorney filed his claim against both parties for \$132,732. Other claims, aggregating about \$30,000, were also filed. William Lesser, receiver for both bankrupts, said at the meeting that after 19 months of litigation he had collected \$500 from the assets, and part of this was claimed by others. There may be about \$2,000 realized from the sale of Mr. Dreshfield's home, in Hackensack, N. J., which is in the hands of an ancillary receiver in New Jersey. At the suggestion of the referee, separate trustees were elected on account of complicated interests between Carpenter and Dreshfield. William Lesser

New York Notes.

(Continued from page 85.)

was elected trustee for Dreshfield, under a bond of \$2,500, and Morris Cohen for Carpenter, with a bond of \$1,000.

The firm of J. & Badian Warshawsky, 218 E. Houston St., has been succeeded by J. Warshawsky.

A prominent Fifth Ave. jeweler has had, during the past week, a fine display of amethyst jewelry on exhibition.

Simon Frankel, of Joseph Frankel's Sons, 578 Fifth Ave., returned, yesterday, from a short stay in Europe.

Earl R. Sheppard, manufacturers' agent, who was formerly located at 51 Maiden Lane, has opened display rooms at 9 Maiden Lane.

The creditors of the L. Wit-enhausen Co., 7 Maiden Lane, have signed an agreement releasing the committee formerly in charge of the business.

The Keppler & Haas Co., 201 E. 16th St., is going to give up the manufacture of shoes, and about Jan. 1 will move to 20 John St. and engage in the manufacture of jewelry and castings.

C. N. Grey, of the Jewelers' Board of Trade, made a business trip to Dennison, O., last week, in connection with the C. L. Taylor matter, in which a petition in bankruptcy has been filed.

Judge Hand, in the United States District Court, on Monday, granted a discharge in bankruptcy to Harry H. King, formerly of Silverman, King & Co., 18 E. 14th St. The liabilities are \$5,667.

Charles P. Ward, 23 Main St., Yonkers, N. Y., who began business in 1868, writes that he has received THE JEWELERS' CIRCULAR-WEEKLY from the first issue, No. 1, Vol. I., down to the present time, without missing a copy.

M. DeSimone, of F. DeSimone, Son & Co., 71 Nassau St., will be in Chicago from the latter part of October to Nov. 10, and will make his headquarters at the Majestic Hotel, Quincy St. He will then make a business trip to the Pacific Coast.

Frederick Baker, a silversmith, of 305 E. 42d St., was found lying in the woods on Strong's farm, in Corona, L. I., Sunday, by boys. He had lain there since Saturday morning, and was exhausted from cold and exposure. He said he had been in ill health and he didn't know how he got on the farm. His condition is critical.

Joseph Lassner, diamond dealer, at 21 Maiden Lane, is the Republican, Fusion and Civic Alliance candidate for Assemblyman from the 16th District, Borough of Manhattan. Mr. Lassner began his career in the trade as an office boy with a firm of diamond dealers in Maiden Lane. He received his education in a grammar school in the 16th District and has lived in the District 34 years.

Special Customs Inspector Timothy Donohue, while on the pier of the Hamburg-American line, Monday morning, after the arrival of the *Cincinnati*, noted a tall man who aroused his suspicion. He approached the man, who said he was a Spaniard, and commented on the vest he was wearing. Later a search revealed several rows of pockets filled with jewelry, including rings,

brooches, stick pins, necklaces and other pieces. The jewelry was seized and taken to the Appraisers' Stores.

W. E. Smith, of the L. E. Waterman Co., 173 Broadway, has announced his intention of presenting the Stationers' Bowling League with a set of five medals, to be added to the trophies already donated for prizes, which the organization will award to the winning teams at the end of the season. The L. E. Waterman Co. team holds sixth place in the league at present, with three games won and three lost, while the Aikin-Lambert Co. team is eighth in the list, with two games won and four lost.

Notice is given to creditors of the bankrupt firm of Lindo Bros. that William Allen, referee in bankruptcy, has declared a final dividend of the above estate of 113 per cent. upon the claims proved and allowed. Creditors, on application at the office of Albert H. Gleason, trustee in bankruptcy, 258 Broadway, on or after Nov. 1, between the hours of 10 A.M. and 3 P.M., may receive a warrant for the final dividend due them. Lindo Bros. filed a petition in bankruptcy some time ago, showing liabilities of \$59,438 and assets of \$15,440. According to the schedule, this included life insurance policies for \$20,000, which are enumerated twice under separate heads.

Among the out-of-town visitors in this city, during the past week, were: Chas. H. King and George L. Paine, of the George L. Paine Co., North Attleboro, Mass.; Henry H. Curtis, North Attleboro, Mass.; Levi Levy, Syracuse, N. Y.; Mr. Loeb, of Loveman, Joseph & Loeb, Birmingham, Ala.; Dr. E. E. Hale, of the Estate of O. M. Draper, North Attleboro, Mass.; George Johnson, owner of a number of retail stores in Massachusetts; Frank L. Nuse, Titusville, Pa.; Geo. A. Clark, of the Geo. A. Clark Co., Lorain, O.; M. F. Tainor, Easthampton, Mass.; H. T. Jerecki, Erie, Pa.; F. T. Jeannot, Youngstown, O.; D. A. Kaufman, Clarion, Pa., and H. J. Homrick, Huntington, W. Va.

The Treasury Department has recently issued a statement covering in brief the conditions attending the termination of reciprocal commercial agreements made under Section 3, Act of July, 1897. The government of France was notified that the commercial agreement of May 28, 1898, the amendatory and additional agreement of Aug. 20, 1902, and the additional commercial agreement of Jan. 28, 1908, would be terminated at the expiration of six months dating from April 30, 1909; namely, on Oct. 31, 1909. The government of Switzerland was notified that the proclamation issued by the President on Jan. 1, 1906, would be abrogated at the expiration of six months dating from April 30, 1909; namely, on Oct. 31, 1909.

Consignments of foreign-made clocks which are not marked in conformity with the new tariff act were held up by the customs authorities in this city, last week. The clocks are of a number of different varieties and range in price from cheaply made clocks having a foreign value of about 15 cents to more expensive clocks, some of which are invoiced as high as 85 marks. Some of the clocks have decorated china cases and others are of the hall clock variety. Some

of the clocks seen last week had no markings either on the dials or movements, but were labeled with a paper paster which read, "Made in Germany." The new tariff provides that clock dials of foreign manufacture, whether attached to movements or not, shall have indelibly painted or printed thereon the country of origin.

News Gleanings.

J. A. Robinson, Whitefish, Mont., sold out to S. S. Stacey, Minot, N. Dak., a short time ago.

F. J. Cross, Cambria, Wis., is closing out his present stock of goods in order to make room for an extended line of holiday goods which he has ordered.

Damage amounting to about \$10,000 was done by fire, recently, to the stock of W. O. Williams, Winfield, La. The jeweler's loss is fully covered by insurance.

The trunks of J. W. Williams, a salesman for Merrill & Broer Co., Toledo, O., were hit by an eastbound train of the Grand Trunk Railroad in Charlotte, Mich., recently.

It was reported from Elkton, Ky., that W. H. Ebling, a silversmith and photographer, of that city, had died, Oct. 14, of paralysis, aged 67 years. He had been ill for over a year, and is survived by his widow.

Kendrick & Davis, Lebanon, N. H., are now an incorporated company, and the business will henceforth be known as the Kendrick & Davis Co. This change gives the company increased capital and manufacturing facilities.

Jewelers of Darlington, Wis., have been interested in a rather unique ring owned by Thomas Benston, of that city. The ring is set with a gold quarter-dollar of 1863. The coin is about one-fourth of an inch in diameter and makes an excellent setting.

John E. Daley, formerly engaged in the jewelry business in New Orleans, and his wife were seriously burned at Ponchatoula, La., recently. Mrs. Daley's dress caught fire, and before her husband could extinguish the blaze she received serious injuries, and he was badly burned about the hands. Both were brought to New Orleans for treatment.

The Julius King Optical Co., New York, received a telegram, Friday, announcing the death of Lyon Prinstein, an optician at Scranton, Pa. He died at 3.30 A. M. on that morning. Mr. Prinstein was about 31 years old. He started in business originally at Syracuse, N. Y., with a partner under the style of the New York Optical Co. He discontinued there in 1905 and moved to Scranton, Pa., where he opened a store. In April, 1908, he opened a branch at Wilkes-Barre, Pa.

An application has been made to Judge Rowe at Oswego, N. Y., for an order directing George A. and Pauline Schilling to show cause why a receiver should not be appointed for their stock of jewelry. The application grows out of supplementary proceedings instituted against the Schillings under a judgment for \$250 in favor of F. E. Cullen, a lawyer, the amount of a note made by Frank Lagoe, to Mr. Cullen and indorsed by the Schillings. Under a stipulation the application was adjourned.

Providence.

John Kelso was a recent visitor in Boston.

Albert E. Jeaneret, Westerly, is reported out of business.

The Pier Jewelry Co., at Narragansett Pier, has gone out of business.

Ralph G. Ostby, with the Ostby & Barton Co., is enjoying a hunting trip in northern Maine.

E. N. Cook has gone to Maine on a vacation trip, which he will spend in hunting large game.

A representative of the Smith, Patterson Co., of Boston, visited the trade in this city the past week.

William J. Brewer has severed his connection with Young Bros., jewelers' boxes, cards and printing.

Asa Richmond has just returned from a successful trip to the Pacific Coast in the interests of Zare White.

George H. Grant has been on a fishing and hunting trip at Lake Farm, Exeter, R. I., during the past week.

The Gorham Mfg. Co. has declared its regular dividend of 2½ per cent. on its common stock, payable Nov. 10.

The Silversmiths' Co. has declared its regular quarterly dividend of one per cent. on its common stock, payable Nov. 15.

Eugene Wetherill Blaikie, of this city, was recently married to Miss Grace Brewer, at the bride's home, Hyde Park, Mass.

William H. Hope has given a mortgage for \$6,500 to Burrows & Kenyon, Inc., on a lot of land on the west side of Vineyard St.

Mr. and Mrs. Albert E. Stevens have returned from a 10 days' trip through Canada and to Niagara Falls, Albany and New York.

The Art Metal Co., 80 Clifford St., has been making extensive alterations and improvements in the interior arrangement of its office.

James P. Sullivan, with the Ostby & Barton Co., was defeated for candidacy for reelection as Councilman from the Fifth Ward, last week.

Harry Cutler and Charles A. Russell were elected directors of the Providence Society for Organizing Charities at the annual meeting on Monday evening.

James R. Stone has just got back from the Pacific Coast, where he has been on his first trip with the White Stone Jewelry Co.'s line. He met with good success.

Miss Clementine E. Castiglioni, daughter of Rinaldo C. Castiglioni, of the Castiglioni Co., was married on Wednesday last at the Eloise to Antonio A. Capatosto, of this city.

Carpenter & Wood, who recently removed from 38 Friendship St. to 14 Calender St., are now settled in their new quarters, which are nearly double the capacity of the former ones.

John O'Neil and George Block have started in the manufacturing jewelry business at 54 Page St. They will make a line of white stone goods and sterling silver novelties.

Joseph Doran is sending home some very good orders to James C. Doran & Sons from the western circuit. He is showing a new line of button findings and cuff pin specialties.

A mortgage of \$1,000 on two lots of land and improvements on Bishop St., belonging to William C. Greene *et ux*, has been discharged by the executor of the estate of Sophia A. Brown.

Permits have been issued by the Inspector of Buildings to the Brown & Sharpe Mfg. Co. to add one story in brick to an old building on Holden St. and to construct a steel building to be used for storage.

Frank T. Pearce was elected Grand Warder of the Grand Commandery of Massachusetts and Rhode Island of Knights Templar at the 104th annual conclave, held in Masonic Temple, Boston, Wednesday night.

The annual meeting of the corporation of the New England Manufacturing Jewelers' & Silversmiths' Association will be held in Masonic Temple on Saturday evening next, when officers for the ensuing year will be elected.

Harry Cutler and George H. Holmes, who are candidates for re-election to the General Assembly, have been much sought as speakers at rallies of the Republican party, recently. They are slated for every night this week.

Marsden J. Perry, of this city, has sold his collection of antique China porcelain to J. Pierpont Morgan, of New York for a sum estimated at between \$500,000 and \$600,000. The collection consisted of about 300 perfect pieces.

James C. Doran & Sons have given a mortgage for \$50,000 to the Providence Institution for Savings on two lots with improvements at the corner of Chestnut and Elbow St., and lot with improvements on the south side of Ship St.

Mayor Henry Fletcher was a guest and speaker at the 74th dinner of the Churchmen's Club on Monday evening. Among those present were: Edward L. Milchahey, Frederick R. Martin, John Kelso, Frederick A. Otis and E. H. Shepard.

Thursday evening the fire department responded to a still alarm at 227 Eddy St. The firemen found a gaslight flickering in the jewelry shop of Henry Lederer on the third floor, which, being fanned by the wind, looked like a fire from the street.

The case of Max Wellard against the Universal Die Sinking Co. was heard before Judge Gorham in the civil session of the Sixth District Court, Wednesday. This is an action for trover, and decision was given for the plaintiff for \$10 and costs.

Three more new members from the Providence territory were admitted to the Jewelers Board of Trade at the last regular meeting of the directors. This makes a total of 10 new members admitted at the Providence office in the last two months.

The case of George C. Darling, trustee, against George Otto, on book account, was called before Judge Wright in the Sixth District Court, Wednesday, and decision entered for the plaintiff for \$21.50 and costs, the defendant failing to put in an appearance.

A lease was recorded at the City Hall on Saturday from the Fletcher Land Co. to George L. Smith, of the Narragansett Hotel. The lease is for 10 years, subject to a renewal for five years, after which a new agreement is to be made. The rent is \$50,000 per annum, payable in advance.

A surprise was given Mr. and Mrs. Ernest W. Lakey last Monday evening at their home on Wendell St. in recognition of their 10th wedding anniversary. The evening was spent at whist and the host and hostess received a variety of gifts in tin and flowers. Mr. Lakey is with the B. A. Ballou Co., Inc.

Maurice J. Karpeles, of Martin, Low & Taussig, of this city, has recently returned from a several months' trip through Europe on business and pleasure. During his absence he visited the important jewelry centers of the old world, including Paris, Vienna, Berlin, Gablonz, Idar, Pforzheim and others.

An attempt was made last Thursday night to rob the jewelry and watchmaking store of George P. Tyler, 211 Main St., Pawtucket, and although an entrance was effected through a side window it is probable that the robber was frightened away as there was nothing missing when Mr. Tyler opened the store in the morning.

Among the foreign importations received through the Providence Customs House the past week were the following: From Bremen, five packages of imitation precious stones; from Hamburg, one package imitation pearls; from Havre, one package of jewelry and one of copper stampings; from Liverpool, three packages of manufactures of metals; from Southampton, one package of imitation pearls.

Burglars broke into the house of Harry Fulford, of the Fulford & Hobart Co., at 67 Columbia Ave., Edgewood, Thursday evening, and escaped with \$500 worth of diamonds and jewelry. The list of articles stolen includes a diamond ring set with a large stone; a ruby ring, a brooch, a diamond ring set with two stones, gold chain, gold bracelet, gold clover leaf brooch and a number of gold pins.

Frederick A. Rabe, a silversmith, was found dead in his bed at the home of his brother-in-law, William May, 26 Appleton St., Pawtucket, one morning the past week. Medical Examiner French was called and said death was due to heart disease. Mr. Rabe was but 36 years old, but had been employed by the Gorham Mfg. Co. for 17 years. His father died at the same address about six months ago. He leaves two little girls.

Among the buyers who paid the trade of this city a business call during the past week were the following: Louis Kaess, of the Tanner Souvenir Co., New York; Miss Henrietta Graf, of Berg Bros., New York; W. M. Bonn, of M. Bonn & Co., Pittsburg, Pa.; David Michaels, of the 14th Street Store, New York; M. L. Schwab, of Gubman, Soloman & Co., New York; Herman Pichel, of Samstag & Hilder Bros., of New York.

Harry Goode, brother-in-law of Mayor Henry Fletcher and connected with the Bassett Jewelry Co., 101 Sabin St., dropped dead at the corner of Sabin and Calender Sts. as he was on his way to the shop early Thursday morning. When he fell he struck his head on the curbing, inflicting a deep gash. Medical Examiner Griffin said that death was due to natural causes. Mr. Goode was born in England and was about 60 years of age. He came to the United States nearly 30 years ago and had made

his home in this city most of that time. He was a jeweler by trade and had been associated in responsible positions at various times with several concerns in this city. For many years he was connected with William F. Smith & Co., but lately he has been with the Bassett Jewelry Co. He is survived by his widow and three stepchildren.

A deed transferring to the Nicholson File Co., two parcels of land on Valley St., was filed at the City Hall the past week. The land consists of a parcel containing 12,217 square feet on the southeast corner of Rathbone and Valley Sts. and four lots containing 8,998 square feet on Valley St. An official of the company stated that the land had been acquired because of its proximity to other land which the company owns, and that it is not the intention of the management to use it for any particular purpose, at least for the present.

The Gorham Mfg. Co. has just completed a handsome trophy to be shot for annually by the six independent chartered military companies of this State. The bronze shield is 22 inches high, surmounted by the State seal, surrounded by laurel leaves. Beneath the inscription are two crossed rifles resting on a target. The body of the shield is handsomely chased in scroll and flowers, emblematic of love and peace, while below are nine discs for the names of the winning teams, to consist of five men and two substitute members from each organization.

Martin Low & Taussig, of this city, importers of precious stones, entered suit in the Superior Court here on Wednesday against William Feintuch & Co., manufacturing jewelers, 234 Chestnut St. and against William Feintuch, individually. The plaintiffs claim \$922.00, due to them from the defendants for goods sold and delivered. Damages were placed at \$1,400. The premises and property of the firm was attached on Sept. 25. This attachment is subject to three prior attachments aggregating \$1,000.

The trustee in bankruptcy of the United Brush Co., Pawtucket, received leave to sell the property at private sale, after a hearing by Referee in Bankruptcy Nathan W. Littlefield, Wednesday. Objections were made by Edward C. Stiness in behalf of certain creditors, while Jerome J. Hahn appeared for other creditors and for parties offering to purchase. Mr. Stiness also strongly objected to the further operation of the plant by the trustee, A. C. Matteson, unless the money put into the business and the profits were returned to the assets. Mr. Matteson and Mr. Hahn declared that the keeping of the plant in operation had increased the value of it, and made the proposed sale possible. Mr. Stiness later withdrew his objections to the private sale as proposed.

North Attleboro.

S. Mandalian returned, last week, from a western trip.

George L. Paine and Clarence King were in New York, last week.

Charles Peckham, J. H. Peckham & Co., returned, last week, from the west.

G. Herbert French has returned from a short visit to his office in New York.

Frank P. Kennedy returned to New York, last week, after a brief stay in town.

A. B. Chace returned Friday evening

from a trip in the interests of Boss & Baldwin.

Joseph Bagnall was in New York, last week, in the interests of the Doran & Bagnall Co.

The Winter Tap & Die Co., Wrentham, has enlarged its plant by the taking of an extra floor.

