Look at a **map.**What do you see?

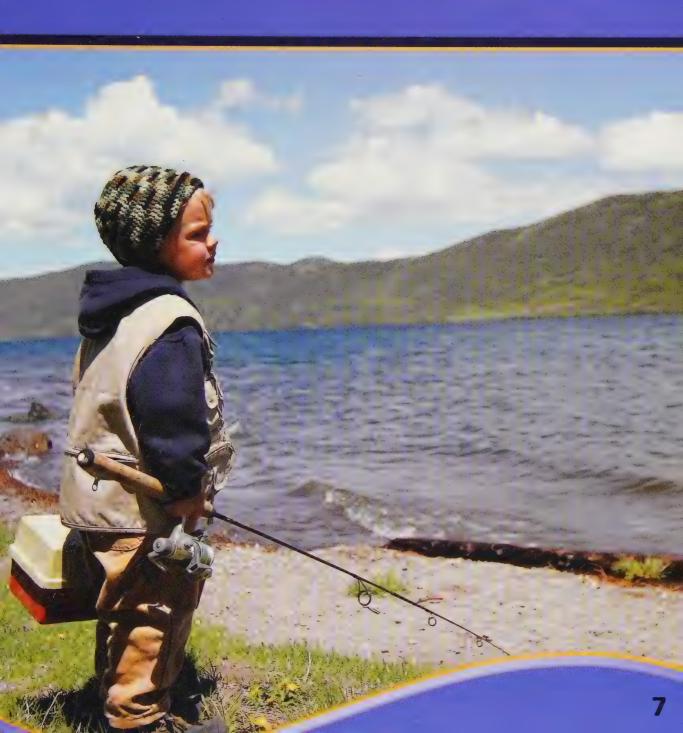

You see symbols and a key.

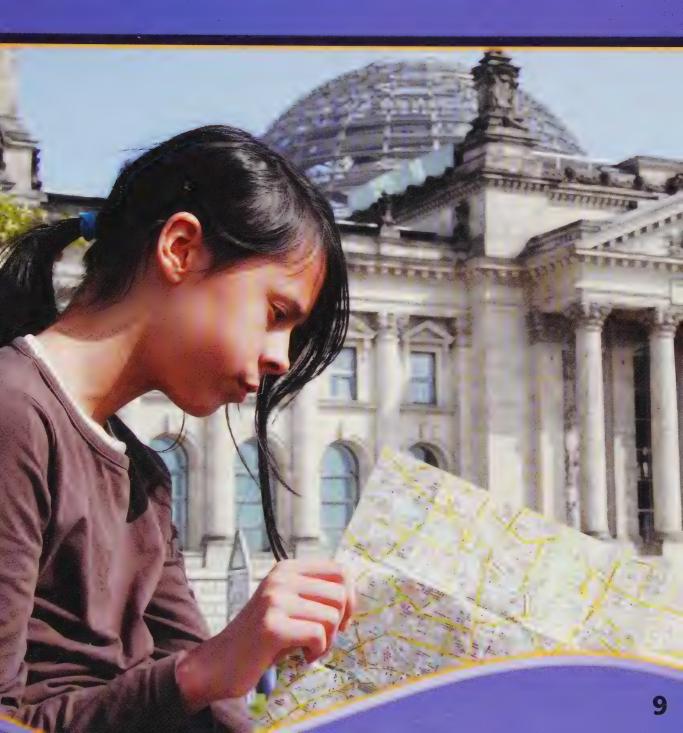

Symbols stand for bigger things, like **mountains**, streets, or even streams.

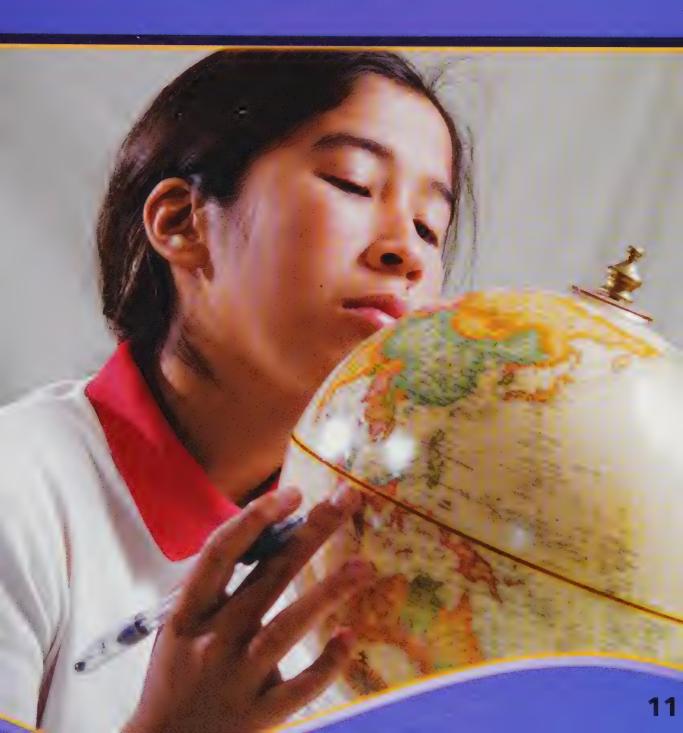

Symbols are so very small.

