To carry out the purpose for which it was founded twenty-seven years ago, namely, "the increase and diffusion of geographic knowledge," the National Geographic Society publishes this Magazine. All receipts from the publication are invested in the Magazine itself or expended directly to promote geographic knowledge and the study of geography. Articles or photographs from members of the Society, or other friends, are desired. For material that the Society can use, adequate remuneration is made. Contributions should be accompanied by an addressed return envelope and postage, and be addressed:

Try this easy way to clear your skin

Bathe your face for several minutes with Resinol Soap and warm water, working the creamy lather into the skin gently with the finger-tips. Then wash off with more Resinol Soap and warm water, finishing with a dash of clear cold water to close the pores.

Do this once or twice a day, and you will be astonished how quickly the healing, antiseptic Resinol medication soothes and cleanses the pores, lessens the tendency to pimples, and leaves the complexion clear, fresh, and velvety.

If the skin is in bad condition through neglect or unwise use of cosmetics, apply a little Resinol Ointment* and let it remain on ten minutes before the final washing with Resinol Soap.

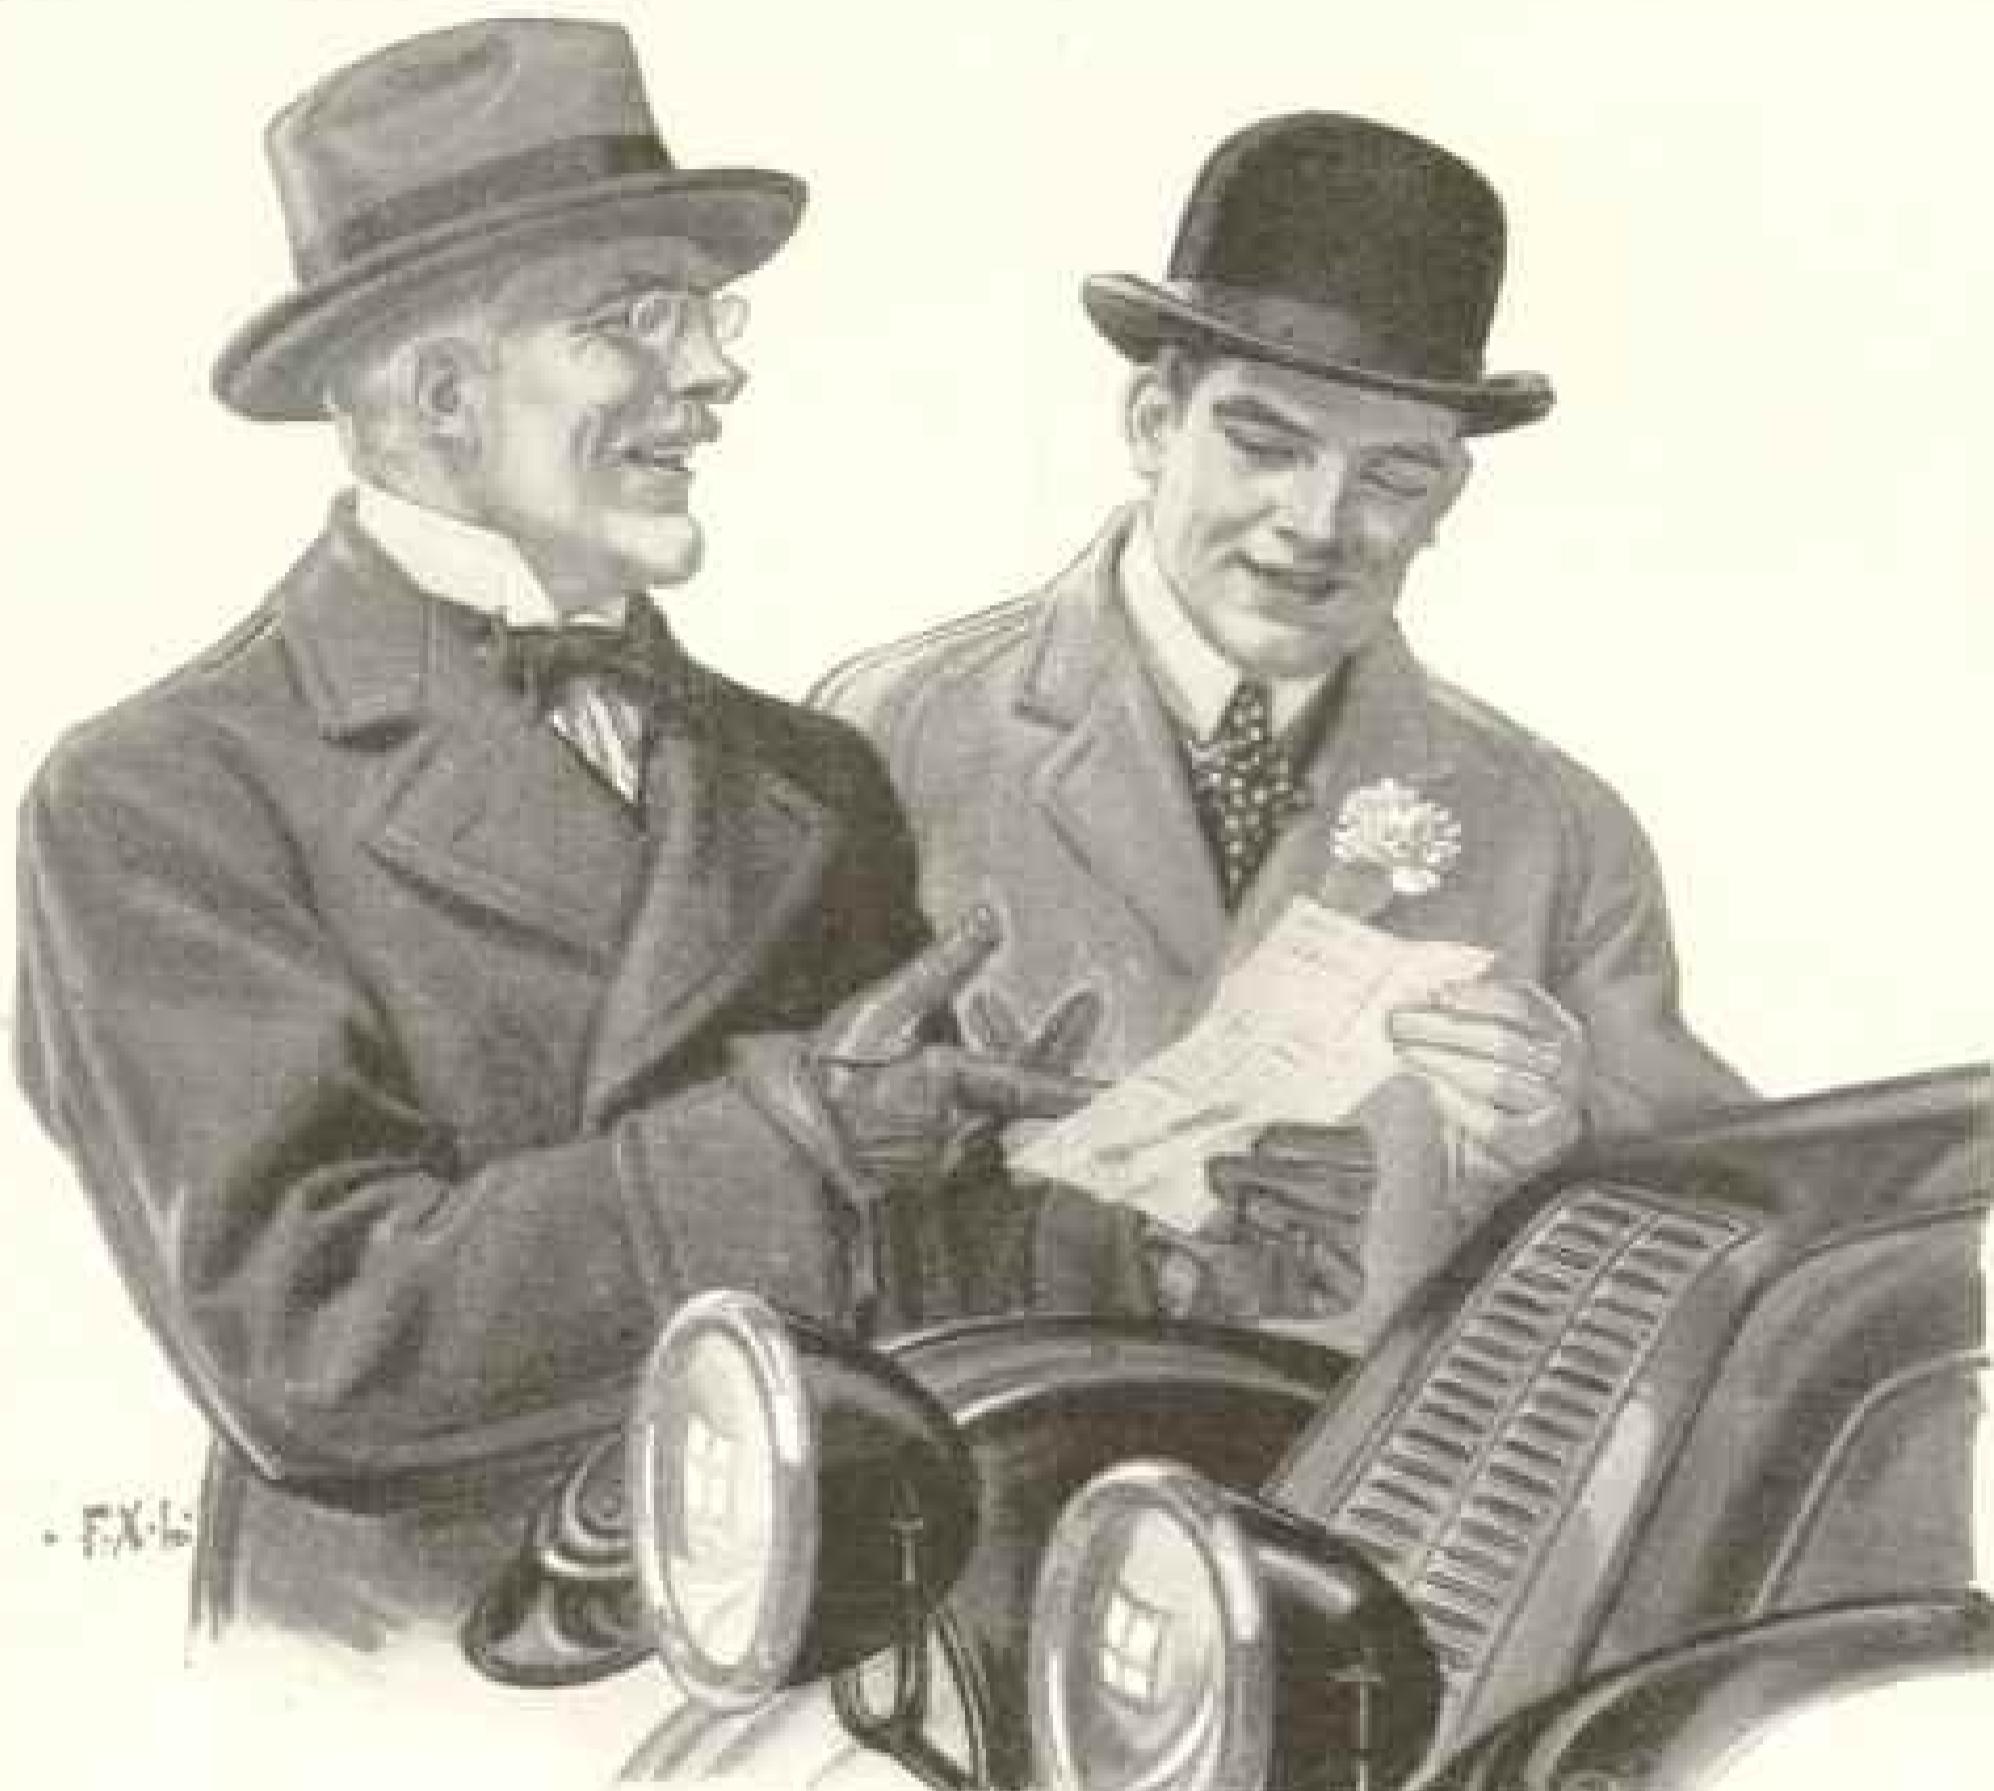

Resinol Soap contains no harsh, drying alkali, and is not artificially colored, its rich brown being entirely due to the Resinol balsams in it. Sold by all druggists and dealers in toilet goods. Buy it by the 3-cake box.

* For those who prefer Resinol Ointment, see directions in the treatment of skin and nail affections.

Resinol Soap

Men with tender faces find the rich lather of Resinol Shaving Stick delightfully soothing.

The FRANKLIN CAR

ONE of the most interesting things in the whole automobile situation is the type of men who own and drive Franklin Cars.

The list of Franklin owners shows a most remarkable average as to *substantial rating* and *strong position* in affairs.

The typical Franklin owner is a successful man who thinks

for himself; and who owes his place in the world to his habit of *getting the facts* and using his *own judgment*.

The point we make is that the Franklin owner as a rule is a man who can afford any price car. He sees in the Franklin the *best use of his money*—and his whole habit of life has taught him to seek *efficiency*.

Every practical-minded motorist should read the new book, "Why the Average Motorist's Dollar is Shrinking." Send us your name on a post card for a copy.

FRANKLIN AUTOMOBILE COMPANY, Syracuse, N. Y.

CONCRETE FOR PERFORMANCE

Send for "How To Build With Concrete" Booklet or Catalogue

Fireproof Industrial Buildings

Safeguard your building, its contents, and your employees against fire, and prevent interruption of your business—build in reinforced concrete.

The great Salem fire of 1914 destroyed property worth \$14,000,000. The Naumkeag Steam Cotton Company had 16 buildings enveloped in flames—including one of concrete. All were destroyed except the concrete building—this escaped with all its contents. Therefore, owners have rebuilt in concrete.

Information about Reinforced Concrete

Would you like to know all about low cost, low maintenance, low insurance, and the other advantages of reinforced concrete? Write us for book showing costs, illustrations and descriptions of many reinforced concrete industrial buildings. It will prepare you for consultation with your architect. Use the coupon below.

Automobiles and Insurance

Most people think of automobile insurance as an old form of protection adapted to a modern invention. As a matter of fact, the self-propelled vehicle is older than most forms of insurance. A Frenchman drove a steam carriage in the days of Marie Antoinette. An Englishman was arrested for joy-riding in 1802. In 1815 the directors of the Hartford Fire Insurance Company were amazed to see a steam locomotive snorting through the streets. We are not told whether they ever considered this strange contraption from an insurance standpoint. But we do know that almost before the motor car had ceased to be an experiment the Hartford Fire Insurance Company was offering automobile policies. Today you can insure yourself from every risk of a motor car through the complete

INSURANCE SERVICE *OF THE* TWO HARTFORDS

Any agent of the Hartford Fire Insurance Company, acting in conjunction with the Hartford Accident & Indemnity Company, can sell you complete protection from loss to yourself or car through fire, collision, theft and personal liability.

Representatives of the Hartford Accident & Indemnity Company, acting in conjunction with the Hartford Fire Insurance Company, sell the same complete automobile protection, as well as all other modern forms of bonding and casualty insurance.

The two companies, between them, write practically every form of insurance but life insurance

The \$100,000 Man Who Went to School Again

THIS is an inspiring story of a big-minded business man. Some men regret that their training in business is not complete. Some men never even realize it. This man realized it, but he did no regretting. Despite his wide experience, despite his huge income, he left his business for a year while he learned the funda-

mental principles that were back of his income and back of his experience, so he could control them. The problems he had to solve in his business were far more complicated than those listed below. If any man cannot answer them, however, he should let the story of this business genius sink in.

By analysis of a series of financial statements, can you tell whether the business is going as it should, and then put your finger on the weakness or strength shown? ?

Can you build up a safe, yet efficient, series of collection letters? ?

Can you answer a letter of complaint so as to satisfy the complainant and yet preserve the firm's prestige? ?

Do you know how to satisfy a bank as to your deserving a loan? ?

Do you know why most inexperienced promoters fail in trying to raise money for a new business, and how to avoid their mistakes? ?

Do you know what facts to get in order to figure the percentage of its sales that a business can afford to spend for advertising? ?

Many Big Men Doing the Same

The brainiest men in America today are doing what he did, for exactly the same reason he did it. The only difference is that they do not now have to leave their business as this man did. Instead, the Alexander Hamilton Institute now brings this business training right to their desks or to their home reading tables.

The Advisory Council

Judge E. H. Gary, Chairman of the U. S. Steel Corporation; Frank A. Vanderlip, President of the National City Bank; John Hays Hammond, the great engineer; Joseph French Johnson, Dean of the New York University School of Commerce,

and Jeremiah W. Jenks, the statistician and economist, compose the Advisory Council.

The motives that prompted more than 35,000 men to this action, how they are profiting by it—and how you can profit—are explained in the free book, "Forging Ahead in Business." To get it, clip the coupon below.

How Men Make Good

Over 35,000 men in all have enrolled. What our Modern Business Course and Service has done for its subscribers will probably never be known in its entirety. But daily there filter into the headquarters in New York many intensely human stories, showing how men are helped.

One day you hear of a brilliant lad of twenty-two, in a big New York bank, rising to a \$1,500 job and giving credit to the Institute for his success.

The next day a factory manager writes that the Course has just helped him save his firm \$7,000 a year, and that "a fair slice" of this went to increase his salary.

The next day a man in a Western concern tells how he saved the firm \$37,000 a year by one suggestion, and what happened then to his salary.

These are only typical cases. There are literally hundreds of them described in the 128-page book, "Forging Ahead in Business."

BUY lumber as you buy other materials—for the specific purpose for which it is to be used. For the outside covering of a house no other wood gives such long and satisfactory service as

WHITE PINE

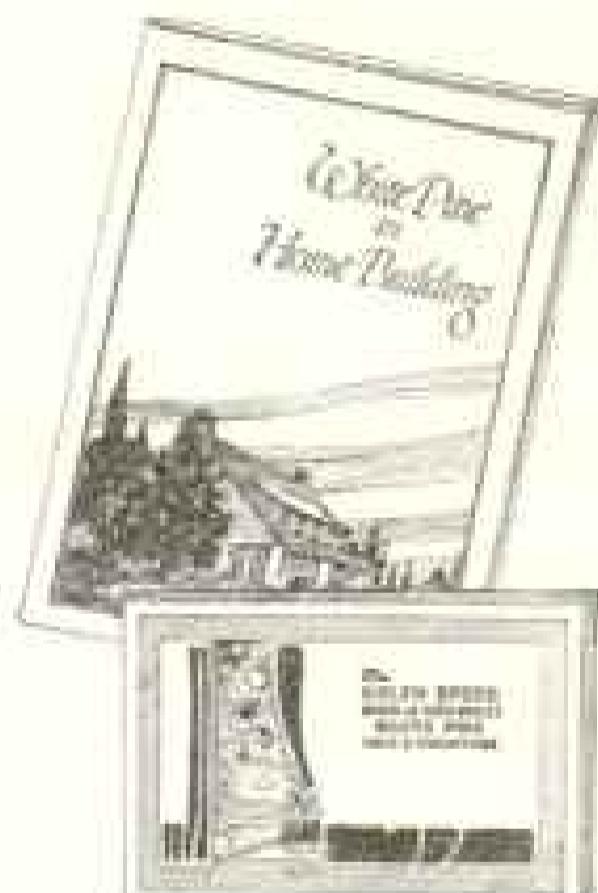

It does not shrink, swell, crack, twist, warp or rot; and once in place it "stays put," after years of exposure, even in the closest fitting mitres and in delicate mouldings and carvings. It takes paints and stains perfectly.

Investigation of the merits of White Pine will well repay anyone seeking a wise choice of building materials.

If your lumber dealer is unable to supply White Pine, we should appreciate the opportunity of being helpful to you in securing it.

This plate illustrates a "RAHVERE" rug, a product of the Kirmanshah District of Persia, with the design wrought in soft blues, reds, greens and browns, on a rich cream ground.

QUALITY ORIENTAL RUGS

Quality is the fundamental factor to be taken into consideration when purchasing Oriental Rugs.

Design and color effect, at the present time, influence the selection of Eastern Rugs, to such an extent, that due consideration of quality is apt to be neglected.

Although we specialize in artistic designs and color effects, we have always maintained a strict adherence to a high standard of quality.

We have a complete stock of rugs of the same weave and similar in character to the rug illustrated above, in a wide range of sizes.

We invite a comparison of our prices with those quoted elsewhere.

TOWNSEND'S TRIPLEX

The Greatest
Grass-cutter
on Earth

Floats Over the Uneven Ground
as a Ship Rides the Waves.

One mower may be climbing a knoll, the second skimming a level, while the third cuts a hollow. Drawn by one horse and operated by one man, the TRIPLEX will mow more lawn in a day than the best motor mower ever made; but it better and at a fraction of the cost.

Drawn by one horse and operated by one man, it will mow more lawn in a day than any three ordinary horse-drawn mowers with three horses and three men. (We guarantee this.)

Does not smash the grass to earth and plow it in the mud in springtime, neither does it crush the life out of the grass between hot rollers and hard, hot ground in summer, as does the motor mower.

Please for naming illustrating all types of Lawn Mowers.

S. P. TOWNSEND & CO.

Edison Uses Kluxons to Warn Men of Fire

A LITTLE more than a year ago the big plant of the Edison Storage Battery Company of East Orange, N. J., burned to the ground.

If another fire should occur today the alarm would be sounded with thirty Klaxon automobile horns installed in various parts of the buildings to warn the employees.

The Kluxons which are a part of the Edison Fire Alarm System are the same kind that Mr. Edison uses on his personal automobiles and that are used today by more than 600,000 other automobilists.

So general is the use of the Klaxon that the word has come to mean "auto-

horn"—and many horns that are not Kluxons are sold as Kluxons to unsuspecting motorists. The way to be sure is to look for—and find—the Klaxon Name-plate.

There is a Klaxon for every kind and size of automobile—for trucks, motor-cycles and motor-boats—from the Hand Klaxonet at \$4 to the large Klaxon at \$20.

Kluxons are made only by the Lovell-McConnell Mfg. Co., Newark, N. J.

LIFT THE HOOD AND SEE IF THE HORN ON YOUR CAR BEARS THE KLAXON NAME-PLATE.

This nameplate is
your protection
against substitution

"No-Not This"

"Go Get Your Own Puffed Wheat"

Every child has dainties she dislikes to share.

You did and we did. Children always will.

And in every home that serves Puffed Wheat, that dainty is among them. We have often watched it. With a great big dish and a package full in waiting, one hates to share a taste.

Flaky, Flavory Bonbons

These bubbles of wheat look and taste like confections. Children love to eat them like peanuts—carry them in bags when at play.

Adding cream and sugar makes a breakfast dish with which nothing else compares. And they are about as delicious as a good-night dish, floated in bowls of milk.

Another pleasant fact is that at any hour one may eat his fill; for these thin, crisp morsels are simply whole wheat puffed. Every food cell has been exploded. So, beyond all other grain foods, Puffed Wheat easily digests.

It is quite a mistake to be sparing of a food so fascinating and so hygienic.

Puffed Wheat	Except in Fat Wes:	12c
Puffed Rice		15c
Corn Puffs—Bubbles of Corn Hearts—	15c	

These are the foods in which Prof. A. P. Anderson solved the problem of perfect cooking.

In other forms these grain foods are cooked or baked or toasted. Thus part of the food cells are broken, but rarely more than half.

In Puffed Grains alone is every food cell exploded. Over 100 million steam explosions are caused in each Puffed Grain. Thus every atom of every element becomes available as food.

Your doctor will tell you that wheat and rice, in every way, are best when served in puffed form.

The Rock Beautiful—and Everlasting

HERE is a picture of one of the world's greatest monolithic memorials—cut from Barre Granite.

It stands in Lake View Cemetery, Cleveland, Ohio, on the John D. Rockefeller family lot, and is a single granite stone 67 feet in length, taken from one of the mountain quarries at Barre, Vt. Barre Granite typifies dignity, durability and strength, and is beauty in enduring form. Every piece of

BARRE

GRANITE

whether for a single shaft, a mausoleum or for the small stone marking an humble resting place—is of uniform quality. No other part of the world has yielded such a high grade of stone as the quarries at Barre, Vermont.

Barre Granite is indeed the *Rock Everlasting*—the stone which meets that sacred requirement involved in marking memorials to the departed.

Your monument dealer can tell you about it. He has had experience with it and knows what Barre Granite is.

Barre Granite is the ideal material for building purposes, many buildings throughout the United States being built entirely of it.

Write for illustrated booklet, "Memorial Masterpieces," showing the monuments of many prominent people.

“Lazy Dollars”

Dollars are curiously like men.
Put them to work, and they will
earn an income to support you.
Keep them idle, and they will
earn nothing.

The amount of work they do
and the amount of income they
earn depend on you. If you let
your dollars live lazy lives, they
will earn you three or four per
cent. But, if you choose, you
can make them earn you a much
better yield without overwork-
ing them—that is, without sac-
rificing safety in any degree.

And it surely is worth while
to make your dollars work as
hard for you as you worked
for them, and earn

5½ to 6%

First Mortgage Serial Real Es-
tate Bonds afford you a perfectly
safe investment, that will keep
your money at work earning
the best rate consistent with
safety. The soundness of these
bonds is best indicated by the
record of this House, 34 years
without a dollar loss to any
client.

The bonds are secured by the
best class of newly improved,
well located city properties, and
are issued in convenient denomi-
nations—\$1,000, \$500 and \$100.

PAIGE

The Standard of Value and Quality

"The Call of the Road"

Come brother—wake up. Sniff the air and you will find that the thrilling breath of Spring is already there.

Look about you. Sense the newness—the *freshness*—of it all. See how the laggard step of the crowd has quickened into a full swinging stride.

See those cars "break" at the traffic officer's whistle. Watch them come down three or four abreast at the "getaway." Hear the shrill, merry note of the sirens and the good-natured chaff of the drivers.

This means Spring. This means the "open season." This means Touring at its best.

Surely, you are not going to be "left behind" this year. Surely, you are not going to keep the wife and kiddies indoors when all the world is hiking far afield.

Perhaps you already know it—but what you need is a big, handsome, sturdy Paige "Six-46."

Nothing *less* will completely satisfy you—nothing *more* is necessary for any man, no matter how wealthy he may be.

So don't hesitate—don't procrastinate.

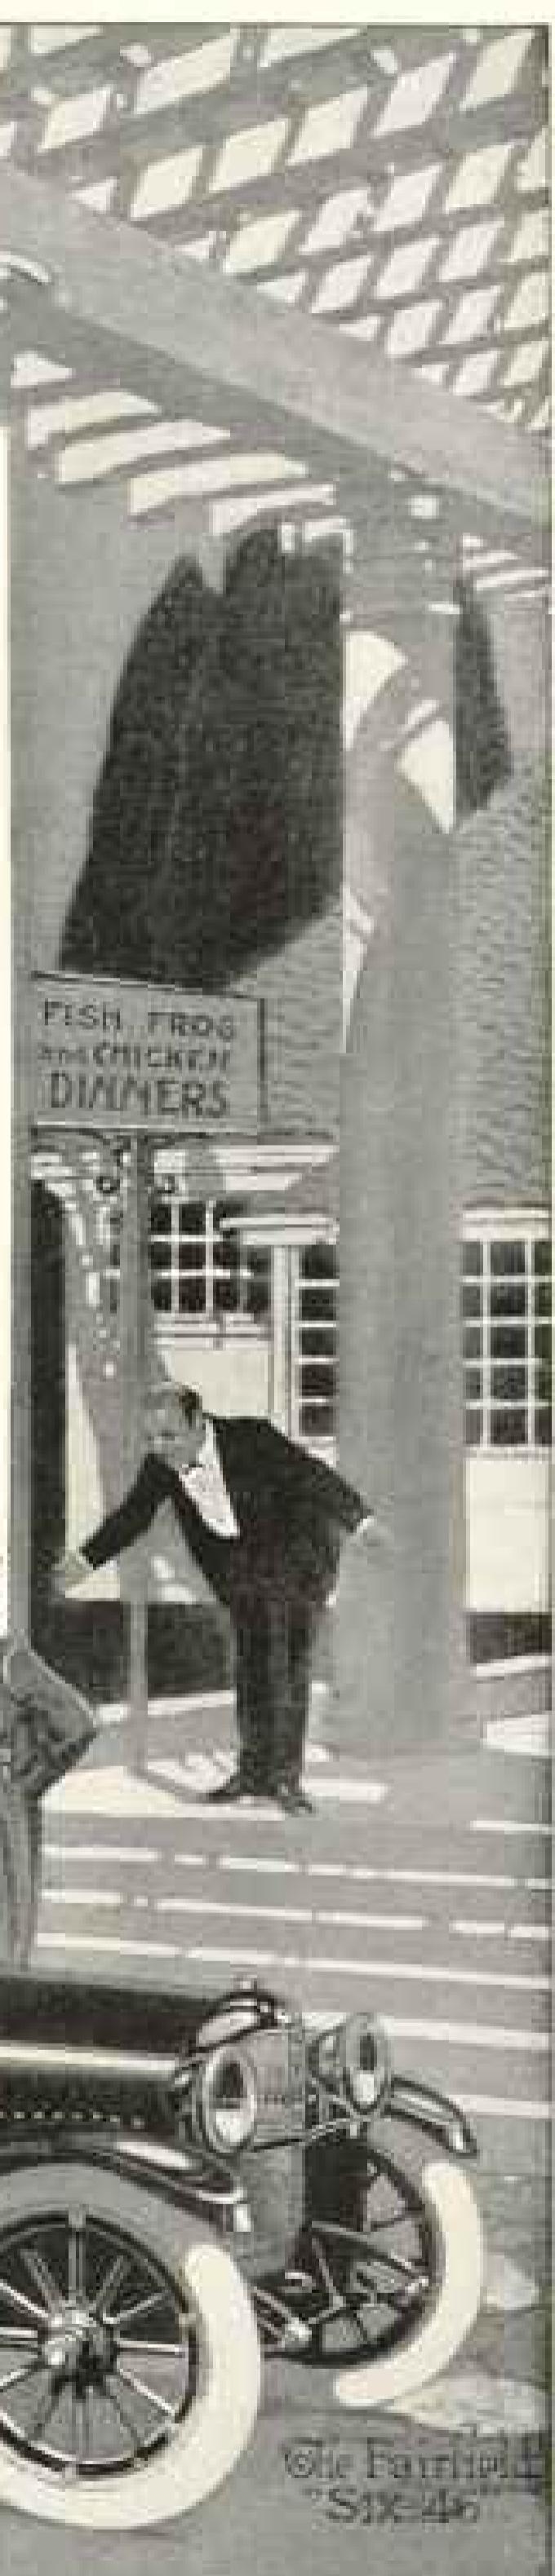

Tell the stenographer that you will be "out" for a short spell, and hustle right over to the Paige dealer. Tell him your troubles—and let him prescribe.

THE LAND OF THE BEST

By GILBERT H. GROSVENOR

AUTHOR OF "YOUNG RUSSIA, THE LAND OF UNLIMITED POSSIBILITIES"

RARELY has there been afforded a more impressive illustration of the statement that it pays to advertise than is to be found in the story of the endless stream of tourists hastening to Europe during the several decades before the great war.

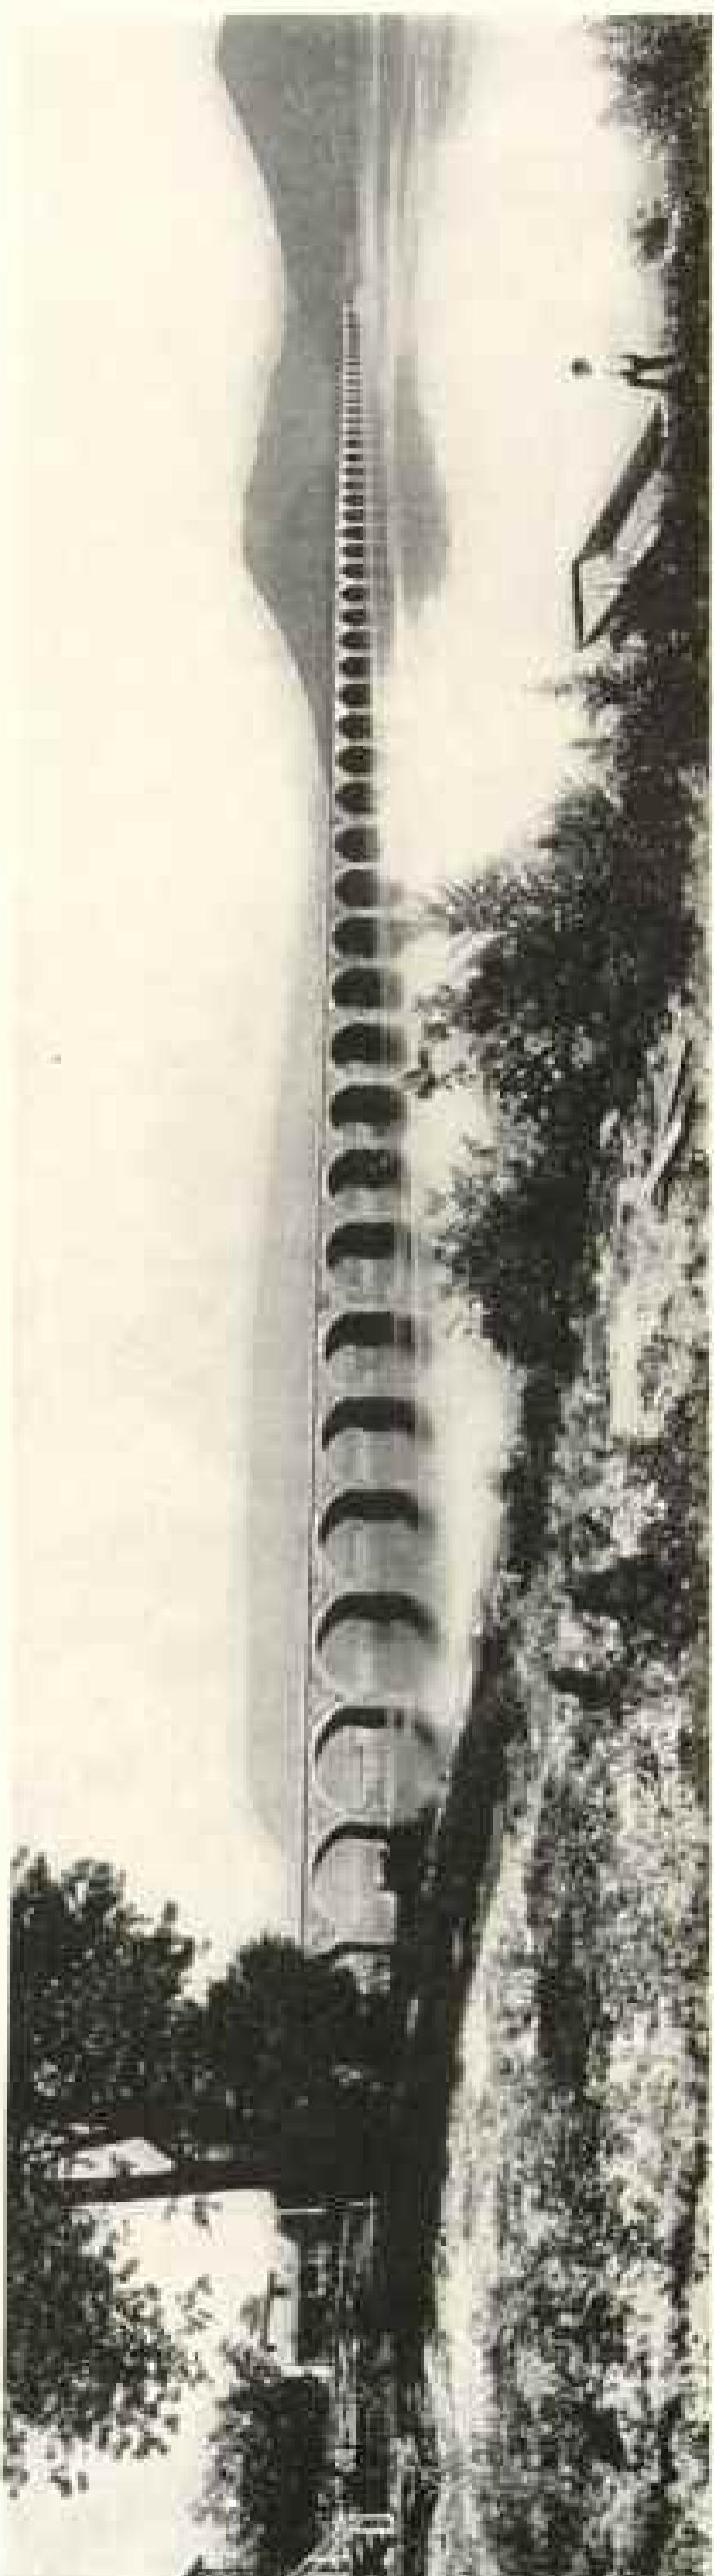

The appeal of the art treasures and associations of the Old World, which is the original home of all Americans, is really not sufficient explanation of the fact that until last year 100 American tourists were crossing the Atlantic to one American tourist who crossed the United States. The delightful literature which the European travel bureaus and steamship companies placed at our disposal so whetted our appetite for a view of the lakes of Ireland and Scotland, of the castles on the Rhine and Danube, of the scenes made famous by Shakespeare, Dickens, Victor Hugo, and Goethe, that we turned our back upon scenery more beautiful, wild flower gardens and forests incomparably finer, mountains more superb, and lakes more radiant than any to be seen in the lands across the Atlantic.

It is true that one finds a more ancient culture in Europe. It is also true that he finds more splendid architecture. And likewise it is true that he finds there better art; for before America was born into the family of nations Europe had castles and cathedrals and masterpieces of art and sculpture.

But in that architecture which is voiced in the glorious temples of the sequoia grove and in the castles of the Grand Canyon, in that art which is mirrored in American lakes, which is painted in geyser basins and frescoed upon the side walls of the mightiest canyons, there is a majesty and an appeal that the mere handiwork of man, splendid though it may be, can never rival.

Nor is our country lacking in hallowed and historic spots. Is Waterloo, where Napoleon's star of empire set forever, any more sacred to the American heart than Appomattox, where a new nation was born out of the throes of internece strife? Are Austerlitz and Wagram, with their high tides of the French Empire, of soil more sacred, of atmosphere more hallowed than Valley Forge and Gettysburg, Plymouth Rock, Independence Hall, and Mt. Vernon? Does London or Paris or Berlin contain more of inspiration to us as a people than Washington, the Nation's Capital?

We have wandered far to find the picturesque and the magnificent, and yet it is not entirely a provincial philosophy which says that New York is in many ways the most wonderful, the most striking, and the most interesting of all the cities of the earth; neither is it only the voice of the man who has never seen other shores that pronounces Yellowstone Park the most marvelous picture-book

STORMY RIVER AT ROCKY MILE, PENNSYLVANIA
ONE MIGHT TRAVEL ALL OVER EUROPE WITHOUT SEEING A MORE PICTURESQUE LANDSCAPE THAN THIS, OR A MORE SUCCESSFUL COMBINATION OF ART AND NATURE IN A SINGLE SCENE

of Nature's library; nor yet is it the narrow pride of the spread-eagle orator alone that awards to the Grand Canyon and the Yosemite and the Big Trees first place among the wonder scenes of the earth.

Luray Cave, in Virginia, and the Mammoth Cave, in Kentucky, surpass in originality and grandeur any caves in Europe, while Niagara Falls has no rival in Europe or in Asia, and our American forests are the glory of the world.

Man goes to Asia and to Africa to study forgotten civilizations, when the Redskins upon our own Western plains and in our own cliff dwellings reveal stories of the past as strange as any we know, and constitute a race more magnificent in physique than any that can be found in other parts of the world.

When one comes to examine the literature of America for the tourist, one is amazed at the contrast between that literature and what he finds from other countries. Baedeker publishes a guide-book in three volumes to tell about Italy, and one volume to tell about the United States and Mexico. One can find more literature about the geysers of New Zealand than about those of the Yellowstone (though the Yellowstone contains more geysers than all the rest of the world); more about the troglodytes of northern Africa and Asia Minor than about the cliff-dwellers of Arizona and New Mexico, though the latter were much more ingenious and more amazing in their achievements.

As it would require more space than there is between the covers of this Magazine merely to index all the places of scenic and historic interest in our country, in this article we must content ourselves with mentioning in text and picture only a comparatively few. Remember, that the United States, excluding Alaska, is as big as England, Scotland, Ireland, France, Germany, Spain, Portugal, Italy, Austria-Hungary, the Balkan States, Switzerland, Holland and Belgium,

Lombardy Poplars on Road between Lenox and Pittsfield, Massachusetts

Pittsfield's Public Green has been called "the heart of the Berkshires," and Lenox has been christened "the gem of the mountains." Between them stretches miles of scenery, with old Greylock in the distance, as pastoral in its charm, as soft in its beauty, as inviting in its appeal as anything that Europe can offer.

Do the rural communities of England or France contain anything more graceful or picturesque than our American villages?

Photograph by Edwin H. Linkoh

A NEW ENGLAND VILLAGE

THE LANCASTER ELM, THE LARGEST IN MASSACHUSETTS.

Several of our States already are pointing the way that all of them are certain to travel in the future. Mountain tops, historic sites, battlefields, and other places of scenic and historic interest are being acquired by the State and reserved for the public.

Norway and Sweden, and European Russia, excepting the provinces of Archangel and Perm.

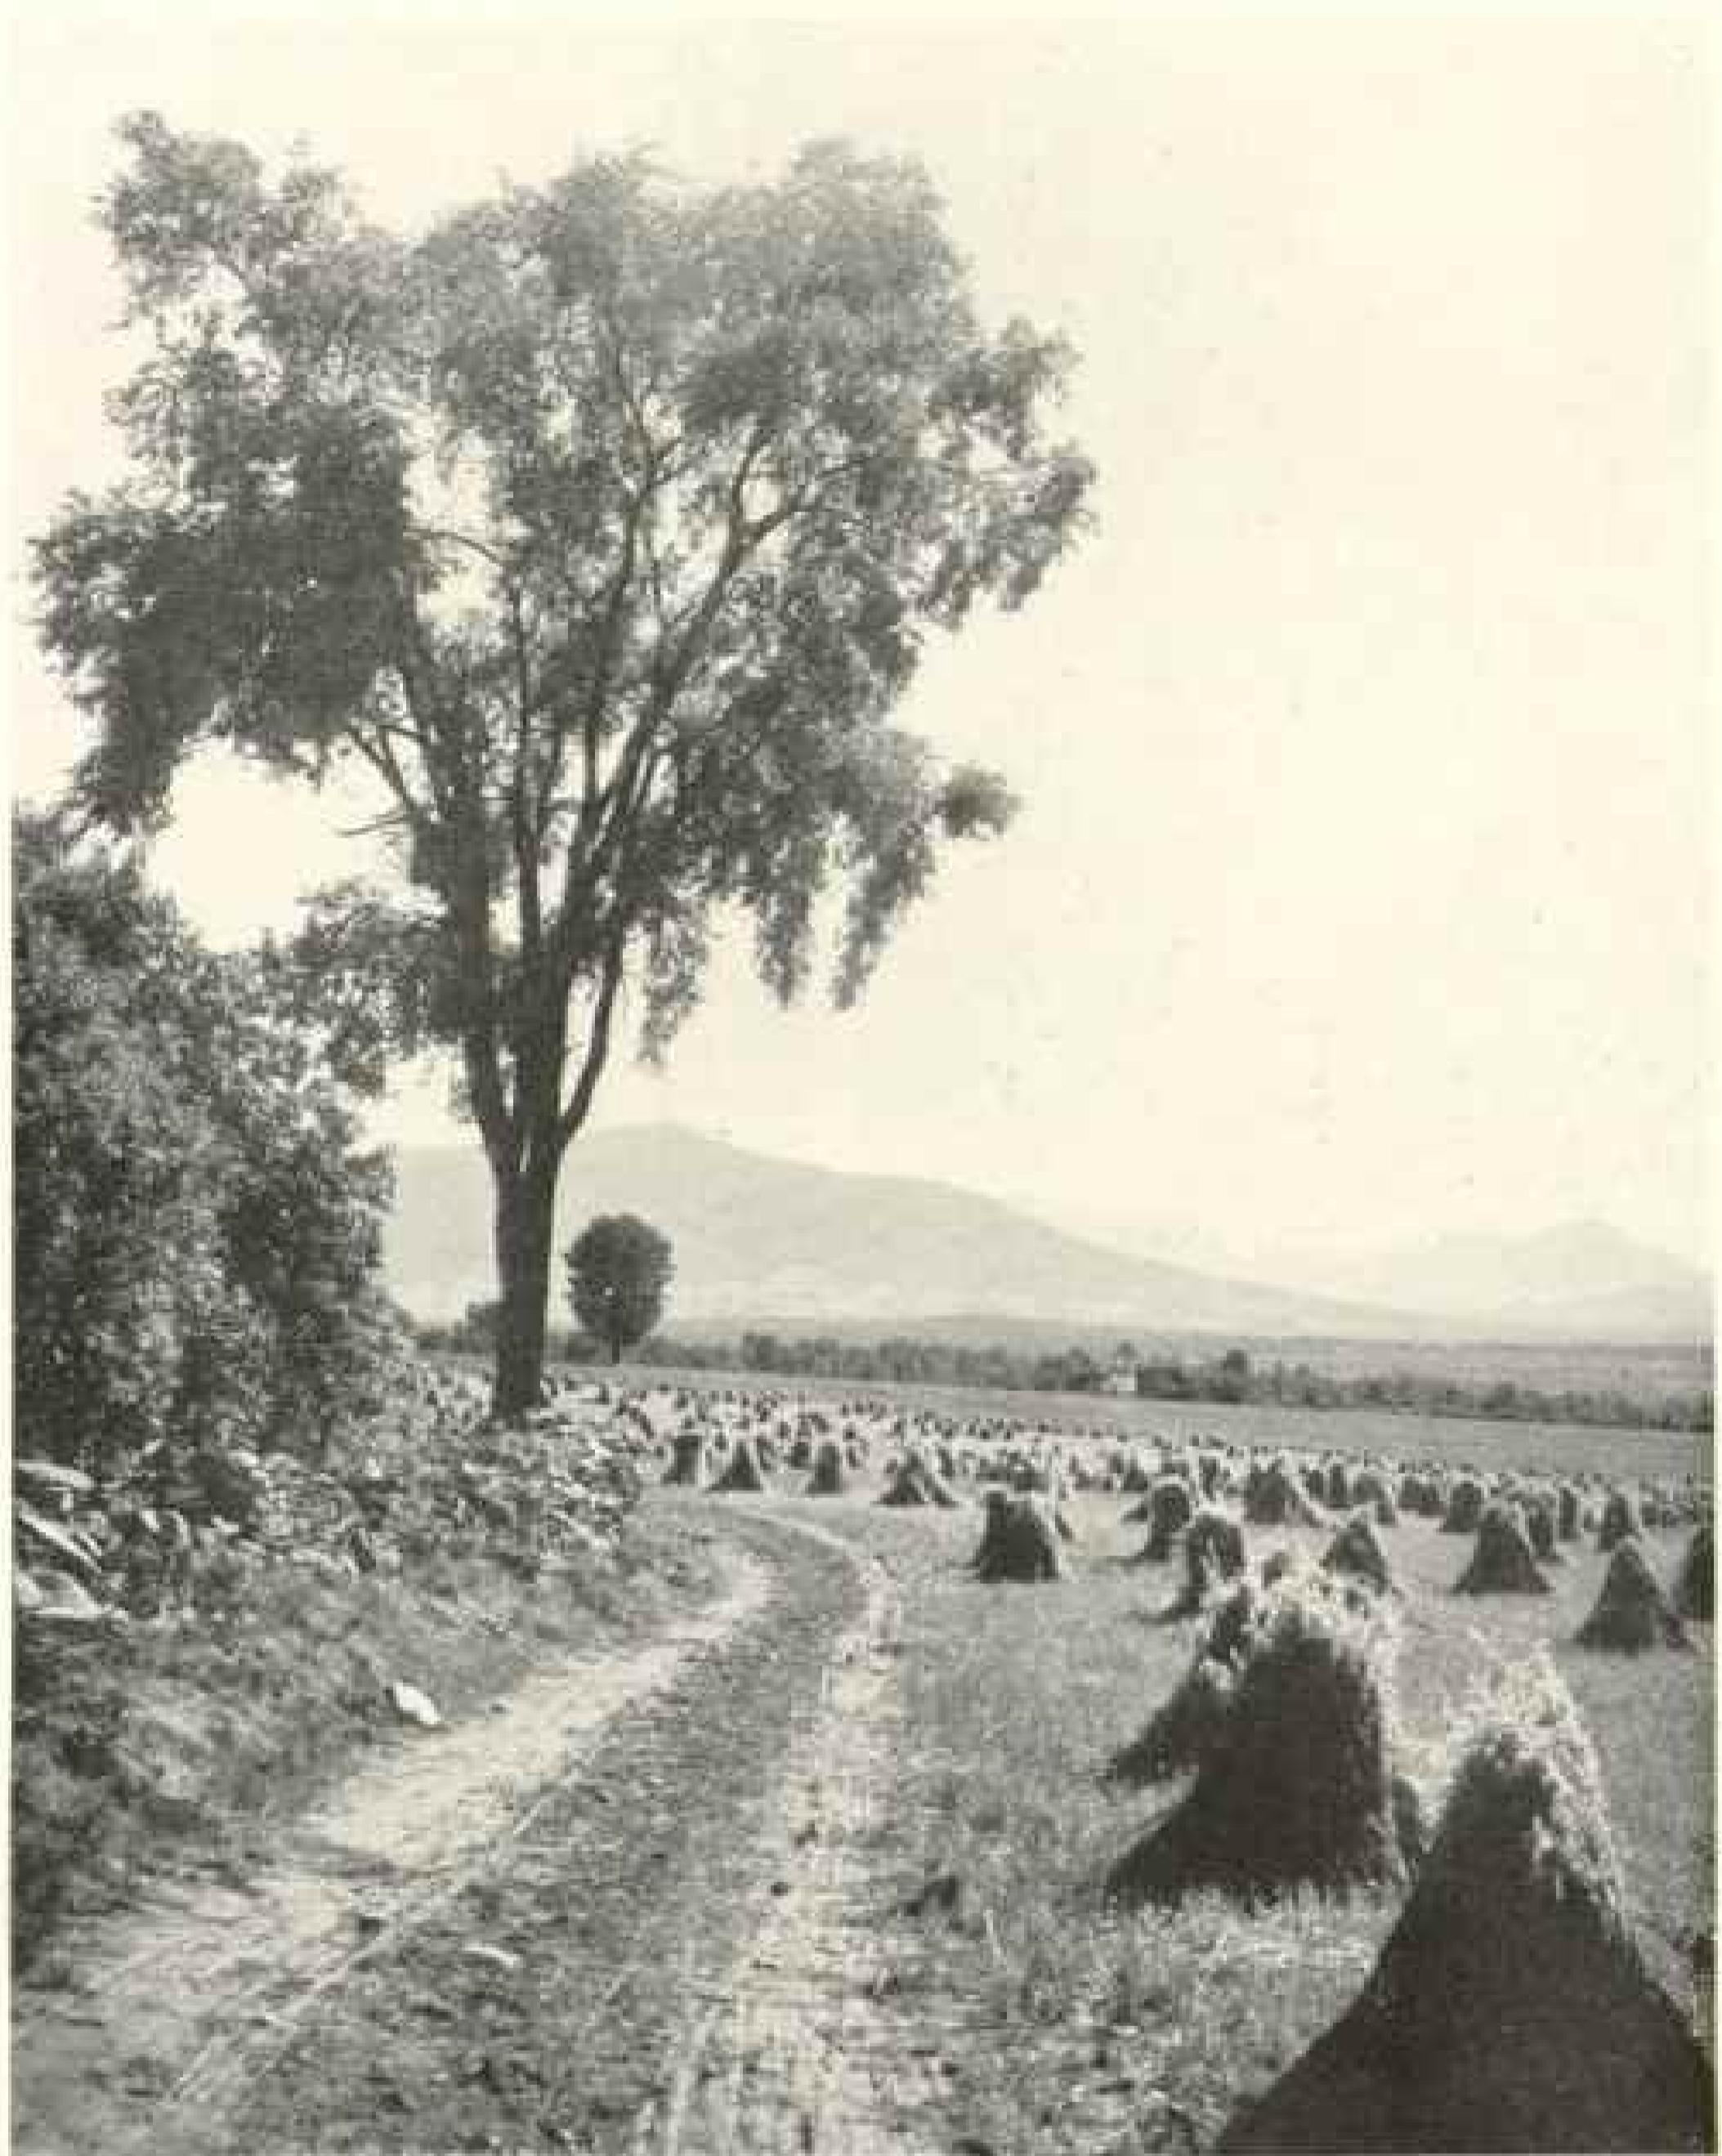

PICTURESQUE AND HISTORIC NEW ENGLAND

Boston—with its rich history of Colonial days, its brave leadership of Revolutionary times, its appreciation of culture in the years when our people were so deeply absorbed in the problem of conquering the wilderness and building a nation—takes on a new meaning when one has visited its Commons, passed in and out of the portals of Faneuil Hall, made a pilgrimage to its old churches and the burying ground where lie the ashes of Hancock, Adams, and Paul Revere.

Already more than 50,000 people annually journey to the town of Plymouth to pay reverent homage to the memory of the *Mayflower*. Plymouth Rock is now appropriately cared for. On the hill nearby rises a beautiful monument, which the nation has erected to the memory of those who risked their all to come to America in that pilgrim craft. It is said that the splendid statue of Faith which crowns this monument, and which is 40 feet high, is the largest stone figure in the world.

Plymouth Rock can never mean as much to the American who has not seen it as it does to him who has stood on Plymouth's sacred soil and felt the thrill of the spirit of those who fashioned here a cradle of modern liberty.

A hundred and one delightful and rest-

A NEW HAMPSHIRE HARVEST SCENE, WITH CHERRY MOUNTAIN IN THE DISTANCE

*When the broad elm, sole empress of the plain, whose circling shadow speaks a century's reign,
Wreathes in the clouds her regal diadem— a forest weeping on a single stem.*

—Oliver Wendell Holmes.

The trees of America are the best God ever planted. Vast stretches of them have been cleared, but our forests still contain the largest, most varied, most fruitful, and most beautiful trees in the world. Wide-branched oaks and elms in endless variety, walnut and maple, chestnut and beech, sycamore and locust, along the coast of the Atlantic; to the southward, dark, level-topped cypresses, sparkling spice trees, magnolias and palms, glossy-leaved, blooming, and shining continually; to the northward, white pine and spruce, hemlock and cedar; westward, oak and elm, hickory and gum, ash, linden, laurel and pine, juniper, cactus and yucca; westward still further, new species of pine, giant cedars and spruces, silver firs and sequoias, "kings of their race." —JOUX MUN.

ful places in Maine beckon the tourist, from the rock-bound island of Mt. Desert, on its southern shore, to the primeval forests of its northern woods.