Bert. Noble, western representative for Sturtevant & Whiting, is confined to his home in Providence by illness.

The Plainville Stock Co. and the Whiting & Davis Co. are running their factories overtime in order to fill orders.

Percy Ball, designer for the F. M. Whiting Co., will have charge of the designing class at the public evening schools this year.

Mrs. Julia Bell, the mother of William H. Bell, of W. H. Bell & Co., died, last week, at her home on Commonwealth Ave. Mr. Bell has the sympathy of his many friends in jewelry circles.

A package of silver tubing addressed to the Whiting & Davis Co. and shipped by an Attleboro firm, was picked up on Church St., last week, by Edward Crossley, who was driving along in a team. It had in some manner fallen out of an express wagon without the driver noticing it. It was returned to the owners by Mr. Crossley.

Attleboro.

R. J. Wilson is making a western trip in the interests of the Jas. E. Blake Co.

Swan & Patterson is the name of a new electroplating firm at 30 Railroad Ave.

The Austin & Stone bowling team are the leaders in the shop bowling league.

Frank W. Weaver has been elected treasurer of Ezekiel Bates Lodge of Masons.

The Freeman & Daughady Co. has installed a 50-horse-power engine in its plant at Chartley.

Letters are held at the post-office for the Attleboro Jewelry Co. and American Comb & Novelty Co.

The W. H. Saart Co. has donated a number of silver mesh bags to the Red Men of North Attleboro for their fair.

Ernest D. Gilmore was a member of the committee in charge of the degree work of the Orient Lodge I. O. O. F., last week.

The Y. M. C. A. school opened last Tuesday evening with a large class in mechanical drawing and jewelry designing.

The grounds around the new Leach & Garner Co. factory are being graded, and when finished will present a beautiful appearance.

L. E. Fay, representing the R. F. Simmons Co. in Chicago, was one of those who bid J. L. Sweet adieu on his trip around the world, which started from New York, last week.

Sidney O. Bigney presided over an important meeting of the Board of Trade last Monday. James J. Storrow, Boston, pleaded for the establishment of industrial schools, declaring that they were necessary if America was to keep ahead of Germany. Mr. Storrow was formerly chairman of the Boston School Board.

The Bristol County Realty Co., which is headed by Mayor Coughlin, of Fall River, and Simon Swig, of Taunton, had a representative in town, last week, trying to in-

duce some of the manufacturers to move to Taunton. The company holds out factory inducements. It is not believed, however, that the mission will be successful.

The School Committee of the town is considering the matter of opening a manual training school in which the pupils may become more familiar with the town's chief industry, the manufacturing of jewelry. The proposition is favored by many manufacturers, who believe that a step of this kind is absolutely a necessity to safeguard the future of the industry.

Connecticut.

Wm. K. Sessions, Bristol, and Miss Marjorie A. Goodenough, will be united in marriage, this evening, Oct. 27.

John B. Kirby, of Samuel H. Kirby & Sons, New Haven, was a delegate to the annual meeting of the Connecticut Business Men's Association, held in Waterbury, last Thursday, Oct. 21.

A. Moreau, 56 years of age, for some time in the employ of the Wm. Rogers Mfg. Co., Meriden, died at his home on Spring St., Wednesday morning, after a week's illness, of pneumonia.

A great deal of interest has been attracted to the show-window in the store of H. H. Jackson, Bridgeport, by the display of rock crystals which were brought home recently, by Commodore Robert E. Peary from the farthest land north.

Augustus Morse, who, several years ago, was employed by the Seth Thomas Clock Co., in Thomaston, where he resided all his life, died at his home there, on Tuesday night, of last week, aged 81 years. Death was caused by Bright's disease.

Wm. H. Ellis, formerly in the employ of the New Haven Clock Co., New Haven, was buried recently, from his late home, 19 Green St., New Haven. Among the floral tributes was a large wreath from the novelty department of the New Haven Clock Co.

A number of distinguished visitors from Japan who are visiting this country in order to study industrial conditions, were shown through the New Haven Clock Co.'s factory, about a week ago. The visitors were presented with watches bearing the date of the visit.

Pearce N. Welsh, Jr., son of P. N. Welsh, president of the First National Bank, New Haven, and director of the New Haven Clock Co., sailed for Germany, on Saturday, from New York. He will go to Berlin to join his parents and sister. Mr. Welsh, Sr., has been ill in Berlin for some time, but is now reported improving.

Julius H. Pratt, at one time a well known resident of Meriden, died recently in Montclair, N. J. Mr. Pratt, for several years, was associated in business with his father, Julius Pratt, manufacturing ivory goods. He graduated from Yale in 1842. Mr. Pratt possessed the distinction of being the man who gave the town of Montclair its name.

Walter S. Riddle, Guymon, Okla., has sold out his business to J. C. McConnell. Mr. McConnell, who conducted a store at Stratford, Tex., has closed out, and will hereafter be located at Guymon.

CHICAGO.

VOL. LIX.

CHICAGO, WEDNESDAY, OCTOBER 27, 1909.

No. 13.

Chicago Notes.

L. Usselman, retail jeweler at 3150 S. State St., has added an optical room to his store and otherwise improved his establishment.

Under the style of Robinson, the Plater, a corporation of this city, has been formed to manufacture, finish and refinish all kinds of metal goods and metalware. The capital is \$25,000, and the incorporators are I. E. Robinson, S. J. Lumbard and H. W. Kuetmeyer, Chicago.

Under the will of Julius S. Manasse, who committed suicide on Chicago three weeks ago, the Mt. Sinai Hospital, of Milwaukee, is a beneficiary. The hospital will receive the proceeds of a life insurance policy, the amount not being named. The remainder of the estate is bequeathed to two brothers and a sister in Chicago, excepting small bequests to friends.

Henry C. Scott, salesman at Spaulding & Co., was notified, last week, of a bequest of \$1,000 made to him in the will of an uncle, Carlos M. Morse, Plymouth, N. H. Morse's estate is estimated at \$250,000, and among others the following Illinois persons will receive portions: Mrs. Blockmore, Hamilton, Ill., \$1,000; Henry C. Scott, Chicago, \$1,000; Annie and Gertrude Scott, sisters of H. C. Scott, his piano.

The fire in the home of G. Frangiamore, retail jeweler at 520 Oak St., is attributed to the work of the "Black Hand" society. Frangiamore, his wife and four children were unconscious from the effects of smoke when the firemen rescued them. Kerosene had been poured all over the premises. Frangiamore told the police he had been threatened with "Black Hand" letters demanding money, but had ignored them.

Francisco Sanz, claiming to be president of a mining company in New Mexico, was arrested in the store of the Bauman Loan Co., recently. Emil Schmidt, a salesman for the Bauman Loan Co., was showing a tray of diamond rings to Sanz when he noticed that Sanz, so he claims, dropped a ring with a plain white stone into the tray, taking instead a diamond ring valued at \$250 and concealing it in his hand. Mr. Schmidt at once detected the substitution and caught Sanz and wrenched the ring from him. A policeman was summoned and the arrest followed.

Tom O'Neil was arrested here, last week, charged by Emil Noel, diamond dealer in

the Heyworth building, with larceny by bailee. On Sept. 14 O'Neil received from Mr. Noel a diamond brooch, valued at \$78, claiming he wanted to show it to a customer. Repeated efforts on the part of Mr. Noel failed to elicit any information from O'Neil regarding the brooch, and the latter's arrest followed. His bail was fixed at \$750, and having no bondsman he was locked up in the Harrison St. station. He acknowledged he had pawned the brooch with L. B. McKenny, a theater ticket seller, in the Masonic Temple.

The following were some of the out-of-town buyers here during the past week: Herbert E. Blasier, Williamsburg, Ia.; George R. Evans, Kendall, Wis.; E. S. Hilton, New Glarus, Wis.; Wm. Chapman, Benton Harbor, Mich.; Maurer Bros., Battle Creek, Mich.; Gose & Yost, Shelbyville, Mo.; Erwin Homrighous & Son, Shelbyville, Ill.; Fred Overstreet, Paxton, Ill.; Walter C. Davies, Elkhart, Ind.; J. C. Klahlolt, Springfield, Ill.; Thos. A. Brown, Quincy, Ill.; G. J. Johnson, Paxton, Ill.; M. Blumenstock, Ludington, Mich.; Mrs. William A. Hamlin, Beloit, Wis.; F. Meluish, Ottawa, Kans., and Emerick, Barrett & Co., Freeport, Ill.

A. Newman, one of the principal stockholders in the Newman Clock Co., 1526 Wabash Ave., this city, and 178 Fulton St., New York, recently filed a bill for receiver for the business in the Superior Court of this county. The petition was granted and the Chicago Title & Trust Co. was appointed. Chas. E. Renshaw, the other principal stockholder and manager of the New York branch, has asked that the receiver be discharged and the business continued as heretofore. He has had the matter transferred to the United States District Court. It does not appear that financial matters precipitated the trouble with the concern, but rather that it is due to a disagreement between Mr. Newman and Mr. Renshaw as to the policy to be pursued in the management of the business.

Noah W. Pyle, retail jeweler at 2618 Cottage Grove Ave., who was arrested over six months ago charged with receiving stolen jewelry, was tried in the Criminal Court, last week, with the result that the jury failed to agree on the value of the property. They found him guilty of receiving the property, but two jurors thought it worth less than \$15. Pyle was also accused of instructing youths to commit crime. Owen Conn and Edward Donsbyle,

young men who are awaiting trial for burglaries committed in Hyde Park, took the stand and testified that Pyle had urged them to commit robberies, the proceeds of which they had sold to Pyle. Pyle declares that jewelry found in his store and identified by several women as their own, had been in his store long before the robberies took place and was part of his stock in trade.

Frank P. Cheney, who as previously announced in THE JEWELERS' CIRCULAR-WEEKLY was recently apprehended at Pittsburg and brought back to Chicago on a charge of having secured a valuable ring from Edw. Kirchberg, Jr., 76 State St., by means of a clever scheme, has been bound over to the grand jury. The trial will probably be in the first part of November. In the latter part of April of this year, it is claimed, Cheney entered Mr. Kirchberg's retail store and asked to see a ring. He finally decided upon a diamond ring, valued at \$200, asking Mr. Kirchberg to deliver it to his office in Washington St. at a certain hour the next day. When Mr. Kirchberg called at his office as requested he was asked by Mr. Cheney to see the ring and immediately wrote out a check for the amount. Stepping to a messenger call, he rang for a boy, explaining that he would have the check cashed and give Mr. Kirchberg the money. After handing the check to the messenger, he put the ring on his finger and was admiring it, when, suddenly, he exclaimed that it was necessary to give the boy additional instructions, and ran out the door to stop him. Of course, this was the trick to get away with the ring. It is stated by police authorities that Cheney has been in the toils of the police before now, and has served more than one term in the penitentiary.

A daring piece of shoplifting was practiced by three women on William L. Calkins, Waukesha, Wis., recently. The three women, a mother and two young daughters, residents of Dousman, Wis., entered the Calkins establishment and were shown some valuable rings. They did not buy anything and left the store. Mr. Calkins, while placing the jewelry back in the tray, missed three rings valued at \$34. Hurrying to the Northwestern depot, the jeweler found the women about to board a train. Confronted with the charge of theft, they gave up the stolen property.

Tyler-Davidson Fountain, Fountain Square, Cincinnati, O.

ACCURACY ACHIEVED

In 12-Size Watch

THE Rockford Watch Company is **now** in a position to proclaim the completion of their **12-Size Model**, which for accuracy in time registration is the nearest to perfection ever attained. The 12-Size Model of the famous

Rockford Watch

is made in 17, 21 and 23 jewels only. Each watch is cased, then timed at the factory, in twenty-five year gold filled and solid 14k. gold cases. Each watch is factory priced and **that price maintained**. Every grade watch in the 12-Size has double roller escapement. The equipment and finish in this wonderful time piece have never been equalled. We are proud to say to the retail dealer, we not only protect you from price cutters and unfair competition, but can now deliver a 12-Size Watch which will add to your reputation. As for quality, finish and accuracy it has never been equaled. Write for full particulars and prices.

ROCKFORD WATCH COMPANY

ROCKFORD, ILLINOIS

St. Louis.

W. E. Tower, of Tower & Long, is now traveling in Kansas.

John A. Herschede, of the Herschede Hall Clock Co., Cincinnati, O., is in the city.

Paul Naecke, for many years with the E. Maritz Jewelry Co., is now with the Erber Jewelry Co.

Jewelry houses were attractively decorated in honor of the visit, Monday, of President Taft.

Mr. Gottshaw, formerly with Simon Van Raalte & Co., is now with the Smith's Credit Jewelry Co.

J. J. Burke, president of the Brooks Jewelry & Optical Co., is back from a business trip to Chicago.

Sam Hotchner, of A. Hotchner & Son, will leave Monday on a trip through Illinois as far as Chicago.

Ralph Loewenstein, of the R. Loewenstein Jewelry Co., returned, Monday, from a trip through Missouri and Arkansas.

Edward Bornmueller, of the J. Bolland Jewelry Co., has gone to the Oasis Club, at King's Lake, to shoot ducks over Sunday.

Seven large silver cups for winners in the balloon endurance race of Centennial week were made by the Maschmeyer Richards Silver Co.

Edward Netzheimer, of the Maritz-Kober Jewelry Mfg. Co., has returned from a month's fishing trip to the Black River, in Arkansas.

J. Reed Elliott, president of the Elliott Jewelry Co., will return next week from New York, where he went by way of New Orleans.

Adolph Umbrecht, of the Brooks Jewelry & Optical Co., has left on a trip through Tennessee, Georgia and Alabama, to be gone three weeks.

C. L. Heyman, L. Bauman Jewelry Co., came in from a trip through Missouri and will leave Monday, for a trip through Iowa, to be gone a month.

John Fink, of Klein & Fink, Fort Smith, Ark., accompanied by his wife, stopped in St. Louis this week on their way back home from a trip to New York.

The L. Bauman Jewelry Co. has brought suit in Justice O'Halloran's court against W. A. Benson, on an account for \$86.33. The case is to be heard Oct. 29.

Herman Mauch returned, on Monday, from a week's hunting and fishing at the clubhouse of the Montezuma Club, on the Illinois River, of which he is president.

The St. Louis Clock & Silverware Co. has just issued its catalogue for 1910. It contains 400 pages and is the most complete and comprehensive ever issued by the firm.

Charles D. Rouse has discontinued his business at Kennett, Mo., after an unsuccessful nine months' trial. He turned over his stock to creditors. He is now in St. Louis.

The North St. Louis Savings Trust Co., in which Joseph and Louis Ebeling are interested, had a formal opening, Friday, in the Ebeling building at Grand Ave. and Herbert St.

Henry Burrell, of the Herman Mauch jewelry store, has gone to Hannibal, Mo., to attend an annual meeting of the

Missouri Grand Lodge, Knights of Pythias, to which he is a delegate.

R. O. Bolt, secretary of the Mermod, Jaccard & King Jewelry Co., has just returned from a two weeks' visit to his son, Dr. Richard Bolt, Cleveland, O. He will resume his duties at the store on Monday.

H. L. Fischaker, for the past seven months advertising manager of the Mermod, Jaccard & King Jewelry Co., has resigned, to take effect Saturday. He will start an advertising agency on his own account.

Mrs. Winton E. Barker, wife of the vice-president of the Hoyt Jewelry Co., was hostess on Monday evening of last week, at a dinner party at the Marquette Hotel, to the members of the English Pilgrim football team.

Mrs. S. H. Bauman, wife of the president of the Bauman-Massa Jewelry Co., is chairman of the committee that will have charge of the jewelry booth at the annual Jewish Charity Carnival, to be held Dec. 7 to 12, at the Coliseum.

Alterations are being made at the establishment of the Maritz-Kober Jewelry Mfg. Co., with a view to increased capacity. Samuel Kober, of this firm, left Tuesday on a trip of a month through the Southwest as far as the Gulf of Mexico.

W. Westphal, St. Charles, Mo., led the automobile parade, which was one of the features of the St. Charles Centennial celebration, last week. His automobile was beautifully decorated. A. J. Lee, of the Lec-Kehl Mfg. Co., spent the day in St. Charles and was the guest of Mr. Westphal.

Sam Hotchner, of A. Hotchner & Son, has filed suit in Justice Miles' court against I. Fischel for \$191.70, on a note given to Rabbi S. Suskind and discounted to Hotchner. Rabbi Suskind was a diamond merchant who disappeared from St. Louis several weeks ago and was reported to have gone to London.

H. C. Milligan, Centerville, Ia., was in St. Louis, during the week, purchasing a large stock from the St. Louis Clock & Silverware Co., and other houses for a jewelry and piano store he is preparing to open at Centerville. He has been in business at Osceola, Ia., but will dispose of the business Nov. 1.

Detective Joseph Byrne, who went to Montgomery City, Mo., to attempt to connect William R. Mueller, under arrest there, with several jewelry store robberies, has notified Chief of Detectives Smith that he is not the man wanted for the jewelry robberies. Mueller was understood to have pawned a large quantity of jewelry, but this appears to have been a mistake.

In the involuntary petition for adjudication in bankruptcy, filed against Ernst A. Niehaus, 2026 Franklin Ave., an adjudication on the creditors' petition has been ordered by the United States District Court and the matter has been referred to Walter E. Coles, referee in bankruptcy. The creditors asking the adjudication are the Eisenstadt Mfg. Co., the St. Louis Clock & Silverware Co., and Heintz Bros., Buffalo, N. Y.

Edmund Achard, a well-known retired jeweler, died Monday at his home, 2360 N. Newstead Ave., aged 72 years. The funeral

was held Wednesday. Interment was at Calvary cemetery. For eight or nine years, prior to 1892, Mr. Achard was a member of the Eisenstadt Mfg. Co. When he left that firm, in 1892, he formed the Western Jewelry Co., and later was a partner in the Heyman-Achard Jewelry Co. He retired several years ago.

A meeting of the Retail Jewelers' Association of St. Louis will be called for Wednesday or Thursday evening, of next week, by President Joseph Ebeling. Several important questions will be taken up, including the proposition broached at the Get-Together banquet of Centennial week, for the different business and civic organizations to work in better harmony. In furtherance of this object the Get-Together Committee of the Jewelers' Association, Joseph Ebeling and E. C. Zerweck, will be continued.

The Mermod, Jaccard & King Jewelry Co. is so intimately associated with the historical development of St. Louis that five pages are devoted to it in a book entitled "St. Louis' Historical and Interesting Places," written by Idress Head, librarian and curator of the Missouri Historical Society. The beginnings and progress of the firm are told as typical of the general business advancement that has taken place from early times to the present. The great contrast is shown between the little shop opened by Louis Jaccard in 1829 on Main St., between Pine and Chestnut Sts., and the great nine-story building now occupied by the firm at Broadway and Locust St.