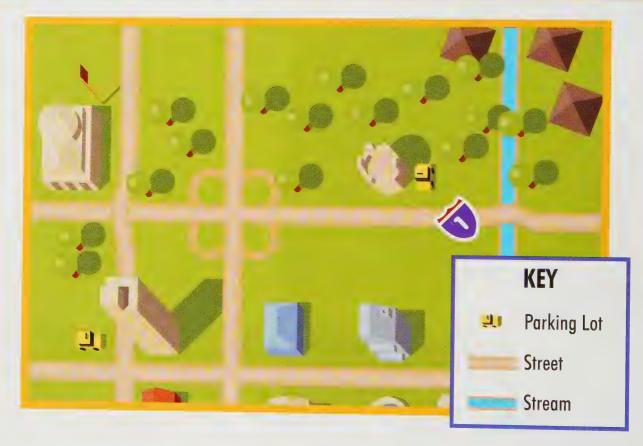

Maps and **globes** can't show it all.

A city might be a little dot.

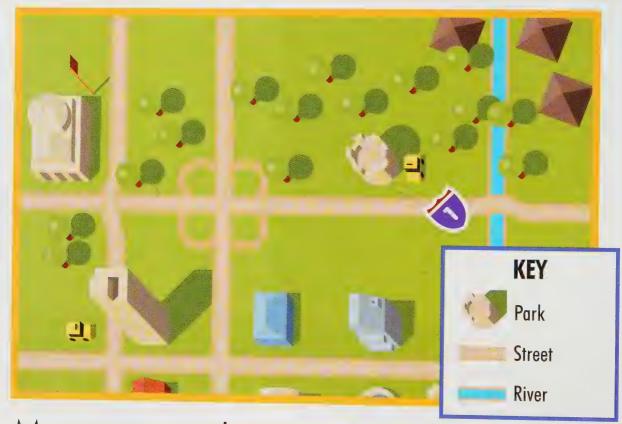

A car might mean a parking lot.

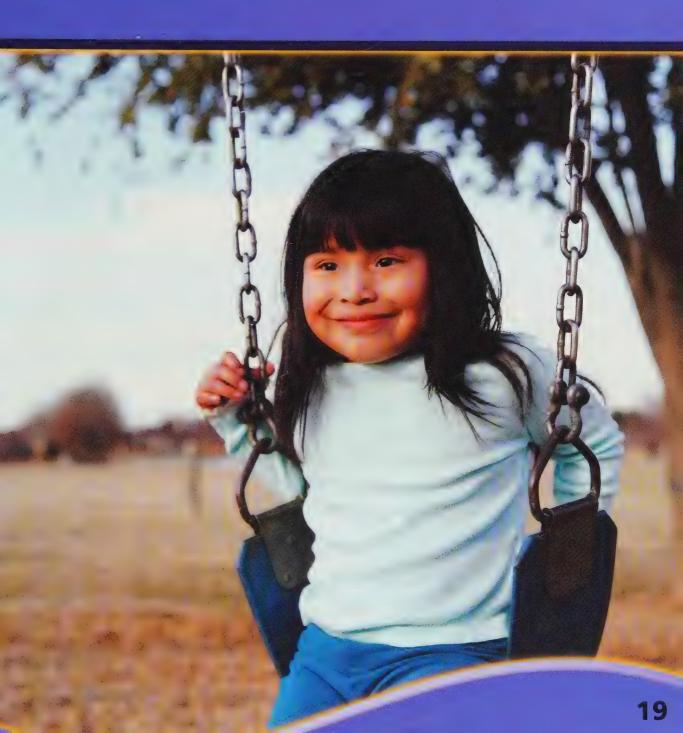

Look in the corner to find the key, a handy tool to explain what you see.

Maps can show us lots of things, like giant rivers or parks with swings.

Just use the symbols and the key, reading maps is fun and easy!

GLOSSARY

city (SIT-ee): A city is a very large town with lots of people living in it.
Cities have lots of streets, buildings, and stores.

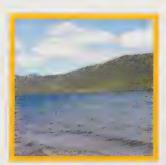

globes (GLOHBS): Globes are round spheres that show the entire Earth. Globes contain symbols and colors that stand for bigger things.

key (KEE): A key shows what the symbols stand for on a map. You can usually find the key in one of the bottom corners on a map. Sometimes a key is called a legend.

map (MAP): A map is a flat drawing of an area. There are maps of streets, towns, cities, the world, and much more. Maps contain symbols and colors, which all stand for something larger.

mountains (MOUN-tuhns): Mountains are parts of the land that are very high. Some mountains were created by glaciers or volcanoes.

symbols (SIM-buhls): Symbols are little pictures on a map that stand for bigger things. An airplane symbol stands for an airport, and blue lines show rivers.