One who visits New England without going to the top of Mt. Washington, the culminating peak of the White Mountains, misses one of the charming experi-

ences which that part of our country, famous alike for its history and its scenery, has to offer. He who reaches the summit of that lofty peak journeys as far north in temperature and in flora as Greenland. From the Observatory one may look north, south, east, and west, the only limit to the view in any direction

JUST FROST! MOUNT WASHINGTON, NEW HAMPSHIRE, SEPTEMBER 30, 1915

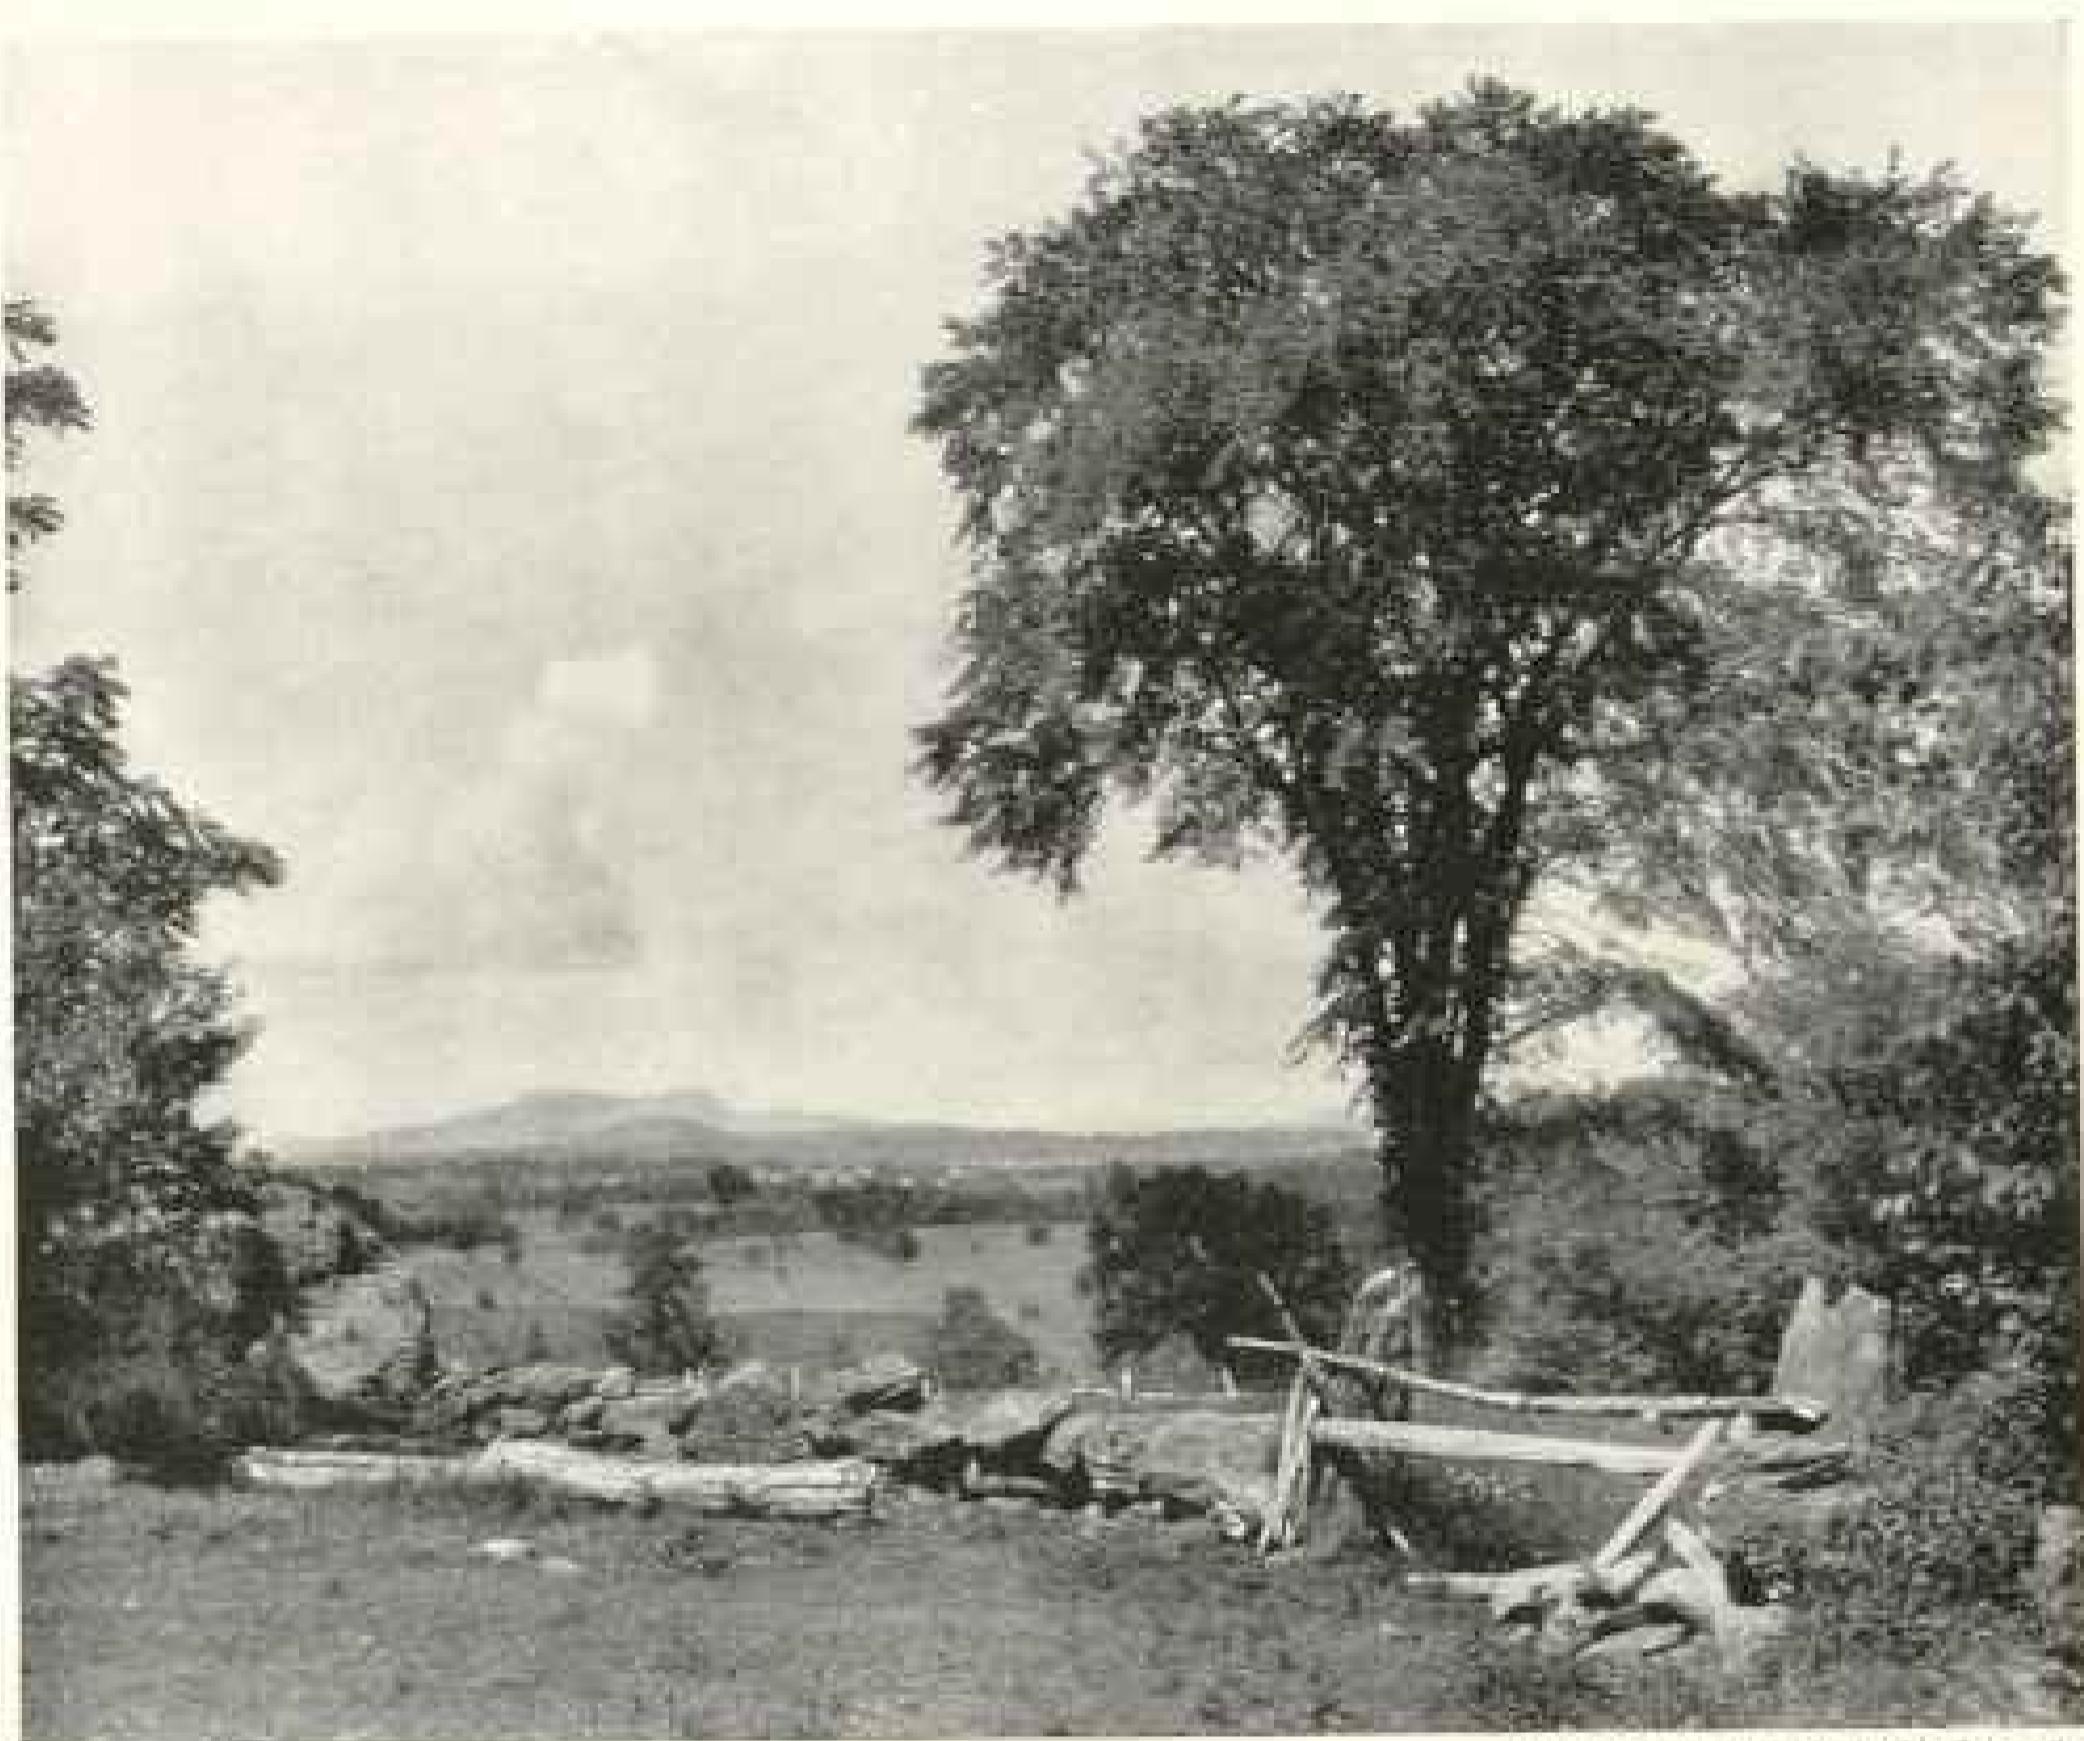

A combination of an exceptionally heavy frost and a strong wind one morning last September transformed the end of the railroad trestle and the little stage office on the top of the mountain into fairy structures of glistening white.

THE VALLEY OF THE HOUSATONIC, WITH GREYLOCK IN THE DISTANCE: PITTSFIELD, MASSACHUSETTS

This valley has contributed the marbles out of which some of America's most noted structures have been built. The Nation's Capitol, at Washington, and the City Hall, at Philadelphia, share with St. Patrick's Cathedral, at New York, the common origin of their marbles. Old Greylock, "cloud girdled on his golden throne," is the highest mountain in Massachusetts.

being the power of the eye to penetrate the distance. Northward, one looks into Canada; eastward, into Maine; southward, across New England; westward, into New York.

It was Henry Ward Beecher who said of the autumnal foliage of the Berkshire Hills: "Have the evening clouds, suffused with sunset, dropped down to become fixed into solid forms? Have the rainbows that followed autumn storms faded into the mountains, and left their mantles there? What a mighty chorus of colors do the trees roll down the valleys, up the hillsides, and over the mountains!"

These hills constitute one of the foremost playgrounds of the eastern United States. Their roads are as good as the

Appian Way ever was in the palmiest days of the Roman Empire.

And he who journeys southward from them comes down the verdant valley of the Connecticut, the central portion of that charming little State of which De Tocqueville on his visit proposed his remarkable toast: "And now for my grand sentiment: Connect-de-coot, ze leetle yet low spot zat make ze clock-peddler, ze school-master and ze Senator; ze first give you time, ze second tell you what to do wiz him, and ze third make your laws and civilization."

New Haven and Cambridge are two spots that must ever be hallowed in American history, for who can estimate the nation's debt to the two old uni-

Photograph by Edwin L. Jackson

GRANT'S TOMB, NEW YORK CITY, SHOWING THE HUDSON WITH THE ATLANTIC FLEET RIDING AT ANCHOR

Next to Central Park, where broad acres of the most expensive land on earth present a velvety expanse of green, and great rocks, surrounded by carefully tended shrubbery and graceful trees, retain their rough natural beauty, the most inspiring "breathing space" is perhaps Riverside, which occupies a considerable proportion of the shore of the Hudson north of Seventy-second street. From this park a fine view of the Hudson River may be had, and within its confines is located the stately tomb of General U. S. Grant, which is to New York what the tomb of Napoleon is to Paris.

Photograph by Brown Brothers

THE TOP OF THE BUSINESS WORLD: LOOKING FROM THE WOOLWORTH BUILDING PAST
THE BATTERY TOWARD THE SEA.

It takes no undue amount of national pride to accept New York as the world's foremost metropolis. London may be hundreds of years older and bigger; Paris may surpass it in art and architecture; Berlin may hold the better of the argument in "newness," but nowhere else on the face of the earth is there a city of such many-sided greatness as New York. Its port does more business; its banks have heavier clearings; its immigrant station has more incomers; its streets are trod by a more polyglot population; its urban railroads handle more traffic; its bridges carry more people, than any other city of Christendom.

Photograph by Brown Brothers

AN OASIS OF RELIGION AMID A DESERT OF BUSINESS

Trinity Church, New York, standing at the head of Wall street, its tower, looking down on America's financial center, seems a hand raised to heaven in an appeal that men may not, while absorbed in the struggle of the "Street," forget their God.

LOOKING DOWN UPON A FOREST OF SKYSCRAPERS: NEW YORK CITY

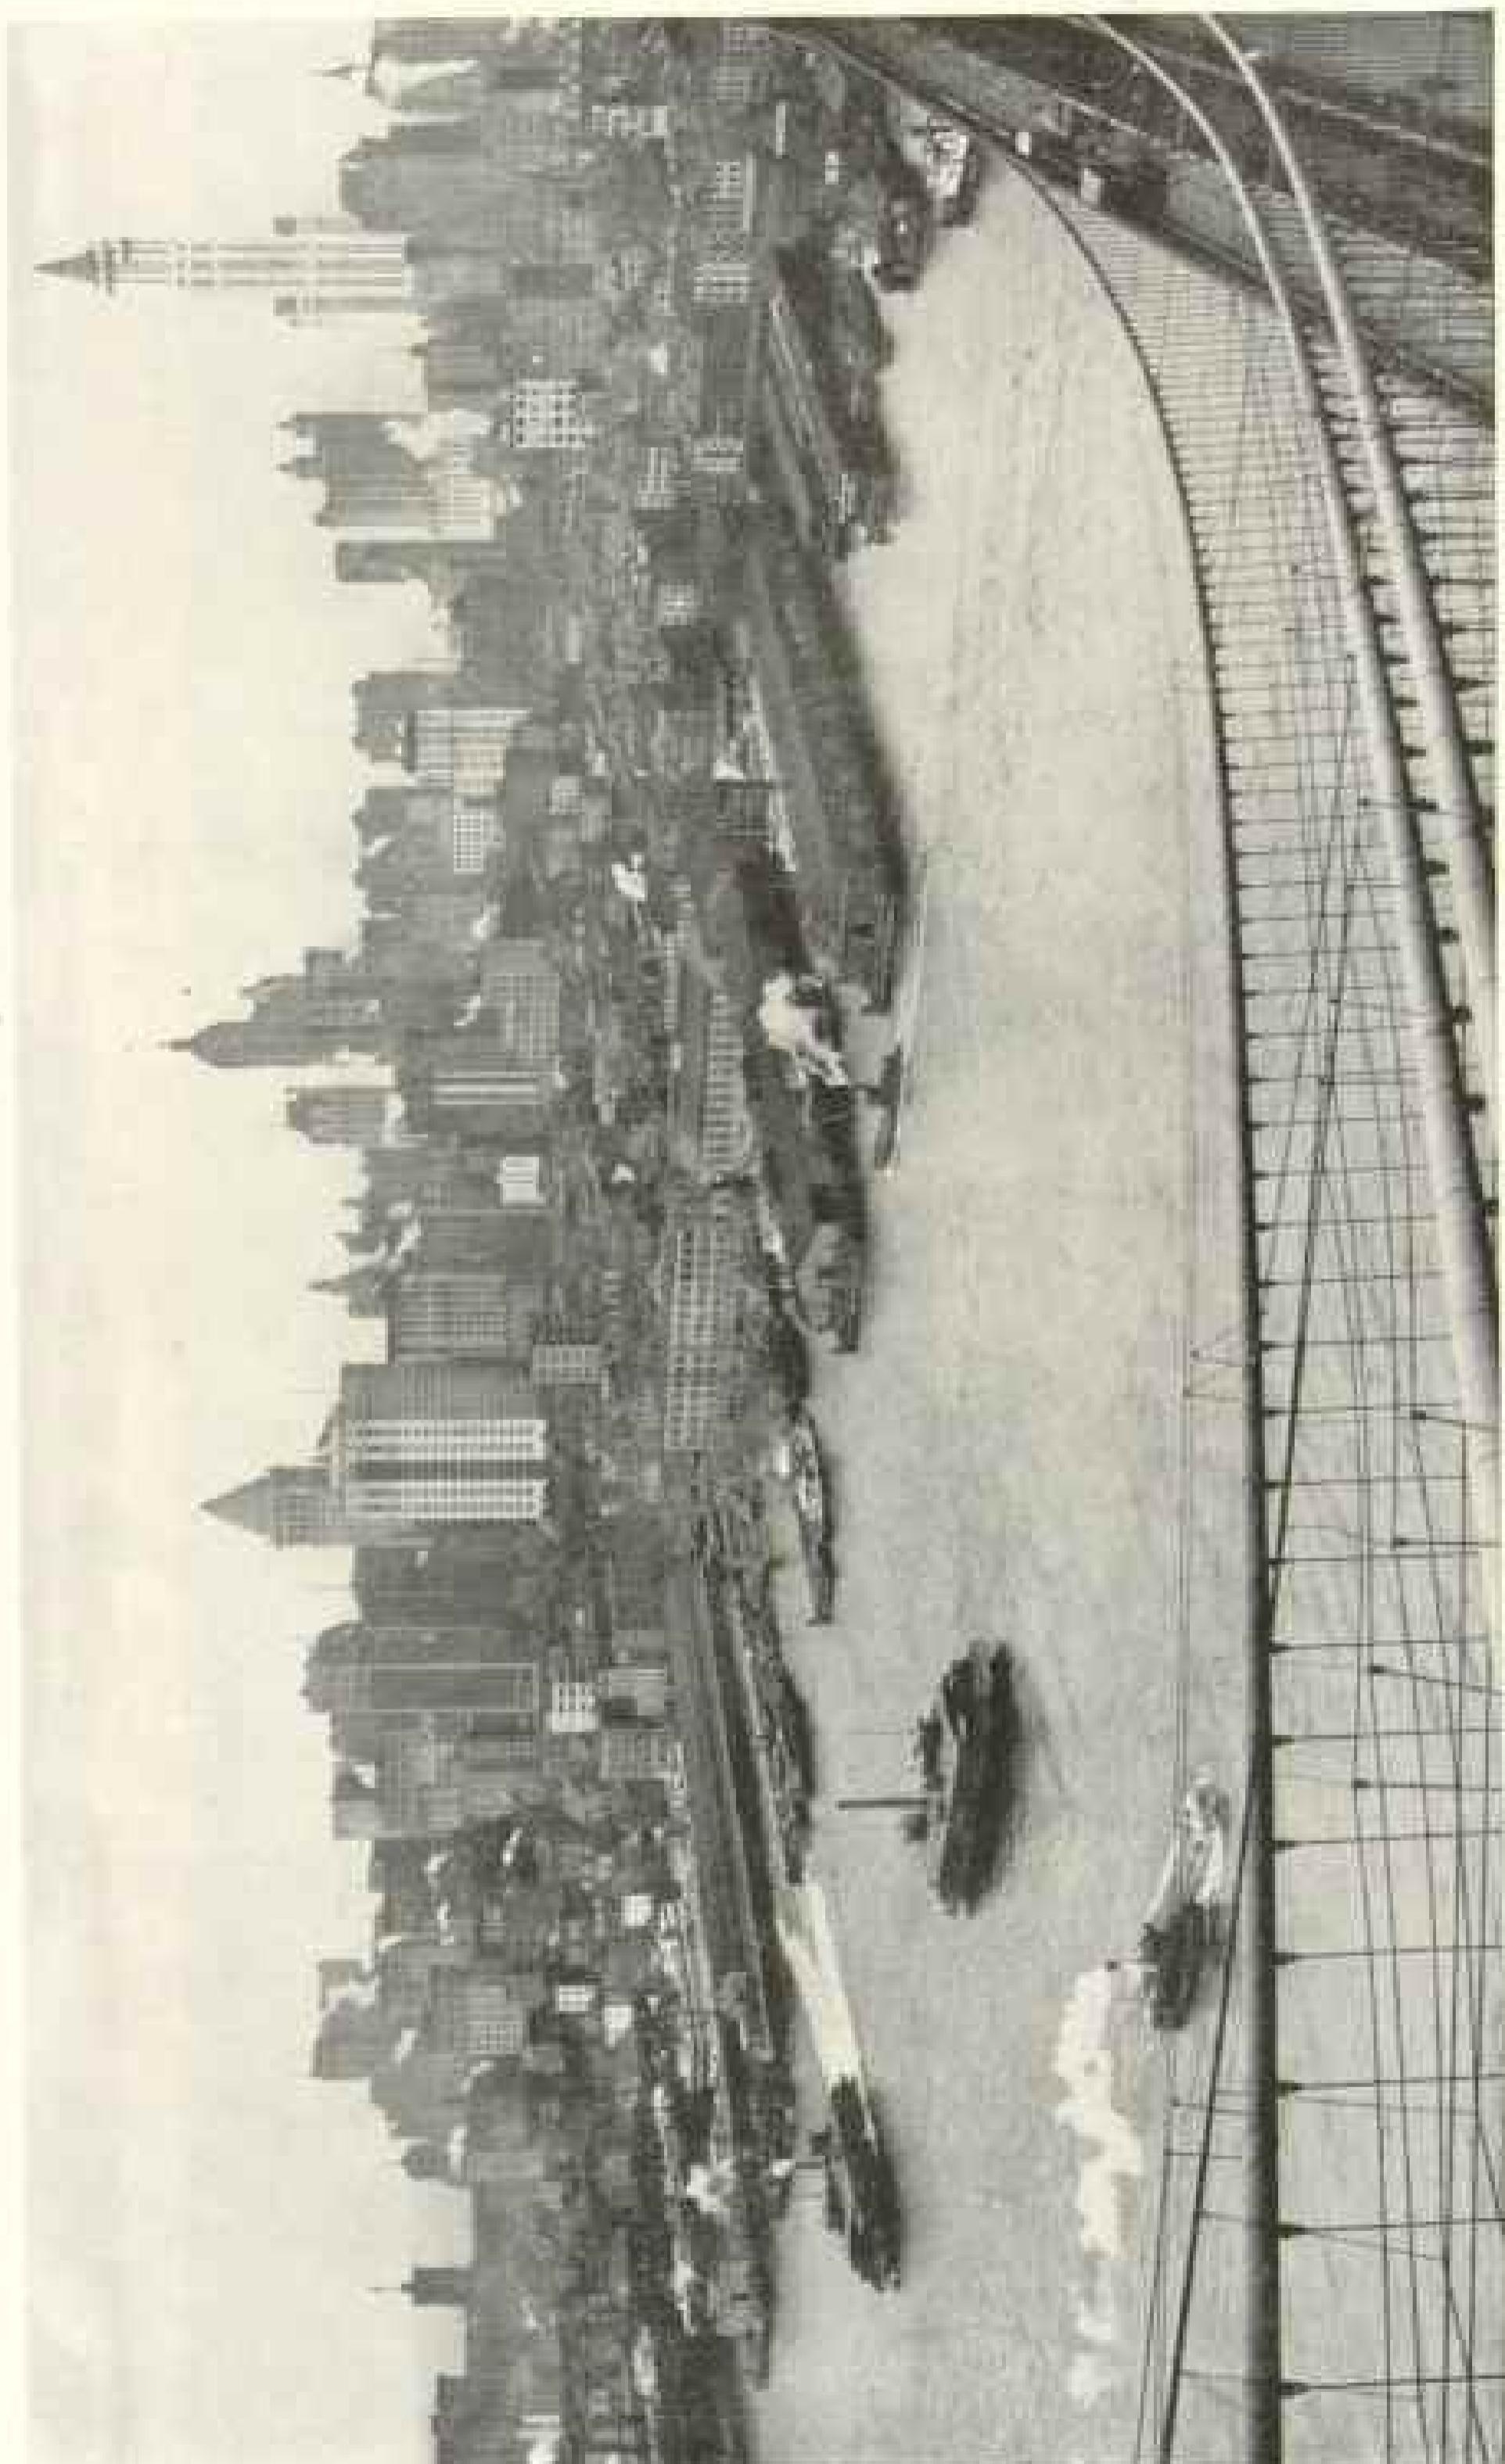

Upon the top of one of these man-made mountains there is the same peaceful quiet as on any mountain top. No sound from the streets below comes up this distance. Men on the sidewalks are infinitesimal dots, darting hither and yon. Looking down upon them, one is inclined to reflect what puny beings humans are, and from this lofty point of view almost forgets his sympathy for their personal interests. Then comes the realization that this mountain was built by these puny beings from materials dug out of the earth in a crude state, purified, shaped, and fastened together in a manner that will make it stand practically for all time, and then a feeling of reverence for the human brain—that God-given boon which has made these things possible. Note the men on the tower in the foreground.

Five enormous steel bridges span the East River. Their combined cost was half as much as the Panama Canal. Three of them are suspended from cables the wires of which, if placed end to end, would more than twice girdle the earth. If placed side by side, these five great structures would provide a roadway as wide as the Washington Monument is high, and if placed end to end they would make a great bridge over six miles long. Over the Brooklyn Bridge alone 1,300 surface cars travel every twenty-four hours, with other vehicular traffic in proportion. The new Hell Gate Arch Bridge, to be opened about January, 1917, will carry four tracks of the New York Connecting Railroad, facilitating the service of at least two great lines.

WHY ISN'T IN THE WORLD DO CITY WORKS COME IN SO SHORT AND NOT COST LONG?

IF PETER MINWIT COULD SEE THIS, WHAT WOULD HE SAY?

Peter Minuit, the first Dutch governor, who is said to have bought Manhattan Island from the Indians in 1626 for about twenty-five dollars in red cloth and beads, would never be able to tell it in city lots for something like \$1,000,000. Peter probably bought more wisely than he knew, however, for it is not likely that he dreamed of office buildings half a hundred stories high, and never investigated the foundation possibilities of the island, the solid rock of which makes it possible to build the city so far up into the sky.

Photograph by Edward L. Vandyke

"A W. COKE ON 18—THE WATER'S FINE!"

New York policemen had eyesight in the vicinity of park fountains on hot days, and those young Americans who play such an important part in the publishing business, distributing hundreds of thousands of newspapers, realize the visual delicacies of these guardians of law and order. The bluestat waiters off to the farthest corner of his beat and the boys jump into the fountain.

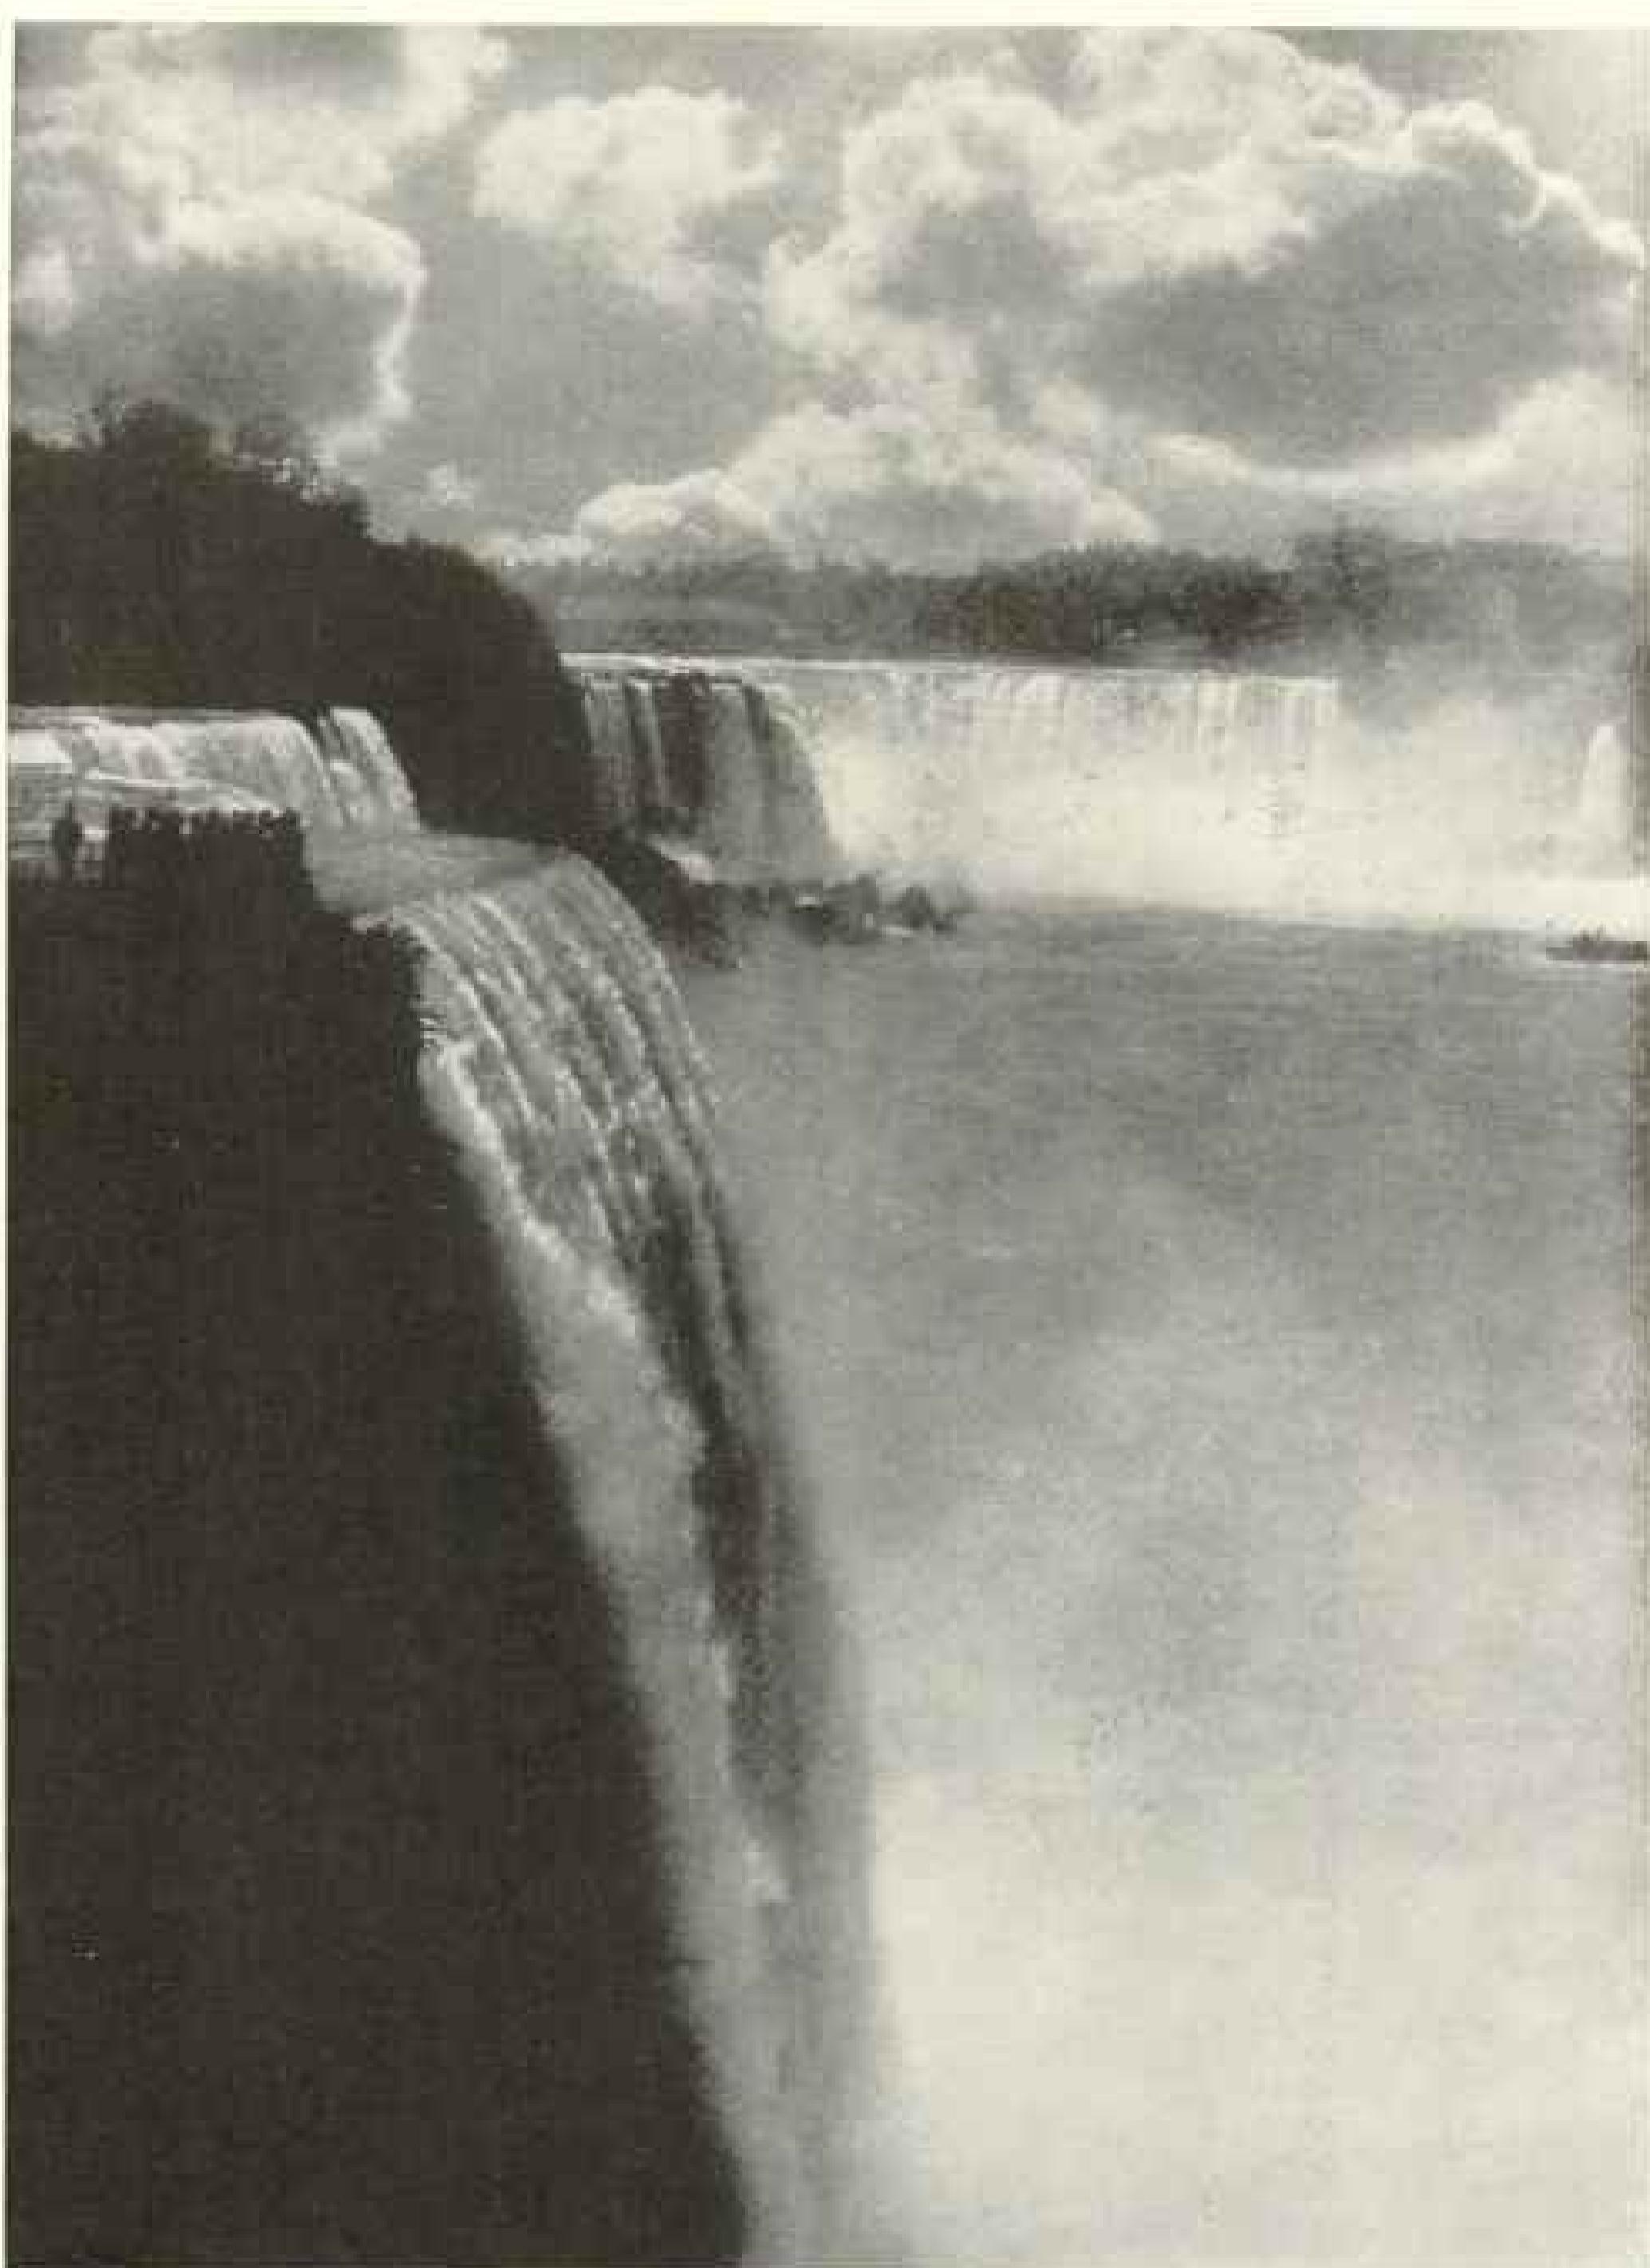

THE PALISADES OF THE HUDSON, NEAR ALPIN, NEW JERSEY

One cannot too heartily commend the spirit that citizen and State alike displayed in the preservation of the Palisades along the New York-New Jersey shore of the Hudson River. It seemed that the trap-rock quarryman was going to forever ruin their beauty, and that the continued acquisition of lands along the Hudson for private purposes was destined to deny to the public at large free access to the shores of the American Rhine. But in 1896 New Jersey and New York took joint action for the acquisition and dedication to the public of 10,000 acres along the banks of the river and the creation there of an inter-state park. Ten years later Mrs. Edward H. Harriman and many other public-spirited people joined hands with the two States and acquired 10,000 acres more.

THE WASHINGTON MONUMENT, LOOKING ACROSS THE BASIN FROM THE SMITHSONIAN

Expositions come and expositions go, but there is one great exposition that is always in season, perennial in its beauty, enduring in its interest, and rich in its exhibits: the nation's capital is an "always open" exposition of American history and American achievement. Weeks can be spent profitably within the shadow of the Washington Monument, visiting the great exposition halls which have not been built for a month or a year, but to endure for time to come.

Photograph by Charles H. Martin

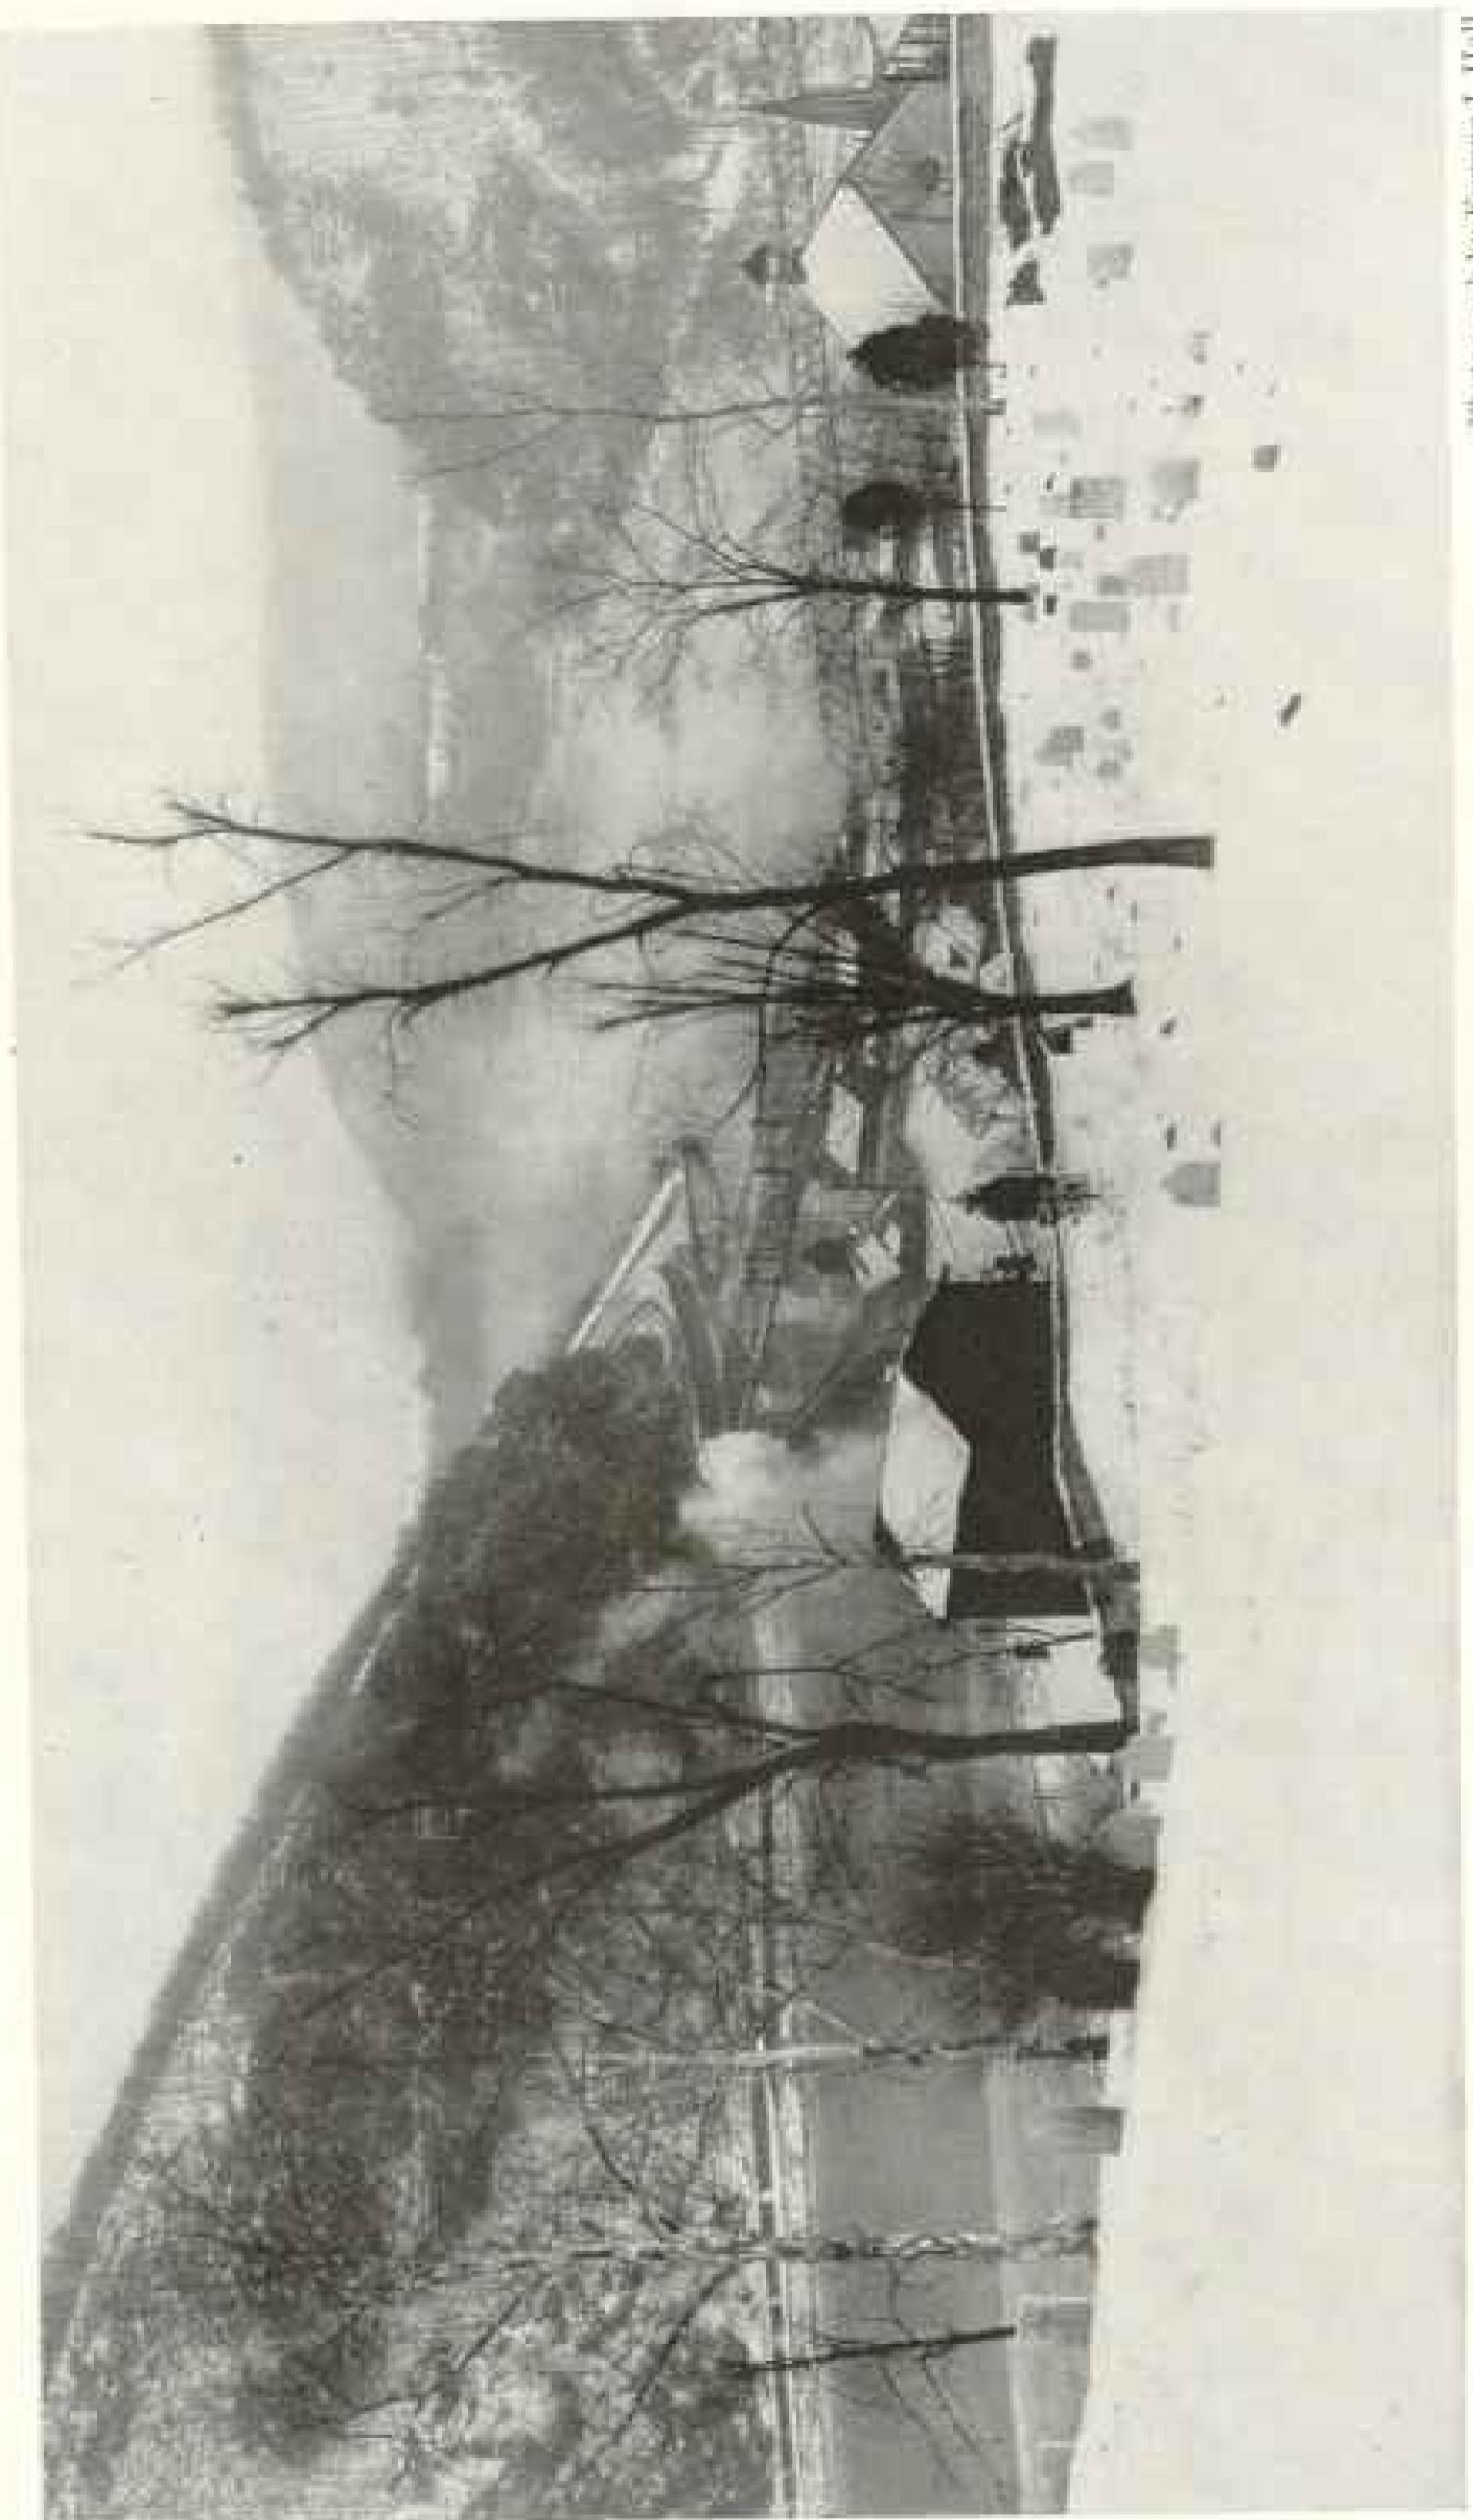

THE CAPITOL AT WASHINGTON AFTER A SNOW-STORM

Underneath this imposing dome the laws of the nation are enacted by Congress, having now a membership of between five and six hundred representatives from the forty-eight States. Under it also sits the United States Supreme Court—the Federal tribunal of last resort. It represents the beginning and the end of law. Every tourist ticket should read via the nation's capital.

THE TOW'S OF JOHN BROWN'S RAID: HARPER'S FERRY, WEST VIRGINIA
Where the Shenandoah, called by those who live in its famous valley "Fair daughter of the skies," joins the Potomac at Harper's Ferry they make a picture of seldom-exceeded natural beauty. Jefferson called the gorge through which the Potomac passes the "Blue Ridge Mountain." Of course, if he had seen the Grand Canyon, the Yosemite National Park, or the "one of the most stupendous scenes in nature," he would not have put it so strongly; but Harper's Ferry none the less is a bit of scenery which a whole nation may well treasure.