George F. Lyman, of the Mermod, Jaccard & King Jewelry Co., won the prize of \$500 offered by the St. Louis Star for the best design for the Star's St. Louis cup, to be awarded on Christmas day to the St. Louisan who has rendered the greatest service to the city during the current year, as determined by a popular vote. B. A. Rainwater, of the Hess & Culbertson Jewelry Co., gave Mr. Lyman such a close race that the committee of three deliberated an hour before deciding between the two. The committee, composed of Mayor F. H. Kreismann, Edward L. Preetorius, president of the St. Louis Times, and Julian Zolnay, sculptor and artist, did not know the identity of the competing designers until after the award had been made. Mr. Lyman conceived and executed his cup along the lines of the city's modern development. Mr. Rainwater treated the subject from a historical and an allegorical standpoint. The cup is to be made of solid sterling silver, finished in gold, and is to cost \$1,000.

Among the out-of-town jewelers in St. Louis, during the past week, were: Mr. Newland, of the Bolton Jewelry Co., Fulton, Mo.; John N. Bucher, Hillsboro, Tex.; L. A. Beatty, Roodhouse, Ill.; C. E. Miller, Whitehall, Ill.; August Winkler, Poplar Bluff, Mo.; A. L. Alpiser, Edwardsville, Ill.; R. R. Greene, Salem, Mo.; T. H. Edwards, Clarksville, Mo.; W. H. Jahn, Pacific, Mo.; L. C. Forest, Iberia, Mo.; E. K. Kane, Pineknayville, Ill.; J. B. Meyer, Coffee, Ill.; H. A. Eleke, Jackson, Mo.; L. Storthz, Little Rock, Ark.; Carl Shibley, Van Buren, Ark.; J. Bersche, Columbia, Ill.; John Fink, Fort Smith, Ark.; Mr.

DEFINITION GIVEN AN AUCTIONEER

by a great Dictionarian is that he is an Agent who acts for the buyer and the seller. How well and satisfactorily we have always endeavored to honestly fulfill this vocation is best illustrated by our having made sixteen sales in the city of Cleveland alone—the names we give below—proving that reputation is the fruit of confidence. We gave not only satisfaction to the dealer, but to the public, making a record for one city never approached by any other firm of Auctioneers. We are not only record breakers in this city, but all over America. Sales made by us in Cleveland—Sumner Bros.; Chas. Ettinger; McBride & Marcellus; Sipe & Sigler, 4 sales; F. B. Lewis, 2 sales; Frank Tirney; Biskind Bros.; Goldsoll Bros.; Ben Sands; The Wardwell Co.; Sigler Bros. Co., 2 sales.

Sales Made during the past 10 Months

B. WINGERTER, entire stock over \$40,000, in five weeks. Akron, Ohio.
 LOUIS LIPPMAN, entire stock \$28,000, in four weeks. Altoona, Pa.
 FRANK C. TOEPP, South Bend, Ind.
 S. R. SNEED, Gulfport, Miss.
 SQUIRES & LAY, La Porte, Ind.
 WILL H. BOOTH, Sioux Falls, So. Dak.
 THE H. WEBBER CO., Cadillac, Mich.
 THE GEE NUSBAUM CO., Cleveland, O.
 THE PILLMAN JEWELRY CO., Tulsa, Okla.

BEN SANDS, complete stock more than \$50,000, in eight weeks. Cleveland, Ohio.
 M. SCOLLER, second sale, lasting seven weeks, very successful. New Orleans.
 The Bankrupt Stock of JOS. BROWN & CO., State Street, Chicago. Over \$75,000.
 J. H. LEPPER, Mason City, Ia.
 JOHN H. BOOTH, Alton, Ill.
 HANNA JEWELRY CO., New Castle, Pa. 3d sale.
 J. F. BALDWIN CO., Shelbyville, Ky. 2d sale.
 PHILIP JACOBY, Kalispell, Mont.

CONSIDER

- 1st. We have the longest established partnership ever existing among Jewelry Auctioneers.
- 2d. We have made hundreds of sales, scores of them under unfavorable conditions, where others failed.
- 3d. We have sold more merchandise, made more successful auctions, than our competitors combined.
- 4th. We have conducted the greatest and most prominent sales in this country.
- 5th. We are financially responsible—a sound credit from coast to coast for 25 years.
- 6th. We are in a position not only to aid you in salesmanship, but as business advisors, in advancing any amount in cash, doing ingenious advertising, etc.

Los Angeles.

R. P. Gillette, Portersville, Cal., has been making a short visit to this city.

Eugene Reboul, head engraver for Donovan & Seamans Co., is taking a short vacation.

S. P. Johnston, Glendora, Cal., was here, a few days ago, making purchases for his holiday trade.

Arthur Turner, with the E. W. Reynolds Co., is now making a business tour of the southern part of the State.

Oscar N. Barnum, formerly with S. B. Bailey, on Broadway, has opened up a jewelry repair shop at 606 E. 7th St.

O. Feinstein, formerly of Minneapolis, has opened a retail jewelry store at 200 W. 7th St. This store makes the eighth on W. 7th St.

R. H. Schwarzkopf, who has been ill for some weeks and had a serious relapse recently, is again recovering, and is thought to be out of danger.

Geo. W. Miller, manager of the silver department in Brock & Feigans' store, has been spending a week in San Francisco on business. He also attended the Portola celebration.

The Palace Jewelry Co., 308 W. 7th St., has placed a stone-cutting and polishing outfit in its window. F. H. Casteel is the manager and Chas. Horwitz is the principal proprietor.

A letter recently received from F. A. Marcher, president of the Pacific Gem Co., announced that he would leave London about the middle of October. He expected to arrive in Los Angeles Nov. 10.

The United Jewelry & Turquoise Co. has just been incorporated and started in business at 446 S. Broadway. The company will do a jewelry manufacturing and stone-cutting business. Its showcases present an attractive display.

H. Jehlger, manager of the jewelry department in A. Hamburger & Sons' store, was one of the end men in a recent minstrel entertainment given by the Benevolent Association of the employees, of whom there are about 1,200. Mr. Jehlger made a hit in his part. About \$5,000 has been spent by this association for the benefit of those in ill health.

A verdict has been rendered for the defendant in the case of Bloom vs. Davis. George Bloom, a jeweler on Main St., near 4th, sued to recover \$299 alleged to have been advanced by him to secure evidence in behalf of Davis in a criminal trial. Three years ago a mysterious diamond robbery occurred at Bakersfield. Davis was accused, and was acquitted on a third trial. He was employed by one of the leading jewelry concerns of Bakersfield when diamonds valued at more than \$2,000 which Davis had failed to put in the safe when

he went to lunch disappeared. While detectives were puzzling over the case the diamonds were discovered in the possession of T. Besbeck, a jewelry manufacturer and dealer in this city, who claimed to have bought the stones from Davis. Bloom appeared, as a friend, and secured numerous witnesses to impeach Besbeck's testimony. He professed to have thus spent \$299, but his bill was not allowed by the justice.

Pacific Coast Notes.

L. V. Frankel, a traveling representative from Denver, Colo., was in Sante Fe, N. Mex., recently, on business.

C. H. Legget, Madera, Cal., has taken up another line of business at that place and is selling his entire stock at public auction.

John Eaves, who has been in Nogales, Ariz., for a number of years, has returned to Southern California and taken a position with W. A. Manson, San Bernardino.

George W. Cameron, who recently went to St. Louis, Mo., on a visit, has returned to his home at Alhambra, Cal., on account of the destruction of his store there by fire.

E. W. Murphy and L. A. Dees, who are interested in mining claims near Bishop, Cal., have been taking out some fine turquoise, and are shipping the output to Los Angeles.

When Presidents Taft and Diaz met at El Paso, Tex., recently, they were each presented with a handsome gold loving cup by the inhabitants of that place. The cups were designed and made by A. H. Richards, the jeweler.

B. E. Jenney, who for several years conducted a store at 262 University Ave., Palo Alto, Cal., has moved to a location just a few doors below, the new number being 217 University Ave. A much larger store has been secured and the new location is considered an improvement over the old one.

A. L. Ott, who operated a jewelry establishment in San Francisco, but who makes his home in Berkeley, has made a handsome gold medal, which he has placed in the hands of Chief of Police Wilson, of Oakland, Cal., to be presented to the member of the police department making the highest score at a target shoot to be held soon.

John Knoche, said to be a farm hand from Missouri, who came to San Diego, Cal., was arrested recently, on a charge of robbing Leo M. Schiller's jewelry store of a diamond ring, valued at \$165. The ring was recovered, as Knoche was wearing it on his finger when apprehended. Knoche entered the store while no one was there except a woman clerk. While her back was turned, it is alleged, he reached over the counter and took the ring from a display in the show-window.

Edward E. Baker, Warsaw, N. Y., has been granted a patent on a railway tie and fastener which he invented.

I. De Gregory, 1521 Seventh Ave., Tampa, Fla., lost his entire stock of jewelry, optical goods, etc., during a recent fire at that place.

Indianapolis.

TRADE CONDITIONS.

Local jewelers are stocking heavily for the holidays in anticipation of the largest Christmas trade in several years. Industrial conditions have improved to such a stage that there is a scarcity of workmen, and money seems to be plentiful among the middle classes, who are the best jewelry buyers in this part of the country. The manufacturing and wholesale jewelers report a heavy trade in holiday goods.

Donald Hickman, formerly with M. J. Lang, has resigned.

Clarence James has resigned his position with J. P. Mullally to go with an automobile company.

F. R. Fisher & Co. have purchased the jewelry business conducted for many years at Kirklint by W. M. Northam.

The N. W. Anderson Jewelry Co. has purchased the business of Mrs. Cora M. Anderson, at Terre Haute, and has moved to Decatur, Ill.

D. H. Seyfreid, who has been with the Swope-Nehf Jewelry Co. at Terre Haute, for some time, has taken a position with J. P. Mullally, in this city.

The Wulscher-Stewart Music Co. is installing musical chimes and a clock in its new building in N. Pennsylvania St., said to be the finest of their kind in the middle west.

New quarters at 948 Virginia Ave. have been taken by H. H. Bishop, who is president of the Indiana Retail Jewelers' Association. He was formerly at 1002 Virginia Ave., and has installed new fixtures.

A meeting of the executive committee of the Indiana Retail Jewelers' Association will be held in this city some time next month to arrange a date for the annual convention, which probably will be held in January.

Charles B. Dyer and John Dyer, who have been conducting a jewelry business under the name of Dyer Bros., have dissolved partnership. The business will be conducted by the former. John Dyer has taken over the copper plate and engraving department of the company.

Among the out-of-town jewelers in this city, last week, were: J. A. Miessen, Cicero; C. K. Van Meter, Greenfield; J. C. Wilson, Mooresville; C. N. Hetzner, Peru; W. S. Hoke, Winchester; William Glenn, Charlestown; E. F. Clawson, Clayton; Edward W. Kelly, Sullivan; John W. Vest, Greenwood; A. S. Orr, Greenfield; Frank Murphy, Terre Haute; A. W. Owens, Greenwood, and C. M. Hunnicutt, Rockville.

Pacific Northwest.

A. A. Woelfel is preparing to move into the new Zimmer building, at Centralia, Wash.

James S. Wheeler, Salem, N. J., returned, recently, to his home after a trip to the Alaska-Yukon Exposition.

Seth E. Laraway, formerly of Glenwood, Ia., has arrived at Eugene, Ore., with his wife and will shortly open a jewelry store in the new structure that is being erected next to the Loan & Savings bank. Mahogany show-cases have been ordered and the store will be ready for occupancy about Nov. 1.

"Multi-Silver Fortified Back"

Showing silver plating on front of spoon

IN addition to our extraordinary standard plating we put a "Multi-Silver" plating on the entire back of every spoon and fork—the place wear-resistance is most necessary:

As our Multi-Silver plating is accomplished in one operation, by a new patented process which we control exclusively, we get the extra fortification at but a trifle more than the cost of the additional silver:

Our goods have a standard price and profit for the dealer, because we take advantage of every invention to make them better:

Cincinnati.

Louis Rauch has started on a business trip in the south.

David Newman, Chicago, Ill., was in this city, last week, on business.

Charles Kendall, of Richter & Phillips, left this week, on his regular southern trip.

Eli Gutmann, of L. Gutmann & Sons, is making a business trip through the southern States.

Max Schaperi, watchmaker, formerly located in the Arcade, is now with D. Jacobs & Co., 6th St.

Word was received here announcing the death of W. H. Ebling, Elkton, Ky., which occurred Oct. 14.

William Raymond and wife, of Sidney, O., were the guests of J. C. Miller, of the Miller Jewelry Co., the past week.

M. Schwab, of the M. Schwab Jewelry Co., was in LaFayette, Ind., last week, attending the wedding of Rabbi Feuerlicht.

J. S. Voss & Sons have recently added to their road force Charles Schoenig, who will travel in West Virginia, Virginia, Indiana and Kentucky.

George Link, A. Schemel, Charles Esberger, Herman Duhme, Henry Doepke and George Nagel are making arrangements for a hunting trip in Kentucky, about Nov. 15.

James A. Cayce, Jr., a representative of the B. H. Stief Jewelry Co., Nashville, Tenn., was here, last week, on his return from Cleveland, where he had attended the Electrical Workers' convention.

The Cincinnati Manufacturers and Wholesale Jewelers' Association held its customary quarterly informal supper, on Oct. 21, at the Sinton Hotel. Following the supper came the regular business meeting.

I. L. Greenwald, successor to Walter Wickard, at 22 Arcade, has now a complete new store. With his new fixtures and a full new line of jewelry and clocks he has one of the most up-to-date stores in the Arcade.

Herman & Loeb are remodeling their offices in a way that not only adds character and general appearance, but enables the jewelers to handle their business more satisfactorily than ever before. Lee Loeb, of this firm, is out on a six weeks' trip west.

Joseph Mehmert won the suit brought against him by the Murine Eye Co., Chicago, who claim to have sold a bill of \$72, which Mr. Mehmert said he did not order. As the order was given without his authority, he won the case. The goods had been sent for by one of Mehmert's clerks, in April, 1907. The goods were delivered, but Mehmert says he notified the company he didn't want them, and offered to return them and pay all express charges. The company would not accept this, and followed with a suit against Mehmert. The case was appealed to the Common Pleas Court and was tried on Oct. 18.

Out-of-town jewelers here, the past week, purchasing goods included: F. D. Ausman and wife, St. Marys, O.; H. Risinger, Lawrenceburg, Ind.; F. A. Ende, New Bremen, O.; William O. Amany, Sidney, O.; J. W. Tyson and C. W. Dodds, Vevay,

Ind.; G. B. Colles, Shelbyville, Tenn.; W. H. Grosse, Dayton, O.; John Hesselbrock Liberty, Ind.; E. Galbreath and Chase Hofman, Springfield, Tenn.; B. J. Dillard, Lebanon, Tenn.; Chris. Hewig, Evansville, Ind.; E. Mueller, Hamilton, O.; George W. Schlenker, Eaton, O.; J. C. Meyer, Harrison, O.; George Keller, Georgetown, Ky.; E. Israel, Harrison, O.; Philip Horr, Aurora, Ind.; E. B. Scott, Batavia, O., and O. O. McCracken, Mt. Olivet, Ky.

Cleveland.

J. W. Dunlap and wife, Greenville, O., were in town, this week.

O. P. Rowley, of the Scribner & Loehr Co., is in town, this week.

L. F. Boyer spent Sunday with his mother at her home in Wadsworth, O.

Edward Touzinsky is now in the engraving department of the Bowler & Burdick Co. Elmer Thurston was called to Detroit by the serious illness of his father, last week.

Charley Ramp went to Oberlin to see the annual Case School-Oberlin football game, last Saturday.

W. L. Durham has just gone to Toronto, Ont., to take the position of head engraver with a large house.

S. Bamberger, who is interested in real estate in St. Marys, O., spent a week there with his son, recently, combining business and pleasure.

John Hirt, New Castle, Pa., was in town, last week, buying a stock of goods for the new jewelry store he will open in that city at an early date.

Miss Alice Ball, daughter of Webb C. Ball, will become the wife of Wm. J. Andrews, to-day (Oct. 27). Mr. and Mrs. Andrews will make their home in Columbus.

Mrs. C. A. Hart, Tiffin, O., who has been conducting the jewelry business left by her husband at his death, has sold out her interest to Miller Bros., who will continue the business.

The firm of Austin & Younglove, Greenspring, O., has dissolved. Mr. Younglove has taken up the interest of Mr. Austin and will continue the business under the name of P. J. Younglove.

Frederick Frisch, of Frisch Bros., Buffalo, N. Y., came to Cleveland, last week, to examine the diamonds found on the person of Arthur Hill. The Buffalo concern was robbed recently of about \$2,000 worth of diamonds.

Messrs. Strang, Thurston, Stottèr, Tietzen and Newman have formed a bowling team which is a member of the Erie league. Considering a late start, the team is doing well, and the boys say they will blossom into pennant-winners yet.

Ed. Quinlan barely escaped a serious accident on his way to the store the other morning. He stepped off the street car, failing to notice a rapidly moving motor. He was knocked down and received some painful but not serious injuries.

The annual communication of the Grand Lodge of Ohio of the F. & A. M. brought in a number of out-of-town jewelers, this week. There were several of the local jewelers in the parade of Knight Templars held the morning of the first session.

E. J. Santhony, Carrollton, O., recently

invented and patented an automatic fire alarm system which has been favorably recommended by the boards of underwriters of Chicago and Pittsburg. Mr. Santhony was in Cleveland, this week, trying to induce the school board to adopt his invention. Several prominent local jewelers have taken up his cause and are rendering him valuable assistance.

Quite a number of out-of-town buyers were in, last week, among them being C. E. Lonsway and W. C. Fisher, Lorain; P. J. Younglove, Greenspring, O.; John Hirt, New Castle, Pa.; L. J. Goddard, Revanna; H. S. Sumner, Akron; G. A. Rogers, Seville; E. D. Kindig, Elyria; J. W. Helfrich, Carrollton; H. C. Cheer, Cambridge Springs, Pa.; O. Carter, New London; Wm. Kutz, Bellevue; Geo. High, Medina; C. E. Emes, Wakeman; Ben Mosley, Willoughby, and E. J. Santhony, Carrollton.

Geo. A. Clark, the well-known Lorain jeweler, met with a series of accidents, last week, that caused him to postpone a long-planned automobile trip to New York. He started with a party of friends, Oct. 16, and got as far as Cleveland. While speeding along Detroit Ave., near 29th St. West, Mr. Clark turned out for a carriage. With a sudden swerve and a swish of the tires the big machine skidded into the rear of a Clifton Boulevard car. Mr. and Mrs. Moxon, who were in the rear of the tonneau, were thrown out into the street. An ambulance was called and they were taken to the Lutheran Hospital. Mr. and Mrs. Clark escaped with a severe shaking up, but as the machine was badly damaged the tour was abandoned. Another auto was sent from the Studebaker garage to tow the damaged machine in. Mr. Clark went with them to steer his car. Near the corner of Euclid and E. 19th St. a boy ran in front of the auto and was hurled several feet, fortunately out of the path of the autos. He was hurried to Lakeside Hospital, where his injuries proved slight. Mr. Clark has given up automobiling for the Winter.

Minneapolis.

W. C. Leber has returned from a hunting trip in the northern part of the State.

Hans Hagan has taken a position with the Gittelson Jewelry Co. as watchmaker.

Mr. Osterberg is a new watchmaker for T. V. Thomsen, Cedar Ave., near 3d St.

White & MacNaught have had an interesting window display of Sig. Perrera's artistic jewelry.

E. B. Nelson, South Minneapolis, recently went to Aberdeen, S. Dak., to register in the land drawing on the allotment of settlers for the Standing Rock and Cheyenne River Indian agencies.

George Johantgen has opened his new manufacturing jewelry establishment at 320 Nicollet Ave., second floor, but half a block from the location of the shop of his old firm, from which he recently retired.

The removal of the Gittelson Jewelry Co. to quarters in the new Dyckinann Hotel building, on 6th St., seems likely to be delayed for a time beyond Nov. 1, as the completion of the building is not progressing as rapidly as was expected.

Holiday Jewelry

When do you want to sell yours

DECEMBER
or
JANUARY ?

Sold in December it means a satisfactory profit
Sold in January it usually means letting it go at
cost or less

The remedy?

Handle CHECO Goods

You can sell them any old time

Why?

Because they are a season ahead—new, snappy styles—made from original designs—artistically finished—strictly high grade in everything except the price. You get them at jobber's price—of course you can sell them.

LADY ETHEL BRACELETS

Acknowledged to be the best adjustable bracelets on the market. *24 New Patterns just out.* Made from high grade rolled gold plate and fully guaranteed. Prices also are interesting.

WHITESTONE GOODS

There's a lot of whitestone goods being put out that ought to be sold by the pound. Checo goods are made up from the best grade of stone in attractive designs and are frequently sold as imported novelties. We invite comparison.

PAINTED GOODS

Do you want a line of painted brooches—sash pins or hat pins—in the newest shapes—that will stand acid—and be a credit to you, and that you can buy for about the cost of ordinary water color? We are putting out a line that will do all this—and more.

NENUPHARS

The most successful hair ornament of the season. They sell at sight.

BUG JEWELRY

A full line in a wide variety of pleasing patterns. Also hundreds of new and salable novelties. *Write us.*

We Make Our Own Goods—We Sell Direct

YOU CAN'T AFFORD TO BUY WITHOUT SEEING OUR LINE

116 Chestnut St. (Champlin Bldg.)

PROVIDENCE, R. I.

San Francisco.

F. L. Presbry, who represents the Bissett Jewelry Co. on the Pacific Coast, is here from a very successful trip through the northwest, and will remain at home over Portola Week.

Eugene Gribbi, son of A. E. Gribbi, Hanford, Cal., is now in San Francisco, and has commenced a course of study in the California Watch and Engraving School, at 717 Market St., conducted by E. N. Radke.

The announcement is made that Max Laruth, formerly connected with George Greenzweig & Co., will make his next trip for J. S. Sinclair Ryan and the R. & L. Myers Co. He will cover the northern territory.

Prominent among those who appeared in carriages in the parade on the opening day of the festival was John Hammersmith, of the firm of Hammersmith & Co., and it is due to his untiring efforts, in a large measure, that the present great event is an actuality. He was a prominent member of the committee in charge of the last New Year's Eve celebration in the downtown district, and shortly after that event joined with several other prominent business men in promoting the Portola Festival to commemorate the discovery of the Golden Gate and rebuilding of the city. The three-story building occupied by Hammersmith & Co. on Sutter St. and Grant Ave. has been gaily decorated for the festival, and is being pointed out to visitors as being the first jewelry establishment to be located in this district after the fire, and as being the only firm in the business occupying the whole of its own building.

An event of much interest to jewelers in San Francisco, and especially to those of the old regime, was the recent celebration of the golden wedding of Mr. and Mrs. Charles H. Gottschalk. Mr. Gottschalk is a veteran watchmaker. The celebration was held across the bay at the residence of the couple in East Oakland, and all of their seven children were present to shower congratulations on their parents. Mr. Gottschalk came to this city in 1862 and established a store on Montgomery St., shortly afterward moving to 507 California St., near by. At the time of the fire his sons were conducting a business at that place under the name of C. H. Gottschalk's Sons. He had retired from active business in 1900 in favor of the boys. Two of his sons are now watchmakers in San Francisco, E. H. Gottschalk having a store at 1410 Haight St. and O. F. Gottschalk holding a position with Mr. Jenkel, 220 Market St.

This is Portola Week in San Francisco, and the great event for which plans have been made during the past six months is now taking place under ideal weather conditions. It is estimated that there are now 400,000 strangers within the gates of the city, and these do not include many who come from the suburban towns. Part of the crowd has been here for several days, and business in the retail jewelry line has shown a great improvement. As many of the stores will be closed this week during parts of the day, owing to parades and other special features, it has been decided to keep most of the retail establishments open overing to accommodate the crowds of shoppers. Many

of the prominent jewelry firms have made elaborate window displays, and some of them have decorated their places in attractive style. This being the first occasion since the fire for general decoration, merchants have entered into the spirit of the event with much enthusiasm, and the city is one mass of yellow and red, the carnival colors. Many out-of-town retailers are here and have made their appearances in the local wholesale offices, but practically no business will be done with these visitors until the festival is at an end.

Omaha.

Mr. and Mrs. S. W. Lindsay have returned from a short trip to Chicago.

C. A. Williams, of C. A. Williams & Co., is out on the road on a short business trip.

Mr. Robinson has taken a position as watchmaker with R. E. Chiddick, Stuart, Nebr.

J. B. Johnson, Glenwood, Ia., was in our city, last Sunday, having come over in his machine.

Fred Brodegaard and wife have gone to Chicago on a combined pleasure and business trip.

H. C. Saul, Douglas, Wyo., was in this city, last week, getting ready for the Christmas trade.

E. W. Steer, Chicago, Ill., has accepted a position as cashier and bookkeeper with the C. B. Brown Co.

A. T. Garnow, who has opened a new store at Brush, Colo., was in this city, last week, purchasing his stock.

S. V. Gustafson, Gustafson & Hendrickson, has been detained from his store, a few days, on account of a slight illness.

John Ring, a jeweler at Hooper, Nebr., and C. W. Dubes, Blair, Nebr., were in the city replenishing their Fall stock, last week.

Fred Nelson, formerly with Albert Edholm, has accepted a position with the Jacquemin Jewelry Co., Council Bluffs, Ia.

Douglas Melcher, watchmaker, formerly with A. Edholm, is now with L. E. Griffith, material house, in the Webster-Sunderland building.

L. J. Kaas, who was formerly located in the Arlington block, and who lately moved his shop to South Omaha, has returned to Omaha and located in the Paxton block.

Leo Hyman, traveling representative for Stern Bros. & Co., who fell and broke his shoulder when leaving the store of the Sol. Bergman Jewelry Co., two weeks ago, is recovering rapidly.

After a delay of some months the carpenters are just starting to build the show window in Fred Brodegaard & Co.'s store. The remodeling of the store proper was completed a few weeks ago.

A. Edholm furnished the handsome silver loving cup which was presented to Euclid Martin by the Omaha Commercial Club. Mr. Martin was a former president of this organization, and is now leaving this city to reside in California.

H. B. Cronk, who has for some time been a salesman with the Columbian Optical Co., has started an optical department of his own and will be located at 16th and Farnam Sts., with Marion D. Franks, as soon as his new store is completed.

Milwaukee.

William Sinkler, Luxemburg, Wis., has just completed the erection of his new store.

Among the out-of-town jewelers who called upon the Milwaukee trade, last week, was F. P. Beswick, Racine.

Schwalbach & Son have been awarded the contract to furnish a new \$600 tower clock that will be installed in the tower of the St. Mary's Church at Menasha, Wis.

David Goldman has enlarged the quarters of his downtown store at the corner of Water and Grand Ave. by occupying adjoining space. Mr. Goldman's store is now nearly twice as large as formerly.

Jewelers at Racine, Wis., have been troubled of late by boys pilfering in their establishments. Two boys, aged 11 and 12 years, were arrested recently, charged with stealing a fountain pen from the store of H. J. Smith, but were allowed to go home and their parents were notified to accompany them in court later. It developed that the same boys had been making a round of shoplifting on the day in question.

George Durner opened his new store at 745 3d St., recently, and it is said to be one of the finest establishments of its kind in the northwest. The new store, 25 by 100 feet in dimensions, was erected expressly for Mr. Durner, and is equipped throughout with mahogany show and wall cases. On the opening day each visitor was given flowers and souvenirs. Mr. Durner has been in the jewelry business on 3d St. since 1881.

Jacob Van der Zanden, Green Bay, Wis., has sold his interests in his West Side store to C. F. Herber & Co. Mr. Van der Zanden will now devote his entire time to the store which he recently opened on Washington St. Mr. Van der Zanden has been engaged in the jewelry business at Green Bay for the past 16 years, and has built up one of the finest trades in eastern Wisconsin. Several improvements will be made at the Washington St. store of Mr. Van der Zanden, and new show and wall cases will be installed before the opening of the holiday trade.

The quarterly meeting of the Jewelers' Mutual Fire Insurance Co. of Wisconsin was held in Milwaukee, last week. Several plans concerning the future of the organization were outlined. It develops that the new company, despite the fact that it has been in existence only half a year, needs to secure only \$150,000 more of new insurance to make the same showing made by the Hardware Dealers' Mutual Fire Insurance Co. of Wisconsin during the first year of its existence. Officials of the jewelers' company expressed themselves as satisfied that this record would be attained by their company. Those present at the meeting were: President Gustave Keller, Appleton; J. R. Chapman, Oshkosh; Hiram Smith, Racine; W. H. Upmeyer, A. J. Stoessel, Richard Seidel, E. F. Rohm and Secretary Franklin Thomson, all of this city.

Thieves recently gained an entrance into the retail jewelry store of M. L. Robert, Pocatello, Idaho, and stole several diamonds. The safe was opened and the steel strong box removed. Thus far no clue has been obtained.

THE ALBERT WALKER CO., PROVIDENCE, R. I.

We Live Where It Is Made

Pittsburg.

N. R. Petty recently opened a store at New Holland, O., near New Philadelphia. Benjamin Robinson, Clarksburg, W. Va., was a business visitor in Pittsburg, last week.

A. J. Harris is now conducting business at New Philadelphia under the name of the Van Austin Jewelry House.

S. W. Wright, a watchmaker, has opened a store at West Newton, Pa., and was in Pittsburg, last week, buying stock.

Brown & Son, Donora, Pa., who recently opened a street clock manufacturing establishment, are said to be doing a good business.

H. L. Cleeland, Butler, was in Pittsburg, last week. Mr. Cleeland, who recently submitted to an operation in one of the city hospitals, has completely recovered.

August Merz, Sewickley, was in Pittsburg, last week, receiving the congratulations of his friends because of the announcement that he recently was married.

The handsome chest of silver which, last week, was presented to W. H. Locke, secretary of the Pittsburg Baseball Club, was bought from the John M. Roberts & Son Co.

A new firm has engaged in business at Du Bois, Pa., under the title of Bloom & Vashbinder. They were formerly in the employ of Edward Guth, who also has a jewelry store at that place.

The men on the road for the Marsh, Brown & Mather Co. report business as increasing steadily in the territory covered by them, which embraces western Pennsylvania, Ohio and West Virginia.

W. E. Hice, formerly manager of the optical department at Kaufmann Bros.' department store, has opened a jewelry and optical store at 7722 Frankstorm Ave., where he has the field to himself.

"Barney" Dreyfus, president of the Pittsburg Baseball Club, who presented Manager Fred Clarke and Catcher George Gibson of the team, each with a Jurgensen watch, bought the timepieces from the Hardy & Hayes Co.

Harry Heeren and George S. Schailerer, manager of the optical department of Heeren Bros. & Co., leave, next week, on a hunting expedition in Somerset County. Mr. Heeren is one of the buyers of the Heeren house.

Capt. Wm. Klein has accepted a position with the Hardy & Hayes Co. He formerly was with E. P. Roberts & Sons. Capt. Klein is the commanding officer of the Washington Infantry, a well known local military organization.

Metzger Bros., Aliquippa, have installed new fixtures in their store and made preparations to take care of good business in that town. Aliquippa is a promising place. The Jones & Laughlin Steel Co. is erecting a large steel plant there.

The following out-of-town jewelers were among the buyers in Pittsburg, last week: H. A. Jackson, Saltsburg; C. O. Alt, Knox; P. J. Manson, Jeanette; Roy Kuhn, Mt. Pleasant; Henry Zilliken, Wellsburg, W. Va.; J. T. Santer, Patton; N. R. Petty, New Holland, O.

Some of the officers of the Cosmopolitan National Bank, arrested because of the fail-

ure of that institution in which a number of jewelers were interested, are scheduled to be placed on trial this week in the United States Court. S. Davis was a director in the failed institution.

The Jewelers' Duckpin Bowling League held the usual meet Monday night of last week. The Terheydens and the Wattles broke even, the Lochs took four straight from the Roberts and the Vilsacks took three out of the four games from the Diamonds. The Wattles lead by one game, the Lochs being second.

The Elks' convention, which was held in Pittsburg, last week, had a tendency to attract a large number of visitors to Pittsburg, one of them being G. Dal Fox, of G. Dal Fox & Bro., Milton, Pa. He visited his jewelry friends during his stay in Pittsburg and also bought some stock for the Fall and holiday trade.

A recent act of the Pennsylvania Legislature prevents pawnbrokers from charging more than 6 per cent. interest on money loaned on goods, but during the last few days large advertisements have been carried in the papers setting forth a new system which is now in vogue. The pawnbrokers say that they only charge 6 per cent. straight for money on all loans, but charge 2½ per cent. a month for storage, this being in addition to the yearly flat rate of 6 per cent, as the law stipulates.

Word has been received here that the store of Jerry Benninghoff, in Greenville, Pa. has been closed by the Sheriff of Mercer County on the execution for \$1,000. The Sheriff's sale was advertised to take place on Tuesday, Oct. 26, but it is possible that the creditors may take proceedings to postpone or prevent the sale. Mr. Benninghoff, who is a practical repairer and optician, began business about 1901, and has always been highly regarded for his honesty and industry, though financially he has not stood high.

E. P. Roberts & Sons, Tuesday evening, Oct. 19, banqueted 20 employes of the house at the Fort Pitt Hotel, and a most enjoyable evening was spent by the guests. The affair was strictly informal. Steele F. Roberts, who is the president of the Jewelers' 24-Karat Club of Pittsburg and the active head of the Roberts house, acted as toastmaster. Talks were given by the employes present, and a full and free discussion of how to run a jewelry store was invited. The principal topic as suggested by Mr. Roberts was: "What would you do if you were a partner in E. P. Roberts & Sons?" Many valuable suggestions were offered. Mr. Roberts is satisfied that much good will result because of the gathering. The affair likely will be repeated at some future time.

C. E. Nicodemus, a jeweler and optician of Forreston, Ill., will shortly discontinue his business at that place.

The Alfred (N. Y.) Sun recently published a large portrait and sketch of the career of Amos A. Shaw, who has been 45 years in the jewelry business in that town.

Albin Thoma, Piqua, O., commanded the first division of troops in the parade in that city during the ceremonies on "Schmidlapp" Day, when the Rowan monument was presented to Piqua.

Lancaster, Pa.

Charles E. Foose, with the Non-Retail Co., is on a trip to Virginia.

The silverware and china ware for the Stevens House, which was lately improved and refurbished, were furnished by Louis Weber & Son.

The students of the Ezra F. Bowman Technical School held a very enjoyable dance on the evening of Oct. 21, at the Iris Club.

Orville Hampton, Denver, Col., stopped over in Lancaster, last week, en route to Newnan, Ga., where he has gone to take a position as a watchmaker.

Joseph Markley, who went to Arizona two months ago for the benefit of his health, has improved to such a degree that he has taken a position as salesman at Columbus, Ga.

Aug. Rhoads, E. King St., has been exhibiting in his show window, where it attracts much attention, the beautiful Hudson-Fulton celebration medal sent from New York to the Lancaster County Historical Society, which conducted the recent Robert Fulton celebration at the scene of his birth in Lancaster County.

G. William Reisner, manufacturing jeweler, last week visited the Hill School at Pottstown, Pa., and Mercersburg Academy. He recently received an order for 14 sets of gold, silver and bronze medals for a county athletic meet at Calumet, Mich. Mr. Reisner has just finished fitting up a neat new office and stock room at his establishment.

T. Wilson Dubbs and Manager A. W. Moyer, of the Non-Retailing Co., are numbered among Lancaster's champion anglers. In a single day last week they hooked four salmon, weighing four pounds each. Mr. Dubbs, by the way, has just replaced the old-fashioned counter cases in his handsome store with fine up-to-date Silent Salesman cases.

Among the jewelers who recently visited Lancaster were: Henry C. Fohl and A. K. Brubaker, Columbia, Pa.; M. H. Shand, Annville, Pa.; E. P. Breneman, Harrisburg; C. E. Hinkle, Ephrata; George L. Hepp, Lititz; W. J. Frazer, Lincoln; Paul Mishkop, Dayton, O.; Gustav Swenk, Pittsburg; C. J. Jenks, Columbus, O.; N. F. Marks, Louisville, Ky.

Claude Ridenour, Frederick, Md., who has been a student at the local technical school, has gone home for a visit before proceeding to Norfolk, Va., where he will take a position as watchmaker and jeweler. Bert Rohrer, a student, has gone to Fort Wayne, Ind., to take a position as watchmaker and engraver with J. H. Young; Walter Forry, another student, has gone to Lewistown, Pa., to take a position with the Mifflin County Jewelry Co. as a matchmaker and engraver, and still another student, Gordon Gardner, has gone to Tampa, Fla., to take a position as watchmaker and engraver. John L. Kohr, Lancaster, has gone with J. H. Sensenig, New Holland, Pa., as watchmaker. Harry Buckwalter, Dillerville, has entered the school as a student in watchmaking. Robert R. Keener has been called home to Uniontown, Pa., by the death of a near relative at that place.

Philadelphia.

F. C. Maag will open his new store in Conshohocken, Nov. 20.

E. D. Sturmer, Easton, Md., called on the trade during the week.

H. W. Asquith, Hatboro, Pa., has opened a new store in Fox Chase, Pa.

William Norton has resigned his position with J. K. Hand, Cape May.

Aisenstein & Gordon have opened a new retail jewelry store at 17 N. 9th St.

M. Friederberg, Atlantic City, is spending a few days at Wernersville, Pa.

R. T. Chapman, an Atlantic City jeweler, stopped off on his way to New York.

A. G. Lee, representing the E. Howard Watch Co., was a recent visitor here.

J. W. Duncan, Onancock, Va., made his regular annual trip to this city, last week.

Herman Harper has returned from a three months' sojourn through the Middle West.

William Smith, watchmaker for H. N. Bolte, Atlantic City, has resigned his position.

Mr. Guyer, of the Waterbury Clock Co., spent the week end in this city with Mrs. Guyer.

Ernest Alley, Millville, N. J., is recuperating from a serious attack of pneumonia.

William E. Henzie and wife, with R. M. Cooper & Son, is visiting relatives in Wilmington, Del.

Josiah Litchfield, a local retail jeweler, has given up his store and is now jobbing for the trade.