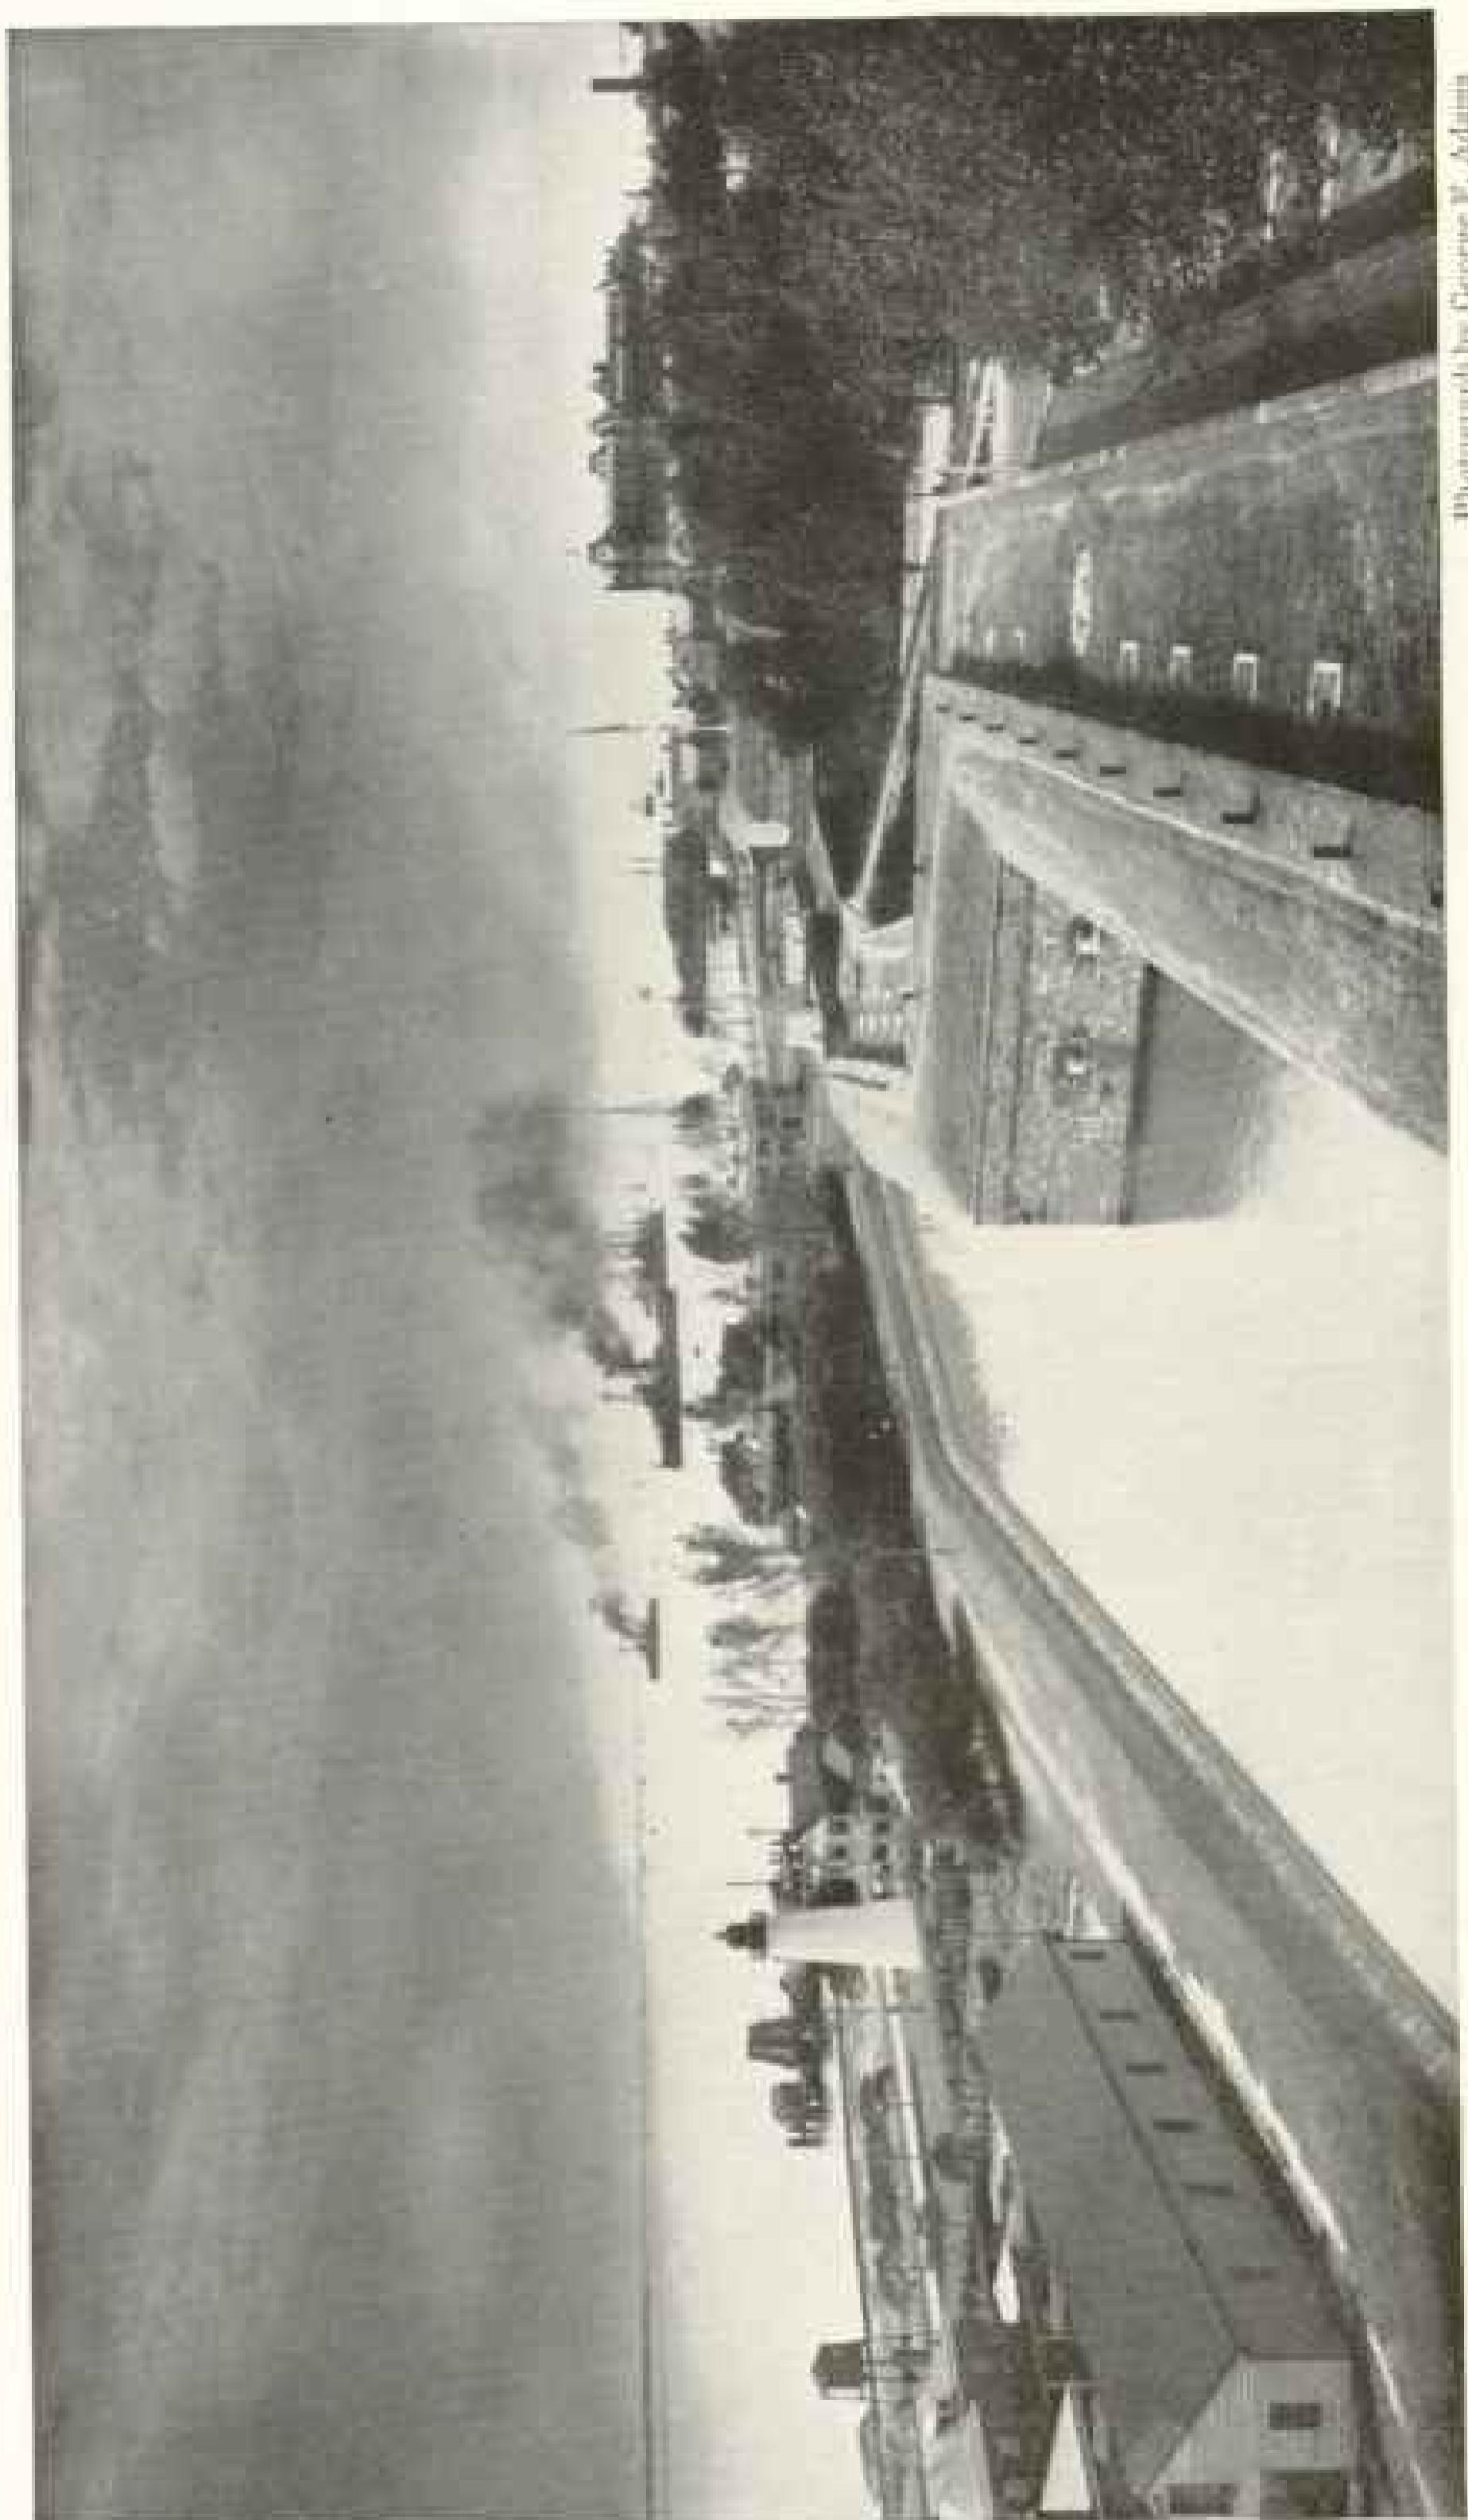

Photograph by Eugene J. Wall

Photograph by George W. Adair

A VIEW OF FORT MONROE AND OLD POINT COMFORT, VIRGINIA.

In no territory of like extent in the United States is more historical interest gathered than in that which borders Hampton Roads. Here was planted the first English colony in America; here was held the first gathering of the people's representatives to make their own laws; here were erected the first fortifications in the English-speaking New World; here was fought the last battle that terminated America's War of Independence 305 years ago, and the naval battle that revolutionized the warfare of the sea. The first fortifications where Fort Monroe now stands were built in 1611. Since that time, with short lapses, there has been some sort of a fortification always guarding the entrance to Chesapeake Bay. Rich in history, balmy in climate, charming in prospect, the Old Point region has entertained its hundreds of thousands with Virginia hospitality.

THE MAIN STREET OF YORKTOWN, VIRGINIA, WHERE CORNWALLIS SURRENDERED TO
WASHINGTON IN 1781, NEAR THE MOUTH OF THE YORK RIVER,
33 MILES FROM NORFOLK

The house on the left was the first custom-house in America. The ox-cart is still more in evidence than the automobile. Here stands the house of General Nelson, the Virginia patriot, who offered twenty guineas to the first cannoneer who would hit his house, saying that it meant nothing to him while it harbored the enemy of his country—Cornwallis. And a cannon-ball embedded in the chimney tells a story of good gunnery.

versities which honor the names of their founders, Elihu Yale and John Harvard? Surely Oxford and Cambridge have rendered no more conspicuous service to Europe than Harvard and Yale to America!

And there are many other college communities whose halls are fragrant with traditions more inspiring to Americans than any of the memories associated with the university buildings which tourists visit in Europe—William and Mary, where Jefferson and Monroe were college boys; the University of Virginia, founded by Jefferson; Princeton, the university which graduated Madison and where Joseph Henry taught.

THE EMPIRE STATE

From its metropolis in the southeast to Niagara on the west, from Plattsburg on historic Lake Champlain to picturesque

Lake Chautauqua, the Empire State is full of lure for the traveler. New York City is the most cosmopolitan community of the earth. There are more Jews in it than in Jerusalem, more Italians than in Messina, more Germans than in Bremen, and more Slavs than in Kishinef.

Some one has said that New York is a city that is all things to all men; that the artist translates it in terms of beauty, the practical man in terms of efficiency. He adds that everywhere it is spectacular, the big setting of a big drama, a place of endless experiment and achievement, the city of skyscrapers, whose elevators convey one with the speed of an eagle to dizzy summits, from which those who walk the narrow street below seem like so many ants following their daily toil.

To the Hudson River many a world traveler has paid tribute. George Wil-

Photograph by H. C. Mann

BRUTON PARISH CHURCH: WILLIAMSBURG, VIRGINIA

Bruton Parish Church was built in 1710 and is the oldest church in continuous use in the United States. It was more intimately associated with colonial history than any other building in Virginia. Five Presidents of the United States—Washington, Jefferson, Madison, Monroe, and Tyler—worshipped here, as did also all of the colonial governors and the members of the House of Burgesses for three-quarters of a century. Among its interesting relics are the Jamestown baptismal font and communion service.

William Curtis declared that "the Danube has in part glimpses of such grandeur, the Elbe sometimes has such delicately penciled effects; but no European river is so lordly in its bearing, none flows in such state to the sea. Of all our rivers that I know, the Hudson, with its grandeur, has the most exquisite episodes; its morning and evening reaches are like the lakes of a dream."

The trip from New York up the Hudson is one of rare delight, whatever the season, for between the magnificent country estates and the history and legends of Tarrytown and Sleepy Hollow, of West Point and the Catskills, there is romance and entertainment in every mile. But when autumn comes, and the trees

reach their unanimous verdict that the colors of the rainbow should be matched by the colors of their foliage, the traveler upon its waters might well "doubt if Eden were more fair."

The Adirondack region, stretching from Canada down almost to the Mohawk Valley and from Lake Champlain to the St. Lawrence River, will ever claim the loyal admiration of the tens of thousands who visit it. The beauty of its intricate chain of lakes, the solitudes of its deep wilderness, and the magic of its flaming chasms linger in the minds of all who have wandered there.

Upon the southeastern border of these mountains lies Lake George, a gem in a setting of mountains. The Italian thinks

Photograph from M. L. Alexander

THE WASHINGTON OAK, THE LARGEST LIVE-OAK IN THE WORLD: AUDUBON PARK,
NEW ORLEANS, LOUISIANA

The gnarled, wide-branched oaks and the funeral Spanish moss are not confined to Louisiana's vast virgin forests. They come right down into the city, and one who rides through Audubon Park and feels its restful spell cannot but accept, at least in part, New Orleans' proud boast that she is the "city that care forgot."

of it as Como, the Englishman as Windermere, and the Scot as Katrine, for it possesses much of the enchantment of each of these famous waters.

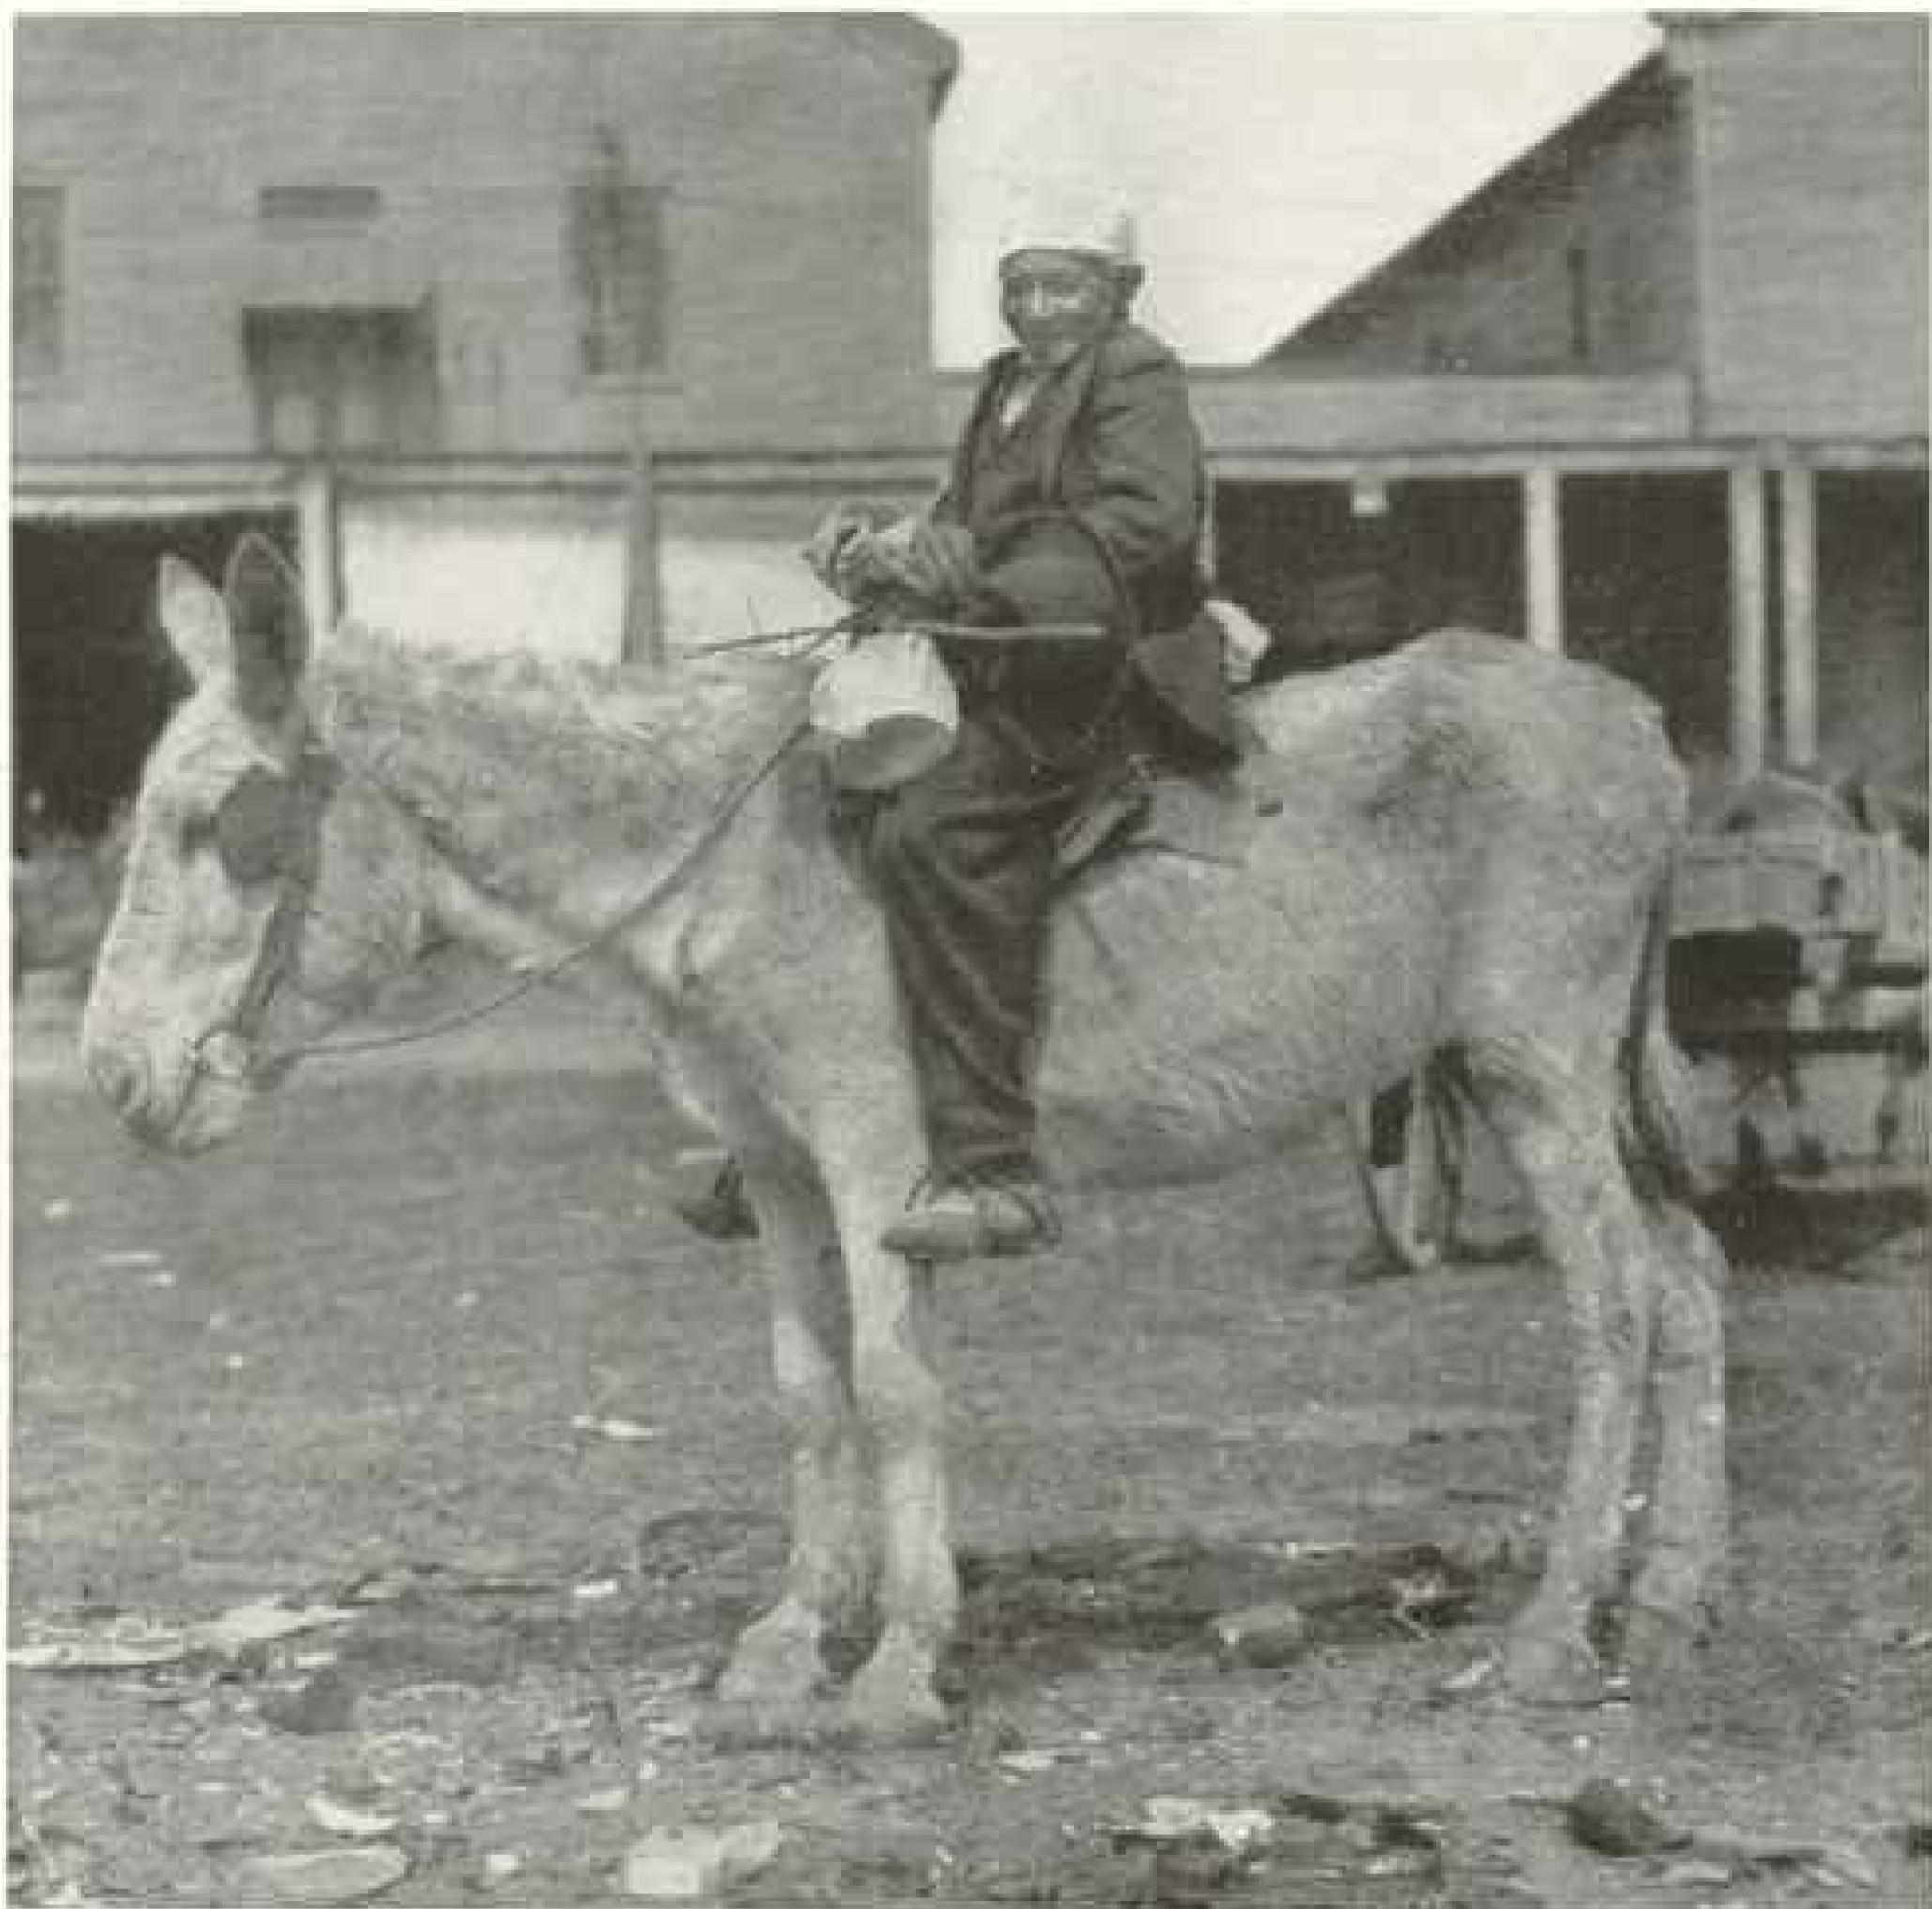

In central New York are to be found those remarkable lakes which we know as Oneida, Cayuga, and Seneca.

The culminating spectacle of the East, by unanimous consent, is Niagara Falls. The Indians described it in a phrase than which no word-painter has ever found one more expressive. They called it the "Thunder of Water." Niagara is without a setting. Some scenes gather as much from their surroundings as they themselves possess; like a mirror, they borrow some of the loveliness we behold in them from other sources. But Niagara has all its beauty and sublimity within

itself. There is nothing of charm or attraction in the approach to it from whatever direction.

Just as the United States is setting aside national parks and national monuments in the West for the benefit of the generations that shall come after us, so New York, in particular, is making reservations, historic and scenic, for the benefit of her people.

The American Scenic and Historic Preservation Society is incorporated under the laws of that State and has been intrusted with the custody of most of these places. It annually makes a report to the Governor, showing what steps are taken, and has labored with unusual success in its field. Letchworth Park and Fort Ticonderoga, the one an example of

the places of natural beauty and the other of the places of historic associations, are under its control.

INDEPENDENCE HALL AND VALLEY FORGE

The State of Pennsylvania has her share of shrines. In Philadelphia there is Independence Hall, than which there is no more hallowed edifice in Europe or America, for it was in this old brick building that democracy had its birth. Surely no place in Europe holds as just an appeal to the lover of liberty.

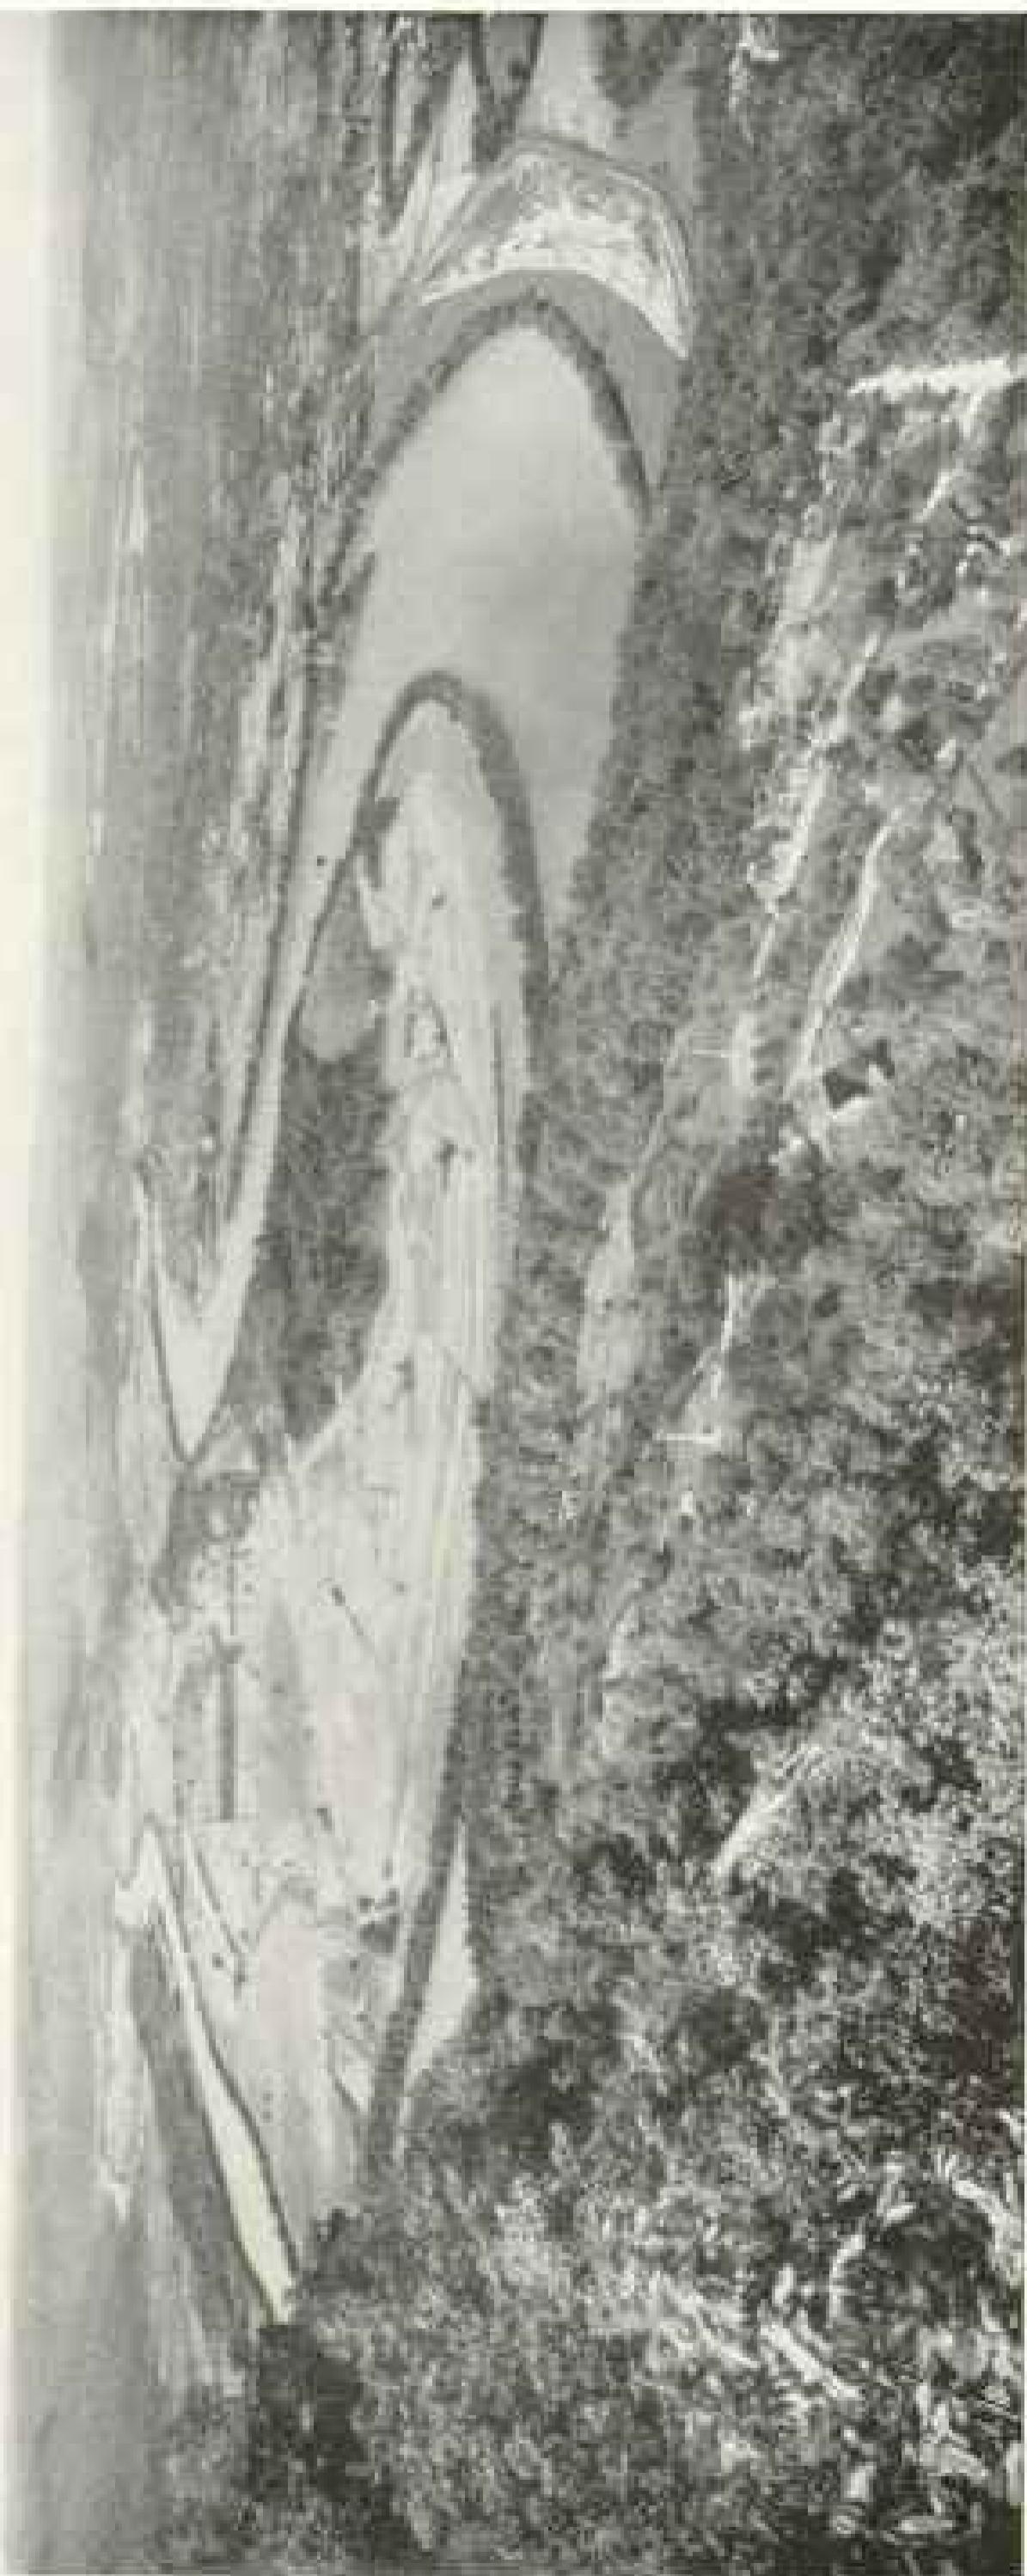

And then there is Valley Forge, set

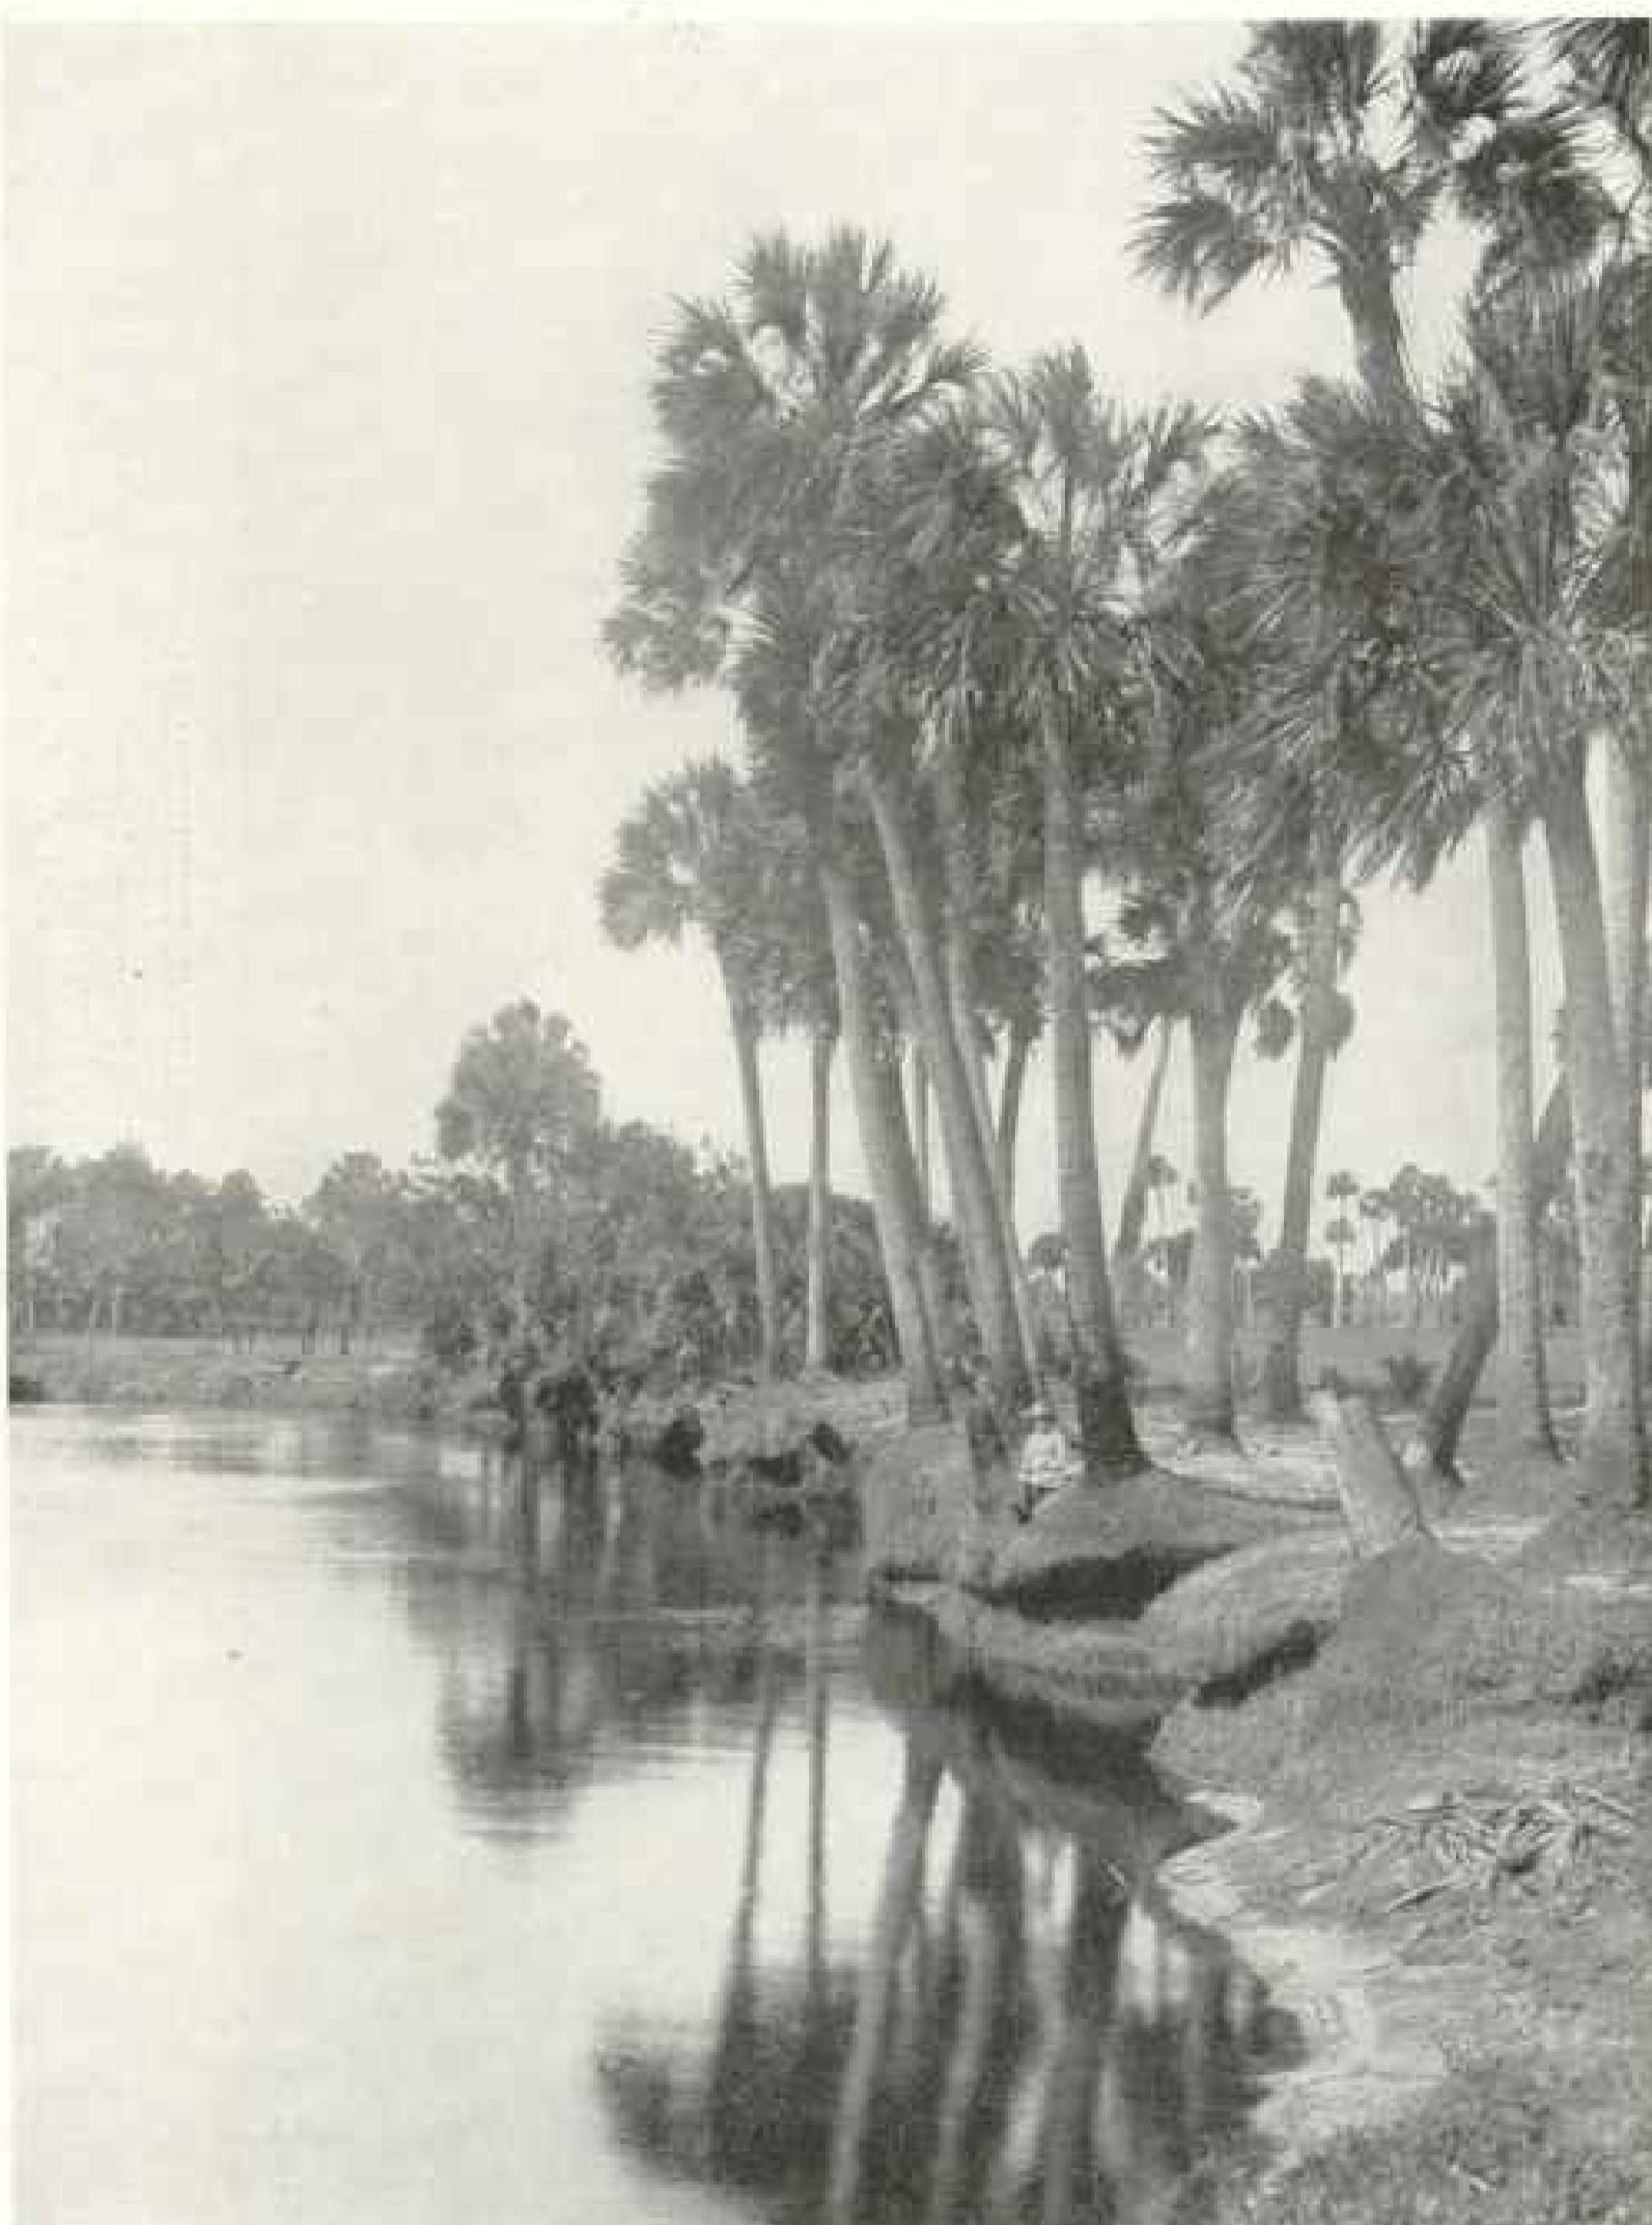

aside by the State of Pennsylvania as a park. How can Americans better comprehend the sufferings and sacrifices out of which our nation was born than to go to Valley Forge, and there on the very ground read the story of that cruel winter which moved the Father of His Country to tears!

Within a few hours from Philadelphia, Baltimore, or Washington is the battle-field of Gettysburg, listed by the historian Creasy as one of the fifteen decisive battles of all time. As you make your pilgrimage to the sacred field through Mary-

Eastern Tennessee and western North Carolina have some of the most beautiful landscapes in America. History and nature conspire to lend the whole region a deep and abiding interest. The picturequeness of the Lake Toxaway country of North Carolina and the Civil War history of the Lookout Mountain country have a wide appeal and make friends of all who journey that way.

CHATTANOOGA AND THE MOOCASIN BEND OF THE TENNESSEE RIVER FROM LOOKOUT MOUNTAINS

THIS IS NOT A SCENE ON THE BANKS OF THE NILE, BUT A VIEW ON ECONLOCATCHEE CREEK, FLORIDA

Florida, with its cabbage palms, tropical jungles, palatial hotels, and wide, hard beaches—"the land of eternal summer"—is only thirty-five hours distant from New York and thirty-three from Chicago.

Although Paterson, New Jersey, is America's leading silk city, to the vicinity of Scranton, Pennsylvania, comes one-third of all the raw silk imported into the United States, and some of the country's highest silk mills are located here. The illustration above shows the interior of one of these great manufacturing factories and a typical modern American textile mill, where a maximum of cleanliness, pure air, and floods of sunlight make for the best working conditions. This enormous room has a floor area of about 35,000 square feet, and 450 operatives are required to attend to the wants of this acre of machinery.

A GREAT AMERICAN SILK MILL AT SCRANTON, PENNSYLVANIA

A VIEW OF THE ALLEGHENY AT PITTSBURGH

No, this is not gravel from the river bottom nor oysters from the bay. It's a Pittsburgh coal fleet in the Allegheny River loaded with "black diamonds" to keep alight the fires which help to make Pittsburgh one of the foremost industrial cities of the world—a furnace of Vulcan in real life.

Photograph by Gilbert H. Grosvenor

ONE OF THE COUNTLESS AMAZING SIGHTS TO BE SEEN ON THE WHARVES OF OUR GREAT LAKES: FIVE HUNDRED THOUSAND DOLLARS' WORTH OF COPPER INGOTS AWAITING SHIPMENT AT HOUGHTON, MICHIGAN

Industrially as well as scenically the United States affords fields of interest to the tourist surpassed by no other part of the world. We produce three-fifths of the world's copper, two-fifths of its iron and coal, one-third of its silver, lead, and zinc, and one-fifth of its gold.

land or Pennsylvania, you see a landscape that painters love—undulating hills, rolling fields, watered with winding streams and ornamented by groves of oak and hickory, picturesque farm-houses, and huge barns packed to the rafters with Nature's gifts, for these counties possess some of the best land and best farmers of America.

Fifty-four thousand of as brave men as ever marched to martial music mingled their blood at Gettysburg in 1863. The government of the United States has spared no effort to preserve to the future the memories of those who bore the brunt of the bitter struggle, and to mark alike the position of the Blue and the Gray of those sanguinary days. It is the best marked and best cared-for bat-

tlefield in the world. With its magnificent picture of pastoral beauty, its splendid roadways, and its eloquent monuments, Gettysburg is a sight to thrill the heart of every American.

Nowhere can we find sights and memories more precious to our hearts than those which abound in Washington, the most stately capital city in the world. The glories of the nation's capital have, however, been so well described in the pages of this Magazine by ex-President Taft and Viscount Bryce that they need not be referred to here.

Not far from Washington is Harpers Ferry, where the Potomac breaks through the mountains on its way to the sea, and the scene of John Brown's raid; here came Stonewall Jackson to capture the

Photograph by W. H. Brandt

TYPES OF AMERICAN GRAIN ELEVATORS: THE GREAT LAKES

The United States is the principal grain exporting nation in the world, having more grain elevators than the remainder of North and South America and Asia and Africa together.

force which stood in the way of the Confederate effort to carry the war into Maryland and the North in 1862.

From Harper's Ferry far away to the south stretches the famous Shenandoah Valley, the granary of the Confederacy in the 60's, of which Sheridan declared that he had laid it so bare that a crow flying across it would have to carry his rations. The Valley Turnpike, once the race-course of armies, is now the peaceful highway of the automobilists who journey from the North to the South.

WALLS OF DIAMONDS AND PEARLS

Half way up the Shenandoah Valley are the Luray Caverns, an underworld palace built by the busy hands of trickling waters. Aladdin, we are told, was once permitted to enter a cave which exhibited such decorations that its glory both dazzled and affrighted. But Aladdin never beheld anything more wondrously exquisite than the water-built architecture of Luray.