Edwin Koshland, representing Charles N. Koshland, has started on a business trip up the State.

S. E. Sandburn, 4140 Market St., is making extensive alterations and improvements to his store.

John Ernst, watchmaker for the Sommer Clock Co., has been confined to his home with a severe cold.

A. Bandschapp, 468 N. 8th St., is planning a pedestrian trip with friends from Camden to Pennsburg, N. J.

S. J. Lyons, 2258 N. Front St., has returned to town from a trip to Tamaqua, Pa., where he has a jewelry store.

Mrs. Annie Rudleson, who conducts a jewelry shop at Atlantic City, has offered as settlement 15 cents on the dollar.

J. G. Righter, formerly with C. K. Kepner, Ashbury Park, N. J., is the guest of his brother, George Righter, of this city.

Harry Lippman, a jeweler of 52d and Haverford Ave., has been compelled to sell out his business because of ill-health.

I. Lewin, recently with the Koshland & Italic Co., has accepted a position in the silver department of M. Sickles & Sons.

Thomas Hannigan has removed from 1926 Columbia Ave. to 1936 Columbia Ave. The new store is much larger than the old.

C. H. Baird, formerly buyer for Baynard, Banks & Byran, Wilmington, Del., has started in business for himself at 709 Market St.

W. H. Thompson, 35½ S. 8th St., has just returned from the mountains with his family and has taken apartments at the Martinique for the winter.

The members of the Wholesale Jewelers and Jobbers' Association held their

regular monthly meeting Monday evening, Oct. 25, at the Jewelers' Club.

G. A. Terhune and William Ingersoll, of the firm of Robt. H. Ingersoll & Bro., New York, made a joint trip to this city, last week, in the interest of the firm.

John W. Ford, jeweler and coroner of this city, has been busy during the past week making campaign speeches for the different candidates for the Fall election.

The Manayunk Business Men's Association is arranging for a carnival, which is to be held Nov. 8 to 13. A number of jewelers in this section of the city are taking active interest.

The carnival in Camden, last week, attracted many visitors from town. The jewelers report excellent returns. This, they claim, is due to their offer of 10 per cent. discount on all goods sold.

T. J. Wilkinson, for many years well known here and formerly a member of Lyons & Wilkinson, has returned to Philadelphia and has opened the T. J. Wilkinson School for Watchmakers at 25 S. 54th St.

J. J. Shellberg, 1822 Susquehanna Ave., was painfully injured by running a screw-driver through his hand recently. At the time of the accident blood-poisoning was feared, because of the rusty tool. The doctors are now hopeful of saving the hand.

H. B. McFarlan, a jeweler of E. Downton, Pa., was instrumental a few nights ago in the capture of a burglar who was in the act of robbing a store directly across from Mr. McFarlan's home. The burglar was tried and sentenced to 10 years in the penitentiary. Mr. McFarlan is still receiving congratulations from the trade.

Col. J. Warner Hutchins has just returned from a trip to Cold Harbor, Va., where he accompanied Governor Stuart and his staff to dedicate a monument to the fallen Pennsylvania troops who were killed in battle at this station. The trip was made in the Governor's private car and was thoroughly enjoyed by the party.

H. H. Thoman, Woodbury, N. J., was fleeced out of a cheap watch and \$11 last Thursday. The swindler visited Mr. Thoman's store, and after looking at several watches, finally decided upon a watch worth \$1. A check to the amount of \$12 was tendered the jeweler in payment for the watch, and after receiving \$11 in change the man made his escape.

A bold attempt made by a negro in broad daylight to cut away the wood and glass supporting the plate-glass window of the Collateral Bank at 117 S. 8th St., last week, was discovered just in time by a silversmith working across the street. When the thief became aware that he had been detected he dropped a suit case and two twisted wires with which he had intended to hook out the rings and other pieces of jewelry the window contained. A white man, believed to be his accomplice, fled at the same time. The police believe they are old offenders.

The following jewelers were visitors to this city during the week: Robert Greene, Florence, N. J.; E. Keller, Allentown, Pa.; George A. Bowen, Bridgeton, N. J.; I. A. Deisher, Reading, Pa.; Ro'and Oliver, Burlington, N. J.; J. S. Caldwell, Wildwood, N. J.; A. M. Kendall, Millville, N. J.; M.

E. Hunter, Beverly, N. J.; B. C. Foster, Bristol, Pa.; H. Fitzsimmons, West Chester, Pa.; W. K. Schlotterer, Schwenksville, Pa.; R. W. Quicksall, Mt. Holly, N. J.; H. S. Kratz, Souderton, Pa.; E. K. Bean, Lansdale, Pa.; T. W. Black, Huntingdon, Pa.; D. M. Wright, Honey Brook, Pa.; F. A. Fiedler, Milton, Pa.; Ivan Jensen, Riverside, N. J.; Henry Bolte, Atlantic City, N. J., and Willis Porter, Burlington, N. J.

Newark.

TRADE CONDITIONS.

The Christmas rush is on, and practically every firm in Newark is busy. Business seems to continue to improve. Several firms have advertised for help this week.

H. B. Bliss, of the B. M. Shanley, Jr. Co., left for the west on Saturday.

Jean R. Tack was elected to office by the Newark improvement association, last week.

George Weiss, of Schwarzkopf Mfg. Co., is touring Pennsylvania on his home trip from the west. William Schwarzkopf of this firm, is in Texas.

Mr. Johnson, of the Johnson Jewelry Co., Colorado Springs, Colo., was in town last week. He called to inspect the machinery stock of the American Oil & Supply Co.

More than 250 members of the Jewelers Bencvolent Association were present in Wever's Colosseum, Friday night, when the 40th anniversary of that organization was observed. There was a banquet which was interspersed with several valuable acts and addresses by officers of the association. The 40 years' existence of the society, and the aid that has been given to the families of members who had formed the topic for most of the speeches. Albert C. Blaicher, the president of the association, was toastmaster, and in his opening address he reviewed the history of the society. The president said there were a present 334 members on the roll, 150 of whom are charter members. An idea of the standing of the society was gained from a financial report, which showed that about \$14,000 was in the treasury. Sick and death benefits, he added, amounting to about \$90,000, have been paid, while the receipts during the twoscore years were \$101,322.71. The death roll of the organization contains the names of 137 members to whose families were paid benefits of \$150 each. The charter members, most of whom were present, are Michael Fuss, Frederick Lichtenfels, Theodore Baurie, Carl Stoller, John Frey, Frederick Vogt, John Schroth, Julius Buensow, Louis Breining, Adam von der Au, George Pillmann, John Weissstein, Michael Braun, Jacob Smith and George Braun. The committee which has charge of the anniversary exercises consisted of Adolph Hock, chairman; Frank von der Au, Albert Gerlach, Helmut Blaicher and Ferdinand Belsler. The officers of the society, besides President Blaicher, are: Vice-president, Christian Behrer; recording secretary, Otto Fuchs; financial secretary, Henry Mutschler; treasurer, Louis Breining.

Fred. A. Bartlett, Lockport, Ill., has left out his business to J. R. Pitts.

UNITED STATES PATENTS.

PUBLISHED OCT. 19, 1909

937,110. FOUNTAIN-PEN. ARTHUR B. SPAN. LOR. New Orleans, La. Filed July 27, 1908. Serial No. 445,638.

In a fountain-pen, the combination, with a holder, of a feeder-plug inserted in the holder and provided with an external groove for ink, said plug having a chamber for solid soluble coloring matter under the said groove, and having also a multiplicity of small openings which connect the

said chamber with the said groove, said openings being arranged at short distances apart and forming a strainer which prevents the escape of solid matter from the said chamber, and a reservoir connected to the said chamber and supplying water to dissolve the said coloring matter.

937,223. COMB-BARRETTE. ALFRED BURKE, Leominster, Mass. Filed Sept. 23, 1908. Serial No. 454,327.

In a barrette, a body, a pair of hollow teeth integral with the body one near each end thereof, the opening in one of the teeth being greater than the opening in the other tooth, hollow teeth attached to the body intermediate the integral teeth,

a clamp extending into the hollow teeth, means for limiting the movement of the clamp, and means on the clamp for frictionally engaging one of the teeth for retaining the clamp in operative relation to the body and teeth.

937,232. CLOCK. EDWARD E. GAGE, New York. Filed Dec. 2, 1908. Serial No. 465,699.

In a clock, a stationary dial, a rotatable ring in-

closing said dial, and provided with a scale representing 60 minutes of time, a rotatable glass mounted in front of the dial, and means whereby

the rotatable ring may be turned by said rotatable glass.

937,502. ARTICLES OF JEWELRY ARRANGED FOR HOLDING INTERCHANGEABLE GEMS OR STONES. C. H. ALLEN, Attleboro, Mass. Filed March 2, 1909. Serial No. 408,874.

In articles of jewelry of the character described, the combination with the front member provided with bent prongs integral therewith, of a resilient

back member having a locking prong or lug normally extending through the wall of the front member and constituting with the other prongs a setting adapted for removably securing a gem or stone therein.

937,662. INDICATING MICROMETER-GAGE. JOHN WALLBERG, New York. Filed Oct. 26, 1908. Serial No. 459,550.

In a device of the class described, a frame provided with a housing and with a recess; a spindle within said housing and capable of motion of translation therein; an anvil carried by said frame and located in line with said spindle; a dial located in said recess and provided with a slot; a pointer adapted to move over said dial; a rack carried by said spindle; a train of gearing located within said recess and operated from said rack, and through which movement of said spindle is trans-

mitted to said pointer; means co-operating with said gearing to prevent lost motion therein; means located within said recess and independent of said gearing for moving said spindle to bring it into contact with an article to be measured; a pointer carried by said spindle moving means and adapted to extend through the slot aforesaid; and means exterior to said recess for operating said spindle moving means.

937,663. CHAIN. FREDERICK W. WAKEFIELD, Vermilion, O. Filed Oct. 12, 1908. Serial No. 457,387. Renewed Aug. 19, 1909. Serial No. 513,690.

A detachable chain member comprising a link formed substantially oval and having its opposite ends arranged so as to overlap each other and to form one end of the link, one of said ends being formed with a transverse slot and the other end being formed with an outwardly deflected locking

BRITISH PATENTS.

ABSTRACTS OF SPECIFICATIONS, 1908, FROM The Illustrated Official Journal.)

ISSUE OF OCT 6, 1909

12,631. CLOCKS. A. FRAINIER, Mortceru, France. June 12.

Escapements; pendulums—The case containing the movement is carried by the upper extremity of the pendulum *k* which, as it swings, bears by means of a knife-edge *m* on a hard surface *n*. A pin *c*, on the wheel *b* driven by the mainspring,

works in a slotted bar *e* pivoted at *f* and weighted at *g*, this bar permitting one revolution of the scape-wheel for each double swing of the pendulum. The arm *e* may be oscillated by a balance, and the disk *b* may be driven by any motor such as a spring barrel, a weight, or an electromagnetic device, etc.

12,645. CIGARETTE CASES, ETC. J. RHEINBERG, London. June 12.

A box for cigarettes, etc., provided with means for facilitating the withdrawal of single cigarettes, comprises a card-board or like holder *B* sliding within a sheath *A*, a spring device *C* being provided to hold the two apart. The sheath *A* is provided with an ejection stop *E*, the holder having a corresponding cut-away portion *H* and ejection opening *F*. The cigarettes are urged

from one end of the holder by a spring-actuated mechanism *D*, if constructed of card-board, wood, etc., an elastic cord, and the end cigarette is ejected in part by passing the holder into the mouth in the manner shown. In the form shown,

the spring *C* consists of a strip of elastic stretched across the sheath parallel to the bottom, but an elastic cord having one end connected to the holder and the other to the sheath, or a spring-actuated lazy-tongue similar to the one employed for pressing out the cigarettes may be employed.

Applications for patents, Sept. 29-25.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessors from whom he derived title for 10 years next preceding the passage of this act."

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Oct. 20.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

- Bangkok: 10 cases clocks, \$334.
- Berlin: 4 cases clocks, \$330.
- Buenos Aires: 1 case jewelry, \$3,490; 1 case clocks, \$190.
- Botwoodville, N. F.: 6 cases clocks, \$600.
- Calcutta: 30 case clocks, \$878; 10 cases clocks, \$200; 110 cases clocks, \$2,115.
- Campana: 1 case jewelry, \$100.
- Cartagena: 5 cases plated ware, \$664.
- Cienfuegos: 1 case jewelry, \$229.
- Copenhagen: 2 cases watches, \$170.
- Hamburg: 12 cases jewelers' sweepings, \$4,500; 2 cases clocks, \$149; 7 cases optical goods, \$1,195.
- Havre: 1 case watches, \$928; 2 cases jewelry, \$540.
- Havana: 2 cases jewelry, \$1,118; 6 cases clocks, \$150; 3 cases jewelry, \$177; 1 case plated ware, \$142; 2 cases optical goods, \$282.
- Liverpool: 1 case jewelry, \$375; 1 case plated ware, \$433; 1 case jewelry, \$500; 2 cases watches, \$1,200; 68 cases clocks, \$1,429.
- London: 2 cases clocks, \$150; 5 cases watches, \$1,234; 13 cases optical goods, \$5,331; 21 cases scopes and views, \$1,382; 27 cases watches, \$5,601; 7 cases scopes and views, \$206; 42 cases clocks, \$1,422.
- Manila: 15 cases plated ware, \$2,252; 1 case silverware, \$400; 6 cases watches, \$300; 14 cases clocks, \$498.
- Melbourne: 367 cases clocks, \$8,297; 3 cases optical goods, \$248.
- Middlefort: 1 case thermometers, \$171.
- Puerto Mexico: 8 cases clocks, \$245.
- Sheffield: 5 cases jewelers' sweepings, \$3,300.
- Shanghai: 12 cases clocks, \$122.
- Stuttgart: 2 cases optical machinery, \$116.
- Singapore: 35 cases clocks, \$629.
- Tampico: 4 cases plated ware, \$245.
- St. Pta. Plata: 2 cases jewelry, \$244.
- Yokohama: 28 cases clocks, \$320.

The Merchants' Association of Appleton, Wis., is considering the offer recently made by George Meikles, Sturgeon Bay, Wis., to locate his plant for the manufacture of balance staffs, etc., for watches at Appleton. Mr. Meikles claims that his payroll is now \$15,000, and that in the course of a few years this will be doubled. Efforts are being made by Appleton merchants to secure the plant.

These Three Elgin Watches

are being specially featured in the current Elgin advertising.

THEY are the most popular men's watches made.

The G. M. Wheeler Movement, in its various sizes, exactly meets the general demand for a thoroughly good watch at a moderate price.

The Lord Elgin Thin Model is receiving great favor from men who like the style of a thin watch. For wear with evening dress this model is especially desirable.

Every dealer should keep his stock of Elgins full and should particularly see that he is well supplied with these three numbers that are being emphasized in the extensive Elgin advertising.

Retail prices on these models are being advertised as follows:

G. M. WHEELER, 18, 16, or 12 Size.

In Filled Gold Cases, \$30 and up.

In Solid Gold Cases, \$50 and up.

LORD ELGIN, Thin Model (one size).

In Filled Gold Cases, \$21 and up

In Solid Gold Cases, \$35 and up.

Write your jobber or this company direct for your prices.

An Old Battered Watch Repaired to Look Like New.

Written expressly for The Jewelers' Circular-Weekly, by John Henry.

WHILE rummaging through a box of old trinkets, heirlooms, etc., that had been in the family I don't know how many years, I ran across a watch, which, I believe, had originally been the property of my grandfather, had been carried by my father in his time, and even by myself when a young man; but that was about 20 years ago, and the watch had been out of commission and had lain there in the box ever since.

I took it up to examine it. It had been a fine, well-made watch in its day; a heavy, 14-karat, 18 size, engine-turned Jurgensen case, containing a high-grade, full-jeweled, nickel movement, but now it was certainly in a dilapidated condition.

The front back was broken entirely from the center, the back joint was also in a bad condition, and the lock spring broken and useless, the bow loose and worn almost through; the pendent was still fast to the center, but knocked over sideways as if some one had hit it with a hammer. The glass bezel was split and both backs and the cap were full of dents and flapped up and down from the center and had no snap whatever.

In fact, the case looked as if it was only fit for the melting pot, but all the pieces were there, except the head broken from the lock spring, and the thought flashed across my mind that perhaps the watch could be repaired and put in working order.

In John St., not far from Broadway, on one of those old-fashioned, three-story brick buildings which still remain in that quarter, I had often seen a sign, while passing to and from the office, "Watchcase Maker and Repairer," so the following morning I entered the building, climbed two flights of well-worn stairs and entered a small room, not more than 25 feet square, but situated in the front part of the building, where the light was good, and as soon as I stepped in the room I saw at a glance that although the room was small I was in an up-to-date, well-equipped little workshop.

As I entered and closed the door I found myself up against a plain wooden railing which prevented me from entering the factory part of the room.

On the opposite side of the railing, placed very close so as to utilize all the space in the small room possible, stood a desk, at which a young man was sitting.

He looked up as I took the watch from my pocket and asked him if he thought it past repair.

"No, I think not," replied he; "please wait a moment and I'll see."

He went over to a man who was working at a turning lathe by one of the windows, handed the watch to him, said something which I didn't overhear and they both turned and came toward me.

"I suppose you want the movement repaired also?" said the workman, and apparently the proprietor of the place, looking at me inquiringly. "It's an old-timer and pretty well battered up, but the movement appears to be in a fair condition. A new hairspring and cleaning, sir, should make it as good as new. A good watch with the right care never wears out."

"The movement appears to be in a better condition than the case," said I. "Can you repair that battered thing to make it look like new?"

"It's a good, solid, old-fashioned, hand-made case," he answered, letting the back, that was broke from the center, rest on his four fingers and pressing the middle lightly with his thumb, "and worn as it is it is still heavy enough to be re-jointed; the heads touched up a bit, yes, and the backs are even heavy enough to be re-engine-turned. Then it will not only look like new, but be much better and wear much longer than many of the light-spun, machine-made cases that are put on the market nowadays."

"I'm curious to know how you are going to make that battered-up case look like new. Will you allow me to come in and watch you while you do the job?"

The old gentleman, for he was a man well advanced in years, past 70, I should judge, but well preserved and still able to work at the bench, hesitated for a moment, then, lifting the section of the wooden railing that worked on a hinge, he smilingly invited me to enter the little factory and, placing a stool near the bench he intended to work at, asked me to be seated.

The shop was small, but there was a good light and the room was not over-crowded. At one of the two windows in the front part of the room stood a watchcase maker's turning lathe and at the right-hand side of the lathe the turner's work-bench.

On the left-hand side of the lathe, receiving the light from the other window, were two more benches, where the filing, taking out dents, burnishing, springing, etc., were done.

Behind these two benches, but set far enough back to give the men plenty of elbow room and have nobody crowded, was the polisher's lathe, set sidewise to the window so as to receive the best light possible, and back of that, but further from the wall, so the polisher wouldn't interfere with the turner's light, was the engine-turning lathe.

On the opposite side of the room, behind the case-turner's bench, was the gas house, which contained two flames, for soldering, spring hardening, tempering, etc.