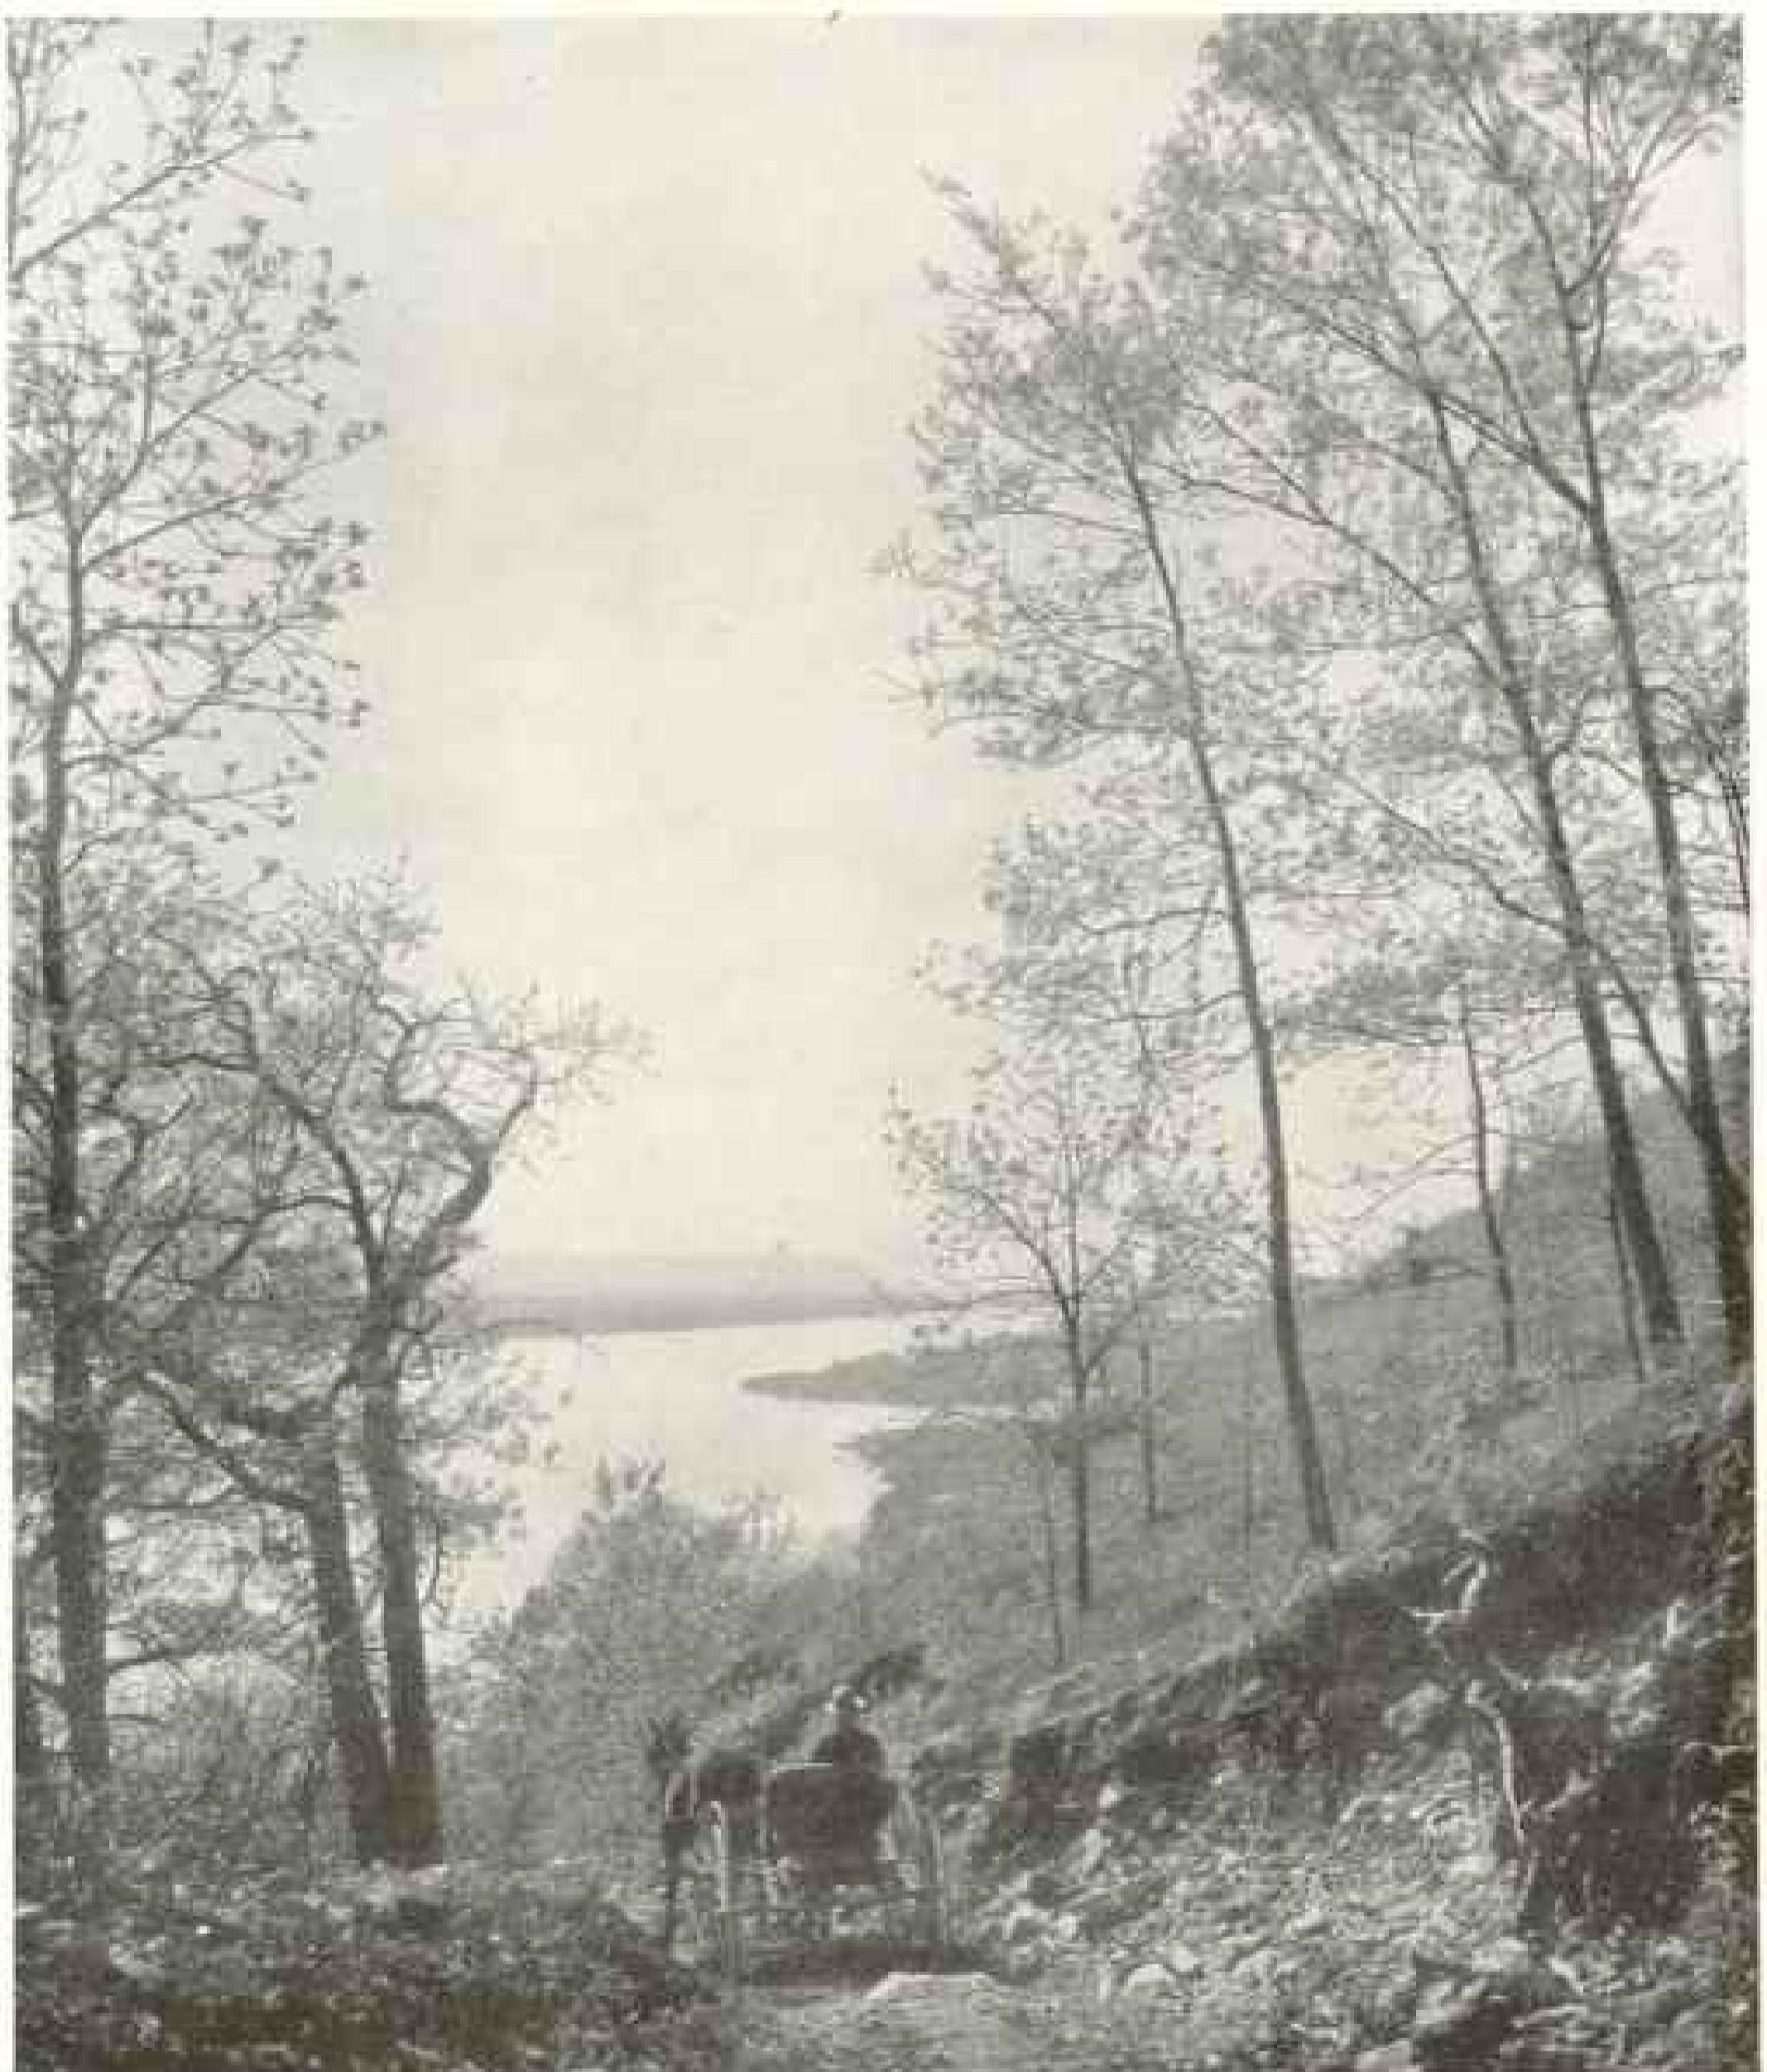

The Throne Room is canopied with

curtains woven of diamonds and pearls. The Saracen's Tent has more than Oriental splendors of richest damasks and golden samite, which drape the crystal couch in festoons of magic beauty. Titania's Veil is woven of petrified spiders' webs, while the Ball-room seems as if set to celebrate a marriage between the gods.

The visitor to Luray today shares the sentiment of another visitor of long ago, who exclaimed: "Mortal hath not made the like, nor human fancy conceived a thing more magnificent!"

As one journeys westward from the Atlantic seaboard, whether by the northern route and by boat through the Great Lakes, touching at points of interest along their shores, or by one of the central routes through western Pennsylvania or West Virginia, or yet by a southern road through New Orleans, there will be discovered a continual succession of dramatic and matchless spectacles.

Not the least of these is the Mammoth Cave of Kentucky, the biggest cavern of the world. The discovery of the cave

Photograph by Eugene J. Hall

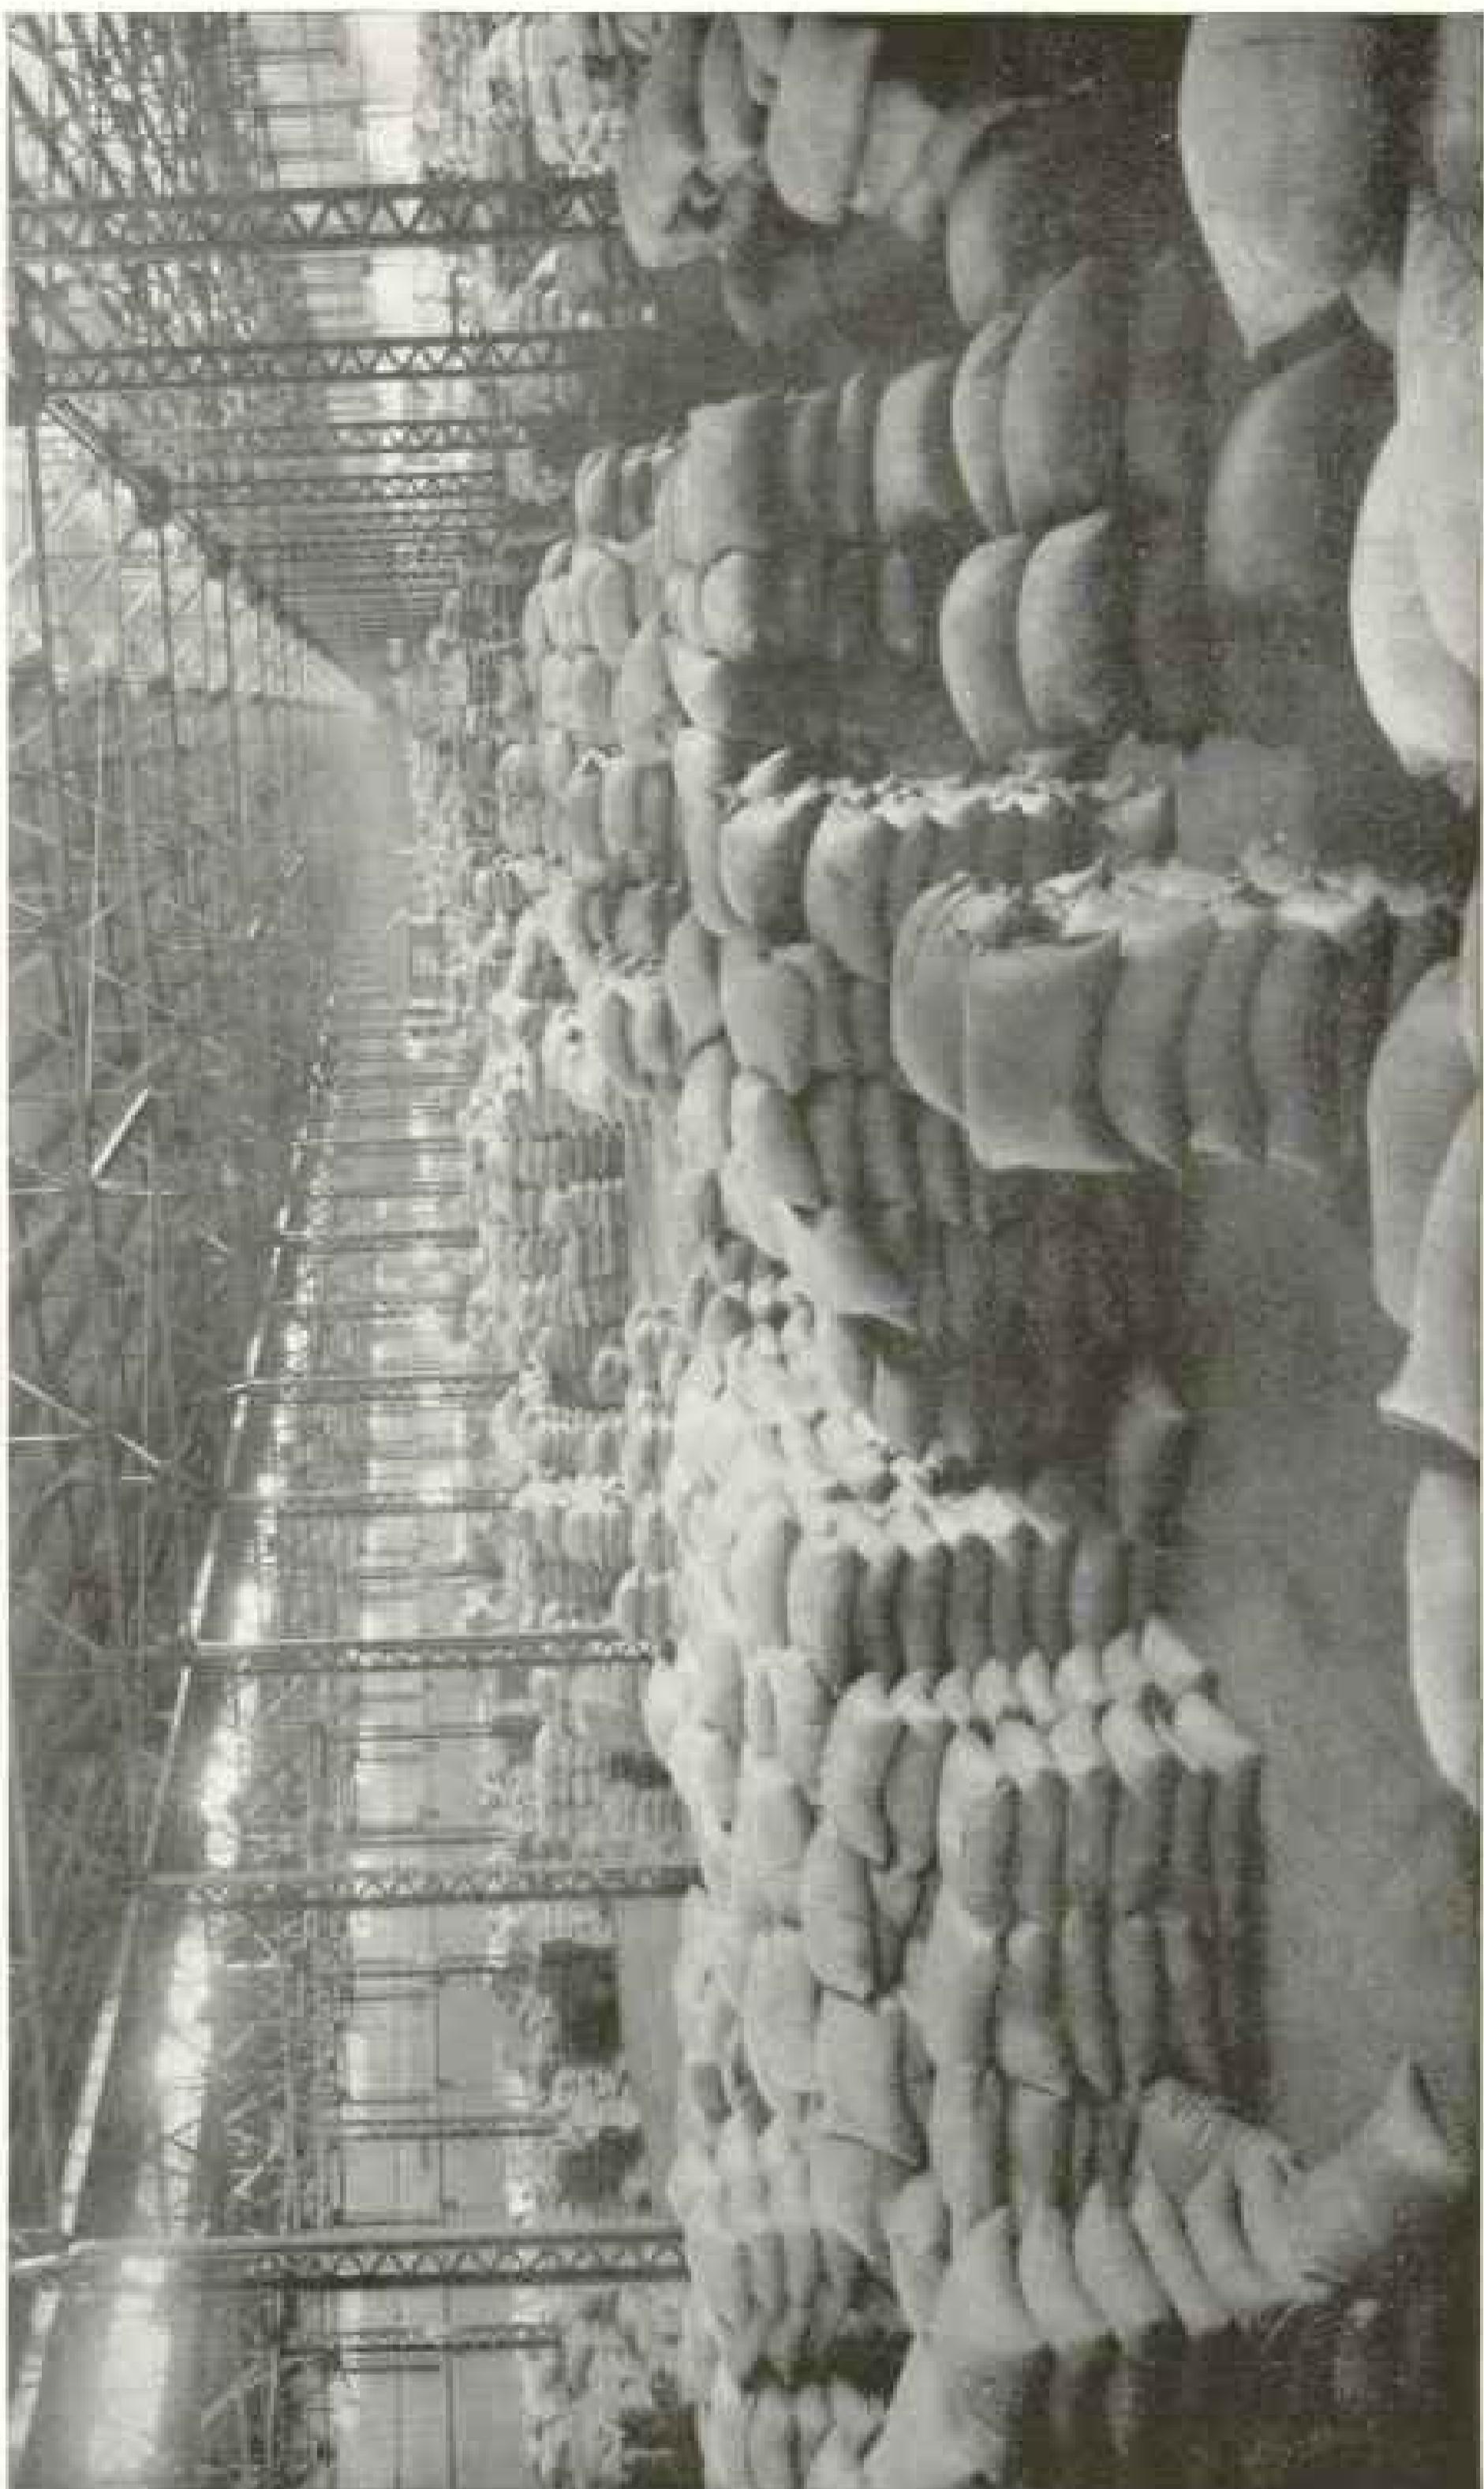

THE ROAD DOWN THE BLUFF NEAR ALMA, WISCONSIN: MISSISSIPPI RIVER

The country at the head of the "Father of Waters" was once the scene of hard-fought Indian wars and in those days, not so long ago, a wilderness of vast expanse. Now it is thickly settled by farmers, whose fields of golden wheat have brought them wealth, and many of whom now superintend the work on their farms from the rear seat of an automobile.

New Orleans has the largest agricultural warehouse in the world. It has a capacity of 3,000,000 bales of cotton and is adapted to the storage of all other packed commodities, such as sugar and coffee. It was built at a cost of \$3,500,000 by the State of Louisiana and is said to reduce the cost of handling any agricultural commodity 40 per cent. There are 24 acres of ground under roof, while the entire plant occupies 150 acres. It is only through such giant structures as these that the United States is able to handle the vast amount of agricultural commodities that pass out of our ports.

Photograph by A. Schieffelin

THREE FORKS OF THE MISSOURI RIVER NEAR THE CITY OF THREE FEET, MONTANA

Far up in the Rocky Mountains of Montana, at the eastern apex of an equilateral triangle between Helena, Butte, and Three Forks, three mountain rivers come together to make the Missouri. They are the Jefferson, the Gallatin, and the Madison, named by Lewis and Clark in honor of President Jefferson and his two tanking advisers. It was here that Sacajawea, the Indian "bird woman," guided the Lewis and Clark expedition from the Dakotas' grasp and climbed to the top of the ridge for a survey of the country. Although carried away in her childhood, she recognized the spot as her long-ago home, and announced that she knew the territory from there to the Pacific. In the picture the river on the right is the Jefferson, that in the center the Madison, and that to the left the Gallatin.

NEARING THE SUMMIT OF PIKES PEAK ON THE CGR RAILWAY

Pikes Peak, 14,168 feet, is the highest mountain in America whose summit is reached by a railroad. Little Switzerland, only one third as large as the State of New York, contains more mountain tops accessible by railway than the entire United States. It may be stated, however, without belittling the enterprise and industry with which the Swiss engineers have patiently constructed their marvelous railways to the summits of Gorner Grat, Pilatus, Brienz, Rigi, etc., that the money which financed these railways was in large part the vacation cash left in Switzerland by American tourists.

was a God-send to the country, for in the war with England in 1812 the United States secured from it the nitrous earth from which was derived the saltpetre used in the manufacture of the gunpowder for our armies.

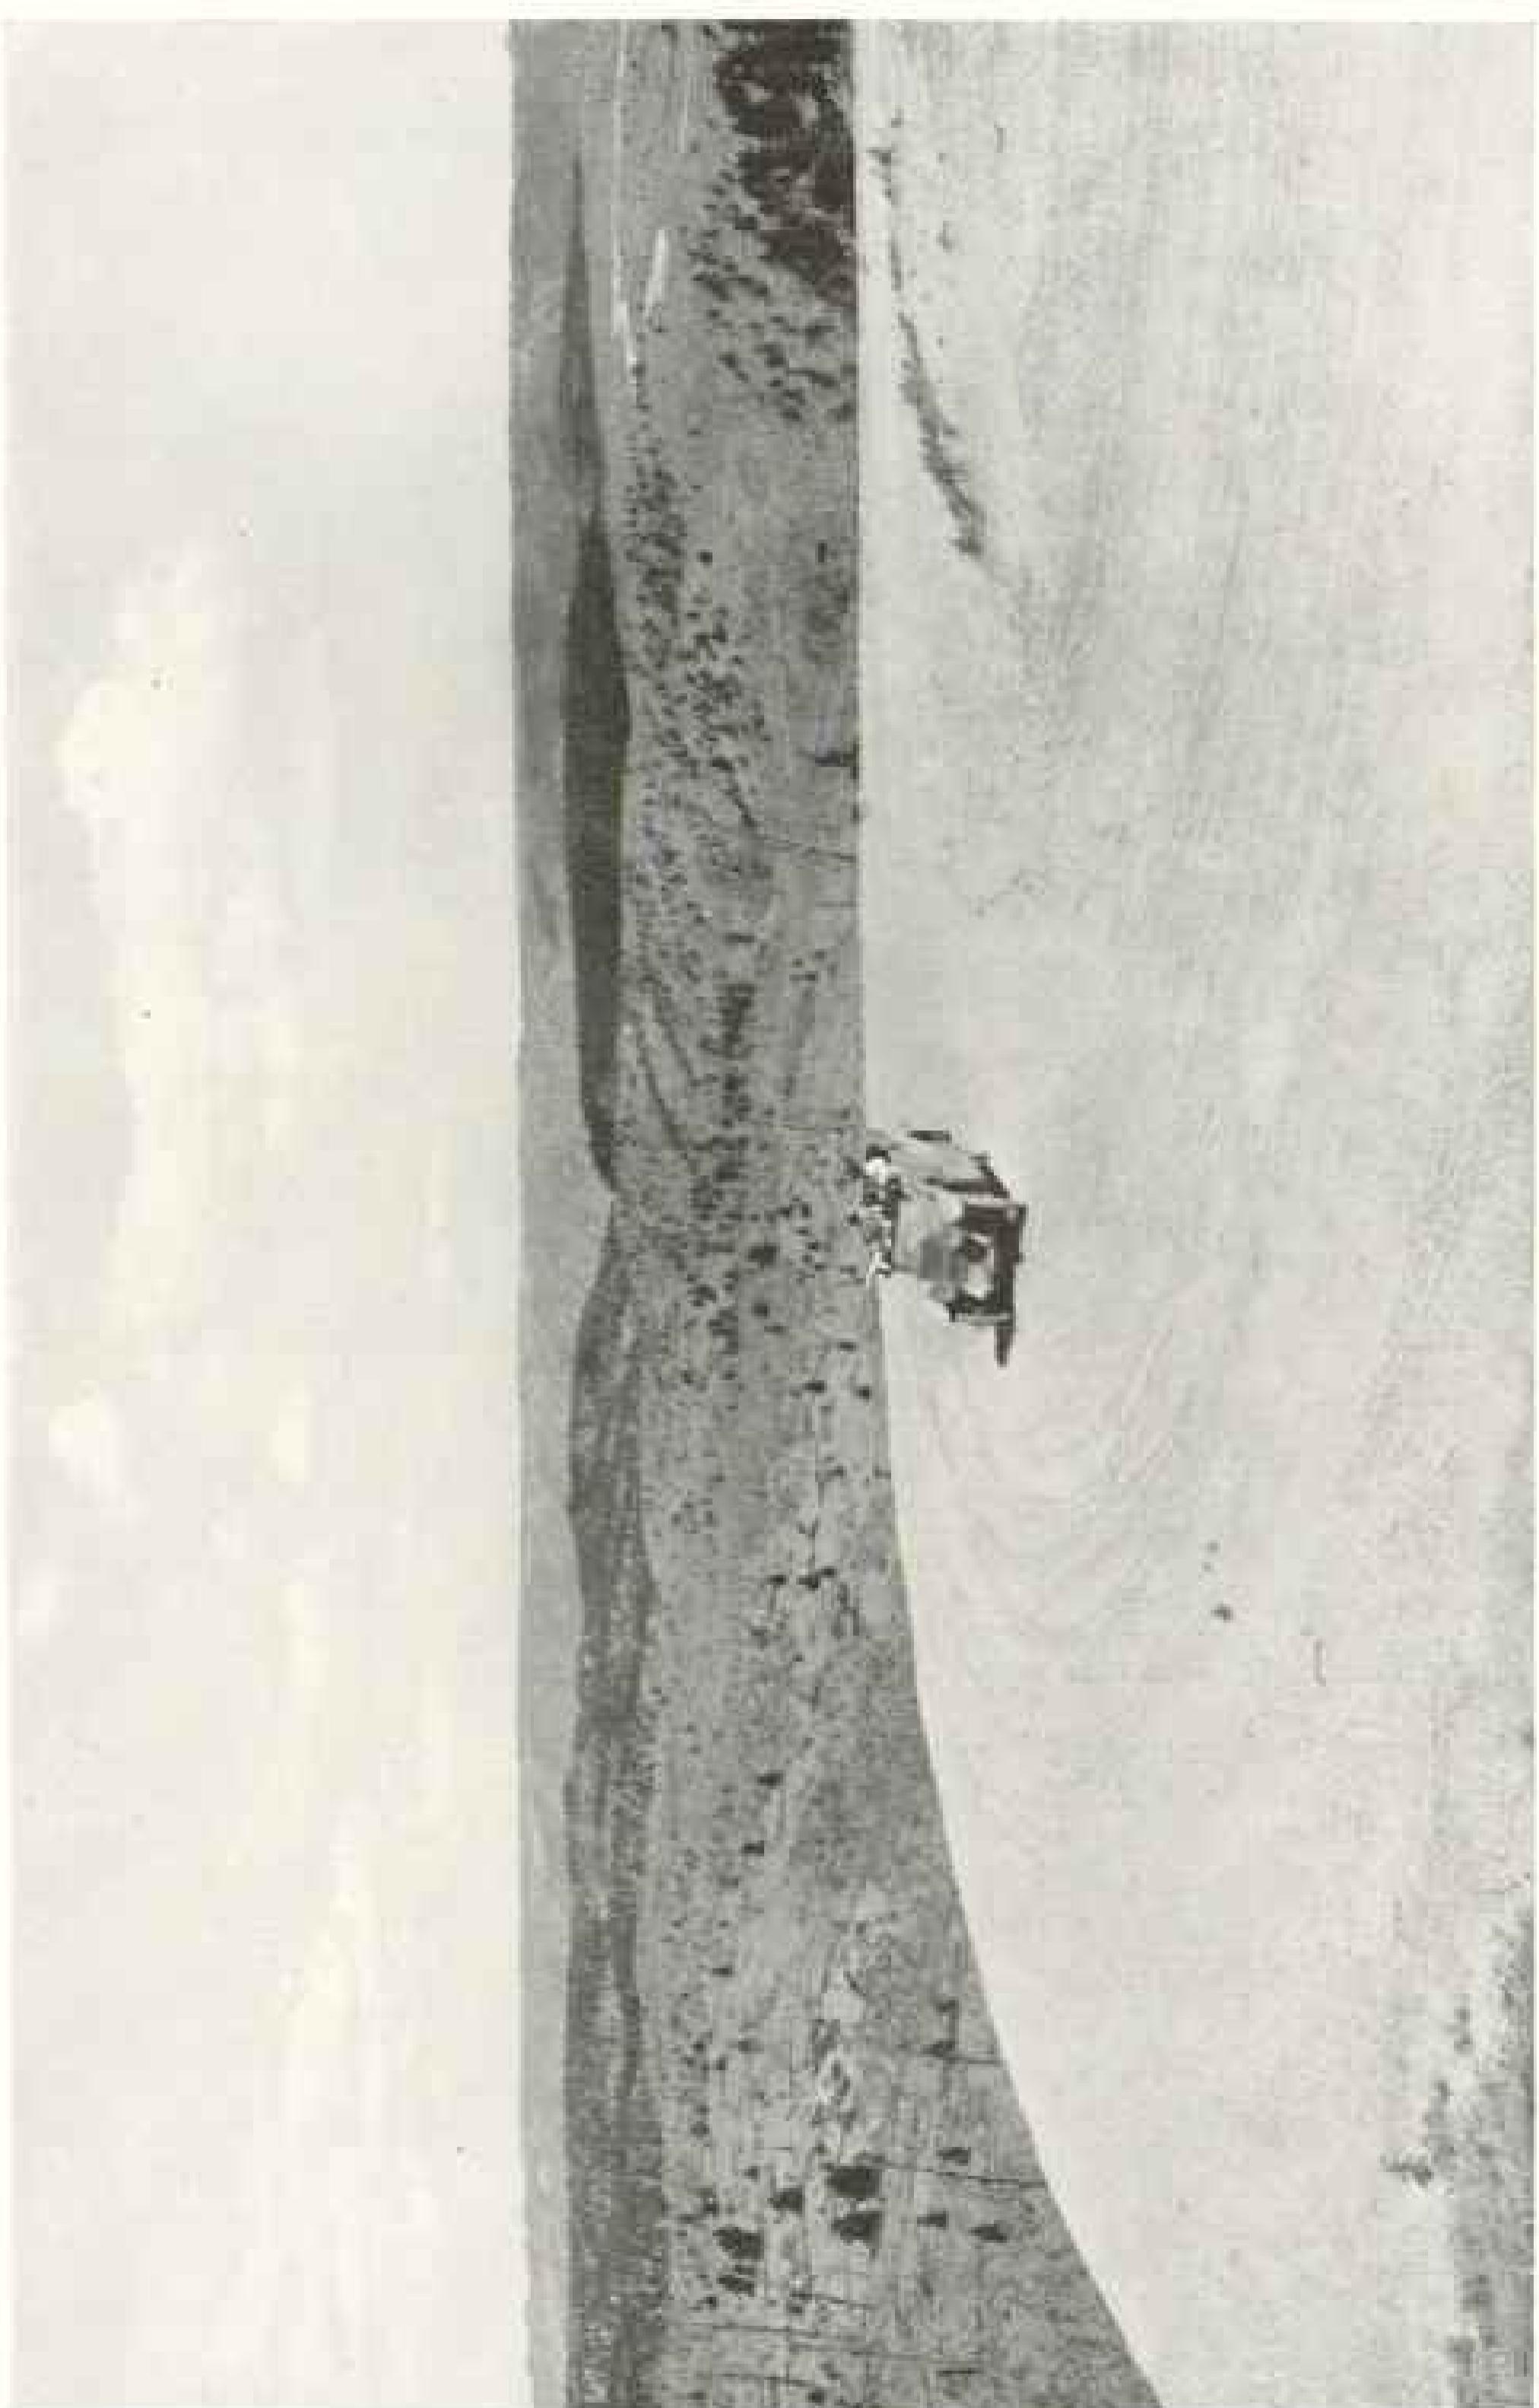

Nowhere else can one travel so far in Plutonian regions of perpetual night, where petrified efflorescence is a substitute for vegetation, as in this great cavern. Vastly larger than Luray, the Mammoth Cave possesses a rich variety of formations. Many of these are huge in their proportions and remarkable in the delicacy of their structure.

Strange species of creatures are to be found there. One of these is a blind and

wingless grasshopper, with extremely long antennae; another is a blind and colorless crayfish; and a third, a blind fish which grows to the length of about six inches, and possesses the additional curiosity of being viviparous, producing its young in a living state instead of by eggs. Occasionally there are fish caught in the running streams of the cave which are identical with species common in Green River, indicating a subterranean connection between that river and the streams of the cave.

THE MOST IMPORTANT RIVER IN THE WORLD

The imperial Mississippi Valley may well claim the attention of those who

PIKES PEAK AUTO HIGHWAY, SHOWING A HAIRPIN CURVE FIFTY FEET WIDE

Few States have done as much as Colorado to make their scenery accessible to the tourist. The building of the splendid automobile highway to the top of Pike's Peak exemplifies what a progressive spirit the Centennial State has shown, both in providing visitors with facilities for seeing her places of interest and in welcoming them to her borders.

ON THE ROAD TO THE SUMMIT OF PIKES PEAK

The automobile in the picture is 13,000 feet above sea-level. On the top of the peak there are long-distance telephones, a parking space for three hundred automobiles, and a lake.

would know and appreciate the bigness and the diversity of industry and power of our country.

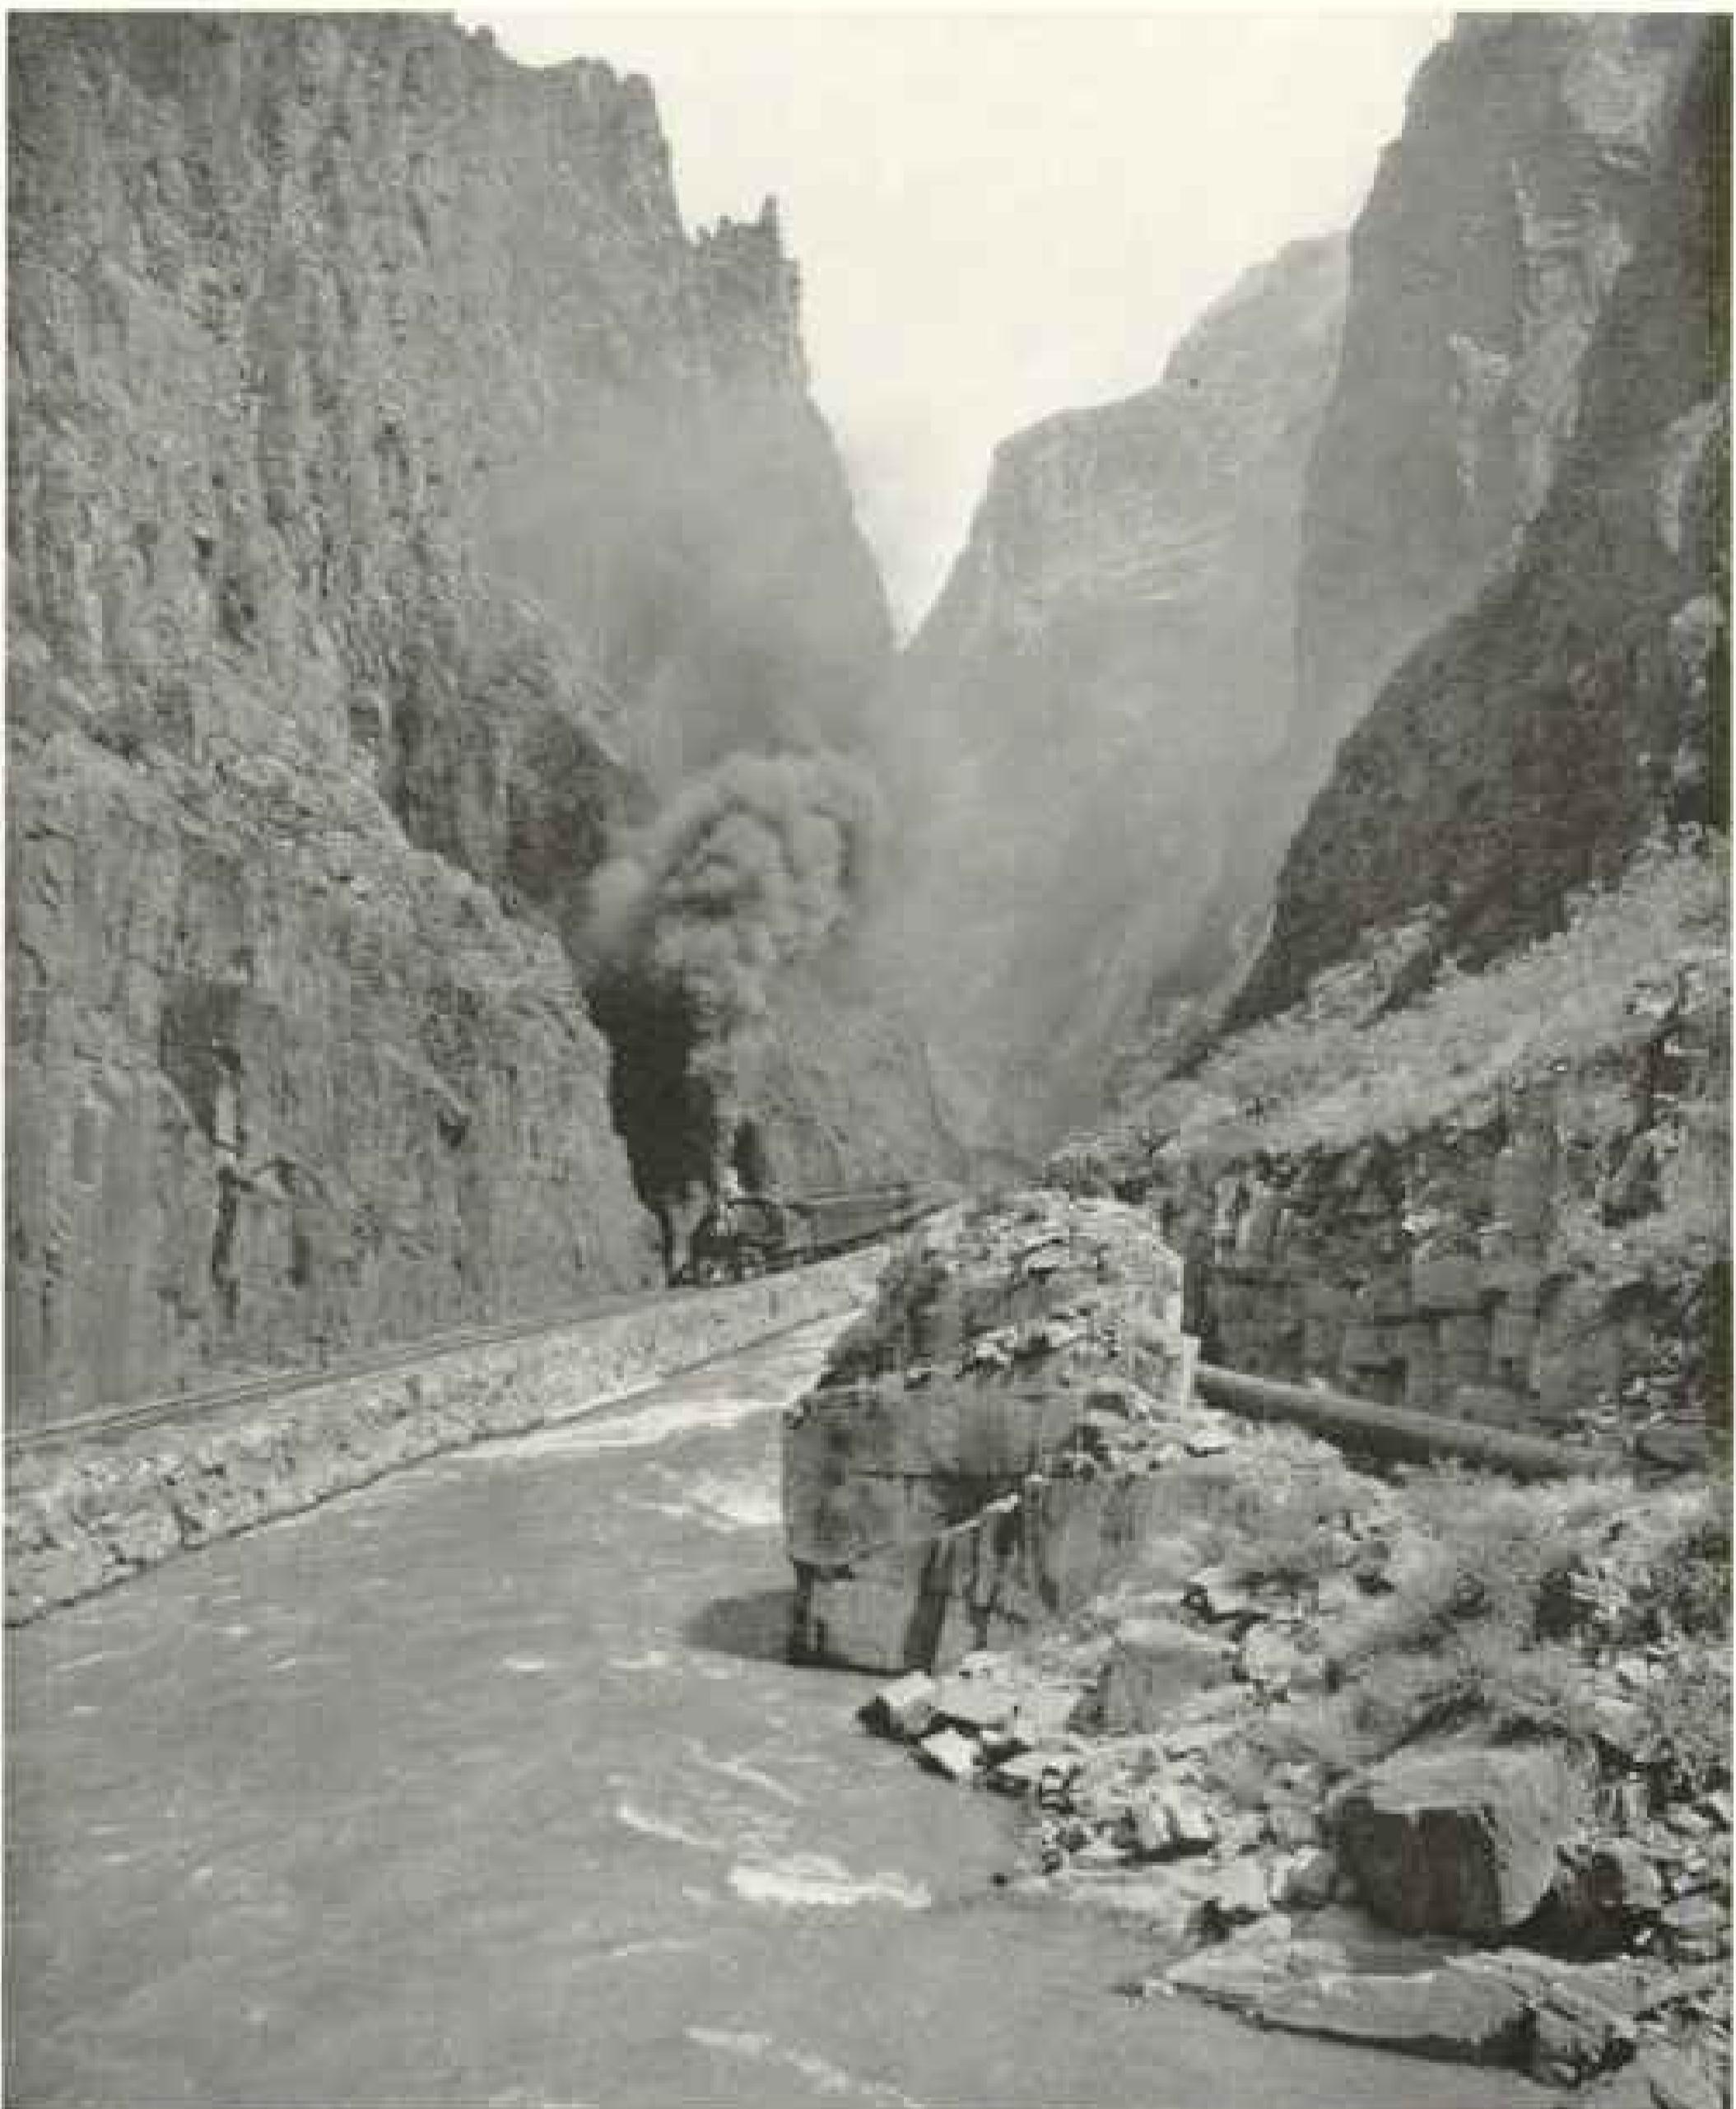

Our books tell us that 22 of our States and 40 per cent of the total area of our country are comprised within the Mississippi Valley; that nowhere else on the globe is there as large a region of equal fertility; that it grows the bulk of the nation's food and produces nearly two-thirds of our manufactures, and that, politically and commercially, it is more important than any other valley in the world.

But how tame the written statement is compared to the actual sight of oceans of green, growing corn; of waving wheat, oats, rye, and barley extending for hundreds of miles; of the huge plows, reapers, and threshing machines drawn by 16

horses or propelled by engines as big as the locomotive of an express train.

Or, if you are more interested in seeing things fashioned by the brain of man, tarry at Gary, Dayton, Cleveland, Detroit, Chicago, Milwaukee, etc., each the birthplace and home of enterprises peculiarly American and giving employment to tens of thousands. There you will stand in awe at sights a thousand times more astounding and stimulating than many of the feudal castles and tortuous streets of Baedeker's specialties.

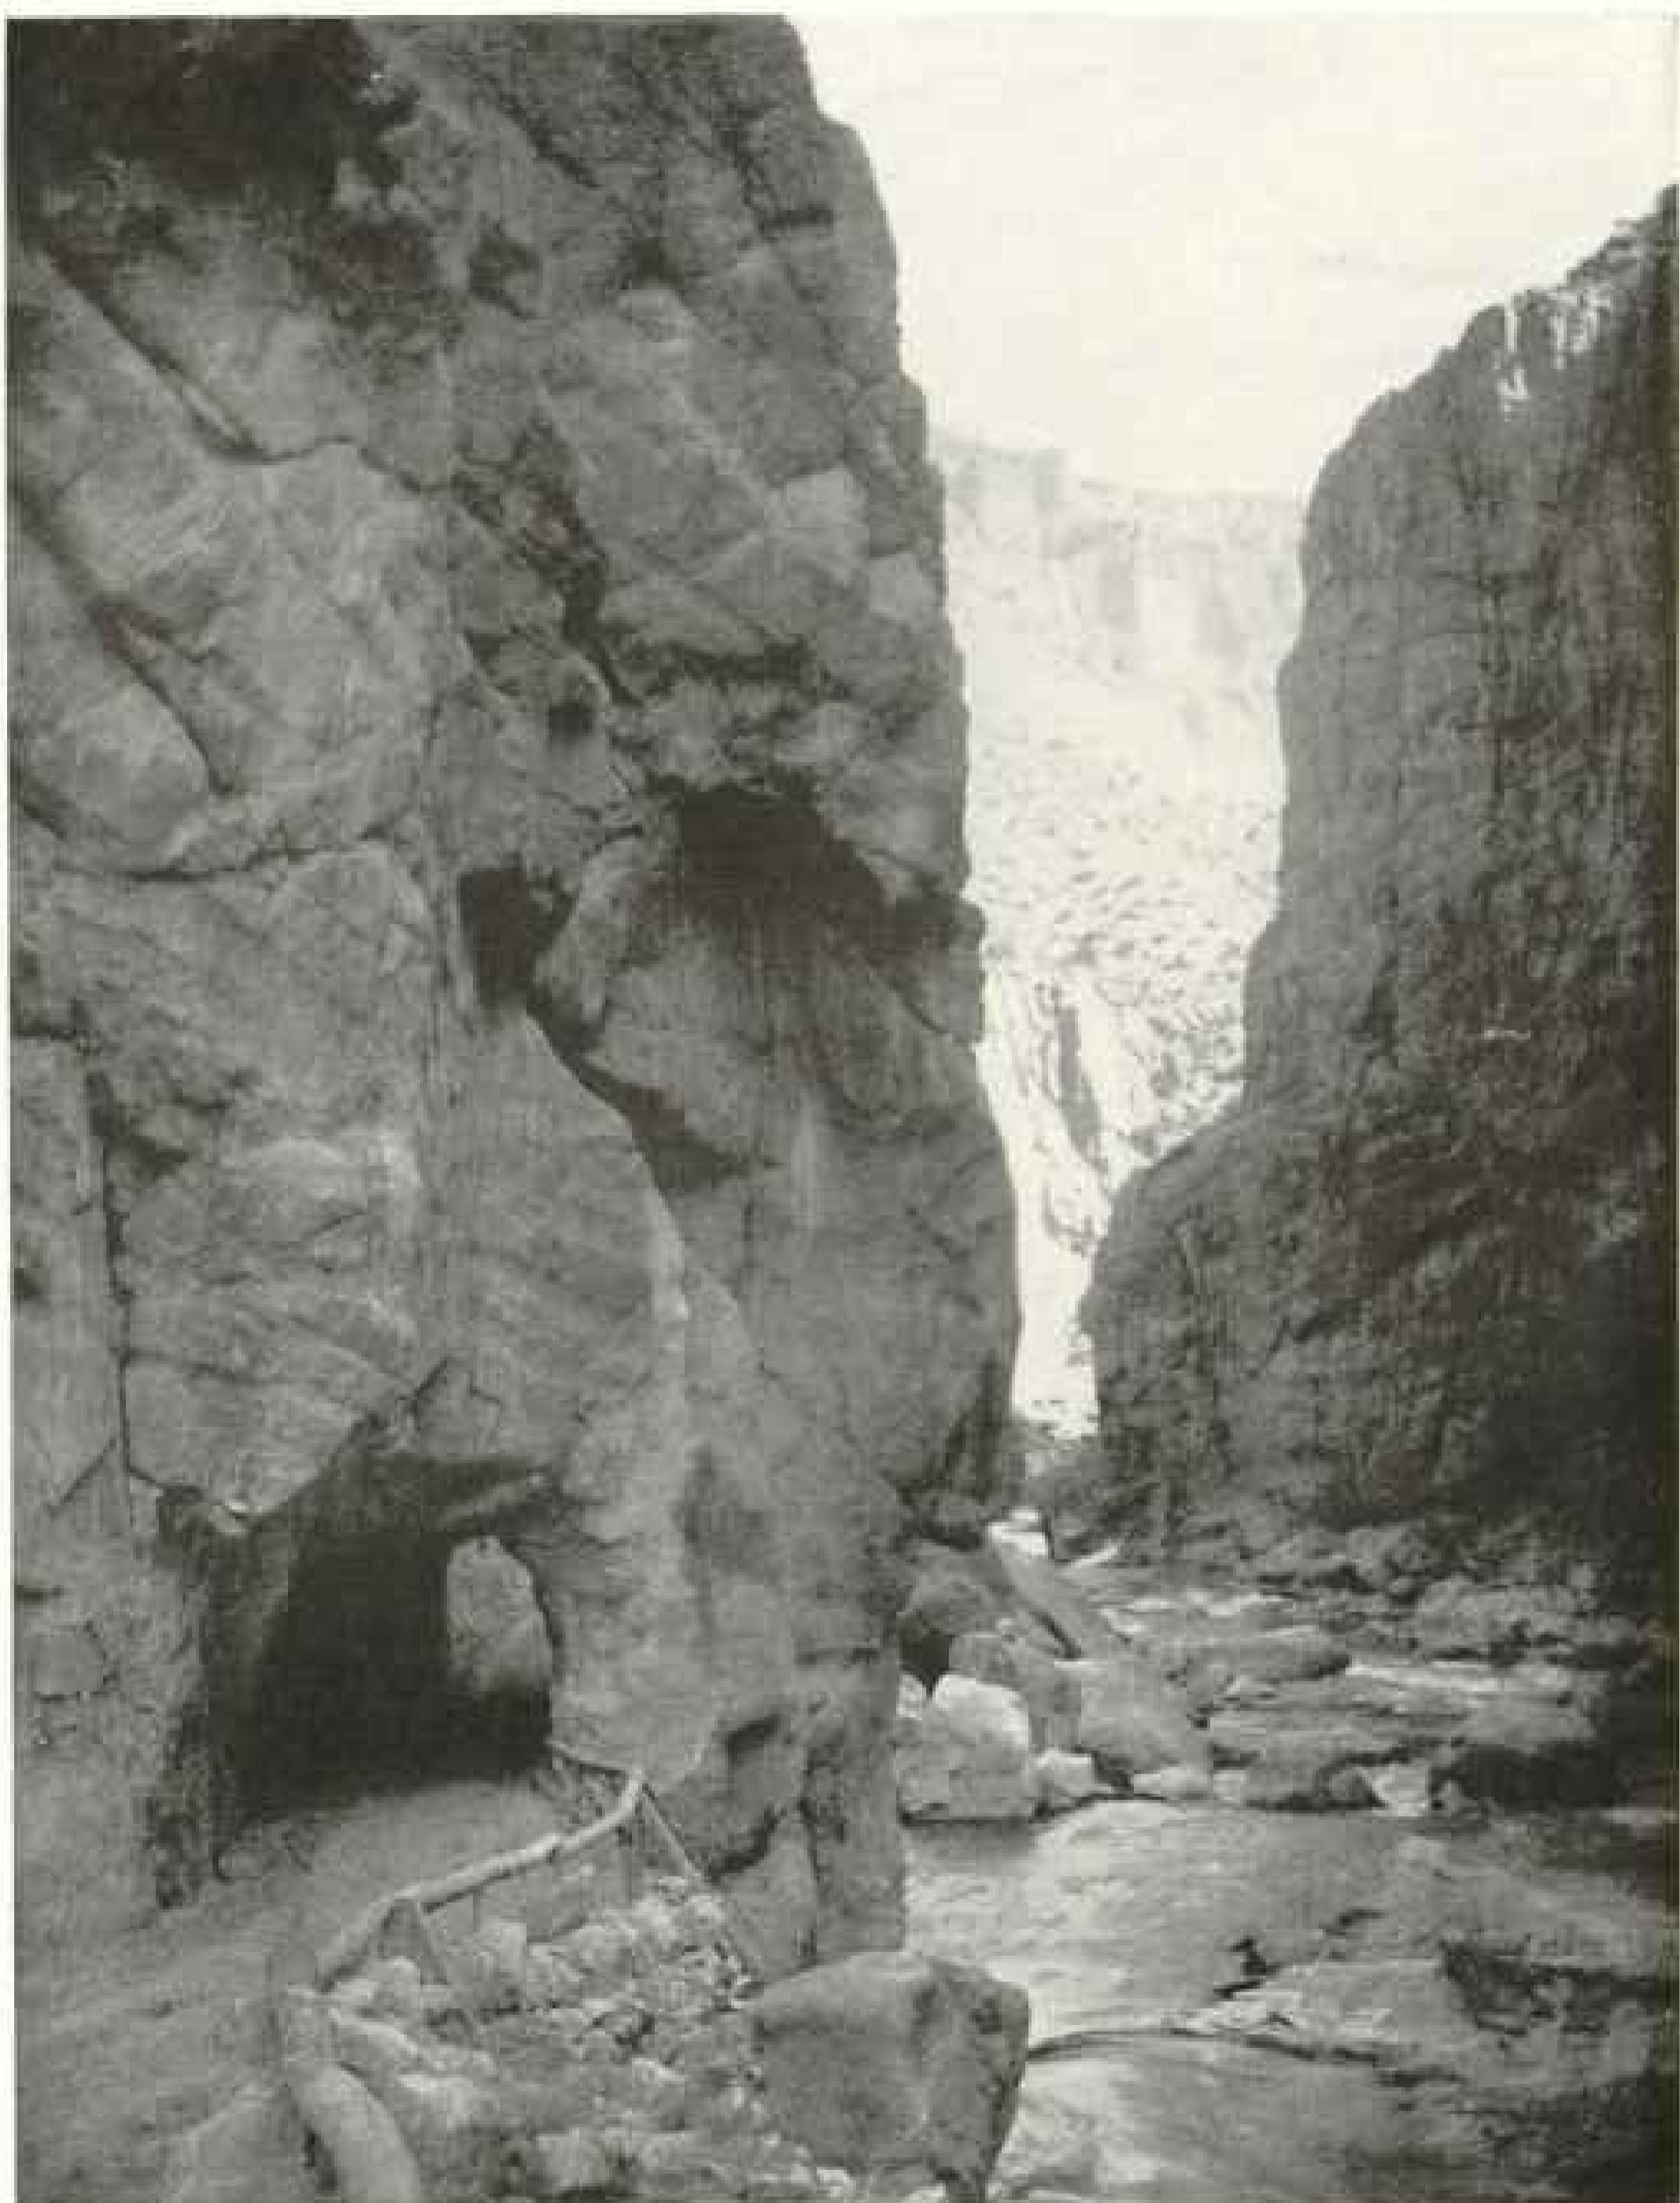

The fortunate individual who can follow our majestic Father of Waters from the upper reaches of its principal tributary, the Missouri, down the longest river course in the world to the Gulf of Mexico will have an experience that cannot be duplicated. As he successively watches

LONE STAR GEYSER; YELLOWSTONE NATIONAL PARK

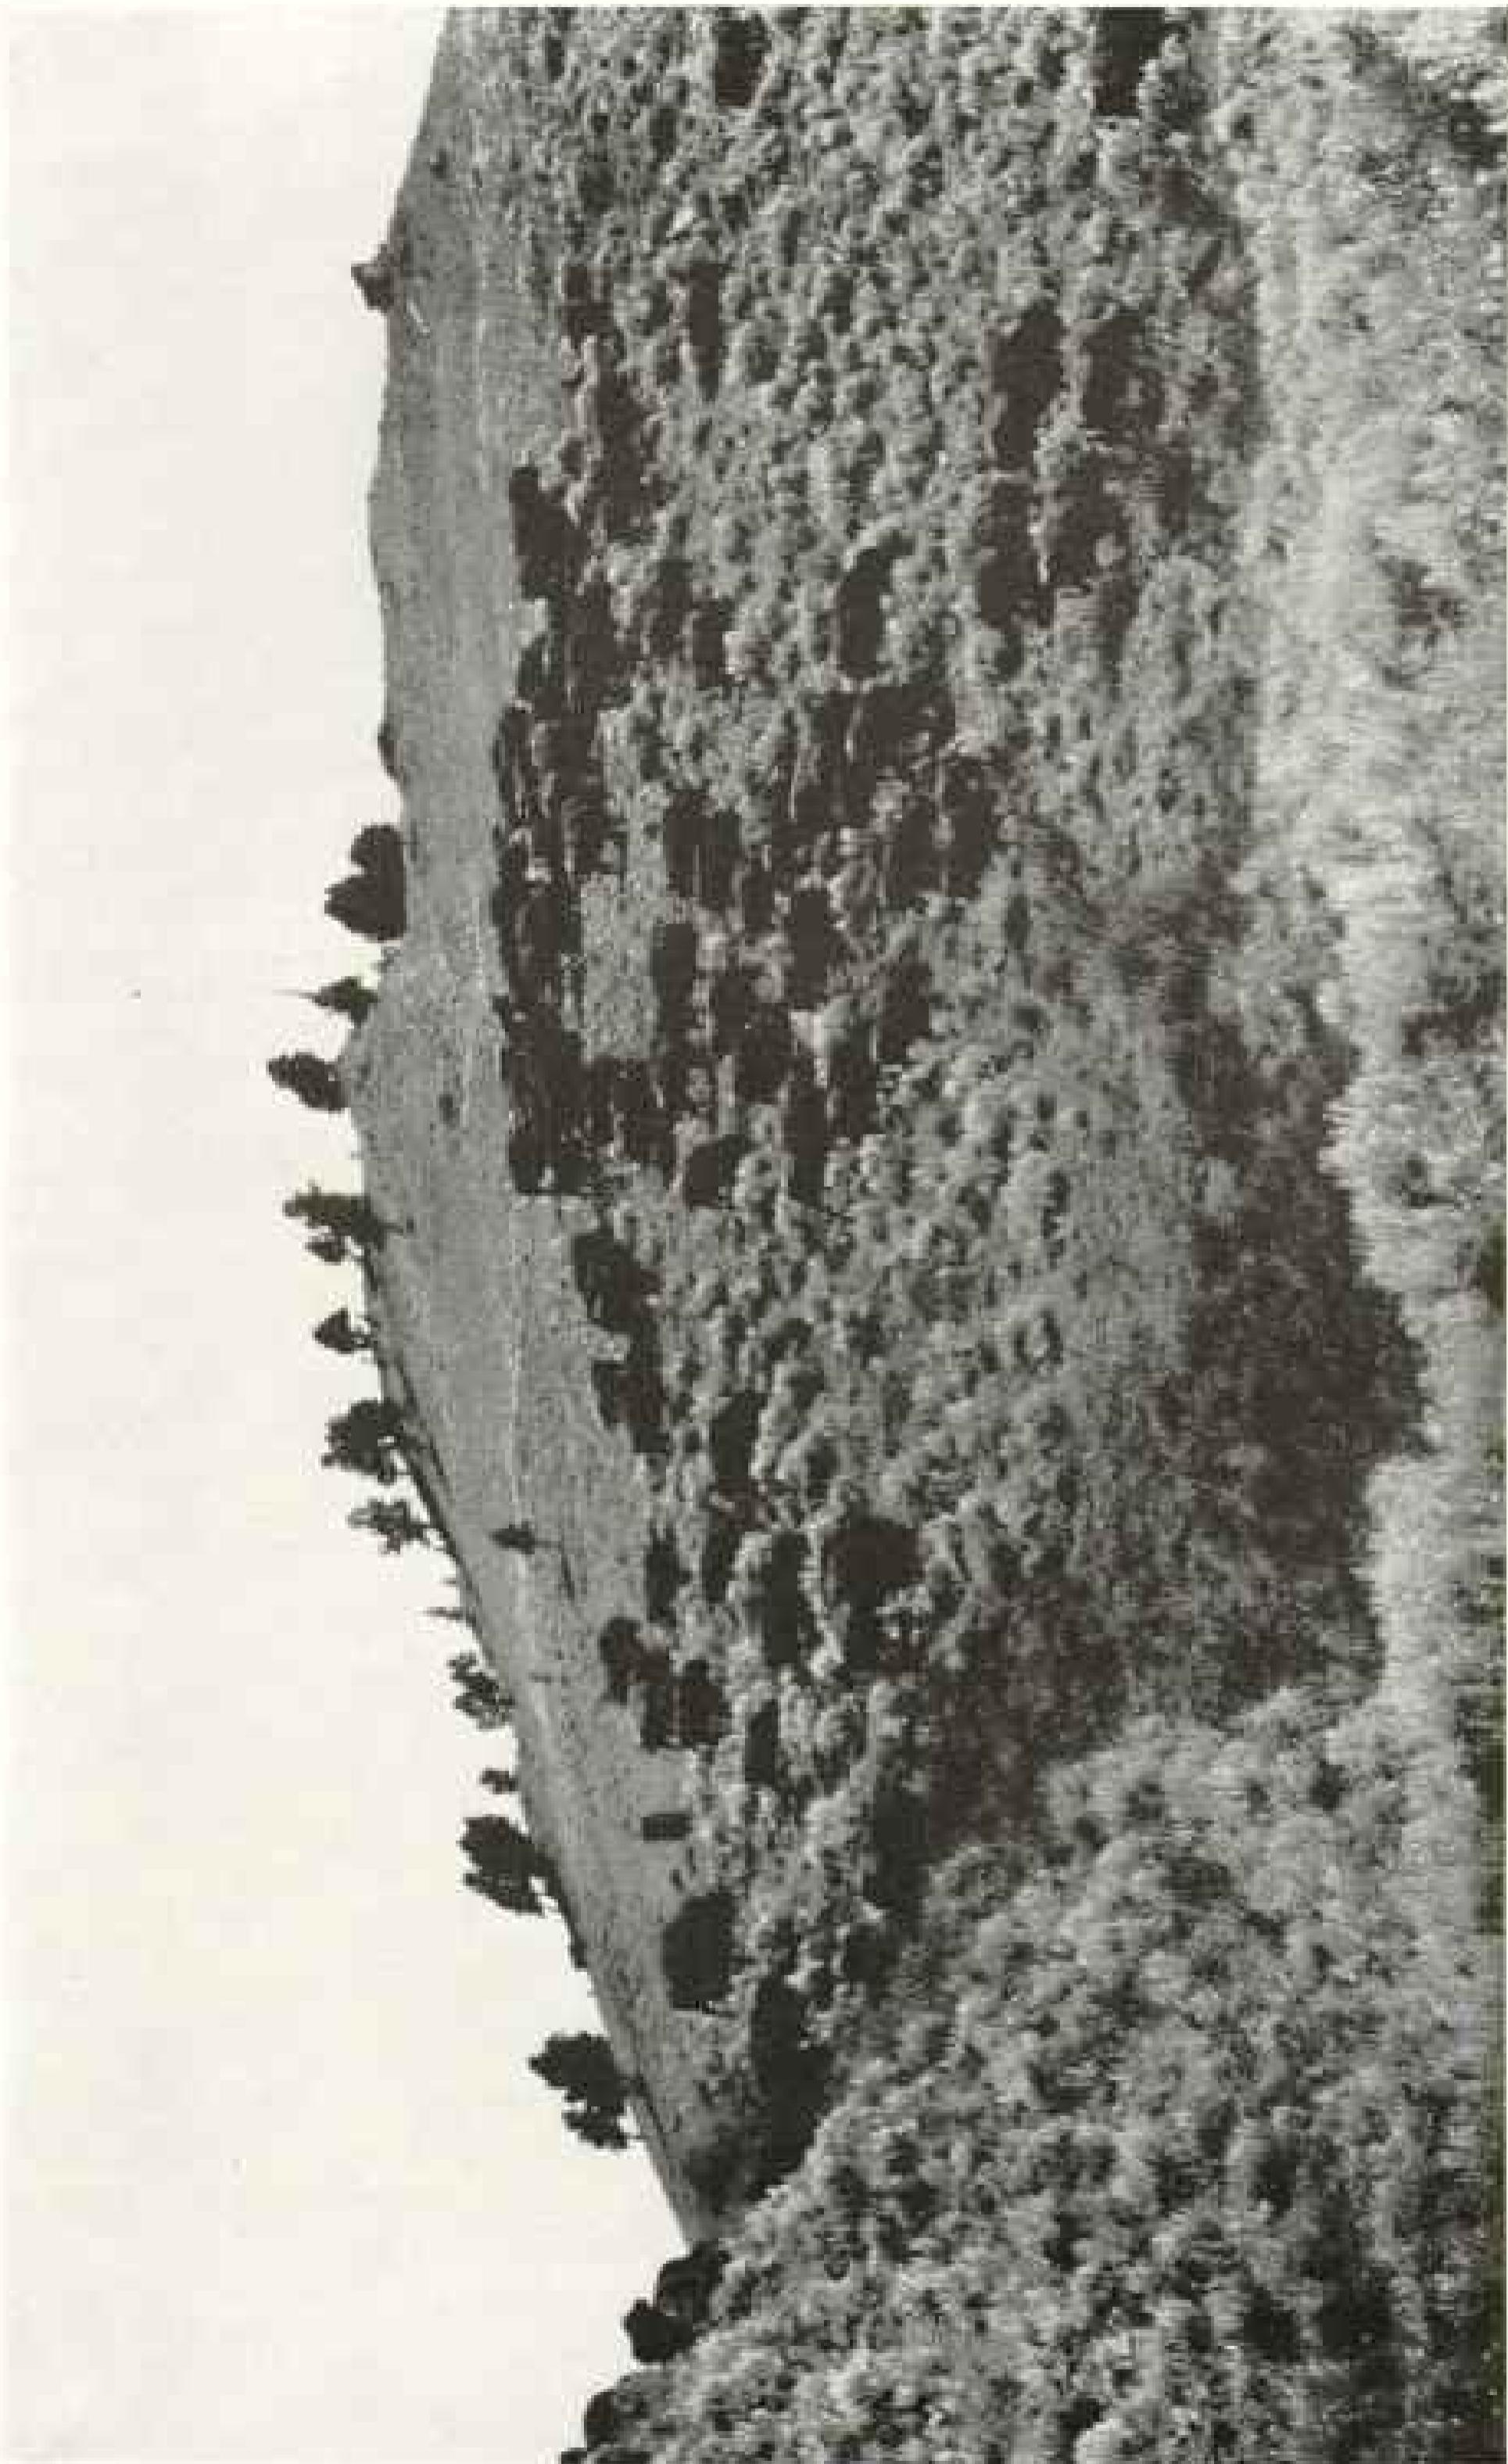

There are more geysers in Yellowstone National Park than in all of the remainder of the world. Stupendous as are the spectacles of these giant natural fountains in eruption, they are but feeble reminders of the titanic times whose records are written all over the face of the park.

Photograph by F. J. Haynes

THE GIANT GEYSER OF THE YELLOWSTONE NATIONAL PARK

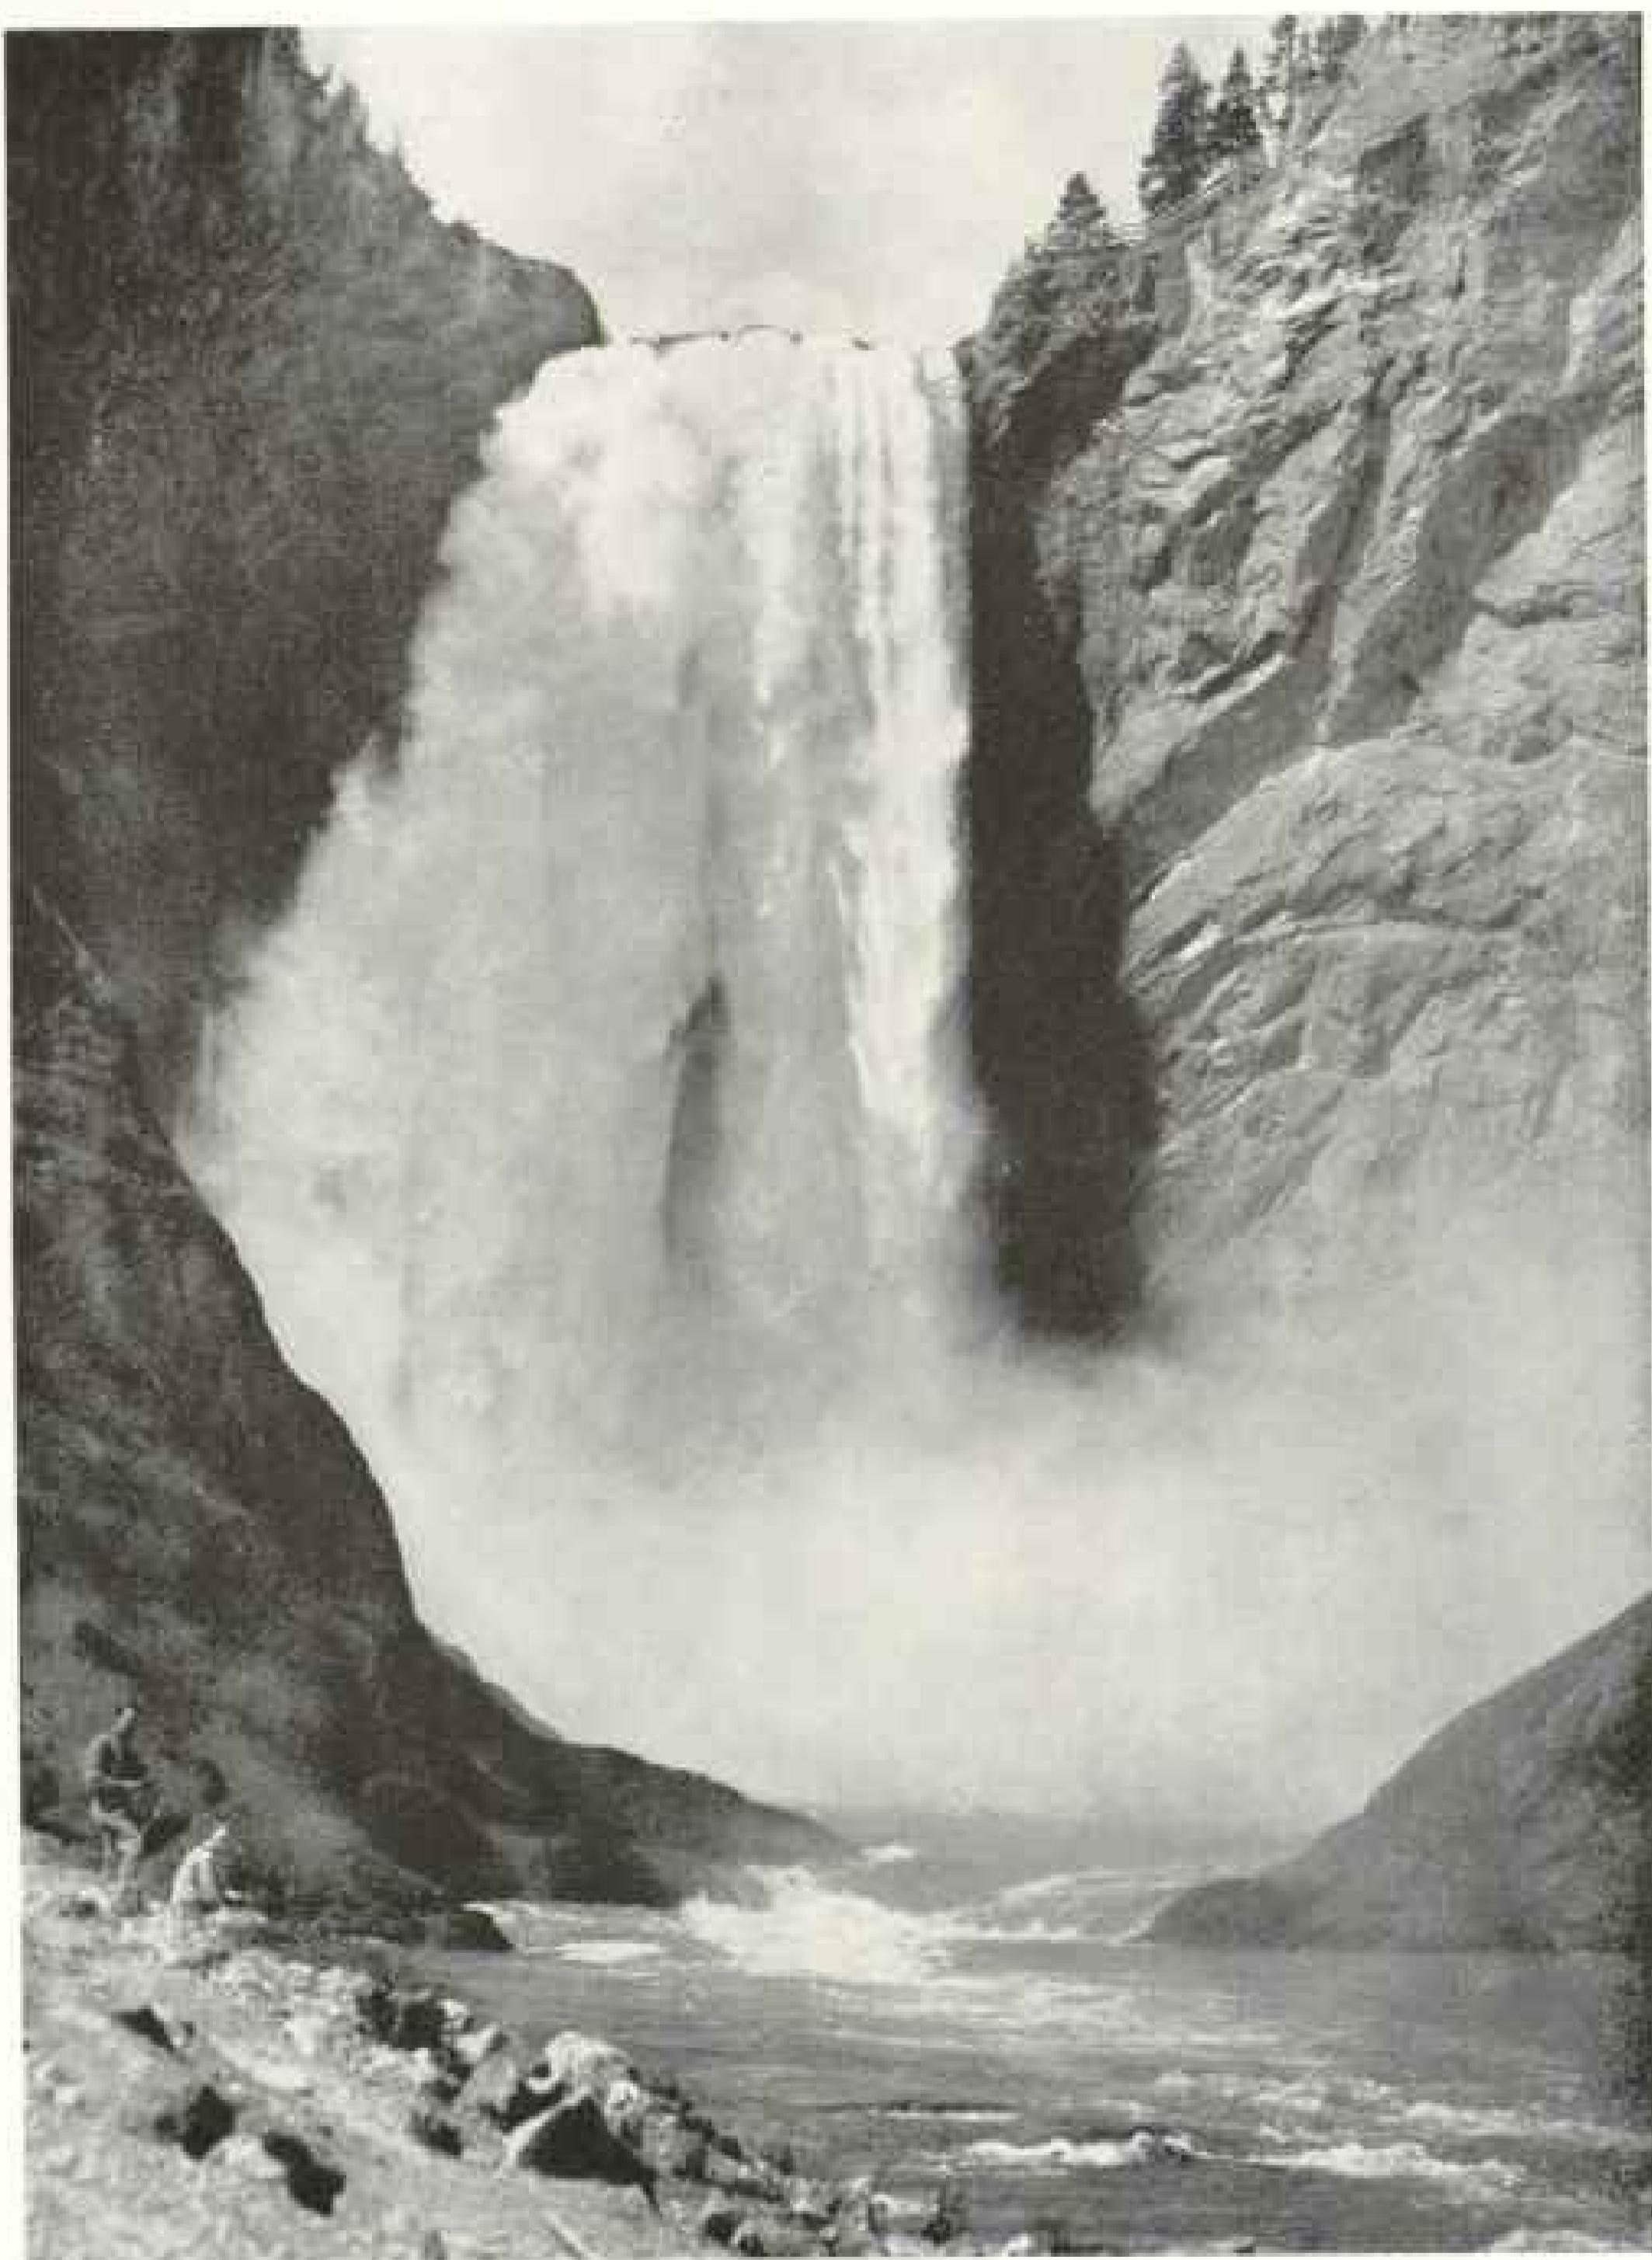

The Giant Geyser, with its tremendous outpouring of water and steam shooting 200 feet into the air and lasting for a full hour, is one of dozens of geysers found in the Yellowstone. They have all been named, and expressively so: the Black Growler, always fretting and fuming, but never doing much else; the Constant, on the job every half minute, with a ten-second eruption; the Minute Man, with a one-minute eruption and an irregular, short interval; the Beehive, shooting up out of a hivelike sinter cone; the Castle, with its fairy house; the Comet, the Daisy, the Economic, the Fan, and the Lion, each filling well the plans and specifications of its name; and Old Faithful, the originator of the "every hour on the hour" schedule.

A HERD OF BISON IN THE YELLOWSTONE NATIONAL PARK

Yellowstone National Park is destined to be the principal game preserve in America. It contains an increasing herd of wild bison, fifteen thousand elk, several thousand moose, and innumerable deer. It is not an exceptional sight to see a park attendant feeding bison sugar to little bear cubs, while the mother bear plays the rôle of interested spectator in the offing. More than one hundred and fifty species of wild birds lead an undisturbed existence in the park.

Photograph by W. S. Berry

YELLOWSTONE FALLS: YELLOWSTONE NATIONAL PARK

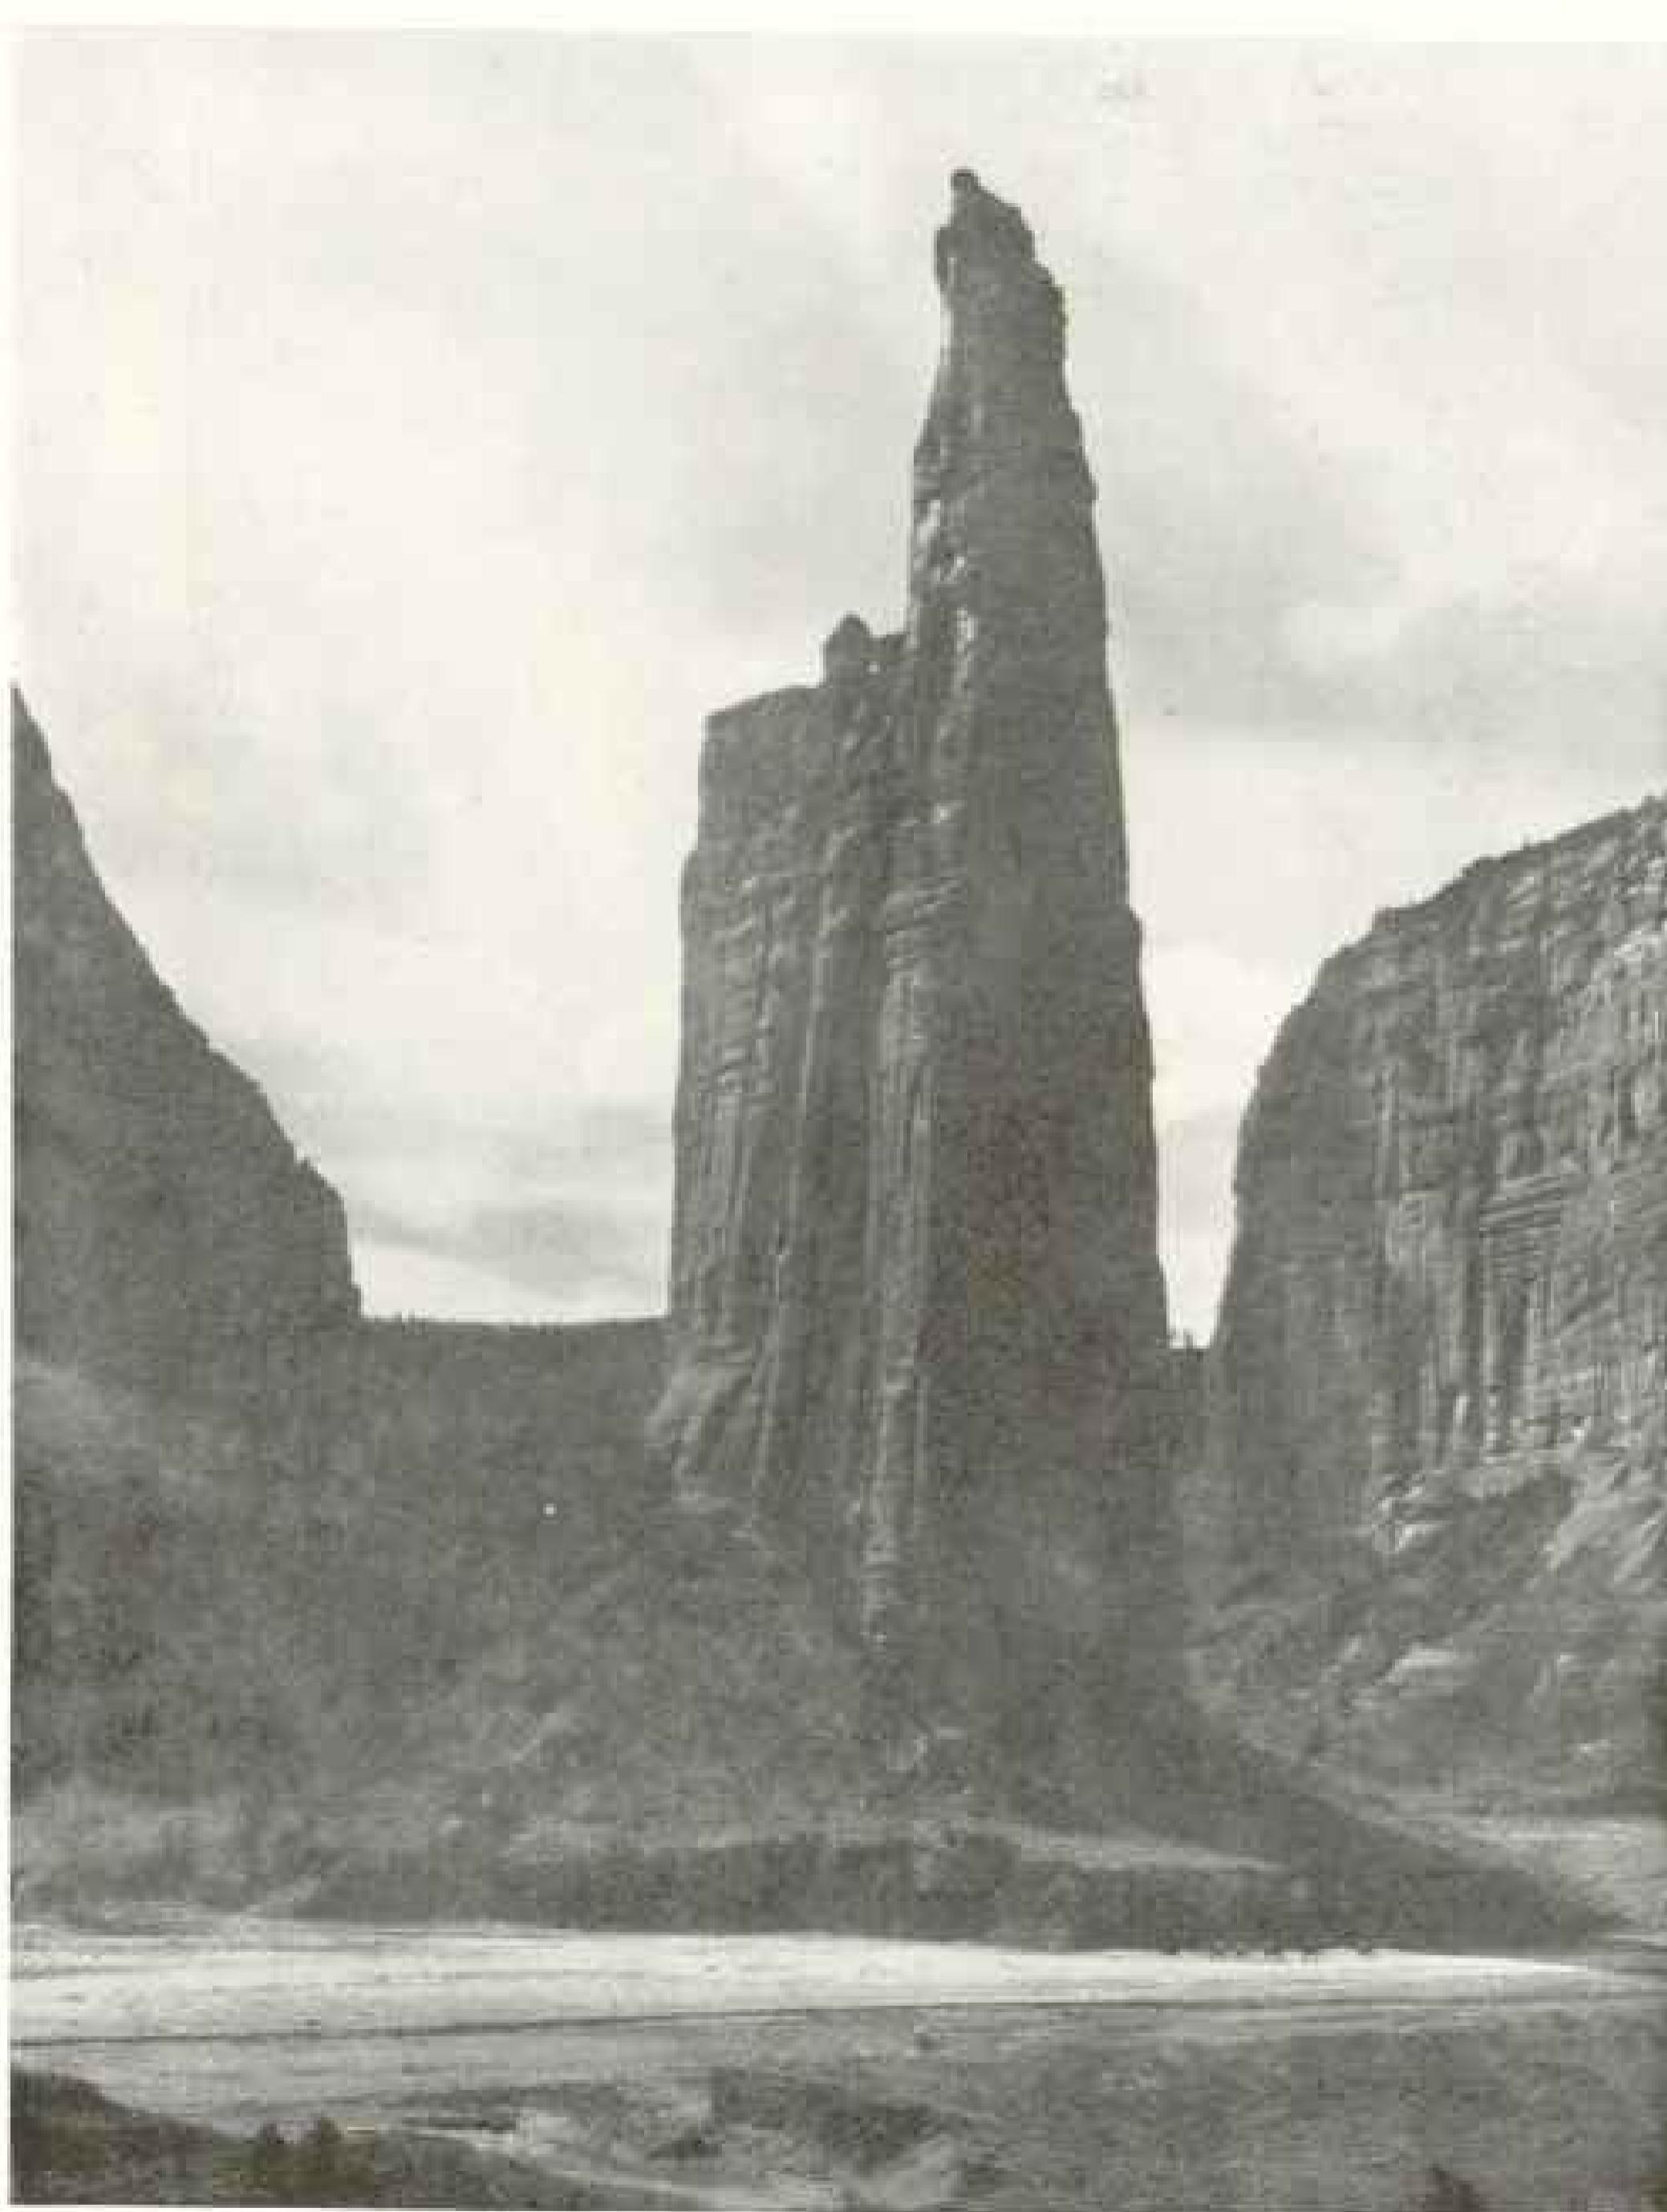

Yellowstone Canyon has been called the cameo of canyons. Burton Holmes has described it as "a mine of precious stones, uncovered to amaze and dazzle the sun itself." Adown its rocky bottom flows the Yellowstone River, and, where it is grandest and most beautiful, the river takes a leap twice as high as Niagara, making a marvelous veil of seething, frenzy-lashed, white water—a spectacle which, with its setting and majestic rear, is one of awe-inspiring majesty.

Photograph by F. J. Haynes

EAGLE-NEST ROCK: YELLOWSTONE NATIONAL PARK

It seems as if Nature decided to establish in the region which we call the Yellowstone National Park a museum where, without traveling far, mankind could study all of her processes and see exhibits portraying all of the activities of the millions of years of earth-making.

Photograph by Roland W. Reed

THE OBELISK: CAÑON DE CHELLY, ARIZONA

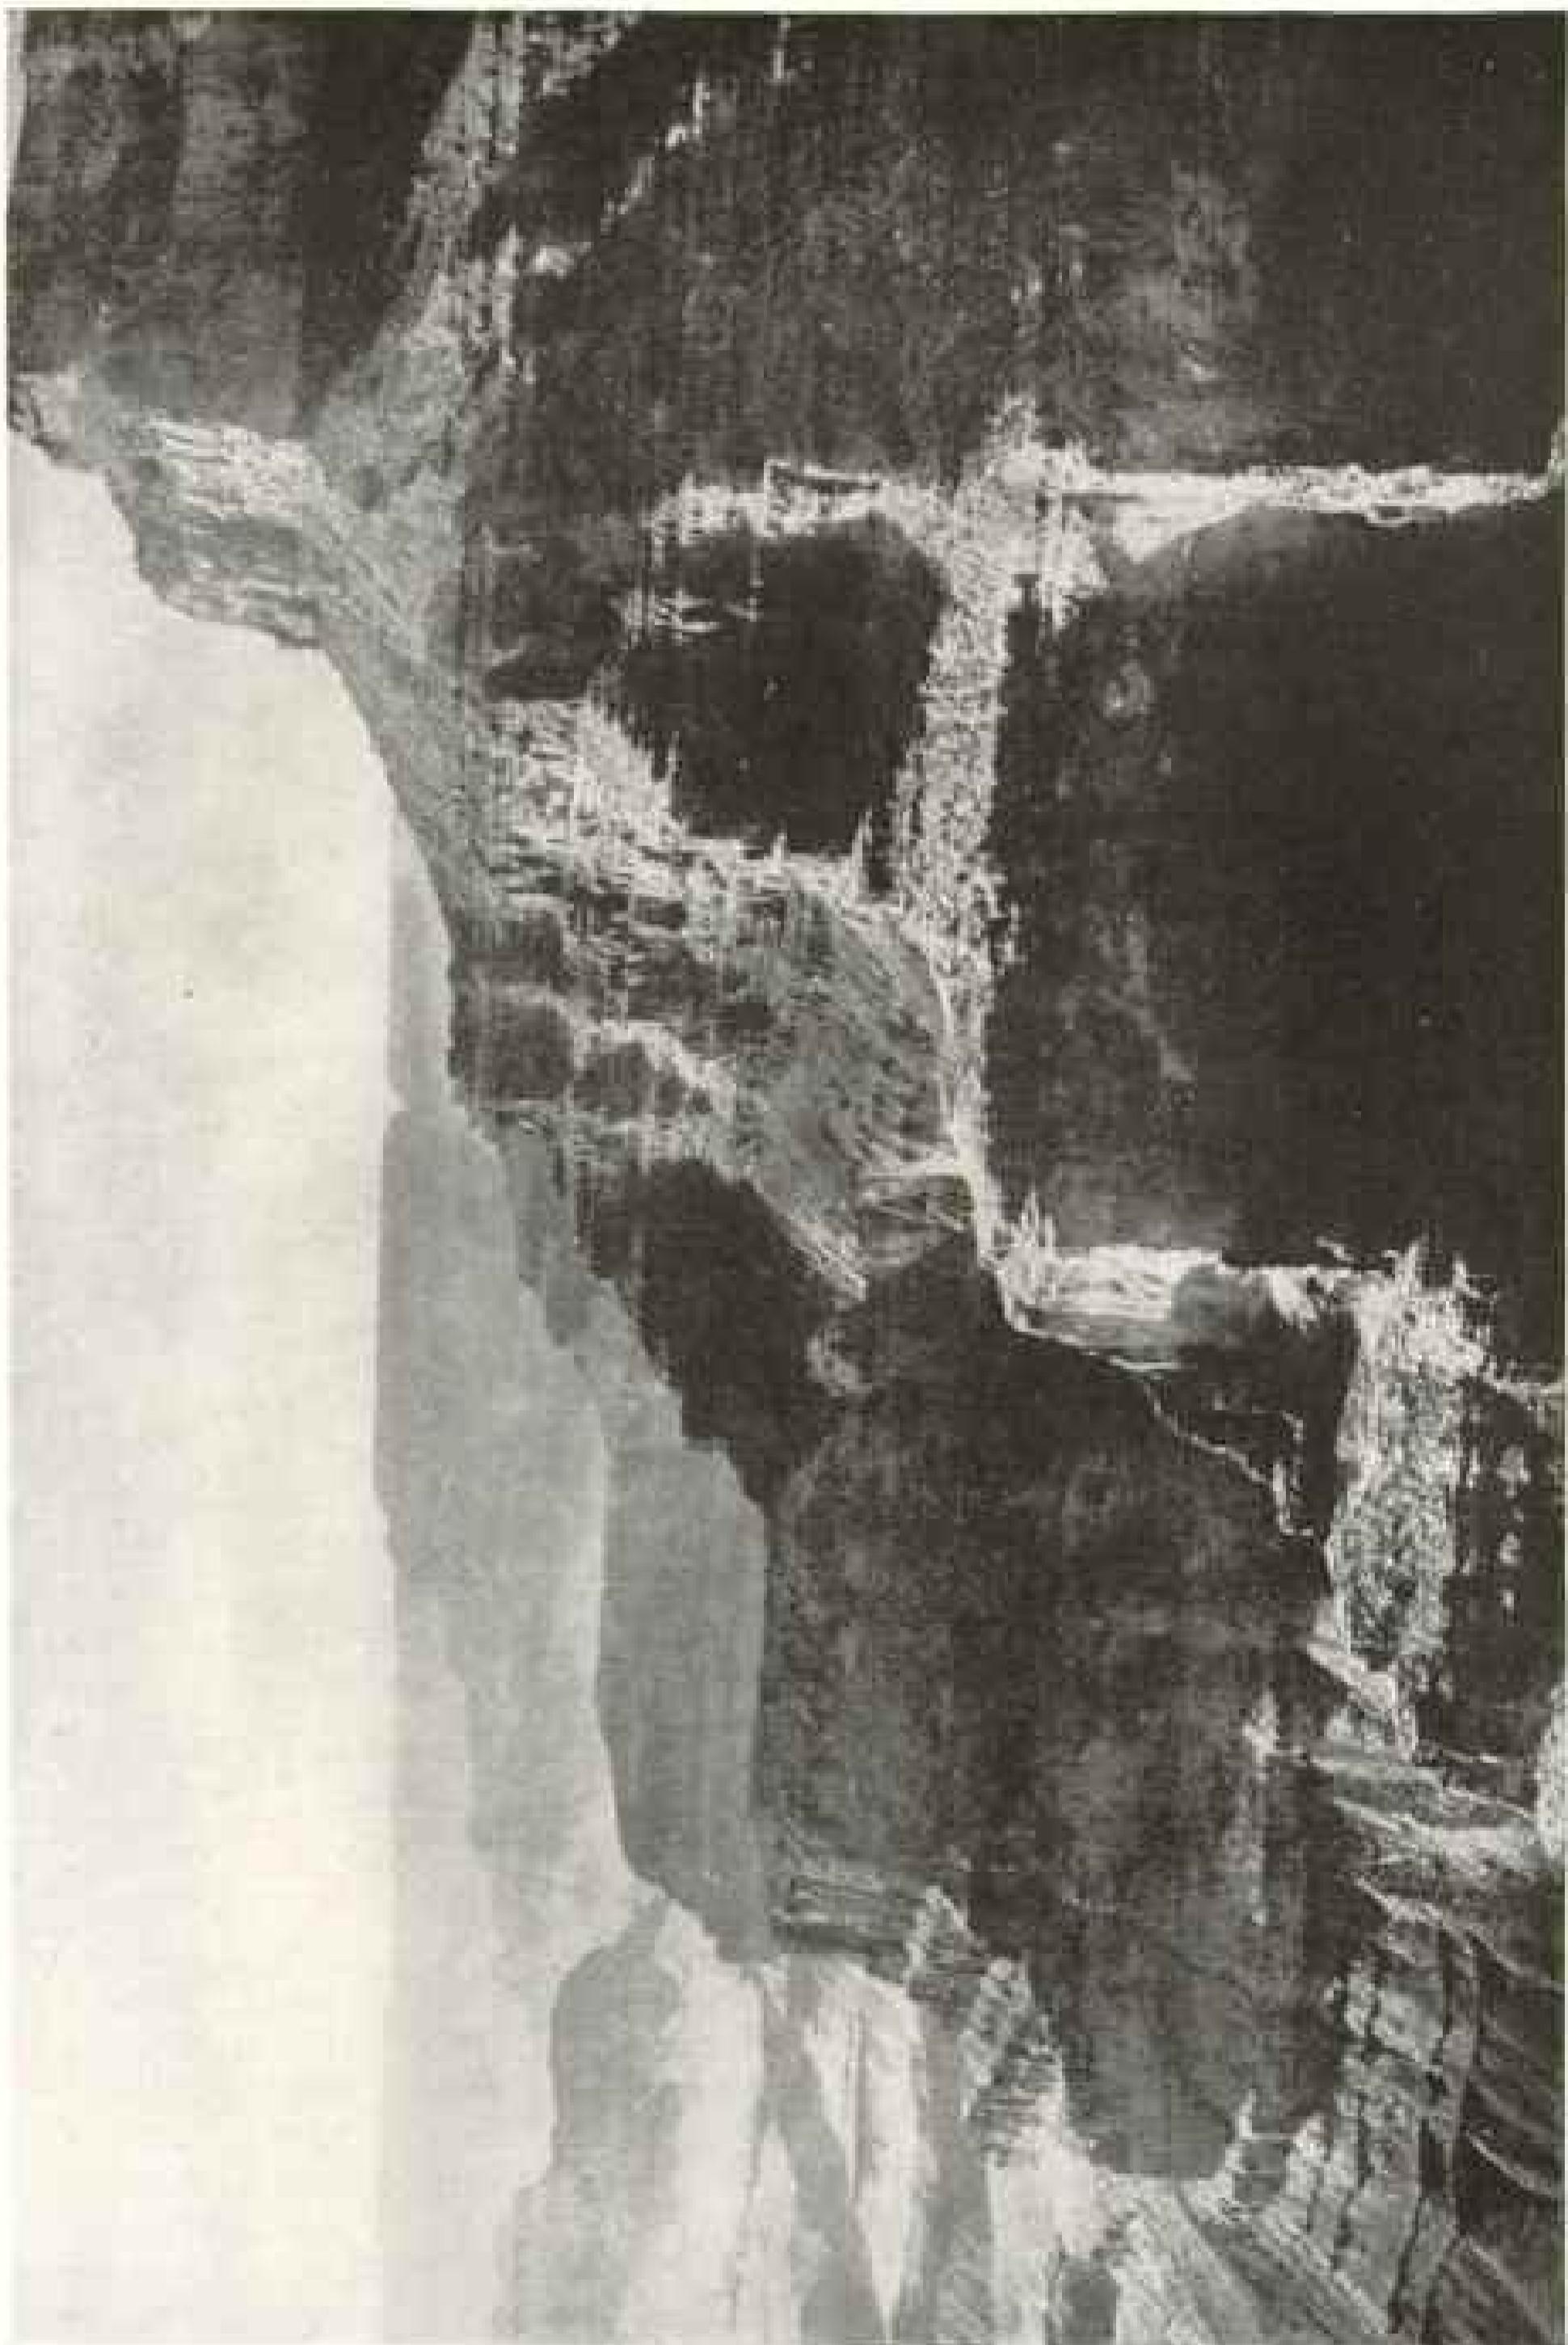

The tiny men on horseback at the foot of this towering shaft of stone tell a striking story of its size. It is but one of a thousand of these stately spires and nature-built obelisks that rise out of the earth in this region of scenic surprises.

THE RAINBOW NATURAL BRIDGE: UTAH

The biggest natural bridges in the world are to be found in the United States. The largest of these, the Rainbow, 308 feet high, would span the dome of the United States Capitol, with room to spare, and is nearly as high as the Flatiron building in New York. Its span is six times as great as that of the Natural Bridge of Virginia. Utah alone has three natural bridges that are higher and of greater span than any other natural bridge in the world.

A VIEW OF ONE OF THE STEEP WALLS OF THE GRAND CANYON OF THE COLORADO

"Looking down more than half a mile into this is by any mile paint-pot. I continually ask, Is there any other fifty miles of Mother Earth that I have known as fearful, as full of glory, as full of God?"—JOAQUIN MILLER. "A present of ghostly desolation and yet of flightful vitality, such as neither Dante nor Milton in their most sublime conceptions ever approached."—WILLIAM WHISTLER. Search the entire globe and you will find nothing outside the United States comparable to the Grand Canyon.

250 other rivers, many of them turbulent giants like the Ohio, the Arkansas, the Red, etc., add their brown floods to the broad torrent, he can easily comprehend the statement that the Mississippi River discharges into the sea one-half more water than do the Rhine, Loire, Po, Elbe, Vistula, Danube, Don, Dnieper, and Volga all together, and that it brings down to the Gulf of Mexico annually more material than has been taken out of the Panama Canal from the day that De Lesseps removed the first shovelful of earth.

On the lower reaches of the Mississippi he sees dikes thicker, higher, and longer than any Holland can show, parts of a levee system much more extensive than the famous reclamation works on the Zuyder Zee. The latter, however, are better known, being generations older and nearer to routes frequented by travelers and writers.

Here, also, he passes sugar-cane plantations, cotton fields, cypress forests, quaint old steamboats redolent with memories of the days of Huck Finn, picturesque negro populations—a weird contrast to the blazing furnaces of Pittsburgh, the white flour mills of Minneapolis and St. Paul, the noisy cattle yards of Kansas City and Omaha, the snow-capped mountains of Montana and Wyoming and Pikes Peak in Colorado, all tributary to the same river.

It is to be regretted that today there is very little traffic on the river compared to earlier days.

THE YELLOWSTONE PARK

Leaving the masterful Mississippi Valley and journeying westward, we soon enter the region of the national parks, of which there are eight of the first order—the Yellowstone National Park, principally in Wyoming; the Glacier National Park, in Montana; the Rocky Mountain and Mesa Verde National Parks, in Colorado; the Crater Lake National Park, in Oregon; the Mount Rainier National Park, in Washington, and the Yosemite and Sequoia National Parks, in California. To these must be added the Grand Canyon of the Colorado, in Arizona, the scenic masterpiece of the world, officially

classed as a national monument until Congress makes it a park. Each park has its own individuality, and each in its specialty excels. Together they contain more features of conspicuous grandeur than are accessible in all the continents.