In the center of the room was the case-maker's swedging block, composed of some kind of very hard wood, on top of which was placed a slab of iron about a foot and a half square and about two inches thick, and the rack, containing the swedging-cups, dies, sledgehammers, etc.

But not a bit of shafting did the little room contain, for each lathe, machine, blower, etc., was run by its own separate electric motor, and the power was only turned on while the lathe or machine was in actual use. A great improvement on the noisy, dirty, old-fashioned factories of years gone by.

"The first operation," said the old gentleman, picking up a small jeweler's screw-driver, "is to remove the movement from the case." He loosened the small screw that held the crown in the pendent, slipped back the back case and cap, for they no longer snapped, but opened easily, loosened the set-screw that held the movement in the center, took out the movement, passed it to the man sitting at the next bench and told him to get busy and put it in good order.

"The next thing to be done," said he, "is to remove the remaining back and the cap from the center and take off the old, bad joints."

He picked up a flat graver, placed the sharpened end against the plug in the end of the joint, hit it a couple of taps with a small hammer and out flew the plug.

Then he took a small steel point, inserted it in the joint and knocked the joint-pin out far enough to catch it with a small pair

Waltham Watches

COLONIAL SERIES

COLONIAL SERIES movements are made by the WALTHAM WATCH COMPANY only. They are supplied in five qualities as follows:

RIVERSIDE MAXIMUS; Nickel

23 diamond and fine ruby jewels; two pairs diamond caps; raised gold settings; accurately adjusted to temperature, isochronism and five positions and carefully timed; compensating balance; meantime screws; patent Breguet hairspring, hardened and tempered in form; patent detachable balance staff; both balance pivots running on diamonds; double roller escapement; sapphire jewel pin permanently driven into the roller; exposed sapphire pallets; steel escape wheel; gold train; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels; steel parts chamfered; fine glass handpainted dial of most modern and artistic design.

RIVERSIDE; Nickel

19 fine ruby jewels; raised gold settings; adjusted to temperature and five positions; compensating balance; meantime screws; patent Breguet hairspring, hardened and tempered in form; patent detachable balance staff; double roller escapement; steel escape wheel; exposed sapphire pallets; red gold center wheel; patent micrometric regulator; exposed winding wheels; tempered steel safety barrel.

ROYAL; Nickel

17 jewels; red gold settings; adjusted to temperature and three positions; compensating balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; exposed pallets; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

No. 1425; Nickel

17 jewels; red gilded settings; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; exposed pallets; red gilded center wheel; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

No. 1420; Nickel

15 jewels; settings; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; exposed pallets; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

COLONIAL SERIES movements are sold in cases only. Each movement is fitted in its case and the watch timed at the WALTHAM factory.

Waltham Watch Company

Waltham, Massachusetts

of pliers, with which he removed it entirely. "To remove the worn-out joints properly and make a neat, clean job," said he, "I'll borax them well and pass them through the fire."

He drew a common writing slate toward him which he must have been using for years—the frame was black from age and around the edge was a wall of dried borax almost an inch high—within which he dashed a few drops of water from a bottle, and picking up a piece of prepared borax, rubbed swiftly, but lightly, until the liquid within the wall began to turn white; then he boraxed the old joints well with a small camel's hair brush, and placing the backs, cap and center on a small iron pan, picked up a pair of tweezers and went over to the gas house.

He turned up the flame, picked each piece up separately and, holding it firmly with the tweezers by the small part that he wished to remove, letting the heavy part hang down, he blew a light, even flame with his blowpipe until the solder was thoroughly melted and the pieces separated.

When he had removed the old joints from the backs, cap and center he placed them all in a solution of water and enough oil of vitriol to taste the acid, and left them there long enough to remove the hard borax and discoloration from passing through the fire, dried them thoroughly and came back to his bench to prepare them for rejoining.

"This dent in the center will be the hardest of all to remove," said he, as he fastened a snarling tool in the vise. The tool was bent at the end and rounded so as to fit loosely in the center. He moved the center back and forth on the tool until he had the dent where he wanted it; then, with a horn mallet, he began to tap, gently at first, until he found how hard a blow the center would stand; then harder, but very carefully, until he had the dent removed and the center in its original shape.

Taking up one of the backs he selected a smooth spot on his work-bench and a small, slightly curved face hammer and hammered out the worst and most prominent dents. Then placing the back on a piece of hard rubber about four inches square and three-eighths of an inch thick he burnished the back perfectly smooth and stoned it thoroughly with a piece of Scotch stone dipped in water so it would cut better.

Placing his straight-edge on the back and finding it sunk a trifle in the center, he fastened a small iron stake, which was rounded off nicely to fit the inside of the back, and moving the back around, easily and gently, keeping it close to the stake with a straight burnisher about an inch wide and an eighth of an inch thick, he burnished with a quick, deft movement round and round the edge of the back, just where it curved downward toward the snap, until he had the back raised in the center to its original position. He put the other back and cap through the same process, and they were as smooth and free from dents as they were when new.

Finding the backs and cap fitted loose on the center, he screwed a dog-wood chuck on his turning lathe, turned it down to the same diameter as the back, turned another to fit the cap, went to the swedging

block, selected a swedging cap that was straight enough to touch only the bead on the edge of the back, and using the wooden chuck as a wedge he tapped it lightly, turning the cap constantly so as to keep the back perfectly true and in shape. He soon had the backs and cap small enough to snap and fit on the center as well as ever.

He now had the center, backs and cap ready to rejoin. Snapping the cap on the center, he broached the passage out thoroughly, did the same to the backs, opened the case again, brushed the passage for the joint on each piece thoroughly with a stiff bristle bench-brush, took a piece of joint wire the right thickness and about a quarter of an inch long, cleaned it off thoroughly with a small fine file, with which he made a couple of marks on the seam of the wire so as to be sure to get that side down, boraxed the passage, being sure he didn't have the borax too thick, because then it would blubber and be apt to shove the joint out of place, doubled a piece of binding wire, fastened the end where it was doubled firmly under the snap of the back, drew the wire across the middle of the back and the separate ends over the joint he wanted to solder, one wire near each end of the small joint, pressed the ends against the back bearing and secured them firmly.

When he had the joints tied on securely he placed a piece of solder about the size of a pin-head on each joint, blew a steady flame and heated the piece gradually and evenly all over so they wouldn't warp, then directed the flame to the joint itself until the solder had melted thoroughly and he was sure it had run evenly and he had made a good job.

Removing the wire from the pieces he had rejoined, he pickled them, dried them thoroughly and started to rejoin the center.

He doubled another piece of binding wire, twisted the end in the center with his pliers about a half inch from the joint passage, wrapped it around the center a couple of times to fasten it, placed two pieces of joint wire in the passage about a quarter inch apart, wrapped the binding wire twice over each piece and fastened it with a couple of wraps around the center. He now had the joints tied on the center snugly, picked up the back, placed the back-joint between the two pieces of joint-wire he had tied on the center and shoved the two pieces up close to the piece he had soldered on the back, so when the back was pinned to the center he would have a tight, snug joint.

He went through the same operation with the cap joint, but with this joint he tied one piece on the center and two on the cap, boraxed, charged and soldered them, boiled them out and was ready to fit the spring.

"Now I've struck a snag," said he, after looking through his box of springs, "for I haven't a spring anywhere near the right size for this case, so I guess I'll have to make one."

He took a piece of steel about two and a half inches long and about a quarter of an inch square, necked it by getting it cherry red and letting it cool gradually so he was sure it was soft and malleable; filed a recess about a half inch long for the neck of the spring, leaving the two ends of the piece its original thickness for

the head or lock, and body of the spring. He then rounded the piece up, giving it the same curve as the center and had a lock-spring roughly shaped.

He now fitted the spring to the center, filed the neck down to the right thickness, shaped up the lock or spring head, finished it with a small, smooth file and his emery stick, polished the inside curve of the body on a small emery wheel, hardened and tempered it by getting the head and neck of the spring cherry red and dashing it in a pan of oil, repolished it and tempered it by heating it in a soft flame until it was a nice shade of blue and he was sure it was hard enough to spring, but not brittle enough to break easily, and the spring was ready to fit in the center.

"If you are willing to have the backs re-engine-turned and a new bow put on the pendent," said the old gentleman, looking up at me, "you will have a case that will look new to the eye."

"Make it as pretty as you can," answered I. "That's what I brought it here for."

He went to the engine-turning lathe, selected two chucks the proper size, heated the cement that was on one end warm enough to be kneaded with the fingers, fitted one back on each chuck, pushed it down firmly until he was sure he had the inside of the back full of cement and there were no air-holes, screwed one of the chucks on the lathe, sat down and went over the lines until the engine-turning appeared as good as new, took it off, screwed the other chuck on the lathe and put the other back through the same operation.

"I've struck another snag," said he, as he returned to his bench, "for I haven't a piece of wire thick enough to make the bow, so I'll have to melt a piece."

He selected a good, solid piece of charcoal, with no cracks nor flaws, from the box, scraped a long, narrow hole in it about an inch and a half long and a quarter of an inch wide; cut up some thin 14k. sheet gold in long, narrow strips about the length of the hole, boraxed them well so they would melt evenly and flow together, blew a strong, steady flame on the gold until it was thoroughly melted and had filled the hole in the coal, waited a moment for it to harden, dropped it in pickle to remove the borax he had used for a flux, dried it, hammered it round, tapering one end slightly with the hammer and finishing with a file, necked it thoroughly to make it soft, drew it through his draw-plate until it was perfectly round and the right thickness, screwed an arbor or mandrel the right diameter on his lathe, stuck an end of the wire in a small hole in the arbor, holding the other end firmly with a strong pair of pliers, turned the lathe with his hands a few slow revolutions and had a couple of perfect rings made.

He cut one of the rings off the right length, smoothed up the ends, not too round, with a fine file, gave it a couple of taps with a mallet to bring the ends closer together so he could spring them into the sockets of the pendent and they would fit tight and snug and the ring wouldn't flop back and forth.

He now had the case ready to tripoli, or buff, before pinning together.

Using a small felt buff for the inside of

RING OUT THE OLD—RING IN THE NEW

STANDARD.—30-hour time, Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

THE RATTLER.—30-hour time, Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case nickeled and highly polished.

LONG ALARM.—30-hour time, Six-minute Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

ALTERNATOR.—30-hour time, Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

Why travel in the same old rut the balance of your natural life, and buy the same antiquated styles of Nickel Alarm Clocks your grandfather used to buy, just because some manufacturers have not thought it necessary to produce new designs in Nickel Alarms, as they do in other clocks?

We have some new ones, superior to anything heretofore made, and to introduce them and put a set into the hands of every jeweler, we will, on receipt of \$6.00, deliver east of the Rocky Mountains, express prepaid, one sample of each, consisting of eight clocks as described.

Don't fail to avail yourself of this opportunity to see a complete line of up-to-date alarm clocks.

See coupon at bottom of page.

THE E. INGRAHAM COMPANY, BRISTOL, CONN.:

Gentlemen—Enclosed find \$6.00. Please send me by express, prepaid, your "Introductory Assortment" of eight alarm clocks, consisting of "Standard," "The Rattler," "Long Alarm," "Alternator," "Di-Alternator," "Siren," "Vibrator" and "Rotator." Yours truly,

Name.....Address.....

the backs and cap he buffed them with a paste of tripoli and oil until the scratches were all removed and they were perfectly smooth. Then he polished them with a paste of rouge and oil, and then using a clean buff for dry rough he gave them a high polish and the inside of the backs were done.

He tripolied the center, pendent and bow with a small stiff-bristle wheel and the case was ready to be pinned, sprung and finished.

He put a piece of brass wire five or six inches long in his pin vise, and with a swift backward and forward movement, resting the wire on his pin-block, he filed it down with a fine flat file, tapering the end slightly until it fitted the joint tight and snug, cut the pin off with his cutting pliers, touched up the ends with a smooth file, drove the pin home with his steel point, worked the cap up and down a few times to see that the friction was all right and the joint was tight and snug and would wear well, snapped the cap down on the center and pinned the backs on the same way.

When he drove the pin home in his back joint he left it short enough to give him about an eighth of an inch at each end for a gold plug.

He put a piece of gold wire in his pin-vise, tapered the end until it fitted the joint, forced it in as tight as possible, cut it off about an eighth of an inch from the joint, rounded it nicely with a smooth file, closed the backs down on the center, tripolied the outside of the case with his small, bristle wheel to remove all scratches and blemishes, gave it a high polish with a soft, fine flannel buff and dry rough, fitted the lock-spring and fly-spring in place, fastened them with a small set-screw, fitted the movement in the center and handed me a watch that was in as good a condition and looked as new as it did the first day it was bought from the dealer.

Testing Oils for Resinous and Acid Components.

To determine whether or not a clock or watch oil contains acid, dissolve in 100 parts of distilled water 10 parts of nitrate of soda and filter the fluid. Then take a test glass and in it mix one part of this solution with about an equal volume of the oil to be tested and shake the mixture up vigorously. If the oil contains acid the contents of the test glass will assume a milky appearance and a jelly-like deposit will be formed.

If, on the other hand, the oil was free from acid it will separate, after the solution, in the form of small globules, and the mixture neither assumes a milky appearance nor forms a deposit. If it is further desired to ascertain whether the oil contains resin particles or not, we pour for this purpose a few drops of the oil on to a glass plate, cover the latter with a second glass plate and expose the whole to warm air.

After the lapse of four days we ascertain whether the plates stick together; if this is the case the oil contains resinous matter, otherwise there will be none contained in it.

Bronze Clock Made for Hudson River Steamer.

The bronze clock illustrated herewith was designed and made by Reed & Barton especially for the Hudson River steamer *Trojan*, to which it was presented by the Chamber of Commerce of the city of Troy, N. Y.

The classic character of the design was

egg and dart molding, the trident being substituted for the dart.

The sides of the case are arranged with slightly sunk panels. For the ornament surmounting the case the coat-of-arms of the Troy Chamber of Commerce is shown, supported by Dolphins, with shells and seaweeds upon the surface of running water. The whole is crowned by a Trojan helmet.

The finish of the bronze is verde antique,

BRONZE CLOCK RECENTLY PRESENTED TO THE HUDSON RIVER STEAMER "TROJAN."

suggested by the name of the boat and city, and the treatment is marine, to accord with the purposes of the piece.

The dial, which is the prominent feature of the case, is surrounded by 24 scallop shells for the 24 hours of the day. These are flanked by trophies of the sea and the sea god Neptune.

The panel which carries the inscription is raised upon the body and forms a fitting decoration for the lower portion of the case. The border is a marine adaptation of the

very carefully shaded from the natural bronze colors to a deep green, and the effect with the gray silver of the dial and the rich dark brown bronze of the numerals is most artistic.

The clock itself has an eight-day movement, striking the ship's bell. The dial is 12 inches in diameter.

The size of the piece should make it a notable feature of the magnificent steamer for which it is intended, as it measures 45½ inches high by 30 inches wide.

FULCRUM OIL COMPANY, Franklin, Pa., U.S.A.

The "Monastery"

We constructed the "Monastery" works with a view of competing with a weight movement against inferior spring works. Our success has been great. The weight "Monastery" construction, chain wind, is of such excellent quality in every respect and offered at such a reasonable figure that it is out of question to-day to offer any hall clock above \$50.00, with long pendulum spring works.

A genuine Grandfather clock has always a weight movement. And we will state that any chiming Hall clock made up with a cheap spring movement can never be satisfactory. The hammer blow is too weak to get the tone out of good bells; only thin, light bells can be used with the little blow of the hammer; every day the spring gets weaker and the chiming slower; it even ceases after 5 or 6 days. Besides, in such cheap affairs the dial works are not suitable for quarter chiming. The combination makes a very poor clock. Not so with the "MONASTERY," which are heavy, powerful brass works, with solid steel pinions and huilt as a good weight chiming movement should be constructed.

The illustrated model is a fine piece of furniture, fit for any residence, and can be obtained with three combinations of striking:

1. With five 1 1/4" tubular bells, made and tuned by Mr. R. H. Mayland (Westminster chimes); list.....\$180.00
2. With five rodgongs, also Westminster chimes; a feature in this combination is that the hour is struck on 4 gongs which, being tuned in a chord, produce a sound which is the nearest imitation of the distant resonance of a big tower bell; list... 151.00
3. Hour and half strike on 4 rodgongs, tuned in a chord; list..... 104.00

STORE KEEPING DEPARTMENT

Helpful Holiday Talks

Written expressly for THE JEWELERS' CIRCULAR-WEEKLY by a practical storekeeper, now actively engaged in business, will be published in this department next week. Read them yourself and pass 'em along to your clerks.

Building Up a Business by Sheer Grit.

How a Jeweler Enlarged His Store and Increased His Business in the Face of Discouraging Conditions.

"I DOUBLED my year's business in 1908 and in January, 1909, trebled it over any preceding January," said Herman S. Miller, 486 Mitchell St., Milwaukee, to a representative of THE JEWELERS' CIRCULAR-WEEKLY. "Running up against hard times is not without its compensations; for instance, in discovering one's own capabilities or good fortune. For a number of years I had directed a small store with everything running smoothly and with an assured living. In December, 1907, however, I came to the conclusion there wasn't much in the jewelry business: that I was nearing the half-century mark and that I would quit.

"But I did not know for sure whether a man was justified in becoming a quitter at 50 or whether I had enough money to live on without work for the remainder of my days, so I took a larger store near by, but in my old neighborhood, and put in the proper fixtures with the accompanying trimmings. The night I opened the new store the actual noise of the approaching panic was rumbling pretty loud, and I wasn't sure whether the noise was drawn to me because I looked so well fixed, or whether, having got a lot of real money invested, it was drawn towards me because it thought I was an easy mark. The reasons have been proven, however.

"It is with proud qualification I say that Good Fortune was loyal. That gay girl, who seems to have her nest on Mitchell St., has stood by me with a gentle sympathy and unflinching devotion for over a year, and I believe she will never fail.

"With the taking of a larger store, I retained my old patronage and gained much that was new. I discovered, too, that people paid me fairer prices because of my new departure and I lost those friends who had thought that in my insignificance lay their credit. Take it all around, I found that an appreciation of 'get-up-and-git' exists as a bedrock-enduring quality in all communities and among all people alike.

"The manufacturers and the jobbers proved to me that the net cost of running a big store is not so large as running a small one. Though credit was not needed, I found that it was far greater in proportion. All business men with whom I was brought

in contact and all custom came to my store with a cheerfulness that was most inspiring.

"While I gained many customers by swelling up a little, not the least thing that has solaced me is that my relations with the old ones seem absolutely improved by every consideration."

"And so, perhaps, I may say the 'hard times' have revealed to me, and other jewelers who may read this, conditions of business we never otherwise would have known, and by the experiences of the past year and with prospects most cheering, I am emboldened to advise that no man need be afraid to extend his business, even on the brink of hard times."

Dropping Old Ideas When New Ones Are Better.

WHEN precedent and progress clash, drop precedent. Too many retailers are to-day doing business exactly as father used to do. Father was probably a successful merchant and did many things in a manner which can still be emulated by the son to his own advantage, but there is continual progress to contend with now, as there was at the time father started in business.