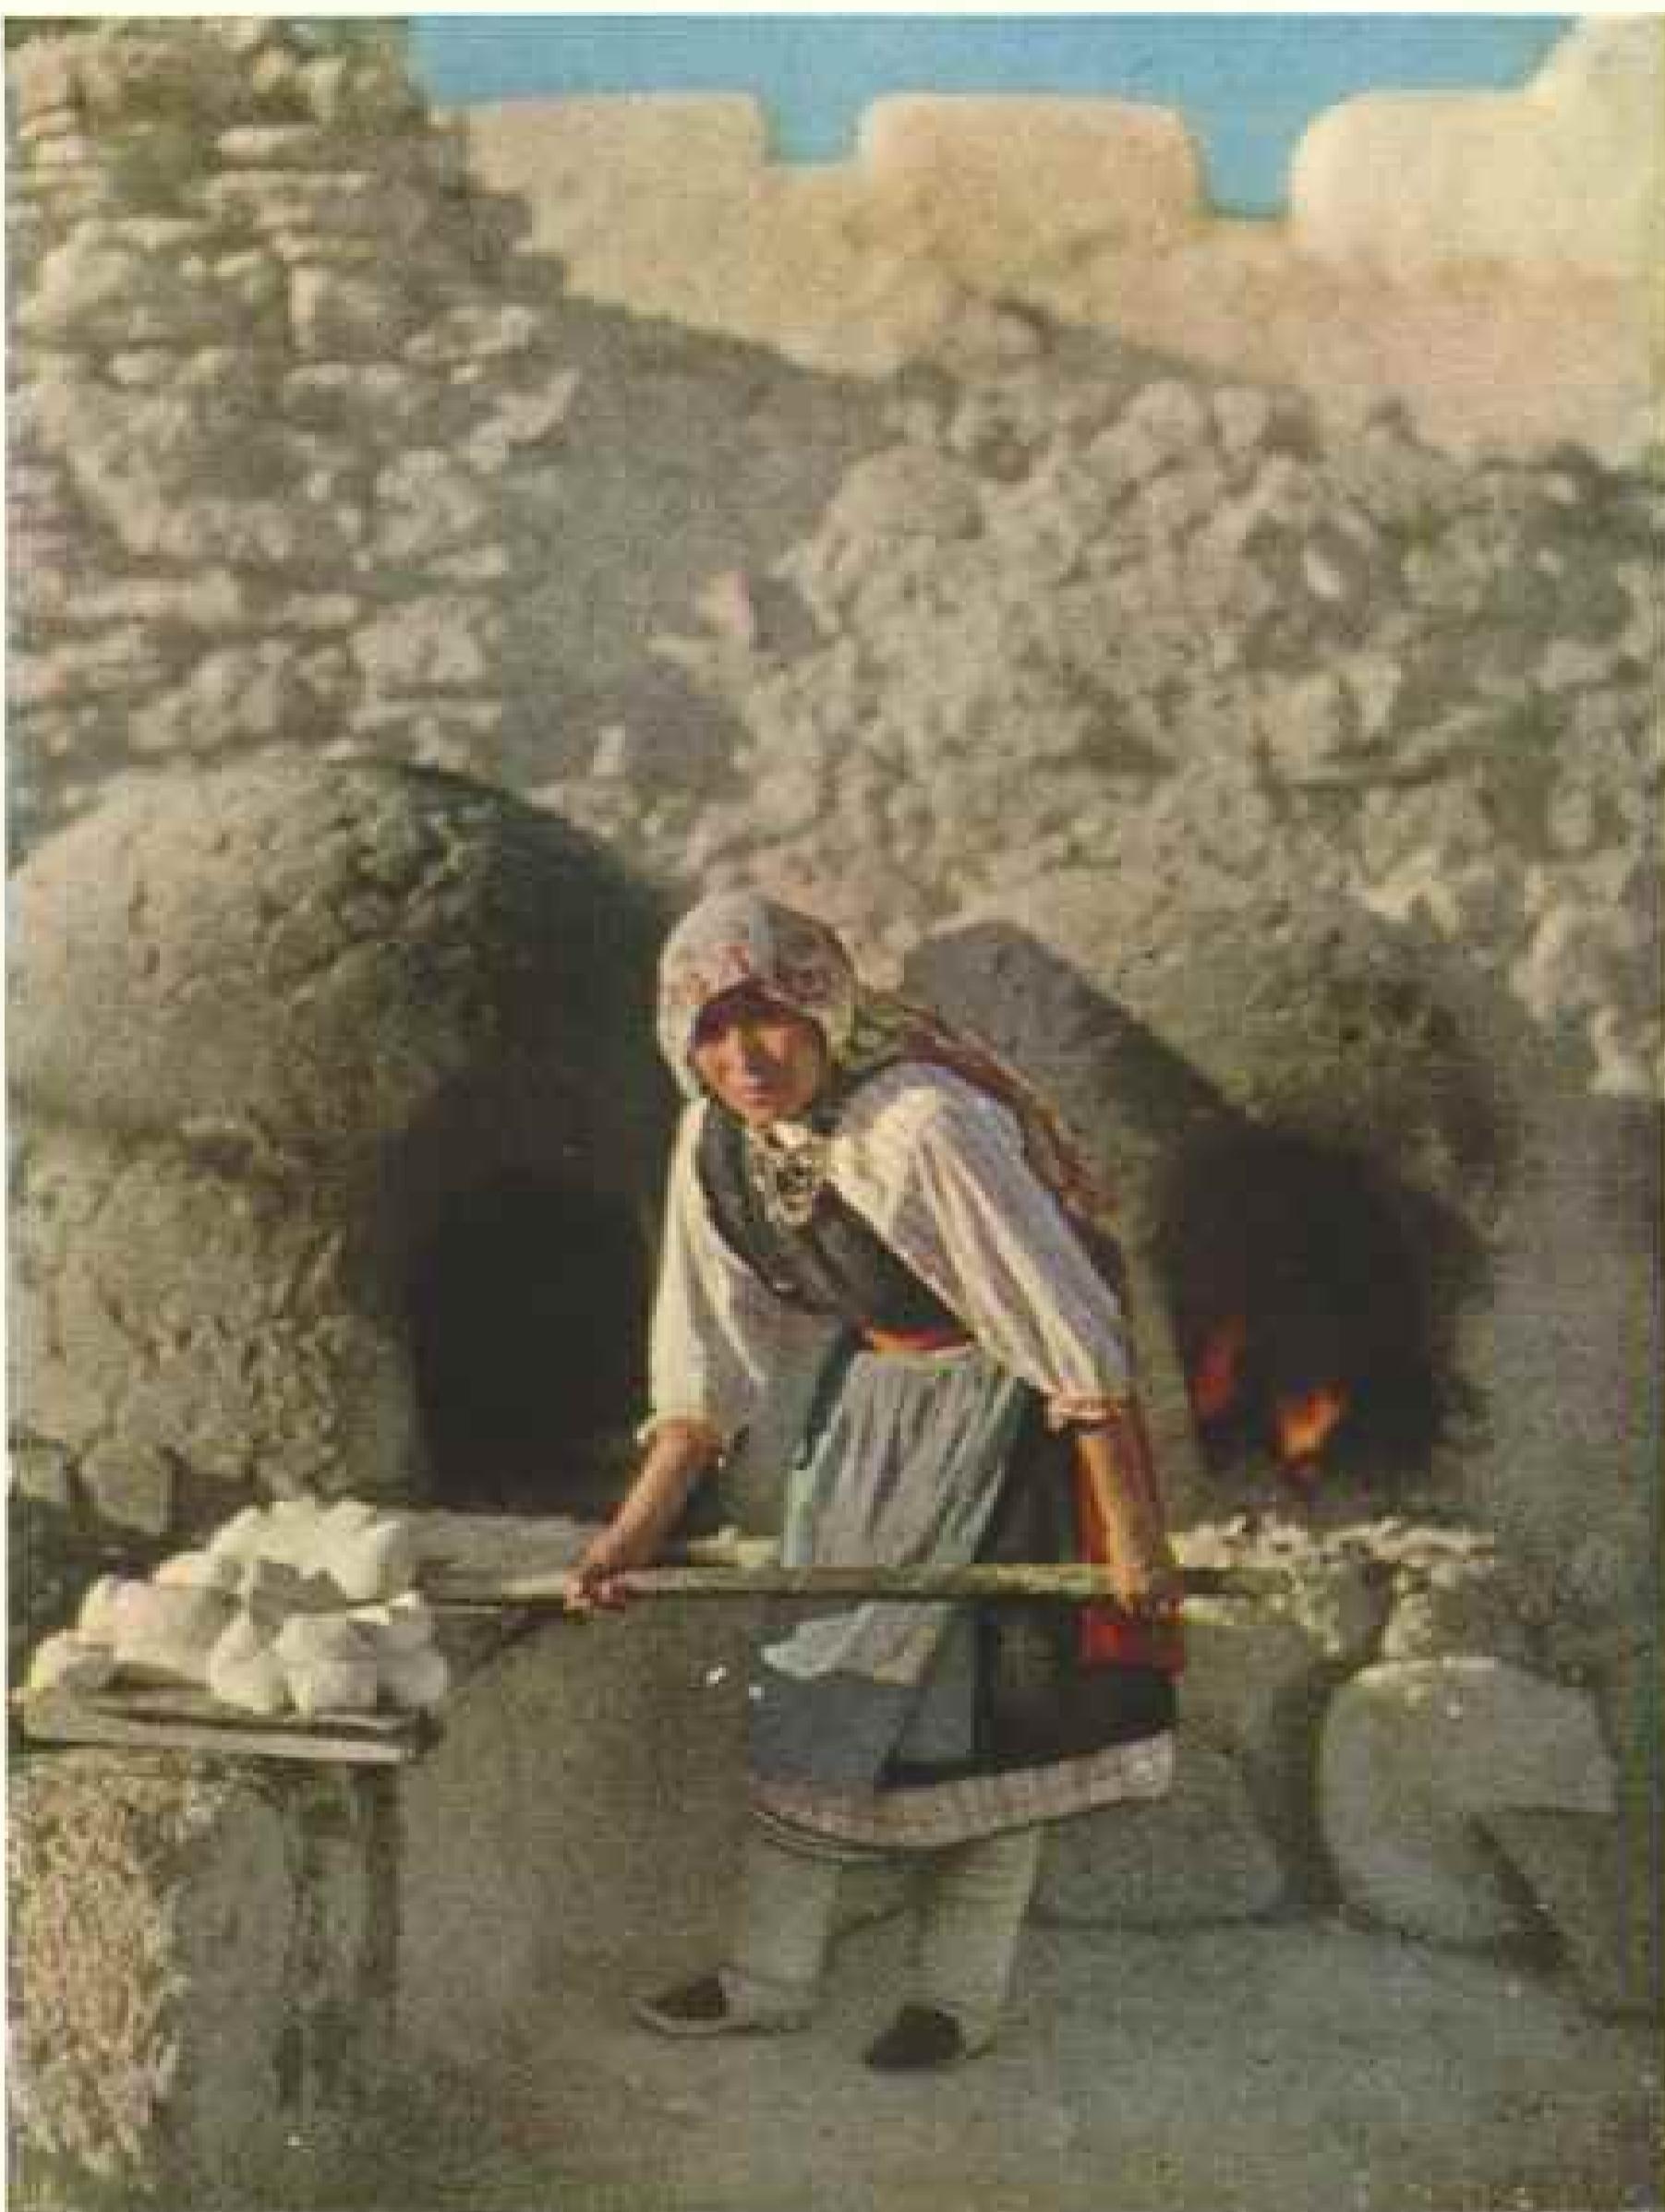

Foremost in interest in the Yellowstone are the geysers, of which "Old Faithful" ranks first, not because of size, for the Giant is a Goliath beside it; not because of beauty, for there are others more beautiful; but because of fidelity. It never disappoints. It is so regular that it could almost serve as the nation's standard timepiece. Every 70 minutes "Old Faithful" shoots its great column of water heavenward. At each eruption it sends up into the air a million and a half gallons of water (see pp. 370-371).

One writer has described the geyser basins "as laboratories and kitchens, in which, amid a thousand retorts and pots, we may see Nature at work as chemist or cook, cunningly compounding an infinite variety of mineral messes; cooking whole mountains; boiling and steaming flinty rocks to smooth paste and mush—yellow, brown, red, pink, lavender, gray, and creamy white—making the most beautiful mud in the world, and distilling the most ethereal essences.

"Many of these pots and cauldrons have been boiling thousands of years. Pots of sulphurous mush, stringy and lumpy, and pots of broth as black as ink are tossed and stirred with constant care; and thin transparent essences, too pure and fine to be called water, are kept simmering gently in beautiful sinter cups and bowls that grow ever more beautiful the longer they are used.

"In some of the spring basins the waters, though still warm, are perfectly calm and shine blandly amid a sod of overleaning grass and flowers, as if they were thoroughly cooked at last and set aside to settle and cool. Others are wildly boiling over, as if running to waste, thousands of tons of the precious liquids being thrown into the air to fall in scalding floods on the clean coral floor of the establishment, keeping onlookers at a distance.

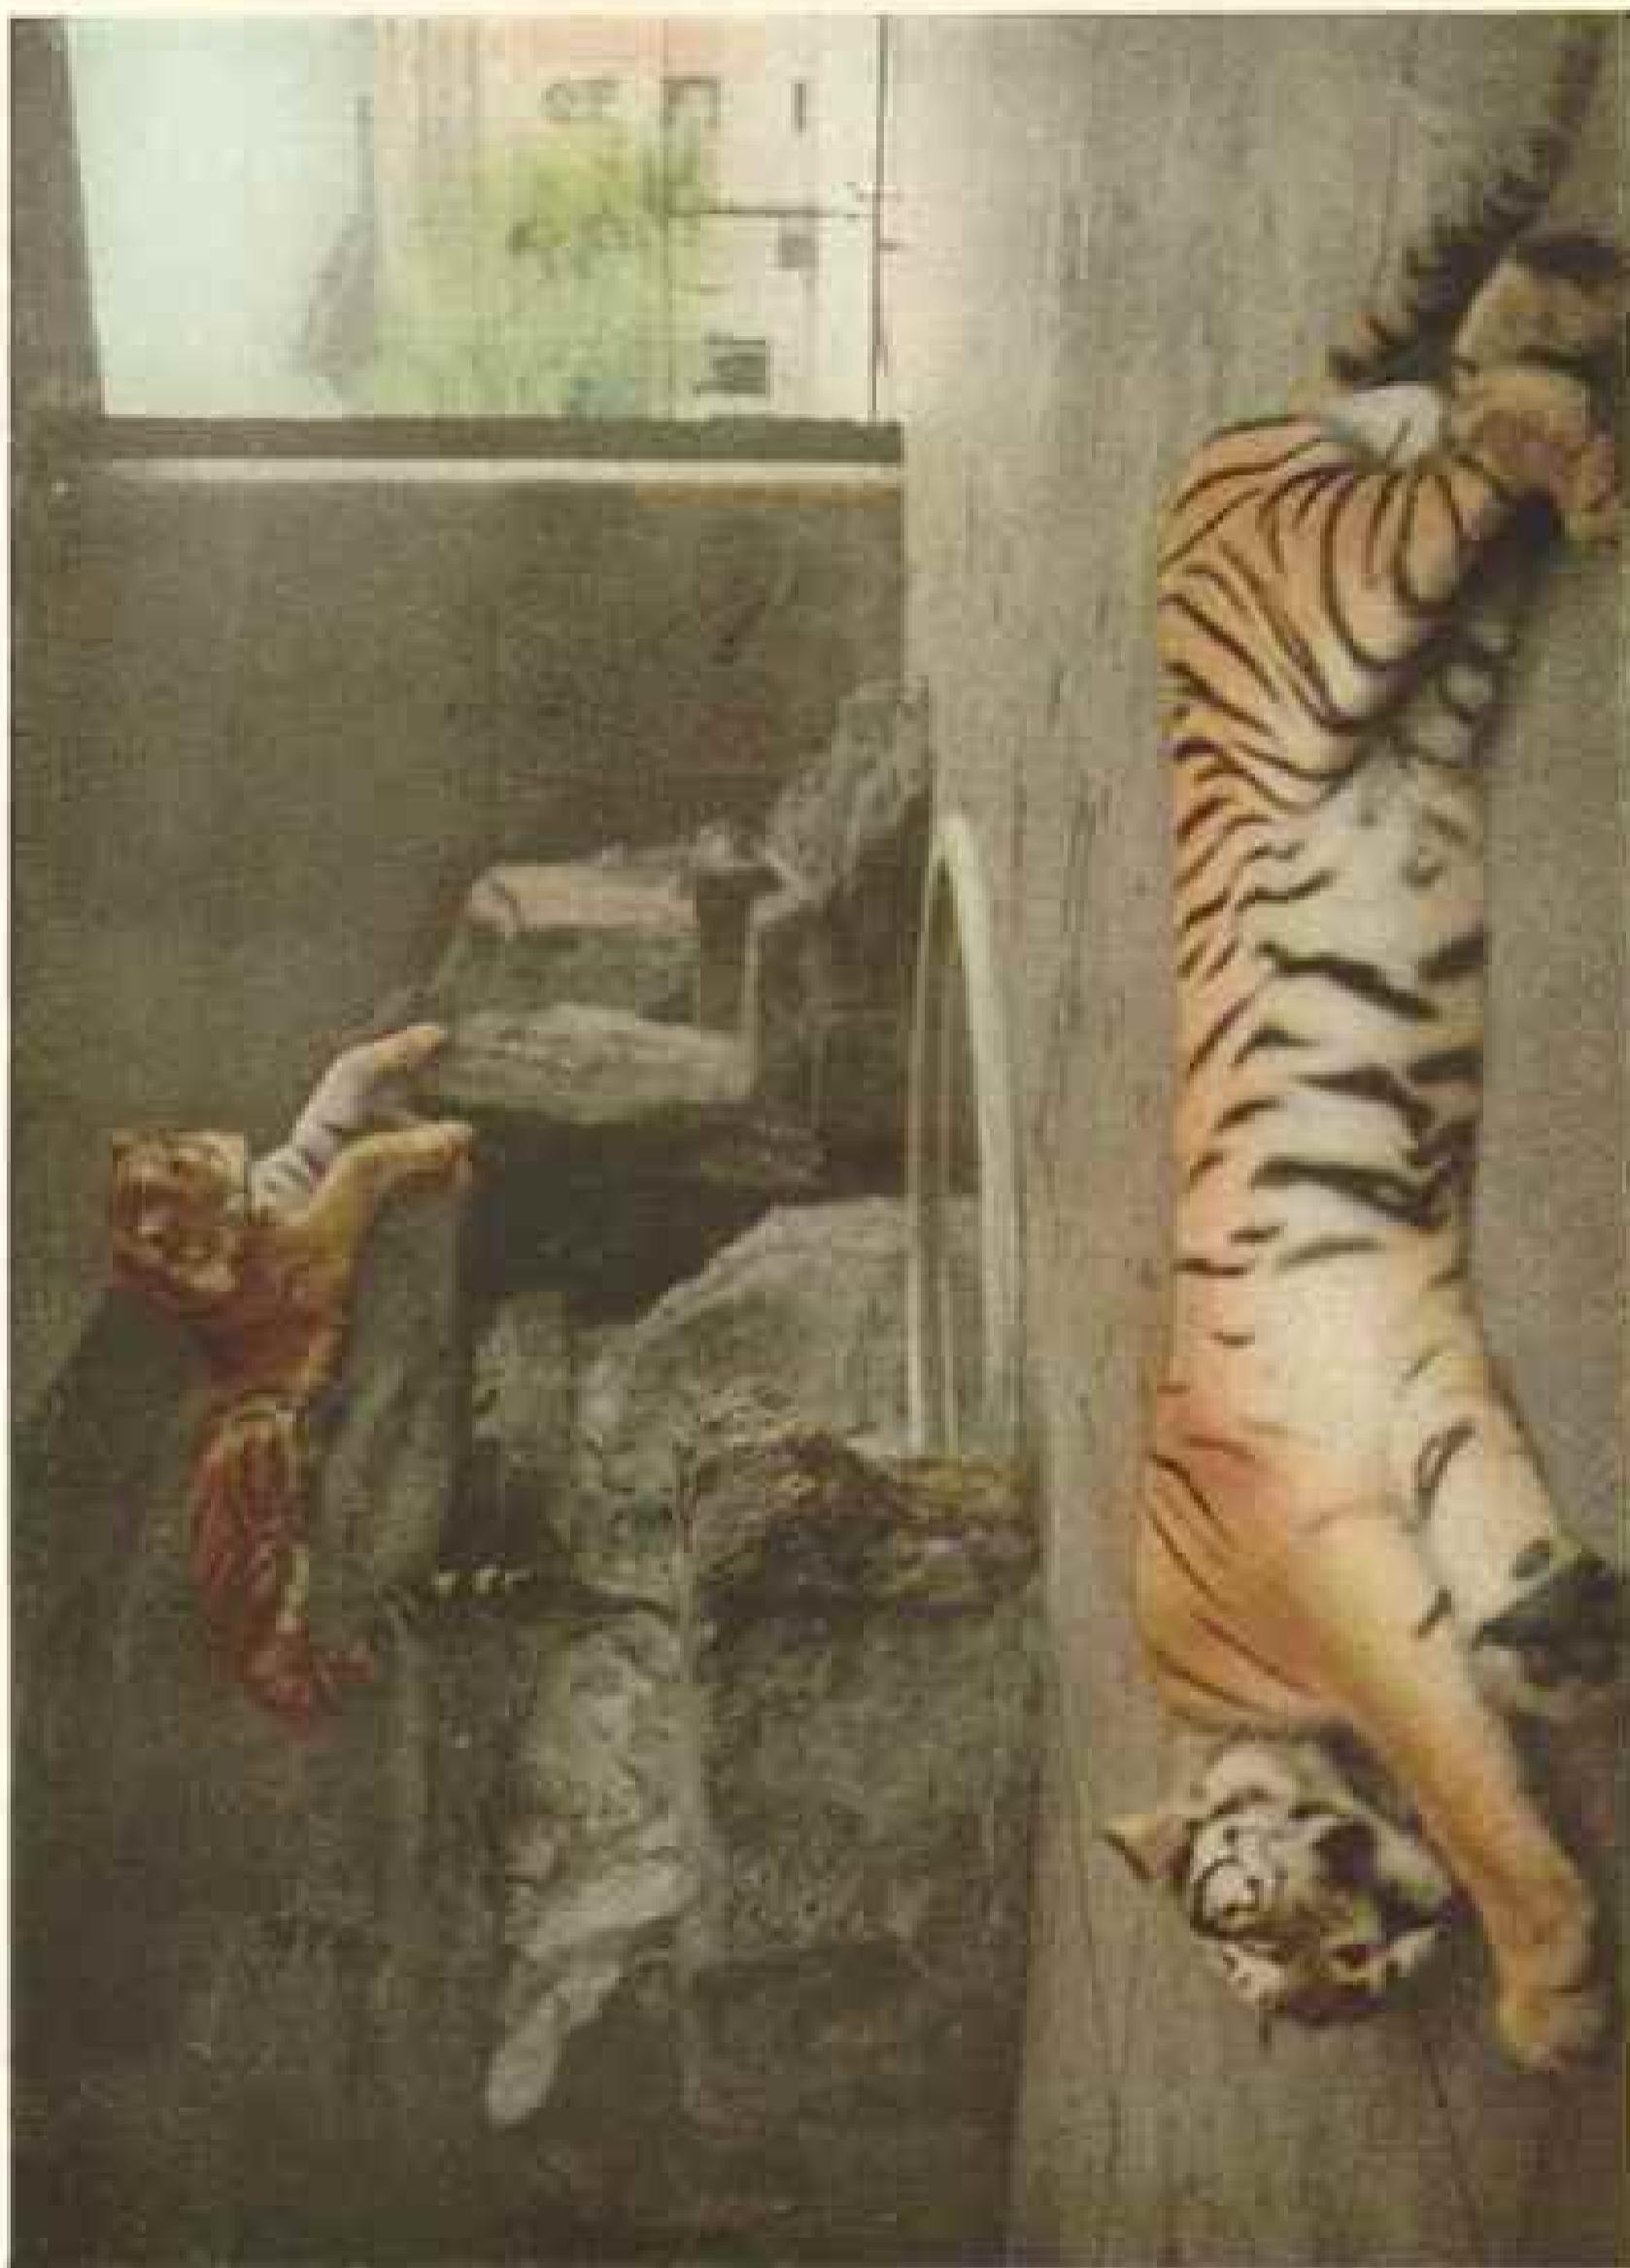

"Every flask, retort, hot spring, and geyser has something special in it, no two

THE BIRTHPLACE OF THE RAINBOW

Man cannot unscramble eggs, but a single drop of water can unscramble light, and the effect of this process at the Bridal Veil Falls of the Yosemite is both sublime and beautiful. The Yosemite contains four other falls as magnificent as the subject of this picture, the Vernal Fall (drop 317 feet), the Nevada Fall (drop 504 feet), the Illinoette Fall (drop 370 feet), and the Yosemite Falls (upper fall, drop of 1430 feet; lower fall, drop of 320 feet). The Bridal Veil Falls has a drop of 620 feet. Each one of these five remarkable waterfalls surpasses in grandeur and the magic play of light and water, any waterfall of Switzerland or on the continent of Europe.

An oil painting by Franklin Price Knott

CONSIDERING THE LILIES: MT. SHASTA IN THE DISTANCE

Mount Shasta, according to an Indian legend, was the first mountain made by the Creator as His masterpiece, and with this as a model He designed the other mountains of the world. The ascent of Shasta is difficult, but with competent guides is not perilous. With the little town of Sisson as a base, there is a good horseback trail to Timberline Camp, an overnight rest six miles away. Starting from this camp very early the next morning, the experienced mountaineer can make the ascent and return to Sisson in a day.

Photograph by A. H. Barnes

A WINTER SUNRISE, RAINIER NATIONAL PARK

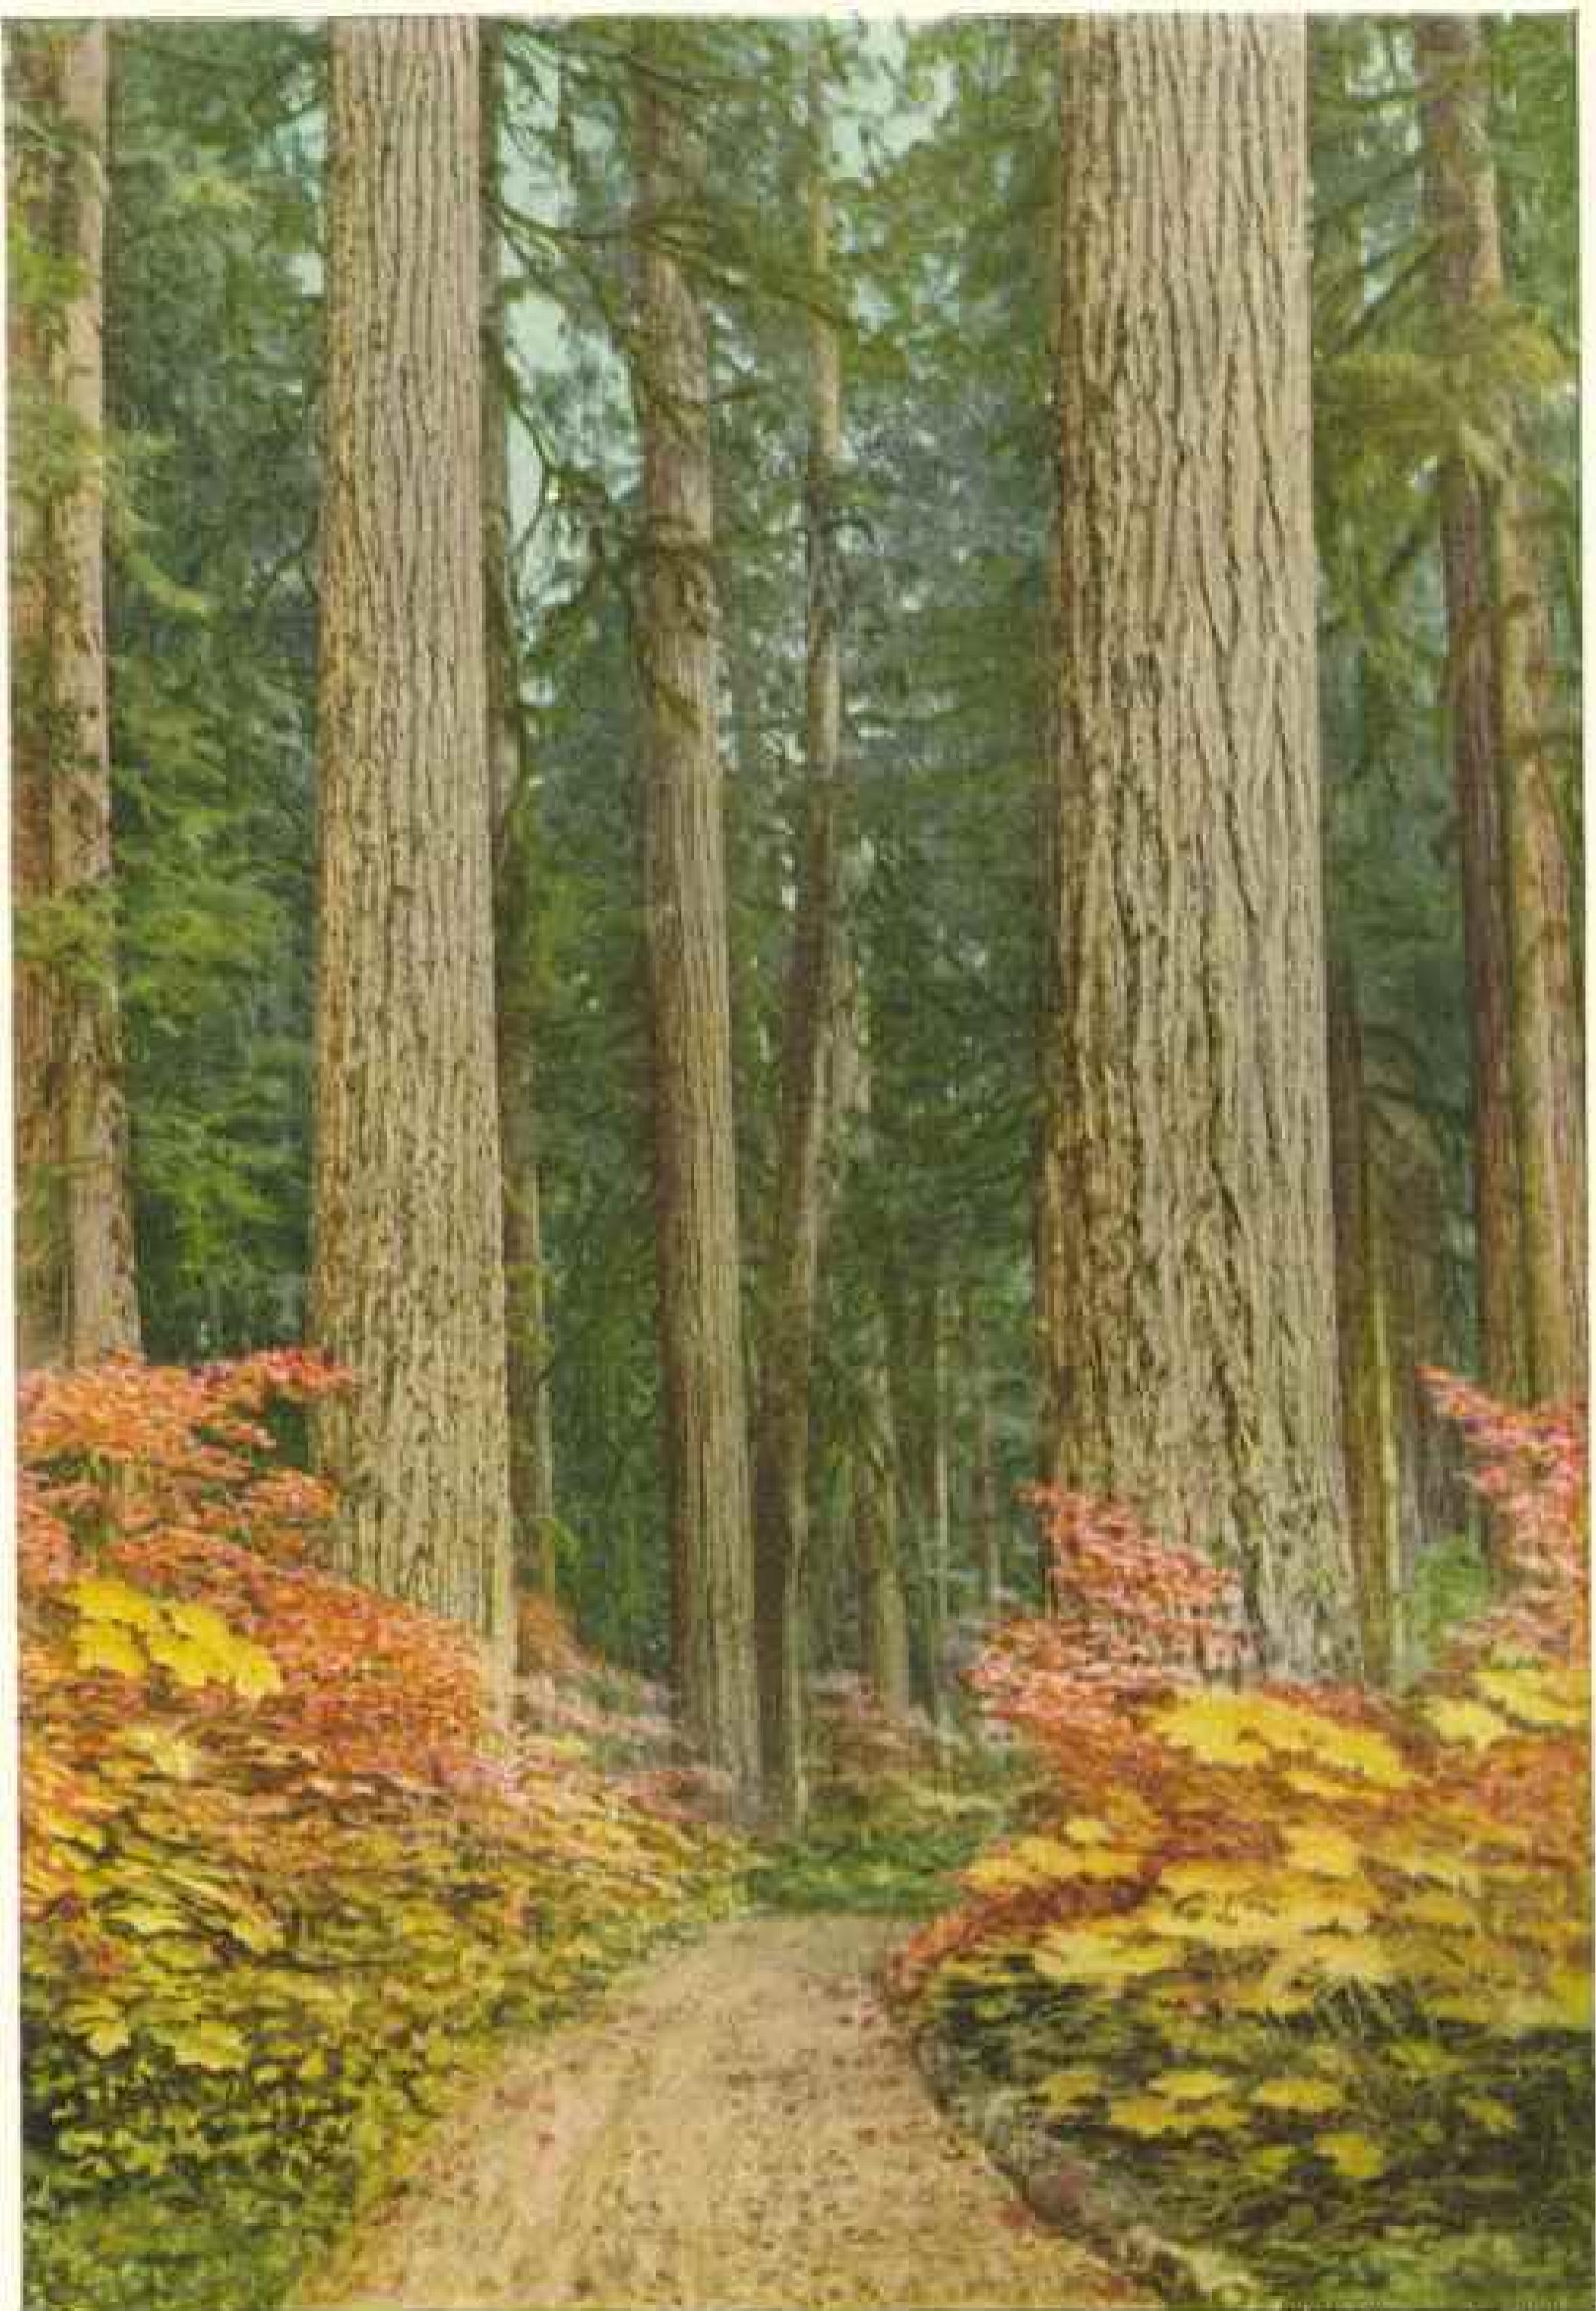

This view shows the southern slope of Tatoosh Range, the height of which may be judged from the statement that the foreground itself is more than a mile higher than the Pacific at high tide.

Photograph by A. H. Barnes

A WASHINGTON LANDSCAPE: MOUNT HOOD SIXTY MILES AWAY. AND MARYHILL IN THE FOREGROUND

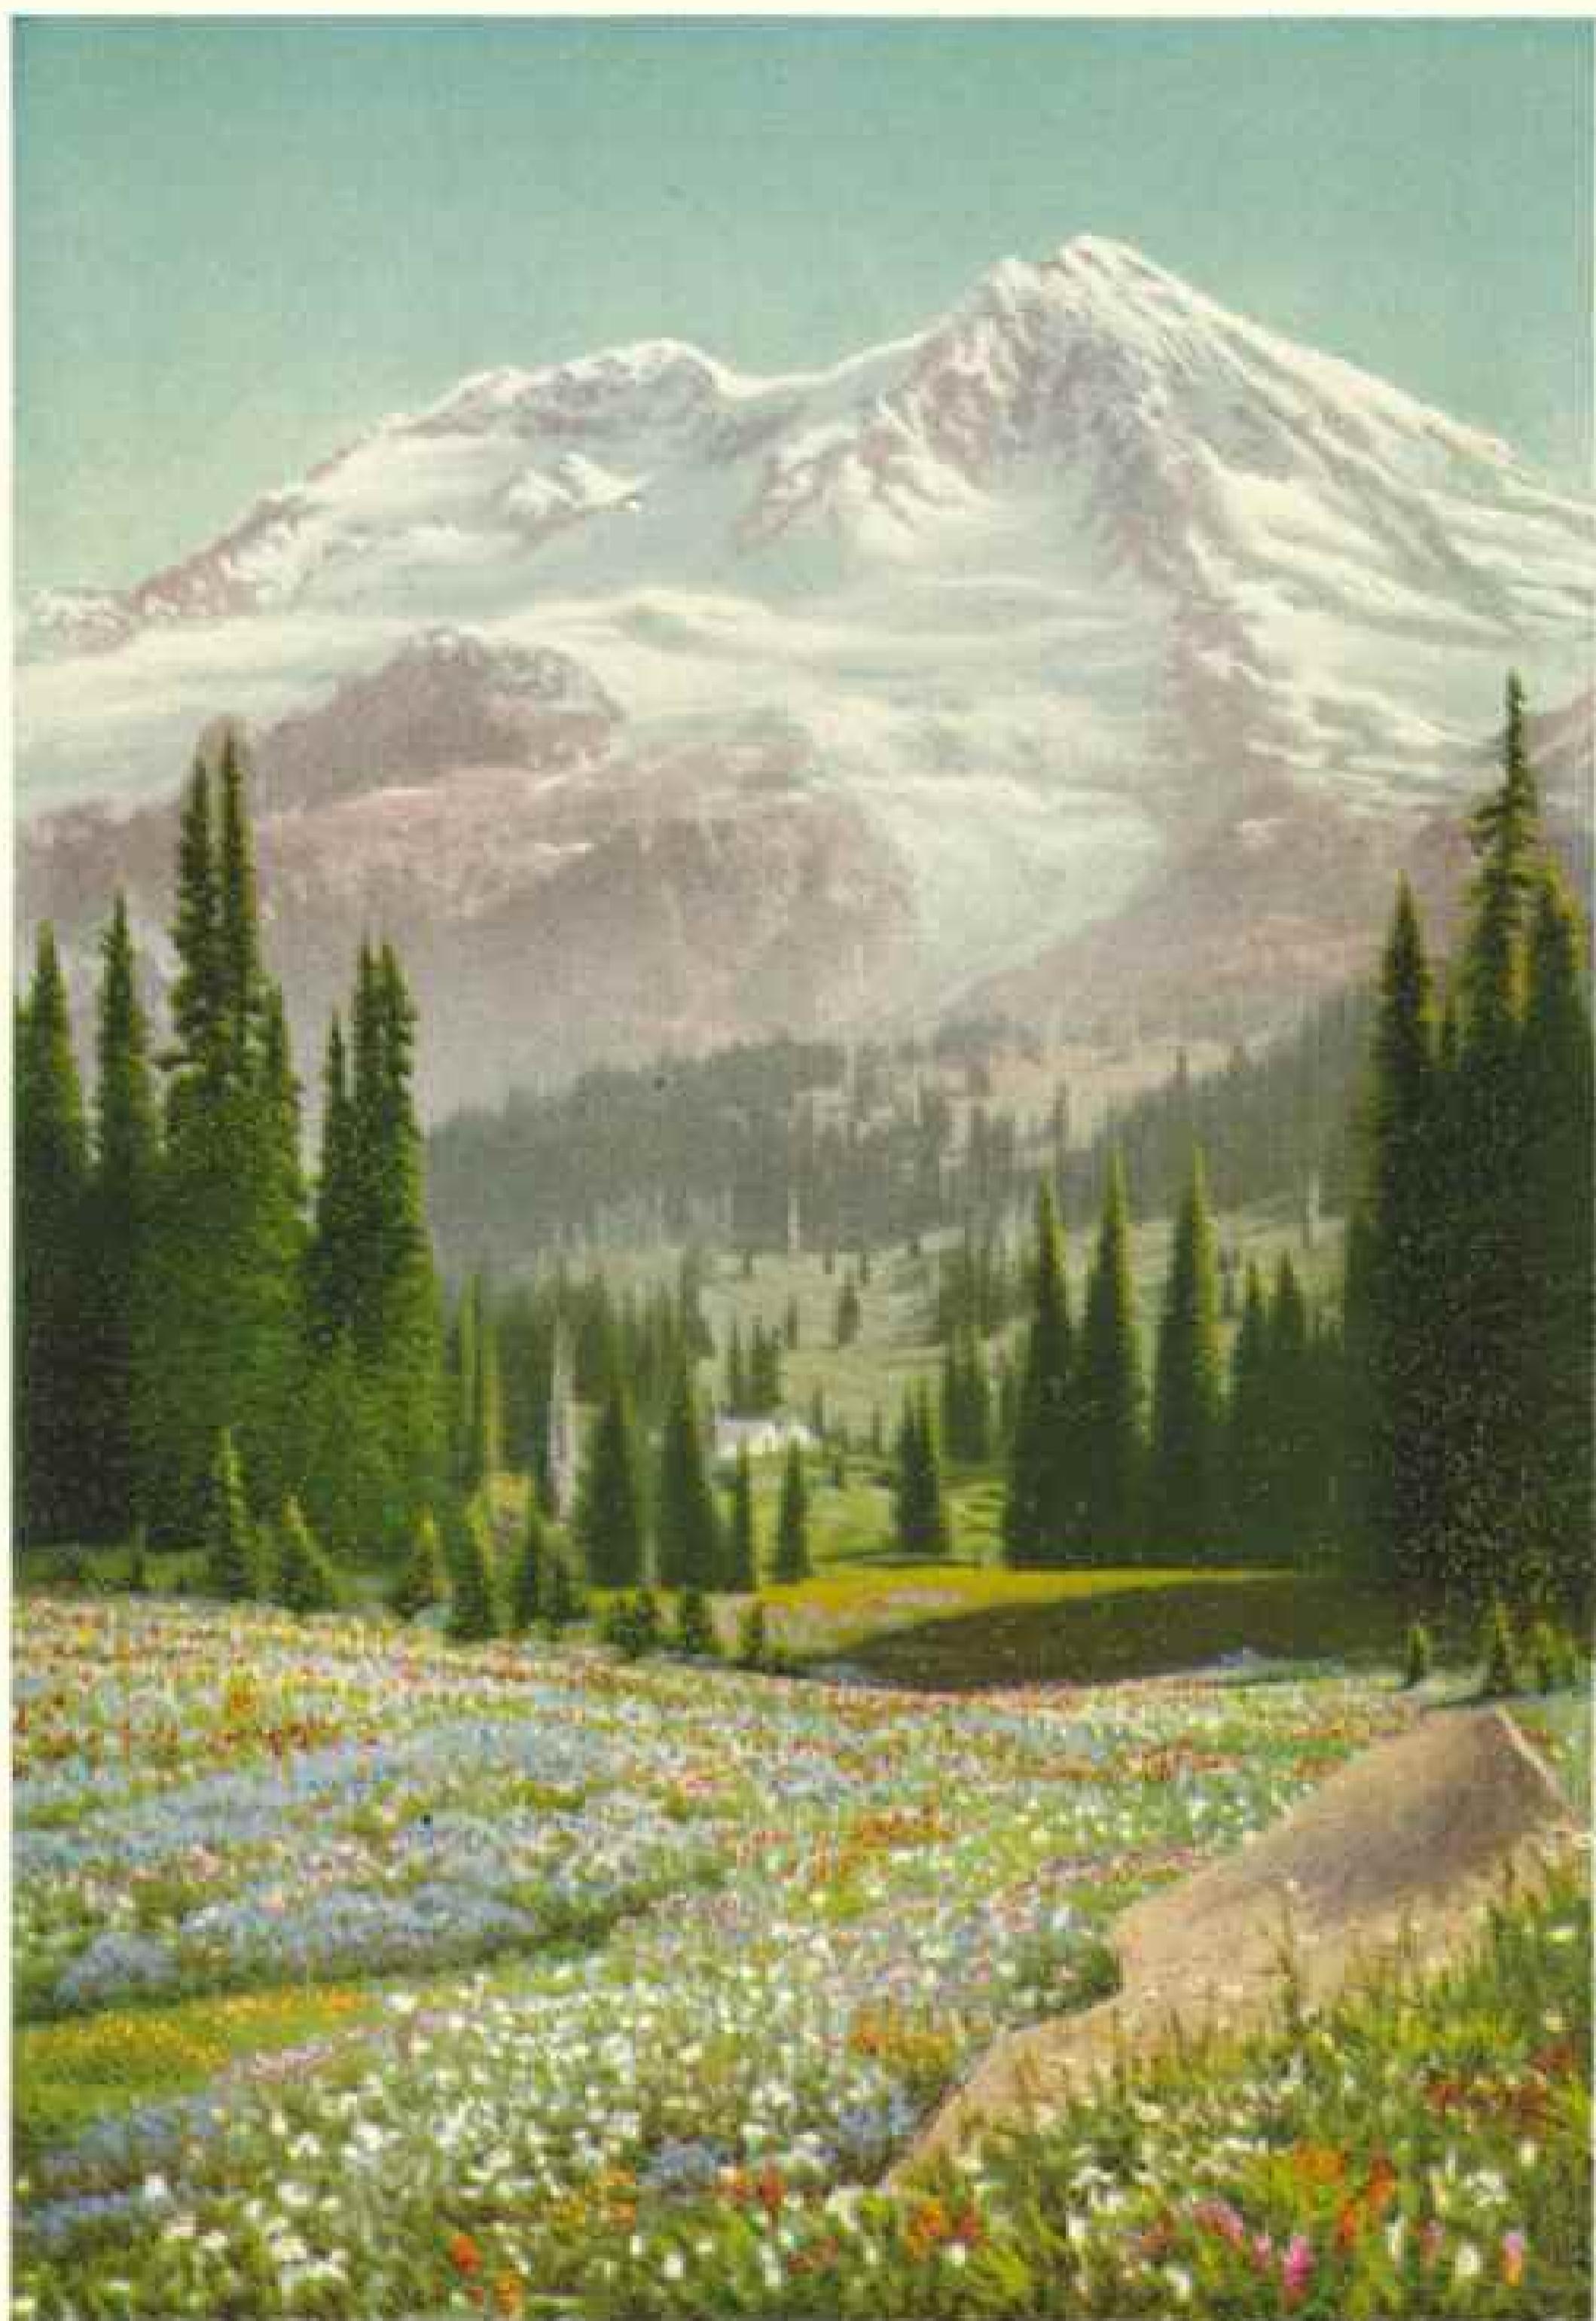

Between snow-capped mountains, broad rivers, plentiful farms, and inspiring landscapes, the West Coast and the inland Empire offer rich rewards to the tourist who loves the grand, the sublime and the beautiful. The Columbia River Highway, in Oregon, is well rimmed "America's Greatest Boulevard," and, from an engineering standpoint as well as from the scenic wondaland which the road unfolds as it cuts through two great mountain ranges to the sea, is unsurpassed by any highway in the world.

Photograph by A. H. Barnes

BIG TREES IN RAINIER NATIONAL PARK

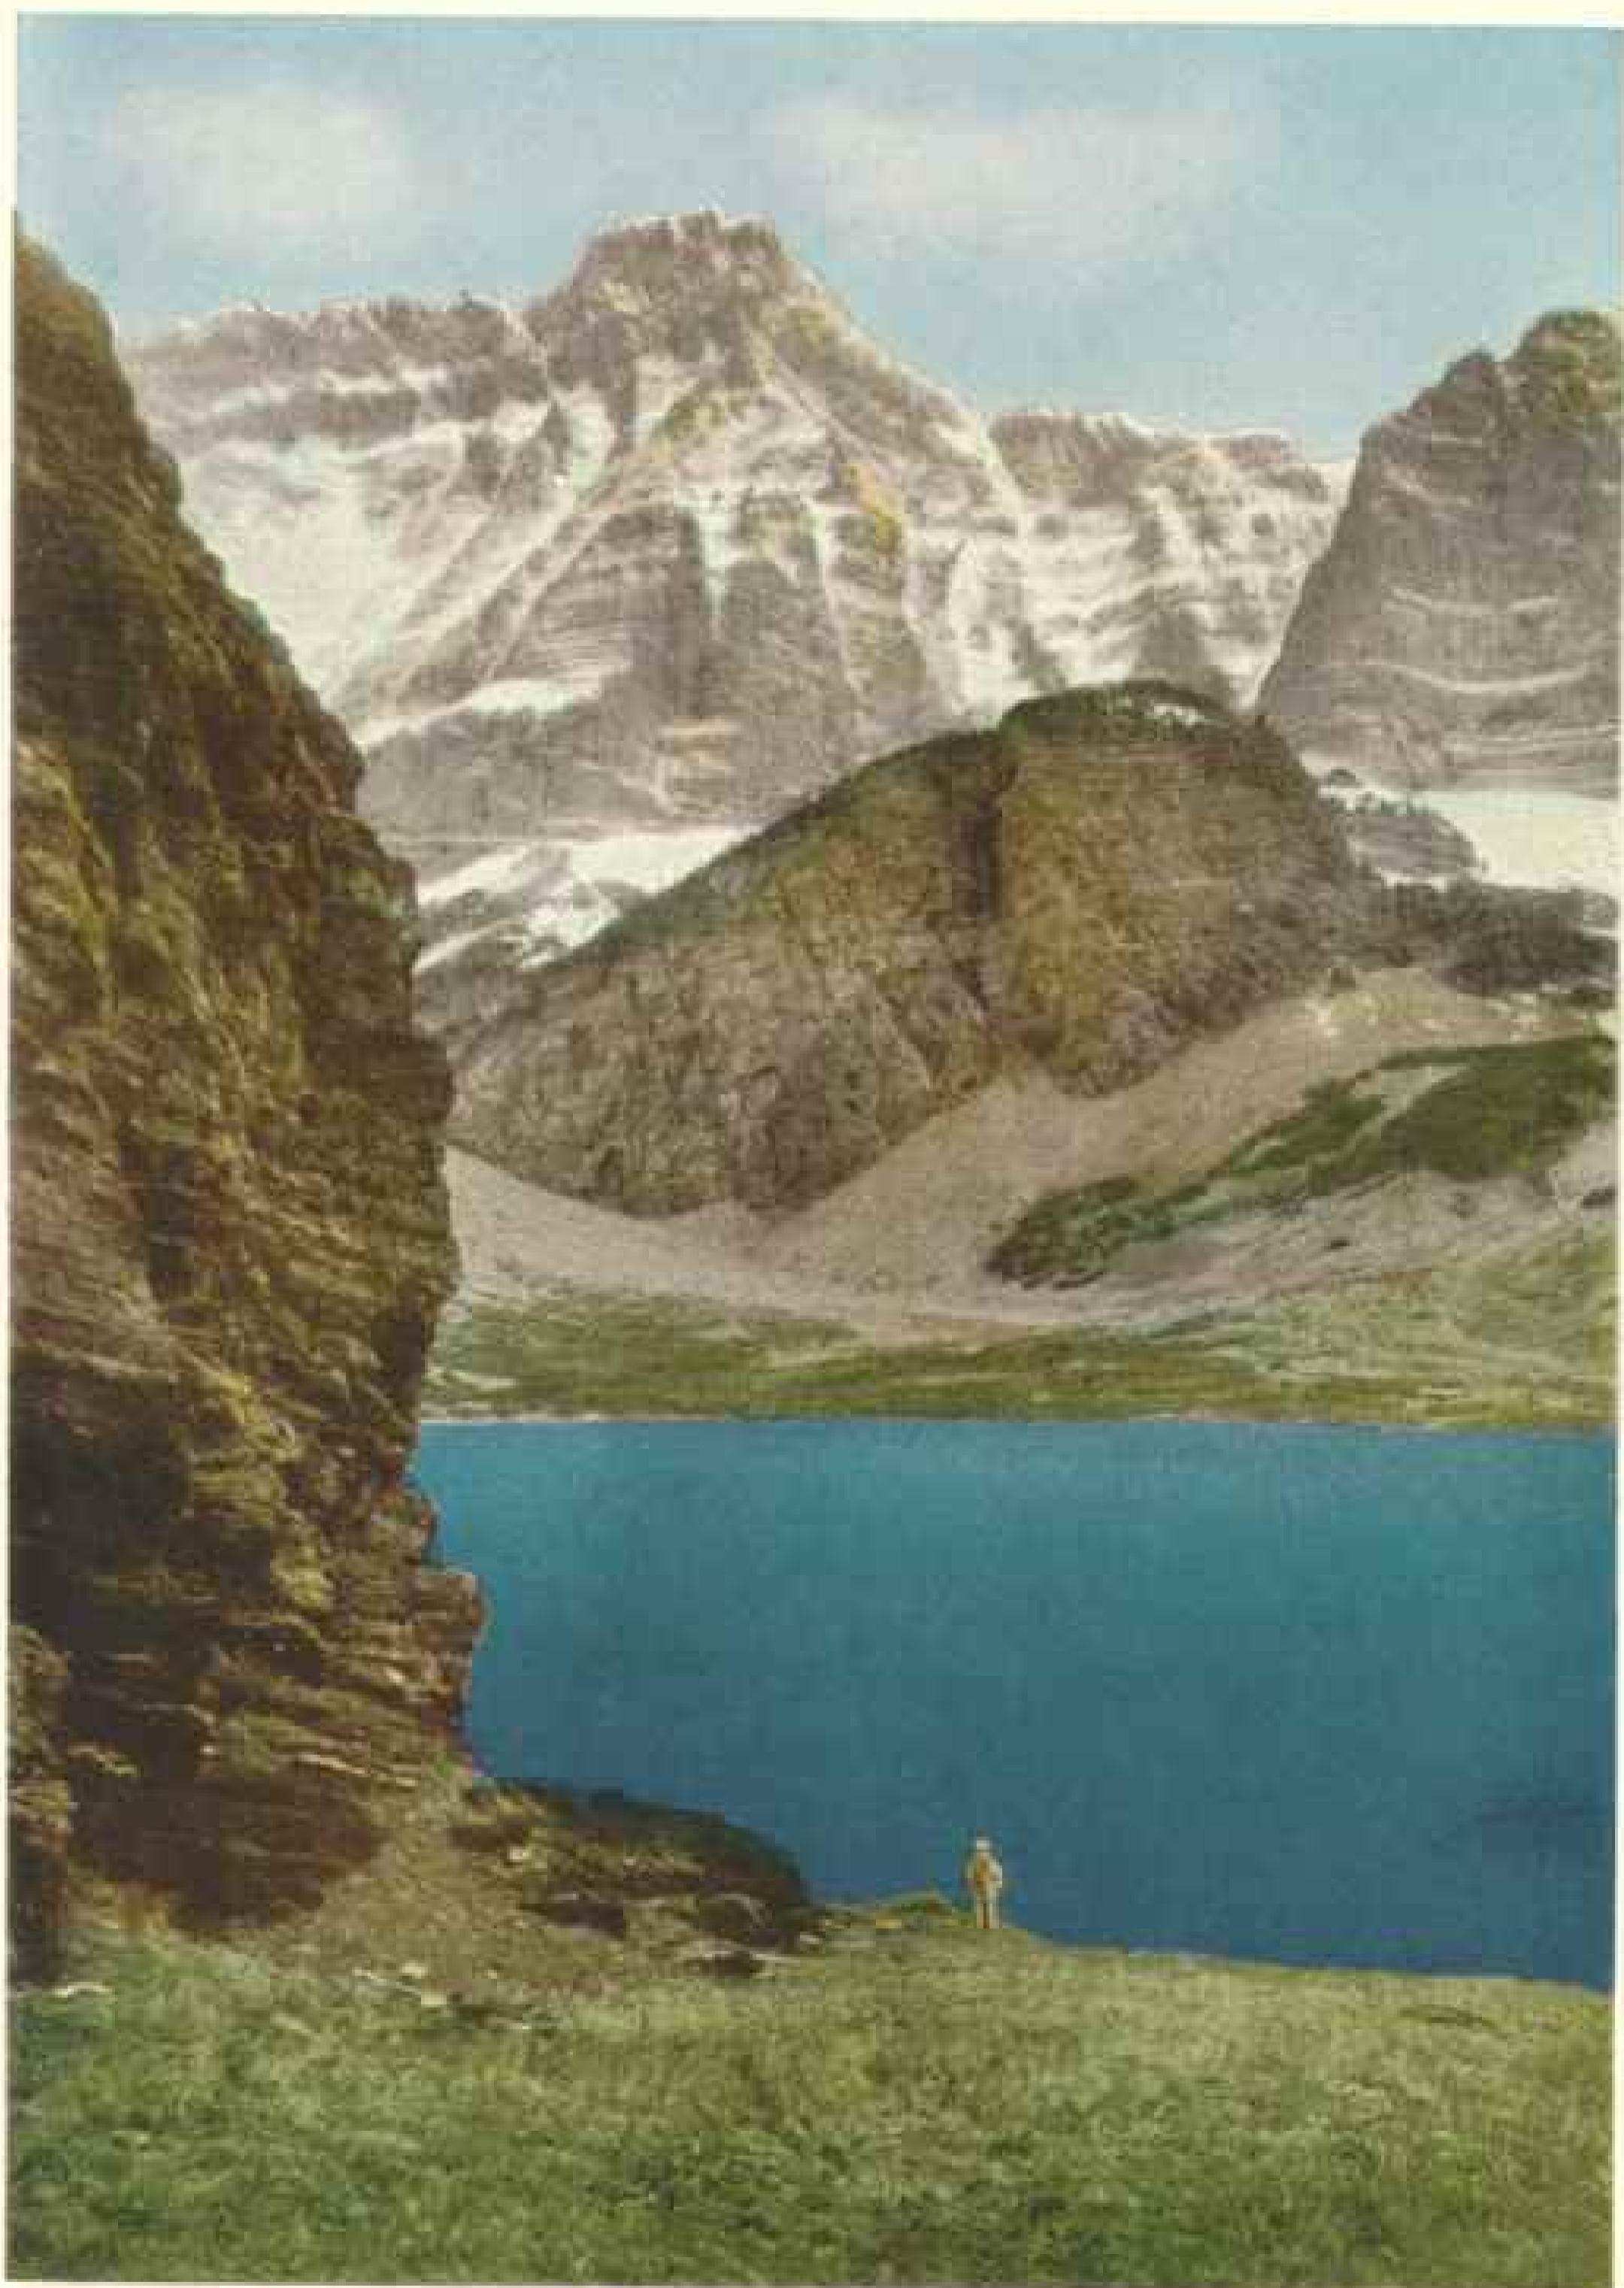

After all, it may be the big tree that will explain one of civilization's greatest mysteries. Under the scientists' micrometer it is telling us of striking fluctuations of climate in bygone ages, and introducing a new factor in that most profound and far-reaching of the problems of history—the cause of the rise and fall of nations.