Father probably did many things before he quit business that would have been entirely useless in the early stages of his business career. Father undoubtedly had some good underlying business principles which can still be taken as a precedent, and can well be instilled into your children's children as good business doctrine, but if father was in business to-day and wanted to be a live one, he would cut loose from precedent in a great many instances and adopt the more progressive ideas.

He would recognize the fact that times change, that the prairie schooner was once all that was needed to handle the freight of this country, while now the fast-moving freight trains cannot take care of all of the business offered at certain times. Do not allow your business to continue to be a prairie schooner of the business world.—F. A. P. in *Grocery World and General Merchant*.

Proper Illumination for Windows.

MUCH of the advertising value of a good display depends upon the manner in which the window is lighted, and the effect of many a good display has been largely lost at night because of poor lighting.

It may be argued by some merchants that there is little to be gained by lighting the windows up well at night, since there are fewer people on the streets, but it must also be remembered that while there are fewer people, there is, as a rule, less to distract their attention. During the day people are usually hurrying somewhere and there are so many things going on that the windows have to be content with a small part of their attention, but at night when people are walking, perhaps for pleasure, the windows have full sway.

There is something particularly attractive about a handsome display brilliantly lighted up and looking cheerful, up-to-date and prosperous.

The most important thing to be considered in lighting the window is to have the light all thrown downward on to the merchandise and not out into the eyes of window-gazers or on the sidewalk. Wherever a light shines directly into the eyes of the spectators it should have a frosted globe, which softens the glare and gives a soft, pleasing radiance without sharpness. There are several excellent forms of show-window reflectors of the "bonnet" type which throw all light from incandescent lamps downward on to the merchandise and effectively screen the lights from the eyes of passersby.

Frosted globes may be very effectively used on auxiliary lights in the background, and if colored may be used in an appropriate color scheme. Frosted globes are also sometimes used throughout the window, when they throw a soft, mellow light over the whole display.—*The Twin City Commercial Bulletin*.

A gold medal, awarded to the successful contestant in an oratorical contest, was exhibited recently in the show window in the store of E. H. Rowe, New Haven, Conn.

It pays to find out once in a while that the Other Fellow has something which he considers Worth While, and is just about as insane over it as we are over our Particular Stunt.—Thomas Dreier, in *Sheldon's Business Philosopher*.

An original Thanksgiving Window Display will be published in this department next week.

Storekeeping Department.

Unique Float Used by St. Louis Firm During Recent Business Parade.

THE jewelry and optical business of Joseph and Louis Ebeling, 14th and Warren Sts., was advertised by a float in the annual parade of the North St. Louis Business Men's Association, held recently, preliminary to the annual picnic. The Ebelings were the only jewelers and opticians represented in the parade.

The float represented the optical end of the business. The centerpiece was a huge pair of spectacles, five and one-half feet high. The float was decorated with natural flowers, and the horses drawing it were hitched tandem. Benjamin Schaller, one of the salesmen in the Ebeling store, was on the float, giving away monocles, on the reverse side of which was printed "I can make you see things. Louis C. Ebeling, optician, 14th and Warren Sts."

Louis Ebeling acted as one of the aides to Grand Marshal J. H. Gundlach. Joseph Ebeling rode in a carriage with Mayor Edmond Beall, of Alton, the guest of honor.

Importance of an Index.

FEW storekeepers have realized the importance of an index containing all information which would be of help to them, contained in the various trade papers to which they subscribe.

In every issue there is apt to be one or more articles in which you are particularly interested—in fact, trade papers are a mine of information; but in reading them it is

the time comes to use that particular information the paper has either been mislaid or the reader has forgotten in which paper or issue the article appeared.

This means a loss of time going through a pile of papers, and you may not find it at

you can lay your hands on it at any future time at a minute's notice?

The idea of which you retain but a faint recollection is brought before you in a clear manner once more. One index will serve to cover all papers, so that it will not

THE RETAIL JEWELRY STORE OF C. B. CURTIS, VILLISCA, IA.

all, thereby losing a valuable idea or an imperfect carrying out of a plan from memory will result.

Trade papers, as a general rule, are read through hurriedly by busy men until some-

it is necessary to have more than one index for reference to everything one has been interested in in a trade paper.

Identification marks should appear opposite each item, showing in which paper it appeared.

If you don't care to go to the expense of a card index, a scrapbook will answer the purpose just as well, although a card index is very easily made, as you can buy index card systems for about \$2.50, or you can make them yourself. Cut them from heavy cardboard about five inches wide and insert in an ordinary candy box of suitable size. The division letters should be drawn on large enough so that they can be readily seen.—*Farm Machinery.*

A Neat Little Store in Villisca, Ia.

VILLISCA, Ia., has a population of less than 2,500, but that prosperity must reign there is evidenced by the appearance of Charles B. Curtis' store, pictured above.

Mr. Curtis carries a large stock and his fixtures are of the most approved kind. Mr. Curtis belongs to the Jewelers' Security Alliance, as also does Mr. Tinsley, of the same town.

A storekeeper on Broadway, New York, who evidently possessed a considerable volume of humor, took advantage of the public's curiosity by showing in his window during the Hudson-Fulton celebration some ordinary dirt surrounding a small tank, the latter containing a reproduction of the *Half Moon*. Inserted in the dirt was a placard bearing the inscription: "Dirt taken from the river discovered by Henry Hudson in 1609."

A FLOAT THAT ATTRACTED CONSIDERABLE ATTENTION DURING A RECENT BUSINESS PARADE IN ST. LOUIS, MO.

impossible for one to remember every good thing unless he has some method of reference.

thing strikes them which they would like to dwell on a little later.

Wouldn't it be a hundred times better if each particular article were indexed so that

Papers are filed or laid away and when

The Better Half of Good Advertising Is Making Good.

By Charlotte Mangold, in *Novelty News*.

WHEN requested to pay a bill one day, a prosperous looking gentleman said: "I always leave those matters to my wife." But his wife was never home. And the tradesmen one after another "caught on" to the plan and the wife might stay home after that, as there were few bills to pay. The credit of the florid gentleman gave out.

The better half of advertising is "making good." This is an easy way of stating a fact of more detailed importance than is contained in any other two words related to advertising. I know, making good without advertising is making good without selling. What I refer to by the expression is to substantiate successful advertising by constant fidelity to the details attendant upon every trade.

"How is business?" was the question asked by a manufacturer, whose reply was, "Business is agonizing. We have to agonize to get the orders, agonize to make the goods and then agonize to get our money." A little inquiry on the side revealed a startling array of features that accounted for the view so expressed. The advertising manager made it plain. "I stay awake nights to devise the advertising, use every medium possible that proves its merits—magazine, newspaper, novelty and circular advertising, and I make good. I get the orders. But they fall down in a thousand ways in the office and factory and make my advertising void."

"How do they do that?" I inquired. "Do you make any claims that your firm cannot fulfil?"

"I never make any claims that are not sanctioned by the firm. Having the substantial foundation of assurance, I inject this assurance into my advertising. Then the orders come in, and then the goods are not shipped on time, or they are not made according to representation. Then orders are canceled, and those that are accepted that have been delayed are not paid for promptly. If you don't ship goods on time you need not complain if you don't get remittances on time. In fact, some people are glad of the excuse to run beyond the time of payment, and these are sure to take advantage, while others certainly have a good excuse. I admit that I do have to agonize to advertise, but the agony is intensified by the practice of the office and factory in not making good. If they did their part, my agony would pay all right."

The better half of advertising then consists in backing up the promises and representations made by the fulfilment of shipping requirements and standard of quality

expected. A great number of details interfere with these principal features, as they involve all the processes of manufacture, purchasing of material and handling of the correspondence between the office and the customer. Failure to order some part of the materials needed in time prevents the supply house from getting goods made up and shipping in season.

The supply house is just as much governed by time requirements as the manufacturer of the completed article, and if the purchasing department does not order early enough and the supply house is unable to make the extraordinarily quick and unusual delivery, the manufacture of the completed article is stopped, the customer incensed and the reputation of the house impaired accordingly. Very often the completed goods lack just one article, which if ordered in time would have saved the superintendent of the factory from unpleasant consequences, avoided the necessity of urging employes up to the point of slighting the work by the extreme haste imposed, prevented the house from indulging in careless handling of the truth and lessened the misgivings of the advertising department in making claims as to the excellence and promptness of delivery of goods.

The correspondence between the house and the customer affords a critical opening for unpleasant terminations of business relations frequently. While it is not necessary to consider the customer "sacred," to quote Emerson, the intelligent customer feels that he is entitled to straightforward advice, and if he is intelligent he repels any retort tinged with irascibility, or brevity akin to abruptness. The sensibility of the customer is more acute toward the house that he patronizes than it should be, perhaps, but the buyer is generally in the position to insist upon courteous treatment; even if he does not accord it to others, or is not in any particular case quite entitled to it, the unjust customer will insist upon nice treatment anyway, and while it does not cost much to give it to him, it costs more not to do so.

Great care should be exercised in correspondence at all times, in the matter of promptness, completeness and sincerity. A polite and apologetic letter has often saved a good order deservedly lost, an unnecessary word or phrase has time and again cost the house a large amount of business that would have been cheerfully given. Written words are not softened by musical intonation or modulation, and a term that might be softly spoken and fall upon the ear agreeably might, when written, strike the

eye too sharply. In fact, what applies to the correspondent applies equally to the superintendent or foreman, and that is, people must be spoken to and written to in such a way as not to incite antagonism or make a person think that his service or patronage is not particularly appreciated.

In other words, the relation between factory and office and office and customer is one that must not be strained, if the work of the advertising department is not to be dampened by discouragement and loss of business.

Then the credit of the house must be maintained, not only by able financial management, but by a close adherence to its stated policy. What this has to do with the advertising department is clear enough to the advertising manager. If a house is known to be honorable in other things besides paying its bills, its credit is still more valuable to the advertising manager. A salesman called upon a large house one day to get a prospective order, but the buyer said: "There is no show for you to get this order; I wouldn't buy a cent's worth of your house."

"Don't we deliver the goods all right?" asked the salesman.

"That part is all right, and I don't question your financial credit, either, but when our salesman goes around to your buyer to offer his goods he gets the shabbiest kind of treatment from your buyer, and we can buy our goods somewhere else and at the same time be polite."

Surely a policy like that hurts the credit of the house. This shows that something besides paying bills promptly and shipping the right goods on time is necessary to preserve the standing of a house to back up the efforts of the advertising end. Not only must its buying department purchase on time and the manufacturing end be allowed sufficient time to make up the goods without slighting any of the details, but other people must be given fair treatment, because, while they may want to sell you to-day, some other time they may be the customer.

Partiality in purchasing also hurts the credit of the house and impairs the work of the advertising department. The danger of bidding one seller against another by giving hints as to the quotation is a decidedly intolerable practice and should not be allowed. Other things being equal, the man with the favorable price is entitled to the business, and no "friendship" should operate here. "Friendship" may be considered when all things are equal, but even then it is apt to prove risky at some time. If "business is business," it is more profitable to stick to business, thus not only benefit yourself, but make it unnecessary for any other department to answer for the irregularity, carelessness, poor business tact or loss of business chargeable to others.

The business formerly conducted under the style of J. & W. Taylor, at Newburg, N. Y., has been purchased by W. H. Werre and A. S. Brundidge.

Wm. G. Young, Jeffersonville, Ind., is about to move his stock into larger quarters owing to increasing business. He has secured a lease of the York building at 346 Spring St., where he will continue business.

Retail Advertising Department.

Up-to-Date Selling Methods.

(Extract from an article by FRANK FARRINGTON, in *Advertising and Selling.*)
(Continued from issue of Oct. 20.)

THERE is no top in salesmanship. The man who will can forever improve in his ability along that line. No man ever reaches a point where he knows all there is about selling goods.

They say an old dog can't be taught new tricks. That is a mistake. An old dog can be taught new tricks; and if not many new ones, he can at least be taught to do the old tricks better. As long as a man remains in the harness he is capable of improvement. He may forget some things, but he will learn others, and if he has reached the point where it is easy to forget, he has reached a point where he particularly needs to learn.

The thing which will keep a man from forgetting to do his work properly is habit. We are all slaves of habit, and to habituate one's self to right methods is to make them a second nature which cannot be laid aside.

It takes no more of doing a thing right to make the right way a habit than it takes of doing it wrong to make the wrong way a habit. And it is surprising how few times one needs to do a thing to form the habit.

This makes it easy to make a habit of enthusiasm, cheerfulness, politeness, neatness, any of the desirable attributes. Habits of exercise, dress, thought, manners, emotions, all are easily learned and with difficulty cast aside.

Enthusiasm is one of the important things that a salesman should cultivate, and it is even more important than most of us realize. Enthusiasm is communicable even to the man to whom we are trying to sell goods. It helps our associates and it helps ourselves. I don't believe you know of a single man who has made a real, great success who has not a large amount of enthusiasm in his makeup.

Enthusiasm encourages one to think and to expect great things for himself and for his business. It keeps him firm in the belief that his line of goods are the best goods and that all others are inferior. Enthusiasm is the mother of optimism, and as long as optimism can be curbed to a point where it will not altogether run away with the man, it is the greatest thing invented for making successes.

Without enthusiasm and optimism the great things of the world, the great inventions, the great businesses, the great works of art, anything great, would not have been accomplished. Of course, when enthusiasm runs riot in a man's brain and he begins to think that he can accomplish the impossible, and he discounts his future by thinking and living in amounts of five figures while his income remains low in the four-figure column, then it is too much of a good thing.

Along with the cultivation of enthusiasm should go the cultivation of good judgment. These two, judgment and enthusiasm, the success twins, will make life's hill-climbs easy.

Enthusiasm allows no half-hearted devotion to a cause. It makes a man all interest

in his work and compels him to devote all his energy to accomplishing the one thing he has set out to do.

The habit of cheerfulness is one that is native with some people and totally unknown to others. "The smile that won't come off" is a thing that will attract 99 out of 100, and the hundredth man can be spared.

Customers should be greeted with a smile and a "good morning" that carries with it the idea that it is a good morning. If it is a good morning for you, you can make others think that it is a good morning for them, by the exercise of a reasonable amount of cheerfulness and tactful suggestion.

And that reminds me of another important qualification for the salesman: Tact. Tact is the ability to make a customer feel comfortable. Lack of it is what makes the blunderer, and if there is an absolute apotheosis of the salesman, that apotheosis is the blunderer.

Tact tells a man the right thing to say and the right time to say it. It helps him to put the hesitating customer at ease, and it makes the man or woman with a little money feel that his or her purchase is just as important as if it involved a large sum.

Tact keeps a man from inquiring after a customer's father when the old man died just the other day. It also keeps him from alluding to divorces and second marriages and mothers-in-law, and other similar subjects when talking to people with whose family history he is unfamiliar.

It tells a salesman what grade of goods a customer can afford to buy, and wants to buy, and it prevents the often fatal blunder of recommending a grade lower than that desired by the customer, thus to insinuate that that customer is of that grade herself.

Tact is the wonder-worker in the selling line. It is almost a cure-all. Cultivate tact, and I am almost inclined to say that salesmanship will cultivate itself.

(THE END.)

Weakness of the Puff.

(Extract from an article by ROBERT I. CLEGG, in *Advertising and Selling.*)

JUST as the reader looks upon the efficient trade paper as an important link in the chain connecting him with the latest progressive practice of his craft, so does the observing advertiser see the weakness of the puff and how its extravagance casts a reflection upon the good sense of subscriber as well as editor. To emphasize this latter condition as a situation to be shunned by advertiser fully as much as by the editor is obviously a part of the work within the province of the advertising solicitor. He can support the editorial endeavors and advance the best interests of the advertiser by keeping the trade paper free of the least suspicion that its favor can be bought and sold. It is on the efficient editorial independence and sincerity that circulation thrives. The publication of mere complimentary material about an advertiser's doings may therefore be set down as dangerous in that it tends to damage the readers' estimate of the editor's liberty of expression.

Catch phrases, descriptions and arguments which retail jewelers have used in their newspaper advertisements.

WE'RE just a little proud of our table silver, cut glass, bronzes, clocks, solid silver and art objects. It's a brilliant assemblage intended to brighten home and home life. And our prices are no higher than those asked for make-believe things which this store won't handle. L. F. Whitney, Clinton, Mass.

Wedding Suggestions.—This is the month of all months for the prospective bride, and those who are expecting to buy a gift will do well to visit our store and see the beautiful display of suitable articles which are useful as well as ornamental. Here are a few helpers: Chests of solid or plate silver, teaspoons, dessert spoons, dessert forks, salad forks, orange spoons, fancy silver cake dishes or a nut bowl, silver tea sets, coffee sets, bakers and the new casserole with a silver jacket; china plates, all sizes; cut glass, anything you want; carving sets. You will make a big mistake as well as a loss if you do not look over the most up-to-date stock shown in the city. Chas. W. Fleming, Lincoln, Nebr.

Novelties in Solid Silver.—We're showing many new affairs in solid silver for the table, including holders of all sorts—for cheese, preserves, Worcestershire sauce and other things—in their original packages. Casseroles, steak sets, relish dishes, sandwich plates, bread trays, breakfast and tea roll dishes—the newest designs and shapes. The finest goods, in the heaviest weight, at the lowest prices. Flickinger's, Norfolk, Va.

The Watch for His Wife.—"Wishing a temporary watch for my wife, to keep fairly good time for her till I could afford a better one, I gave you \$8 for one you recommended, and it has been keeping such accurate time for three years I guess you cut yourself out of the sale of a costlier one." Well, that's all right. We're glad, and not surprised, at that watch's service. We love to have people "happily disappointed." If you've any idea of buying a watch, see our great assortment. Paul-Gale-Greenwood Co., Norfolk, Va.

Bridal Gift Suggestions.—Our displays of unique and exclusive articles for the Autumn bride are worthy of special notice, and we welcome everyone to inspect our beautiful goods, whether a prospective buyer or not. There is a fine variety of Hawkes and Dorflinger cut glass, Gorham and Reed & Barton's silverware, all especially low priced to tempt the economical buyer. Samuel Phillips, Stamford, Conn.

R. H. McEwen has removed from Stewart, Minn., to Aberdeen, S. Dak.

KALANA GLASS

AN entirely new and beautiful effect in etched glassware in which floral designs, such as pansy, lily, poppy, geranium, etc., are shown in an attractive manner true to nature. No illustration could convey the exquisite beauty of this ware.

During the dull times we have been preparing to meet the prosperity which we were certain would follow. You can now find among our samples many good things in Cut Glass, Engraved Glass and Rock Crystal for prompt shipment.

The Evolution of the Teapot.

From The Pottery Gazette.

THE style of teapot that, with a slight variation, has become the commonest and most popular of all varieties of the vessel, is the Rockingham. What amount of ground for belief there is in the fancy, current to this day, that this class of teapot is peculiarly adapted to the extraction of the tea to the best advantage, is not easily understood. Such virtue, however, was popularly credited to them from the first, and they achieved an immense vogue about the middle of the 18th century. They were made at Swinton, in Yorkshire, on the estate of the Marquis of Rockingham. Chaffers, in his invaluable work, states, in reference to these pots, "They were taller than usual, and in form more like a coffee-pot, which was considered a great improvement. Mortlock, the china seller of Oxford St., is said to have ordered of this article alone £900 worth for one season's demand." This was, however, a superior kind of Rockingham to the one we know, as we read the teapots were "lined with white, though of a chocolate-colored glaze outside."

This chocolate color is, as is well known, obtained from a stain composed from a preparation of manganese, and led in later years to variation in the amount of stain introduced; the more manganese imported into the glaze the darker the color, thus leading to the distinction of black and brown Rockingham. It was found, however, that a certain limit of blackness only was obtainable, and casting about for other substances to obtain the result desired, some unknown individual conceived the idea of substituting oxide of cobalt for the manganese. This stain, in combination with the dark red of the clay, produced a brilliant black, which was given the appropriate name of "jet." The so-called jet teapots became very popular for a long period—a surprising fact, when we consider the unsuitability of the color for articles of daily use, and the imperative necessity of the glaze being comparatively soft and liable to craze with variations of temperature.

From Rockingham and jet to Jasper is a long cry, but it is impossible to pass over this period without advertising to the admirable productions of Wedgwood. With the brothers Elers, he shares the glory of having produced the finest and most highly finished of all teapots. There is no doubt that, apart from purely ornamental goods, the teapot was made one of the principal objects of his artistic efforts, giving it that purity of outline and contour that is so characteristic of his productions. It is

curious to note that in connection with his early life, as an apprentice, that after a short experience on the thrower's wheel, which he had to abandon owing to physical infirmity, he turned his attention to what is now known as "pressing," and the first object on which he exercised his newly acquired skill was a teapot. This teapot has been religiously preserved, and forms an interesting relic in the collection of the great master's works now at Etruria. It is of a curved cylindrical shape, wider at the top and bottom, has a handle in the form of a branch extending on both sides of the pot, and embellished with flowers.

With Wedgwood we may fittingly end our consideration of old teapots. We cannot find in subsequent years that any striking innovations were made, either in design or body. The eccentricities above alluded to were continued, and, however curious from the collector's point of view they may appear, they add little or nothing of sterling worth to the life history of the teapot. That some collectors specialized on this article is shown in the record of a lady in the reign of George IV., a certain Mrs. Donkin, who is reported to have had a collection of no fewer than 300, several formerly belonging to Queen Charlotte.

The modern teapot has, of course, as is natural in the later mechanical development of potting, less characteristic individuality. Various manufacturers specialized on these articles, especially in the direction of stone ware, Rockingham and jet, and the efforts of succeeding potters were directed more to the question of cheapness and the production of huge quantities than to any improvement in body, glaze, or decoration. The lack of serious difficulties connected with the production of Rockingham and jet teapots proved seductive to the lesser equipped aspirants to the status of a "master potter," and a host of small manufacturers sprang up, and in many cases went down again, whose only hope of success lay in producing as cheaply as possible, often by the aid of personally working at the bench, reinforced by wives and relations generally. This system of manufacture, owing to the lack of capital which these persons labored under, has led to a great reduction in prices.

The most important innovation of modern times seems to have been the introduction of a red body, similar to that employed as a base for the Rockingham teapots, but of a finer quality, and glazing with a transparent glaze. This was first introduced about 20 years ago, and called by its enterprising introducer "Samian," after the ancient pottery from the isle of Samos. This met with considerable success, and

has become in its various forms a regular and permanent feature of the teapot trade. The transparent glaze, by not concealing the true color of the fired ware, rendered many new effects possible, by the aid of colored and white bands, on which other decoration could be introduced. The fashion, however, at the present time has veered round to the white or light-colored teapot, so far as the better-class trade is concerned, owing, no doubt, to the fact that all the variations possible have been exhausted on the darker colored bodies.

Perhaps the most curious feature of the modern trend of ideas for the teapot is in the direction of various devices for preventing an excess of tannin, and other deleterious products of tea, from entering the cup. To judge from the frantic efforts that have been made in this way, it would almost seem that there was a positive danger of our being universally and systematically poisoned by tea made in the ordinary way. In fact, the ingenious promoters of these newfangled devices usually send out with their goods an ample assortment of literature bearing on this point, backed up by unquestionable medical authority, the reading of which is well calculated to make the peruser feel glad that he is still alive and that there is yet time to save himself and family from a lingering but none the less fatal end. Most of these inventions have for a basis the introduction of a perforated vessel, suspended or fixed inside the pot, in which the tea is placed, and from which at a given time the water can be withdrawn, leaving the deadly ingredients still in the leaves. There is no doubt that nearly all of these patented articles achieve their purpose, and fulfil the end desired, admirably. But it is curious to find that, except among faddists and seekers after novelties, these aids to health are persistently and systematically ignored. The people at large will not be turned from their evil courses, and will still go on poisoning themselves, slowly, it is true, but, according to the above purists, none the less effectively. The real reason for this apathy towards what is really a good thing may be found in the dislike of the present day housewife or domestic help, of any complication in articles of such constant use as the teapot. The cleaning of these additional complications is not at all to the mind of Mary Jane, and it is little to be wondered at if within a very short space of time an untoward but not unwelcome accident occurs, and the teapot, minus its hygienic attachments, goes on its career shorn of its chief glory, but still available for its simple and primary purpose.

There is also a certain sense of affection

centered on an old-fashioned teapot. It stands by the fire, an epitome of warmth and sweet comfort; it is associated with so many of our happy and domestic hours. It brings to our mind closed curtains, a warm fire, a comfortable hearth, an oasis of rest and relaxation in the desert of a cold and strenuous world. It is alike the last remaining comfort of penury, and the welcome accompaniment of the assemblies of the rich, when confidences are exchanged, wit and humor scintillate, and round it human nature expands and blossoms, and kindly sentiments and good feeling generally prevail.

Be it round or square, of finest china or

The Birmingham Jewelers' School.

THE Birmingham Jewelers' Association was founded in the Jubilee year of Queen Victoria, and from its very beginning has had as one of its chief objects the bettering of the artistic training of young people engaged in the jewelry trade. At first the jewelers arranged to fit out work-rooms in one of the existing branch schools of the Municipal School of Art. Later, the Vittoria St. School was created as an independent art school, governed by the Jewelers' Association and the School of Art.

The art-training given is very thorough.

Pottery and Glass at the Canadian National Exhibition.

(From the Canadian Pottery and Glass Gazette.)

FOR the first time in the history of the Canadian National Exhibition pottery found a place in the long list of exhibits. That it was a welcome and exceedingly attractive innovation was evidenced by the deep interest shown by all classes of visitors. Women especially, as might naturally be expected, lingered about the displays, and many a covetous eye was cast upon the superb wares.

In the case of the British exhibit, the goods were of such high grade, culled from the highest priced modern examples of fine pottery, that the prices quoted made possession prohibitive to the ordinary person of limited means, but that fact did not detract from the privilege of inspection, and many learned their first lesson in the art of distinguishing the finer wares from the commonplace. The educative effect of these displays cannot be too highly emphasized. The things that the Canadian woman, speaking generally, does not know about pottery are legion. She has never heard of many of the loveliest wares manufactured in the British and American potteries, and it was plain to be seen that she is willing and anxious to learn.

The British exhibit was not comprehensive. It was composed of certain lines only, which are practically controlled in Canada by one wholesale concern. Royal Crown Derby was represented by some exceptionally handsome pieces, very elaborately decorated; Royal Worcester was shown in a large number of pieces for ornament and use; W. T. Copeland & Sons had a conspicuous place in the display with splendid examples of modern-made Spode and wares of other and equally beautiful and artistic design and decorations, and Bernard Moore and W. Howson Taylor, maker of "Ruskin pottery," were represented by up-to-date achievements in ornamental pieces which covered a wide range and were remarkable for their fine coloring and finishes. Expert attendants cheerfully, courteously and untiringly gave intelligent answers to the hundreds of questions showered upon them, and it was a frequent salutation on the grounds, "Have you seen the pottery exhibit?"

The exhibit was not happily placed. It occupied a portion of a room in the Applied Arts building, but applied arts has a vague and uncertain sound to many people, and the building was not visited by the vast crowds that circled through the larger buildings. Perhaps this fault will be remedied another year, provided there is a larger demand for space.

The members of the Merchants' Association of New York were the hosts, Oct. 16, of the Honorary Japanese Commercial Commission, now visiting the principal cities of the United States. The steamer *Sagamore* was chartered for the occasion, and the commission taken on a trip around New York Harbor. Baron Shibusawa, formerly a member of the Japanese Government, heads the commission. Luncheon was served to the commission by the Merchants' Association.

AN EVENING CLASS AT THE BIRMINGHAM SCHOOL FOR JEWELERS AND SILVERSMITHS.

homely Rockingham, the teapot, of all ceramic articles, is the one which claims our affections and regard. To no other domestic vessel does the halo of sentiment attach like the teapot, and so long as the refreshing and stimulating beverage is enjoyed so long will it maintain its position as the vehicle of solace and the dispenser of good cheer.

A. Bergeda & Bro., jewelers of Nashville, Tenn., held their fourth annual Fall opening, Wednesday, Oct. 13, from 10 A. M. to 9 P. M., at their store, 610 Church St. For this occasion handsome engraved invitations were issued to their customers and the store was crowded from morning till night by customers and friends. Many floral pieces were sent by friends.

Free admissions direct from school are granted to lads who intend to become jewelers or silversmiths. These lads commence their art-training concurrently with their workshop training, and any lad who does not, in the opinion of the masters, seem fitted for the trade he has chosen is advised not to follow it any longer. This is a pretty advanced conception of the functions of a school, but in the interest of the students and the trade alike it seems a sound view to take under the circumstances.

The jewel presented to Queen Alexandra on the occasion of a recent visit to Birmingham (illustrated in THE JEWELERS' CIRCULAR-WEEKLY, Sept. 1, was made almost entirely at this school.—*Illustrated London News.*

CONFIDENCE

An old customer said the other day:

“Sometimes I get a smaller return than I expected. Just as often it is larger. But whatever it is, I know that it is *full value*, because I have confidence in Handy & Harman.”

A testimony like this thrills us with satisfaction. It makes us feel that we are reaching the goal toward which we have been striving for many years.

For confidence is a priceless thing that money cannot buy. A boon that comes to a man only when he proves by his *acts* that he deserves it and has *earned* it beyond peradventure.

To earn, to win and hold the confidence of the gold-and-silver-using trades of America we have expended days and nights, months and years, of unremitting effort, and have erected and equipped the largest and the only plant of the kind in the world. The measure of our success has been, and always will be, the measure of our usefulness to the men we aim to serve.

Let us prove how useful we can be to you by sending us your next consignment of waste.

No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2355.—**Repairing Imperfect Soldering.**—How can I unsolder a pin that has shifted during soldering?

U. B.

ANSWER:—Unsoldering shifted parts may be done by painting the piece over with a paste composed of whitening and salt water. When dry, scrape the whitening off around the edges where it is to be unsoldered. Cover the piece with borax, just as for soldering, and apply the flame. The solder will begin to loosen and the pin may be lifted off with the pincers.

QUESTION No. 2356.—**To Blacken Brass.**—How can I blacken a piece of brass so it will resemble ebony?

B. B.

ANSWER:—The following solution will darken brass to any color desired: Add to a saturated blue vitriol solution a saturated solution of carbonate of ammonia, until the precipitate, at first thrown down, is completely dissolved. Dip the brass in the solution and heat over a Bunsen burner or alcohol flame. Repeat the dipping and heating until dark enough, then lacquer.

QUESTION No. 2357.—**To Repair Hatpin.**—How can I repair broken and bent hatpins? I made some new ones out of brass wire, but found them too soft; they would not push through a hat without bending.

R. H.

ANSWER:—The best needle for a hatpin can be made from a thin knitting needle. File one end to a point and polish; then tin over the other end with some tin solder, by applying a little chloride of zinc and tin with a flame. Fit this in the old head and solder in with tin solder. If the head is celluloid, or a similar substance, then the head can be cemented to the needle. If it is desired to blue the needle, mix a little powdered Prussian blue with thin shellac. Gently heat the needle and apply the varnish.

QUESTION No. 2358.—**Acid Free Soldering Fluid.**—Please give me a formula for making soldering fluid, acid free, suitable for soft-soldering jewelry, brass and copper.

A. F.

ANSWER:—For the production of anti-acid soldering fluid, sheet zinc waste is placed in muriatic acid. As regards quantity, enough should be used so that after complete saturation there will still be an excess of zinc. After a few days the excess of zinc should be removed and the solution diluted with an equal volume of water and filtered. Now add liquid ammonia, drop by drop, until the precipitate forming in the beginning has just dissolved again. If the solution of ammonia-zinc-chloride is mixed with starch paste a

syrupe liquid is obtained, which is employed as soldering paste where the liquid cannot be used. Without the addition of the starch paste the liquid is well adapted as a flux for any soft-soldering of jewelry, brass, copper, tin and iron. By adding one-third of its volume of glycerine a flux is obtained suitable for britannia and many other metals.

Simplified Electroplating for Jewelers.

(Written expressly for THE JEWELERS' CIRCULAR-WEEKLY by "R. B.")

(Continued from issue of Oct. 20.)

DEAD DRY SILVERING.

WHILE great strides had been made in the latter part of the past century in the art of electro-deposition of metals, and though it must be conceded that the introduction of the electric current as a vital factor in the process of metal deposition practically revolutionized all previous methods employed by the ancient metal decorators, still it cannot be denied that many finishes produced by the antiquated methods are not to be surpassed in beauty and softness of color and appearance by many products of the electric process.

By the processes already adverted to in previous issues it is quite possible to obtain a highly bright, lustrous finish, commonly referred to as a polished or a burnished finish. Again, various dead finishes in gold or silver may be produced by the electric process, namely, satin finish, sand blasted or French gray, all of which finishes are but adapted for particular classes of goods.

For some inexplicable reason articles of manufacture, like living creatures, appeal to us best when presented in the proper garb. No plater would think of finishing the blade of a table knife or the bowl of a spoon in French gray. Such an attempt would prove as ludicrous as a millionaire in rags.

For the above reasons it is obvious that one must exercise great care in selecting the proper finish for the particular article. And since the finishes capable of production by the electric process do not lend themselves to all articles, one must necessarily fall back upon finishes produced by antiquated methods. A silver finish of the latter process one frequently sees upon clock dials, barometers, thermometers, hydrometers and many other scientific instruments. It has a pleasant, equable dead finish which no electric deposit can parallel or even approach for its scrupulous and dignified appearance.

This finish, however, can be deposited on brass and copper only. It consists in applying to the clean surface an amalgam of silver from which the mercury is afterwards expelled by heat.

A pasty amalgam of silver is made by dissolving silver in about six times its weight of mercury. The amalgam is applied with a brass wire brush dipped in a solution of nitrate of mercury, which being decomposed by the copper and zinc of the brass deposits a coating of metal upon the brass article to which the silver amalgam then readily adheres.

The article is afterwards moderately heated to expel the mercury as vapor, when a dead film of silver will be found upon the surface of the article. This deposit, when rubbed with a cloth saturated with wet powdered pumice stone, will assume a quiet, dead gray silver finish.

A layer of silver thus deposited has been known to last for a period of from 20 to 25 years.

This method is extremely desirable for church goods and church metal decorations, as it is impervious to oxidization.

For silvering absolutely flat surfaces, where a dead finish is desired, chloride of silver should be employed. A piece of pure silver may be dissolved in *aqua fortis*, or diluted nitric acid, in a glass or capsule or some china vessel, with the aid of moderate heat. The heat will facilitate dissolution of the silver.

That done, it should be allowed to cool off. When cold it should be thrown into an earthen vessel or pot containing a gallon of water in which a handful of common salt was previously dissolved.

The salt will decompose the nitrate of silver, which will be noticed to separate as a white cheese precipitate. The liquid is well stirred and the chloride of silver allowed to settle down on the bottom of the vessel and the liquid poured off and replaced by fresh water.

After this has been repeated several times in order to obtain chloride of silver free from acid, the chloride of silver is dried over a slow flame and finely powdered.

One pennyweight of chloride powder is well mixed with three pennyweights of pearlsh, one pennyweight of chalk and one and a half pennyweights of common salt.

The surface of the article to be plated must be thoroughly cleaned, and then the surface is rubbed with a piece of cork or leather dipped into this mixture when the metal decomposes. The chloride of silver forms chloride of copper in the case of brass; chloride of zinc and metallic silver is thus deposited.

A mixture of chloride of silver with 10 parts of cream of tartar is equally effective.

After several operations, as indicated above, one will become so skilled in its application that in the course of several minutes a clock dial of considerable size may be perfectly silvered with ease and dispatch.

**SMELTING
FOR THE TRADE**

Twice as many jewelers are stocking the Gillette this season. Shows how leading jewelry stores are selling it. Especially good for the Christmas trade—jewelers have been starved for a live holiday specialty for men.

Just the thing women are looking for—solves the gift problem for husbands and brothers most satisfactorily.

Your Gillette showing gives a man a new idea—he wants one for himself and others for his friends.

Beautifully finished, it is well fitted for display in your stock. Few things in as small space give you as many sales as your Gillette exhibit.

Gillette Safety Razor, standard set, \$5.00.

Pocket Edition cases in gold, silver, or gun metal, with razor and blade box to match, retail complete from \$5.00 to \$7.50.

Gillette Combination Sets—from simple ones containing razor, soap and brush at \$6.50 up to elaborate sets with everything the most fastidious shaver could desire at \$50.00. Especially sought for gift purposes.

THE DUPLEX INDEPENDENT END BUFFING LATHE WILL DO IT

This machine has all the good points of the ordinary double end buffing lathe without any of the well known faults. It is very compact in design, simple and strong. It is

"The Lathe You Will Eventually Use"

Either end can be instantly started or stopped independent of the other. No waiting by one operator while the other is changing his polishing wheel. Can you imagine what a time saver a device like this would be to you? No countershafts, clutches The bearings and all working parts are protected by dust-proof casings. Ends of spindles are detachable and can be furnished in any length or form, making it possible to use the same machine for all classes of work. Just to show you how invaluable this machine is, we want you to have it on

or loose pulleys are needed with our machines.

Remarkable Auction Sales

We have just concluded the last of three remarkable auction sales, accomplishing things that, in net results, exceeded the best estimate of those interested by nearly fifty per cent.

Two of these stocks were so old and badly run down, that we were told if we realized from 40 to 50 per cent. of their appraised value, the owners would be satisfied.

We realized from 20 to 30 per cent. above the original cost on all three stocks. In doing this we did not use a single piece of cheap or shoddy goods.

For further evidence of our work, its effect upon the jeweler's future trade, our character as business men and skill as auctioneers, we respectfully refer prospective customers to the jewelers whose sales are mentioned:

H. A. DENNY, Saranac Lake, N. Y.
(formerly of Warren, Ohio)

L. L. MASON, Jamestown, N. Y.

Estate of E. D. VOSBURY, Binghamton, N. Y.

Our sales are averaging from \$500 to \$3,000 per day. Fifteen years as retail jewelers, and fifteen more as jewelers' auctioneers, have given us the proper equipment for doing this kind of work. If you need money, or wish to retire from business, write us.