Photograph by A. H. Barnes

ALPINE FLOWERS IN RAINIER NATIONAL PARK

The flowers of our mountains match the sunset skies for color, the sands of the sea for numbers, and the filmy-winged butterfly for grace.

Photograph by Kiser

A SAPPHIRE IN A MOUNTAIN SETTING: BLUE LAKE IN THE GLACIER NATIONAL PARK

What American engineers have done at Gatun, glaciers have done in our high mountains. A glacier lake is often a dam-obstructed river, the dam being built out of the earth-shavings resulting from the flowing onward sweep of the mountains of ice.

being the same in temperature, color, or composition."

The Yellowstone National Park has a canyon gorgeous with all the colors and shades of the rainbow, and is the best stocked wild-animal preserve in the world (page 372).

THE GLACIER NATIONAL PARK

The situation of Glacier National Park is unique, in that it mothers streams which flow into three out of five of the earth's great oceans. It may well claim to be the top of the continent, for its rivers drain into Hudson Bay and the Arctic Ocean, into the Pacific, and through the Missouri and the Mississippi into the Atlantic.

As the Blackfeet Indian Reservation adjoins the park, the visitor has the added touch of charm that Indian life gives to any wild place (see pages 386-393 and 403).

The Glacier National Park was made by the earth cracking in some far-distant time and one side thrusting up and overlapping the other. It has cliffs several thousand feet high, and more than sixty glaciers feed hundreds of lakes. One lake floats icebergs all summer. The scenery is truly Alpine (see pages 402 and 410).

Lake St. Marys, Lake McDermott (page 402), and Lake McDonald are the peers of any of the mountain lakes of Switzerland and Italy. This park covers an area of 1,534 square miles, and maintains such an excellent chain of chalets, hotels, and trails that the tourist can see its many attractions in comfort.

THE PARKS IN COLORADO

The Rocky Mountain National Park straddles the Continental Divide at a lofty height, with snow-capped mountains extending from end to end. This park is in the heart of the Rockies northwest of Denver, with Longs Peak as its center. It was established by congressional enactment last year. Estes Park, the gateway to this mountain playground, is a beautiful little valley town nestled at the foot of the ridge, and yet itself more than a mile and a half above sea-level. Longs Peak is nearly three miles high,

and has several neighbors that run it a close second.

The Mesa Verde National Park hides in its barren canyons the well-preserved ruins of a civilization which passed out of existence so many centuries ago that not even tradition recalls its people.

Here one may study the modes of life of the prehistoric American as they can be studied in few places. These aborigines had their civic center and they had some progressive ideas in city planning. Community life was the order of those times. One house had 200 rooms for family use and 22 for worship. Another once sheltered 350 aborigines. The Sun Palace, discovered by Dr. Fewkes in 1915, is an ambitious structure, apparently dedicated entirely to the worship of the sun.

MT. RAINIER NATIONAL PARK

Mt. Rainier seems to keep perpetual guard over Seattle, Tacoma, and Olympia. Any one who has beheld its many moods, who has watched the ever-changing picture as varying lights have played upon its summit, who has coasted on its glacial rivers, can understand why the Indians called it "Tahoma—the mountain that was God."

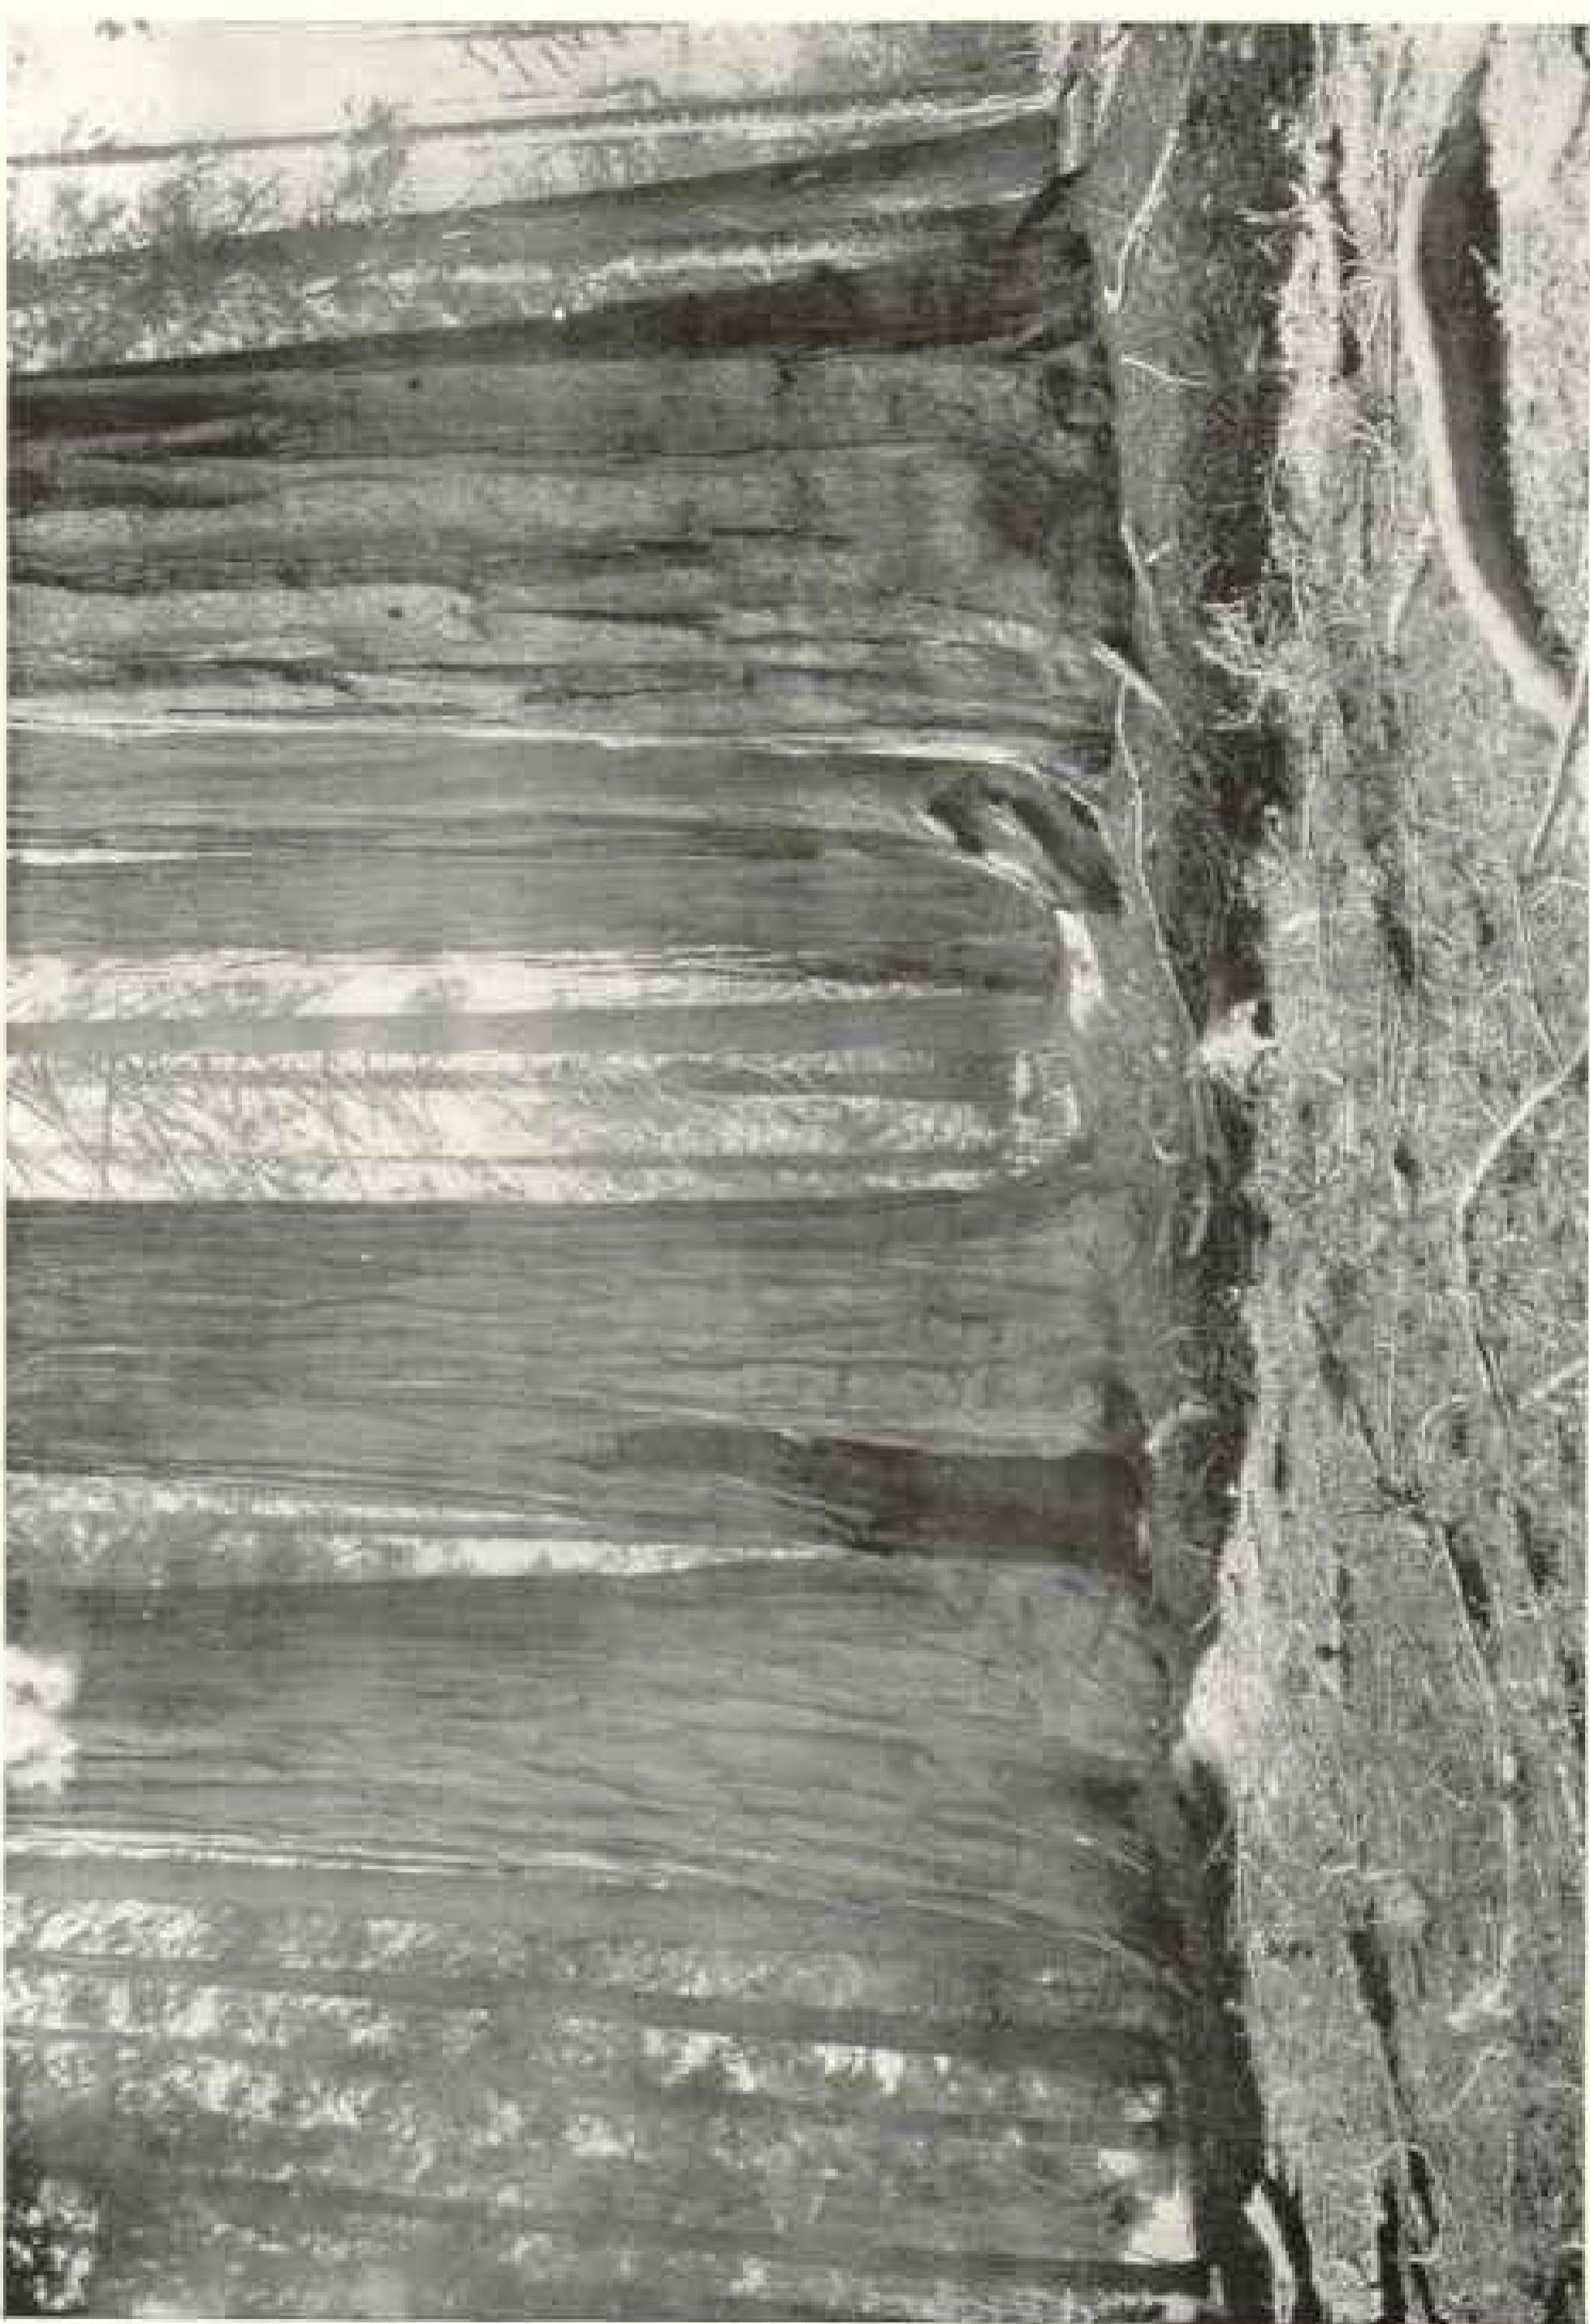

The Far Northwest was once a region of terrific volcanic activity. Mt. Shasta, Mt. Hood, Mt. St. Helens, Mt. Adams, Mt. Rainier, and Mt. Baker all stand in one far-flung group as silent witnesses of the dim ages when America was in the making and when they sent their beacon lights across the sea.

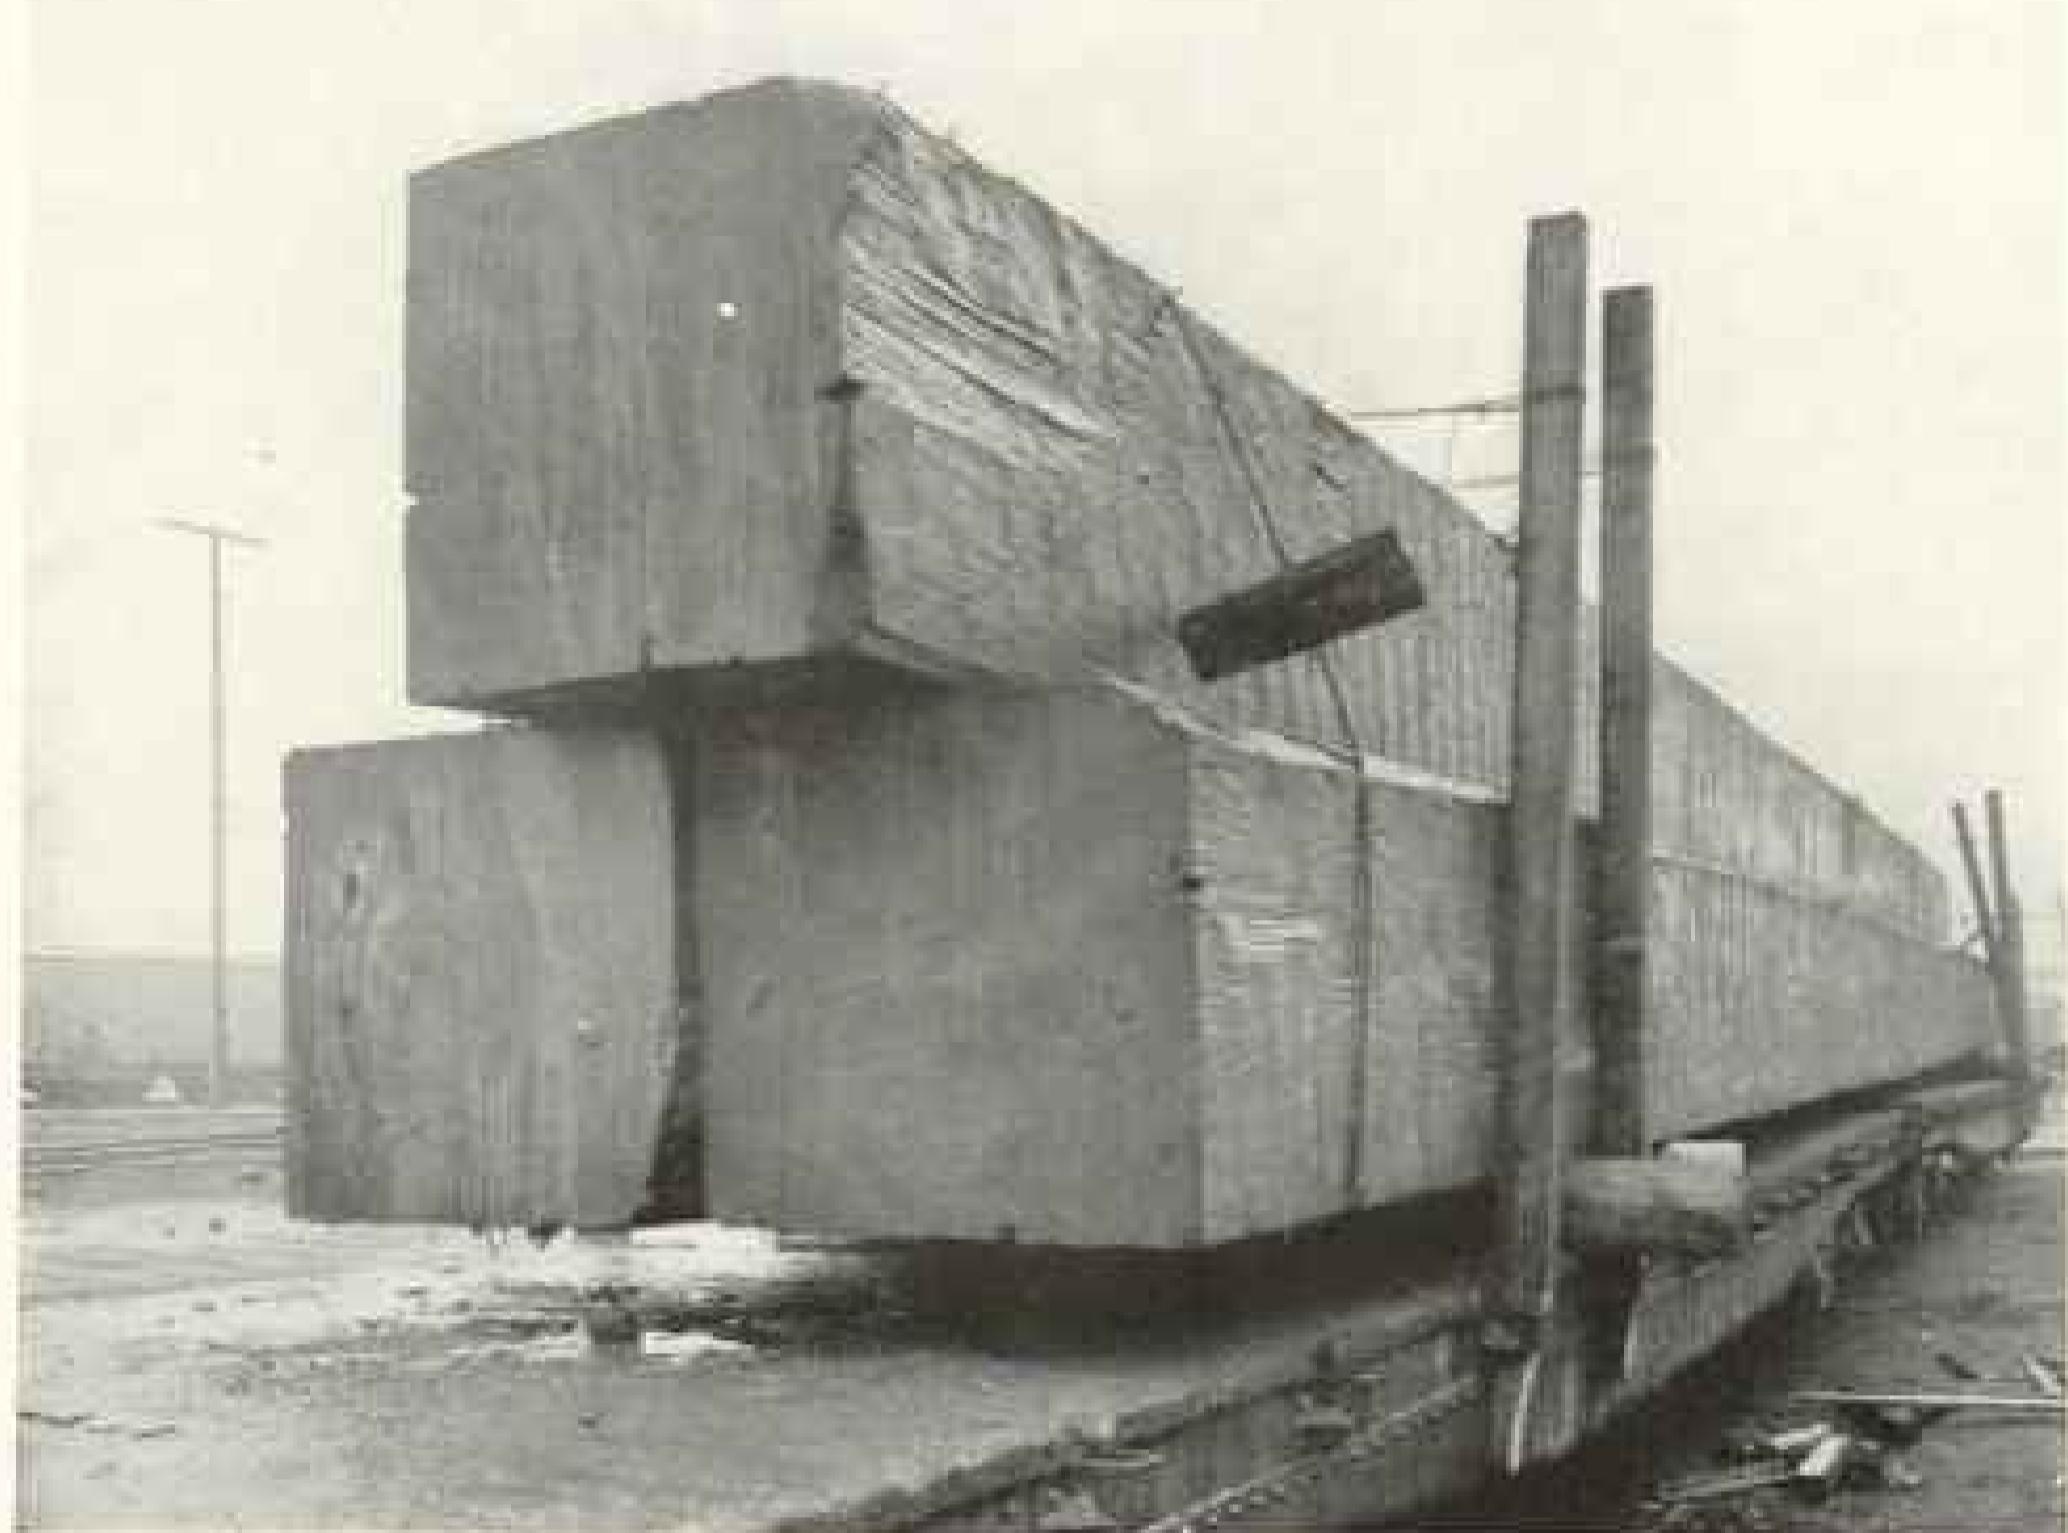

Where once flamed the fervent fires of earth's boiling calderas, today snow and ice reign supreme; where once floods of molten lava swept, today forests of fir, pine, and cedar and gorgeously carpeted flower beds refresh the tourist.

Mt. Rainier has a glacier system exceeding in size that of any other single mountain within continental United States. From its summit and cirques twenty-eight named and a number of unnamed rivers of ice pour slowly down its sides. These rivers of ice have carved on what was once a perfect cone fourteen valleys through the solid rock. A bird's-eye view taken from above the mountain would show it to be covered by

TALL GIANT FOREST IN THE SEQUOIA NATIONAL PARK : CALIFORNIA

The extraordinary redwoods of California grow on the western slopes of the Sierra Nevada. Many splendid specimens are to be seen in the Yosemite National Park, but they are found in the greatest numbers in the Sequoia National Park, reached via Visalia, California.

Photograph by Curtis & Miller

WESTERN LOGS USED AS DREDGE TIMBERS AT PANAMA

So superior are the trees of the West for masts that they are in demand in almost every shipyard in the world. In the words of Muir: "They are felled and peeled, dragged to tide-water, raised again as masts and yards of ships, given iron roots and canvas foliage, decorated with flags, and sent to sea, where in glad motion they go cheerily over the ocean prairie, in every latitude and longitude, singing and bowing responsive to the same winds that waved them when they were in the woods. After standing in one place for centuries they thus go round the world like tourists, meeting many a friend from the old home forest; some traveling like themselves, some standing head downward in muddy harbors, holding up the platforms of wharves, and others doing all kinds of hard timber work, showy or hidden."

an enormous frozen octopus, stretching icy tentacles down among the rich gardens of wild flowers and through forests of fir and cedar (pp. 406, 408, 409, 427).

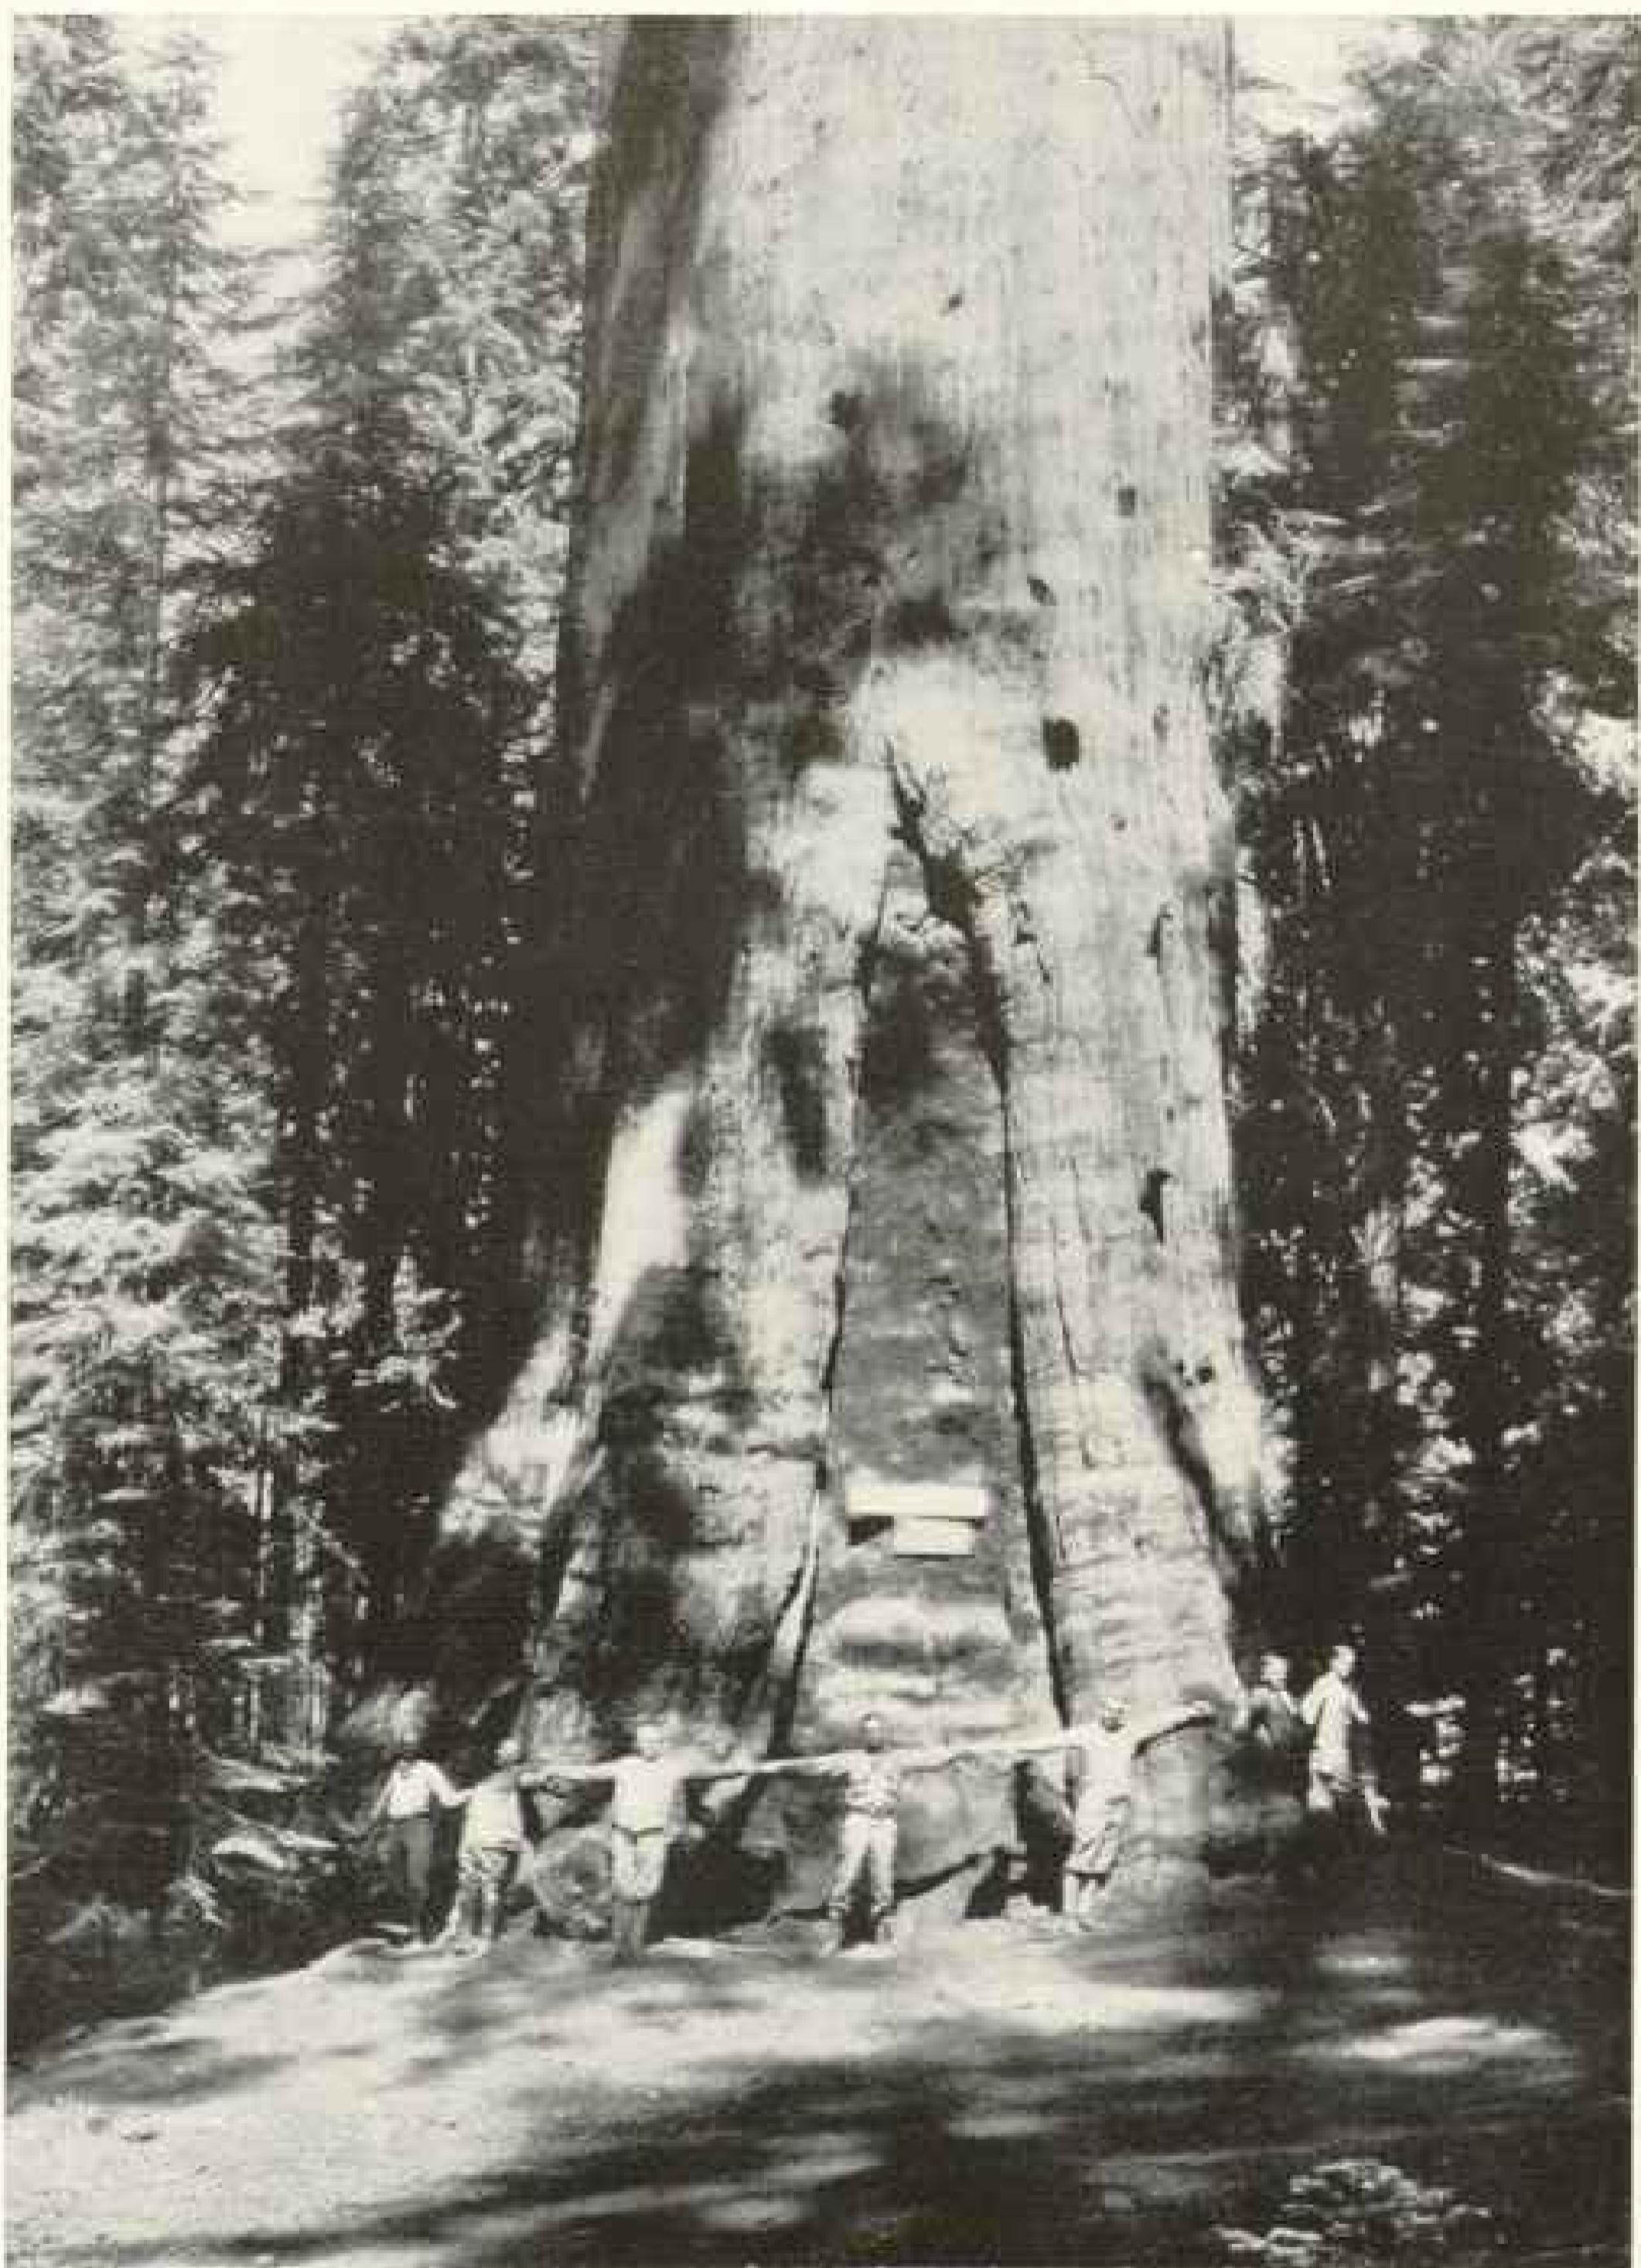

THE YOSEMITE AND SEQUOIA NATIONAL PARKS

No words can adequately describe the majesty and friendliness of the giant redwood trees of the Sequoia and Yosemite National Parks, the stately granite domes and sharp pinnacles, the roaring white cascades, the deep, dark canyons; the fragrance of meadows carpeted with lupine, columbine, evening primrose, mariposa lily, shooting-star, pride of the mountain, etc., and the many sweet-scented pines and cedars, among which

are flitting countless songsters dressed in as lovely colors as the flowers.

In this fairyland, the lover of outdoor life can camp for months in summer without taking tent or raincoat, for it never rains here in vacation time.

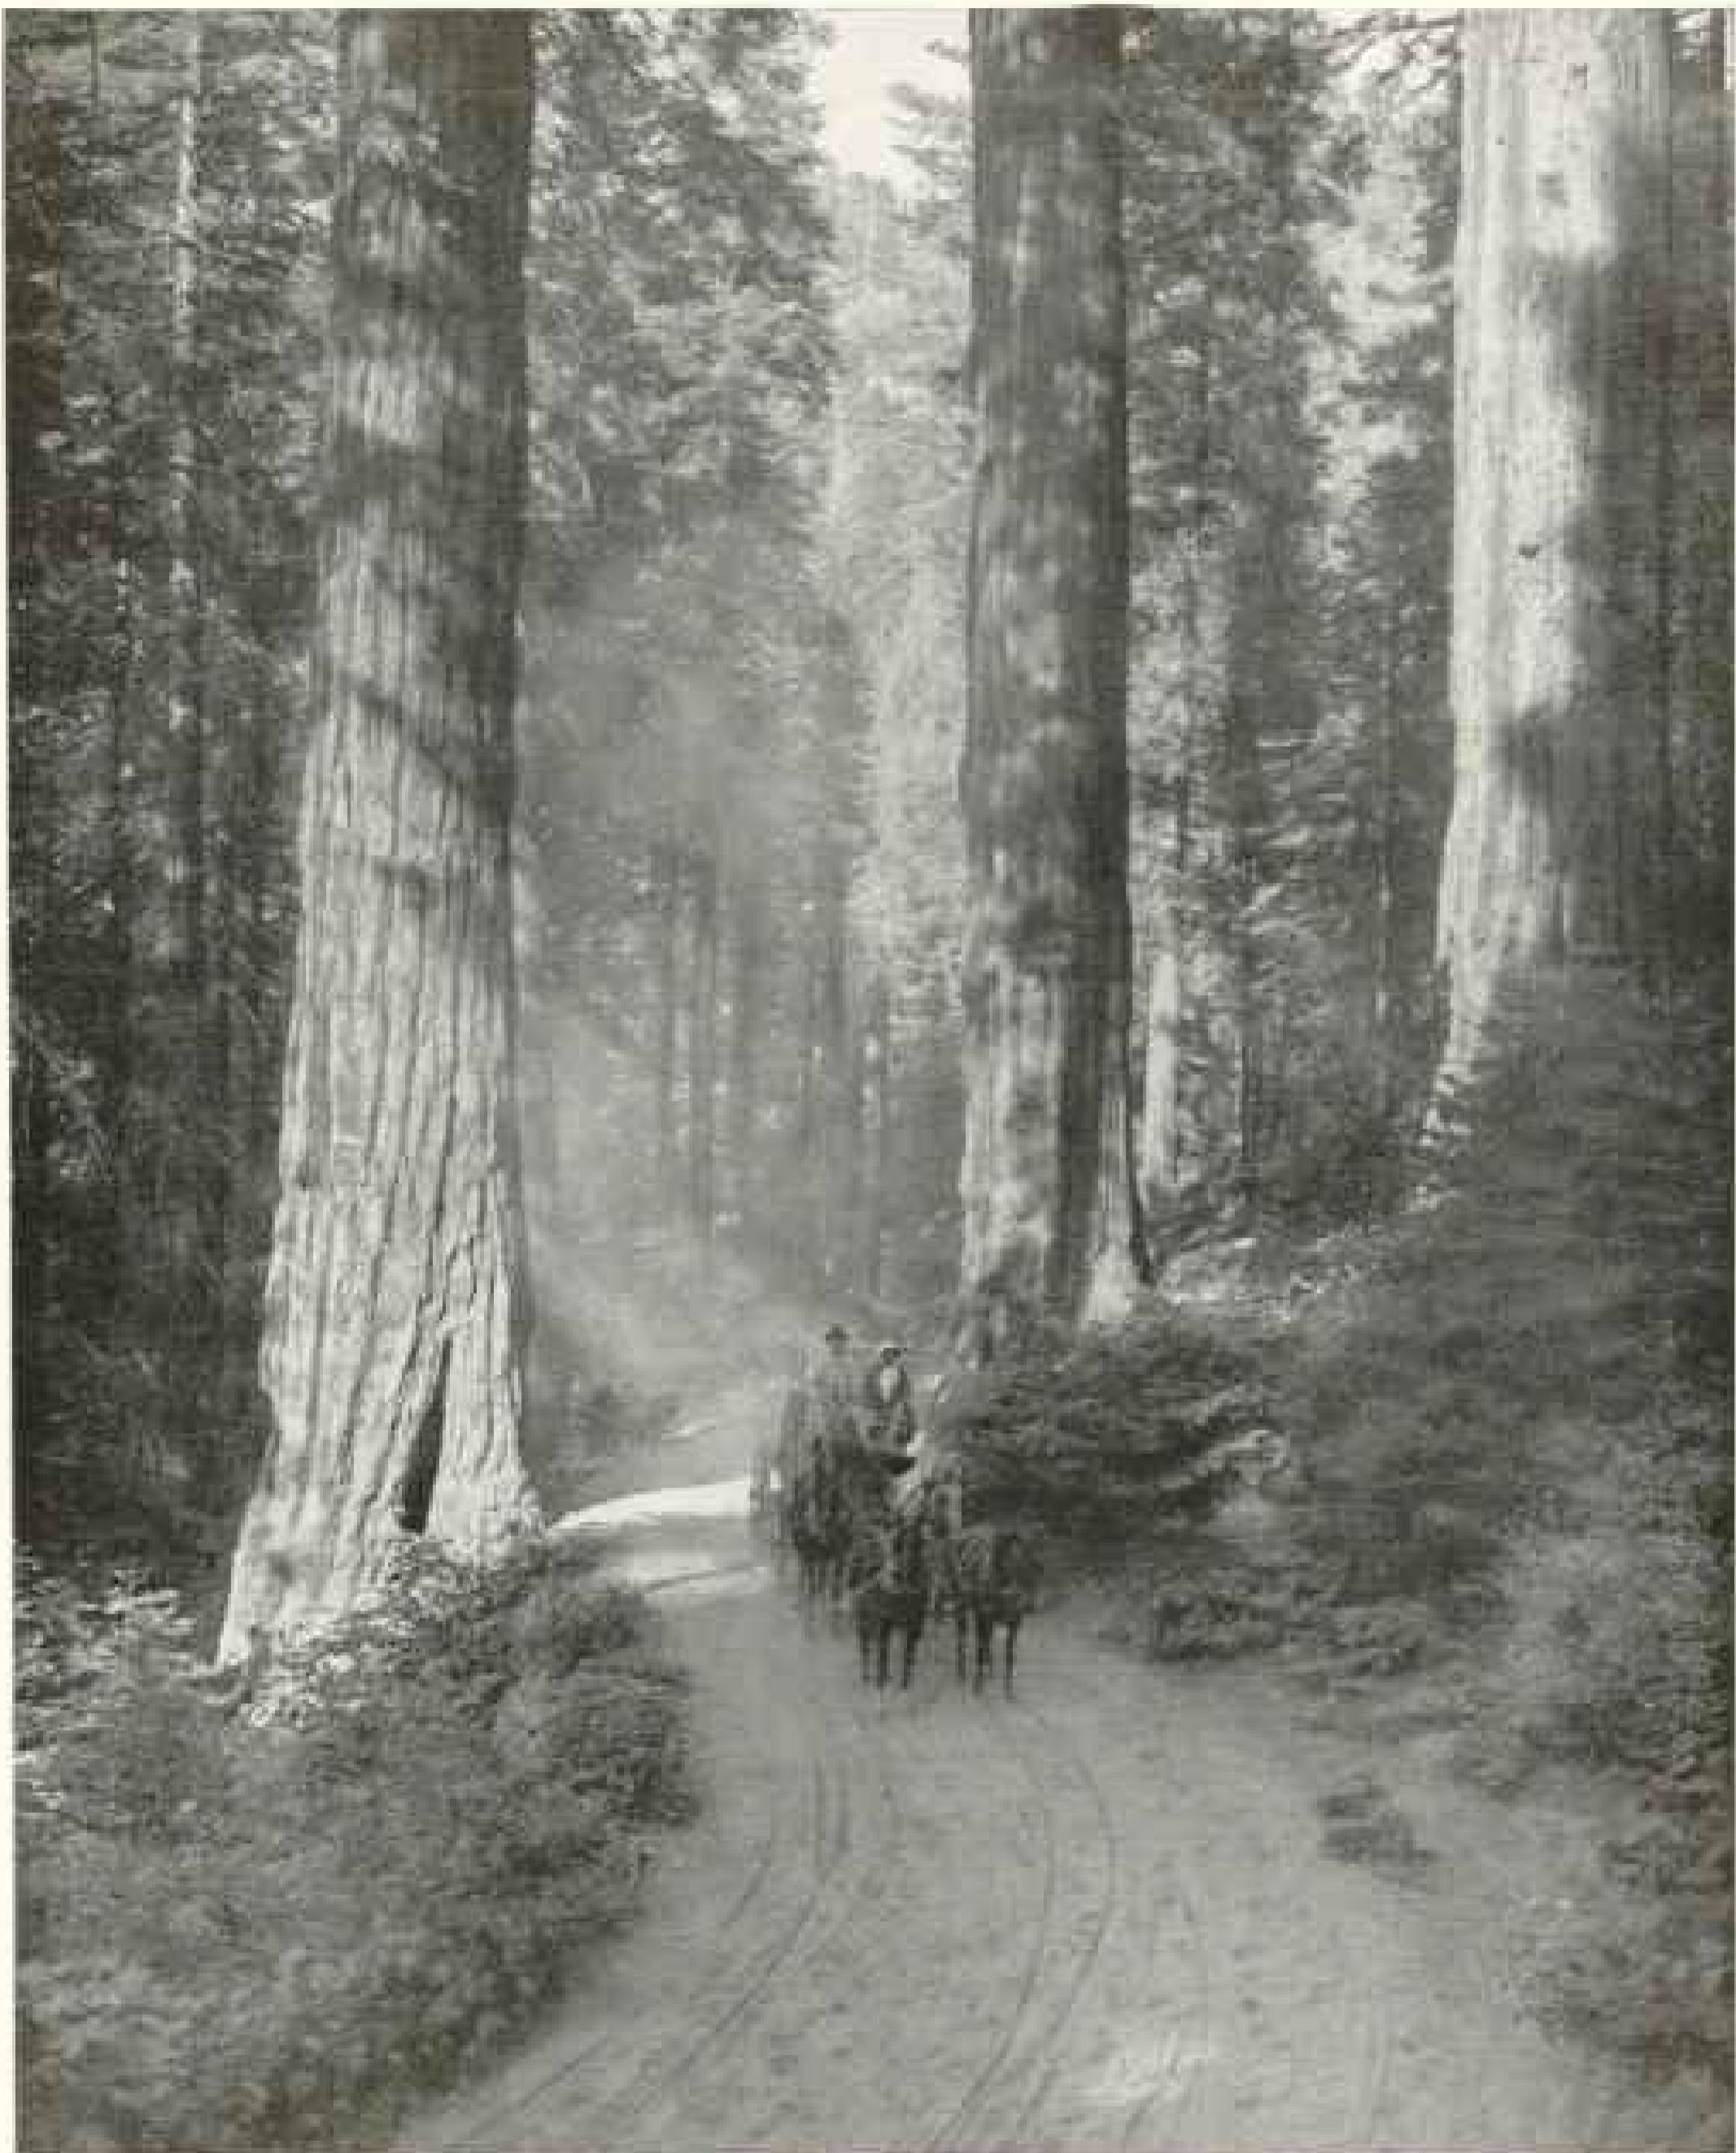

Switzerland, the playground of Europe, visited annually (until 1915) by more than 100,000 Americans, cannot compare in attractiveness with the High Sierra of central California. Nothing in the Alps can rival the famous Yosemite Valley (pages 401, 416, 417), which is as unique as the Grand Canyon. The view from the summit of Mt. Whitney surpasses that from any of the peaks of Switzerland. There are no canyons in Switzerland equal to those of the Kern

Photograph by Gilbert H. Grosvenor

GENERAL SHERMAN, THE KING OF ALL TREEDOM: SEQUOIA NATIONAL PARK

It takes twenty men with arms outstretched to encircle the tree. The General Sherman tree is pronounced by the United States Government the biggest tree in the world, measured by the amount of wood it contains (see also the remarkable photograph by Eddy printed as the frontispiece to this number).

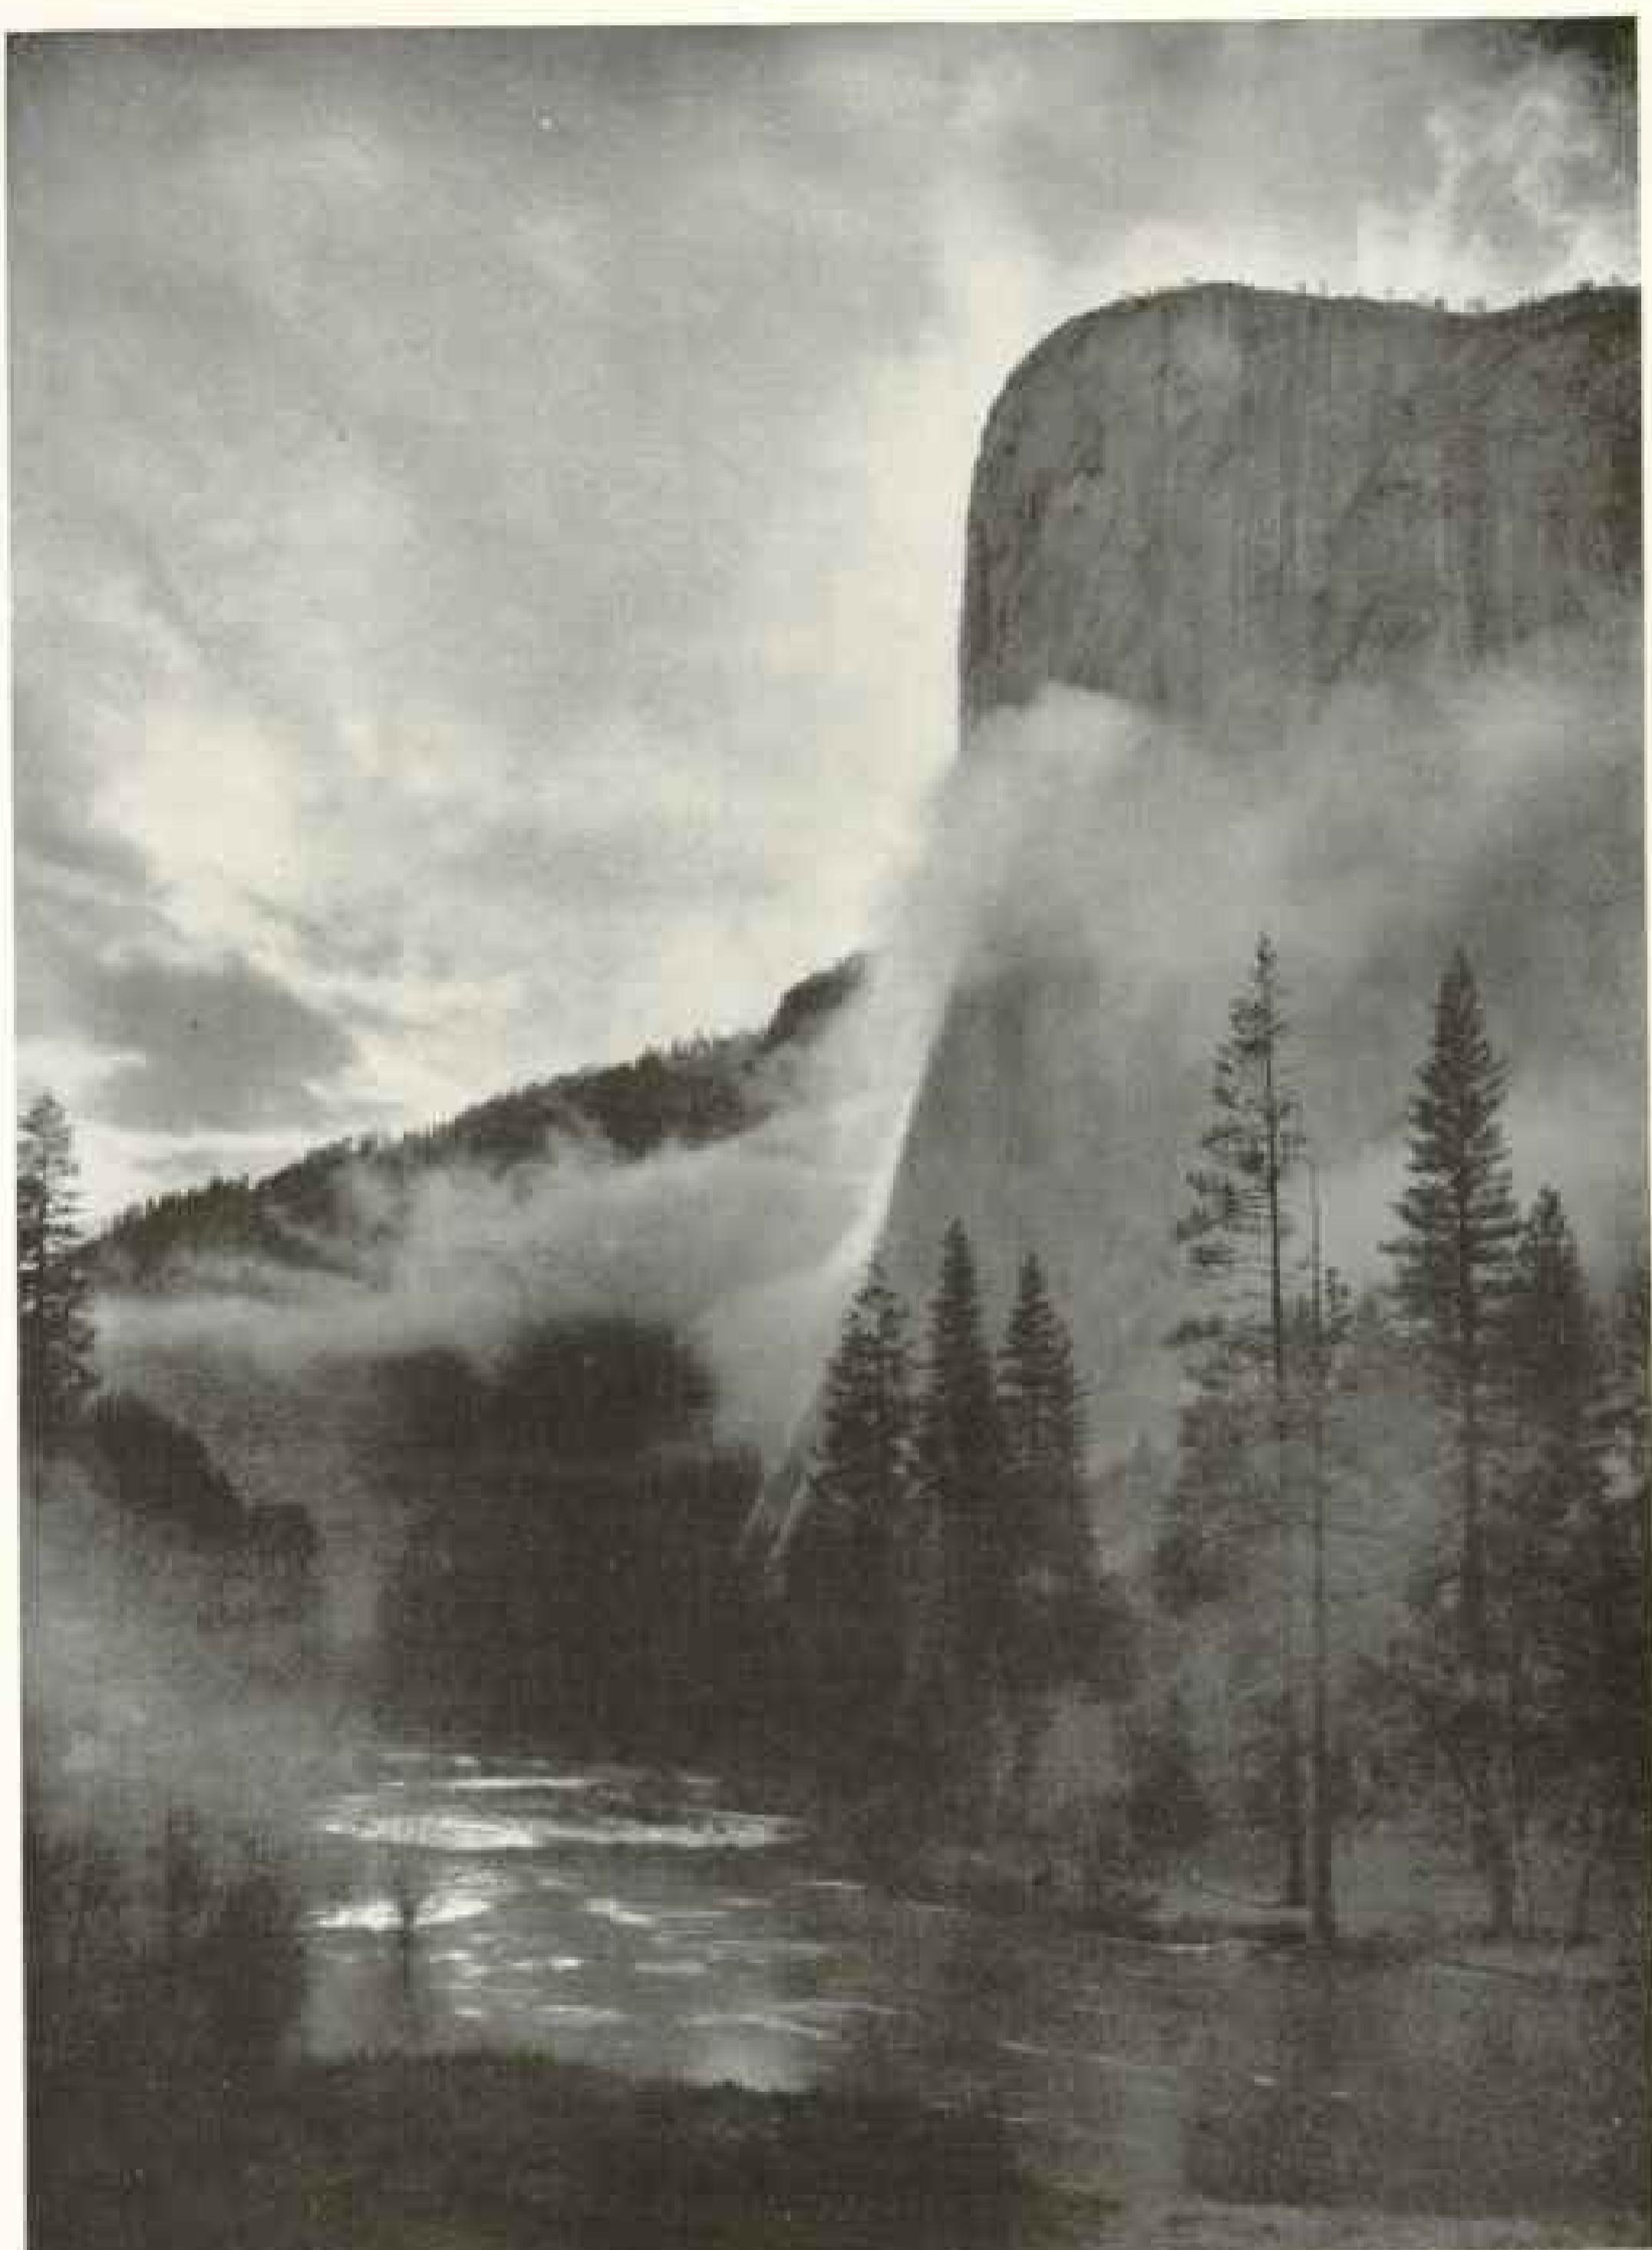

Photograph by Lemire Edir.

IN THE GIANT FOREST OF THE SEQUOIA NATIONAL PARK, CALIFORNIA

The "General Sherman" Tree, shown on the preceding page and in the frontispiece, belongs to the greatest grove of trees anywhere in the world—the Giant Forest of the Sequoia National Park. The General Sherman fortunately stands on public land, but the majority of the redwoods of the Giant Forest are privately owned. Though it was to preserve this incomparable group of trees that the Sequoia National Park was created by Congress in 1890, funds have been lacking to buy about 1,000 acres scattered through the grove, in 40-acre tracts, on which stand most of the best trees. The owners have expressed a willingness to dispose of their lands to the government and have given options on their holdings, but Congress has never appropriated the money for their purchase. If Congress does not soon appropriate the \$50,000 required, it is to be hoped that sufficient funds may be raised by private subscription to buy the private holdings in the park and donate them to the National Government. While these splendid trees are in private hands, there is always the possibility of their destruction.

THE GATEWAY TO THE YOSEMITE, WITH EL CAPITAN ON THE LEFT AND THE CATHEDRAL ROCKS AND WOOLNO FALLS ON THE RIGHT
Photograph by Mather

Photograph by Gabriel Moulton

EL CAPITAN: YOSEMITE NATIONAL PARK

Towering 3,600 feet above the Merced River, which mirrors back its beauty and its majestic lines, El Capitan, that vast block of unjointed granite, each of whose several faces shows a surface of more than 160 acres, stands in stately silence, one of the noblest rocks on earth—a literal rock of ages.

Photograph from Dewitt Hatchings

MAGNOLIA AVENUE: RIVERSIDE, CALIFORNIA

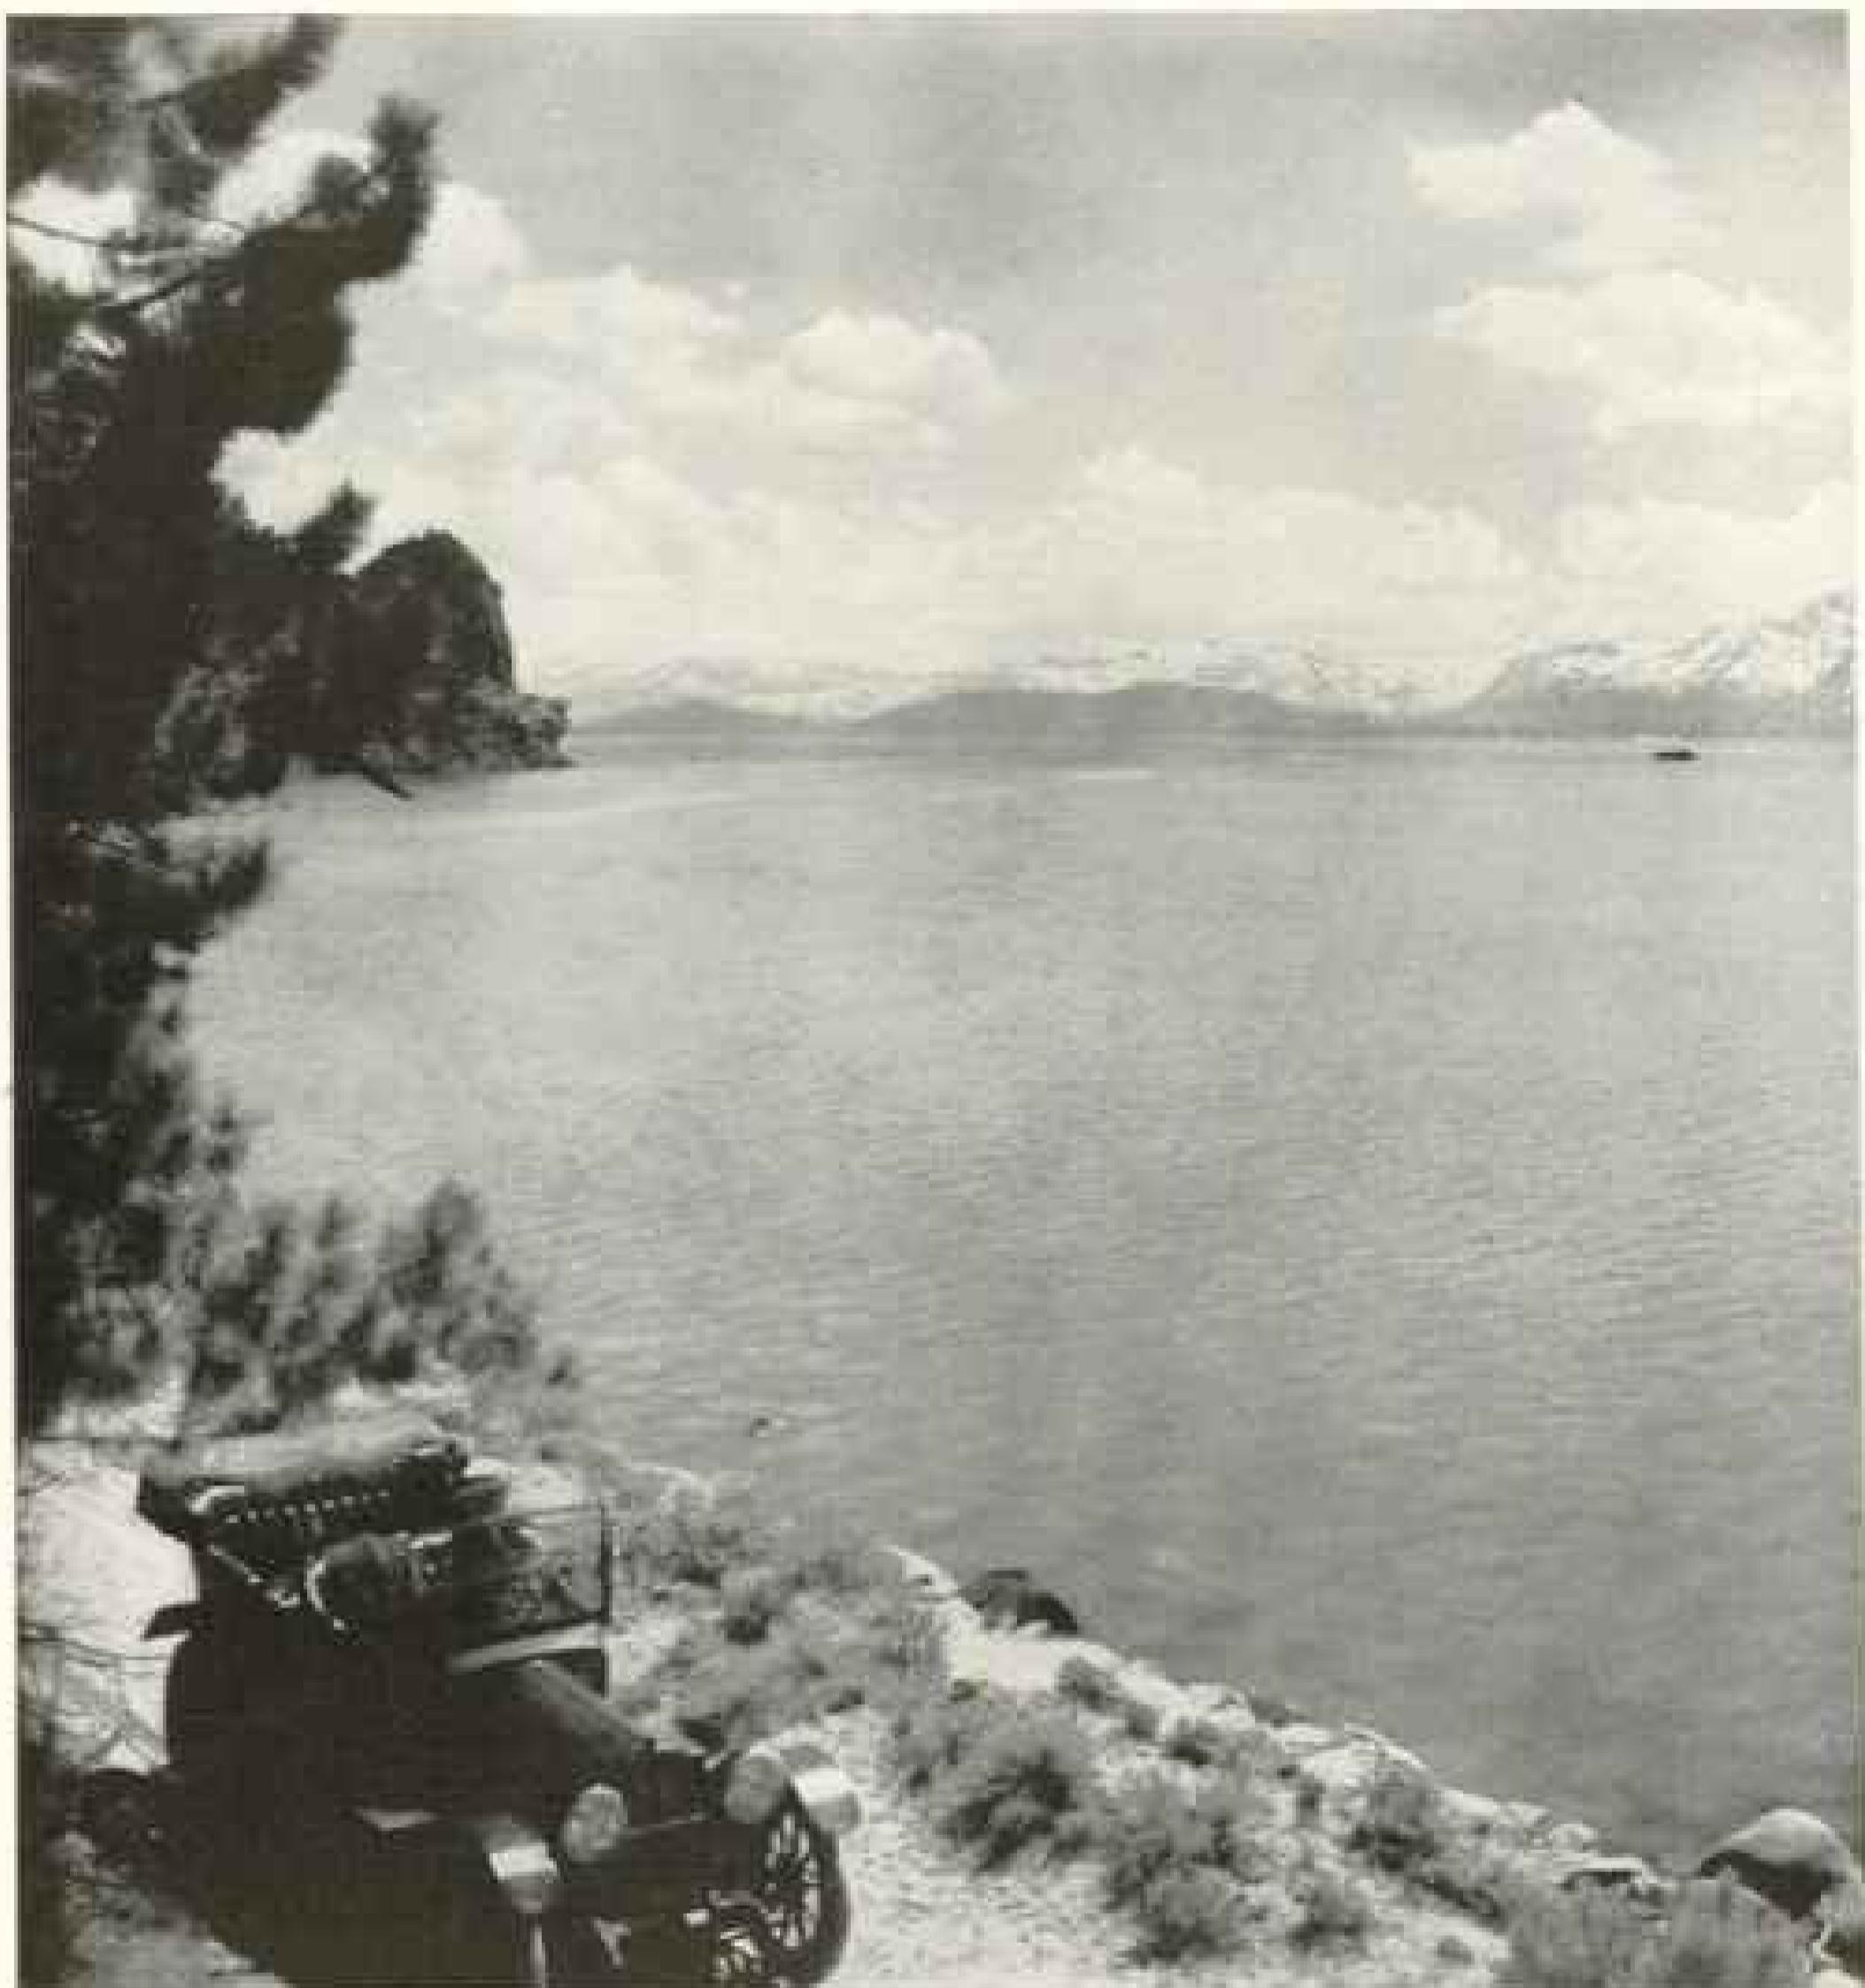

Riverside is known as the "orange capital," for from it are shipped more oranges than from any other distributing center in the world—5,000 carloads of oranges each year. Here were planted, nearly fifty years ago, the two navel orange trees, imported from Brazil, from which are descended all the seedless oranges of California.

and the King rivers, which contain scores of waterfalls and roaring streams, any one of which in Europe would draw many thousands of visitors annually. Many of the big yellow and red pines, of the juniper and cedar, eclipse the trees of Switzerland as completely as these pines are eclipsed by the giant redwoods.

And then, as to birds and flowers, the High Sierra so excel the Alps that there is no comparison. Never will the writer forget the melodies of the birds and the luxuriance of the meadows passed in the marches from Redwood Meadow to Mineral King, and then up over Franklin Pass; the fields of blue, red, yellow, orange, white, and purple flowers, all graceful and fragrant, or the divine dignity of the great Siberian Plateau, nearly 11,000 feet above the sea, and yet car-

peted from end to end with blue lupine and tiny flowers.

From the educational point of view, the High Sierra so surpass the Alps that again no comparison can be made. In one day's ascent we observed fauna and flora to see the equivalent of which on the Atlantic coast we would have to make a journey of perhaps 1,500 miles. When we started in the morning we were hearing birds that correspond to the latitude of Charleston, S. C.; in a few hours we had traveled northward to Newfoundland and Labrador, and then descended to camp amid feathered friends whose counterparts are found around the writer's farm near Washington, D. C. A day later we ascended Mt. Whitney, the highest peak in the United States, and had a glimpse of birds of the Arctic Zone.

A VIEW OF LAKE TAHOE

Snow-capped mountains and lakes of every shade of blue are scattered throughout our great Northwest in wild profusion. Seeing one after another does not dull one's appreciation of them, however; it only exhausts one's vocabulary. We cross the ocean to see the much-advertised lakes of Scotland and Ireland, which, though picturesque, are eclipsed by scores of lakes in our own land from the Atlantic to the Pacific.

Within the boundaries of the Yosemite and Sequoia National Parks tower the oldest of living things—the *Sequoia gigantea* (see the supplement and pages 412, 414, and 415).

It is an unusual experience to stand under these big trees, to gaze upon their stately proportions, to reflect upon the storms and stress they have survived, and to visualize the strange changes in

human history that have taken place since they were seedlings. Long before Moses had led the Children of Israel out of Egypt, long before his brethren had carried back to their father Joseph's blood-stained coat of many colors, long even before the birth of the patriarch whose children and whose children's children to the remotest generations the Most High promised to bless, even before the aged

THE LOWER WATER-WHEEL FALL: TUOLUMNE RIVER CANYON, CALIFORNIA

The water, sweeping madly down the Tuolumne River, now and again strikes a spoon-like depression in the hard, sloping granite, which gives it an upward and circular whirl. At high water these astounding perpendicular whirlpools are fifty feet or more in diameter.

Pyramids had reared their heads on the banks of the Nile, long centuries before the Hanging Gardens of Babylon had been constructed, these trees had begun to grow.

Thousands of years the General Sherman tree has stood, offering its head to every passing thunder cloud; but so strong and sturdy is it that, like Ajax, it can defy the lightnings. John Muir gives us a graphic picture of a sequoia in a storm: "When the storm roars loudest, they never lose their godlike composure, never toss their arms or bow or wave like the pines, but only slowly, solemnly nod and sway, standing erect, making no sign of strife, none of unrest, neither in alliance nor at war with the winds, too calmly, unconsciously capable and strong to strive with or bid defiance to anything."

The sequoia is said to be one of the two surviving species of a once numerous genus which, before the Glacial Period, spread across the American continent and occupied Europe as well. The only other survivor is the redwood of

the California coast (*Sequoia sempervirens*).

The wonders of the Yosemite National Park are easily accessible via the Yosemite Valley, where accommodations are provided for every degree of income. Desmond camps and excellent government trails enable the visitor to see the giant trees, water-wheels, and canyons, while the more adventurous, who desire to ascend Mount Lyell and its magnificent neighbors, will find entertainment in Tuolumne Meadows, at the hospitable headquarters of the Sierra Club, an organization of mountaineers who have revealed the Sierra to the world. The "General Sherman" tree is in the Sequoia National Park, reached by an automobile trip of 65 miles from Visalia.

Our national parks belong to the American people and are administered by the Department of the Interior. The Secretary, Franklin K. Lane, and the Assistant Secretary in charge of the parks, Stephen T. Mather, realize that as playgrounds for recreation and instruction

IN THE OLYMPIC FOREST: WASHINGTON STATE

It is worth a trip across the continent just to see the monarchs of the forests of California, Oregon, and Washington. The coniferous forests of these States surpass all others of their kind in the world, not only in the size and beauty of the trees, but in the number of species assembled together and the grandeur of the mountains they are growing on. The placard on the tree is one of the Forest Service warnings about fire. "Observe the six rules for the prevention of fires in the mountains. Rule One: Be sure your match is out. Break it in two before you throw it away. Rule Two: Don't throw away burning tobacco. Rule Three: Make your camp-fire small and in a safe place. Rule Four: Put out your fire with water and then cover it with earth. Rule Five: Don't make large bonfires. Rule Six: If you find a fire, put it out. If it's too big, notify a ranger."

our national parks are without rivals on any continent, and are successfully striving to make them as available to our citizens as Italy and Switzerland have made theirs. Though the parks are remote from the Atlantic coast, they are not so distant as the playgrounds in Europe, and are reached by the tourist much more easily and quickly.

Our country is the treasure-house of nature's scenic jewels, containing so many and such an infinite variety of marvels that thousands of our matchless treasures

cannot even be mentioned in this brief article: hot springs, as salubrious as any across the ocean; broad, hard, white beaches like the automobile course at Ormond, superior to any in Europe; coast scenes like those at Mount Desert, Marblehead, Mount Tamalpais, Santa Barbara, San Diego; an inland waterway which parallels the Atlantic coast and is almost continuous from Massachusetts to Florida, with possibilities for aquatic enjoyment unequaled except in our own wondrous Puget Sound; canals pictur-

CROWS POINT, ON THE GREAT COLUMBIA RIVER HIGHWAY THROUGH THE CASCADE MOUNTAINS TO PORTLAND AND ASIAN CITY SEA
"The Columbia, viewed from the sea to the mountains, is like a rugged, broad-topped, picturesquely old oak, about six thousand miles long and
measured across the spread of its upper branches, nearly a thousand miles wide; the main limbs are gnarled and swollen with lakes and lake-like
expansions, while innumerable smaller inlets shine like fruit among the smaller branches."—JON'S MUN (see also page 407).

PART OF QNST PONPLAS, IN TERR.

The great fir trees of the Northwest furnish a good proportion of the nation's lumber for structural uses. From these huge trunks enormous timbers, free from knots, are secured for bridge-building, derricks, and other engineering work. Hunting mills use quantities of this lumber, and houses, freight cars, and ships are built of it. This tree would make over four miles of plank one inch thick and a foot wide.

UPPER KLAMATH LAKE, OREGON, WITH MOUNT MC LOUGHLIN (OR MOUNT PIT) IN
THE BACKGROUND

Upper Klamath Lake excels in the profusion and beauty of its water birds. Great snowy pelicans float about on its waters like graceful yachts. There are countless great blue herons, coots, snipe, mallards, kingfishers, and different varieties of ducks, all protected by the game laws of the State of Oregon, whose citizens long ago realized the large asset they had in their wild life and have protected it. Upper Klamath Lake is reached via Klamath Falls.

AMERICA'S "LAND OF THE MIDNIGHT SUN."

When Nature passed round her gifts to the nations, even in "Land of the midnight sun" who did not分得? For in all that vast territory in Alaska lying north of Fairbanks and the Seward Peninsula the sun never sets in the summer nor rises far above the horizon in winter. The picture shows its position at midnight in summer and at midday in winter.

Photograph by Curtis & Miller

MOUNTAINCLIMBING DESCENDING MOUNT BAKER, WASHINGTON, ON AN ASCENT TO THE SUMMIT LINE. No time needs to go to Europe for mountain-climbing, for the United States can offer climbing of any desired degree of difficulty. And what a satisfaction to scale your own mountains instead of somebody's else!

WATER-LILY POND AT HOLLYWOOD, CALIFORNIA

The boy on the right is also giving baby brother a "sail"

esque as any in Holland, such as the mountain gorges and blue-grass pastures of the Chesapeake and Ohio Canal from Washington to Cumberland, or the historic Mohawk Valley of the Erie Canal—a desert with colors as heavenly as those of the Sahara and, though devoid of picturesque camels and Arabs, adorned with the most extraordinary cacti and desert vegetation on earth, and studded with marvelous works of the human hand like Salt Lake City; great fresh-water lakes,

on which you can take a voyage of one thousand miles on ocean liners; Alaska, possessing the grandest glaciers in the world outside the polar regions, fiords more impressive than Norway's, and mountains like Mt. McKinley, which towers nearly one mile higher than the loftiest peak in Europe.

Any of our readers could spend an entire lifetime seeing nature's masterpieces within our boundaries and not reach the end of the catalogue.

In the Spring the young man's fancy
Lightly turns to thoughts of sport.
Then to make you spry and prancey
Food like this is just the sort.

A Spring Favorite—

Exactly the food you enjoy, and exactly the food your system calls for. Both at once.

Now is the time to modify the heavy winter diet. You want to "thaw out"—just as all nature is doing. Your digestion, your nerves, your whole constitution feel the benefit of

Campbell's Vegetable Soup

It supplies the strengthening qualities of good meat together with the tonic elements and vegetable salts that every one specially needs at this season.

The strong, full-bodied stock is made from selected beef. In this stock we blend an abundance of choice vegetables—potatoes, carrots, yellow turnips, tomatoes, green okra and other fine vegetables—beside "alphabet" macaroni. The whole is flavored tastily with celery and parsley and just a touch of sweet red peppers to complete the appetizing zest.

Why not enjoy the regular benefit of this invigorating Campbell "kind" on your table? Order a few cans from your grocer and have some today.

Campbell's SOUPS

LOOK FOR THE RED-AND-WHITE LABEL

"Mention the Geographic—It identifies you."

"What! My Car?"

"Yes! skidded—and it's up to you. You failed to provide the chauffeur with Tire Chains. Only good luck saved your wife from paying the supreme penalty for your negligence. She's on the way to the hospital, painfully injured, but the doctor thinks she'll pull through. You'd better hurry to the hospital and then report to Headquarters".

How strange it is that disaster must come to some men before they realize that all makes and types of tires will skid on wet pavements and muddy roads when not equipped with Chains.

These men do not appreciate, until too late, that by failing to provide Weed Anti-Skid Chains they expose

their families to injury and death.

The time to provide against accidents is before they happen. Don't wait until after the first skid. Put Weed Chains on all four tires at the first indication of slippery going and you will have quadruple protection against injury, death, car damage and law suits.

Weed Chains are Sold for All Tires by Dealers Everywhere

Now it's GLACIER NATIONAL PARK

Established as America's Vacation Paradise

Discovered by thousands of American Tourists, who, deprived of the Old World, found a still greater wonderland at home. They came last year to Glacier National Park, Uncle Sam's greatest playground, twenty thousand strong. Many of them were second- and third-timers—answering again the call irresistible of the "land of shining mountains."

YOU step into a new world at Glacier Park. You measure Nature with a newer, bigger vision. Above you rise the towering Rockies—the far-stretching Continental Divide—cloud-piercing peaks and glistening glaciers; skyland lakes of turquoise and emerald.

Tour by auto-stage or go by saddle-horse, or over wide, safe trails about. Stop at splendid modern hotels or Swiss chalets, or live in a tepee; cook your own meals.

Vacations, \$1 to \$3 per day.

Great Northern through trains of supreme comfort daily reach this vacation country. Low round-trip summer tourist fares via Great Northern, from June 1 to September 30.

Handsome illustrated Glacier Park booklets giving exact expense figures—mailed free. Send for copy now. Write for information concerning Pacific Coast and Alaskan tours.

A Proven Mechanism

The New and Greater **CHANDLER SIX**

THE new Chandler bodies, the most beautiful of the season's offerings, are attractive indeed. The New York and Chicago Show crowds admired, and purchased in great numbers, the new Chandler touring car and the new four-passenger roadster. At all the shows the country over, the New and Greater Chandler has been the center of greatest attention.

But the vital reason why so many thousands of motor-car buyers are choosing the Chandler is the established and known excellence of the Chandler chassis—the Chandler mechanism.

In every essential way it is the same chassis on which, for three years, all Chandler bodies have been mounted. **THERE IS NOT A SINGLE HINT OF EXPERIMENTATION.**

"The Marvelous Motor," built in the Chandler factory ever since this Leader of Light Sixes was first put on the market, has won its laurels and *still holds them*.

It has always been powerful—powerful enough to do with ease anything that you could ask any automobile to do.

It has always been speedy—speedy enough to go faster than 999 out of every thousand car owners would ever want or dare to drive.

It has always been flexible—slowing down to a mail's pace on high, and jumping away instantly at the touch of the throttle.

\$1295

It has always been economical in operation—owners averaging 16 miles per gallon of gasoline, 700 miles per gallon of oil, and 7,000 miles per set of tires.

For three years it has had, and today has in even greater degree than ever before, *all* of these qualities you rightly demand in a high-grade motor car.

It is a *known quality*.

And, more than ever in the past, automobile buyers this year recognize the security of dealing in known quantities.

The new catalogue illustrates the seven-passenger touring car, the four-passenger roadster, other body types, and all the mechanical features.

Cave Life or Civilization

Civilized man is distinguished from the cave man by his habit of co-operation.

The cave man lived for and by himself; independent of others, but always in danger from natural laws.

To the extent that we assist one another, dividing up the tasks, we increase our capacity for production, and attain the advantages of civilization.

We may sometimes disregard our dependence on others. But suppose the farmer, for example, undertook to live strictly by his own efforts. He might eke out an existence, but it would not be a civilized existence nor would it satisfy him.

He needs better food and clothes and shelter and implements than he could provide unassisted. He requires a market for his surplus products, and the means of transportation and exchange.

He should not forget who makes his

clothes, his shoes, his tools, his vehicles and his tableware, or who mines his metals, or who provides his pepper and salt, his books and papers, or who furnishes the ready means of transportation and exchange whereby his myriad wants are supplied.

Neither should he forget that the more he assists others the more they can assist him.

Take the telephone specialists of the Bell System: the more efficient they are, the more effectively the farmer and every other human factor of civilization can provide for their own needs and comforts.

Or take our government, entrusted with the task of regulating, controlling and protecting a hundred million people. It is to the advantage of everyone that the government shall be so efficient in its special task that all of us may perform our duties under the most favorable conditions. Interdependence means civilized existence.

Bull Dog Garden Hose

Lasts Longest

DID you ever use a garden hose 15 years? Here is a man who did—Read his letter—

Boston, Mass., August 12, 1915.

Gentlemen:—

"Some 15 years ago when I started housekeeping I bought a 50-ft. length of 'Bull Dog' hose. Last year I discarded it and bought another hose which was recommended to me by a salesman in a local store and which I have now had about a year. This new hose has given out in several places so that it is practically worthless and I need a new one."

"I should like very much to get another length of 'Bull Dog.' Can you fix me up by sending me a 50-ft. length?"

(Name on Request)

Garden hose seldom wears out—it usually dies and falls to pieces. "Bull Dog" hose lasts longest because there is plenty of live rubber in it.

"Bull Dog" 7-Ply Garden Hose

Made $\frac{5}{8}$ in. with $\frac{3}{4}$ in. connections—18c a foot—in 25 and 50 ft. lengths

If a popular price hose is desired, our Good Luck brand at 10c a ft. is your best selection. It is the popular priced expression of the "Bull Dog" standard. There is no better hose at the price.

Your hose will serve you best when equipped with a "Boston" Spray Nozzle. It is easy to use, cannot get out of order and gives you a shower, spray or mist. 50c at your dealer's.

Our practical booklet "How to Make Your Garden Grow" is full of helpful suggestions. Send 4c to Dept. N.

Holstein Cows' Milk and the State Requirements

The efforts of State Boards of Health to protect the public with regard to its milk supply are commendable, but in many localities the milk standards adopted are absolutely contrary to the actual truth, as proven repeatedly by food chemists and physicians. In some States milk standards have been enacted into law which totally disregard the fact that it is the proteins, the flesh, strength, and muscle-building qualities of milk, which are desirable, as well as the fat content. Pure-bred Holstein cows' milk, possessing the great and indispensable food-value, "proteids," in superior quantity and being low in fat percentages, is sometimes discriminated against by ill-advised laws and people who do not know, and yet it is acknowledged by experts to be the milk best fitted for mankind.

Ask your milk man for Holstein cows' milk. If he fails to provide you, send us his name and we will try to secure a supply for you. Send for our new free illustrated booklet, "The Story of Holstein Milk."

"Mention the Geographic—It identifies you."

A new material has come into the world

By means of this important discovery food is now baked in transparent glass dishes so durable that the hottest oven will not break them. This glass transmits heat so perfectly that the food bakes faster and more uniformly, holds its flavor better and *does not burn*.

The progress of the baking can be seen right through the dish.

This practically does away with guess-work. The quick baking saves time and fuel. It makes a noticeable difference in your gas bill where gas is used.

Pyrex dishes do not chip, craze nor flake—This eliminates a serious danger. They do not absorb grease nor odors. They are not affected by acids nor alkalis. They are tough and stand rough handling, and are easily washed, as food does not stick nor burn on, and every speck is seen at a glance.

The use of Pyrex insures a sense of absolute cleanliness and efficiency.

PYREX

Glass Dishes for Baking

The only glass that does not break in the oven

A large variety of shapes and sizes, ranging in price from the Ramekin at 12½c to the Large Casserole at \$2.

Suitable mountings are now obtainable through dealers.

MONARCH STRIPS

and cold. By preventing the ingress of dust and soot they promote health and protect furnishings and hangings—save the expense of frequent cleaning. By eliminating drafts they increase comfort and reduce the cost of winter heating from 20 to 40 per cent.

The MONROE

A Refrigerator of Supreme Quality

Ideal refrigeration requires 100% perfection in FOUR POINTS:

- (1) Cleanliness.
- (2) Coldness—or low temperature.
- (3) A scientifically correct circulation of air.
- (4) Ice Conservation.

Some refrigerators have a high percentage in some of these points. But the high rating in all four points goes to the

"MONROE" Refrigerator

Cleanliness is assured by the "Monroe's" solid one-piece porcelain food compartments—all corners rounded. No metal to corrode. No enamel to chip. Not a single crack, crevice or corner to harbor dirt or germs. Easy to clean and keep clean. Circulation of cooled dry air is secured by doors scientifically installed.

Low temperatures are obtained by heavy and high-class insulation—tight-fitting doors and automatic locks which prevent leakage of cold air.

All these things mean ice conservation and small ice cost.

The "Monroe" is not sold in stores. We ship from factory—factory prepared—on 30 days' trial.

GET OUR FREE BOOK
Illustrating "how-to-order" fixed facts—and how you may judge the "Monroe." It will measure up fully to all of your requirements. There is no obligation. Your name and address will bring the book promptly.

Use Tree Tanglefoot

on Shrub and Orchard Trees against Gypsy, Brown-tail, and Thinner Caterpillars, Cutworm Worms, Clothing-Cat Worms, and Ants. It is equally effective against any crawling insects.

Band Trees About Two Weeks Before Insects Appear, to Get Best Results

Readily applied with wooden gathet. One pound makes about fifteen feet of band. Our application maps thirty 3 inches apart longitudinal to 30 trees and other substances. Remains effective only or longer. Won't rot—won't run or melt, yet always elastic, expanding with growth of tree. No mixing; simply open can and use. Will not injure trees.

For Tree Surgery

Tree Tanglefoot is superior to anything we the market—it is the best application after pruning or trimming. It will water-proof the trunk of a tree or a limb or wound in a tree when nothing else will do it.

Sold by All First-Class Dealers

1-lb. cans, 10c; 1-lb. cans, 45c; 10-lb. cans, 50c; 10-lb. cans, \$1.00, and 15-lb. wooden pails, \$1.75.

Write today for illustrated booklet on Leaf-eating Insects. Mailed free.

Are you really a judge of cigarettes?

Have you tried a good many varieties in the search for the one cigarette which will be distinctive enough to stand out from the crowd?

The wider and more varied your experience, the more probably Rameses will appeal to you.

The "Aristocrat of Cigarettes" has a distinction and unforgettable character of fragrance which makes it the choice of men of discrimination.

They like its flavor, but more than that they approve of its radical and vital difference from the regular run of brands. It is itself an individual—unmistakable—character-marked.

And nobody ever changes from Rameses.

STEPHANO BROS., Inc.
PHILADELPHIA

To whom will you entrust your priceless trees?

— to tree surgeons whose methods are scientifically accurate and mechanically perfect, who save your trees without guessing or experiment?
— to tree surgeons made absolute masters through long study and practical training, before given any responsibility?
— to tree surgeons who are MEN—paid men—chosen because they love trees, and because they are honest, honorable, and intelligent?
— to tree surgeons who are backed by a responsible business house which has but one standard—*superior tree work, always!*
— to tree surgeons who were selected officially by the U. S. Government, after exhaustive investigation, because they are best.
— to tree surgeons whose record of successful performance spans a period of many years!

— to *Davey Tree Surgeons*—the only tree surgeons who measure up to these standards of super-excellence.

Take the dependable and satisfying course, and go to the Davey organization. Learn the real condition and needs of your trees from this expert source without charge. Every year of expert work 16% to 25% to the cost of saving trees. Write today for free examination and instant literature listing Davey Tree Surgeons.

UNION PACIFIC POPULAR AND DIRECT YELLOWSTONE ROUTE

SPEAK A FOREIGN LANGUAGE!!

The War has created additional commercial opportunities for those who know Spanish, French, German, or Italian. Take advantage of the War situation! Better your position and increase your salary. Extend your business. English export trade with South American countries. Equip yourself to read foreign books and papers. Brush up on the language you studied at school or college and make it practical. Acquire a new language without delay.

LANGUAGE-PHONE METHOD

And Rosenthal's Method of Practical Linguistics
(Highest Award Panama-Pacific Exposition)

This is the natural way to learn a foreign language. You hear the living voice or a native professor pronounce each word and phrase. He speaks as you do—slowly at first, for minutes at a time; then a peasant, bantering smile; no tedious rules for memorizing. It is not expensive—All members of the family can use it. You steadily practice during spare moments or at convenient times, until a surprisingly short time you speak, read, and understand a new language.

It's free free "Language Treatise," particularly a "Treatise on Early Education," our records at all talking schools.
The Language-Phone Method 950 Palman Bldg., 2 W. 45th St., N.Y.

"SEE-BY-NIGHT"

A double-duty compass for motorists, hunters, trappers, fishermen, etc.

Bright (and at night far better than day); Permanently luminous North and South points.

Floating jeweled aluminum dial; gold-filled hunting case; and automatically lined off point when case is closed, preventing unnecessary wear. Guaranteed accurate forever.

Sold by the better class opticians and scientific instrument dealers. If dealer hasn't them, write.

APPALACHIAN COMBINATION TENT AND PACKSACK

PATENT APPLIED FOR

This is a tent and a pack as well, for it folds up in the ground-cloth, which in turn when folded and laced on the sides becomes a pack, 23x22 inches, with shoulder straps for easy carrying. The pockets are 8x12 in. After the blanket is folded in the tent and the pack is made up, there remains ample space for other duffle.

Made of green waterproof material, with bobbinet front and window in back. The stormproof "V" slanted front (not shown in picture) can be quickly snapped in place. It is practical, well constructed, and intended for the hardest kind of service.

Size, 7x4 ft.; will sleep two; weight, 8 lbs., \$17.50.
" " " " three, " 11 " 20.00

Send for Free Catalog

This tent and hundreds of other articles for the Camper, Explorer, Fisherman, and Hunter are described in our 32-page "Sportsman's Handbook" and catalog. Sent free if you mention No. 186.

BUY DIAMONDS DIRECT

FROM JASON WEILER & SON

Diamond Importers, Boston, Mass.

and save 20 to 40 per cent on retail or jewelers' prices

For over 40 years the house of Jason Weiler & Son of Boston has been one of America's leading diamond importers selling to jewelers. However, a large business is done direct by mail with customers at importing prices! Here are four diamond offers—direct to you by mail—which clearly demonstrate our position to name prices on diamonds that should surely interest any present or prospective diamond purchaser.

1 Carat, \$95.00

This 1-carat genuine diamond is of great brilliancy and perfectly cut. Mounted in ladies' or men's style 14k. solid gold setting. Money refunded if your jeweler can duplicate it for less than \$125.00. Our price, \$95 direct to you . . .

Men's Diamond Ring

\$175.00

Perfectly cut blue-white diamond mounted in 14k. solid gold pierced setting, in the new olive finish. Diamond is securely embedded in solid platinum square top. Money refunded if your jeweler can duplicate this ring for less than \$250.00.

3 1/2 Carats, \$595.00

This 3 1/2-carat genuine diamond is of great brilliancy, fine color, and perfectly cut. Mounted in ladies' or men's style 14k. solid gold setting. Money refunded if your jeweler can duplicate it for less than \$725.00.

Money refunded if not entirely satisfied

If desired, rings will be sent to your Bank or any Express Co. with privilege of examination. Our diamond guaranteed for 5 years' full value goes with every purchase.

We refer you, as to our reliability, to any bank or newspaper in Boston.

Self Regulating!

The Patent & Inimitable Spoon Feed

on every

Waterman's Ideal Fountain Pen

Regulates the Ink Flow
to the very last drop in the Pen

There are other
flat feeds, but
not Spoon
Feeds

Just as the impulse to walk faster or slower automatically increases or reduces one's speed, so the desire to write heavily or lightly reflects itself unconsciously in increased or decreased pressure upon the nib.

Such pressure upon a Waterman's Ideal regulates the ink flow.

In this way: The patented Spoon Feed—a system of fissures and reservoirs—holds in check and readiness the ink stored in the barrel. The slightest pressure on the pen releases a certain quantity of ink, which travels to the pen point just as quickly as it can be utilized.

Under heavy pressure a more ample supply of ink is fed to the nib, but without blotting.

Just sufficient ink for the need of the moment. No more, no less. Here lies an important part of the great success of Waterman's Ideals.

The service cannot be estimated on the surface.

Hyacinths,
Tulips, Narcissi,
Crocus give, for a

small outlay of time and
money, an abundance of flowers in the house from
December until Easter, and in the garden from
earliest spring until the middle of May. Bulbs are
grown almost exclusively in Holland, in enormous quantities, and sold
at very low prices. Usually they cost double before reaching you.

By ordering now we save the cost of waiting until Fall, you make a
large saving, get a superior quality of bulbs not usually to be obtained
at any price in this country, and have a much larger list of varieties to
select from.

Our orders are selected and packed in Holland, and are shipped to
our customers immediately upon their arrival, in the best possible condition.

DARWIN TULIPS—We can now supply the magnificent and highly-prized Darwin Tulips at a great reduction. They are sensational in
their beauty and should be included in every garden. They last for
many years.

If you wish to take advantage of our very low prices, we must have
your order **not later than July 1st**, as we import them to order only.
They need not be paid for until after delivery, nor taken if not satisfactory.
(Refund guaranteed from new customers.) For prices on
smaller quantities, see our Import Price List, the most comprehensive
catalog of bulbs published, which may be had for the asking.

We will send you without obligation a copy of our booklet,
"The Art of Paper Making"

This booklet was prepared in order to give the many business men who haven't time to *study* paper making an opportunity to grasp in a short time the fundamental difference between cheap papers and fine bond papers.

Old Hampshire Bond

The success of many firms depends upon their letters and printed matter, and the success of these rests squarely upon paper; so you see a little knowledge about paper is an important thing.

We offer you this book and invite you to send for it for these reasons and because it is to our interest that buyers of bond paper know what bond paper is.

If you ask for it we will include with this book a portfolio of sheets of Old Hampshire Bond, which is the real thing and which never looks better than when it is compared directly with a cheaper paper.

"Mention the Geographic—It identifies you."

Good Light for every room

Each room has its use which calls for a particular kind of light. What is right light for one room may be wrong for another.

Dining-room—subdued light for family meals, brilliant for entertainment.

Parlor—soft gentle light when receiving callers, brilliant light for parties.

Living-room—restful general illumination, with portable lamps for reading.

Bed-room—soft, gentle illumination with extra lights at the dressing-table and bed.

And you want beauty where beauty counts.

Macbeth-Evans Decora Picture

Macbeth-Evans Lighting Fixtures

are made in many designs, with various kinds of glassware, to give the light required for different rooms and to harmonize with your color scheme and style of furnishings—Adam, Colonial, etc.

Alba makes seeing easy and comfortable and gives the most light from the current. *Decora* (illustrated above) is a beautiful, softly tinted glassware that gives gentle restful illumination with a touch of color.

Our portfolio "Good Light for the Home" tells about the different kinds of light for each room and shows Alba, Decora and other Macbeth-Evans Equipment for the purpose. Send for this portfolio.

50,000 Banks— cash "A.B.A." Cheques

The banks of the world have such great confidence in the Travelers' Cheques of the American Bankers Association that 50,000 banks will cash the Cheques at full face value, and the only identification required is the counter-signature of the owner of the Cheque in the presence of the person cashing it.

But usually it is not necessary to cash "A.B.A." Cheques, because hotels, railroads, steamship companies and merchants throughout the world accept them as readily as money in payment of services and purchases.

"A.B.A." Cheques are safe to carry, since Cheques not countersigned which

have been lost or stolen are of use only to the original owner, and may be replaced upon proper application.

"A.B.A." Cheques are sold in denominations of \$10, \$20, \$50, and \$100, and the premium charged is insignificant in view of the protection and convenience afforded the traveler.

Get them at your bank

If your bank is not supplied, write for booklet and information as to where "A.B.A." Cheques may be obtained in your vicinity.

RIGHT OF WAY

THE man who drives a Packard Twin-Six owns the road. His car is the accepted gauge of ability and value. Its twelve-cylinder motor is the master of any situation, whether that situation demand sustained racing speed, downright exertion, or the smoothest, softest action. In the service of more than 4,000 owners it has shattered all traditions of automobile sufficiency.

The Packard Twin-Six engine was a logical development by a company that for seventeen years has been the recognized leader of automobile progress. Now it has the clinching endorsement of the most exacting clientele in the world.

The Packard Motor Car Company repeats with greater emphasis than ever before:

"Ask the man who owns one"

The "I-25," with any Open Body, \$2750, f. o. b. Detroit
The "I-35," with any Open Body, \$3150, f. o. b. Detroit

INVEST your Road Tax in Perma- nent Roads of Concrete instead of SPENDING it for Repairs

Millions of dollars are wasted every year in this country keeping up roads which won't "stay kept" under heavy motor traffic. It costs an average of \$600 per mile per year to maintain a road of macadam under such conditions. In New York the cost is reported by the State highway authorities to be approximately \$1,000 per mile per year. Think of it! 5% interest on \$20,000—a sum sufficient to build $1\frac{1}{3}$ miles of concrete road which would cost about \$50 per year to maintain. The first cost of concrete averages less than a third more than that of ordinary macadam; the upkeep is about one-twentieth as much.

Read this statement from the 9th Annual Report of the Road Commissioners of Wayne Co., Mich. (Detroit), about their concrete roads:

"We have never taken up and replaced a twenty-five foot section since we have been building and developing this type of road, and its freedom from ruts and holes has permitted us to devote our energies and money to new work instead of resurfacing and repair work, which forms so large a part of the activities of other communities where a less durable type of road has been built at the outset."

An illustrated booklet, "Concrete Facts about Concrete Roads," will be sent free upon request to any one interested.

The graduation gift that endures

Graduation! What an epoch it marks in the life of the young man or young woman! It is the end—and the beginning. Laying aside schoolbooks forever, the student steps forth from the classroom—into the world.

Your gift at such a time should possess, above all, the quality of permanence. Such a gift is the Gruen Verithin or Wristlet Watch.

Adjusted Models, guaranteed to come within railroad time requirements. Precision Models, guaranteed to come within observatory time requirements, recognized by authorities to be the highest time-keeping perfection obtainable.

\$25, \$30, \$35, \$40, \$50, \$75, \$85, \$100, \$150, \$200.

The Dietrich Gruen, the world's finest pocket timepiece, \$265 to \$650.

The Gruen Wristlet Watch, the woman's watch of today—and tomorrow.

\$25, \$30, \$35, \$40, \$45, \$50, \$75, \$100. At good jewelers everywhere.

Write for "One Word from a Woman's Lips"—a booklet on watches and small watchmaking every one should read before buying a timepiece.
